Keshe (K): We are entering in a different dimension in teaching as I was explaining to our knowledge seekers. We have found a gap in the knowledge of the use of the knowledge and this gap or this shortage or lack of understanding must be corrected and put right. Today and on Thursday we will emphasize this and bring it out; we have finished developing the foundation of the technology. What we are going to do today and next Thursday to bring the knowledge so we all understand.

K: the intentional teaching next Tuesday will go from 2 to 3:30 and we finish at 3:30. After 3:30 we are teaching technology to scientists and military around the world and as part of our commitment to the nation which we will keep that way until we can bring the two sides together. We don't have the extra time to fit in the teaching schedule. So we will switch and at 3:30 begin our teaching to the military and space teaching to the international and waiting on the language which we cover the teaching. The teaching will not be open on international lines unless we decide to do that in the next few days. We are going to open the teaching next Thursday after 3:30 to the International public.

K: this is important—we have started the procedure that we will carry on with the total understanding. A lot of teaching has been done and now we try to structure it and bring more information that makes it clearer. I explained before today and now that you understand—we have to go into the phase of development of the technology by its application. This means from now on we teach how to apply different type of technologies which the plasma will bring. You want to use it in the interface with the plasma fields which is very advanced or you want to work with the plasma, the GANS, the nano materials and the rest which still give you connection with the matter state. The problem or the solution sits in the same course. I will go over these today and I go over it again on Thursday until it is understood fully. (13.27 minutes)

K: in the GANS state or in the plasma state of the fields we see what we don't see. And this is part of your biggest problem. How can something which you cannot see perform? How can the fields which you cannot measure give you certain things? You have in the past few weeks and months seen the fields but you have a connection with it that makes you happy to accept the physical part of it. But if you look at your pain pens you are holding physical matter and all the work is done with the plasma. Holding the pen gives you confirmation that something is happening. It is the pen that does it? If you understood you would know it is the field plasma that is doing the job. We are receiving a huge number of reports from many people that they are

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

using the pens for different applications such as cancer reduction, for pain in the neck, leg and back. In fact it is not the pen, but the field plasma that is doing this. So you are already familiar with the field plasma. You have gained some trust. But because you have to hold these things in your hand you have the confirmation of something to do with the matter state.

K: but, in fact it is the field that comes from the pen that is producing results. Giovanni tells me that in Rome a Magrav unit built 4 months ago has been in position in a house and they have disconnect the power supply totally from the grid. And whatever is connected to the plug on the unit is working – the refrigerator, the lights, the air and whatever they plugged into after the unit was installed is working. Before the unit was plugged in nothing was working in the house. This is not the first time this is reported; we have the same report on a system installed in January and it shows zero consumption on the grid and they are using it on everything in the house. We asked for a video of this unit and hopefully we can show this on Thursday.

K: so again, this is the application of the field of the plasma. This is another one: we have seen with doctors building vertical systems with people standing, or a dog sitting, using different ways for the power of the plasma and this has shown (17.43 minutes) the same results. So we are building the trust that there is something there. Now we need to bring in, concentrate and develop the flight systems and material production system. Building this and gradually coming with something that did not exist a few months ago is a huge change for a lot of people. It's a huge way to accept there is something like this. But in fact, it has always been and shall ever be—this is how the universe was created, out of the field of the plasma. And, this is what we did not stand still as we were busy teaching and enemies of the Keshe Foundation had a field day.

K: now they have to take their position. We announce and expose heavily the work of the people who have been working in the background to destroy the Keshe Foundation in Belgium, Germany and the United States. The Keshe foundation in the coming days will release huge amounts of information of how these organizations work to discredit the foundation. People's understanding is simply to ask the work of the plasma so they can carry on their abuses. This time it is finished. As you all know Mr. Allan Sterling has confessed to the abuse of children, including raping his own daughters. When we exposed him last year he went on a rampage with slander and put a website against the Keshe Foundation. The case for slander against Keshe Foundation was brought. Now he will be convicted on June 17, 2016. A prison sentence of 25 to 50 years is expected and we did not make an accusation.

K: We collaborated with the law authorities. In America plea bargaining means that the names of the people who he has raped and those he collaborated with will not be disclosed because it is too embarrassing. We see the names of leading scientists on his collaboration against the Keshe Foundation. We saw scientists like Don Winter on his Facebook, and his peers. We saw other

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

people appear on the list of collaborators and people who worked with Allan Sterling. These people will go out of their way to discredit the foundation so that you will not have the freedom and pleasure of what a simple technology this is. It is not for us to judge but we have seen how in the past few months, the people's whose names we released started their opposition to the foundation creation all sorts of 'facts' about Keshe Foundation, Mr. Keshe, and whatever. Now we go in the correct way.

K: we are releasing the name of the victims. If you want to and you are the mother of a daughter or son who has been abused or gone missing, please go on these websites that are organized by others and has nothing to do with the work of the foundation, in order to bring the information out in the public regarding those who have worked against the foundation. Red Circle is the same; since we announced that he raped his own daughters he has started releasing 'facts' about Keshe Foundation. We were correct about Allan Sterling and we are correct about Red Circle. Don't forget the collaboration came together when we exposed them. We want you, if you have children or you know people who lost their children, have children who have gone missing or were sexually abused go on the sites that are being set up by the Keshe Foundation supporters to release the names. We are asking Red Circle to tell us where the children are buried that you abused. That is why. The same denial that Allan Sterling made that this was slander and now we see there were over 50 children raped in the United States and don't forget he was in Belgium meeting Red Circle. So that shows the extent of the damage. We know that Red Circle has three victims and we put it out there and it is for them to answer to society and how they have been trafficking children and diverting attention from this technology with all the things they put on the internet for you to not have the freedom and pleasure of the science.

K: they managed to silence it for ten years in Belgium. Now it is not in Belgium anymore. Now we know how they operate and we know how the discouraging the technology has taken place in the past 15 years by Red Circle. Now he has to name his daughters. They have to be tested to see if we were correct as we were in the case of Allen Sterling. It is very easy; the problem is by distraction they have done whatever they like. Now we are the bringing concentration back to the work and you have to understand how the job was done. Mr. Allan Sterling brought out information that the Magrav system was fake and was not free energy and other allegations. A lot of people went to read it and they brought their children with them for him to abuse. Now they see that we were correct and they understand when we exposed Allan Sterling the first support for Allen Sterling came from Red Circle because he was brought in to the Keshe Foundation for interview by the Red Circle. It was all well planned.

K: now we directly announce: the two daughters of the Red Circle have been raped by him (Red Circle) just as Allen Sterling did to his daughters. And, we have witnesses to kissing in the gardens here and there because it was normal to them to abuse children. They distracted the

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

technology. Now we bring everything in and do not be fooled by the others. The investigation around the Keshe Foundation and these others is getting so intense that very soon we expect Red Circle to spend 25 to 50 years in international prison. Because in the country he is paid by the paymaster.

K: What does this have to do with us? We need to gather the knowledge that comes in and understand that the people who come in the name of Suzanne or Suzonne or False Hope, they all have the same structure. The security services are working very fast and once they are open now with Mr. Allan Sterling being incarcerated, his Facebook being opened in the public and we see who his supporters are and they are those who have been opposing the Keshe Foundation. We see a gentleman Mr. Cummerand (? 26.11 minutes) and a website called Scam Keshe Foundation. Mr. Cummerand we have spoken with your bosses; we know you are a child abuser because we have access to the medical files of the children in your company. You have been sending children documents and this is child abuse. Now you understand and this man appears at the top of the list of Mr. Allan Sterling's Facebook—one of the favorites.

