Video link: <https://www.youtube.com/watch?v=1T5JZudKjPI>

Note: The timings in the document below are from Livestream which are between 1 to 2 minutes different from those in the YouTube version in the link above.

Keshe (K): Good day, good morning, good evening. Exactly 8 years ago on this date, I was in Iran developing their space technology program. Two years later, in 2010 on the same date, I was captured by the Canadians on a flight between Belgium and Mexico. It is gone and bypassed, but the people involved in it are in America trying to become President. We set this aside and time will tell. The most important thing is the work of the foundation. We started teaching about the Magrav systems and we have collectively brought this technology to a point that we can all benefit by it. You are the Keshe Foundation supporters who brought the Magrav units and put 1 KW or 400 KW systems and you brought those systems into working conditions. We reported that you could do with a 15-Watt amp system. Now we have come to the new development. We are informing you to see what we see and what we have followed and come to understand. The Magrav system, if you bought it from the Keshe Foundation, you do the same as you would if you built your own.

K: You will see in the next 10 to 14 days we will get more results, answers and conditions that we will explain to you accordingly. What we see and what has developed is that Keshe Foundation people who purchased the systems should be receiving or will receive an email to change the load side of your system to a refrigerator. This means you do not have any additional load in the house just to keep your Magrav system going. From now on, when you receive the Magrav system that you have delivered or that you build, use the refrigeration system as the load to your Magrav. This seems to be creating a condition which means you don't need to add any additional loads. So, on this part of the system that you use already, you add your Magrav system into it and what you will see is the reduction in your power consumption much faster.

K: What we have seen is important, and the information has come out in different places, so we are putting it to you this way. What we are trying to explain is that the system by connecting the compressor system in the refrigerator or freezer, as the refrigerator compressor comes on, the

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

sequences of on and off and at the same time a very small amount of DC current is running through the system like the thermostat in the refrigerator. The system converts itself to a generator which means the Magrav system becomes a generator. We are trying to see if this phenomenon is correct; some people have achieved it. We have to test this as the information is coming out in the public and we want it to be correct (and ensure) that it is done correctly. What it does, we showed on a video of a unit in Rome. We have a number of these videos for the past 6 to 8 months and they are all connected to a refrigerator. It seems that the pulsation of the 50 to 60 hertz in conjunction with the DC power which is used for light or other electronics creates the right mixture to trigger the plasma unit into becoming a generator.

K: We are testing. The component seems to be correct and we will confirm this in the coming weeks, but it is safe to use the refrigerator as a system for the load. So, you don't need to add lights or anything additional which you don't need to create additional costs. We have emailed the thousands of people who bought the units. If you build your unit yourself, you will find out that when you connect your load, you put a multiple load and we are trying to test to see how many Kilowatts (KW) you can go. If you can, go 406(?) W after the load. What this means is that you have your power unit, you connect it to the grid and you have your load and you connect it to the refrigerator. (18.15 minutes). And then you have other sockets on the power strip you plug into. What we want to find out is what the KW capacity is of this which means that you can connect the system at the point of grid and connect the wiring of the house to a refrigerator or freezer in the house and run it as a load system directly.

K: We are looking for how many KW there are without creating any problems in the circuitry. And what we have seen after 3 to 6 months or so, the system converts itself to a generator by releasing the plasma in the sequence that is needed for running the house. If we are correct and what we have received confirms with the tests we are running in the background, confirmed is that by using a compressor system like a refrigerator or freezer with a small DC current that is running as a DC and AC operation, then the Magrav units become generators after the Magrav system. There are two points we want you to test and that we are testing: to what point does the Magrav unit become independent of the grid? We have seen this in two or three locations and we are trying to understand it further. What we see when we disconnect from the grid, the system becomes a generator on its own. (20.17 minutes).

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

K: The point in separating from the grid is that the Magrav unit still has to be connected to a ground. This has a comparison between the plasma and the matter state which produces a frequency of 50 hertz or 60 hertz depending on the environment you are in or 110 V or 220V. What it needs if it kicks into the generator mode is the comparison state. It is a comparison point for matter state which is earth to the plasma state which creates the frequency with the hertz you need for your electrical system or a DC constant without the change of the DC into AC to DC. We know the systems are multi-use, but now for the first time after running it for 6 months, we see that the systems become generators and in a way you don't need a power supply. We will check with the signal generator to see if it can be done. But we think it is the ground earth condition comparison and we have seen this before. We advise you, if you have been using extra load with your Magrav system to get the reduction in your electricity bill, take the light out, connect your refrigerator to it and leave it. The reduction shows to be much more than using the lights or anything else. The process is developing to a point that you have bought an AC and DC unit and then you have a generator.

K: This is the beauty of open source technology. We are developing it together and we see that the benefit is that we share it. So please from today, withdraw the lights. You don't need to run extra electricity to get the benefit of the unit. Connect to a power strip with multi-plugs to the refrigerator or a single use directly to the unit. We will be interested to see how many more units you can supply to the power cord. Please do not burn your system; it is your responsibility and not ours. Just connect it to the refrigerator or freezer if you bought the unit from us. If you built your unit at home, you can test it to see how much. At the moment we see we can run 400 to 600 Watts without pressure on the system.

K: We have seen just before I got here, people testing in our innovation center and putting the Magrav system and cascading with the refrigerator with another coil (23.21 minutes). And we created a plasma and even the light in the room came on which is a plasma light. We are trying to see further if you add a second Magrav unit in a cascade with the compressor if we create a plasmatic field in the environment that anything we choose as plasma can be used. We just did this in the past hour or two. As I have said, what we learn comes to the table immediately. Those of you who are developing it, we talked about cascading before and now this is cascading with a compressor of a refrigerator or freezer and if it creates without any shortage or anything else the system becomes a Magrav system and if you look at what we see at the moment, it is like your space reactor where two are locking to create fields. (24.20 minutes)

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

K: If you put three or four Magrav units in the house or a new combination, we can cover the whole house for whatever you use and whatever you need without any other wiring, if we are correct. If the knowledge transfer is correct, we are getting near to wireless power supply without any source. Maybe we are days or weeks away but if what we see is correct with the refrigerator compressor replacing the load, you see faster slowing down in your system. As we test, we will share the results with you. Please, if you have been using the Magrav system with a light or additional lights just to keep the Magrav unit going as you advised before, now there is a development and a new understanding and we are sharing knowledge openly and we share results with you as soon as we get them. It seems to be correct and we have seen this since last September but now we can confirm it 6 to 8 months later. We didn't see the totality at first, and now we see it. Please save yourself a lot of electricity usage on the grid by using your refrigerator as a load.

