The Picture is of MK, unexpectedly returned to his electronic whiteboard at the home of the Central SSI in Barletta, Italy after his mission in Dubai, revealing the NEWS that they did not run away to Dubai, they are back home, and after the coming Conference next week they will be looking at their next escape from home – to Africa!

With the Ibogaine Conference in Mexico during the Northern hemisphere Spring break, then the passing of my 95 y o Mum and a family reunion, then a few days in NZ and Rarotonga with my sweetheart Anah Angelean, I have not had a chance to watch ANY of the workshops – thus the big gap in transcriber's notes from International Workshop 6 through to 11. While In NZ for a few days however we had some meetings with people interested in helping pull together a KfNZ, and things are moving along slowly – anybody who is interested please respond and leave a message here – we have people in Kaitaia, Auckland, Waikato, Tauranga, Napier talking to each other – next thing is to get some manufacturing of

(v1 2016-04-18) v1 (Notes have not been verified. Double check info with video)

household and car magrav units, and making a start on our spaceship – SSINZA – Space Ship Institute New Zealand Aotearoa – ET has made a big start on the central brain of our Craft but what we need now is factory space and funding to get things underway...

I have just returned to work in the Land of Oz and now have some hermit space to stay in my cave and get some writing done – I have made a good start on The Iboga Chronicles Book III – THE TEPOZTLAN CONFERENCE – (Incidentally Tepoztlan is translated from the Nahuatl into English as “Land of Copper”) and that is the project of the next few weeks while MK and Carolina fly back from Barletta to Dubai for the First Universal Council Meeting and the One Planet, One Nation, One Race Conference happens on the 21st April – RIDVAN BE 173 in the Badi Calendar commemorating the Date of the Declaration of Baha’u’llah in Baghdad in the Year 1863CE – as with the last year’s Opening of the SSI at the University of LUM this is timed according to the date that marked the beginning of a new ERA - The Great Era of Baha’u’llah, in English The Glory of God the Father – showing MK’s recognition of the new Persian Calendar – designed by the Bab 19 months of 19 days the months bearing 19 of the Names of God/Allah.

I have just returned from Rarotonga in the Cook Islands – in the midmost heart of the Pacific Ocean – Inspired by Om Shanti and the Baha’i community there, who have been following the Tablets of the Divine Plan left by Abdu’l-Baha the son and servant of His Father – and the exciting thing is that they were programmed to come out exactly 100 years to the day from when they were written in 1916 – so now the instructions of how to form a Global Army of Light Beings – Inspired Angels feeling the magnetic resonance and deep heart-felt vibration of the angelic realm of people who are detached from all things in their love of the Ancient Beauty – now recognizing their greater job on the planet and their mission to change the world into a planet with no more war...

But let me get back on track here – on the drive back to work in rural NSW I listened to part of International Workshop 11 – and felt inspired by the reports of the Magrav Units being used at a European School – thinking – I know someone who lives at a school in Europe! MK’s description of the school experiment followed a post by Abby Jo about her meter reading.

0013: Rick shows Abby Jo’s facebook page showing her meter reading. After 18 days of connecting a working magrav shows a total of 46.7% reduction in consumption of grid power compared with the same period in February 2015. This time last year she used 34.9 kw hours on average per day, this year in last 10 days

Notes from 11th International Knowledge Seekers Workshop held March 29, 2016

(v1 2016-04-18) v1 (Notes have not been verified. Double check info with video)

18.6 kwh 46.7% less! Pictures showed of the set up and the power board – also it is 5 degrees colder this year than last year so she is making more heat but using less kwh this year. 0015 MK comments – and reads a post under Abby Jo's post – Carlos – Interesting as he was using 9.2KW per day – now has 2 magravs running and using about 6.7kw per day - but in Germany he has a 3 phase system so has to build a 3rd magrav...

0016: MK announces we are running 2 systems around the world- 1. In a VERY large school with a lot of air conditioning – the first month about 21% reduction in the whole of the school, consumption now about 580kwh per day and now reduced by 20% through a total of school days and holidays , it has saved them 30,000 euro in the last month – just 2 fans to 2 magrav units – set up to condition with 2 fans

0017: MK explains the new Magrav units coming out do not have to be conditioned – you just hook up the unit to the grid and to a 500watt load – you don't need to reset – you don't need the 20 days of conditioning just plug in your system – you just connect it your grid and to a 500wat fan or something – In the school is that the system automatically has kicked in we put 1 system in 6 weeks ago and then 2 weeks ago the 2nd system – they check the meter reading every day at noon – it shows we are reaching 60% reduction in the school electricity bill, which means by June it will be 50% reduction in their bill – An International structure is testing this unit – being tested by the government – then we have reached the first substantial order in Italy – a HUGE order – and part of this is we have taken over a house/apartment – this week it is locked by SGS the Inspectors, same standard consumption for an empty house, fridge freezer etc – then after 30 days we install 2 units and take a reading at 30 and 60 days. This will be the backbone of the accreditation – SGS a VERY respectable International company – The first substantial order will supply 3000 jobs in Italy alone – from a Bank in Italy – they have seen us and want to invest into the purchase – so the order runs in millions of units – creates a lot of business – the building has been taken over last Monday – we then await the certified SGS report. This process is to show even if you can save 10 – 20 % this is HUGE amount in terms of national economy. WE have also put a magrav unit in a school bus and testing this in the same way – a number of governments have lined up we have had 2 substantial orders – all these major contracts are going to Italy Kf Manufacturing...

