Keshe (K): As part of our work, we are still showing the understanding of the total work of the plasma. I was explaining in other recent teachings, we have sped up the teachings and the confirmations of the technology. You are delivering a new technology. People want instantaneous response; there is a need for how we can confirm each other's work with the International Keshe Foundation members and students. They (those who don't want the Keshe technological information spread) use 'us', to attack 'us'. We wait until you confirm and you deny each other's work. That makes it easier for those who don't want the technology information to spread. For this reason, we have taken the initiative ourselves from the top to go through everything individually and single-handedly where we had left it before for others to do and show things.

K: One of these things is in totality if you put the whole structure of the energy, medical, agricultural, health and everything else, all together that is no 5% of the total knowledge needed for space technology. But we have to keep you as the audience busy to find out different parts and find out what each of you are interested and what parts of the technology you would like to learn. We take the leadership back and that will affect how we teach the 95% of the rest of the technology for space travel. We are committed to bring man into space and this has brought international interest in the Keshe Foundation for this reason.

K: Now that we are at the point that a lot of you made the Magrav systems, the plasmas, the GANS and the rest, we take charge from the center in the way to show you and correct whatever needs to be corrected in the 5% of the total knowledge that you are mainly interested in because you are always interested in the crumbs and not the main cake. You are happy enough that you have tasted the cake. So, for that reason, we take action in a very direct way from the Keshe Foundation Center. We bring teachings directly from us and showing directly from us. In so many ways, we have seen this because we need to enter into the international arena with the governments. Most of the public do not have the technological and scientific background to check and develop except the governments. So we have entered into direct collaboration with a number of governments to bring this about into space.

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

K: What took us years to do as individuals and then as knowledge seekers as Keshe Foundation supporters, from now on the other 95% of knowledge for space travel will take place in the next 3 months or so. We are ready to deliver the technology to a number of governments to put them in the race to space collectively. This is important for us because then whatever has been of interest by some people doesn't count when you go to space because you don't have the limitation of man in this planet. We have taken control over and deciding to completely finish this and one reason is the development of what you are mainly interested in the Magrav units. We announced last week that you change your Magrav units load to the refrigerator/ freezer and you will see the results. We do that and we have put units in testing and we have seen the refrigerator/freezer going into zero operations in less than 24 hours. We see the double system where the operation of the system power supply goes to zero and becomes totally plasmatic. Now we have gone to the phase that we are ready to announce the release by the Keshe Foundation, hopefully by Thursday, of the power generators. We will show and start delivering generators and not the Magrav units you are used to.

K: If you are happy to carry on with the Magrav units and a lot of you are and understand why that would be good, and as we start delivering the power generators from July 2016 we will go in the direction of covering every step. It is not that the system supplies; it is how it supplies. We can confirm and go up to between 7 and 10 KW power supplies as generators. We will show data, examples and how if you are interested in producing generators how to do that as part of the blueprint. At the same time, from Thursday the Keshe Foundation changes the Magrav units from power units to generators because it is the extension of other things we have to do. The price of the generator we still put at 3 KW but it can go to whatever you like. We are working with the limits of the international standards. It will be about 1200 Euros which is peanuts in the power supply in the international market.

K: We will teach you how to connect it, to do it in the coming weeks. The Keshe Foundation website will change the Magrav units, the power units, from Thursday to 1200 Euro per unit based on 3KW consumption. We think that in some cases you can go up to 20KW. We do the tests and we announce ahead of when we deliver things. We will show that you will follow our work and from this week the Magrav units that many of you had a problem with because you couldn't see how to do it. We took charge last week and we will bring this issue to an end. Now we will wait to see what evolves around the people and now we are ready to finish it as a generator. This is what you were asking for. It was announced some years ago that a Keshe

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

generator would be 5000 Euro. In a way the patience has paid (off) and now we are at 1200 Euro for a 3 KW Keshe generator. It has to be connected the way we say and not the way you want it. It has to be according to the strict procedure that we ask you to do to connect it. Any changes that affect the outcome are your responsibility.

K: The power units will be supplied from July onward and we are accepting orders starting on Thursday, changing the Magrav to power generators. It is still a Magrav unit and it is a generator. On the back of that we will bring in government reports. This means that the government scientists report directly what they have done. In so many ways we do the same with the application of health, radiation, contamination and the rest. On the other hand, we change the focus to space travel. I start teaching how to develop space ship technology and in a short time a number of groups are ready to move into outer space. I always said that until someone is ready we don't start. I can walk within 5 meters of where I am and show you a refrigerator/freezer that shows absolutely zero power use and is in full operation. We have seen over 50% drop (of electricity consumption) within 24 hours. We should see it drop to zero from using the grid.

K: We are developing it to the base of the Foundation and when we are done with it we will throw it back with the Magrav system and the others and for you to come up with different flavors and versions of it. Following that, from this week, we start teaching officials how to start putting the Magrav system, the space-travel system together. This is our responsibility and we will take it to the next level that we had said we would do in a straightforward manner. We put a peace plan ahead and the governments did not obey and did what they wanted to do. Now we enforce it. We will teach it through the Keshe Foundation and in open space you go to the next level. You take it to where you want to do it.

K: We will release a number of videos in respect to how you can see how you can detect and build the space ship. It is your responsibility to do it correctly. It is your responsibility to follow the guidelines we put out, step by step. We showed how to do the Magravs; we saw the mayhem and we saw what we learned. We now enjoy the pleasures of it. We will do the same with the space technology; you have to build what you are comfortable traveling in and being with the space. Those of you who signed to be Mozhans, please send your payment by the end of the month; we (will) close it very rapidly. I will not accept any more in a very few days. We want very few people because we have received enough support from government that the individuals

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

will not count. But we try to carry the individuals so they can go back to their nations and develop this. If you have applied, please complete the process as we will close it very soon.

