Mr. Keshe: Let me explain where we go from now on in the teaching? From now on in the teaching we go in one direction, which is a plasma, and a plasma which controls the emotion and then through emotion we control the physicality. And if you understand this part, then you understand how by, now that we have managed to break into the plasma world, do you need anything at all in the matter state? Would you like any water? Or can we build structures across nations, across buildings, that when you're in a building you take all the water you need? Because you take the field of the water, as you need it you convert it, this is what your stomach does. No water crosses your intestine into your lymph, it converts the energy that the lymph can carry and use it as the liquid, what you call water. Do we need to go for a lunch break, or the lunch break is 24 hours a day? You can eat what you need because you are completely supplied. This is what happens in the solar system in every part of the Universe. It's a man who has got too much attached to physicality, now you have the freedom.

Now the reason I opened this, in a way, was because of that Chinese, what you call it, robot all coiled with 11 parts. Now you see where the 11 parts come in, and how you can absorb it, how your body works. So, you are the coil, and if one magnet can interact one plasma with the other, and your body is a continuous gravitational magnetic field force itself, which it goes continuously around, now you can interact with any of them, in any shape or form you like.

Any other question?

Rick: We do have a question from (Shreepad?) from India. Can we apply this technology to control the mosquito population or menace?

Mr. Keshe: Of course! Depends on what you want to do with the mosquito, feed him with a plasma he won't eat you.

Rick: Will it get bigger? (Laugh) Think about 2 feet ...

Mr. Keshe: (Inaudible. That's the thing??) It only takes to satisfy size of a bird, the mosquito. Do the same, put them in the jungles with the tigers and let's see if they will eat anybody, they'll walk around they'll be happy forever walking.

Rick: Maybe they'll start singing?

Mr. Keshe: Uh?

Rick: Maybe they'll start singing like birds?

Mr. Keshe: I don't know. I don't know.

? (Laugh)

Mr. Keshe: I told you a few weeks ago, I will show you how this technology no fish will eat a fish and no animal will kill another animal, now you see the beginning of it. If enough units are produced and used across this planet, we change the course of the humanity in no time.

Any other question?

Rick: Somebody else asked, for someone that has HIV and they had it at birth, and wondering if there, anything can be done for, to help them?

Mr. Keshe: Yes! Get in touch with me!

Rick: OK!

Lisa: Ah..

Rick: That's like HIV, AIDS it's called sometime. Yeah!

Mr. Keshe: Yeah!

Lisa: OK, err.

Mr. Keshe: To volunteer if it's you who has written the question, if it's somebody you know, no, but if it's you who's written the question, yes, get in touch with me. But can you go on Wikipedia, Rick, and come up with the HIV, to tell us what it is?

Lisa: (Chinese)

Mr. Keshe: Is it a virus or is it a microbe? We know! I know what it is but...!

Rick: It says it's a spectrum of conditions, what's called immunodeficiency virus infections caused by infection of the human immunodeficiency virus, err what does it say about the actual, you want to know about the actual, what it is, or looks like, I guess is what you're saying? Right, Mr. Keshe? The virology..

Mr. Keshe: Also, if it's a micro or it's a virus?

Lisa: Err Yeah!

Rick: OK! What's called a retrovirus, affects the immune system. It directly, and indirectly, destroys the CD4⁺ T cells, it's a member of the genus [Lentivirus](#),^[70] part of the family [Retroviridae](#), they share certain biological characteristics, they are transmitted by single-stranded positive sensed enveloped RNA viruses.

Mr. Keshe: It's an energy base, its plasmatic energy based.

Rick: Yes! Well, upon entry into the target cell, the viral [RNA genome](#) is converted into a double-stranded [DNA](#) via ...

Mr. Keshe: Let's try something! If you've got HIV, if you've got AIDS, we know it's a virus...

Can we get the screen back?

I advise you to do something very interesting, this goes back to the part of the teaching of this morning. Let us know? I hope I'm right? Maybe I'm 100% right, maybe I'm wrong? Make yourself a CO2 kit. Nano-coat the CO2 with the copper plate. Create for yourself a GANS of CO2. Go through the process of putting the CO2 on the tissue paper, put it in a bag, which doesn't touch you, and wrap your body in it, as many places as you can. If you can (tololla?? Toilet roll?) 1 meter and you can get a plastic container....

