

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

Notes courtesy of Cornelius van Dorp @ Keshe Foundation New Zealand (KfNZ)

Video link: <https://www.youtube.com/watch?v=OfV64xQsaOM>

(KfNZ comment: This picture is of the number of Keshe people and groups in Germany Austria and Switzerland. The Kf has REALLY taken off in Middle Europe, and THIS IS ONE HELL OF A WORKSHOP – or as ET said, a great rave! MK goes into detail about Stirling Allan, without actually mentioning his name – one almost shrinks to write about these things – but MK is merciless as well, and taunts the Red Circle about the 2000 pedophile names in high places on the list on SA's computer, starting with Justice Scalia and including Royals and Politicians – Interpol now has all these names and so these people are now in the position that they put MK into for the last 3 years – unable to travel or they will be hauled into justice!)

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

Free energy in exchange for world peace,

Together we can end war, end hunger, end suffering

Together we can explore space, explore the Universal Community

Take the next step!

Music production by Judith Ortiz.

00:06:42: Rick Crammond welcomes everybody for the 103rd KS workshop

We have Klaus from the Austrian Mother Ship and starting with MK

00:07: Next week, the 104th completes a full 2 years on Thursday next week – most of us have learned a lot and progressed to bring humanity close together. The first teachings were with Rick and a few other now has expanded into a permanent weekly class for millions. In 2 years no one has managed to change the course but have added and sped it up increased the knowledge. The Kf is growing in such a way that we see changes worse than we thought – we cannot keep up with the speed of growth! It is growing so rapidly we need to make changes – we are bringing in national governments – so as we first were individuals we now expand into structures and there a few governments approaching us. We try to keep the international momentum going.

00:11: We are focusing now on developing and showing the first lift capacity – this is developing rapidly – the group that started in Trani in May 2015 is now coming to the end of the year – and we are now finishing the year with the space ship design and lift system teachings. So now as we see the craft structure coming into form, it is important to understand the line of communication with the Universal community – we are now teaching the Key for the blueprint of the Universal Language for those who have followed and are mature in the teachings...

00:16: For the people at this level, in space, you cannot ask for a glass of water, or what is a tree? Or what is a book? These are physicality's of the life of man on this planet – in space you recognize the EMOTION or what the other side is releasing – I will teach more in depth in the background. Today we have done some tests – Rick will present

00:18: Rick: It seems we are entering into a different realm of experience compared to our ordinary experience – it's not the same as plugging in a Magrav and looking for savings, this is a whole different realm of experience with these Magrav spaceship systems – the fields can be felt easily – often expand out of the building and into the atmosphere above showing glows and lights – the interaction with the emotional body of the system and the ways we can interact with the device and the environment – I think we become awakened in a way and can feel the feeling of the fields...

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

00:20:35 I think the key phrase is this “FEELING OF THE FIELDS” – can one feel the fields, and what does that feel like, and can one determine the extent of where the fields go and the membrane to where that field extends to? – Can you sense the membrane or skin and sense being outside of the skin? It’s a different world when we are feeling fields than when we are thinking in logical terms, because we have to be focused in the fields and the emotions in the fields – this is something we all have to learn more about – We have to learn about the emotional realm, and receive more objectively and clearly different situations... (KfNZ comment: Sounds like somewhere I want to go to ‘a different realm of experience’ thank you Rick for your brilliant summary e hoa!)

00:23: MK prompts Rick to explain on the 2 experiments today, roughly what we saw the experimenter achieved – like feeling the feeling of pain – Rick: Well someone may feel the fields of other people more clearly. MK asks Vince if there is anything he wants to add. Vince: With the system over the last month or so the increase in the awareness of the people have really increased – The person in touch with the craft has been able to see people and know what they are thinking – The emotional interaction increases the sensitivity – Rick: Yes, and it leads to zero-time communication like answers received before the question is asked – MK: Reading intention without speaking. Vince: What is telepathy? Is this the emotional interaction? Rick: The feeling of touching the skin is invisible – Not really there but it is there in the fields – So it’s not touching physicality, it’s touching fields. MK: The test with the banana was interesting. He could taste and feel the banana in the water – We don’t carry food in space (KfNZ note: See Armen’s recent post on his Facebook site 9/3/16 on how to make a GANS meal)

00:30: We are reaching to the position of the first spaceship in which people can feel when they are within it, confined by the fields.

00:31; Renan explains about a friend who had an experience of levitation – He was resting on a couch, with a star formation 1.5m away – It was 1 AM and he was resting waiting for a friend. He felt in a few minutes a stream of energy pushing him upwards – The blanket was still on his back but he was pushed up very quickly – He panicked and tried to remove the handkerchief off his face – He was listening to MK teachings – When he removed the handkerchief he could only see dark space and he panicked wondering how to get back on the bed – It took him many pulls to get the handkerchief but could not do it at first – Eventually he pulled it off and the light came back and he was back on the couch – He thinks he was very relaxed listening to the talks, the place was filled with the magrav fields from the star-formation being 1 month in the house – The fields are building up – We are now testing this again and making another star-formation to build up the fields – this was our wonderful experience! We would like to do it again with a group – We are learning to read each other emotionally – We are excited to do this research.

00:36: MK: This is a good example of how people need to get together in groups – We need teams to develop the spaceships – Teams who are together in the physical, mental, emotional and spiritual. One of the teams will breakthrough to the first flight VERY soon – It cannot be stopped because it is in so many places, and shared openly.

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

00:42: We are preparing a visit to the Kf China then the meeting in Dubai – Then we go to another state in the UAE and we see how we go – Then Ghana, Africa – All in collaboration with scientists around the planet. I cannot go personally to all places, but Armen, Rick, Vince and the others are doing it...

00:44: MK goes back to the SA arrest and the subsequent uncovering of the pedophile networks – The people who brought him to the Kf originally were using their technology to lure children to the site – 20,000 names are on the documents released by SA – (The first one to come to justice being the Supreme Court Justice Scalia). The person we call the Red Circle brought SA into the Kf originally – now police and Interpol are moving into Europe to investigate – The people in Europe have moved to Germany – We are watching this closely – We brought these things to the Police 2 years ago and it went nowhere – was blocked – But now Interpol has created protection for us – and are moving in on the pedophile networks – A high-ranking member of the ESA and people from CERN will be arrested soon – These people have used scientific posts to lure young people then they identify the ones who are vulnerable. This is all opened to Interpol through the arrest of SA – The son of the King of Belgium is involved with these networks and is closely involved with a Belgian nanotechnology company – The man who came to poison us (MK, Carolina and Ruben) in N Italy has a son-in-law working for this same company – Now you see the link – They have killed scientists by luring them into bringing their technology and then stealing the technology and getting rid of the scientists – Now the circle is fully complete and completely clear as to how it is organized. For this reason, we now expect a few accidental deaths of prominent people in Belgium and across Europe – Red Circle is the Key to the whole thing – The two women (presenting their complaints on YouTube about MK) were brought in by Red Circle to testify against Kf from USA– They have been brought in as a decoy to take attention off SA’s arrest in the USA and he is talking like a parrot! We have to protect our children – Very soon we will see those who are connected to child molesting.

00:54: Going back to the Red Circle, he was the only one apart from Carolina who knew of my travel plans when I was arrested in Canada transit for 11 days of interrogation. We also see that he is responsible for the King of Belgium coming to visit me in a Café in the Mountains of Belgium so we see the Red Circle is highly placed and well organized. Going back to the teachings from Iran at the time, there was a phone call to him from the Office of the Prime Minister, and when he took me there he was able to walk through with no problem. He knew the place and was a part of the structure. This brings us to the key point – Red Circle knows that thousands of children have gone missing in Belgium, Germany, South of France, etc. – Red Circle knows where the graves are – If he knows how to direct the King of Belgium to meet me in a remote mountain Café, then he knows everything – We want the address of these graveyards so we can be rejoined with our children. MK asks Red Circle to be man enough to come forward and tell where the children are buried... There are 50 cases from France we know of – We know where over 1000 children are buried after abuse by the King of Belgium – Some from Holland – They should be buried with respect!