K: We have 2 options. Mozhans teaching will be carried in 2 places: one in Ghana Keshe Foundation and one most probably in China. If you are in Africa and you are in a third world nation, you can join the development and Mozhan training in Ghana. With China we will confirm very soon. The reason I have chosen these two countries for the teaching is to show that Africa is a major continent and not what has been done to it before and secondly we go to one of the most powerful nations who can support Africa. On the other hand, we are ready as Keshe Foundation to support any organization that wants to use the Keshe Foundation Technology for peaceful purposes. We have taken the position in bringing the new technology and we start controlling it from the center. Otherwise, it would be what we have done up until now; we are leading and you are following to bring different understanding and knowledge together.

K: Those of you who have completed the Mozhan application, I will start the preliminary teaching next month. This means before you come in you start knowing what is expected from you. I choose individuals to teach according to your own intelligence. In a way we have seen the technology to come fast and I am bringing the teaching of the Mozhans from October to July. So in so many ways we will do it the way we see fit and we carry governments and nations with us. We have started collaboration with a number of ways and different approaches with governments with different applications and we will carry on with it. We will not teach anyone that has something to do with the European space agency. The rest is open. I am inviting different organizations to join in the Mozhan program one by one. Our invitation is set to go to a number of space agencies who wanted to collaborate and their governments blocked the way. Now we go back and we invite them to be part of it. For us it is important that the root of the space travel development is in China; this is the path I have decided to take. It will be that way until we see what happens.

K: The spaceship program for those of you who want to be Mozhans, I will start training you in the background. I will start teaching in July and you can start developing an understanding and before September we can have some people, units and groups who can take off from this planet if what we expect to happen comes about. We prepare the first group for dispatch or what we call \_\_\_\_\_. I will not take a summer holiday this year because we are working because of what we see coming. I will stop the Thursday teachings after the 15<sup>th</sup> of July and the International

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

Teachings will be on Tuesday and all can come in and participate. This gives me 2 ½ months to prepare for what we expect in September-October. This is to be able to have a group of people who are capable of developing and completing and to be able to be above anything that happens on the ground.

K: The most important thing which a lot of you have not understood because you were trying to evaluate how you can bring technologies in a way that it could satisfy your interest; this has been one of the biggest problems for the Keshe Foundation. How can we teach you in the way for you to become yourselves and strong enough to understand your way of working, that on doing what you have done and achieved, you can develop the technology which allows you to be able to survive space travel? Where have we gone wrong? Nowhere; we did not know. A lot of you work on the basis of “how can we make our system to become a spaceship and how we can make a system that can fly?” I emphasize a lot of times in the teaching on 129 because it is important to understand what it means and the process, not just what has happened.

K: What is important and why I keep going on from 129; those of you who were with us with the system in Sosano, you remember 1-9. (32.37 minutes). This system was in the lab in Baleta. It was a star system that we allowed to rotate and you watched it live on the Internet. We had a star formation of 4 reactors, another star formation of 4 reactors, and we cascaded this in magnetic shielding and we released the fields of the plasma where we put the detector facing this side (33.26 minutes). As the system started building plasma, it started transferring energy to the next which were rotating, different plasmas. And then we put a shielding around the 3<sup>rd</sup> one with the reactor inside and the shielding created the spacing of the fields (34.01 minutes) from here and if this was one, this was like .2 and the last one was like .05 Tesla. In the plasmatic formation, the order of magnitude of the third was 10, the middle was 1 to power of 5 and the first was the power of 2. The habit of plasma is to feed the smallest. So it took the shape and the field transfer because the minute it transferred to the center core, then this immediately transferred to the other one to create balance and this started the process. Feeding more and knowing where to put the detector showed us the flow of the traffic.

K: 4 motors with a total of 12 W for energy, but in fact the energy was coming from what you understand with the power of the GANS that you are using in the pads and the pens and we collected it inside. To go into space technology and understand the space technology you will be doing the same thing. What this means is that we go back and now we change the position from

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

129 and if you call the 3 systems A, B, C, then the A is planet earth with strong power to give. (35.52 minutes). B is your base of your star formation and your C is the crown of the star formation. In transferring energy, you create a massive flow back onto itself and this is very interesting if you understand this (36.14 minutes). In fact, the system in totality behaves very much as you expect 1-9 and the last one was the weakest. In trying to feed it because you create a massive flow which this (the top) being the weakest will pull out because you have disturbed the flow in a specific pattern.

K: You are dealing not with the 4<sup>th</sup> reactor: But in that position, if you can decide how to change the field strength of the 4<sup>th</sup> one which in this itself is in balance with the position of the destination. You can travel to the moon and back in minutes. Now you see how the technology is taking its own shape. All we have done is to change the position of the 1-9 to the position of the star formation. The system, development and delivery will be instantaneous. We expect huge number of losses. We expect lot damage. We expect a number of total loss of the space ships until everything is done and until you start learning. I said at the beginning I said you understand that in the 1-9 it was imaginary field forces. Now you have a pen; you know it is no imagination. You have the health system and you have built the energy systems and you know it is not imagination and you have gained enough confidence to know how to play this game.

K: The whole process is what avenue, what way the man decides to go out. Would you like to go with a physical system like a craft and it will be like a donkey on planet earth? Or, would you like to travel in a more sophisticated thing which is made of fields and this is like going with a jetliner? But both will end up in space. According to how you understand and develop your technology will dictate how you go out (to space). The donkey will still arrive as much as the jumbo jet. It takes longer but it has more danger. A number of different ways will be developed by all of you and none of you are wrong. It is the way you feel comfortable, at ease and in control.

K: The spaceship program means the totality of the knowledge and how you will use the system for different applications. There will be hybrids and a lot of you will use different ways. Some of you will mix it and some of you will go for a target to the top and no physicality through the fields and some of you would like to have a platform made of aluminum and cores attached to it. There is nothing wrong with it. None of you will become leaders of space; you will all become passengers of the universe. In your travels you will see all different kinds of systems. By the

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

development you will see the strength of the thought and the understanding of the work of the universe. I have taught you the whole spectrum, more or less, and it is for you to determine how you want to travel. You feel happy to walk and be there with the donkey. There is nothing wrong with that; it just takes longer. The other ones who understand it (will) have better systems that will deliver them in seconds.

