00:08:30 Introduction by Rick Crammond

00:09:05 MK: Good morning. We try to concentrate on Health on the Tuesday workshops... Thank you to ALL the Kf people around the world – please keep to the ethos of the Kf and work though the Kf ethos (open sharing, no secrets, no patents, Thou Shalt Not Steal).

00:12:40 We are starting multi-language teaching - beginning in Italy. From this Thursday at the Keshe Foundation website you can enroll yourself and your children, for children, youth and adults in different languages, subscribe for 12 months and become a student for 100 EURO per person, starts the second or third week in March 2016, security checks will be done, there will be two-week workshops around the world in the future, the first will be held in Italy, you can go to learn or teach, setting up international structures to protect and monitor the teachings, will establish a health centre for the Keshe Foundation to be monitored by governments and the results known publicly,

00:21 We are now going heavily into Defence – protection of your country and your spaceship – this is not only for the public but especially for the Governments and Militaries from different countries – an initiation into the plasma technology for Peace. When you start seeing lift – which is imminent – you have to know how to protect yourselves – your physiological and biological structure – from meteorites in space as well as viruses.

00:24 This technology will be shared openly so everybody is equal.

## Notes from 6<sup>th</sup> International Knowledge Seekers Workshop held February 23, 2016

(v2 2016-03-02) DRAFT (Notes have not been verified. Double check info with video)

00:25:05 Part of the space defence is to understand the physiology of the psychology of the man – why and how your body behaves in response to a specific field. Space health is different than what you're used to, understand how space medicine works, interacts with the plasma within the plasmas creating an individual environment.

00:28:08 Draws a diagram of the human brain with two hemispheres and a brain stem with 2 ventricles – all teachings so far have been about the two cerebral hemispheres but for space they are irrelevant. We have to understand the structure of the brain stem. This is the emotional part, which is GM field controlled – different field strengths cause joy, happiness, depression, fear. Emotions are a result of GM fields in the brain stem of the man

00:32 This is where the intelligence resides – this is the main brain and it is the main thing that needs to be protected in space. Let's say a GM field interaction from outside resonates with the strength of fear – this is what happens in ALS/MS – the disease is caused by the emotion in the main brain (brain stem).

00:35 It is for the people in the Health Section – (the ship's doctors) – to understand this – a given strength of GM field we call it fear – another strength we call it joy – you can put a protective field around yourself and around your craft/ship.

00:39 The space technology for protecting your body is beyond your understanding – it is no good taking a pill or a capsule in space – the two half shoes in the brain (lateral ventricles?) are where the emotion translates into a physical reaction – so the Ship's doctor needs to know about the emotional viruses in space – GM packages that interact only with the emotional part – protein-based – attaches via the amino acid either one of them, some of them, or a totality of C O H N.

00:42 Space Medicine 90% has nothing to do with what we taught in the Health section up till now – you have to be ready for the space defence technology – not so much from things like missiles or meteorites but more so from viruses.

## Notes from 6<sup>th</sup> International Knowledge Seekers Workshop held February 23, 2016

(v2 2016-03-02) DRAFT (Notes have not been verified. Double check info with video)

00:46: Basic Rules 1. Everything in space is PLASMA and 2. Everything has STRENGTH in terms of Magrav field strength. This is very simple there are only two parameters – Mag and Grav strength – The main brain (brain stem) has been set to recognize 1 Magrav strength – so a pain pen is not necessary in space - you just need to protect the brain.

00:52: In space the ship's doctor has 2 responsibilities – 1. Make sure she can give everything that every crew member needs – in Magrav fields – so there is no need for food or drugs, etc., and ... (KfNZ: MK forgot to specify the 2nd responsibility but I would guess it would be something like... 'to make sure there is a multi-layer protective field around the ship so all crew members are protected from viruses, and other foreign bodies in space')

00:53 Your heart and lungs are your emotional connection and just below that is your physical connection – they are completely separated – if you can increase the Magrav strength to the emotional part through your lung system you don't need the physical part (absorption through gut) – then you won't get the pain or the cancer – 90% of our cancer comes through the physical part – even lung cancer is through the physical part of the lung. Now we teach the true space medical technology.