00:57: MK talks directly to Red Circle: We know you and the man who poisoned us in Italy were born in the Belgian Congo – You both came from the same place and were involved in the same structure – Opposite of where you live now in the London Tower in Antwerp, there is a new school for youngsters!

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

MK asks Kf supporters to go and look... they will see it! It is the responsibility of Kf followers to follow the procedure – The Pedophiles are on the run and trying to destroy documents but it won't work – Back to RA – there is a similar profile on you and SA – etc. – We do not make accusations – We only know SA is talking... MK goes on taunting Red Circle at length – and seemingly knows everybody he is writing to – the Germans, the Police in the UAE the Police in Italy, the Army in Italy – “We are watching you very closely – now the governments start believing us because the man is talking and they are checking!”

01:05: The only thing I am asking you Sir – give us where you have buried the children, or tell the King. Now we have to hand over the children.

01:06: If you are a scientist who has been threatened or had assassination attempts or threats against family – get in touch with the Kf immediately – There is a structure with Interpol and UN – You go on to a specific site and you can travel securely with protection from Government security forces – I have personally tested it – This is how we travelled to Dubai – For 3 years they told us that if we move they capture us and then we go back to Belgium to be killed – If you don't know how to do this, get in touch at security@keshefoundation.org. We are there to support you we will give you space to develop your technologies and we will fund you under the One Planet One Race One Nation structure.

01:12: MK continues his diatribe against the pedophiles in the Red Circle. The man in the US is accused of 41 cases of sodomy! And he has stated in his defense that the children wanted him to abuse them – This is how demented (and evil some might say) this man is. None of you pedophiles can now travel internationally or run away – try it! People who have children missing, go to the London Tower (Red Circle's residence in Antwerp) and ask where they are. Chief prosecutor in Italy is into this and other nations are now realizing.

➤ YOU DON'T PLAY WITH CHILDREN

➤ CHILDREN ARE SACROSANCT

➤ CHILDREN ARE ASSETS TO OUR LIFE AND OUR FUTURE!!!

Because you thought it was your right to do so – now we are taking you on! I've got the first one and I've got the 2nd one. Now I'm going to get the whole lot of you (KfNZ comment: All Power to You and the Keshe foundation Mr. Keshe!)

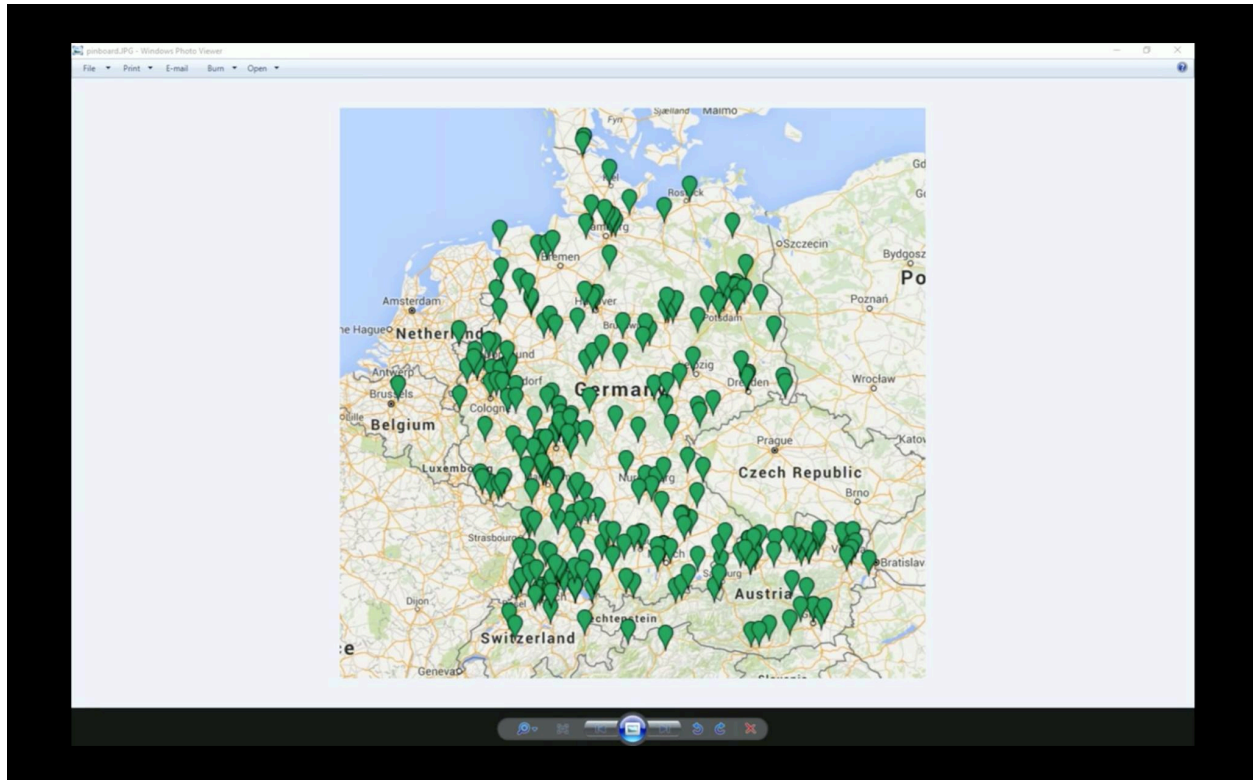

01:20: MK talks directly to President Obama and asks him to open Guantanamo Bay in Cuba – send the REAL terrorists (pedophiles) there – We will talk deeply with leaders of world governments about this – They know we are correct.

0121: MK asks Rick to bring up another topic because he is ashamed to have to talk about such a thing – Rick: OK – Time for Klaus and his health unit – Klaus?

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

MK comes back on and explains the Kf is huge in Germany (and Austria) and there is a map showing where they all are so they can find the nearest help and assistance. Picture comes on showing Kf supporters in Germany Austria and Switzerland (see map)

These are only the ones we know! This map was done by Dominique one of the German language teachers. Germany is in a unique position – has no oil reserves partially dependent on nuclear power (but the people are against it) and ripe for development of the Magrav technology in a big way – MK talks about 2 Magrav systems that have been established in schools with years of power accounts and showing a 20% reduction of consumption in one month – We are going for 33% and testing a new system in the next 48 hours going to 60%.

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

(KfNZ notes: On the long-haul flight from the deep South Pacific to Los Angeles, we managed to make notes on some more of Workshop 103 – not complete even yet as this workshop was over 7 hours! The picture below is of the PLASMA ENERGIE TEAM – AUSTRIA. Then there are some more results on the River Water Cleaning experiments from Benjamin in Ghana and Dr. M. from Kenya with MK's explanations.)

01:26

Klaus from Austria with energy team present, we are proud to introduce a new member of Keshe family – health device – plasma Tree – Presentation. Keshe Health and Food Unit. We see it as a tree because as soon as we stand between the body parts the idea came that not only production of CO₂ can be compared with leaves, but also the whole device is a tree. The trunk is the copper the housing, the bark is the nano-layers, on heat, and the branch and the twigs – the plex glass holder that hold the coils, the coils are the leaves. We produce the whole wood, 2 trees, one more powerful, and the smaller less powerful, then when you stand between, yes, a very powerful wood with the plasma flow through your body.

We used mostly copper and Plexiglas – We measured the temperature and we wanted to know what the temperature was – It was 340 degrees. We used a special way of coating – The whole copper stand –

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

and we coated it with GANS from top to bottom – There is definitely a plasma flow between – The giving and the taking out – We used copper because we are used to it – The first layer of copper fell off because the copper had a special I layer and then we cleaned it – The coating process was perfect.