K: But at the end, it is how many of you can we get home safely. Any of you who become Mozhans by building systems as we teach or through the Keshe Foundation, will have to understand the hazards of space. You have to understand you are the pioneers in the frontier of the new space era. If we leave this until it is too late, then it will be too late to teach the totality. If we leave it to the time when everyone is ready, the human race will never be ready. We deliver it according to our understanding that the time is right. We see mankind just about ready to come out of this planet and we support the teaching, technology, understanding of it, but we will not allow the abuse of it. I carry in my hand both the elements of kindness and the destruction. You choose.

K: Use the technology to harm another nation or person and we will wipe out your nation. So from now if you are an American and use the technology and be aware that you are responsible for every American. If you are British and you use the technology to harm another, every single language speaking and the line of thought universally will do the same. We block you from every achieving maturity and that is our punishment. We don't wipe out a nation, we don't harm anyone, but we block the level of maturity because we know how to do that. From now on the plate is clean and we all play the same game. Establish a universal connection to the universal council and establish the understanding of the work of the universal council. Establish that you work as one nation and share the knowledge of the development openly and don't be afraid of a bunch of terrorists who sit around.

K: We have already organized their business further. They have to stay here and then they know what they receive. The problem is to understand the application of the technology in a way that how much of what we do allow the others to benefit by it. Understand the space travel is based on the work of the motion of the plasma. Understand the space itself is based on the interaction of the magnetic fields. It is both gravitational and magnetical in the Magrav state. Set the knowledge in the correct way that you understand what can give you the condition you want, what will create that condition and don't be afraid of testing it. Sometimes it will be good and

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

sometimes it will not give you what you are expecting. It is for you to understand what was achieved and not what was expected. In space there is no waste; you always achieve something. But try to see that what you achieve is near to what your thought or aim was. This is more important than not achieving. Then you learn and this is the process you have to learn. None of you will ever be wrong. Stack it, join it, twist it, tie it, cover it, coat it, field it, GANS it, whatever you do, none of you is wrong. It just shows the state of your understanding of the intelligence of the totality.

K: When you start working with plasma in space, we need those of you who are dedicated to humanity and know and understand clearly that 80% of you who enter into space will never come back. Some of you will leave and establish new territories for humanity in space. Some of you by your own mistakes will end up and convert to something else as there is no death in space. Some of you will succeed for a long time and then somewhere down the line you will make a mistake. Understand before you start setting your systems up how you protect yourself first. (47.20 minutes). The first rule is to learn the safety before you start testing because now that you understand the space technology, by the time you come to understand the safety, you are already in it and it's not safe anymore. There is no reason that any of you who follow the work of the Foundation cannot produce a flight system. Some of you will create it with a piece of wood, a piece of metal, with physical fields and some of you will create it with the state of mind if you understood the work of our friends in Togo and the changes are according to your own comfort in the environment of where you are.

K: Mankind is ready to take off; but, on the other hand, mankind does not have much time to take off. The process of the development of the spaceship will start in a very deep way; you already have a full basic understanding. There is no shortfall. Tuesday is the International Teaching and that means all the Keshe Foundations around the world have enough knowledge to start working. But they have to decide if they want a physical system, a field system, or the system we can control through the scale of thoughts. You need men of precision and dedication and who understand their wish is their command. We have seen people from Togo and these are the people who fit in the last category. All they need to do now is convert a bottle to a space ship and they decide what is going to be in it.

K: Purity of the heart, soul and intention---those of you who go back into the old aircraft hangers and put the pieces together to see how they fly, then you have to understand the interaction of the

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

fields and the matter also and so the job is much harder. Those of you who decide to bring the two halfway together will find a lot of mismatches and a lot of problems. In the long run, if you are happy with it, it's a hybrid. We can teach in different ways. Those of you who become part of the Mozhans, you decide. Do you want a physical system or part of a field system or do you want to be part of the controlled emotion of the soul? This needs a lot of clarity of understanding of oneself and nothing more. The physical side is very cumbersome. The field side is much easier and you can still go with a hybrid. (51.08 minutes). In the 3<sup>rd</sup> system of the controlled emotion of the soul, you are on your own.

K: We see two kinds of people who will go to the 3<sup>rd</sup> system of the controlled emotion of the soul: The Africans and the Chinese. With the field side, this will primarily be in South America and partially in Central Asia. And we see the physical systems with the white race, in America and maybe in Europe. The reason for it is very clear. The Africans and the Chinese are much closer to themselves and to the emotional understanding. The South American group is partially connected to material and the fields. The people in the West—everything has to do with the material. Otherwise it has to be confirmed. It will not be easy to change the school of thought in the short time. I will spend more time with the Africans and the Chinese and the 3<sup>rd</sup> system of controlled emotion of the soul than I will on the material development.

K: We bring the understanding and the emotion to bring the change. There is no way that I will mix the 3 together. The structure on the international teaching, if you are connected to building systems, you fit into the material system perfectly. If you are connected to the GANS and to work with the fields of what you have created, you fit in the middle group. If you are in the 3<sup>rd</sup> group with the system of controlled emotion of the soul, and you understand the yin and yang and understood the strength of the emotion from inside, then you fit here. The matter system will cost millions of dollars to build; the field system will cost a few thousand and the emotion way will cost nothing. You achieve more here in the emotion system than the matter system. So you see the structure of the teaching which is coming for the Mozhans and those of you who want to be in it. The deciding is very simple; we expect this group to be in flight very quickly in the 3<sup>rd</sup> group with the system of the controlled emotion of the soul. The matter way will take time; they have to find factories and the nuts and bolts and copyrights. There is no copyright on building with emotion and thought.

Q: From Oslo...if we decide to go to Africa and I am in Norway...