0024: MK: I have NEWS for you – We didn't escape to Dubai! We are back in Italy! (LOL from Audience and big smile from MK) Next time we escape to Africa because we have to establish the Kf in Nigeria, Ghana and Kenya – we have a doctor moving back from the USA back to Kenya to head the Agriculture side of

Notes from 11th International Knowledge Seekers Workshop held March 29, 2016

(v1 2016-04-18) v1 (Notes have not been verified. Double check info with video)

the Kf and he his on the payroll of the Kf along with Benjamin and Alekz – we interact at a very high level in Government especially in Ghana – in Africa we work closely with the governments- e.g. the reports of water treatment is from a Government department in Ghana.

0026: MK goes back to what was revealed about the experiment with mice in Fukushima – some people writing emails about MK first telling people NOT to consume GANS and then the study showing huge benefits from consuming CO₂ GANS MK: 1st of all its on Mice not Humans – we still tell you Do not consume GANS! 2. If you are using the GANS the material we are commercializing is through the WATER of the GANS, 3. The products will be sold out of Japan as a complementary material 4. The crisis in Japan is so high the contamination is so great that they don't mind taking a small amount – a number of cancers increasing so we release it – TEPCO is watching and there are no objections from the Government- so this product is mainly for Japan for decontamination – so we still advise not to take GANS directly – we promote the WATER of the GANS and you receive the same result – Every time you cook in that steel pan you are already consuming GANS material – especially Chinese in WOK – you Nano coat it then heat it up ++ and then add salt so you immediately create a GANS of the materials of the meat and vegetables – we are used to consuming a small amount of GANS but now it is purified and directed against the radioactivity and the viruses – but you can do this through the WATER – They are beginning to use the GANS heavily in Japan for decontamination – I am in process of asking the Iranian Nuclear Industry to test this process – we are sending the material to Tehran to be tested so if someone is contaminated by accident they can be decontaminated immediately. The other point is the other application of what we saw last Thursday – I support as a man who knows more in the field of radiation – I support chemo it works well, but its the side effects (that are harmful) – now we can use the CO₂ GANS to eliminate these effects after chemo – we have done this – we know it works – the GANS will be tested by major corporations but we give it like we gave to the mice – this is a not toxic material – we see a VERY strange effect. They have given the mouse a ratio to mass of the GANS – if we get to that ratio with human body then we see the potential of 2 directions to go – its like an aspirin – if you take low dose aspirin it becomes a blood thinner in higher doses a pain killer – now we got to find out the effect of the GANS – small doses clears the blood of radioactivity and in higher doses maybe harmful or different effects – we have watched the tests on the mice now we test it on humans in coming weeks –

0034 The other advantage is people get a lot of radioactivity from x-rays and CT

Notes from 11th International Knowledge Seekers Workshop held March 29, 2016

(v1 2016-04-18) v1 (Notes have not been verified. Double check info with video)

scans and these radiations stay in the body – so after the x-ray you can take a dose of CO₂ and get rid of the radiation from the body – We have been given a major hospital (in Italy?) and with it comes a research center – we are calling on doctors and scientists to come to this hospital – this will be ready some time mid 2017 and we now have the opportunity to go in and bring the applications of Kf Health to this center – so if you are a doctor or a technician and you want to extend your knowledge for a few weeks few months or full time – we let you know and you go directly to the admin of the hospital via the Kf –

This is a HUGE breakthrough at Fukushima but PLEASE understand the test was on a mouse not a human – they tested influenza and radiation – the reason is they have a lot of workers because they work in freezing conditions of ocean and most of them coming down with flu – that is why the Japanese tested the system against the influenza virus – so now they solved 3 in one go – radiation, virus, improved immunity – the CO₂ GANS helps all 3 – just the WATER of the GANS – CO₂ has specific characteristics which leads to recovery of the tissues – C is the communicator and O the Gravitational center of the structure of the amino acid – so you have to realize we go into the depth of the knowledge – simultaneously it works – Total Disclosure of what was revealed on last Thursday will take a lot of time because there is hidden in the words a LOT of Knowledge 1. We understand we can decontaminate radiation from any water – if you lived by the big lakes in USSR during the communist time a lot of waste from nuclear power systems was released into these lakes – they are highly contaminated – now we have a solution – a number of ways with intro of GANS into the system – but you have to realize the extension of the application – if you absorb the radiation and at the same time create the right environment it can lead to the creation of life