K: the opening is huge. We stayed silent but suddenly out of nowhere we see how everybody becomes a scam. By scamming they get attention; they bring children and then they do what Mr. Allan Sterling and Red Circle. On the 17th of June we will the sentence for raping his own daughters of the ages of 3 to 5 years. And now we see that Red Circle has done the same thing to his daughters. This is direct and we want you to list the names of children you know who have gone missing around the world which end up in the hands of Red Circle. You have to understand, they were our webmaster so they had access to everything. It was the same operation as Allan Sterling. What we have to do is start building for has been deliberately financed to discredit foundation work so it does not work. It is for you to understand how to use it and let those who 'peddle' continue to 'peddle.' Whatever they say, such as our being wrong, and then they brought down the logos to support their allies.

K: now we see how correct we have been. We are as solid as ever and the teaching of the foundation is as perfect as ever and there is no more Mr. Allan Sterling to write that we are a scam. Very soon there will be no Red Circle to write 'facts' about the Keshe Foundation. The facts (as they exist) about Keshe Foundation and Mr. Keshe are correct and now they are on the run for their own lives. The children Red Circle raped and abused started with his own daughters. Then we will see the rest. The Paymasters are on the same payroll. This is important for us because most of the discrediting of the foundation has come through these three sources. Now one is down and in prison. He will be in solitary confinement because the others know what to do with a man who rapes his own daughters.

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

K: Next in line is Red Circle—the same pattern with two daughters and disappearing children. We put this on the table. We are looking for the name of the children they have raped and children who went missing and ended up in the hands of Red Circle and his team. Now you understand why there is suddenly such huge pressure to discredit me and the foundation. Now they are on the run as Mr. Allan Sterling was. Two daughters—raped, and confessed. Now there are two more daughters and maybe grandchildren. The clear indication is the foundation work is solid. Now we are looking for victims of Allan Sterling and Red Circle and his bosses. International trafficking is heavily involved and it is your job as Keshe Foundation supporters to understand that you have always been right and the technology has been right and these people have been paid to do what we are not supposed to do such as raping children.

K: we carry on with our work. From now on we show you our work and the application to get you the confidence in a way the technology needs to go. It's very simple; you have seen the pen, the Magrav system and the health system. You see the energy system. Now it is for us to understand where the flight energy is. Which part of the spectrum of the field of the plasma that we need to cover and where we have missed that if this is the plasma (32.05 minutes) and this part was to do with your pen. You have to remember there is both gravitational and magnetical (when using the pen). You have seen the operation in a stronger way. This is the spectrum that the pen covers (32.40 minutes) and this is the spectrum which your medical unit covers and this is spectrum where your energy system covers and then somewhere down here there is a spectrum that you will have to find for your flight system. Understand the reason and the possibilities and understand why and then you can look for what fields you have to extend. On the pen you have concentrated on extraction and removal or mixing the energy of a given concentration point of the tissue of the man. So your field can handle the small transfers. In the section to do with the health unit you went for a mixture of multiple organs and of a given strength. Again the field works.

K: In the energy you went for a higher system, a higher level of frequency. In the level of the pen and the health units you are working in the GANS matter state and in the energy units you are working with the vibration of electrons. All our systems are set to (34.46 minutes). You have to understand this is the next step and the next step is that we are looking for somewhere in the region where we have the accumulation of matter and plasma magnetic fields interacting. You have worked and comfortably seen the results in your pens and in your health medical applications and the energy Magrav system and you have seen the work of the plasma. But to reach the flight condition, you have to bring the game play of the matter state and the plasma state together for this planet. Because when you enter into space this does not count unless you want to go into the state or environment where this is matter state.

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

K: Building systems and developing systems and bringing the understanding technology has past. Now it is how we can manipulate it and use different aspects of the technology and of the state of the matter plasma to the free energy plasma that can be used for the benefit of mankind. This is where we see the change. This is all in the free plasma state and I go over this over and over. We have gone over this so many times that it has inspired you to come up with new technologies and with new systems with the same proposition: understand the simple way we started with what man knew best—the matter state. Then it was the nano state and then with that we brought in GANS and liquid water and then we have come to the state of the energy of the plasma. Now you have a very big problem. You have worked from matter state to the state of energy of the plasma. Now you have to work from the energy of plasma up to the matter state. (38.08 minutes).

K: you will find out as we saw the 129 Tesla, and we used only 12 volts, 12 watts of energy. Our colleagues went from matter state of 100 Tesla to 1.4 gig watt of energy. The 12 volt, 12 watts was done by a very simple man with a few hundred euro of material initially to achieve that. The 129 Tesla is here built by Armen. This is the 129 system (39.09 minutes). Now you understand how the 129 system works. Now you understand why the simple system by Armen made over a year ago in Sosano worked. Because he came from energy state to the matter state.

K: Now our biggest job is trying to teach you that now you have come to the plasmatic condition of the fields and how easy it will be to go from bottom to top and now you are on the top. With plasma technology you sit on the totality of energy. You sit on the structure of the technology and now you don't need that much if you understand the work of the plasma. You don't need to do much if we see these kinds of things on the work. You spend hundreds of thousands, millions to achieve 100 Tesla. And a single man with the knowledge of the plasma achieves more than that with a few thousand. And now that we have the knowledge a few tens of dollars.

K: you have to go back in a way and re-tune your thinking, ideas and the way you have worked. You worked from the matter state to the GANS to the plasma to the field and now you need to start working from the fields to create the energy, to create the matter state that you want and this will be fantastic. Now if you start this process you start the process of becoming the man of space. This is what you have in space; field energy is what you have in your hands in space and not matter state. Now it should be very easy to start developing whatever you need. The spaceship program is the application of the fields of the plasma of the universe. There is nowhere in the universe that is void of such a field. There is no state of pure vacuum with nothing in it in the universe because everywhere in the universe the field is going from one place to another and you are just a spectator in the gap of space in that moment and even while you are measuring it the fields go through your system.

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

K; so, this is where the strange thing will come for you to understand and become the creators and from now on you go from matter state to exact reverse of before. When you do it this way you will see the very fundamental change. You will the very fundamental work (43.30 minutes) and that is from here, going from the weakest to strongest with using other energy fields. To go from energy fields, the strongest, to the weakest you need very little, almost zero. More or less, you need none. You have seen how it is done and you understand the process. Now we go to the technology from changing the fields of plasma and you will see how we bring fields to the matter state. You have to remember and understand the process which is absolutely fundamental and sacrosanct. The process is so easy that it can be explained in a very few lines because now you understand it all.

K: we used in this process down (44.57 minutes) and I will give you parallels. It should be very easy for a lot of you to start working even today to complete part of the process. In the matter state we used NaOH (sodium hydroxide, or lye) to go from molecular to atomic. From atomic to the plasma we used NaCl (sodium) with the field interaction and then we used the water with it to bring the field into the homogenous level that we call the liquid plasma. And then we allowed the liquid plasma to release its energy. Now look at the way you have to work. On this planet sodium, (46.13 minutes) the base of the salts, has to be used as this is the energy of the universe and it interacts with the plasma of the field of the planet and become homogenous in the water of the oceans of this planet and the presence of the salt on the planet leads to the creation of nano-materials which leads to the creation of life.

K: now if you take your fields of plasma and subject it to the same interaction as is the matter state, put in the condition of the plasmatic water the condition of producing GANS, then nano-material then you can produce any material in any solid, liquid or nano in the universe. This is the life existence on earth. (47.35 minutes). This is the existence in the universe (47.43 minutes). Now you can replicate the same process and you will end up with any matter state you want—armenium, plutonium, amino acid, banana, if you know how to mix it. Where you started from copper, zinc, amino acid, banana and everything else, it became one. This is the change of position and the change of the direction and understanding the totality. Now you understood one side and now you have to understand the other side (from plasma to matter) and the circle is more or less complete in so many ways that you can be anywhere and when you receive what you need, you create a condition. But, don't forget there is very big subtle difference dividing the two systems.