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

K: It goes with your emotion; you don't go to Africa but if you have the emotion then you will feel it and if you understand it, you can create it. This is the difference. We don't do it for Africa and China. We see the position. If you are a man in Germany or Italy who has reached a point of maturity to join the Chinese or African group, you can do that. But understand what you are getting and what is involved. In Europe and America, you still want aircraft hangers and you have to build a spaceship with a platform and you have to have designs. You have to have calculations and equations and it will take a few centuries. If you understand that this planet and the universe were not created out of the screws, wood, planks and aluminum and it still exists with the stars and the moons in the matter state, they are all in a position, and then you join at the bottom line. We are not separating races by consciousness; it is just a way that the schools of thought bring unconditional understanding.

K: The more you have added, the more you have tied it; the more you moved into the world of conditioning the thought, the physicality, the harder it is to emerge. You go to Africa or the Chinese and say this is how it works, they test it and it's done. You go to Europe and they want proof of the concept, patents, equations, formulas and there is something wrong with your plan. Then you don't understand and you have to make all these assumptions and you never get there. So those of you who have matured and if you come and ask if you can be shown, you go to the lower plan. If you bring people into the third level, the emotional level and ask to see this and that and can you show me this, we ask you to move to the field level. There is some matter there for you. If you come into the physical side and it's too much, we ask you to mature. We go into space with a donkey, a car and a craft. It is you who decide what you are more comfortable with. We see donkeys in Europe, China and Africa—they are all the same donkeys. It is the man who decides he wants to be on the donkey, in the car, or just where he is, who he is.

K: I start teaching the space technology heavily with every aspect of food, energy, transportation, communication, transmutation. These are the backbones of the structure. After September, I will be teaching once a month in the full-time teaching of the students. All the concentration will go to the development of the space technology. We are all clear that we are setting the course for space travel. It is done by all of us and not by some of us and there is no NASA or Russian Space Agency where you have to go to qualify and stand for a test. If you can stand and one out of a thousand might be accepted and then you spend 7 years being trained. You have been taught and trained and you are ready to go.

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

Q: Can you give us what the space travel can mean to us? What will the travel lead us to as beings?

K: I know this lady and I prefer not to answer her. We all know who she is; she is the other half of my life and she has been pushing me to explain this for a few weeks. People don't know what to expect. First of all, before we leave this planet in each section, we shall meet creatures of the universe when you are ready for it. It is our way to enter space in a peaceful way and we shall be welcomed. The excursion into space is a celebration of the universal community that man is as a new-born child. There is no training school. One of the things we expect to develop in the space school, especially on the Chinese and African side, will be direct in the way that you create a condition because your knowledge has reached the universal level and you shall see your brothers and sisters of space. There is no other choice. In entering space, you are on your own to develop the technology and science in the way you feel or you can learn from the others. There are no schools. (1.02.28).

K: It is the interaction of the thoughts and the soul transfer of knowledge. The ethos of it is very simple: do not ever harm or think to take anything from space. Do not even contemplate to take a stone or something from somebody from somewhere because you think it is your right to do that. Do not ever even think to harm another person, another entity. Entities in the universe are not your food supply. Learn in space that you have to stand fast and correct and keep to the ethos of correctness. In the space do not expect restaurants, cafes, every activity to keep you busy, and do expect to look to see, to understand and to mature. There are no factories or offices. You will spend hundreds of years in space learning about different ways the space has shaped itself and through it to understand the creation. That is your only job. There are no 9 to 5 jobs. And there is no day and night to have a day shift or a night shift. You are always on a night shift until you decide it's going to be a day.

K: In space you learn something very simple; there are no doors, walls, kings and definitely no priests. You are your own priest, your own king and you make your own home and you find your way into it. It has to be a balanced condition with no one leading or preaching to take your soul. You have to be strong enough in the integrity of the operation of the universe and to know that *what I do is for the benefit of me and the others*. You have to be strong enough to stand hundreds of years of solitude. Because in the space when man travels, in finding peace, will not create problems for himself. A thousand years in space is like one-day sitting on the beach. I was explaining recently half of the stars you see in the sky, and all the time you give it a star

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

formation in the galaxy, they are all nothing but spaceships that have simply anchored as they have nowhere to go and they are watching.

K: It is peaceful but every day they create within themselves. So one of the first things you will you start building your space ship and taking it beyond the levels of this planet and beyond this solar system you find that half of the stars in the sky are part of your family just hanging around with the lights on. Because they create an interaction with the environment, they are to keep their positions where they are and the interaction of the fields are their systems and the environment of the universe creates light and to you they are stars. You can get NASA to say this 'star' is made of this, this is the diameter of it, but because you haven't got the knowledge, you could not see the truth. So in going to space, in the departure even on this planet when you start building the first unit, you will start observing the other creatures of the universe on this planet. Because now you make the fields the same they do, you will see things you never saw before.

K: It is very much like you put different colored goggles and glasses and you can see at night. Now we put the 'plasma' glasses on and then we will see the universe. We will see the universal creatures. If you start building glasses made of plasma in the plasmatic fields, you will start seeing the creatures of your universe. But you have to make it the right way. With your eyes, you see the physical man. With the plasma of the glasses you make, you call them glasses. Our vision aligns in conjunction with the plasma of the GANS of your eyes and your brain you will see the plasmatic part of the world which you were never aware of.

K: You will see new creatures and new life sitting next to you that you were never aware of. How many of you have had a vision, glasses on, in the dark and you become aware of things you were not aware were there. With the new plasma systems embedded, built and I have shown the original, very primitive ones to the doctors. They will start building it but in another way. You will see the first contact and you will feel their emotion; they have no languages, because you feel the emotion of the soul and not the voice. Anyone who tells you *I can hear this and that, these are all fake imaginings*. You will feel it through the soul and not conversing in the language where you talk and say what I do and what it is. You will change it according to your understanding. Those of you and the people who are playing and hear and see, belong to the mental institutions because they don't exist. Have you seen two babies talking to each other but they know their position in space? It will be on the level of the soul.

