The Image is MK's drawing of the system we will have to create so we can be self-subsistent as the man in space. Goes very deep beyond most people's comprehension at this point in time and space, however, some understanding may be added by also studying the Steiner Anthroposophical teachings - I believe - see the previous post on this site. The Workshop starts as usual with the Introductory Video, then followed by One Planet, One Nation, One Race promotion for the Rome event 9 September.

0008: MK: Good morning etc. The International Workshop on Tuesday afternoons has become part of the plasma teaching. For those MOZHANS signing up for the 3 months of teachings to build the spaceship in October – you need to be ready to travel to an undisclosed location on the planet for 3 months.

0012: Financed Magrav units at 10 Euros per month will be available in Italy Germany Austria and France. Possibly might also be available in Spain and

(v1 2016-05-28) v1 (Notes have not been verified. Double check info with video)

Portugal depending on negotiations with the banking structure.

0014: A number of groups in a number of countries are achieving LIFT and STRUCTURE (in spaceship development) We are deepening into how to survive in Space. We have learnt how to survive on this planet in all sorts of different forms and structures, colors, etc. – man and the other creatures – hair or feathers etc. etc. But this is a new Era as we move into a different environment. Up till now on excursions into space we have worn protective clothing etc. but now we evolve – what are the next steps? How do we interact with the creatures of space? What are the rules? Is it green for go and red for stop as on planet Earth or will there be different rules? 0019: This is where the International teaching goes into Universal teachings. The teachings will treat Man as one unified family. YOU will develop the technology to interact with the Universal Community. We must understand that we have kept ourselves isolated from the Universal Community by OUR behavior. Are we going to make the same mistakes and stay in conflict, separation, division? Do we allow the present system to continue with a few benefitting at the expense of the many? NO – we are creating an army of peace!

0027: We have created a LOT of enemies as we touch energy, food, agriculture, medicine, materials, and the one that creates the most fear is Space Technology. We see more and more opposition in ALL shapes and forms from those who have used these resources for profit and control e.g. Oil Industry, Nuclear power stations. In agriculture the control of the seed base is finished. In Medicine doctors are beginning to use the Magrav systems, but to open to space is the biggest challenge. We have to bring Nations together and the biggest problem is that man needs understanding of the interaction of the Universal Community and to do this he has to become peaceful. 0031: We have tried to resolve this with International Conferences. We have tried through energy delivery, and we try though food to change the habits. The space technology is in one direction – creating plasma to create motion, food, emotional healing bringing peace to the man. Man can find peace in 2 ways 1. With the OASIS system – with this protection there is no use in people fighting for resources and shelter and in this regard we have seen one of the governments taking steps to produce these systems en masse. 2. Using GANS systems to create peace as in Vienna where they are using spinning orbs that broadcast Peace, and using GANS to clean rivers lakes. An extension of the Vienna systems would be to create satellites that feed the body and emotions of man and animals – with the liquid plasma technology you can influence large areas of the planet towards peace.

0038: These systems are being built and you can build them yourselves. A lot of

you have built the coil systems and now you are in process of rotating them (as detailed in the last few workshops) (Ball in center, Magrav coils outside) You can decide what radiates out – food, antibiotics, Vitamin C, herbal medicine, etc. The old structures on the planet are now trying to create a war over Water and Energy resources, but we now have peaceful solutions.

0042: 3 members who joined the Council in Dubai have now been rejected because they carried on with the same behavior as before – lying and fighting etc. To join this Council you need to be Peaceful. Teachings from now on will be increasingly towards improving the intellect of the man towards peaceful solutions and without damaging others. 0044: In the coming weeks Kf will commence collaboration with a number of organizations around the world. MK will soon stop the teaching and the Universal Council will decide on the development of the technology. 0047: MK recaps the development of the technology from NANO to GANS and now using the FIELDS to create specific matter or condition – 1st of all to bring Peace to ALL inhabitants of Planet Earth. The Council will have a beautiful time because now you deliver the tools of Peace.