K: on one side you use the matter state of the planet (49.12 minutes) and on the other side you have to use the plasmatic condition of the system. It is a huge difference and a huge change. the process is what you have to understand and now you can go into space and bring anything from anywhere in the universe in a field, or whenever you are in the universe and you come across

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

solid matter you want to carry, then you convert its energy. This is important, vitally important and this is how you can become the magicians of the space technology. You become the magicians of the technology in its true essence and you start producing materials out of the fields of the universe and learning how to be able to become a man of the universe. Without the second part there is no way that you will survive as a man in the universe. It is impossible because if you do not let the universal you will be entangled in a prison of space technology that you have to create matter for every bit of food, every drop of water and every medicine. On the universal side you carry all the fields and the universe gives to you continuously and you can produce what you need, when you need it and what you want.

K: this is the change of the game for humanity to step in from the village of the earth to the universal community because if you can produce and learn to produce everything you need, nobody becomes your 'god' because you are the god and the creator of what you need, when you need it and where you need it. When you come into space from different races, you learn different methods of producing different things, just as the way we learn from each other. Now you see where the space technology is leading us. We came and it took man millions of years to get from the matter state to nano technology for the past 10 or 15 years, the GANS state from Keshe Foundation fro the past few months and now you have become the plasma technologists of the human race.

K: Now you understand how you have become the 'top dog.' It is you who will decide the usage, the application and the next step. Understand that if you have a plasma you replicate the creation of the universe. If you want light, then look at how light is created. It is created by the interaction of the fields of one plasmatic condition, Earth, and the other plasmatic condition, the sun. We live by it—you have daylight. You want to create the state of matter, make it a faster production. Create a GANS—this how in the upper layers of earth that nitrogen and oxygen are created as a GANS and not as a matter state.

Then when you bring it to the near matter state, it becomes the nano of itself and then it becomes solid. So, in fact you don't need all the matter system (the matter side), you can change in that system the gravitational magnetic field of one against the other and if you do it properly (53.50 minutes) and used in conjunction you find lift and if you use them in the proper magnetic gravitational fields you can produce water field strength and change it to a liquid in your hands and make it solid to ice or whatever. The position and the strength of the gravitational magnetical (54.10 minutes) is the condition and the process and the principle of the interaction of the fields in the universe. That way on earth condition you need huge amounts of energy to melt, to produce dream materials we cannot produce on this planet.

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

K: In the next few months you will understand it and go to the periodic table and see what the dream of man has been for the next 200 years what they call fancy elements, you produce. But don't forget if they could be produced the gravitational field of this planet could not hold it. We don't see it; it is there. But now you have to create the gravitational magnetic field of the environment where these materials can be shown. So you have to create two systems: 1. the system to produce the material and 2. To be able to keep the environmental magnetic gravitational field and to be able to show it. Now if you understand this plasma technology becomes the root and the essence of creation. Now you are the creator. You have to understand how you want to move, change and see it and when you want to see it. Do you want to be on the universal field energy side or on the matter state side? Or you are going from the plasma of the universe into the matter state and you want to create armenium in the environment which is in the liquid state, and you can never get it into the solid state like mercury on this planet.

K: but you can have buildings made of stones because this is the condition and it depends on what the stone is made of. Maybe the copper in that condition does not work so well because the field strength interacts with the plasmatic gravitational magnetic field of the atomic structure of maybe one of the electrons of the copper and then you have to understand you have to protect yourself because your body, your life and your emotionality needs copper to exist so you protect yourself with a copper shield through the magnetic field. You gain is space which is so beautiful if you have the knowledge of it; if you know how to apply it and how to progress in the interaction of it. You have been looking for liquids and three conditions of the matter and energy and now you look in the essence of the energy and the essence of creation. This is what I taught in the past few days and I explained it again and then again on Thursday for those who don't understand it.

K: you made the cores and the coils. (58.16 minutes) you put the GANS inside it and you added solid GANS to it. You had the water inside it and you saw the emptiness and you had the field in the center (the 'empty space'). This is the field plasma and if you tap into that and use it in the right way and if you have a system to see it, you will see this (59.02 minutes). Because the plasma inside the empty gap is divided into layers and the way you rotate the parts in the core creates the elusive lift that you wanted. You are looking for matter state but in the world of creation and the world of the field of the plasma. You can run a reactor as small as a ping pong ball and go to the moon today. You can create a reactor the size of a football _____ and go nowhere with it. You have to look for the intensity of the field of the center (of the ping pong ball).

K: if you look (1.00.05) the coils have layer one and layer two and the core is your third layer. You have the GANS field and the water GANS field; you already have 5 fields inside each other which are exactly like the sun plasma. Go on the internet and look; some plasma is in layers.

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

(1.00.34 minutes) Now you see how I approach it to the point that you have the knowledge of the plasma of the universe. It is you who have to start playing with this and you have to develop the technology to play. You have to understand how you came to this point. If you look at it, it's exactly the same and there is no difference between this here (1.01.35 minutes) and this process of the matter state as illustrated above. And the core and coil process is the plasma process of the universe. You choose each depending on where you want to go. Which way do you lead one to create the other? Once you have created the core and coil process you have created the flash that gives you the field which gives you the protection and the lift you are looking for. The tighter and stronger you pack that center point, the faster you will travel in the space of the universe.

K: I've given you many hints and directions and told you many things, but it has all been words and now you can put the words together. The alphabet has made the words and now we start making the sentences of the universal work. You came from understanding the matter and now you can create any kind of field forces if you use and understand the work of the plasma. You are working now in your systems in the GANS systems with the central rotation and you are working exactly to the point in the fields of the universe. You are working and building the structure of a planetary system. That is what you have in there. You are not very far.

K: You have the field core, the solid core the outer core (1/03.26 minutes), the magma, the solid surface. It is a copy and you have to understand this (core/coil structure) is rotating. Each of the cores in the core/coil are rotating and each one will take according to the strength they have and that interaction of the strength creates the propulsion and attraction of two different fields. This is the most efficient plasmatic system for space flight, medical application, for food and for production of materials. If you understand this system, now you see you have matter to plasma and the fields have fields to plasma in the matter. The system which you carry in front of you, a lot of you are trying to build is the complete universal system. It has taken the Universe millions of years to learn this and you get it for free and you have no respect for it because you still don't understand. The man of the future would understand what is on this board and praise to his good fortune because it brings man from the village into the civilization of the universe.

K: there is no more to it; if you look at it, draw it in a different way. (1.05.13 minutes and he draws a circle spiraling out). You see it covers everything from the strongest in the center plasmatic matter state. Now you see what we told you from the beginning have been the essence of creation. Now if you understand this and if you can position this then you understand how easily you can build energy. Build the GANS of gold and make the liquid of gold and then make the field of gold. And then put the GANS of gold into this container and get yourself a core made out of gold, your coils out of GANS gold and nano coat out of gold and the machine will pour out tons of gold—whatever you want because you have dictated the field strength to be of human

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

strength and it is gold. I'm sorry so many people died so many times on this planet for the cheapest way to make the most worthless material on this planet.