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

K: You have to realize the principle of the creation and that is correct conduct. When you see another creature, you never shake hands or cuddle until you know the energy they carry does not harm you and primarily the energy you carry does not harm them. Man will fall in love with the creatures of the universe. Would there be enough springs (? 1.11.30 minutes) of man if the inventor of the universe already has been and already this is not the first time. Those who came to understand the level of creation of the universe are already passengers in the universe of this planet. Learn to concentrate and those who will re-concentrate to teach the others are to find the position of your emotion within the structure of your physicality and find out how it is fed and it's all in my teachings. And find out how this emotion controls the soul and the soul sees a whole lot in the way the boss tells the bottom line to the next one down. *This is what I did, this is what has to be done, and if you like it, you can transfer it to the invisible side.*

K: The ethos of space is very simple and it is the writing of Christ, bless his name. *"Thou shalt not kill, not steal"*. This is not in the writing of Moses. It is with the ethos of the Christ. Just because a donkey just brings something, (it) doesn't need to understand what is on the road. The man who takes the load and takes the salt from the back of the donkey and makes the salt that makes the food that one can understand the benefit of it and what is eaten, what is given, that is the man who understood? Moses just brought the donkey and never understood because he lost his way from the beginning. Christ, bless his name, understood. Buddha went half way, but he did not get involved in the matter state and he did not understand the complete totality between the two dimensions. Mohammed, bless his name, got involved in too much physicality. So, one thing you will understand is the state of the man at this level who takes to space through emotion and the soul shall be equal to the state of the soul of the Christ, bless his name because then you see the totality. You understand the essence and you understand what Buddha understood.

K: In the time to come, there will be no sign; the name of Moses shall never be mentioned. By bringing the knowledge, he abused its origin, so the knowledge lost its essence. You have to understand that in time, in space, when you find yourself in a position to be of more knowledge you have, to be the same as a 129 to give as much as you can that others can balance you. You give and what you give is taken and what is given you take. In a way, when you talk about space technology, you talk about understanding the balance. Find the position of your emotion and your soul and understand that the soul is the creator of your physicality in the dimension of the strength and then the spaceship shall be within in. You choose the point—the Chinese and Africans will bring man to this very quickly. In so many ways, the detachment allows the

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

maturity of the soul, so we already start teaching you how to achieve the level of the soul and how to achieve to understand yourself because then as we said, and I repeat, you made the matter state of the GANS. You ate the food of the planet and in your body you converted it in the stomach to the GANS. In your intestine, you transferred the energy of it, the same as the GANS in the 129 into your lymph and into your blood.

K: And, through your lungs, you did the same process. In the interaction of the fields of the emotion and the physicality through the operation of the heart, you transferred the liquid plasma into the field plasma which fed the emotion. And in understanding the emotion and its evolution, you have created the soul of the man. Now that you have achieved the soul of the man which is served by the field, as I taught in teachings this morning, now you have the field that cover the physicality that can make what it likes, what you call the spaceship to enter the realm of the universal community.

K: This is the process. At any time, (if) you make a slight error in the emotion, you build a craft that goes nowhere or doesn't go where you want it to go. Now you see why your soul is the creator of your craft. Then you have found those souls who like to share a craft and you become in totality the passengers of that craft and not necessarily in the belly of its cavity, but in emotion. Or you decide how totally as a group who made the craft, the place and dimension you would like to go (to) in your craft. Now you understand the teaching of the nano, the matter, the field is the replication of the creation of the man. But up until now, I could not explain that to you.

K: You have seen people in Australia put the GANS in the water and the transfer of energy to a massive amount of water becomes liquid plasma. Then they transferred it as a field into the lettuce and you saw how big it grew. Now you change the field into matter state; it is you who decides what you want the small lettuce or the big lettuce. So as I said in entering space, you enter the replication of the creation. You have to understand the whole process and you need to understand or you will be a man in space with one arm missing, one eye missing, one leg missing, because you did not understand that you need two arms to survive on a planet like earth but in another environment you might need six of them because there are too many good things to touch and good things to give to. Never look in space that 'hands off of takings'. Hands are for giving. The feet are taking in the field of the emotion of the planet. Hands are for giving back and man has made a total reversal of the whole kit and caboodle. He uses the hands to take

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

whatever he needs or whatever he feels he needs to take. The peace of space is very simple: make sure that you don't make a self of yourself of the soul with the hand and the leg missing.

K: You are responsible for your own behavior, your own structure and your own physicality. Now you have seen how easily, because you understood everything from the beginning that I can show yourself, that you are made of what you are making. If you understood how you made the GANS and everything else, now you understand how you were made. You are nothing but a conversion system of different matter states and fields and you thought you were superior to other things in the universe. We eat food which is matter that is converted. If you haven't understood from the first time, then I repeat myself. In a GANS machine, you make the nano coat, you GANS it, you digest the field, you cover it, you place it in two different ways and you bring it together because your emotion and the field of the emotion create the interaction between the field of the emotion which gives the soul of the man. And then it is the soul that decides the totality of the interaction of the physicality in this dimension and its shape and form.

K: Understand that the soul is 129 and the emotion is the middle reactor and the physical body of the man is the weakest. In space, you have to decide what you are going to do with the physicality which is the cause of your demise. Or, are you going to leave at the relation of level of the emotion which can still receive and it can interact with the physicality? Or do I leave with the level of the soul that has nothing to do with the physicality, and manifest myself when I need, the way I need, but according to environment I am going to manifest myself so that I can survive? We enter into space technology not with jet engines, rockets, reactors, plates; as I said you enter a region where the aluminum (1.24.17) changes from solid to liquid state and you have no craft and you fall out of the bottom of it.

K: But the man of mentality, the one who did more crimes when the soul was physical, now understands why it is better to stay on this planet and understands the consequence of his own conduct. Those who got so involved in killing and destroying and (became) more materialistic cannot go to the emotional physical side or in the total field side because there is too much they cannot comprehend. How can you tell a blind man how beautiful the red rose is? How can you tell how the emotion is when you give the red rose to the one you love and the love you get back from doing that? If the blind man has never seen the red rose, he does not know the smell or the emotion of the love back from the one you love and gave the rose to. That is how simple it is. So we see how the men of crime have already committed themselves to the material world. Try to

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

correct the wrong, but understand what you have done wrong that needs to be corrected and don't do this out of the fear of it but have the understanding of it that you do not put the same thing back in the same circle again.