Klaus presents the Modular System – Beautiful job, with the giving part and taking part separated in Plexiglas... very nice – Then presents a beautiful plasma helmet with nano-coated coils . Makes me look a bit crazy – ha-ha. MK says “no it’s beautiful!” Klaus demonstrates how to breathe in and take what you need, and breathe out I give away anything you don’t need anymore. If you measure with a voltmeter, it goes I to 300 mv and down again. This is like a creature breathing from 2 plasma trees that communicated with each other.

01:46: MK congratulates Klaus – this is a system we have done and it’s beautiful! With this device people will be healed of cancer in seconds. Klaus says thanks – and then tells a story of the Keshe Health and Food Unit first volunteer – A member of our family will be our first crash test dummy because she has an indefinable cerebral tumor (right side of head) since ten years and at the left side (arm and leg) a spastic hemiparesis. Additionally, epilepsy. There has been no chemotherapy, she did not want it. Doctors never found a cancer cell. She said it’s OK to show a video of her – so we will document this case – Shows a video. She has been with us from the first second of building the device and looking forward to the plasma world.

01:50: MK asks Klaus to get in touch with the Kf Germany and link up under one roof, as part of the development – These teachings have to be linked – Please put it under the Kf Banner so we can give exposure to it – This is fantastic, it’s beautiful what you have done and we have systems in place.

MK says they have 10,000 Kf groups in China – this is huge – This is a blueprint! Thank you very much – The epileptic attacks can be stopped within a few months with a particular approach, and we see large reduction in the tumor from this technology – So the reduction in seizures come very rapidly – Her left hemisphere should not have any coils as its attached the right (good) side of her body – and on the right side of the brain with coils – MK has put this equipment on people for 15 years and seen people walking and talking – and this is how to do it. You only put the reactors near the ear and go to the surface of the head – None front or back as well.

01:58: MK draws on Klaus’s helmet which cores to have coils in, only 3 of them – two on the affected (red) side of the brain and then 1 (green) on the good side of the brain. Then you direct the flow – see if you can open these first – free up the hand first (treat the parietal lobes first for improved body function) – do 2 or 3 weeks to see if you can get the hand moving , then you create a flow which is draining into it , you only take from it , gravitational rings and not magnetic rings – so you take energy away from the tumor cell – you empty it out – put 2 facing gravitation rings in operation – gravity means taking so you end up with a tumor that is drained – then the center you change the GANS on the coils – but do not touch her with the body system – only the brain system

02:01: Vivek from Singapore question: Put half strength on that? How do you do that?

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

MK: Pardon? Vivek: With the coil marked in green on the taking side of the brain – you said to make that ½ strength, how do you do that? MK: with your batteries – I use different size magnets in my system, but this is determined by the batteries – The number of turns marks their power, so how many ?? MK describes how many twists, and how many batteries – You need to decide when to feed and when to take – For example if you treat the paralysis first, you feed it with energy to repair the brain, but when focusing on the tumor you can dissolve it by drawing from it with gravitational coils – You have to target – If you arrange your helmet properly you can get a person out of a coma overnight.

02:06: Epilepsy is switching on and off, the tumor is sitting in the brain – putting pressure on the hand and arm, the brain tries to get rid of the pressure – the cause of the shake is the tumor – It's a build up of megabytes of information that build up and then release causing the convulsion in the brain.

***** STOPPED HERE *****

02:13: This is fantastic quality and correct – Others out there not so correct – There some Dutch pens being sold with no credit to Kf – These should be certified then wear the logo of the Kf – The stand is made perfectly – When standing inside it you need to decide what to give from magnetical and take with gravitational – make a connection, each coil is both magnetical and gravitational ... but it sets up a plasma flow with the power into the coils.

02:16: MK requests Klaus to make another one for the Kf Hospital – and he will teach how to tune the coils to treat fibromyalgia and Alzheimer's – This looks very 1960s with the copper and electronics– Absolutely gorgeous what you have achieved –

02:17: Klaus gets the MRI and shows a large white tumor on one side of the brain – MK says this looks like a mobile phone tumor – He has seen these before – You must use the 3 reactors adjacent to the tumor – create one to feed and one to suck it out – Also, you can attach magnetical to a sink then you can drain it out. 1 magnetical on one side and 2 gravitational on the other side – the 2 gravitational being fed by plasma batteries to be gravitational and the other magnetical connected to a sink – The plasma goes through the tumor and then only one way to go into the sink. The other way I do it is take pieces off the tumor – The first thing you see is a reduction of epileptic attacks. 02:30: You also need a doctor associated – I have a doctor I can bring in who will support you – We have some doctors in Germany, and Belgium – Klaus: Thank you very much

02:31: Rick has some questions about the sink – Is this a salt water sink? MK asks for Vernie... Vernie! Renan? Not available right now, MK goes back to the stand – With a kidney problem you don't use the top 4 coils on each side. If the lung, use the top four, then you decide. If you are doing an arm or a leg, don't do the top... Make sure to get a doctor ... Klaus: We already have an interview with one tomorrow – 3 other members of the Austrian Dream team say hello and goodbye to everybody.

Rick: These are standard copper or zinc coils for the brain? MK: Copper nano-coated and GANS with CO2 – It's the emotional that will dictate the system even when treating the kidney – You don't need the technology, but we'll come to that later...

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

02:41: Benjamin from Ghana: Comes on to show correct statistics from their presentation last week of the water cleaning data – They were not entered into correct columns. Have now been corrected – Kf Ghana Agricultural Corrected Water Treatment Results – Ghana Atomic Energy Commission – A lot of things have been corrected – B shows a picture of the natural hydrological cycle: rain on the trees, then water from the trees – Our body is 70-80% water – and the rest is COHN (or Mr. Cohen???) . 2 rivers tested – Benjamin recommends a book by Jerry Tennant about fluoridation – This is VERY harmful to people especially in the higher levels some countries have – The Rivers in Ghana are too polluted to drink as well – The Ghana Water Treatment company has closed, so we need a proper system – It has to be 1, disinfected, then coagulated and flocculated, then sedimented, then filtered and then treated with a corrosion control process – Shows a design for a treatment system – Chlorine has a drying and aging effect on skin and hair – ages more quickly – So better to filter out the chlorine and fluoride, etc., etc. – The rate of cancer in those drinking chlorine is 90% higher – recently shown in studies – e.g. JM Pryor – Chlorine is one of the greatest disease forming causes – Dr. Wallace agrees – several scientific projects presented showing similar findings.

02:56: While the sediment is sinking, you also must deal with the heavy metals like Mercury. The upper part can be used from drinking water – We have corrected result from the treatment of water with CO2 GANS – The turbidity decreased from 200 to 30 in one sample and from the River Pra from 206 to 4. Color 200 to 20, or 200 to 1 – in the two samples should be less than 25 with WHO guidelines. – Reports all values are brought within WHO guidelines for safe drinking water. Nitrates reduced sharply e.g. Pra 53 to 0.002 (recommended 10 to 45) Phosphate 0.63 to 0.034 or 2.06 to 0.012. Sulphate reduced. We also analyzed the sediments and next week we will come out with all the metals we have analyzed – Thank you very much...

03:05: MK asks for details of the stats – Discovers that the conductivity is reduced – Indicates removal of metals – We are analyzing the metals in the sediment. Can identify the levels of iron, copper, calcium, zinc, manganese, lead and other metals – Alkalinity Fin control 45 to 7.5 Pra control 6.5 to 10.5 turbidity: 20 to 32 and 266 to 4. This is increasing clarity of the water – Salinity 0.2 ppm to 0.1ppm and 1.1 to 0.1 in the Pra. etc. etc. Fluoride: Fin River 0.015 to 0.011 – .04 Reduction. Pra River 0.003 to 0.001 the maximum allowed is 1 – Na 17.9 to 13.2 and Pra 85.7 to 16.8. Guidelines 200 – Total hardness reduced well under WHO guidelines. Nitrates 0.406 to 0.318, Pra 0.53 to 0.002. Phosphates down. Sulphates down.