00:55 The Universe is now the Oyster of Life for man (no longer 'The World is your Oyster!') – you don't need to feed the body of the man – you just need to feed the emotional Magrav fields and your body will automatically change its structure to whatever is needed.

00:56 Now that Ali and others are making the dynamic star formation – you'll find that people that are exposed or come close to it will walk away happy! Other effects: showing elongated finders, hand not seen at all, the blind will see

01:00 Religion becomes irrelevant when we are free in space (MK previously said your only judge will be your own soul) ... we have to have a new understanding of the totality – you need to understand your coils!

01:01:53 We started with the Iranian nuclear-based alpha reactors

## Notes from 6<sup>th</sup> International Knowledge Seekers Workshop held February 23, 2016

(v2 2016-03-02) DRAFT (Notes have not been verified. Double check info with video)

originally created in Belgium and tested in Tehran. These are based on H and alpha and beta radiation and the rest. In further development in Descanzano we developed the rotating cores – to 1-2 cm coils loaded with GANS – and we walked away from the Nuclear materials. Then in the past few months we came up with the coils – if you look in all 3 we created the PLASMA – in 1 we learnt the energy of the Universe by manipulation, in 2 we learnt the rotation and in 3 we learnt non-tangibility – so if you put all 3 together you should be creating a very simple system...

01:05 The interaction of Zinc (emotional) and Copper (physical) relate in their own ways with each other and with the COHN of the physical and emotional parts – then you build your coils/reactors with this in mind – (then you are physically and emotionally in touch with your craft).

01:06:49 Details of building the coils for the craft – 1st you have copper at the center to structure it, then you nano-coat it, then you create a condition to create GANS – then this creates the PLASMA – then if you coat with 1 or 2 or even 3 GANS materials in the correct order you create rotation and this is what creates PLASMA.

01:13 Maybe you want to put CuO<sub>2</sub> then another layer of CuO, then CO<sub>2</sub>, then CH<sub>3</sub> – look at it! – Understand the choice – don't just copy it! We have chosen the CH<sub>3</sub> for the HYDROGEN. Understand the structure! CuO is the Casing, CO<sub>2</sub> is the separation to do with the structure, and CH<sub>3</sub> is the energy supply – but all connected to each other – the situation is stable – you can release energies from this bonding that can bring joy, reverse cancer and fear, even bring reproduction! If you add a layer of Zinc between the CO<sub>2</sub> and CH<sub>3</sub>, you have full control of the emotion of the man with ZnO<sub>2</sub>.

01:15 The race now is which team of scientists will achieve lift first. Learn from the structure of the Earth – being so materialistic we have not seen this – understand the interaction of solid, liquid, gas – in the same way that the Magrav of the Earth's crust creates a banana, so can you too create a banana with your reactors!

01:18:15 You have all done pretty well so today I am releasing the

## Notes from 6<sup>th</sup> International Knowledge Seekers Workshop held February 23, 2016

(v2 2016-03-02) DRAFT (Notes have not been verified. Double check info with video)

Blueprint for the Space Lift! It's for you to show who is going to do it first! MK asks if Renan is there – Yes, Ali? No not at the moment – Vernie? No, he is asleep – Jacky from Switzerland? – Yes.

01:21:41 Vernie is not available so Jacky shows a picture of the space ship blueprint design. This was developed in September 2015 by MK and Vernie and it has been sitting there waiting till the time is right. What we are seeing is the first open structure system that carries both Shielding and Magnetic and Gravitational positioning and a control system for the maximum and the minimum in which you create all the emotions of man in space if you understand how to coat it and how to use the plasma. This was also created by Marko and presented on the first teaching day in Barletta. (KfNZ: This must have been workshop 72 – the First Workshop at Barletta – entitled 'The Greatest Moment in Human History' – also a book of the same name with detailed transcription of this workshop soon to be published by KfNZ.)