MK explains how plankton in the ocean is created by for example the red dirt of the central continent of Africa – every year there is a season and a long dust storm – it goes over the whole of West Africa Ghana Gambia – there is a season of the red dust – very red iron bearing – gets dumped over the Atlantic Ocean where there is a huge surge in the fish growth in a zone close to West Africa where millions of tons of sand every year blows into the Atlantic – the dust contains Iron and the surface of the ocean is covered with amino acid due to the structure of the sea- so every dust in contact with the amino acid in capturing the fat on the top of the ocean creates the first hemoglobin – the first structure of life – this is how the Life forms in the ocean – we have the same scenario in NE of China into the Japanese Sea and Islands – So if you convert this back to the capture of radiation – you can turn the radiation into useful application for feeding the oceans or the agricultural

Notes from 11th International Knowledge Seekers Workshop held March 29, 2016

(v1 2016-04-18) v1 (Notes have not been verified. Double check info with video)

section – this is a natural process – with the right amount of minerals and GANS of given structure you can control what kind of protein amino acid hemoglobin you like to be useful for certain purposes. So by deciding on the GANS and the right salt condition we create different plankton condition etc etc .

It will take decades for man to understand what I explained in the last ten minutes because our science has to develop in line with us dictating the condition the warmth and everything else to create life – the speed of condition is much higher – here the matter state in contact with the salt of the sea with the matter elements with the GANS to create a specific condition – you will then understand why we have white red different textures of fish in the sea depending on salinity etc. etc. – now we can replicate this – do you need to have a tuna to kill or can you get the energy from the plankton? In Fukushima we have seen reports of new and different type of fish – has the new condition with different radiation created a new condition and a new type of creature? Have we created different evolutionary forms in 5 years? We are working in principle NOT genetic modification, but before gene, we control the creation of the genes through the plasma – we can dictate the condition or position of evolution and when we go to space, now we are getting there to go to space without food, we receive energies not in the matter level, we are evolving ourselves into a new creature where we don't need to consume – some of these people are now going back and forth between consuming food and consuming energy – we are still attached to matter state but in 12 to 18 months we will see people that don't need any matter absorption – Can you imagine life with no pizza? – Chuckle – Tell that to the Italians! – Big Chuckle – And NO wine? – Big LOL – Maybe we create magrav system coated with the red wine and the white wine so wherever you go you can have them all! This is the beauty of understanding the structure – if I explained the totality right now you ALL would walk!

0053: In the coming weeks we will disclose a MAGIC system for reviving life – we have done this before – returned life to a body that has shut itself down – we will record this step by step – using only magrav systems – very effective – we shall see if we can revive life in a rapid way – if the data comes correct we can continue – otherwise we return to the hospital – we can hopefully reorganize the brain so that most of the mental illness does not exist – as on the application from Jacky and Ali in Switzerland and Canada – you can receive energy for reprogramming the brain – mental diseases will become non existent – same as you take food from your star formation – so – you will soon walk people through a tunnel, Alzheimer's at the beginning and full memory at the other end of the tunnel

Notes from 11th International Knowledge Seekers Workshop held March 29, 2016

(v1 2016-04-18) v1 (Notes have not been verified. Double check info with video)

– we have done this before and turned many Alzheimer people to total recovery – this is not theoretical – now with this system you can make it very rapid – Going in to Space requires you to use the energy of space correctly – so now we see the first basic crude systems coming through with the best one so far from Klaus in Austria: When you refine this you will return bodies to perfection – a lot of quadriplegics can return to full function, a lot of brain damaged children at birth can have regenerated brain structure – it has been done before now we can do it much faster – we have gone beyond genetic modification to the realm of the Magrav and the plasma itself because a gene is amino acid based – now we go to plasma that created the gene, this is the blueprint – the foundation of the amino acid – if you understand this you can dictate the structure of the protein – this is a new science that needs to be developed – do we give the energy of a plankton to the neuro system to create brain cells to restore speech? ... OK RICK! Lets see what we have!

0059: Klaus comes on to share his screen and show his new system and then as always when someone takes a step MK opens up and teaches further around the step taken as we all move together into a new reality of ONE planet, One Nation, One Race of humanity in the process of being restored to their condition in communication with the Universal Community...

Unfortunately there is not time at the moment to continue with the KFNZ transcriptions, as there is an Iboga Chronicles Book III to focus upon. However, maybe a good outcome of this small effort could be if a few more schools in Europe and around the world would order a few of these beautiful blue Magrav systems, attach a couple of 500w fans, and start saving hundreds and thousands of Euros, Dollars, or even Czech Koruna!