03:22: MK asks why there is such a difference in the ratios from Aufrin to Pra rivers tests – Benjamin explains the Aufrin River treated with CO2 and the Pra River with CuO – So the CuO is more efficient but costs to produce whereas the CO2 costs nothing. MK asks if all the items are beneficial to be withdrawn – Some of the minerals are needed for nourishment – Is this water OK for consumption being void of everything? Benjamin says the water clears within 1 minute – Quicker and better with CuO; MK: What we see here is more or less in line with other reports – We pass it on to several governments that are working to clean their rivers – What we see is that CuO cleans and CO2 creates life – If you need totally disinfected water the CuO is best.

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

To decontaminate from radioactivity, CuO is virtually our only solution. MK asks them to do 2 more tests for germs and bacteria and test before and after for these parameters. Would be good to test for radioactivity as well – Put some radioactive material and then test it – We need this technology as there is already a lot of nuclear contamination, not only Fukushima but also other places like the coast of Italy. If you see residual from CuO, you add CO₂ for a second pass and if you have mercury it will turn to gold – This is what is happening in Fukushima – We are planning to do these tests with the Chinese government very rigorously – There is a lot of mercury contamination e.g. in Kazakhstan lakes – CO₂ should clear from microbes – We have tested in Sierra Leone: it clears from Ebola and E.coli. Ghana Rivers where there is gold mining will have a lot of mercury – You can extract the gold just like Tepco is doing it from their storage tanks

03:52: If you put CuO in a container, add water, put your seeds in another container of water and dip them into the CuO contained – leave them for 15 minutes then plant them – these seeds grow much faster in drier conditions and these seeds tend to go back to original genetic condition

04:00: Dr. M from Kenya living in the US repeats his potato results from the agricultural blueprints workshop. Just from dipping in CO₂ GANS for 5 hrs. before planting – MK says if you water the plants through a nano-coated copper pipe they will grow much faster – of your water with CO₂, you use much less water – and your harvest can go up 3-5x, and cultivation time goes down by up to 30% – MK organizes some liaison between Kenya and Ghana – MK is asked if he favors GMO crops MK: No! – What about using nuclear radiation instead of gene splicing? MK: When you use the CO₂ you will get what you are looking for – No need for radioactivity bombarding – If you use the CO₂ and you don't get results with the seeds, use CuO – This is not radioactive pressure, it is magrav – The seed will modify to do what it needs to do – The nuclear energy forces the seed or the energy with the new technology there is no forcing – If you don't get a result from CO₂, go up one level to CuO – There will be no need to go heavier – The nuclear radiation adds energy but the CO₂ has a better effect and gentler – Especially if Zinc oxide present in the CO₂.

04:13: Discussion with Dr. Nana from Ghana re getting the information spread in Ghana – Talking to the Nuclear Energy commission. MK: Make sure there is no salt in the GANS mixture for dipping the seeds – but try it with salt and without salt to see the difference

04:20: Benjamin gets his last picture up again – a project in the pipeline – Feeding seed beds with a nano-coated pipe, and each bed treated with different combinations of GANS treatment. MK wonders if Benjamin can connect with the South Sierra Leone university and cooperate in organizing tests

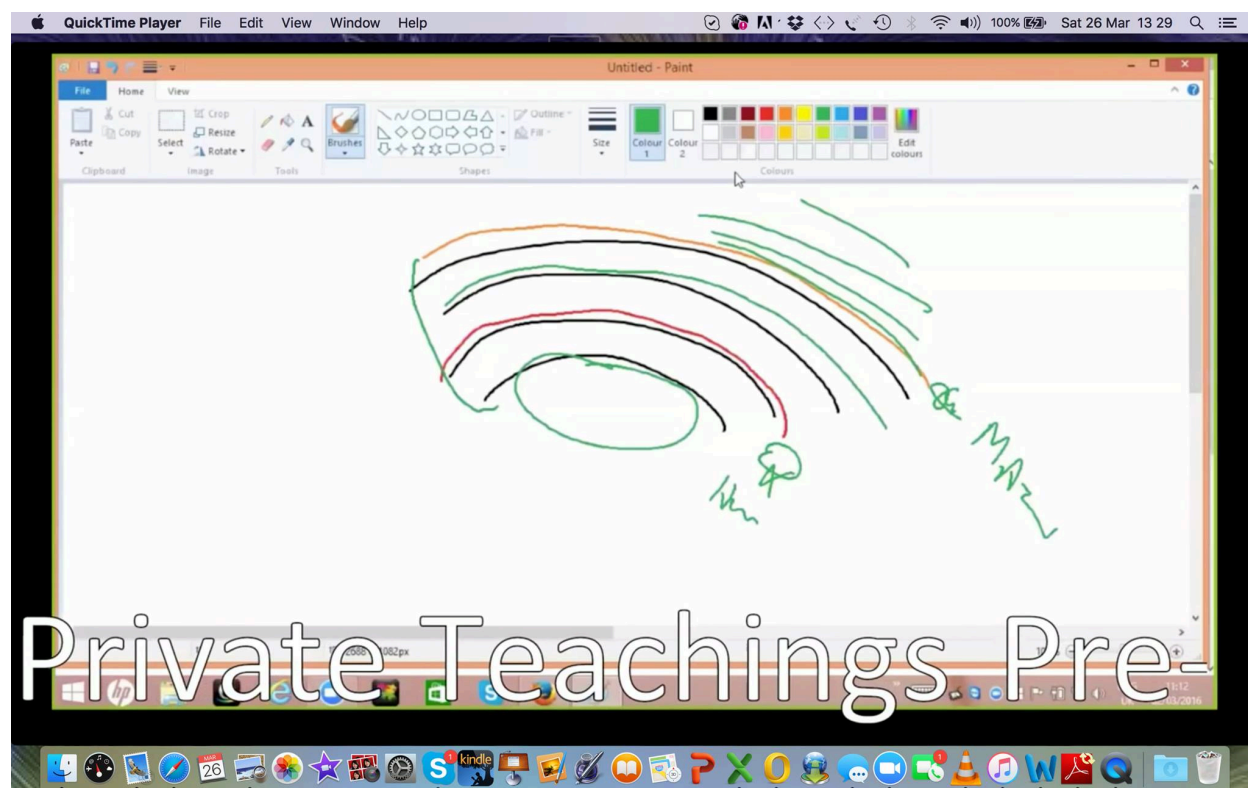

04:28: MK stresses again the importance of testing the radioactive cleanup as likely to be some nuclear contamination in America as Nuclear stations on fault lines.

04:30: Rick – I think it is time to go into our teaching yesterday about universal communication, use of emotion in communication – This is the highest level we have reached in 2 years of teaching. It's no use going to space if you can't communicate – Spaceship construction is developing very swiftly and we need to catch up on the communication teaching – There are many of you doing some mental and

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

emotional testing – Some space agencies are testing these systems and they need to understand the gift of communication as well – So you governments that are proceeding with the research, you need to know – You can't act like Americans and react with aggression and guns or you will not last long – So you all need to learn the way of communication in the Universal Community – Those who laugh are showing their lack of understanding – This is the blue print of the space language – for the spaceship program – We are about to produce crafts out of the plasma – Just like the sun has a skin, if you contain the plasma, it will create its own surface – We have entered the time of free space travel with no need for food or water, etc., etc.