K: The important position with creating plasma is understanding that plasma will bring conditions and situations where every component of the plasma can be used. In the teaching of this morning it became apparent that a lot of people have not understood the work of the plasma, even the students of the knowledge seekers. With the plasma, you have the field which has both the gravitational and magnetical. (26.50 minutes). And what is interesting to understand is that each field strength has the behavior of the given material. But the order of magnitude counts. So you may have hydrogen and plutonium, maybe there is gold in between. The gaps are smaller in the order of magnitude, for example with plutonium and gold.

K: If you look at it from matter state, we open it up and if you go by strength here is your hydrogen (27.40 minutes). Here is your gold, and here is your plutonium because it is both gravitational and magnetical field strength. Then, when you come to the point of the strength attached to it, it is matter state solid, liquid or a gas depending on the environment and interaction. So, when you are in the plasma according to the environment you come from, you manifest yourself into what it is depending on the condition of the interaction of the magnetic gravitational field of the environment with the gravitational magnetical field of the element. Then, if the field drop is higher, you are in the free state of plasma movement like a gas and if you are in a harder condition, you come in the condition of liquid and gas.

K: So, now this is important because we are entering into the space technology with the gas plasma technology and this brings a new understanding and a new way to work. It's very hard

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

for those who are matter-state minded than the new plasma minded. The difference is huge. This is like playing with math and the math doesn't jive. So if $2 + 2$ gives you 4, then 2×20 gives you 40 and where 20 to the power of 2 gives you 400. The $2 + 2$ is the matter state. The 20 to the power of 2 is plasma technology. If you are mathematically minded, this is good. If you are not algebra minded, they say why is this here? We see this with the young people who don't see the difference with the algebra and they will take 20 to the power of 2 and write it as $2 \times 20 = 40$. Actually 20 to the power of 2 is 20×20 .

K: This is where I see some of you not understanding the position of the plasma where in this position where you have 20 to the power of 2 then one is magnetical and one is gravitational. With the common man, you always use twice the magnetical fields. This is where you will understand this comes into play. The faster we sort this out and understand it, the faster we can go into the state of understanding how to manipulate plasma and how we can expand the knowledge of the plasma and it can be used for different preparations of different types of uses. We are heading towards lift and motion and condition that you can create lift and motion in respect to anywhere and any structure in the universe.

K: Here on the plasma circle (shown at 32.22 minutes), if this is 2 to the power of 1, 2 to the power of 10 or 2 to the power of 1000 and this is 2 to the power, then this in the circular drawing (at 32.31 minutes) is 2 to the power of billions and billions. But because you understand the structure you know how to handle it. This part (shown at 32.40 minutes) has a collaborator which is the magnetical and gravitational.

K: This is the problem which we have to be able to understand to be able to enter into the space technology with a full understanding of how we can manipulate one to the other and how we can go from one thing to another. I was explaining this in a teaching this morning and we don't develop and show you new technologies. We show you the application and implications, use and understanding of the science of plasma. I keep repeating this week and next week and we do this until this clicks on for many of you. We started with matter and we created nano-materials. In creating nano-materials we created the GANS and from the GANS to the liquid of the GANS, or liquid plasma we started creating fields of plasma. Step further into the knowledge and now what you can do is you can bring different matters together. You can ring copper and Zinc. You created nano-material of the zinc. You created the GANS of the zinc. And then you did the liquid plasma of the zinc. Then you started mixing the two to get field plasma. (35.05 minutes). Now

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

you mix the water together to get field plasma of both A and B, (copper and zinc), in your new mixture.

K: But if you add and make a separate, let's call another, "C", and you make the nano-material of it, the GANS material of it and you make the same liquid plasma of it, and then it has field plasma. Now with this and you made one unit ABC. And then if you do "D" and create the nano, GANS, liquid plasma and then you have your field plasma. Now you mix C and D together or A and B together. Now you have the field plasma of C and D and you use this in one of your coils and you have A and B in another coil. Now you mix the two and you have your gravitational field plasma. You are still working with the fields but you created new fields with the plasma and that becomes the center of your gravitational system for any flight anywhere under given conditions. Here you bring in the amino acid and you bring the food of what you need to have. So when you make the GANS plasma, this creates the gravitational magnetic fields of everything the man needs in the field directly from his structure.

K: This is how you travel in space. This is what you call a language, the DNA and the RNA. (38.03 Minutes). If you master the understanding of the field strength and you understood the where we started from to the spiral of the GANS picture, you will be able to condition on the flight system on the whole structure with the food and guaranty of light with the standard amino acid of the man. In space, you will be able to convert anything which is below or in a position to change the structure of the life of the man in his intelligence and in his soul. This is important and part of the space technology. You have to experiment; we show you the way. On the other hand, if you extend the knowledge, you can understand as we explained in this teaching. Furthermore, what you need is the condition of how you can make the existence of the matter state the way you want it and where you want it.

K: If you want to create matter, you need a higher plasmatic field to interact with a lower magnetic field. (40 minutes). Then, in that interaction, you create the motion in the weaker because the energy of the conversion of the strength will become the motion for the weaker field and the field starts rotating and that (is) how you create motion in your reactors. Or you decide this is where I want a reactor the interaction of the higher field with the lower field or matter state field. For example, you create the rotation of the plasma of the weaker and this is how you start your motors or your reactors or cores without any fuel.

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

K: In so many ways, in space, the only choice you have is playing with the fields. As I said to some this morning, some of you will go into the matter state because you are happy to be on the aircraft. Some of you will develop where you are happy to travel with the fields the way the body of the man is without the matter state working through the GANS and some of you in time when you develop your knowledge and you would like to be part of the structure where you can create motion as a field with the strength of the motion of the man or as a field with the strength of the soul of the man. It all depends in how you mature in the science of the creation. There is room for everyone and nobody is wrong. Man has chosen the plasma field technology or matter field technology as we have seen it for past centuries—burning the fuel, using the donkey, flying with a jetliner or flying with propulsion or as we have seen in different shapes or forms.

K: In so many ways now, it is for you to understand where you want to go now that you have the full arsenal of understanding of how to make your GANS, how to make your plasma, how to make the liquid plasma, how to play with the fields and how to now extend the knowledge of the fields into combinations of fields and separate combination of the fields. In fact, if you will look at it in a deeper way, they might understand in so many ways in one plasma you carry everything you need. In one plasma you can go (spiral drawing now with A, B, C and D on it), and when you have this field of plasma in your space or in your core, you have and hold access to all four at the same time and it is you who decides the way you want it to be. In a way, if you have a hybrid car, you put a gas tank in the back of it and the fuel tank underneath it. In the plasma, everything is in the same fuel tank. This is very hard for a lot of people to understand because it is against the grain in the training of matter state.

K: This is where the suppression in the science of space and the spaceship comes. In the matter state, you work with a payload that is limited. In the plasma state, there is no payload and it is the field strength without limits on speed. You want to work with a donkey because you feel good with it? There is nothing wrong with that because you can still get from A to B. If you want to work with plasma with nano-material, GANS material, liquid plasma or the field plasma combination, you still get to your destination at the speed of what certain environments allow. You cannot cross the galaxies with a donkey. But you can cross countries and cities with plasma technology. Those who oppose the new knowledge of the stocks they hold and they are happy with donkeys, so there is nothing wrong with that to them.