K: Create the condition that you are at peace within yourself. Being in peace is balance and when you are in balance you do not make mistakes. You will not harm another; you will not take from some other fields even if you do not know. The true space program starts from now on and I keep telling you every week. Every week we open a new door and in reality if you are happy with your Magrav systems, your pens and your pads, we still teach you. This is the school of the universe and we have from toddlers to graduates, postgraduates who understand the totality so we speak in the language of everyone to say it is you who decides where you fit.

Q: We have children among us; how are we going to prepare them for this journey?

K: There are so many ways we love and care. In so many with them (it is) understanding the journey because it does not mean that they are children in space. They won't stay children. In space they are younger than you would be—10 or 20 years-- but in space we are all the same age of thousands of years. Mankind will pay heavily for the way of his conduct. But that is for the man to understand. Children should be taught at a point before the time of the conception which means you can bury it within your RNA before it becomes DNA and before it becomes a being. Then the child is born with the ethos of the universe. The way you decide through your RNA of what your eye color will be, the shape of your face, man has not understood. Your RNA is the structure of the soul of the man.

K: In the writing of Mohammed (?) he says, "*pray for your children 20 years before they are born*". We take it further. In the ethos of your RNA which is your life in space. This means you have to understand the true structure of the life in the universe (so) that it becomes ingrained as part of the recording. Not of the physical matter, but even when there is not a physical entity in the universe, the fields of your existence and the offsprings of it will carry the knowledge of peace. It is very easy; the way you made the GANS of flowers, meat and more, find out how you make the GANS of peace and use this field to become part of you. Drink it from the fountain of the Universe. You have a long way to go and it's not going to be a peaceful journey. You have a long, long way to go. But we start the process and it has to launch and the time is now.

## **Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016**

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

Q: We have a lot of controversy and problems and as mankind will know, how can we release these shackles faster and make it somehow in a way that we know we are on the right path and we don't have to doubt because a lot of people put doubts on other people?

K: That is how they show their ignorance. It is the 21<sup>st</sup> of June. Today is a balance of the equinox. In a way, today is the longest day of the year. In so many ways, it has to be the longest day for mankind to understand what we have said today. There are those who create problems because they are grounded. Where you see creators of problems, understand that these people are grounded. These are the souls, the people who have chosen to be part of what it shall be. There are those who pretend to serve and they are in fact there to take. And there are those who serve unconditionally and we shall see. In a very fast way, there is something I have set up and none of you have understood because you are too busy in seeing what is going to come out of the hat. You haven't noticed there is no hat and you will understand very soon how you all have already been separate. Even the ones who have not heard about the technology. The process will be very easy and you will see it very, very rapidly.

K: Now that we have the star shining the light, the true colors will come out extremely fast because those of you who will start making what we call 3-D plasma with the GANS fields, you will start seeing the proof of their existence and how correct we are in the knowledge. You will show it to humanity. And then you understand that there wasn't a process of making a spaceship, there was a process of showing you are the passengers of the same ship of the others you have not seen. And then that is where your problem starts; that is where everything will start. That is where mankind will have a huge, huge problem. This is where you will see and you will not know what to do. That is the time and those of you who endeavor to build the systems to be able to see fields and not the matter end, you see the things made of fields. In the next few weeks and months, you will post on your mass media that these are what I have seen. What is this and what is that? And you will find out if your invitation is; they will teach you who they are. As I said, with this teaching today I have opened the door to the universal community. It is for you to build the right system with the right intentions, and you will start seeing the creatures of the universe.

K: We decided to bring the teaching forward so rapidly because we see what is about to come. You are looking to build spaceships. Now as I say in the international teaching we have listeners from all corners of this planet. You learned about the GANS, the fields, the plasma and now start playing with the field strength and the liquid plasma and you will see it as a wisher of seeing and then you tell me what you see. Tell me, if you put a hand out to the creature of the space in front of you, are (you) in space or are you a guest to a space man? Today we have opened the door for

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

the universal community (to) those who understand and are ready to see. Today is June 21<sup>st</sup> and we have changed and opened the door. It is the day of equality. So we shall see. Then you understand why in the older days, the equinox was celebrated. This is the third time we opened the eye of the man on the same date to the universal community.

K: You have to understand that from today, it is you who decides to be blind or to have an eye to see. And if you behave and conduct yourself according to the rule of the universe which I have told you about, you will get back from the universal community. You shall build the spaceships according to your interest and your pleasure to be at peace. They will help you to build it and structure it; they will guide you like a brother into space. But it is you who has to make the difference. You have to remember one of the cornerstones: how can you tell the man of the universe that you shall not eat him if you are consuming another being on this planet? It is for you (to) rewrite the structure of your RNA if you understand. Start making combinations of the GANS glasses, what you call lenses or binoculars or whatever. Start looking into the horizon of this planet and you will see so many creatures you could not ever imagine it.

K: These are all passengers of this universe. I said I opened the door of the universe to mankind. And today is the first step. You know when you go to an optician and he keeps dropping different strengths and colored lenses and glasses in front of you until he gets the right measure? Build lenses like this; people in the innovation center in the Philippines know exactly what I am talking about in how you have to do this. We have the purest of hearts in the Philippines and that is why they can deliver so fast. Because they work without conditions. The rest have conditions, most of you have conditions. Work the same kinds of different GANS mixtures and lenses and up till now you put it down to look. Now put it in front of your eye and the back of your head in combination where your emotion is in the center and you will see the totality of the creation. Make it so that you understand and adjust it so that it is not too much for you to start with because of what you will see. It is so beautiful that you will never need eyes to see. This is the way you see the universe from the heart. This is the way we open the door of the universal community to the man. We do it step by step and we started the first step today.