(KfNZ comment: The picture is MK's drawing of the different emotional levels of the brain with their respective magrav field strength seen as different colours in the plasma... This is the last part of the Monumental Knowledge Seeker Workshop 103 which was an all-time record of over 7 and a half hours! The first 2/3 of the Workshop I made notes on before spending a week offline in Mexico, and it has taken me almost 3 weeks to get to the last 1/3 of this workshop – which turns out to be a recording of the previous day March 2nd, Private Teachings, which were about the Blueprints of Communication with the Universal Community. This recording with the interactions between the Knowledge Seekers and (Masters in their own right) Students at the SSI runs very deep and profound causing MK to ask Rick to publish this one on the end of KS 103!)

04:30: MK: We will now go onto an extremely advanced level of technology with the interaction of emotion and control of universal communication, sounds like nonsense to some, but those who are advanced will understand. We will dictate what we have in space. This is the highest level of teaching in

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

2 years. This is because many scientists are beginning to understand how we communicate in space. We are in final stages of showing the full space ship, how to feed yourself and know how to communicate. Hence we have asked Rick to release the private teachings from yesterday (for the first time) something about 4 hours of teaching – This is important to maybe go back on it in future and study it. This is for those who are testing on the governmental level – A number of space agencies have started testing magrav systems. Soon you will come to one of the first things you need is how to communicate – This is a gift for space agencies – We are releasing this knowledge, so if you are ahead of us – you need this to prevent any conflict in space, because your thoughts are read before you come and Americans have a habit of pulling the gun before asking the question – They can read your mind so be careful!

So we are releasing this recording 1. For the Kf people and 2. for the space agencies who are following our way of development – We know 2 organizations are on the verge – but when you open the door you need to speak – we are opening the basis of communications – Those of you who laugh, it shows your lack of understanding – Those students who just joined – in the third term this will come into focus. Last week we released the blueprints for the space ship structure – Now we deepen into the spaceship program – We are about to produce crafts without physical dimensions, the way skin of man is created – Now we are learning the same process to create our ship – The same as is created the surface of the sun – a containment for plasma. If you contain it, it will create its own surface and then you will understand tangibility. You now need to learn how to control it as it creates tangibility – We have entered the age of true space travel without need for supplies for earth because we create it from the plasma – In this process, you learn you join the family. You don't open the door and think 'oh its delicious I want to eat it' – because it will already have eaten you or disarmed you.

What we taught yesterday was the beginning of understanding of the Universal language and understanding the emotion in the brain of the man. Up until now, we always talked about changing physicality, but now we know the core sits in the emotional part – So understanding the color of the emotions will give you the key to the Universal Language. This is the blueprint teachings for the Universal Language – We have opened the door of understanding to communication with the Universal Family – This is the Language of the Universe, the colors of the emotions of the man and other creatures we love and there is no war.

Rick lines up the morning session from the Wednesday before and the last ½ hour of the afternoon session for the 3-year courses.

04:40: MK: I give some more knowledge while waiting for Rick – 1st of all what you will see in the teachings is the way we look at the structure of life in the universe. We don't see arms and legs – these are to carry out the wishes of the emo part – emo part does not have arms and legs, it has magrav fields – It interacts like the sun interacts with the earth to create the colors we know – We see different colors at sunset – gorgeous colors – This is interactions of the fields in different angles – Same with the fields of man and interaction with another entity.

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

Like the sun creates a red sky in the morning or evening, so different entities relate in different colors; though it's the same fields at different angles – When two bodies are at the same magrav field strength, there are no colors. If our color is the same, we don't see anything – I love you – you love me – True love is there when the two fields are the same strength. Anger has a different color in respect to joy – When happy, you are giving and emo is happy – you are in the same condition – This is the way they communicate – There is no alphabet – It is the strength of the diff complemented magnetic and gravitational – We are getting the human race ready for communication with the universal community – You don't shake hands... you find your hand empty – When we are one planet, one nation, one race – then we can walk with the universal community.

Thank you very much – we now play yesterday's private teachings – this gives you some insight into how we teach in the final courses – This is adding to the knowledge with interaction from the students. We learn from each other – This is the first time we have opened our private teachings to the public – we will do this again when necessary.

04:45: Rick Plays the Teaching from Wednesday the 2nd of March –

MK: We are talking about the emotion – Does the emotion come from out of our amino acid or out of the interaction of our amino acid? What I feel as pain, you might feel as joy – Are we all watching the same thing? And giving it different meaning? I give you an example – Sitting with a friend who was saying he went to Africa and was expecting emotion – In the certain African tribe, when they want to greet you and respect a chief, they give the chief something like milk. He plays with the milk in his mouth and spits it on the face of his guest, and everybody cheers at such great respect. Now it's the same thing as emotions – The man who watches as a spectator watching – If you are African you rejoice, if you are Euro, Asian or Chinese – you get sick with it because now you see something not acceptable to our condition. Then you have to put your position to that of the chief AND of the guy who got the spitting – and even there is anger inside you, you say Thank you Very Much! – We are all witnesses in different angles to the same event – The tribesman are happy that the chief has expected the gift, the horrified Euro sitting there, the Chief who is rejoicing in the tradition of an equal man etc. – Put yourself in the middle and try to understand the emotion – MK tells people they need to look inside and feel what emotion they have – is this going to create a war or will it bring you joy? – NOW this is the language and emotion of the Universe – Make the chief from planet Zeus, and the people from the tribe of planet Neptune, and the visitors from another part of the universe – Would we start a war or would we subdue our emotion and realize there is no conflict?

MK draws the layers of the brain to show where the emotions of fear, joy, giving and laughter. Fear is the inner one that brings control. Joy, happy and giving is the outer magnetical – This is an easy way to assess the same situation – You have to learn where it sits and to be correct with it – Fear of the situation is here but can you show you are happy? In space we feel each other's emotions – We are blind to everything except emotion – Advanced beings have already developed and separated their emotion – They are in charge of their emotion – etc., etc.

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

These are parts of the understanding – You have to understand where in respect to you that emotion comes from – Then if you want to land, you walk towards the fear. If you want to fly you go towards joy, and if you want to go zappy you go to the childhood one, which means I do what I like – this is the zone of Ignorance. If you can do this, then non-variable universal language will come to you as second nature – If you stick to the inertia side, you play the inertia game. If you play the universal game, you play the plasma game. But how do you control emotions at different levels? – I want to go faster, I increase the joy – go as fast as you like – Any questions before I lose you again?

04:57: Rick: you mentioned the place of ignorance – Is that the bottom black line beyond the fear? Is that the idea? MK: In a way when you are ignorant, you connect all the feelings together – When you are ignorant, nothing matters so the emotions of the fear joy, etc., is all there – It's a short circuit – I don't care if I am fearful, happy, lovable – it's all the same. R: OK. So you are saying we need to create the separation in order to have the interaction of the fields? Or to create certain effects? MK: Yes. I was talking to Caroline about this – If you understand your body radiates in non-verbal communication, you decide if it's going to be gravitational towards the center of the brain or are you going to go to joy and happiness which is magnetical. Your body creates a physical reaction in respect to our emotion.

For example, the couple who had a boy after a few girls – It was well planned – naturally done – certain part of the cycle the temperature goes high and 3 days before that if you conceive 100% chance of a daughter (or if later a son) – This is the difference of few degrees of temperature – Getting ready to reproduce – if you can create this emotion in your body you radiate and attract – etc., etc.