K: you want silver? Make a silver core. You want copper? Make a copper core. Make the core, the coil from the copper GANS, and the nano out of copper and put it through and find the right rotational speed that you will produce so much copper that the copper industry will collapse. Then you have it in any shape of form you like because then you can create the field forces that will be round, 2 inches in diameter or flat as a pancake. Now you see how credible the technology is. You have gone all the way through it. But the lack of trust on your own because you have been built that way to never trust yourself until somebody tells you and now you understand some people and their own activators. But the knowledge of the universe is cheap.

K: Now you have to start understanding that no man should be a slave to anything. You will understand the way our dear friend Alex does. You apply the knowledge to this and you will have the orange, the banana and everything you want in this process. You know everything you need; the knowledge is complete and correct and it is for you to start opening avenues of this application according to the need of the man. As I said this morning when it's the last man standing on this planet, there is plenty and you should not worry about agriculture; there is enough to feed you. If you are in space you will not be able to find agriculture, but the energy field of the matter is with you and what existence depends on is in the core and you can develop it and you can use it. If you understand it you can extend it and step by step develop it to the next step. Bring it to the point that it can be applied, step by step, and that it can be used by humanity or yourself in the future in deep space.

K; now you understand how credible the knowledge is. As I said this morning in the teachings of this, sorry for those of you who try to discredit (the knowledge). The only option is one thing: eleventh floor, the long way to drop yourself down and leave humanity in peace. In reality everything has been and shall be correct with the knowledge. Go back; it has taken me 10 years to bring man from the matter state knowledge to the field plasma knowledge. I have paid with my life and my family and attempts by the Red Circle to kill me 4 times so you would not understand (this knowledge). Shot at, rolled at and poisoned. I want to see how many of you they can kill when you come to this knowledge. There are thousands of you who can develop this in a very easy way. When they opened the website for victims of the Red Circle I put my name in and how many times. They have murdered many scientists and killed and destroyed many families for them to be able to keep man enslaved to the matter state, the material world. We have freed you and you are free to run, but understand in this freedom there is a cost. You have to be correct.

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

K: I explained in the morning teaching this morning and we are looking at this again and again (1.12.08 minutes). You are looking at the operation of this field in what it is—it is straight forward circulation. The simple fact that is overlooked by a lot of you is that this is your system straight down the line. (1.12.34 minutes—the core and the coils). But what do we see? Most of life on the systems is hard to accept. We all know that this plasma (1.13.03 minutes) is slightly tilted. But the force of the fields on this planet does nothing but on another planet it comes in slightly differently and it leads to life. This (planet of the left) is Remus and the (the planet on the right) is Earth. Constant evolution does not create such variation that it allows you creation of whatever it could be (CONH). But here because of the slight tilt and the angle of the operation, life has become possible. So, when you build your system do not stick with the thought that it has to be ‘straight’ on your stand or fan. Make it easier. Instead of changing your speed just change the angle of your motor. When the reactor goes on a tilt (1.14.08 minutes) now the flow goes that way.

K: understand about positioning and what you see when you have the planet, when you have the star, replicate the exact condition in your system. Then you will see the field of that planet and you will see the life existence on that planet and how existence can be supported and what is in that planet. Then you can replicate that in your system and then you will reach that condition of that position of that planet in that part of the universe. The question is, would you like to travel all the way there or do you want to create the same constant strength and you will be there simultaneously in zero time. Now you sit on the fields of the rotation of that system. We have spoken of this many times. So you see that space travel is not just lifting from this planet. You have a bigger problem when you lift it and you are in space with this system because if you get your field strength wrong, where are you going to land? Did you create the field strength of Planet Zeus or did you create the field strength in the center of the sun to be attracted by it?

K: there is the law of field strength in the world of the plasma. It is very easy. Now we understand the totality or at least part of the totality in a clearer way. The plasma evolution of technology and science is so profound that it will touch the life of every single one of you. There is no escape and in the next few weeks we will see all these facts about Mr. Keshe will now go to the people who tried to distract him. Now there is no choice but to bring the mass media in for people to learn how to use a pen to get rid of cancer. Is it that difficult? Or does the Keshe Foundation work and your work have to become ‘underground’ because now we are underground and speaking to scientists in the largest nations who support us. The problem is not to be able to make this change but once we make the change we make a peaceful man out of the man itself. That is the problem. As I always say, you can always dress a monkey but you never make a man out of the monkey. You can put a suit and tie on him and in fancy ladies clothes and make the flag red or black. Now start understanding and try to play and feel comfortable and at

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

ease. Don't ask questions, answer the questions. Don't come and say can this do this? Go and try it and say that you did do this and here is what happened and you can do it.

K: the biggest problem with Keshe Foundation, the knowledge seekers and the rest of the people who listen to this teaching is the fear of the failure that it might not do what I think it will do. If it gives then what happens? Nothing. You open a new door in the knowledge of man and now all of humanity is like the opening of the West. Now the space has become the new finding the ocean of knowledge that man needs to bring to the table. Every single one of you will bring new knowledge in and you will become comfortable with it. We will have new 'Einsteins, Teslas, Alistairs, and who knows what' because very soon as it is the habit of the man we will forget all the suffering we did learning the matter, GANS, nano, plasma information. One day we will say that man used to do this. But, the knowledge of man would not be here because of what has been done before.

K: the process is very simple; try to explore. We have become space explorers in the truest sense. It doesn't matter where you are. Are you on the 'east side?' Is there an 'east side' on this planet; who decided to call it the East? We are all East and it doesn't matter where you are. When you are in Europe the East is Asia. When you are in America the East is Europe and when you are in Japan, the East is America. So, who is East and who is West? We are all part of the same structure and we are all the same. We have to learn this; the faster we learn this the faster we run. There is one problem and it is us and how much of this information we would like to accept. Now if you accept the totality you ask why you spent 30 years in the university or a different path of education or different cultures of understand when this was so simple. It cannot be something wrong with me so it must be my teachers. Now that I accept the knowledge I have to live with it and change myself.

K: today is June 7. Exactly 41 years ago I came to Europe from Iran in 1975 for the second time and I stayed. Coincidentally on June 7, 30 years later I went back to Iran and on my arrival during the time the President was giving a lunch to the senior scientists in Iran. And there was a decision maker of carrying with the technology or leaving it. There was a panel of the leading heads of the universities. I explained the technology and we had lunch and the voting came to whether the technology was going to be developed for the Iranians. Four full professors, heads of the universities, said yes. The 5th one said that if he said yes he was retiring in a few weeks' time and then he would have to stay and see the technology to develop and I'm too old. I am not going to vote, but I am going to step aside and you take the majority of the four. The correctness is not accepting it or refusing it but setting it the way it should be. Accept it; develop it to the extent that you understand it. The beauty of it is that none of is wrong. No one who puts 10 coils on top of each other or 20 coils next to each other, coils upside down and inside out, putting the balls inside the cores, using the GANS of the core—none of you are wrong.

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

K: Every one of you in this development brings the bouquet of science on the table holding the flowers of the knowledge of the man. So the one who says something is wrong with it, nothing is wrong. Try to understand what you have done. Try to understand so that the rest of us can understand it and develop it and if we need such a thing we can use the knowledge. You have seen it and we are bringing up new scientists. We call it Alec feed and Benjamin soap and Armen's or Marco's this or that. These names become the words of the textbook for the future and we don't need to look for it. So, we are creating a new life of science with the new scientists of the plasma and all of you are part of it. None of you is wrong. I oppose application when you don't understand the application and it can be dangerous. I oppose interacting when the knowledge is not there to be carried because it can deliver danger.