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

K: If you understand the use of the plasma, you will understand how you can reach much easier and safer whatever you need. Start playing with the plasma fields. Start playing with combinations of plasma fields to bring you the confidence that what you do is correct. In so many ways start bringing these together in different ways (45.53 minutes). You can do them opposite each other, you can create different speeds through the motion of the fields of the plasma and then you will see what you can create—light, heat, new materials and conditions, new health units. Everything now on is dependent on you. Remember what we explained about the position and the angle and how the fields interact, how many fields you are allowed to interact. How do you allow fields and what strength to strength for them to react and what speed? In what position do you allow the interaction to take, at what speed and at what angle?

K: Everything from now on depends on your curiosity and on your sense of adventure to find out how, where and what is the outcome of new understanding. I tell you one thing. For sure man will be busy for billions of years because every single star we have seen and every planet we have seen is created out of one of these variations (47.23 minutes) and there are trillions of them. It is impossible if you understand the work of the plasma technology to find another planet like earth anywhere in this universe. It is an impossibility. On top of that it is impossible to find the human race as you find it on this planet, plus fish, donkeys, and the cats. The structure of the plasma in a given condition, position, strength and a point of time in the universe brought the fields together that there is such a condition as on earth. It is impossible to create such duplication. It's absolutely impossible if you understand the combination, position, strength, interaction, angles and everything else which has led to the creation of a specific planet like earth.

K: We have something yet that could be a condition that could be a tree somewhere such as we have on earth. You might see rivers of H₂O that behave totally differently, but no life. As it is impossible to create another you when you are 40, if they clone you, your clone is 40 years younger than you. So if you understand this, you understand that all of you can play with every aspect of the technology and play with the plasma to create a new condition to create new materials. Creating new materials will be the backbone of this technology for those who are very physical and they want to show something. Some of you will come up with a new plasma technology, I think, in about 6 to 10 weeks, when you feel more comfortable with the plasma, you will walk away from nanotechnology as a lot of you did with the GANS and the rest. It is the feeling of the comfort of using new technology.

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

K: This is where we are trying to push; there are no more systems to teach you. It is the application and the understanding of the implications of what you apply and what it brings you. Our Chinese friends are working and developing the oasis system which inevitably turns itself into a flight system. There is no choice. On the other hand, the development is how far we can extend the knowledge that it can bring benefits to mankind. Can we push the plasma of different strengths? You remember that we spoke on how you cut the plasma, how you separate the plasma and how you create a condition that the plasmas can keep a certain distance from each other, called the Magrav position. You have to go over all of this and if you understood all of it there should be no problem for a lot of you to create the spaceship as you want it according to your emotions, the strength of your emotions and the desire that you want to leave the planet. Do we escape or do we walk out or run out? Or do we get forced to escape?

K: It seems that mankind has chosen the last part that it is going to be forced and then he will run; at that time, you (will) have no choice. You have to accept what is in front of you and what you come across. When you plan the path, you dictate everything. When you escape and you run, you have no choice. This is what the teaching is about; we are trying to open the door of the man choosing the path rather than being forced out when nothing is under his control and his conditions. Because the minute you are free you change your habits back to what they were and the whole structure is to understand from the beginning the habits have been wrong. Any Questions?

R: We have a few questions in tech support of what the difference is in the internal construction of the current Magrav units which allows the units to go straight away into operation without the conditioning period?

K: There is not much; it is only the more understanding of the technology. This is the beauty of the open-source development; you go on the computer and find a program and add something to it and everyone can use it and they come back and find a new way to use it or they correct it. This is what we started on a very cautious level because at that time we could see how things were and we wanted the knowledge to get out very quickly. You have to understand that if we had not released the Magrav units the way we did last year, there were elements within the structure that would have literally hidden the technology.

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

K: I developed the technology years ago and then took it to the next step. Then there were several people. But you have to understand that our lines are continuously listened to and monitored by people who are not in favor of the freedom of the human race. We had two choices: to go out very rapidly and commercialize it so that people know it's out and they build the units themselves the way we did the blueprint. It is easy to go out and say do this and do that or to go very collectively and cautiously the way we did and the way we cautiously followed. We went step by step. In the structure, there are very few changes internally. We know there is a change and connection-wise there is a capacitor connection to make it safer and more powerful and there is internal GANS material that we use slightly differently, otherwise it is essentially the same entity and it has not changed. Now with more time, with the development, we explained the use with the refrigerator or freezer. A lot of people were using a 1KW load for 30 days and at a lot of costs and that is how we developed it.

K: Now we got to a point that we are creating a parameter of safety for the application and the use. And now we are at this point and we are looking at new types of energy supplies. What we have seen here and in the past few hours of testing and from other places in the past 3 months, a new structure of systems will come into power energy. In essence it's the same parts; it is the capacitor that has changed to make it safer and more powerful.

R: Can you give an example of the change? This is a big area where a lot of people have had problems including myself.

K: What do you mean? If you buy our units there are no problems with those capacitors.

R: No, this is for people who are building their own.

K: Ahh, so go back to the way it is done in the factory. It is exactly the way you do it. We use nano-coated center wire; we use the standard fireproof paper you have to use by law. We coat it with the GANS of what we produce to the level we need, and we add the coil on top of the center pin. It's as simple as that. The coil is nano-coated the same and we lock it into a bracket. If you open the original cores the coils were next to each other. The new system has a housing for the coils. Two sets of coils are housed in the bracket and kept. The connection has changed; where there used to be a twisted connection from the power point now it is going into a switch box...what they call a _____. (57.51 minutes) that is the simple way of making a capacitor. The only thing is, we dilute the GANS to a very, very high level and it is more like a water plasma GANS but it is still in and you have to let it totally dry. Some of the GANS coils made in the factory are those made a month or two earlier to make sure that the nano-coating on them is dry. We add in the GANS a very small amount of caustic and we add very small amounts of

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

sugar. Sugar is most CH (?) bonds that creates energy for production and the caustic is in the moisture as the capacitors always are. Within the frame of the box, if there is a scratch or damage within the time if there is moisture, the caustic will create the nano-coating so the system itself heals in a way.

K: Any other questions? Thank you for your work in the background.

Rich (R): There was a question on how the housing for the Magrav was nano-coated; I think you just answered that. The caustic would tend to nano-coating the housing of the Magrav itself?

K: no, the housing is pre-built and it is put together on the assembly line.

R: Wouldn't it nano-coat itself on the assembly or is that important?

K: We looked at nano-coating the boxes but we do not understand the cycle of life so we decided not to. These are all chemical products and would the caustic affect it?