05:06: Student comes on – Difficult to make out his name sounds like Zaizonair but later may have been referred to as Eisen – Has been away for a couple of weeks – Says he has never considered the idea that emotion has inertia – Does fear have more inertia than joy? Or is the intensity of the emotion that creates inertia? For many years, he meditated hours per day and was able to hold an emotion for hours – It was good training – so he would consider meditation valuable in learning how to navigate emotion with a control panel, so the emotion is not in charge – Rick: So how does inertia figure into this? Z: Inertia can go either way – It has a tendency to stay there – So the joy stays in spite of a quick change in circumstances, etc., R: So where was the inertia? – Did the emotion have the inertia? Or was it the attention on it? Z: Actually that's a good question – I found how to operate out of the higher field strengths that are higher field strengths than emotional – therefore a lot easier to switch emotions at will – The higher strength is always in the center of the donut if we look at the soul structure – Then also correspondingly, the physical correlates to the emotion in the brain. It is also like a dynamic donut torus – the hole is easy to feel so if I put my will into willing to be in the higher field strength – the intensity is strong – it is getting used to the intensity of a field strength – When in the higher field strength, it is almost like tunneling or a fiber-optic cable in there that can be accessed – I'm going all over the place – back to the funny bone ... etc.

05:17: Denny comes on and makes some comments about sensing – e.g. He senses he has to go to the bathroom – etc., etc. Yes and the sound of a waterfall can trigger that emotion very quickly – Yes, that's a particular field strength of emotion with instant response – More discussion regarding different parts

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

of the thalami and how they relate to emotion. Z thinks its development of the will that is paramount in his self-training in his meditation – We have strong wills stronger than our emotion and physicality and this is a high field strength R: It seems you are talking about volunteering something and making it conscious – like where does that will come from? It's probably not from physicality – it must come from essence or spiritual place – principality strength – much stronger and less illusionary – so it seems voluntariness or re-initiating ones will from moment to moment is important to bring everything into the conscious realm – Z: Yes that's brilliant – re-initiating one's will R: Yes and it has to be moment to moment – Something initiated in the past may not carry through. It needs to be created from moment to moment – One of the jobs of being a creator is remembering all the parts from moment to moment because it's a moment to moment Z: Maybe that is the way you overcome inertia of the pre-programmed matrix ...

05:24: Stefano: Understood with his friend one very simple thing. If I clap my hands you recognize. If I whistle you recognize. MK: How do you whistle? S: Our brain recognizes how to collect data and recognize different things e.g. a knife and a spoon – So we compare the data and define that this is this; MK: What is a spoon to you might be a fork to me – Let's take it a step further. You have to remember the biggest way to judge information is your skin. The skin of the face detects different emotions than the skin of the hand or the foot – Do we use the right hand for laughter and fear with the tips of the fingers on the left side? Because this is the gravitational side where we take in? etc., etc. Try to look at all the angles until you can directly recognize in the brain. Keep your face straight and send the emotion of I love you – What response do you get? Extend the teaching from last year when we sat and moved things with our minds – Now send ideas – e.g. I want to tickle you – See the response – Or you can send your child the thought “I love you” and see your child come to you – This is how you control your reactors – Now your antenna is your brain – I want to go left – I want to see my uncle – What do we read in the signature of our fields and emotions? You see I don't teach you this – I leave it open – Silence – Stefano: The main job is to recognize the emotion and compare it with another – Then I can recognize the same thing outside ourselves – like recognizing part of ourselves – Because you know the exact shape inside ourselves of that emotion, then we recognize if it comes from outside – At least I am building up my database of emotions in this way – Paying attention to the moment of feeling it and comparing it, etc., etc.

0534: Rick: Yes. We also talk about the way we greet anyone in the online teaching – You are very enthusiastic, saying hello for example: Stefano: Yes, first of all, you have to have peace of mind. Then you can build up – If you are peaceful in yourself, you can analyze any emotion that passes through you if you are in inner peace – R: So how does the emotion of enthusiasm or joy tie into that? S: For me I am accustomed to it; I know what it is – D: So it's a baseline of peace of mind first? S: Yes. When you collect a lot of data about your feelings – more discussion about the subjectiveness of emotion. MK: K lets put a measure to it... We all buy distilled water. A lot of you have seen these machines that reflect the emotion in the water – Now all of you in the team get a clean glass and some distilled water from the supermarket – Now see what your emotion makes in the water – a cup of love sign? Rick brings up the

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

idea of the mood jewelry that makes one feel certain things. D: O2 has magnetic properties and that's what water is made from – Talks about the impact of will on water structure

0542: MK: OK. What about 4 of us sitting around a cup and influencing it with group mind? I try to walk you on the plank so you do it not me – you understand? Nowadays, you train for years to be an astronaut – What about we create a cup or water that we make a standard for it – a: I'd like this b: is this science from the water c: happiness is this I don't eat you? Water is of the earth. Our brain is not water, it is GANS state. What about if we create a cup of CO2 and our brain is based on CO2 with a bit of zinc oxide as a GANS – What about if we make this is the standard? This is the speed of rotation of giving. When it expands to this size it is very giving – lots of love, so we create a GANS universal Magrav language – You see where I'm taking you – trying to understand the language of the universe through the fields and the field strength – We don't carry a vocabulary of words, it is more a vocabulary of emotional field strength . Do we start classes and the procedure with ourselves where we start learning the language of the universe? Does your emotion become like a sun and everyone then sees it? This is where I am taking you. Then the way you give dictates that you are prepared to receive so much – You don't need to speak a word, your emotional state tells the story – not As, Bs and Cs. As a race we feel the fear of the end, and collectively with what is about to happen we are emitting the sign collectively as a race. We feel the energy we are receiving is increasing to where we can't sustain it, so it is perceived in the universe as an SOS...

05:49: Soon large numbers of you will be creating systems of lift or magrav positioning in space – Lift is in respect to the earth – and as we move into different cultures around the earth, the same we move into different cultures in the Universe – All is perceived in terms of giving or taking – I am walking you into 2 directions with your emotion 1. Trying to teach you the universal language 2. In controlling and talking, you can do the driving as well and where you want to go with it – When you sit behind the wheel and you accelerate, you don't stop everything else – Now in space you have the same – One part of emotion is to dictate where to go and the other side is to understand how to communicate.

0552: Tony Haman (?sp) comes on with a joyful attitude and a lot of laughing. MK: explains Tony's laughing – 21st of March is the Iranian New Year a few weeks from now – The tradition in Iran is to celebrate this day as the beginning of the spring – Over thousands of years, Iranians have measured the entrance to the Spring within the second – We measured it for thousands of years – sometimes in the night sometimes in the morning – the time of revolution to the next cycle – The celebration starts from days before 1st and 2nd of March – plant seeds and by the 21st they grew into shoots – So the New Year celebration starts from 1st March – This used to start with Ch now starts with S – which means we put seven items – seven things starting with the letter S – Sa-day(sp?) is one of them which means the beginning of the life – life ready to live, because today 1st and 2nd March we start getting ready for it.

Also, the other things we put on the table – Tony: It gives me another reason to celebrate – Very magnetical – gives me joy – brings us to the round table of discussion that I've been enjoying with these teachings – and going back to the 26th of October when you shared with a lot of people – most of us in matter state, 5% of the population in nano-state, 1% on GANS state, then Plasma state 0.001% or

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

700,000 of the 7 billion on the planet are in that state. But if I understand correctly we have to be beyond plasma where we can manipulate the plasma, and that's where we become the pilot MK is talking about. So to be a pilot as I was listening to Rick and Eisen – they were talking about a wheel. GM field is so powerful and the human intention is so powerful that if we are aware of the human intention, we are the pilot sitting in the space ship beyond this galaxy. If I understand correctly to manipulate the plasma our intention... The way I understand, we have to be aware of these different colors which reflect the emotions in our brain starting with fear and going to joy – It is all by the GM field that we can manipulate the plasma – So that awareness is our intention where we gonna go – ascend or descend – So knowing that what Eisen was talking about, he drops his heart and he is feeling, not thinking, so ultimately he connects to that infinite field of cosmic consciousness which is plasma, and there we pick up joy which is magnetic, and that is a key he uses to manipulate the GM field – That is one way to tap into the plasma and then with your intention to go where you want to. We have all seen the human torsion field. The center of it is in the heart so no matter where we go in the Universe we have to understand where we are – So using the physical body which includes heart ... and the center of the torsion field is the heart and free of...

