

## Notes from 18<sup>th</sup> International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-12) v1 (Notes have not been verified. Double check info with video)

Notes courtesy of Cornelius van Dorp @ Keshe Foundation New Zealand

Video link: [https://www.youtube.com/watch?v=Bz06JMY\\_tWw](https://www.youtube.com/watch?v=Bz06JMY_tWw)

This is the workshop from which Carolina posted the 40 photos - a few posts back on KfNZ - Paul from the small West African nation of Togo has been doing some amazing work, the most amazing to me being the way he is producing different types of GANS in coke bottles with the same copper and zinc plates - the only difference being his prayers or intention! MK deepens into the FIELD plasma before giving the mike to Paul...

Workshop begins with the One Planet One Nation One Race Video, followed by a new MOZHAN video – Man Originated Zone Habitation And Nutrition - the 3 month MOZHAN Training Program begins in the fall of 2016 – apply today at [mozhan.kssi.org](http://mozhan.kssi.org).

## Notes from 18<sup>th</sup> International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-12) v1 (Notes have not been verified. Double check info with video)

0008: Rick welcomes everyone. 0009: MK: Good morning as usual. We are entering a different dimension of teaching – in a way we have found a gap in the knowledge or in the use of the knowledge – today and this Thursday we will concentrate on this. From next Tuesday the International workshops will be down to 1.5hrs 2pm to 330pm – after 330pm we will teach national military organizations around the world.

0016: The Magrav unit system in the house in Rome has been disconnected and the lights and fridge are still working independent of the grid – same as the house in London – this is through the application of the FIELDS of the plasma – the same as the vertical doctors systems – working through the FIELDS of the plasma – so we are gradually building trust and developing into the flight system and material production. This was how the Universe was created through the FIELDS of the plasma.

0020: Now the people working in the background to discredit the Kf have nothing to work with – they are finished... MK gets on the warpath and departs on another diatribe against the Red Circle and Stirling Allan (who has recently been convicted of raping his own baby daughters) MK asks those who have been abused to contact the Kf – Stirling Allan will be incarcerated soon, and so will Red Circle.

0032: MK calms down and moves back into teaching about field plasma – draws a spiral and then shows the different applications at different points on the spiral – the spectra of the pain pen, the health unit, the energy unit, and now the spectrum of the flight system. 0045: We now reverse the process; instead of going from matter to Nano to GANS to field plasma we go the other way. We used Na, O, H to free the molecular to atomic, then Na, Cl to go to GANS. Then we used the WATER of the GANS to go to liquid plasma, and then allowed the liquid plasma to open to field plasma. Now we carry the field plasma with us to space and from it create everything we need. etc. etc.

0057: MK describes how to do this by creating 5 layers – 90 degrees opposed coils at the center, then a sphere outside with GANS coating inside the sphere, and WATER of GANS inside that – this creates a field plasma at the center and then gives you PROTECTION in the outer fields as well as the elusive LIFT. 0106: MK gives the specific instructions on how to use this system to make Gold, Silver or Copper. 0111: These systems are a replica of the planetary bodies and we see that in Earth versus Venus – the life on Earth as opposed to Venus is effected by the tilt of planet Earth.

(v1 2016-06-12) v1 (Notes have not been verified. Double check info with video)

0121: Today the 7th of June exactly 41 years ago in 1975 I came from Iran to Europe. On the same day 30 years later I went back to Iran and was given a lunch by a group of leading academics – 4 Professors said yes and another stepped aside to allow the majority to go with the technology – the beauty of this technology is nobody is wrong – all of you are part of it!

0126: The ‘space gap’ is crucial in this technology – the bigger the space gap the more energy or matter or rotation you create. With this the Innovation team will soon deliver cars that need NO fuel because you bring the energy of the plasma into the matter condition. Is Vernie on the line? Or Renan? 0128: Renan is on the line. MK: Do you understand how to run the engine now? Renan: Yes Sir! But I think I’ll leave it to Vernie – he is not online right now... 0129: MK: Its jumping the fields – jumping the levels – (indicates the picture at 0129) –

If you jump this way (to the Universal side) you create huge physical motion – if you jump this way (On Earth side) you create huge plasmatic field motion because from here to here (Matter to Field Plasma) you get surplus fields, and from here to here (Universal fields into matter) you release huge plasmatic states which phase the matter and release their energy. (Incompletely understood at this end – may have got some of the words wrong!) If you look at it a different way it is like a dam and a turbine – the height of the drop corresponds to the power production and you will see this again and again in the plasma technology – if you tilt it, if you do it straight – all will count – Any Questions?

0130: Rick: You mentioned that the Earth could be moved with the right plasma – someone is saying perhaps that’s what the pyramids did – move the Earth to a different position. Is that possible? MK: We leave that to the imagination of the man! (In fact there is evidence that GIZA pyramids are the lynch pin around which the last polar shift happened – see Atlantis Beneath the Ice – the recent re-write of Rose and Rand Flem-Ath’s great book When the Sky Fell.)