R: Other questions from people: do you think this means we could use only liquid plasma for the health units?

K: In some cases yes, but not in all cases. As I said in the teaching this morning, a number of you realized a long time ago to use the liquid bath. Some people have started using it. People used it a long time ago with different processes. Now we are getting the health results back on this. A lot of people use the GANS of water of the CO₂ for the eye, skin and digestion which we will launch hopefully in the next weeks. They have been manufactured and we are waiting for the licenses so we can use the products. You should be able to receive your emails this week or next. Fill out your application forms and return them. In that process we use the water of the GANS. If you use the water of the GANS in the bath as we said many times before and then line it, you will see the interaction just the same as going into the machine with all the parts.

K: Now you decide what is in the bath, what is in the water, what is in the texture that you want in the water and for what purpose? Use these GANS waters with the right combinations for skin diseases, psoriasis, and cancer. There is no limit to helping yourself. There is no law in any country in the world that says you cannot do this. The knowledge is there so use it, test it and share it. The GANS water we use in the environment of the body and we have seen it working like a disinfectant and it gets rid of germs on the body. We have seen it used on rashes and fungi

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

on the body and the fungus literally disappears with 2 or 3 times usage. If you are hungry, we will put the patch on the stomach and see what you have absorbed. A lot of people do that when they are feeding themselves. Other people are mixing the liquid plasma in the way of creating a room where whatever you need to emotionally get the strength.

K: Very soon, all the churches will be full of these things because now you can literally increase the emotion and soul of the man and when he comes to church he makes that the job of God. If the religious people were very clever they would spray the whole of the churches, the mosques and the temples with the GANS of CO₂ and zinc oxide. When the people come in they get elevated and they say it is a miracle of God. It's the GANS technology. Then you increase the emotion and the power. If you create a wall of fields on either side, so one side is very powerful and one side is very weak, in transferring energy you create motion. I have done this many, many times and I ask myself when will these millions of people understand this?

K: You are looking for physical motion. I was pushing the innovation center to do this, but they don't see it. I always wait for a time when they see. (105.44 minutes). You create CH₃; you create gold, zinc or whatever in GANS mixture. Put CO₂ GANS liquid with a piece of metal and you will see how this will start rotating as the field of the higher (CO₂) is trying to reach across to the field of the lower (CH₃) and the pressure on the middle with the gold, zinc or whatever, creates the rotation. This is how planetary rotation started.

K: None of you has started playing. The pleasure of the plasma technology starts when you get rid of the straight jackets of 'only this, or only that' and start playing with it. I have tried to encourage you but somehow the fear of not understanding is the problem. We have seen a few adventurous women try and they are the only things people will see. Men will not show what they are doing because they could be embarrassed because there might be something wrong with it. We will see the report on Thursday by a man who made a GANS from sea water and it will be most interesting. I hope he will be present on Thursday for helping his wife with lung cancer. Part of the structure is for helping his wife with lung cancer. He will explain to you. He is a doctor.

K: On the other hand, we hear from others who are trying to create motion and they don't understand the strength in gradient change has not clicked with many of you. (1.07.48 minutes). I

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

use Marco with one of the knowledge seekers' boards. Gradient: use and understand that (when) the higher magnetic gravitational field wants to interact with the lower, you create the condition of interaction. It has to give release and then you have the motion. None of you have used this. When you see it, immediately you think it has to do with something else. You are afraid to be called a fool because you are clever and to you they look like fools so you prefer yourself not to be a fool like the others. You are ashamed to show what you have achieved. A few people do; we have seen beautiful teaching from last week with Paul from Togo. Next Tuesday we will see teaching from Italy. Understanding the work of Togo, understanding the work of what came out from Nigeria and from Ghana and next Tuesday one of our knowledge seekers will show you the effect.

K: In Europe we are used to garlic. This man has seen the work that Paul has done and now we see that he has new knowledge and hopefully he will show what he has done next Tuesday. Then you understand the strength of the gravitational field of the plasma of garlic fits perfectly with the northern hemisphere work. That is why the French love it because of the minerals and an Italian Knowledge Seeker who is a garlic lover and he will show us what he has developed. On Thursday we will see what the man did for the love of his wife and he monitored it for weeks and he will tell you what he has seen. So we see someone developed the garlic knowledge from adventure, and the other developed GANS water for knowledge for the love of his wife. Both are respected; this is how we share knowledge. After you see this Thursday morning you will see everyone line up, the children, everyone. Go to the pool; go to the bath with cancer. Do we open public baths for cancer now that we know this works? Try to be adventurous and bring knowledge; none of you is wrong. You bring beauty to the table of the knowledge of the man.

K: Our biggest problem in the coming time is how are we going to catalogue and categorize all this knowledge? Everyone one of you is bringing knowledge. When we have categorized it, how are we going to bring it in the plasma technology field so everyone can understand?

T from Norway: Could I ask a question?

K: Are you still carrying on with your systems?

T: Yes, I am building every day now.

K: Have you found yourself a doctor yet?

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

T: Yes, many doctors.

K: So you are working with the doctors?

T: Yes.

T: The psychiatrists say no.

K: The knowledge of those building systems and the science of the doctors and the others will be a perfect match.

T: So far it is working very well. What I am doing has little to do with health. I was speaking to an engineer 2 weeks ago and he said he was into climatic systems.

K: I don't understand.

T: Climates. I had an idea to install in the cooling system for all the climate system especially for children's schools an inoculation system with a mixture of copper oxide and zinc oxide to clean the filters and the air in the schools.

K: Yes.

T: In the cooling systems for the motors that are often misused in Norway, we systematically have the same problems not understanding the difference between summer and winter when ventilation systems are working 3 times as much as they actually need to. I spoke to this engineer's daughter. He had never heard about GANS before so we were talking about installing a GANS system in the machines so we can clean the filters as much as the environment. So I wanted to ask you if you think that is possible.

K: In what way?

T: What I have in mind is a mixture of GANS and transform it to liquid GANS to vaporizing system. And then through the climatic ventilation systems.

K: Why not?

T: It's a big problem in schools and fabrics in Norway; the Ph in the air is very bad.

K: But the filters, they do all sorts of things with them. They filter the air nowadays.

T: Yes, and many have told me that the filter is very bad. It's actually slightly above acceptable Ph level. So it is a new area.

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

John (J): Could I give you an idea?

T: Yes.

J: What you can do is put a pan with a small thermostat and the liquid GANS in the conduits which take the air, the viscous air before the filters. You can humidify the filters and clean the filters and this is about the same effect I have had at home. I use a facial humidifier and I have managed to make my teeth grow.

K: Pardon?

J: I have managed to make my worn teeth grow. Have you understood this Mr. Keshe?

K: Tell us how you have done this.

J: The white enamel is growing over the center of the teeth which is a brown color and they have grown over a millimeter already.