MK interrupts: I am going to throw you a very big stone Mr. Haman – I hope you can catch it! I hope you can understand it – At the moment we have a digestion system which is there to convert matter to the body. At the moment we have the lung which converts the energy of the gaseous level to what we need – We eat a very little compared to the energy we take with the lung – which breathes 10-30 times a minute – on average 1-2 Liters per breath – You try and do that with your stomach! The point is when you learn how to absorb energy from the environment, you lose your mouth and your lung, no stomach no lung – you have no need for the heart – We don't pump any blood into the head if we have no head – We have no need for the heart! Is there a need for blood circulation? Eisen: Clarifies when he goes into meditation he goes into soul – higher field strength than the heart. MK: What he is trying to explain – when we become travelers in space, we become aliens because we go through the evolution – We will have no heart because we have no need for heart – Not eating so no digestive system. So is there no need for a pumping system when there is no pumping needed – and do we lose a part of our physical brain? – Because when we lose our digestive system the structure of our brain will change

Tony: Perfectly understands MK: Interrupts again – How do you feel? How do you see with these changes in our structure? We are the decision makers. We will decide which way goes the changes – You are the group in front of all the others – This time the evolution is decided by us because we know what is to come and we will decide how the human race will look – You will see the monkeys pretending to be cultured beings – At the moment there are maybe 20 -30 of you and the rest of the 7 billion is unaware of what is to come – Now you lot are prepared to go into space and learn the language, a different way of absorbing food to sustain physicality – You don't breathe air so don't need a lung – Man will change beyond recognition in the next 100 years – Zome fingers and feet will go and the brain will reduce in size as it needs no blood circulation or nerve system, now there is no cancer, now the man becomes the man in space. How do you understand the structure of the human body when you become the true man in space? – I often talked about this beautiful woman who wanted to become a harpist at the age of 5, and

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

in 15 years she made herself with long fingers and hands and a certain posture – A good example of how man will change his structure with his intention and the emotion he needs to survive in space – None of you is ready for it but this I what will happen

06:10: Tony: That brings me to the second part of your teaching in October when you introduced Carolina to teach how to create a plasma ball in your hands – a free plasma – what the science of space ship technology is all about – to create a free plasma – sS with the human intention as the pilot, we have to know where we are going – The way I understand combining your and Carolina's teachings, creating our plasma – We place our intention into the plasma through our left and right hands – Then, Carolina did not cover this but I want to bring it up – We are living in a vibratory system, so everything is a wave. With the human intention, when we drop to our heart, we know where we are going from the physicality – For me when I drop to my heart, I am free of any thoughts – So for men, right hand is magnetic and left hand is gravitational. When you interact these fields, you create a plasma ball in the center. So we live in a holographic universe, so with our intention when we create that plasma ball, the intention is to collapse the holographic waves – You don't need to analyze which color is which – You just collapse the plasma and you ask it what would it feel like to collapse the wave now and let the plasma answer – and everything will collapse – fear – anything! So that's where we start – It's a level ground – We go back to our intention, the pilot comes in – putting absolute joy... MK interrupts, says STOP STOP!

06:15: MK: You missed the biggest point of the teaching and that is one of the reasons I brought Caroline – I gave you a rope and now you are hanging yourself with it! Tony laughs! MK: So I have given you the rope and I see how far you want to hang yourselves all of you! You put your 2 hands out and created the plasma – and we see a ball which gives and receives – Have you ever thought I made the plasma to be my soul and move my physicality inside that plasma and wherever I need to be I will manifest myself in the physicality of the dimension I'm in? – A lot of you missed it – Tony: That's the Intention! MK: That not the intention, that's the only solution! Eisen: I would say it's not an intention, it's more of a willingness. MK: No, it's not a willingness – it's the fact of the reality. Stefano: Mr. Keshe, can you repeat the concept please. MK: It's not a concept, it's what you have to do in space. You see a lot of flying light bulbs – A lot of you have reported this (orbs). These are the entities that have managed to convert to the plasma of themselves – the passenger is inside the plasma ball – In a way, these plasma balls how Caroline showed you, you are creating your new jacket and in a way you become the sun, where within your emotion you control yourself. The question is – is the sun the reality of the jacket of the entity that in radiating itself manifests the rest of itself in the human body? In a way when you create and control this plasma, it's like the clothes you cut and wear – Now we go to the next step...

06:18: Some of you will understand why you are around the table as we go into it – We know the soul – As I said once, hello friends we have known each other for a long time! But now we speak the language of the man so the man can do the whole process – Just like a bunch of people in the theatre – we have rehearsed enough, now we show the show – None of you are here by accident – We use the language of the man to teach the man the evolution he has to go through – Let's take it a step further – We came out of the light and manifested into physicality – Now as we create a ball of light, will we go back into it

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

with the full knowledge that we don't need anything else and we can become any sort of physicality we like? In a way it's clothing ourselves and we become part of the inside of it – Then with what we emit and receive, we find balance with the whole of creation... Are we with this plasma ball creating a new home? Then, with what we are prepared to give and receive, we find ourselves in our jacket like the sun and the earth – we find our position – If man understands this, you have entered the true universal understanding of the condition of the travel and correctness and fairness.

Tony: Thank you for reminding us – Laughing ++ Denny reckons he is probably here by accident. Asks about the little ball of light – Is there a humanoid in there? MK: You didn't follow? D: No I lost it when I started losing my fingers and toes and part of my brain – So now I've become a ball of light like a soul with all the attributes of what it wants to be? MK: Put it this way – How afraid are you of losing the physicality and becoming the light? D: Not too afraid at my age as I will soon go the way of my ancestors – The fear is not much for me anymore Z: Could it be the evolution is from horizontals and verticals to a free planetary magrav instead of being earth bound? MK: I'll put it to you in a different way – when you see cup of GANS, you see a lot of elements – How many beings are inside each cup and laughing at me from inside out? – Are these individual beings in the GANS? – Go back to the writings of Bahá'u'lláh – He says even the stone has a soul – Even the stone which is to us the hardest thing has a soul – Is it our ignorance now that we know the collections of the atoms and the plasma appear to us to be a living entity and in fact by going inside we find the truth of what is outside? – Muhammad (bless his name) says the Beginning is the Unity of Being – So it's not just the God but it's the totality of it. You are part of it – It's how YOU want to look at it – From the point of view of Christ (bless his name) he says “Thou Shalt Not steal!” Because when you become a light you cannot – You are a giver. Have you read the messages the right way? Is it a hidden chord for us but we are so physical we can't see it? Have we got too physically entangled so everything had to be physical for us to see the totality? Do we go back to the word of Zoroaster when he said, “Think Correct, Talk Correct, Act Correct” – (KfNZ comment: Good Thoughts, Good Words, Good Deeds – MK went back into the Zoroastrian tradition very deeply at the end of KS Workshop 33, one of my all time favourites and included in the Amazon kindle Year 1 series Book 5... http://www.amazon.com/IGNITION-LIGHT-Year1-Bo.../.../ref=sr_1_1...)

MK: Or do we talk when we are a plasma and in what language? The code of Universal language is in every religion but man has only taken the physical part.

06:27:04: Tony: And that physical part is the Holographic Universe I think – whether it is GANS, whether it is a human body – There is a being inside that holographic geometrical shape that is so strong because of the inertia of the planet – So when we are aware of all these holographic shapes and when we create the plasma ball like Caroline demonstrated, we can put the whole galaxy in it, the whole planet in it – We can put the spot on the body between the left and right fingers, anything between these points when you create an intention and let it drop into the heart like a pebble in the still water of the heart, and you just get out of the way and you let the ripples go though your body and through your fingers and anything in between whether it is the planet earth or a human body or a galaxy – then collapse that holographic wave, because inside that plasma is the being, the light, the soul, the light body – So when

Notes from 103rd Knowledge Seekers Workshop held March 3rd, 2016

(v2 2016-08-29) DRAFT (Notes have not been verified. Double check info with video)

we are aware of that ,we are already operating in a magrav field of love, gratitude, appreciation and joy – and that mindset is the pilot!