01:25:16 We have had a situation where a couple of nations hacked our system and got this design – so to avoid mayhem by allowing these nations to develop it first we have put it onto the table.

01:27 Ali comes on and shows a picture of the structure with 3 outlying coil reactors, and 4 rings, 2 copper coil rings and 2 rings of coil reactors, 12 reactors in the outer magnetic ring and 6 in the inner gravitational ring. MK states that for lift to occur the outlying reactors have to be moved to a position just outside the Gravitational ring in the form of a triangle below the rings and then with a 4th reactor in the center above to make a star formation with the other 3.

01:31 MK: This is the true blueprint of your spaceship!

01:33: If constructed and coated correctly it will create rotating lights like those that are often seen on space craft – rotating lights – this blueprint is the mother of the source of this phenomenon.

01:34: You can create different materials, food, medicine, etc., with combinations of different reactors in the rings – you can also create your

## Notes from 6<sup>th</sup> International Knowledge Seekers Workshop held February 23, 2016

(v2 2016-03-02) DRAFT (Notes have not been verified. Double check info with video)

shielding outside the craft at different levels – you can create a condition with different nano-materials and GANS materials in the coils to create multi shielding...

01:36:31 Ali shows a triple core copper reactor he has made with 3 separate copper coils MK: Why did you make a 3rd coil? Ali: I felt I had to – it's alive – it has consciousness. The coil goes into the structure of a star formation within its own angles – pyramidal shaped – then it comes alive and communicates with you and you understand at a deep level. These are tuning forks of the Universe – like the pyramids on the planet – All the wire lengths used are multiples of 20.6 Inches, which is the sacred cubit – (1x, 1.5x, and 2x respectively) – if you cut them at this length they resonate at 144,000 Hertz.

01:41:40 MK explains the importance of measurements: MK: Let me stop you there – and there is a reason! MK reveals that from the early days working with the Belgium reactors and with the Iranian breakthrough they always worked with a figure of 21 centimeters – and if you go back to the teachings 21 cm is the distance of the alpha radiation. That number of 21 cm was kept to in all the early flying reactors – so it's the ratio – not necessarily 20.6 or 21 inches – it would also work with centimeters.

01:44:10 Ali asks MK what he thinks of the triple core reactor as opposed to double core. MK says it's not the number of wires that's important – you could do the same with a single coil if it is coated with the right combination of GANS. Also says that it would be better if it had more precision rather than roughly wound by hand – better not so random.

01:47:09 Please use the fire method of nano-coating for these coils, not caustic. Also the use of amino acid on the two copper coil rings is essential. This should be collected off sea water with nano-coated copper and zinc. Seawater is essential because it contains the body of the man – and thus creates the minimum and maximum magrav field of your system and therefore protects below from destruction and above from being dissolved.

01:50:05 MK reads from an email he sent earlier in the week to the innovation center. "I think we can add to the knowledge! If you look at the

## Notes from 6<sup>th</sup> International Knowledge Seekers Workshop held February 23, 2016

(v2 2016-03-02) DRAFT (Notes have not been verified. Double check info with video)

GANS, the GANS is, and behaves like, a plasma in matter state strength, but it behaves like a crystal in its own dimension – nano-materials are matter-state of the element and GANS is the crystal – or graphene – state. Just before nano-layer becomes GANS it becomes Graphene or its own crystal structure and it stays in that state – and in the new free GANS state becoming crystal in a new environment. GANS is the 5th state of matter interaction and operation. You may now understand where the man is led to in these teachings – a State of Self, Inner Peace – and it goes on...”

01:55 More details of the structure of the coils. The plasma flow is outwards from every point on the system in all directions – this is to lock the 6 reactors and the 12 reactors into the form of your craft. It is at the boundaries of the magnetic ring that you create your materials, and the coils control the rings outside them, one magnetic and the other gravitational. – The amino acid from seawater creates the structure of the Earth – minimum and maximum.