K: I oppose people using nano coat material to be inserted in the body of the man because very easily we had the full explanation of it today. The Italian man in Italy has done nano-coated material connected to the material and is running refrigerators and lights. The conversion of the nano material into the energy in a physical matter is a huge delivery of energy when it is the wrong way. If you have the material and the method for it you can process it and deliver it in a simple way. Interact it, bring plasma to the nano, bring plasma into the matter and see the energy released by it that you can use. If you understand the amount of energy you have in the glass balls that you are creating and you can set the right matter side or bring the right space you can move this planet from its position.

K: this is the difference. You have to understand which way you are going and you have to understand space gap energy. This is going to be one of your biggest problems in this technology. In space if you do not understand this space gap, God help you in space. This space gap (1.26.37 minutes) is sacrosanct. You don't understand it and you play with your existence. In time a lot of you will experience huge shocks and some of you have because what you tried to do was you space gapped. (1.27.01 minutes). But you don't see it. The bigger the space gap the bigger energy you release and the more matter state you become and the more physical motion and rotation you can create. This is what I have been talking and teaching with our innovation center. If the innovation center understands within the next few weeks, and I just guide them, they should be able to be deliver the first cars without fuel. Mechanical cars would be without fuel. All you do is go to the back of the house, go to the back of the car, take the fuel tank and throw it on the street. The cost of conversion is "very expensive" ... maybe about ten cents and no more. Because you bring the energy of the plasma into the matter state.

K: is Bernie on the line? Or Renon? Do you understand what I am showing you?

Renon (R): I'm here and I'm taking notes.

K: now you understand how you have to run the engine.

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

R: yes, and I will let Bernie review as he is not online right now. We are going to apply this.

K: you understand what we said in the discussion yesterday? It's jumping the fields, jumping the levels. This is important and if you understand and if you jump from plasma to matter (the universe way) you create huge physical motion. If you jump from the matter to plasma way, you create huge plasmatic field motion. Because the steps from the matter to the field you have to release fields that are surplus until you come to the matter state. On the universal side (1.29.49 minutes) you release huge plasmatic states which face the matter and they release the energy. If you look at this in a different way, the field plasma (on the universal side) is like a dam. And the matter state is like a turbine. If you release, depending on the height of the drop, depends on the power of production. You will see this again and again in the plasma technology. If you tilt it, put it an angle, do it straight, all ways count. Any questions?

1.30.45

Rick with Questions: you mentioned the earth could be moved with the right plasma and someone asks that perhaps that is what the pyramids did was to move the earth to different positions. Is that possible?

K: we leave that to the imagination of the man

K: we are running so fast with the knowledge transfer that people don't have time to catch up; in a few weeks' time there will be a lot of knowledge being disbursed. We are understanding and developing new technologies the same as when I started talking about the nano materials and then the GANS and everyone said I was changing directions saying "we were all doing something and then we go somewhere else." Now you understand why. That section was finished. Now we are entering the space technology and it's going very fast. Those who are stuck with the matter state thinking will have a lot of problems.

Jackie (J): I have just one question:

K: Hi Jackie, you are still alive and not eating?

J: yes, sure. When we are in the GANS state and we changed the environment and released the energy and now we have no more physical GANS when the energy is released in the new state can we make the process infinite less.

K: if you understand how to make the liquid GANS before you release the energy of the GANS you can even dictate the strength you want that new field to collect. You learn slowly and I teach you slowly how to predetermine because if you understand this, and this is a very good point you brought up, then you can pre-pack and predetermine the shape and the size of this plasma (

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

1.33.26 minutes) that you are going to release due to the creation and the right mixture. Don't underestimate making the right mixture in the plasma of the water you can treat it in the shape of your plasma fields and you can predetermine the position of it. And then you understand what I said for a long that in the space technology you create fields of the plasma without containment. So, yes you can determine this and these are the arts you come up with. We will have art (forms) of the plasma coming up in all sorts of shapes.

K: this is what I said to you: by thinking and by pushing your brain you dictate the shape and the strength of the fields of the plasma. Now you understand how. You can dictate if you want your plasma to be 10 centimeters or 2 centimeters and what strength. Don't forget, you know this extremely well; it's part of your daily life. You smell and it reminds you of the position of the food, the cuddle of the mother and everything else. How come this is so strange to you? You pass the field, you smell on the field and it gives you the smell, taste and position of what that field carries. I can smell roses and then I see the redness, the color, the thorns and what you gave and what rose you gave to whom and what emotion it brought you. You have already been playing with the field plasma exactly as your nano material from the day that you 'barbecued.' This is the strengthening of your understanding into your own structure of the creation.

K: you know all of it; as I said to our friends in Ghana, we have all been for 6000 years amino acid GANS makers and we call it the soap. So yes you can do anything you like. Anything, because your imagination is a field plasma and it has no containment and it has no material but it is created by inspiration, aspiration and by understanding of the emotion that is connected to it. If you understand that people like Dr. Rodrigo, it should be no problem for you to handle diseases or conditions like what we call _____.

J: I have one other. When you come from the GANS and change the process you make the new materials. We play with that so we can again play with these new materials.

K: of course. But now it is refined and exactly the way you want it.

J: thank you very much.

R: question from Mark: does consciousness travel in plasma?

K: consciousness is made by the plasma. Would you like to show the expansion of the knowledge by Africa please?

R: the Togo presentation?

K: yes, and if he is online he can explain to us.

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

Paul Yatoute Magiومان, family Togo/Keshe Foundation Togo. (1.38.11 minutes):

Paul (P): hello Mr. Keshe.

K: would you enlighten us? Go ahead and explain what I call the 'old knowledge' of man.

P: I will make a comment. We have two logos and the first is planet earth and you can see there are different parts and every part is represented by one country and every country in the world must be for us and Keshe Foundation plasmatic energy. We can reach for the good of one planet, one nation and one race. You can see the different activities I have done in Togo. Second page is Gans Production. We have made the GANS production in a basic way. In this specific way you will see how we have made the GANS in African realities. This is CO₃ GANS. (1.42.54 minutes) I take one bottle like a coca cola and put a small coil inside and I put the zinc. Normally when we put copper and zinc we should get CO₂ but in this case we have CH₃. Here the copper is not nano coated physically, but at the plasma level I have nano coated the copper. That is why when you combine zinc and copper and you don't nano coat it we get CH₃ GANS. Everybody can see it is making the GANS.

P: the second GANS of CO₂ with distilled water. (1.44.28 minutes). I just put here coils and the zinc plate for the first time. For the 2nd time, I didn't nano-coat the coils at the plasma oil. You can see the condition with the difference at the plasma level. Here we get production of CO₂ GANS.

P: the next page is CO₂ GANS with sea water. We can see when we finished the production after the GANS; the color of the GANS water is blue. I have washed the GANS. What comes from the blue color for the GANS water?

K: I can't explain and I don't know what you have done. We see this, because you had copper in it, as part of the copper oxide nano GANS and it becomes bluish and it has to do with the copper in your system. Usually we this color and it's the color of the GANS of the pure copper. I have seen this with darker blue with the ones I have done. Do you use caustic in these bottles or just water?

P: yes, just water.

K: you don't add any caustic?

P: I didn't add any caustic.

K: how do you connect it if there is no caustic? I see wires in the background.

P: I didn't make cfonnection; I just put the plates and didn't use connection. (1.47.40 minutes).

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

K: so the copper wires are not nano-coated?

P: it is not nano-coated and it also is not connected on to another.

K: you just put the zinc and the copper?

P: yes I put the zinc and the copper. And I put my intention on that.

K: your intentions?

P: yes, I give my intention.

K: so you use the same setup but by intention you produced it for materials. Am I correct?

P: yes.

K: if your intention is to produce white CO₂ then you produce white CO₂ with the same copper, the same water and the same zinc and if you wish produce CH₃ you produce it because you wish for that.