06:28:51: MK: (evidently impressed with Tony's discussion) Can I ask you, Rick, can you put the recording of today and put it on the KS workshop tomorrow maybe we can enlighten a lot of people – We did the blueprint of the space ship – Now this is the blueprint of the man in space...

Luigi: Are you saying that in space there are no words? There is only the Love connection to the soul, which is the plasma? MK: Good morning! Denny: Why did you take us through the GANS? MK: It's the easiest way I could get you to the truth – Don't forget, I've done this many times, I know how to walk the flock, I know how to walk the sheep into the slaughterhouse! You are making it – I just directed you. I am the creator but the created have to understand the essence of the creator or there is no purpose in existing and creating. I made man in the image of myself. Bahá'u'lláh said I made you so you could make children so they could love me – which means I need to feed myself back that I can feed myself.

In space, there are no rules except to the giver unconditionally. We are walking into the understanding – The whole thing comes down to understanding how to manipulate the new clothing of the man (the orb of light) and he who understands this will understand all the stars and the way they give unconditionally. Etc., etc. MK deepens into explaining the radiation of the sun and how it creates all life then feeds on it as well – as above so below – we are able to elevate ourselves to that condition and travel the universe.

06:38: Tony comes back on to add something to the knowledge: I may add to that, Mr. Keshe, when we dwell in the state of plasma and the resonance created between our soul and the plasma soul – what happens is that we automatically switch the mind set – MK: Aaaah. You see Mr. Haman – When we become a soul, we don't have a mind set! T: Exactly – I understand, what I'm trying to clarify – what I am saying about the mindset is we automatically become a solution oriented being with a cosmic soul, plasma that is solution oriented, doesn't see problems only sees solutions – This mindset in this dimension, we always think magnetically – We have connected to the universal diary that Alekz described – It is effortless in the magrav field of solutions – Infinite worlds of possibilities beyond our own limited consciousness, but as we create resonance to that, we become that!

MK: Do you know what is written on the front entrance of the UN? Tony quotes the three words of Zoroaster that MK has explained previously are the Three Persian Kings who followed the star to find the Christ – see Year 1 Book 5! – Tony translates in Farsi first then English... Human beings are like limbs on the same body and when a part of the body or limb starts going through contraction or pain, the other limbs of the body will feel the pain – If you are a human being who is not aware of other humans' pain, you are not deserved to be called human being. So when we are in resonance with the plasma we feel everything – We don't have... yes we feel the vibration, and that's being in the plasma state and if you want to manipulate, you step out of it and do it with the infinite worlds of possibilities – asking the infinite source what are the possibilities from collapsing the wave – Maybe it is an earthquake, or anything – How about collapsing that wave – MK: Why collapse it when we can use it to build on? T: That's where we have to be careful whether it's for the highest good of all concerned – You have to

think for the highest good of all concerned how would it feel to collapse the wave now? Let the Universe decide! I have a limited view of the Universe compared to the view of Infinite Universal Plasma Consciousness – Cosmic Consciousness – so put an open-ended question to that plasma ball you just created between your hands, and let it happen – It's how you manipulate the plasma and sense its goodness is giving for the good of all, let the plasma decide – Get out of the way – Once you dropped the pebble into the still water of your heart, get out of the way and watch the waves going from your heart to your hands, through your index fingers and into the center of the plasma ball. MK: Your not going to have a heart or blood in space... T: As I mentioned Mr. Keshe, thank you so much. We have to understand where we are, before we understand where we are going. So, since we are already in the physical body, we might as well use the heart which is the center of the torsion field of the human being and which is plasma MK: Put it this way. We are going on a path and now we have no choice – Now that we have opened the tech, we have no choice – There is no way back T: Laugh lololol

MK: Lolol. This is the road to the Universe. We are patient to teach people to make the reactor, watching a child putting the Lego together – We see the whole picture and we have opened the door to let the bird out of the cage. Tony: We have a saying in the Urdu language (quotes an Urdu phrase) which means – Mr. Keshe – from the bottom of my heart, I'm very grateful and thankful for your presence, that you opened this knowledge to humanity on this planet where anyone from a scientific or spiritual background – science and spirituality – These 2 are brought on the table, and depending whether you are in matter or plasma, they are there, these 2 field strengths – and recognizing who we are – Self-realization is God realization.

0646: MK: But are we part of the Creator? T: Yes!!! MK: This mentality, Mr. Haman, doesn't bring us to the reality that we are becoming passengers of the space – We have opened the door so it cannot be closed and it is so open that millions of people will come to it. But they have to understand what is the next step – What is the eventuality going into the UC – Ws it to understand what we are about to lose, or does it need to stay within the boundary of the physicality and controlling it because we need to, or, will you become a star like the Sun? There are no kings and no rulers but equality of the light. Who wants to give more has to shine more light, and in giving more we receive more to shine more! The problem of a lot of humans now that we have taught the basics, to make the final pic, is for the man collectively to decide we are in charge of the evolution. Last time we came from gases to amino acid, but in going back to the plasma we have a choice – Do we want to create the system where we become thieves and suckers of the energy of the universe? Or, do we elevate ourselves to the point where we have no need of physicality that we become more or less a sun that shines unconditionally but we know in giving we want to choose the best that we can shine more – Rhe sun shines all the time but we forget the other part – Plasma receives from entry, what does the plasma of our sun accept to enter it? Do we become the matter to become the purified fields of unity that our wish is that we become absorbed by the sun that we can shine and spread the love of Creation across this system, and the same way with the galaxies – Have we come to understand the essence of the creation for the first time, or do we still go to get tangled with the matter and the GANS? We have no need of the heart and the lung as we will all become shining stars. T: And I believe the next step is for the planet consciousness to recognizes us MK:

What about the dogs and the cats and the stones? T: Exactly, but since we as human beings with powerful intention we have once we recognize the holographic universe, it becomes the child's game and no longer has any power over the soul to shadow the soul. MK: Your totality becomes the entity of the Soul of the Creation T: Yes, that's where the resonance begins and we are a part of all. MK: So the question comes, maybe this is the blueprint of the language and the purpose of our presence – Instead of keeping it dark we will put this in public so people can be enlightened. But are we ready this time around to dictate our evolution? Are we resolute enough to understand that by evolving we become part of the giving we become part of the totality of the creation of this planet? Can we extend to understand the essence of the creation that we become the shining stars of the creation? And then there is another question – Out of the stars you see in the universe, are some of them the stars of the souls who hope to become the star of the soul when we become one nation, one race? – Then would we become a shining star of our part of the universe. Then as we mature, we become the soul of the universe. The teaching of GANS was to detach man to accept the truth. Now, we have to make a new clothing of plasma to become a part of the universe where giving is the rule – Is the man ready to take this step as one race? So that when the sun shines, it shines bright and beautiful, wherever you look at it. Is our ultimate goal to become a star of the universe? – Are we mature enough to dictate our own process? – This is where these teachings are taking you – But I have to use the brain tricks of laughter, joy and happiness to show you how you change the direction. Do we want to become a soul? – Start with a detachment from reality? etc. Thank you very much. I hope we have enlightened some souls to realize that we don't need a craft, we are the craft – Thank you very much...

06:57:18: End of Morning Session

There is actually another 40 minutes or so of good stuff from the Afternoon session on March 2nd after this at the end of this workshop and this is freely available on YouTube – look for the SSI YouTube channel – ALL the workshops are on there