0049: We have to put our house in order before we move outside. It can be done and we are doing our best. How can we change multi billion dollar corporations based on profit motive? By changing the thinking of people who control them. Rich men with all their wealth get cancer as well. Even religious leaders have turned to the Kf for solutions to their health problems but will still not share this with the public e.g. One of the MOST famous religious leaders has been using a health system since last November. 0051: One of our biggest problems is the religious organizations because when we are all one there is no need for different religions, so these teachings are a poisoned chalice for the religions!

0052: So what is the next step? MK begins to draw the structure we see in the photograph attached to this workshop. We need to create plasma systems that influence the emotion of the man and we all know that ZINC is important in this. We need to work with a balanced structure of amino acid which is the backbone of life on the planet – PHOSPHOR. We need to interact with the RNA of the memory of the whole backbone (+1) (Another element). We need to interact with the physicality of the man (IRON) We need to interact with a system that allows the transfer of energy from one to another (SULPHUR) We need to create a system that allows any extra field in the environment – given but not wanted – to be taken out – options are LEAD or GOLD. So we need a system that does ALL this and allows free energy development in the space of the amino acid of the man (HYDROGEN) Then you have to create a system that allows energy transfer with

Notes from 16th International Knowledge Seekers Workshop held May 24, 2016

(v1 2016-05-28) v1 (Notes have not been verified. Double check info with video)

the cell of the man (CARBON) You need to see how this can be filled and create a GANS mixture that can be used in totality to fit into the structure of life with deviation of COPPER – animals or MAGNESIUM – plants. 0056: MK circles the whole diagram – we need to create from this mixture a field that each one of us can take from it what we need. We are ALL children of the planet – doesn't matter if we are human, dog, tree, fish etc. – the planet has created us and nourished us with the structure so we need to be able to create the same atmosphere anywhere in the Universe and then on top of it you need to superimpose the environment of the destination.

0058: You need ALL the essence – without ZINC you will have a bunch of crazy travellers, without IRON you will not feed the essence of the man which is his blood, HYDROGEN – then you have other entities, but you have covered yourself with the GOLD and SILVER, which means with the presence of SULPHUR and LEAD you have created a sink and you have created a condition of division of one element on another. Don't forget SULPHUR is the balancer, what you are short of, it is the habit of sulphur to be able to convert to give it when it is needed. SULPHUR plays a huge role in the body of the man to fulfill any shortage between these 3 (indicates Zn, Fe, Cu in the diagram) and it is the same with MAGNESIUM when it comes to the Vertical people (trees). You need the PHOSPHOR for guaranteeing the solidarity and the energy balance of the recording side of the body of the man without tangibility – which is in fact your RNA – and the backbone of the interaction of RNA is the DNA. The bridge between RNA and DNA is PHOSPHOR and there is no other way – that's why the PHOSPHOR is seen in physicality in DNA and its energy is the controller of the distance for RNA – and that's what we call Magnetic Gravitational positioning.

0100: You need to create such a structure in your system then you'll find out your system will work perfectly for man in space. We are deepening very rapidly and a lot of you will not understand (hahaha – not kidding!) MK deepens into how to play with the different elements and what effect it will have on humanity. Man has become the king of the animals because the job of the king is to look after all his subjects – You are responsible for everything from the fish to the trees to the lion to the tiger etc. etc. 0104: The process of understanding this will take some time – it will take time to unlearn the skills of killing – we are more or less the only creatures in the universe that spends time in planning how to kill each other – shame on the human race! Why? We see killing as a way to keep control – thus man has become lower than the animals in this way. The whole process will take time but it is moving fast. We have seen doctors reporting disappearance of

Notes from 16th International Knowledge Seekers Workshop held May 24, 2016

(v1 2016-05-28) v1 (Notes have not been verified. Double check info with video)

cancers in 3 – 7 days so it should be easy to make systems that bring peace – MK deepens further into use of Iron and Sulphur etc. etc. 0111: The tool of peace is in the hand of the man and once you make the water spread it around the world – pour it in the oceans as well as spinning it in your cores. The opposition will come from those who want to carry on the abuse; the collaboration will come from those who want peace.