T: The enamel?

J: Yes, the white enamel has grown over the brown nucleus of the teeth.

K: How have you done this?

J: The only difference I have found is that I have been breathing the GANS vapor.

K: And you deliver it through a humidifier?

J: Exactly. I have the facial humidifier that the women use for their faces. And I put the water GANS there and breathe it through my mouth and my nose. I noticed two weeks ago it has made my teeth grow. I also 3 nights ago I had another effect. I suddenly got a hole in my tongue, a dark thing about the size of a grape pit came out and it could mean the start of a cancer I had in the tongue. It came out and closed itself and that was it. This came out in a couple of hours.

K: Can you make a power point for this so we can see it?

J: I will try; I would have to get hold of a camera. I'll see what I can do. I have never done a PowerPoint, but I'll get someone to help me out. I have two teeth that are broken down to the root. As far as I can see they are also growing. But I haven't managed to see this yet. Today or tomorrow I will go to see a dentist friend of mine to see this. They will fall on their backs when they see this.

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

K: So we can see all the work in one go.

J: I will try to make a PowerPoint so you can see this.

K: Thank you.

R: You mentioned ending about this time.

K: The teachings Tuesday at 3.20 has been delayed by the people who were supposed to be here for 4 weeks. So in 4 weeks' time we will start to finish at 3:30. We can carry on today.

Q: Can I experiment with liquid plasma in 24% lead crystal glass or will the lead be transmitted also?

K: Who is speaking?

M: This is Mark from Alexandria, Virginia outside of Washington, DC. I have some different size lead crystal containers that I am afraid I cannot use. Wouldn't the lead come into the liquid plasma if I use those containers?

K: Yes.

M: Will that lead harm a person?

K: Not really because it is a filter for a field plasma. When you use a container, the container becomes a filter for the other strengths. When you use the GANS of it, then it is an emitter. In the matter state, it is the filter for other strengths. When you use it as a GANS, then it is not bound to anything and it is free and it radiates. But that doesn't happen in the matter state.

M: Wonderful. I won't use lead GANS.

K: The thing is, you have to understand the extent of it and how we can apply and implement it.

M: Yes, I have 3 levels of containers to experiment with.

K: It will be very interesting. A lot of people are testing different things and I see with the Chinese they are trying to develop the flow of plasma condition for the oasis and we will see what they do when they are and show their work. The Keshe Foundation teachings with China will go to normal teaching on Tuesday afternoons in the coming time. Anything else? Is there anyone who wants to present anything?

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

J: This is John again. The same effect could be had with the chlorine in the PVC in the plastic?

K: Yes. A lot of people don't know this. Do you want to explain it? People are aware of this in Canada, but a lot of people in the rest of the world are not aware of this. Do you in the summer season in the northern hemisphere carry plastic water bottles in the back of your cars? The Canadian research shows in some way that water that is kept in these bottles and then drunk creates certain effects that are not good for the human body. So, if you carry bottles of water (plastic), some are said to have fluoride in the water that interacts with the plastic. This is not from us but is published in the literature. They have the effect of the hormones and they can affect the sperm counts of the man in different ways according to the Canadian research.

J: I can imagine—you have the chlorine and the fluoride in the plastic. In the case of cola, when you drink it out of glass it tastes different than when you drink it out of plastic. When you drink it out of plastic you can taste the chlorine.

K: Canadians are very pushy with this in trying to understand it.

J: The US had this problem with the soldiers in Iraq. There in the desert the heat produced the problem in the water containers. The US had a big problem with the soldiers who came back from Iraq and they traced it to the water they drank. They were taking the water from the US in plastic containers and in the desert the plastic 'cooked' the plastic and this released fluoride and chloride into the water. That was what was making them sick.

K: Thank you, any other questions?

R: A question from Nick M. who says he used the plasma water in a battery set up with nano-coated aluminum at the wall of the glass container filled with CH₃ water and in the center there is a nano-coated copper coil. The results were 0.7 volt constant. So the water seems to have the same effects as the GANS itself. What do you think about that? Is that an easier way to get the Magrav set up for the space ship formation?

K: In a way, yes. I think if you ask Bernie he can tell you more about it. Bernie, are you there?

Bernie (B): Yes, I am here. You have CH₃ water in the center with nano-coated copper coil?

K: The GANS water with the coil.

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

B: I have seen a similar set up also. This liquid plasma water can be used as a power supply. We are using the similar set up with the liquid plasma for the inside of these nano-coated copper coils. (For) the CH₃, I would suggest and use the single coil inside the container of the liquid and that coil should be clockwise.

K: You on your anti-clockwise are a headache. Why clockwise and counterclockwise?

B: If we use the single coil only we have to follow the clockwise or counterclockwise winding. For the CH₃ is more magnetical; to interact with the coil you have to have 6 to 3 is more magnetical and for it to collect the material which is the coil it has to be in gravitational formation. Then it connects and your 6/3, if your coil is extended by a wire, you can use this with any destination that is more gravitational when you use CH₃ GANS water in the container with the coil in the middle. If you use a double coil, it is a different story because the double coil will be a Magrav. The double coil will become a Magrav especially when you connect the other end. This CH₃ application is more magnetical and for it to communicate with the coil, you have to have magnetical and gravitational, then you can use the coil if you extend the coil outside. This becomes an energy source. This makes it as Magrav. The liquid CH₃ is your more magnetical instrument while the coil can go to the gravitational. This is CH₃ GANS instead of CH₃(?). Then the coil inside should be counterclockwise so this can go to a magnetical destination or a battery or something like that.

K: Thank you very much, Bernie. Any other questions?

R: Here is another question. It was regarding heat pumps and I think air conditioners. You were mentioning about plugging the refrigerator into the Magrav units and how that switching and pulsating circuit helps with the Magrav conditioning. What about units such as heat pumps and perhaps air conditioners that have compressor units in them?

K: Why not? Try and let us know. They have good results with what they call 'chillers' in the Middle East.

R: That is a different kind of air conditioning with water pumps over a screen ('swamp coolers' is what they are called in the southwest in US).

K: let us know; we have opened a new with a new thing.

R: It seems like that system would be perfect for pumping GANS water through it as a means of cooling.

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

K: That's possible. We open the technologies. Try them and if it works, come back and share. I never thought about that so try it.

Q: Wouldn't the heating element be considered the resistor load and wouldn't that be used as a load on the Magrav unit?

K: Yes, that is part of it. That is why the refrigeration works as well because the gas inside the system partially works in cooling and heating. But you look for the matter state.

K: I said we would start teaching a different way on Tuesday afternoons. We are expanding the knowledge in a different way as we are part of the space technology and part of the space ship program. As we said, we have to understand the totality and then what we understand in totality in respect to what we are, who we are and the environment you live in would allow us to think. Then you will see what we call the bigger dimension of existence. Ask yourself a simple question: you are born in the womb of the mother in a different part of the world from different cultures, races and different backgrounds. (1.35.58 minutes) We come and we speak the language of what we are spoken to at a certain point in our life: Chinese, French, English or whatever.

