Notes from HEALTH WORKSHOP 46 16 November 2015

0006: You can use the output from the power unit to energize your health unit – which will do the same as the pain pen does now but on a wider scale.

0039: You create a Magrav field in respect to your own field, and then you adjust it – do you want to give more? Is it needing? – so if its needing you feed it – if its giving you take it back.

0040: Teaching this morning in the Health section – was all about making copper coils – lot of people are making pain pen coil and power system coils – it's the same thing but you have to understand the flow of the plasma – do you allow the coil to have a bend in? or do you allow your coils to have feeding out? Are you taking or are you giving? Look at where you are touching – and do you make another 2 coils on top of the inner coils? Then the INNER coils will give or feed the emotional condition and the outer coils will give or feed the matter condition. The pens you are using are only touching the surface and dealing with a matter state condition.

0046: The new psychosomatic pens are beautiful – just like Italian women – you want to get sick just so that you can see them! Draws coils upon coils showing how to polarize the energy by bending the end of the wire – (this is not an infinity coil system it is energy feeding and feeding out at both ends in the form of a pain pen - prompted me © to start winding copper on a spiral eucalyptus branch with quartz crystal to try and understand the flow of the energy – different levels giving – taking – touching – the healing effect of a pain pen with 4 coils on physical and emotional field effects on the tissues making things like cancer just dissolve away – even more coils making it even more powerful...)

0047: Simple explanation of plasma – just like a Sun – it radiates – it gives and it receives. It is a magnet – it has a N pole and S pole. You give gravity to pull the pain you give energy to magnetical to take what is short.

0049: You can wind to receive. Gravitational inside receives, Magnetical outside gives. Don't connect them at the top – bend them both over or leave open. The gaps between the coils are important. If you want to add to emotional part you close the coil tops - you want to take from physicality you allow it open. Do not connect G and M. The central pin is the nervous system.

0058: It's the same as the stacker when you look at it.

0105: These days operating theatres use entirely copper – has a sterilizing property – industry is very interested in the nano coating process – it has all sorts of applications – eg: as in replacing the role of fluoride in Teflon – non stick surfaces – MK is off for a meeting today with Industry developing nano coated Teflon type materials Put the CO2 GANS at the tip of the pen to balance emotions

0130: Rebecca Lim's plasma belt around the waist very helpful in detoxification

0140: Severe sinus condition treated with mini health pens in a headband

0148: Use of CO2 Gans in a hot water bottle

0153: MK comments on the history of the use of the belt in ancient Jewish and Egyptian lore – its part of the priest's apparel with the Robe

0200: MK discovers how to make plasma colors and flowers of life on his new color teaching board!