K: Let's see how you behave. And if you would still like to eat and let's see if you tell them, "I want a peaceful planet. I want to see peace on this planet and no more murders and killing". And if you are sincere enough, you receive enough from them to be able to wipe out the wrongdoers of this planet by moving their souls. Don't forget the structure of the work of the universe. You

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

never kill or destroy; you create a condition that they move on. Remember how to build it. I have told you for weeks and I will not show you anymore. Now you bring strength and totality to it. Make yourself rings of the GANS overlapping each other with full transparency and then you will see the work of the universe beyond this solar system. But you have to understand how you do it, and I have told you many times. Then the strength you receive from the rings, because you are in the center like a bowl or the center of your Magrav system, allows you to see the universe. You won't see it through the eye of the man; you feel it with the soul of the man. In this process, you elevate the emotion which elevates the soul. And the physicality will be in the shape it is happy with, at the point of destination. It will take you a long time to understand this.

K: Today is the beginning of the opening of the man into the universal community and space, not by spaceships but through the soul of the man. And with it, the man decides where his physicality shall be. You will get so many invitations that you do not where to go. You are the new child of space and everyone wants to show you their houses. And the houses are across the universe. I remember an American traveling in Iran recently wrote an article. How come the American press says the Iranians are so wild and wherever I walk they take me to their homes and give me the best food, the best room to rest in? This is the culture of Iran, and this is the culture of space. You will be given the best seat in the house and the best space to see. This way you are not to steal when you are a guest. (1.43.53)

K: Start building these lenses and the GANS for them; start opening your 'eyes' to the universal community through the eye of the emotion and the soul and not the eye of the physicality. Then you shall never open your eyes because there is no need to see. With the eyes of physicality, you see nothing but pain and destruction. You have all the tools; do not use copper oxide on the lenses. Then you leave your physicality to the point of destination for what you had on this planet. Do not use heavy metals; go to the lightest that the collective energy of the lightest will give you need you what you need at the time the need is the heaviest. Go back into the hydrogen plasma because its collectiveness will give you what you need. Work with deuterium (1.45.32 minutes) and not with hydrogen. Do not work with tritium because it can give you the division. It is like single bricks in the laboratory. It's all the same when you build it and the structure is all the same. If you have electrons, you have to bring other tools (? 1.46.01 minutes) and you start creating problems.

K: Now you understand why I said from the beginning of the teachings years ago atomic hydrogen is the backbone of creation of the man in the universe. You have one electron, one proton and one neutron. And the totality makes it perfect because of the balance in it. The

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

physicality of the man, the soul and emotion of the man are a total, perfect system. Try to build systems which carry the links to the emotion of the man. You shall see better and your sight and vision will be very clear in respect to the totality without the physicality. (1.47.08 minutes). Try to do one thing and that is when you use the gateway to the universe to see, the system that it controls both in feeding of the man. The work, the true work and not the physical work of your heart as your control and how you much you feed it and what the strength is, that strength allows you to see the diverseness of the universe which you have decided to receive energy from. In the next few days, try and you shall see; you will have the first contacts with the first vision and the first confirmation of life in the universe. Some will allow you to take pictures. But then you will understand that the picture does not exist.

K: You shall see them in the original style where they were created and not with the eye of the man. Create spacing with your new GANS and then you create a dimension that you can put them within the GANS. Look in the way as your emotion in the center of the plasma. You know how I draw plasmas. And then accordingly you shall see the creatures of the universe according to the strength and the clarity and in a way the strength of their souls. It is zinc with copper, in the right order and you put the right emotion, you shall see the Christ, bless his name in a physical way. If your emotion is to see physically your mother you lost at the time of birth, you shall see the mother. Don't forget the work of Paul from Togo; that was a gift from Africa to humanity. The beginning of the journey into space is through the emotion and the decision. Now we have opened the Pandora's Box that nobody can close. Make one for those who want to be the presidents and one for those who want to be the world leaders and tell them, "*you tell us the truth*". And everyone shall see.

K: Or put the lights and the lens on and look at them when they say they want to bring peace and we can see the bankers sitting in the backgrounds in their pockets. That is the image of the confirmation of the payment of how many to kill from which manufacturer is in their soul and in their emotion. There shall be a lot of shadows in their souls. Now you see what I said that we would enter the elections with full force. We can see the true colors of the leaders and those who want to be leaders. Give it to those who killed and raped and you see the names of the children, how and where they were killed, because it is embedded in their bodies in their emotion. We don't need the \_\_\_\_ (? 1.52.07); now we give you the plasma test. And then we shall see. The position will take weeks and months to master and then you will see.

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

K: Go back to my teachings (from) a long time ago (Health Teaching Workshop 12). I told you where to find the emotional part of your brain using a stereo system. Follow the same procedure and you will find the position where you not only don't hear the voice through your ears, but the whole music in its totality. This will be the same with the vision. You will not need the eyes but you will see through your emotional part of the physicality that you have denied. I offer this technology to be tested by the innovation center; build the first lenses and understand that they need to go to the emotion and the strength of the emotion and let it be worn by those who want to be the passengers of the universe.

K: The problem will be not to look for the physicality but in what field you can carry the soul and with it the emotion and the physicality within the eye of the beholder will appear to be satisfied that you are a friend. In a way, you expose your own soul to the others and there is no need for talk; the emotions will carry the message. I (will) teach more as time comes, but as a messenger my message is very clear: *we have delivered and we have opened the door and it is for you cross the threshold of mankind in this village into the universal community from today on. (1.39.01 minutes)*. Don't do what the Americans did with the Native Americans. Don't forget a very big rule you should have learned: They killed a lot but at the end, they killed themselves. When you enter this time, only those who are transparent will cross and the rest shall not. Those who have done wrong, will not enter the spaceship because the spaceship is their own physical body made by their own souls.

R: There is a presentation of GANS production (using) another way from Paul from Togo.