K: But what is important is that from the point in the womb to the point of birth, what language or what field strength of the plasma do we all think and work with? Then, we translate it to our own understanding and I call it water, aqua, whatever name you put to it according to the language we were taught to understand. We understand that noise means 'this thing' and this noise means 'that thing'. So in fact, in our brain, in the plasmatic field strength in the body of the man, the common sense, the common whatever we have, is all the same. It is we who change that into the dictionary of our voices. What is called pain and what is called joy? What is laughter, what is fear?

K: So we all have the same common denominator feeding which is whatever is part of the emotion which is part of our interaction with our environment and we all feel the same. We all feel cold, so cold is a common denominator in all of us. But now I throw in something very, very different. (1.38.25 minutes). Strangely enough the cat and donkey have the same emotion. They feel pain, cold and they know what makes them happy and they know pain and everything else. We have in us a common denominator field strength... animals and humans. But, let us extend this. (1.43.43 minutes). The man from Mars and the man from planet Zeus all have feeling and

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

the same emotion. They interact and they know what is good, what is bad and what makes them happy and what they need for food. So now you see the common denominator runs along the universe.

K: If our emotion is the source of our soul, is our emotion and is the point of the essence of the creation of our soul where we came from the matter state into the field state into the emotion of the soul, then one thing we have to consider. Are we, when we join the universal community part of the same creation and no different—black, white, cat, dog, man from Mars, man from another place in the universe? The entity of concern creates the condition of its existence. This is where we have to come out of the prejudice of being human or thinking we are better or worse than the others. This will bite man heavily in space. Man will have a lot of problems because he has not managed to sort this out in his own village of the earth where if this applies to us, and applies the same to people we know and we call them whatever. So does it apply to the universal community? If you understand this, you will understand why you cannot up to this moment fly. And you will understand why the work of the spaceship program for you and for humanity has not been fruitful.

K: Don't forget we talked in the past in the teachings how you fear because of the magnetical gravitational connection of your child across the planet, or your dog when you are somewhere else and you know the child or the dog is in pain or is in need. Because in interaction, you are connected by the fields and you know what is good and not good for it and what is good for you and not for them. And then the big question comes: has man gone the wrong way that essence of the soul of the creation of the universe has kept man away until this matter of eating other animals is sorted out? Because if you eat them in space, we are then food for you.

K: I wonder how delicious it is and it goes back to one of the old movies where a little boy in a tree is asking the girl *you look chocolately; can I lick you to see how you taste? Do you taste like chocolate? Would you like to taste the man of Mars or the moon or become part of the food for the man if we do not go down the path that we are teaching with the transfer of energy and plasmatic technology?* Do we become part of the soul of the universe as we are kept apart from becoming one because of our energy transfer habits of packages that ought not to be? This is one of the main problems that has not been solved with humanity in space. This is part of the teaching which is not just making units to fly you; units to give you health, to give you water, to have free electricity. There is a unit for the conduct of the man in respect to the universal

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

community that other entities do not become the food package (for the man from earth). Because it can be absorbed easier and then we have a taste for it—have you had a chicken leg or a frog leg? Or, have you (had a) leg from the man from Mars or the animal on so and so planet that is very delicious?

K: This is where the wall of interaction has been set for mankind. I have talked about this a few times on the surface and at this moment it cannot be blocked and it cannot be stopped. Because as part of the ethos of creation and joining the universal community, man has to understand its position that he does not find another excuse: *I was going to be eaten, so I ate; I was going to be killed so I killed*. So, we have two choices. Now that you have the creation and the use of zinc in interacting with the emotion and elevating the emotion of man for psychological and other positions of the emotion, do we or are we obliged to develop a technology where the man has been given or has to be given an antidote for animals, entities, or packages of energy? There are a number of choices: do we increase or elevate the emotion of the man directly or do we bring to the level that the man absorbs energy without knowing that it never feels hungry and at the same time the increase in the level of the vibration of the man reduces by not absorbing large and different energy from position to another? 1.48.52

K: As I explained many times—we see the Indians and the Pakistanis. The Indians are still aggressive but they are calm in their behavior and approach. We see people from Pakistan heavily connected to eating meat and a large consumption of high energy packs. And the behavior, the shape and the features change. The same with the others. Change the path of belief and the eating habits and we see how the energy changes. Now it is our job to take man to that level to understand and it cannot be done until man matures to this point. We started a few trials with Jacky and the others. And we stopped or let it go as it was. You are not mature enough to understand what is to come. Maybe a few weeks or months later it is time for you to look at it. You have no choice because in the space of the universe you will gain the knowledge to travel and you will not be allowed to travel and you will not be allowed to interact with the universal community until the point that you understand this is no go (the consumption of animals). Because trying to satisfy the needs of the energy packets of man is the cause of the wars and conflicts.

K: So we have two choices: What materials do we need to use in the GANS of the energy of the man, not only to satisfy his emotion? We hear doctors and they say that they give the patients

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

GANS of zinc and CO₂ and they change totally and they become happy people. But it doesn't stop their aggression to eat another packet of energy of life (animal). Now the Holy Grail for plasma technology for you who are concerned for man to become peaceful is to find the matter or condition which of the two which allows man to become a man of peace and no aggression and no consumption of the packages of life in the universe. Whatever you have done up till now you will be traveling in space on your own. You made zinc to bring satisfaction of the emotion and now you as plasma scientists look for what you collectively agree and it can bring man into the universal community.

K: Or I said in a talk, would you like to eat your sister? Would you like to eat your mother? Or would you if it was put in front of you, eat your own child? Because it is again packets of magnetic fields. What brings us the presentment that we do not cross the line and we have to find in the energy structure of the brain of the man for it to become part of the ingrained habit in space? You will find that it was beyond the understanding in doing it and now you have to find the same solution as to what is the strength of the revolt in the brain of the man which does not do such a thing. We know zinc is the connection but where is the revolt that the man can be subjected to it that he will not cross the line. Do we close the mouth of the man that there will be no food digestion or do we close the level of understanding of jealousy that creates the position that is the cause of the wars in order to possess? He has the strength and he is created of the field plasma. He has created and he has his and some of you have to make your work to find out what the condition is the way you put people in the water for the cancer. Show us the GANS that man forgets aggression and with it we can make the field plasma of it that allows man to enter the universal community.