P: yes. The 4th slide is CO₂ sea water GANS. Here you have the copy and the original. The first one we got and I make a duplicate. The way I do that is to take water and put it and make my intention and leave it next to the first bottle of the GANS. (1.49.56 minutes). After some days it also started giving GANS. The original is there with the copy.

P: the next page is the sea water GANS copy. (1.50.25 minutes). Here is the process of washing the copy of the GANS. I did the copy and I washed it.

P: the next page is CH₃ with double coil and zinc plate. (1.50.50 minutes). These are with the double coil and zinc plate.

K: can you explain how you make the bottle so full of the GANS?

P: CH₃ one?

K: how do you make the bottle full, by praying (intention?)

P: yes I increase the level by praying.

K: it says CH₃ with the double coil. What is the double coil? Is double coil of zinc or double coil of copper?

P: it is double coil of copper.

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

K: so this is all trying to understand. With the earlier one you used a single coil with a zinc plate and you wished to get CO₂ and you got CO₂. With this picture you wanted CO₂ with zinc plate and double copper wire and that gave you CH₃. Can you tell us something—how do you know this is CH₃ please?

P: the color or the property?

K: carry one, we will come back.

P: the next page shows CH₃—copy. (1.53.10 minutes). Here is CH₃ copy. I make water inside and give the intention and I get the CH₃ GANS. In the next slide I show my mixed collection of GANS. (1.54.00 minutes).

K: how long does it take to make a bottle of GANS?

P: the time?

K: yes, how many days?

P: sometimes it is 28 days and sometimes it is 21 days. The same number of days as in normally making the GANS.

K: 21 days to make a bottle of GANS? Thank you. Carry on please.

P: copy GANS from Jacky—gold GANS and others. (1.55 minutes). One day we were in the private teaching showed gold GANS with plenty of GANS. I didn't get material to make it. I just took the material and kept it in the universe and when I went home I put water in the bottle and the energy in the bottle. It took six days to get from Jacky's to home, so this GANS came from Jacky.

P: the 10th slide is GANS and copies. (1.55.37 minutes). These are the different GANS and copies.

P: the next page shows the copper plate and zinc plate for rain GANS. I have used the small copper 2 centimeter plate and small zinc 2 centimeter plate. I did not nano-coat it physically. In the plasma state the copper is nano-coated.

P: next page is CO₂ GANS with rain water. (1.56.42 minutes). These are in the GANS water without the nano coating on the copper. They are in order. The first CO₂ GANS is sea water and the second is with rain water. The GANS made in the rain water is whiter than the GANS made in the sea water.

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

P: the coil for the CH3 GANS (1.58.10 minutes). I took this after I have produced the GANS and the color is like blue and it looks like we have nano-coated copper but this is _____.

K: how did you nano coat or GANS coat these coils?

P: I didn't make it the GANS made it.

P: coil for sea water GANS. It looked like we have finished and produced the GANS.

P: slide 15 cancer pomade: shea butter: components and properties of shea nuts:

stearic acid 20to 50%; linoleic acid: 3-11%; palmitic acid: 2 -9%; linolenic acid <1%; arachidic acid: <1%.

K: go back please. I am trying to understand.

Pantothenic acid 9.253 mg (5))

P: slide 18, the chemistry of a lemon: What makes lemons sour? The sour taste of lemons is caused by the presence of organic acids. The major acid in lemons is citric acid, which makes up around 5 to 6% of the lemon's juice. Other acids are also present although in much lower concentrations than citric acid. Malic acid is one of these, present at around 5% of the concentration of citric acid. Vitamin C, Lemons & Scurvy: Lemons contain high levels of vitamin C, also known as ascorbic acid. The levels in lemons are around 50mg per 500g on a par with oranges and around double the amount of limes. Vitamin C deficiency can lead to scurvy, a disease that causes loss of teeth, jaundice and eventually death. In the 1700s, all British ships were required to provide a lemon juice ration to seamen to guard against this disease.

Cancer Pomade: 1. Lemon and Soursop; 2. CO2 GANS and Shea butter; 3-soursop, lemon shea butter; 4-extraction 5- Lemon & Soursop, CO2 Gans, Citronella—he took the body of the fruit; 6—shea butter on fire; 7—then added shea butter plus the lemon; 8—shea butter plus lemon plus citronella plus soursop (2.06.38 minutes); 9—10 ml of CO2 GANS water and injected that to the mixture of shea butter, lemon, citronella, soursop; 10-results –placed this in small containers. 11-container for refreshing (2.07.59

Minutes); and

CO2 Pomade for Body cleaner: elements for production: wax of honey, plus petroleum jelly plus paraffin oil plus salicylate plus Vaseline plus mint crystal plus rice plus CO2 liquid plasma. This is formula to making the body cleaner.

1. Components of wax of honey:

Hydrocarbon: 14% Mono-esters: 35%

Diesters 14% Triesters: 3%

Free fatty acids: 12% Hydroxy mono esters: 4%

Hydroxy polyesters: 8% Free fatty alcohols: 1%

Acid esters 1% unidentified: 6%

2. The results are mixed and put in containers; see page 2.10.29 minutes for

Results of the mixture 2 hours later.

Body shampooing with CO2

NaOH Solution plus salt plus lemon plus rice plus tomato plus CO2 liquid plasma (2.10.51 minutes).

1. Tomato contents:

Glucose 2.2g (1%)

Fructose 2.2 g (1%)

Proteins 1.8 g (0.8%)

Fiber 4.2 g (1.8%)

Ash 1.4 g (0.6%)

A – Earth Generator (2.14 minutes)

Zinc plate, iron from computer, container. I put the zinc and iron and put in the bottles and made voltage 9.3V and I made the connection to the meter and it is 9.3 Volts. I have many bottles like this. This is for my energy.

B. Yam generator and I made coils and made connection. 2.15.19 minutes

I made the connection and we got 9.3V. I make these for one dollar. After 6 months of giving electricity the yams are still ready to eat.

C. Rain water generator. Coil and packing, voltage is 50V. We get electricity with these in water.

D. Tree Generator-- I don't know if you see there is no connection

E. Food: We made ourselves food; elements of Nut of Avocado plus (CO2 plus CH3 plus CuO plus ZnO) liquid plasma; the nuts of the avocado were grated. (2.17.29 minutes). The grated seeds were toasted on the fire. We mix these with the liquid plasma and we package for finite food of avocados.

F. Health Unit: (2.19.02 minutes). We did not make coils but it stills works. We put the wood that is nano coated and the universe plasma energy is on it. Plate for coil 2.20.23 minutes. I did not put coils or connection. Coil setting – if I want to put coils you can see that I can put them on the back. (2.21.31 minutes).

This was presented by Keshe Family Togo/Keshe Foundation Togo. This is our presentation for what we have made.

K: thank you very much; this is fantastic. You don't need complicated things. I would like you to go to #16 and #17. How the process you wish to create the same way you produce your CH₃ or CO₂?

P: this is the same way and when I take a coil I pray on the coil; I pray on the zinc and I pray on these and put the water and the zinc and copper.

K: no nano coating?

P: no we did not nano coat.

K: what do you do with the CO₂?

P: I put zinc, copper. The coil is not nano-coated and I pray on the coil.

K: so your CH₃ and CO₂ is the same copper and same zinc. It is how you pray that you get what you want.

P: yes, it is the same copper and the same zinc and the intention is different.

K: you leave this from 21 days to 28 days?

P: I have more than that at home and I will leave it 28 days.

K: so you use the same material and your intentions are what changes the matter.

P: yes. The same material and the intention is different.