0115: MK demonstrates how the Carbon on one side and the Oxygen from the other activates the system. There are a couple more elements to add to this – for example gold oxide will satisfy the hunger for wealth etc. 0118: Someone asked how to make Gold and Silver GANS – you have to first loosen the structure through field interaction – i.e. create Nano materials with Caustic. You connect your plates with a current flow between – the current flow has a direct effect of loosening the mono atomic material – so use NaOH AND current flow – you can use this process with very slow current flow to make ANY GANS you want – then you add NaCl with the NaOH to make the GANS – some of you have seen this from the beginning with the coca cola bottles. 0121: Don't forget the easiest way to release energy is with CH₃ – which is usable in 80% of the plastics. One of the best way to release energy in this way is with the glue gun – this is another secret I never released before – hot glue releases energy to be used by the system. This was used in the health cups – we had magnets with a small amount of GANS on the inside and they were stuck to the cup with hot glue – with a ring magnet in this way you get a focused targeted beam, with a solid magnet you spread the field – same process can be used with the coils.

0126: Doctors! Don't forget if you use CuO₂ and ZnO₂ and CH₃ and place the system at the end of the finger/limb you will see miraculous growth, and with this process the CuO₂ will guarantee no infection. Distance should be 2-3mm but you need the combination of the 3, though you can also add sulphur, phosphor and fine amounts of Chloride. With different applications of the same process you can absorb cancer or grow heart tissue – with this technology you can live for thousands of years in space.

0132: Are there any questions? 0133: Rick talks about Colleen who has small fluffy orbs growing in a gold GANS fountain – Rick cant get her online to speak – shows pictures that look like a fluffy pearl growing in an abalone shell under water...

0141: John Bliven presents what they are doing with Keshe Manufacturing in Tempe, Arizona. 0144: Presents a number of slides showing all their experimental

Notes from 16th International Knowledge Seekers Workshop held May 24, 2016

(v1 2016-05-28) v1 (Notes have not been verified. Double check info with video)

research projects – many different systems, a visit from Armen – shows Armen's teaching on the white board very much like MK's but even more untidy – “the fruit does not fall far from the tree!” (lol) They are making a lot of coils with a coil-making machine. Shows a star formation with 4 spinning glass spheres containing ‘totality water’ with composite GANS instilled with Love and Gratitude, also included a couple of drops of blood and lymph water in each ball – this is a device that might be controlled by emotional input etc. etc. 0157: Also going ahead with mass production of Magrav units and looking towards certification. 0158: MK: thank you very much – similar situation to German manufacturing – moving ahead with lots of experiments. Kf National Manufacturing factories will be able to order shipments of coils from Iranian manufacturing factory. Very nice! Thank you very much!

0201: Colleen comes online and shows a video of her room with lots of Magrav units around, and a fountain with a pool and abalone shell and lots of little orbs – she is making Gold GANS with her fountain and the little orbs are forming inside the shell. Not very clear what is going on here – is it a pearl forming? MK says wait a few weeks and we will see.

0206: Dan from Kiev, Ukraine shows a battery in a computer mouse – it was completely discharged but then with addition of plasma battery has increased its charge and the mouse has been alive for months since 27 March

0224: Dave from Peru has a friend who fell and had a shattered skull – asking MK for help. MK says with head injuries we need to first wait 4-6 weeks – then we need doctors involved, and MRI scan etc. to know what is going on. We can work with head injuries and coma once we understand the situation. We have taken a stand on the health side that everything needs to be developed by doctors.

0227: Kf is closing down all activities in Belgium in the next 14 days, because we have had enough of terrorism from people who live in Antwerp and the rest. Hence, now that we have positive developments all around the world, we are moving out of Belgium. This is a huge loss to the Nation of Belgium. This is to keep the Kf people in Belgium out of the hands of the terrorists and police – a certain Police officer whose name we have mentioned many times over the years is still at it and harassing Kf people – the harassment has gone beyond the limit so we are withdrawing from Belgium till the court case involving the K of B and his men is settled in the International Court of Justice – Thank you very much – 023213 – End.