K: Today I carry on with this and we will do this on Thursday. Today we opened the door of the man to the universal community and we are putting the hand of friendship out for man to respond. It is for mankind to respond because their leaders shall not; today they are trapped in their own prisons. Understand what you are doing and go back try to understand what and how you made the GANS. Try to make the GANS as pure as possible and try to make whatever kind of mixture you make in the way the water will be transparent. But understand how you mix these GANS and the liquid and how you mix the water into the liquid plasma. Then understand, if you want purity in totality that no matter is carried away with the GANS, make the vapor of it. (1.57.46 minutes). And then, when you make the way from the vapor of it, make the field of it. And then you understand why I told you about the field plasma and the vapor. Then, with that, build the lenses and then you shall see the universal community. Then cover yourself with it that you receive the same message as you speak—not what you want but to hear. You will see and understand with speaking or without others speaking.

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

K: Build a system that covers the totality of the brain of the man (so) that you get every dimension of physicality in the essence of creation, but in the true form of the fields, and not in the matter state. Remember what we said from the very beginning. The minute you put food in your mouth, it enters a GANS state. By putting a color in your head, you go from the GANS state to the plasma and then to the soul of the man. Trust this and tell us what you see and tell us what the message is. My word goes to the world leaders, heads of armies, heads of space, and heads of governments: you have all been trying to talk with us and now we are ready to talk, but on our terms and conditions and not your terms and your conditions. Understand one point: we deliver peace according to our ethos and not yours. We give the call of armies in a very short time to go back to their nations. From then on, we shall stop them in their tracks. I have warned this before and now we deliver this time. If these killing armies are not withdrawn back to their 'nests', we take the nest and there is no nest to go back to.

K: Those nations who are planning and working towards bigger aggressions, now we enter the position that you won't even remember the name of your own child. This is not a threat; this is, if you understand the work of the plasma, is our wish. You will find a lot of world leaders roaming the streets and not knowing who they are. Try to understand that we saw people in Vienna, Austria going around leaving systems and making Magravs with the intention to change and you have started the process. Last week, the last week, Caroline has been going around Rome, all over town, and filling them up with CO2 GANS and zinc to bring peace to man. When they come to Rome they will spread the feeding of Rome to the rest of the world; the process has already started. Every famous fountain you see in Rome now carries the vapor of the peace and the equality of the man. And thousands and thousands of you go there every day. Build the same and change mankind in a different way.

K: We do not need to create huge crafts to show if all our intentions are the same. Mankind will make more crafts and that will be the sign of humanity in the universe. That is how you see huge crafts the size of the sun; in them there is no conflict. They reached a point of maturity and to get there they have been one. They are the passengers of the universe and everywhere is home. There is no 9 to 5 job; there is no 9 to 5 and there is no sunrise or sunset. Start mixing your GANS in the order of the creation. And then you understand what the order has to be. Learn from the division of the cell of the man in multiplication. Build to start with the division of the man to the non-dimensional world of the universe and then we see. We will see what you report and what you see and there is one thing for sure; they do not talk. They hear the conversation through their emotions and through their souls. If you see them coming close, it means you are

## Transcript from 20<sup>th</sup> International Knowledge Seekers Workshop held June 21, 2016

(v1 2016-06-24) DRAFT (Transcription has not been verified. Double check info with video)

aligned in thoughts and we want to be together. If you see them walking or moving away from you, it means your thoughts are not peaceful. They are peaceful and they know what they want and they are not prepared to break the peace. Start learning the language of the universe. There is no sign language; just the field strength of interaction. If the strength is right, the attraction will be perfect.

K: You never thought you were going to go into space so easily. It is as easy as you have seen making the Magrav and the pen to enter the universal community. You have tested it and you know it is there. You have to have the courage to become part of it; that is your problem. If there are no questions, we call it a day because mankind has a lot to think about and contemplate; we need a lot to change.

Q: I have one more question: I am having a question about fear. A lot of people will have a lot of fear because of traumas from the past when they were children. In any situation, the fear is inevitable; not only me but other children and adults. How can we release the fear so we can make that first step easier?

K: There is no fear; there should be not fear but a lot of joy.

Q: I know...

K: If you speak of fear, then there is fear. There should be a lot of joy for the freedom of man from the shackles of the limitation of this planet.

Q: It's not that we create; it's the fact and I know you can abolish fear very fast with joy and flip it very fast. If you see a clerk who has had a difficult day and you give her a smile, then she smiles back and with the next customer she has a smile. If she can just hold on to the joy of serving and being there, no matter what. But it's the flick to make it easier to slip into the joy. A lot of people don't get joy in their lives.

K: The problem is that I brought this in such a rapid pace especially today so people can do it that the curiosity will not leave a place for fear. There is one thing and at least for the first time, we give man a chance and the totality because of the communication lines and because of the openness we give man this the first time. It doesn't matter where you are on this planet; you can interact with the universal community. We say no one is above; there (are) no meetings in America or China or somewhere else. The man in Togo shall see first. The man in jungles of Kenya will see first. The man in the center of China who is pure in heart will see first. There is

no fear and he understood the technology. He is happy to be free from the shackles of tightness of worrying about food. If they teach you how easily you can absorb everything you need and to be part of, you learn there is no fear of detachment. The only fear is if you see a monster and that monster is actually you and not them. Today is the celebration of the man in the universe. There is no fear at the party unless you are afraid of your own conduct. That is where the fear will come from.

K: We have opened the doors and you will try everything. Use the lenses everywhere. Use the patches, transparent in front, and use the patches below the system that is transparent layer by layer and each time you will see what comes to you. Make sure you cover the eye of the man, not the emotion of the man, and it creates its own image. You see your mother who died 20 years ago with the same face and smile and you see this through your emotion and not your eyes. Now we show you how you see through your emotions so there should be no fear. Thank you for today and we welcome humanity to the universal community. It is for you to follow this and not for us; we have done our job correctly and we have brought mankind to a very positive point and now it is time for mankind to respond. Test it and test the system. I showed you how to make the hats, helmets and boxes. I kept you so busy with these you were not expecting what came out. This is the extension to the hats of the universe; play the game. Thank you very much for today.