K: can we go down to the cancer pomade? You are using lemon, soursop. Can we see the composition of the soursop? Show me the data on the soursop.

Molecular components of soursop:

K: what is the soursop? Okay. Wait just a moment.

Calcium 14 mg (1%)

Magnesium 21 mg (6%)

Phosphorus 27 mg (4%)

Choline 7.6mg (2)

Vitamin C 20.6 mg (25%)

Riboflavin 0.95 mg (4%)

Niacin (B3) 0.9mg (6%)

Pantothenic acid 9.253 mg (5))

K: tell us about soursop.

P: it is a fruit that you can eat and it is plentiful in Africa and in Togo. If you have \$1 you can 20 of these fruits. We use them like mangoes and eat them. It is recommended for people to eat who have cancer. I implemented the energy of soursop and put CO2 GANS with it.

K: stop! Go back to the picture with the data. Slide 17 and go down now to the method of production and then we will come back to this. Okay on slide 18 stop at the lemon. Take a screen shot of 17 and 18, Rick.

P: slide 18, the chemistry of a lemon: What makes lemons sour? The sour taste of lemons is caused by the presence of organic acids. The major acid in lemons is citric acid, which makes up around 5 to 6% of the lemon's juice. Other acids are also present although in much lower concentrations than citric acid. Malic acid in one of these, present at around 5% of the concentration of citric acid. Vitamin C, Lemons & Scurvy: Lemons contain high levels of vitamin C, also known as ascorbic acid. The levels in lemons are around 50mg per 500gl on a part with oranges and around double the amount of limes. Vitamin C deficiency can lead to scurvy, a disease that causes loss of teeth, jaundice and eventually death. In the 1700s, all British ships were required to provide a lemon juice ration to seamen to guard against this disease.

K: you mix the lemon with the soursop and mixed with the CO2 and shea butter.

P: shea butter is from the shea nuts and comes only from Africa.

K: what material is shea?

P: it is a nut.

K: is this the same as the ground nuts you have in West Africa?

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

P: it is bigger than the ground nuts; you have to break them and you find the shea. To get to the oil you put it in the fire.

K: I know how they make ground nut oil; I have seen that in Africa. So this is different than ground nuts. This is fantastic and what you have brought us is a gift. So you take the lemon and then add the CO2 GANS and the shea butter. Do you cook it together?

P: I heat the shea butter and then add the lemon, soursop and CO2 GANS. I mix it all and cook it.

K: citronella is lemongrass?

P: yes.

K: how long do you cook the shea butter and lemon?

P: 5 minutes.

K: how long have you tested this for cancer in Africa?

P: one month.

K: what are the results, what do you see?

P: after one month the person doesn't want to go to the hospital because they don't feel any pain. The person doesn't want to go to the hospital because they don't have pain.

K: it doesn't mean if they don't feel the pain that there is no cancer. This is worth looking into because of the number of reasons you brought up. Tell me of the components—how long has this been used in Africa for cancer or is it something you have done?

P: everybody, well many know. This is the first time I have produced these components and before they only used soursop.

K: get the picture of soursop; this is very interesting. Rick put the picture of the soursop and the lemon next to it. This is very interesting and you see the work of nature in so many ways. (2.40.50 minutes). If you look at the composition of the soursop you see everything; if you use this mixture and if you rub this oil on your coils that you showed us on your upright system, it should be an effective field process for most of the diseases known to man. I think Dr. Rodrigo will want to see this. I tell you why—this is a fantastic piece of knowledge the Africans have been using in a natural way. In this simplicity you can produce everything: sodium, lemon, NaOH. In the stomach of the man, the sodium creates sodium oxide hydroxide which is the caustic. You have that with this lemon with the OH sitting everywhere and you created a caustic.

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

You have the zinc and most cancer has an emotional basis and now you have entered the body with the condition of what it needs: potassium, phosphorus. This fruit is a cancer fruit. It is in conjunction the way you have mixed, if you go back to the Ghana teaching last week and by adding CO₂ you increased the natural protein and here you have used shea butter.

K: If you use the same process or add animal fat into this I think it is a very natural cancer system because with adding the CO₂ which you added we saw the reason the system works with the shea butter, lemon juice and the CO₂ you increase the potency. The CO₂ brings the plasmatic condition with the Gans and with the condition which has already created a natural GANS system. What is on this board with the new knowledge which we have and strange enough, look what it is. You have B9, B3, B6. This fruit is a cancer fruit and the only thing missing is the energy that you added with the CO₂ and what is interesting is that you created the CO₂ with the element of the copper that had the blue tint in it which I said was a nano oxide copper. So with that you bring 100% few elements CUO₂ as well. So, it has everything for physical recovery, emotion, caustic to create the copper oxide and the zinc oxide and you have Phosphor which is the backbone of the DNA structure; you have calcium which feeds with the zinc for the growth of the brain cells not to repeat; you have iron which allows for the increased production of hemoglobin within the structure of the amino acid that you put in; and then you have B6 and B9 which assists in the regeneration of the cells.

K: I would like you to do something. I am going to the market in Italy to find soursop and I will repeat what you have done and give to the medical people we have around here to develop it and we send you this natural product. Try to change from the shea butter to animal fat. Try to test with animal fat because then you bring it to the near level of the acid of the human being and repeat the same process. But you are rubbing this on the skin of people where the cancer is, am I correct?

P: I rub in the body of the people where the cancer was.

K: it will be interesting if the nano-coated coils you showed us, that beautiful standing upright system, if you can GANS coat those coils with this mixture you make and see the real reaction of the system. This is a natural and the most beautiful natural process. By adding lemon to it you have made a caustic out of it. With it and the CO₂ and the water you added has made it to a natural GANS that supports. That is why it could be correct that these molecular components you have listed show the possibility and this is the first time I have seen this. It's so beautiful. This material if it is used as I was discussing with one of the doctors in one of the teachings last week that the way these upright medical coils work is it touches their arome (?) and they should never get cancer again. When you go through the upright coils and you are standing and what you show here is the clear indication if we can use this fruit with what is there in conjunction with

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

lemon juice which brings in the sodium in the caustic condition. Now in one go you are making GANS of everything in one go.

K: This is the beauty of it and once you release it in the cooking you release the sodium and everything – calcium, magnesium, iron and everything – and you are supporting the psychological, the production of the brain cells, the hemoglobin, the magnesium which is the most important part of the structure. Then you support and you embedded in the arome (?) through the change in the DNA. Just go and have a look at the structure of the amino acid or what you call DNA and you will see the backbone is Phosphor. This is one of the one of the strongest cancer systems man could ever produce. It is beautiful. I told you that Africa will be the crown jewel of the spaceship technology. This is an example of it. The knowledge you carry of the food of Africa is there and you have all the tools. This is one of the most beautiful knowledge you could bring us from Africa. Thank you for bringing it.

P: thank you Mr. Keshe.

K: take it a step further; change this butter to animal fat. Do you have access to bush meat?

P: no I don't.

K: In Africa you don't have western fully saturated antibiotic animals. Try to find free range chickens in the villages. Try to get the fat from the chicken and instead of shea butter use that fat. The fat of the free range chickens in Africa is saturated with omega 3. Then cover your coils with a combination of what you make after replacing the shea butter and it will come closer to the protein structure of the man. And use the fat from the chicken. Then make the same structure and use these on the coils of the beautiful system that you showed and I think you will find a very effective system for any kind of cancer. But in the system you showed me and I have explained this to the doctors, you need a leg piece to cover the whole body. Put another piece on the bottom.