It is what we taught this morning viruses are energy-based. So, we should see change in AIDS within days. This technology is made for AIDS. This technology plasma (continues?) to eradicate disease, what we call viruses, if HIV is a disease, virus, it costs you less than 10 cents to cure yourself, and reverse the process. You create a plasma, which if HIV is a plasma, a virus, connected itself to its, whatever, amino acid cell, you've got your answer.

Build a tube, film of CO2 in a toilet roll, very easy, once you've made your CO2. If you're not familiar with, get a toilet roll, open it up, whatever you've made as a GANS put it on the toilet roll, put yourself in a.., put it all in a plastic bag, which you can take it that it doesn't leak, doesn't touch your body at all, and sleep on it. 3-4 hours a day, do it for a week, come back next Thursday, and get your blood tested to see if there is any difference in your count. And still if you have a problem, you can enforce it, go on the Keshe Foundation, get yourself a pad, it'll most probably, the way we work at the moment, it will be there in six weeks time instead of tomorrow, put a pad in the background, on the back of it, and then you can enforce it more.

This technology, especially (? this?) technology is made for viruses, and its immediate reaction, you will see it. But one thing, please do not drink CO2 GANS, and please don't drink water of the CO2 GANS. You can, you can use, or add very, very small amount of copper oxide GANS to this as well, very, very... but you've got to mix it in the GANS of CO2 before you use it.

Lisa: Ah!

Mr. Keshe: Very small, just a few drops. Let us know? If you are HIV, if you know anybody with HIV, it costs less 10 cents to save a life.

Lisa: (Chinese) OK!

Mr. Keshe: The world of medicine for the past thirty years.

Lisa: OK!

Mr. Keshe: One of you went and took part of my teaching, when I explained about the earthquake in America, and it's been watched by millions. It's been in one channel it's been watched by two thirds of a million, one guy, just 7 minutes.

Take what I taught now about AIDS, and separate it and put it on the internet under AIDS. Let people try it, worldwide, because it can change the life of every man who suffers from this disease. Cut it out, put it out on the internet "Solution - Possible Solution for AIDS." Teach them how to do it. Take a link, give them a link to where Armen shows how to make the GANS of CO2 (<https://www.youtube.com/watch?v=JL64BQeEjEo>) that they can do it themselves. And then, put in addition where we show in one of the teachings, here with Renan, how to make the toilet roll with the GANS in it, and bag it, and you can save a man's life for less than 10 cents. (<http://globalplasma.net/index.php/testimonials-of-success/healing-pen-pad-testimonials>)

? ?

You don't need, copper plates, any copper wire you have in the house, just cut it, put it in a caustic, and you can save your life or anyone you love from AIDS.

We know this is possible, I know this can be done, if it's done the right way. And don't ask me how I know, because it's a virus, and a virus is plasma link energy to a bacteria. And this morning, we were teaching about this, and now the question comes, so you have to answer.

Lisa? (Chinese?)

So, put it in public and let people try it, no harm done. They don't need to drink it, they just need to have, to be in the environment, of a closed environment. We did such a test in Canada, and we've seen the result, but in a much stronger way. So, please cut it and put it, a possible solution, and link it to the Keshe Foundation website that people can know what it is.

One thing, which you've got to do more than anything else, try to wrap around your femur, around your leg. This will give you the support increase in your, what you call, bone marrow that increases your strength in your blood cells, that it can become more energetic in increasing changes. So, you don't cover your upper body, you cover your femurs, whenever you get a chance, that this way you increase your amino, amino the immune system of your bone marrow. So, one way you disarm it, one way you strengthen

the body to create a higher energy order, that it can take the residual energies out of the body in a direct way.

Go on the websites, wherever you see societies, groups, just say the guy who's a Satan says, there is a solution for AIDS, and try it. If you're wrong nothing is lost, but we know we're pretty sure right. Try it! You will see the change of the course. A good thing we're Satan not the devil, at least that's one good thing about it. And the ones who call a man Satan they are the devil themselves, that is how they can cover their lies. Strange enough they call me anti-Christ, but the Christian church is working more with us than ever before, that is why we are anti. Very interesting, we had better tell that maybe to the Vatican next time. A man who hasn't got a belief in God calls the others anti-Christ?

Carry on!
