Notes on HEALTH WORKSHOP 47 (Also the 19th Chinese Workshop & International Knowledge Seekers Workshop) Tuesday 24 November 2015

For some time now with the Keshe teachings it has been traditional to have the Chinese workshop and the Health workshop on Tuesdays and the Knowledge Seeker Workshop on Thursdays, with all the rest of the days being private teaching for the growing online class, and for visitors at the SSI in Barletta. This workshop started out as the 19th Chinese workshop and then merged into the 47th Health workshop being the precursor to the 1st International Workshop the following Tuesday... These notes were prompted by MKs comment in the 89th KS Workshop on the Thursday following this (Posted on November 29) to go back and watch the Tuesday workshop for more elucidation on one of the topics...

0000 Starts out by discussing a replica of the human body made with copper coils and interpreted with the Chinese system of medicine with elements of fire air earth water and wood – question whether by increasing the energy to the kidneys it might create lift – K: doesn't know – comments that this is what we will look like when we go to space – less need for the physical part...

0034: Nano coated copper coil acupuncture needles – not to penetrate the skin – creates a field condition – doesn't matter which way it is coiled – left hand right hand doesn't matter

0038: Questions and notes on Magrav power unit attached to the Fatboy reactor, a car unit, automatic nano coating of copper wires attached to a nano coated copper plate. Lots of specific questions about nano coating and Gans making

0049: Question: When I input electricity to produce Gans, if I used boiled water the Gans is earth yellow, and if I use unboiled water the Gans is green. Is there any difference between the kind of Gans? MK says boiling the water changes the environment so it creates a faster charge. MK talks about a similar problem they had in the factory with the copper making different types of Gans and they found that some of it had an oil cover after the extrusion process and this interacted with the environment and made a different Gans – they had to wash the oil coat off with cold caustic. He found that if he put 2 and half volts he got a black Gans and if he did it slower he got brown, and if he went very very slow he had a blue green colour.

0055: Chinese feedback on nano coated copper having superconductor properties – very exciting – MK responds to really have superconductivity you have to drill a hole through the wire – draws a diagram.

0105: More details on how to add plasma to the Fatboy – the energy is transferred along the nano layers – not the actual wires going into the bottom of the reactor – so this is superconductive. Another way to do it is with very very fine nano coated hollow tube

0121: Rick moves the workshop from the Chinese workshop to the Health workshop. MK tells him to carry on recording and then post the same video under both headings.

0122: MK goes back to something extremely vital – when you come to a point then we teach you further. You have made the power unit so you can now take it and work with the plasma. It is a matter of feeding different strength Ganses from the unit to another environment – you can create a plasmatic environment to create anything – Gold, silver, food, medicine. You can make a container, box and then put your different magrav fields onto the walls of the box. If you apply this knowledge you should be able to show us gold, silver, aspirin, orange

0134: The way to do it is how you saw Alekz transfer the essence of orange – now you have the plasmatic field of the orange in your hand – place it inside your box and you will have an orange. This is what we will be teaching in the new term (in 2016) – this is the beginning of it. You've learnt

how to make nano layers, then Gans, then how to open the plasma – now we teach you how to make materials from plasma

0145: This is the key to the beginning of the space technology. This is no different from the early reactors that we put Gas in , then Gans, now for the first time you put plasma in. This is the way the universe works, independently of any matter state.

0147: So you have different strength plasma coming in from the power supply (see photo of MK's board illustrating this) you then connect them – in the same place as we saw the magnets on the cup – you create the condition and see instantaneous healing.

0151: Or you can coat the wire to different parts of a room and sit in it as well (he is talking about a healing chamber) Walk in with Cancer or Multiple Sclerosis and walk out without it)

0202: WE go in the direction of plasma that controls the emotion and then the emotion heals the physicality. Also looking at manifesting anything from plasma – for example if a building (or a spaceship) puts out the GM field of water then you don't need to drink – you just absorb it. (People from the Maori tribes of Aotearoa had this knowledge – I © once spent 3 months with a tohunga by the name of Mac Ruka and never saw him put anything in his mouth except a bit of orange juice and black coffee – he was a very large man but never dropped a kg during this time and he could absorb his food through others eating for him – now getting some glimmerings of the plasma science that can retrain the human race in those abilities)

0208: Question: Where do the wires from the Magrav unit come from? (Where are they attached?) MK: You have 2 coils in the center and 2 coils in the outer. The 2 coils in the center are emotional – what you receive and what you give out – and the 2 coils in the outer are the physical – what you receive and what you give) If your intention is to satisfy your emotion you can increase the power from the center core from the magnetical part. If your intention is to receive something you're lacking you use the gravitational side of your system.

0211: Question: What if what we need from plasma is not what we want?

The balance inherent in plasma is perhaps not what we want – to what extent and how accurately can we control the plasma? Do we need to adjust our way of thinking or being to be more effective in our plasma manipulation? Or is this the natural progression and outcome of working with plasma? MK: Both ways – you take what you need at the time you need it and we will learn how to control what we need because we realize that sometimes through the process of physicality we don't need to adjust the system for the physical part of the body but the emotion will control the physical part. People who build these systems for energy, food, and medicine will soon understand one thing – you build these machines how you like – you take from it what you like – you will take from it for emotional balance and the physical part will follow – so if you focus on the emotional side of the plasma you will always receive exactly what you need.

0215: Question: Can we apply the tech to control the mosquito population?
MK: Yes – same as you control tigers so they don't need to eat anything. No animals will eat another animal – this is just the beginning of it - (as prophesied in the Holy Books for example Isaiah 11:6 the wolf will dwell with the lamb, And the leopard will lie down with the kid, And the calf and the young lion and the fatling together; And a little boy will lead them. (NASB)

0218: Is the SSI in Barletta fully nano-coated? MK: No it will take months, the building is too big!

0220: A question re HIV/AIDS. MK tells the person to get in touch but says it is easy to treat with CO2 Gans. Talks about the way Renan in Phillipines demonstrated his pain pads, with a sheet of toilet paper dampened by the CO2 Gans water, and sealed into a plastic bag – put in a bag and wrap your body in it. This technology is made for AIDS – or any virus (eg Ebola) Sleep with the CO2 Gans (tissue inside sealed bag) and sleep on it.

0230: You can use a very very small amount of Cuo – just a few drops but you have to mix it with CO2 before you use it.

0232: Please extract this topic and make a small video – spread it as widely as possible – make a link to the video of Armen making CO2 Gans – it will make a huge difference to anyone with HIV/AIDS for less than a

10cent investment.

0235: One thing you got to do more than anything else is wrap it around your femur – this will support your bone marrow and your immune system.

0238: Questions about Gans balls at the center of the of the Magrav systems, Capacitor systems etc etc

0244: A lot of people are not applying a voltmeter after nano-coating to polarize the plasma – this is very important!