1.55.13

K: Until this is done, all you have done is in vain. It's back to the churches, back to the mosques, back to the statutes and worship the false gods which you have done for all the centuries. The name of God as used in the church, the mosques and the temples have been used to kill and that was not the purpose of religion. So, as we talk about making systems for flight, we need fuels to do this and that, and we need the fuel for peace within the structure of the plasma technology which you have been brought up in the past few and until this is sorted out as the parents say *you are grounded*. And you are really grounded. The human race is tied to the found(?) of the earth. Volcanoes – you have to stand it; earthquakes- you have to shake with them; and when there is thunder and lightning and a meteorite you die with it because you have not learned why you are conditioned to this position. You have conditioned yourself as a race.

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

You have not been put unless somebody says there is a very good rare estate with more diamonds and gold in space than this planet can provide.

K: Earth is a speck of dust in the middle of nothing in the universe. But it has life and it has managed to create a life cycle and that is precious. So what is your job and what is expected of the man to complete the cycle and the communication with the universe? It is for you to find the matter which really matters. This is the matter which makes man peaceful and within the energy of the cycle of life to be able to understand how to absorb or to reject the energies it does not need. If I close your mouth so you do not eat but you learn, then because of the pressure that you want to stay alive and you are conditioned to absorb energy, then you have nothing to give out either because you haven't consumed.

K: We have seen with the doctors who teach us how now we understand that we can create muscles and tissues and use GANS to generate tissues. But if you produce and generate tissue and create a condition to close the mouth of the man where we can find a place that a man can absorb energy for his existence that allows his emotion to exist and his soul to be part of the universal community and for it to understand the languages of all the other creatures without the sound of the spoken word. Then we feel the dog, the cat, our children, the men of space and do we need a universal language? The universal language is needed when the men of space have not matured to walk to the next level.

K: Maybe man has to go through that process and it's a long-term process, but if you do that, you will not elevate to the next level. Why don't we do that from the beginning? It has worked for many, many races so why not the man? As they say, you can take the horse to water but you cannot make it drink. I can teach you as I have done and carry on doing that you know every way to make everything, but the only thing you have not resolved and until the time it is resolved you will not be able to connect the side of the emotion that creates the lift for you to be the man of space. It is interconnected and it is part of the gravitational field that you have not understood. If you want to understand better, you don't run if there is no emotion of the fear behind you. You will not run if you don't run to the one you love.

K: This is the process that we have to ignite in man; which way does he want to run: out of the fear, out of the love? Then we see that emotion has created the physicality of the motion. Then

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

the answer sits with the human race and there is a part of the equation and part of the total fuel of the universal motion is missing in all the physicalities which you have been trying to produce and that is why you cannot because part of the fuel is not there. You only consider the lift and motion in respect to the earth's magnetic gravitational field but what about the soul of the planet? You have done something wrong and where do you go when you don't pay your debts? Or you learn that you become part of it. Until man does not find this level of strength with the materials, GANS, plasmas or whatever you like. To fuel his spaceship, to fuel his tanks, man is grounded.

K: You do not have the right mixture and when the wrong fuel or part of the fuel was in the tank. This is the part that has to be resolved. You must see resolved in the coming months due to the disasters which are pending on this planet and where the man is pushing. This is the false peace, the false acceptance because the human race will kick in once the soul of one man reaches the rest will follow. Answer a question to yourself: has all you have done up to now been in vain if you have not understood for one second that you have everything but you haven't solved this problem. In fact, the cat, the dog, the man in space speaks the same language and has the same emotion and understands the same. So we come to one point: it is for you to find the place of development of the emotion and the soul of the man and it is for you to understand the tools that deliver this and makes the man independent of the creatures in his environment.

K: You do not consume the animals, you do not consume the plants, you do not eat the fish, you do not eat the cow, the beef, the dog, and the man in space, the dog of the man in space and you might call it something else, but it tastes like the chicken back home. You don't even remember what the chicken tastes like. Our job, your job, I can guide you through it and tell you in one second what needs to be done. It is a tool and you have to find it to the satisfaction that you are ready to detach yourself from the other side and then create that condition. Ali failed; he started but he dropped off. Jacky started it and he is on the path and doesn't know where to go. But, collectively you looked at the side effects and you never looked at the tools. Until you do not find, and you have the heart and it creates the blood and you have this and it creates the liver, and this is what it needs, now you have to find the point and the place of the emotion of the man that two things have to go away from it. One is jealousy and one is eating another.

K: Then the man shall be delivered into the universal community and as you mature one by one you will enter. It will not happen to the whole human race in one go. There is one thing for sure, those called the men of God, the priests and mullahs and whatever, I'm sorry the doors are

Transcript from 19th International Knowledge Seekers Workshop held June 14, 2016

(v1 2016-06-19) DRAFT (Transcription has not been verified. Double check info with video)

closed for you whether you are the Pope, the Ayatollah, the mullah, the rabbi, and the rest. Because you are aware of misguidance and you encourage misguidance and will carry on the same in different frocks and different words.

K: Now, it is for you to find and here we know it is zinc that will bring the emotion into balance. Why zinc? Go back into the teaching—copper, oxygen, nitrogen and the rest. And you have a giver (zinc) to bring them into balance with themselves. (2.07.11 minutes) And now you have to find the giver and in that process whatever it is; it becomes balanced with itself and the totality of the man. It has a position within the structure of the man and strength within the body of the man and it can be fed to satisfy and if you find it, now it is without consuming the energy of another being. You consume what is available in the field of the universe which belongs to no one and is available to totality. You leave the goat, the sheep, the cow, the donkey in the same field and they all eat the same grass but each one eats a slightly different part of the grass that suits him. And it gives the others the chance to eat and they survive too.

K: Man has not even matured to the levels of the animals yet. So the process, one of the stumbling blocks is this. The other stumbling block for man is for all men to become equal and there is no kingship. Because then you will find out as you that as you are equal in emotion and giving, you will find balance and peace because we are here to serve as the servants of each other and to be in the condition that is correct. Your biggest question mark in the coming time is this: are you going to become man of space one by one, or in groups? Or will you do this in masses and take into space very much the way we live in Ireland because we found it was nice and bit by bit we told the others to come because of the conditions here? Do we need to create an environment of forcing and then changing or do we come to understand the source and the reason and we don't?

K: Nobody has managed for hundreds or thousands of years that we forced the Indians and the Australians to eat meat. So we never force man to do what he does like because he understands and respect. But the strange thing is why do they only respect the animals and not the other animals which are what we call vegetation? So, do we decide the Martians are tasty but the ones from planet Zeus are too bitter, and that is why we don't eat them or is it the fear of them that they can harm us because they are stronger than us? When you have no fear and you are equal as it is in the universal community, you have no problem. The crown of kingship of man has to stay on the planet of man and not go into space. There shall be no kings or rulers in space because all

are equal as we have seen. The kings on this planet get cancer and die the same as do the lay men on the street so he is no higher.