0132: Jackie: MK: Hi Jackie – you still alive not eating? J: Yeah sure! Just one question... When we are in the GANS state and release the energy, with the energy released in the new state, can we make the process infinite? MK: If you understand how to make the liquid GANS before you release the energy of the GANS you can even dictate the strength you want that new field to collect – you learn slowly – I’ll teach you slowly how to pre-determine – it’s a very good point you brought up – lets extend the knowledge a bit further. If you understand that you can pre-pack or determine the shape and size of the plasma due to creation of the right mixture – if you make the right plasma in the water you can pre-determine the shape of your

## Notes from 18<sup>th</sup> International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-12) v1 (Notes have not been verified. Double check info with video)

plasma fields and the position – then you understand that you create fields of plasma without containment (draws a star formation). By the emotion from your brain you dictate the shape of the fields of the plasma – you can dictate if you want your plasma to be 10cm or 2meters, and at what strength! You already know this well – its part of your life – you smell for example and it reminds you of food and your mother etc. etc. – what that field carries etc. etc. You already became field makers from the day you barbequed! You can do anything because your imaginations have no boundaries – by inspiration, aspiration, and understanding of the emotion connected to it. 0137: Mark: Does consciousness travel in plasma? MK: Consciousness is made by plasma!

0137: MK: “Would you like to show the expansion of knowledge in Africa please?” 0139: Keshe family Togo – Keshe foundation Togo, by Paul YATOUTE Maguiman. Togo is a small nation in West Africa, squeezed in between Ghana and Benin, and enthusiastically part of the One Planet, One Nation, One Race movement. Paul shows pictures of GANS production. After interrogation by MK it seems he is using plates and wires in coca cola bottles – but the plates and wires are not connected and he uses only rainwater – no caustic – and he dictates what he wants by his thoughts and prayers. This process takes 21 or 28 days. (Thus demonstrating by example what MK was talking about above – dictating the fields by the emotion from your brain!)

Paul goes on into the medicinal products he has made with Shea butter, Pomade for Cancer- the Chemistry of a Lemon, CO<sub>2</sub> GANS water and Shea butter, Sour-sop with Lemon added – then citronella (or lemon grass) To make a Shea butter pomade he works with bees wax and petroleum jelly and paraffin oil, with salicylate, Vaseline, Mint crystal and Rice and CO<sub>2</sub> liquid plasma! This is a CO<sub>2</sub> pomade for body cleansing.

He then shows an earth generator made from jars of GANS of Earth that makes 9v – also gets the same voltage from plugging YAMS together with copper coils – these you can get for \$1 and then after 6 months of giving electricity they are still good to eat! A rainwater generator he has made with a plastic bucket full of little bottles of GANS, which gives 50volts.

He demonstrates amazing food properties in grated avocado seeds with addition of CO<sub>2</sub> + CH<sub>3</sub> + CuO + ZnO GANS water – he first toasts the gratings on a fire then mixes it with GANS and packages and sells it as a tea! H then shows a beautiful vertical health stacker unit he made from wood.

(v1 2016-06-12) v1 (Notes have not been verified. Double check info with video)

0224: MK: Thank you very much that is fantastic! MK goes back to the first slide and asks again how he produces different materials out of the same plates with no Nano coating? He produces CO<sub>2</sub> and CH<sub>3</sub> GANS from the same non-Nano-coated copper and zinc – the only difference is how he prays – or what intention he puts in it! Paul confirms this – “yeah, same material, only the intention is different!”

0227: MK asks about using lemon in the anti-cancer butter – and then wants to go back to the molecular components of Sour-sop fruit – Slide 17. MK asks what is the Sour-sop? Paul shows a fruit that we know in New Zealand as Cherimoya or Custard Apple coming from the Andes of South America. (Wikipedia shows that it is marketed as a cancer cure under the name of Graviola!) 0231: MK asks to go to the slide showing the method of production keeping Slide 17 – the composition – in mind – has a closer look at the recipe. 0241: Looking at the Sour-sop composition it has everything! You have Na and Lemon, which produces NaOH or caustic. Then you have zinc to interact with the emotional component. You have K, you have phosphor – this fruit is a cancer therapy in itself! With adding CO<sub>2</sub> water you increase the potency – increases the plasmatic condition of the natural potency – with the CO<sub>2</sub> you bring a few atoms of CuO as well so it has all the elements for physical recovery – Zinc for emotion, Caustic to create the copper oxide, and the zinc oxide, phosphor the backbone of the DNA structure, Calcium which feeds with the zinc for the growth of the brain cells not to repeat, Fe allows increased production of haemoglobin within the structure of the amino and then you have B6 and B9 for regeneration of the cells.

0247: MK: I would like you to do something! MK says he thinks it would be good to change from Shea butter as the oil carrier to animal butter – and then suggest he goes and kills a few free range chickens and uses their fat (Sorry Mr. Keshe! – This is where you loose the vegans and the vegetarians!) MK says he suggests this because then you bring it closer to the level of the amino acid of the human being – repeat the same process – you can rub it on the skin where the cancer is. Also it will be very interesting to coat the coils on the health system. By adding lemon you have made a caustic out of it – with the CO<sub>2</sub> water he has made it into a natural GANS. This must be one of the strongest anti-cancer systems man ever could produce – its beautiful! Thank you very much!

0255: MK goes back to the white board and draws for the medical people a stand up system, but then instead of having panels on the side and helmet on top creates a box and says if you put the oil that was presented today on the coils you will see wonders. 0303: Draws a diagram to show how copper coils with Nano coating and

**Notes from 18<sup>th</sup> International Knowledge Seekers Workshop held June 7, 2016**

(v1 2016-06-12) v1 (Notes have not been verified. Double check info with video)

GANS can heal the body of the man. This can be used for more or less any type of cancer. 0309: Invites Paul from Togo to the African summit in Nigeria. 0314: A question about the new box arrangement confirms that he is talking about only 1 line of coils on each side and zinc coils in the top – using this new material with that will heal anything! 031709: End.