01:59 MK: I was going to keep this secret till the Innovations team showed the first fight system – but – a couple of national securities sitting in the background now have it – this would have been another month or two – but we ALL have it now.

02:00 You can expand your craft up to 100 -200 meters in diameter with this system – MK draws where to position the pilot.

02:03 This system is complete – you have to develop different versions of it.

02:05 I slept 3 hours in the last 5 minutes! – if we can satisfy our emotion the Universe is timeless! Time itself is GANS field dependent.

02:05:44 Mario: How many turns on the coils? MK: You try – like Ali who felt to put a 3rd coil so he did – you try! Mario: OK!

02:06:42 Kosol comes on – MK lets him show his new development as long as it is correct and connected to the teachings – Kosol presents a couple of cubes with copper coils and capacitors and lots of hot glue, which are alive

**Notes from 6<sup>th</sup> International Knowledge Seekers Workshop held February 23, 2016**

(v2 2016-03-02) DRAFT (Notes have not been verified. Double check info with video)

and communicating with him

02:12:30 MK expands on how to store energy in the craft. Expands on nano-coating and GANS energy, doesn't need connecting, these devices will communicate with one another across the earth

02:17 Miguel from Mexico tries to come on to show a cubic structure he has created but sound is not optimal so he is invited to return on Thursday.

02:22:40 Question: In making the plasma battery in the health device is the paper used with mixed GANS is there any NaOH in it? Depends on what you want to do with it

02:23:25 Question: Can you use copper coated wire? Yes, if you want to make blood

02:25:21 Armen shows a beautiful double coil he has just wound in the space ship reactors dimensions. Question: Do you have to leave an extra wire on top? Do what you like with it.

02:29:04 Coil winder and nano-coater made by JF Dupoint, can order this now from the Keshe Foundation website.

02:34:32 MK asks Rick to find pictures of Marko's creation he showed on the opening day at Barletta – shows the gravitational and magnetic control rings – maximum and minimum – this system was made with Alekz type beads and they had a blow out of the system very quickly as it wasn't dried enough – a warning about making sure no moisture in the system when it is tested.

02:41:10 A better way to produce pure CO<sub>2</sub> GANS is to have your nano-copper and zinc plates outside the salt water container – if you want pure ZnO<sub>2</sub> GANS you put your Zinc plate inside and your copper plate outside. For producing amino acid it is better to have your plates outside as well – definitely the Zinc plate should be outside otherwise it is contaminated with Zinc.

## Notes from 6<sup>th</sup> International Knowledge Seekers Workshop held February 23, 2016

(v2 2016-03-02) DRAFT (Notes have not been verified. Double check info with video)

02:43 it is not easy to produce the amino acid with the plates outside – MK has found the easiest way is to use flexible plastic bags – he sticks the plates to the outside and then adjusts the proximity of the plates – at one point it produces CO2 and at another lots of amino acid.

02:44:22 Kate asks a question about the position of the pilot – MK: The pilot has to sit in the place of the free plasma in the star formation because then he/she is linked into the whole ship.

02:50 MK repeats that this is the blueprint for the flight system with control, positioning and shielding. We are on the verge of man going into space – you have all the elements now – Man is ready for Space. A couple of militaries are 8 months ahead of everybody else, and a couple are 8 days ahead – but now it is on the table for everybody!

02:52:12 Teachings for 100 Euro from the Keshe Foundation from Thursday on, you get access to all the teachings.

02:52:57 Question: What age range for children? From 12 to 18, ready by the second or third week in March. Working with military to change the work of the soldiers, there will be special teaching for military, doctors and space scientists.

02:57:34 MK shows a horrible picture of a river of blood in Syria – this situation is what we want to change with our plasma technology.

02:58:58 Dubai Promotional Video – One planet, One Nation, One Race Conference on 21st April –

03:00:53: End