K: If he runs by the fear and the rule, he has already reached a level where he does not deserve to be in the universal community. Until we don't sort this out my friends, you are grounded. You ground to the planet earth for the greed of its physicality. So, I have shown you the way with one and with the other. Now it is for you to find the key to the totality that opens both. I have shown you how to reach the soul of the man and how to elevate the emotion of the man and I have shown you how to repair the physical body of the man. And you know when the physicality is in balance, the emotion is in balance and the soul finds its balance with which he enters into the universal community. So, it is your job because (if) I teach in a way that you can 'copycat', you will never understand. This is in your turf and your condition. Those who understand it, enter into the kingdom of God. And those who fail, you are shackled to the earthquakes and the volcanic eruptions and the rest of it which is deserved by those who have caused so much pain and havoc.

K: In the coming time, as I was teaching today, we will see the demise of a nation. The USA in the coming time will not be in the shape that has caused so much mayhem and the citizens have to pay for what they have paid to be done to the others and because of the universe balance that condition is created. But how far are we? Are we there to support depends on how fast the men of this country will mature? Will they run out of fear or will they run to the love of the creation? Now it is for you to understand to find the material or the condition that has created this in the brain and emotion of the man that it has (to) be brought into balance. The way you have managed to tame cancer, we will hear very soon and to tame the physical materials that you do not need fuel, now you have to tame the man, the soul of the man.

K: As I have said, matter, the emotion and the soul all have strength and to be able to be part of the universal community you have to reach the totality. The soul was created from the interaction of the fields of the matter of this planet. The soul is connected to the elements of this planet, too. The doors are shut, locked totally because if it is not changed here it will not change in space. Those kings will rape the children who are supposed to be the heads of the nation. The father destroying his own child cannot be done in space. Because they think it is their right.

K: You have to understand that accidents will happen in ending a life. But killing cannot happen by the determination of one and this includes the killing of a man, a cat, a dog, and other creatures of the universe. Now, you understand that the golden key is on the table. So many times in my teachings I have explained and given you the golden, diamond-laden 'Rolls Royce.' And you are waiting for the ignition key. This is the ignition key; if the man resolves this, you have the key to the universe. Otherwise, it is the empty space of the universe that you gaze into every night and day and you never understood and your forefathers never understood and your children will never understand.

K: Now you have been asking for the key and it is on the table and it is up to you to find the key that fits that allows you into the car and into the space ship and allows you to enter the universal community. In all my teachings over the years, I always put this on the table and none of you understood. In the writing of Mohammed, bless his name, I have said many times he said of the hundred names for God, 99 are written and the 1 shall be understood when you read the Koran from the beginning to the end. But the key was sitting before in the writing of Moses and Christ: *Thou shalt not kill*. God is not a murderer. You have the car and now you have the key. But each key opens and works with one given car and you have to choose.

K: As I said, very shortly my teachings shall stop. As I have taught, I only guide. But now you have to sort this out if you want be the passengers of the universe. Until then you will not do and you forget one piece of the teaching which I showed you today at the beginning today. And that is in the plasma of the universe, there is a state of the soul of the man which is the key to the opening of the universe. You have to understand it to be able to get it and to be able to be part of the passengers of the universe. If you don't understand this and you cannot find this, your doomsday is in your hand because you have not understood the totality of the structure. This is very important and you will find out why you have been sitting for thousands of years for somebody to come to show you. Because the key is in your hand. This is part of the key (2.20.25 minutes) and this is what is missing because your fuel is not complete and without it you cannot find position.

K: You have to change the behavior but understand what creates the behavior. You have to change to understand where the position is for this behavior. What adds to that creates this behavior and what do you need to take away that takes this behavior away from the man and the totality? Now that we have come to understanding man has to resolve all three together:

1. the destruction of another life
2. the envy to own what is not his and he wants it by shortcuts, and

the kingship.

This means that you are equal to every being on this planet and even if you don't understand it you are equal to every entity in the universe, so there shall be no kings. And this is where we see all the opposition to the Keshe Foundation work. It is those who want to be the king and the kingmakers as they like to be.

K: It is the writing of Mohammed, bless his name, and he says *the time will come that no man will take the crown of kingship* which means exactly what I have put on the table. When there is no crown of kingship, the man reaches the point of maturity that he is equal and not that it is too hard to be a leader. Because when you are equal, you accommodate and you don't lead. So, now you have the key, the golden key for man to enter the universal community and the kingdom of God, so you decide. Find the tools, the means, the essence and the way you used it to create the reactors and all the fancy things that you liked, and you will find at that point, the peace of mind. That is the key that you have not understood up till now. It is the peace that is accepting the totality to be equal. Then you become blind to color, to race and to animal position in the universe.

K: There shall be no exit till you have the right fuel because you are attached to the physicality of this planet so how can you let go when you have an anchor tied to the ground? You have not seen a ship sailing on the oceans if nobody has taken the rope at the port that is tied to the port. It is not that the key is missing, is it that you are tied to it and we are the cause of the problem. So, now you have the golden key and let's see how many of you in the coming time manage to drive the car that is in your hands. If you don't understand this, see this, and comprehend what it means and how you can become passengers of the most beautiful part of the universal community which is peaceful and is unified and there is no division to be the king and no division to own something and eat something or have something of someone else's.

K: In so many ways, my job as the universal messenger is more or less complete and if need be, we let you destroy yourself on this planet as we let you do it many times. A few men have made it into space and are a part of the universal community because they understood. But now you have no time; you will do it out of fear or you will do it out of pleasure of being part of

something bigger. Would you like to live in the village? You are welcome. If you would like to join the beauty in the universal community, you are welcome too and the choice is yours. You decide; you have the car and you have the key. The car, the craft, the food is the physical part. This is the emotional part and together when your physical body and emotion are working together you are the soul of the man of the universe. So, as the old say: *the choice is yours*. It has to be handled one by one, each individual. Those who mature will find through it the key and the craft of the universal community.

Q: Is there a blue print somewhere for me to build a feeding unit?

K: You go back onto eating. Is the word sharing? And what I don't need, I share with you with what you need and you share with me what I need. In the writing of Christ, bless his name, *this is my body, this is my blood*. He shares it and this is the essence of creation. Do you want to eat? It's the wrong ballgame. The process, thinking and structure have to be in the way that man can survive without consuming. Now you have the keys and let's see how fast you run. You have to build this in reality in the fields of your cores because that is the part of the fuel. If you don't find this fuel, you are grounded because the power to take off is not there even if the engine is running. It is a very big question for the man who has been killing for millions of years and for those men who call themselves kings and abuse the position. And it is a big problem for those who are jealous to possess.

K: Thank you very much for today; we call it a day. Maybe the man will choose in time. We will see you in the doctor's teaching tomorrow. The agricultural teaching starts next week according to Dr. Ghatta. If you are interested in attending the Africa conference, once everything is agreed with the Ghanaian government and the Keshe Foundation Ghana and otherwise we will be on the Thursday public teaching.