K: I thank you for bringing us this knowledge. I will use my white board to teach you something. Everything is naturally there to reverse cancer. What I will go back and show this and I am looking from the top and this is what I wanted to teach today. Now you brought such a beautiful gift and I want to share a piece of knowledge with you. You made those two boards (for your medical unit). And this is for Dr. Rodrigo and Dr. Klaus and the medical people. Up to now you put systems in panels and you put your patients inside the two panels. (2.56.17 minutes) Let's take the knowledge a step further. You created helmets. Go back on the medical application patent.

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

K: Let's extend the knowledge. We look from the top down and these are the boards with two sets of coils going down. Now add two more coils, one on either side at the top of the side panels. When you do this you have to take the helmet away and you can add a section in here which covers the totality of the head (2.57.17 minutes). You have also covered the physical part and the immune system and don't forget when you make the top it has to have coils also, but there has to be a space, a gap, for the center of the brain where any extra energy can pass through. (2.57.40 minutes). So, you have 4 walls and you have coils on the top and now you have created a box that handles the physical, the emotion and everything else. But the two criteria are when you connect the system, before you used to connect the coils down the sides. Now you have to connect around the top. And the end of the beginning goes to a dumper. At the same time you connect each plate to the top. You can add the section to the bottom with the same characteristics and what you create is the field balance. (2.58.53 minutes). What you create is a condition that it can handle any disease.

K: In space go back; I spoke to the doctors about this before. Go and put in a swimming pool and put them in the water. The water is the liquid version of the same thing. So this is what you are going to get. This way you create a full balance and you need to put two units opposite each other and you have to get everything in the right order. Now you create a balance in the total body of the man. You change and if you have a cancer patient, put on the coil and you will see wonders. Now if you look at it in so many ways you created a box like the Magrav unit box. The human is in the box in a controlled environment and then you put your coils, the head, the body, immune system on 4 sides; you cover the top and you cover the bottom. This is the kind of system you need in space when you suddenly receive huge amounts of energy. You cannot go section by section. You de-energize the body and this is the only way you can handle the space viruses because they attach to every cell and they don't go through the digestive system. You dump the energy very fast. It will be interesting to see if you make this and use the GANS of the oil (pomade) that you made. It's the same process. I explained this in the teaching before. I explain it again so it is very clear.

K: when you make your coil you have a matter state. You added the GANS in the coil. (3.01.33 minutes). Then with it you brought in the water which is the liquid plasma so now you understand what you have been creating. This is the GANS, here was the nano coating and here was the matter state (around the outside). And here in the center space you have is the field plasma. Now you see the coils we have. With no change if you look, you have the copper, the nano materials, and then you added the GANS on top of it. This GANS is the oil you created. What happens? The energy in your coil structure moves along and now you see the energy locks into your system. (3.02.58 minutes). The difference is that now this structure (the coil he drew) is the body of the man. In the GANS state in the liquid water is the energy of the structure. You see the difference. And here by putting the GANS on top of the nano you brought the energy

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

resources on top of your nano material. That is why these power units are energy sources, these Magrav units. With the coils you have created you have brought the sun to sit on the nano material. It doesn't need to look for energy; energy is coated on it.

K: in space you change it the other way. I have shown you matter state and plasma state (3.03.59 minutes). Here the plasma sits outside (the drawing on the right) and here the plasma sits inside (the drawing of the coil). This is the proton, the electron and the molecular energy of your life. When you put the oil on the coil which is coated for balanced energy between all the elements of creation, the copper is already inside which is the physical. And, you understand this system should bring magic for any diseases even if you added CO₂ to it or CH₃ or any kind of _____. It is fantastic knowledge brought to the table and I thank you very much. Those of you who are familiar with this can use this for more or less any kind of cancer. This has everything not to tangle the cancer, but to assess and balance. When you create the GANS...and please share the screen from Paul with the tables-- you see when you have put this material on the coil everything is in the GANS state and when the body comes to it, it takes what it needs and no more. And it brings balance to everything. This is the beauty of it. Sodium with lemon creates a balanced caustic and everything in there is in the GANS state in the atomic structure of the GANS material with the B9—this is a recipe for any cancer. This is a beautiful piece of information and knowledge. If you understand it, elaborate on it and develop it further.

K: look at this from the agriculture point of view and use this butter and make it liquid enough, you will find out with the magnesium in it you can create a condition that there should be no need for any pesticides and increase the production of any food hugely. This food has the composition and the amount of materials in it is just about enough to do it. You have the potassium, the phosphor, sodium, a little zinc for emotional, and this should be very good for bringing knowledge because of this composition and creating brain cells. And you have B9 which is perfect. If you have stroke or brain hemorrhage this should be the perfect coil to put someone inside it to produce the brain cells. This is a gift Paul and it is amazing what you brought to the table.

K: when you come back to Togo get in touch with me and I invite you to come to the African summit in Ghana. Bring your system and this knowledge. Benjamin are you on line? Is Dr. Ghatta from Kenya on line? Let me speak with Ghana. On Thursday morning we have the Ghana scientists with us and we ask them to replicate this and give us the full scientific measurement in the lab. This is absolutely beautiful for space technology.

K: Dr. Ghatta are you familiar with the soursop in Kenya?

Dr.G: yes I know the fruit.

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

K: is it possible for us to have scientific research exactly if there is any paperwork in the scientific arena that allows us to see what they have done with this in the present science?

Dr.G: yes I have seen some papers and I will look for them.

K: please work with Paul in Togo and build up the scientific papers and I will ask people in Ghana to help us to scientifically validate it. It's a nice and beautiful piece of information that explains how a little bit can go a long ways. Strangely enough if you look in the acidic part there is another game played here. Some of these acids are the ones that can penetrate the skin as we saw with the presentation by Ghana and what we saw with coconut and cocoa.

K: thank for the fantastic knowledge Paul. Please follow your patients and bring doctors in Togo to work with you so this is done scientifically. I know the African mentality—if they don't feel anything they don't go anywhere. But, try to get these people if there is a scientific record with X-rays and have them taken again.

K: Dr. Rodrigo are you with us by any chance?

Dr.R: yes I am here and I heard everything.

K: can you see what can be done with the GANS of this on a nano-coated coil?

Dr.R: yes, I will try.

K: can you get this material in the US?

Dr. R: I don't know the fruit.

P: I can send it from Togo.

K: in the US it is impossible. You have never been to the airport? You cannot bring things into the country. We have to test this in Africa and build it from there and outwards. Let's see what we can do. I will try to find it here in the Africa shops and see how we can develop it. Thank you and have a safe trip.

Dr.R: are the boards on the side of the person going have two lines of coils because the back one aligns to the spinal, or is there only one line on the side of the coils?

K: one line of coils on the side is good enough. The only thing is, on the head section do not use copper coils; only use zinc coils.

Dr. R: just on the top?

Transcript from 18th International Knowledge Seekers Workshop held June 7, 2016

(v1 2016-06-10) DRAFT (Transcription has not been verified. Double check info with video)

K: yes, please.

Dr. R: there is only one line on the side?

K: yes, please. This is the chamber in space and we talk about rooms which you can enter. This is a room in the structure. We are getting there slowly in production of the system that you can spend a few minutes inside and literally walk out without disease. We are just getting there slowly. This piece of information and the system that Klaus showed in Austria, we can fit any coil anywhere. If you have a cancer patient you put a coil with this material on it. If you have a different case you change it to what you need.

Thank you, we respect and thank you for your knowledge.

K: it's time to say goodbye...we had a good time and this was fantastic knowledge and we as humanity will benefit from it. Hopefully next Wednesday we will start agriculture.

R: this is the end of the 18th international knowledge seekers workshop.
