The picture is of Jim and Lisa MacDonalds experiments with CO2 GANS on their aquaponics farm.

Apologies for the long gap in workshop transcripts - this is the first Workshop on which we have made notes since WS103 on the 3rd of March, as in the last month we attended an Ibogaine Conference in Tepoztlan, Mexico, and then my 95-year-old Mum passed on to the next world on the Easter Monday. This was a pretty special day when I came to think of it, being the day Christ rose again from the dead in the Christian tradition, and also bringing memories of the timing of the 1st Blood Moon eclipse in Easter 2014 when The Science Messiah opened the process of the Public Release of Universal Knowledge through his KS workshops.

(The amazing timing of all these events under the 4 Blood Moon Eclipses I recorded in two series of 7 books containing transcripts of many of the workshops – Year 1 Books 1 to 7, and Year 2 Books 1 – 7, available at this time only on

http://www.amazon.com/WORKING-PLANET-Year-Boo.../.../ref=sr_1_5...

In any case the last month has been a busy time for me with my family coming in from the 4 corners of the Earth, and I have only had time to listen to snatches of WS 104, the LAST One of 2 years of continuous workshops – this one holding the blueprints for the Food systems, bringing the gift of unlimited food and how starvation is now completely unnecessary as everyone can be fed from Magrav units in their communities, churches, mosques, synagogues, or spaceships! Then I listened to Parts of IWS 8 and was inspired to hear Swiss Jackie talking about how working with the Magrav technology has changed his life and the lives of many people around him in a very profound way – I decided that his words HAD to be transcribed, but unfortunately at this point there is no time to do so, and now there are new projects beckoning.

For example my next project is to transcribe the proceedings of the 5th International Ibogaine Providers Conference, but before I got down to the job I noticed MK's wife Carolina had posted on Facebook and earmarked WS 107 as a very special one, especially with its Medical Knowledge discussing the problems associated with our western culture of mass immunization. Hence I decided I had to make notes on this one before I started on the Ibogaine Conference book, and made notes on the flight from Gold Coast to Auckland across the Tasman Sea. Around the 0124hr mark I was rewarded by hearing MK, when talking about how important it was to bring the doctors of the world into the Plasma technology, refer to the fact that “we already have a doctor in New Zealand who has transcribed most of the teachings!” It has actually been a pretty thankless job, but that little comment made it feel worthwhile, the two years of obsession trying to get the words down so I could understand what he was trying to say. Now I feel it is time to take a break from the KS workshops for a month or two while I produce a book of the Proceedings of the 5th International Ibogaine Providers Conference.

0005: Announcement of the 1st Universal Council Meeting 21-23 April in Dubai. One Planet One Nation One Race Conference.

0007: MK comes on – unexpectedly back at the SSI in Barletta, Italy – home from Dubai! The Kf is here to create unity and not division, but it is here to create

Notes from 107th Knowledge Seekers Workshop held March 31, 2016

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

division for those who create wars! The Kf is not tied to any course of action by financial strings, and we are free to create the implements and technology of peace in our own kitchens. We are financially independent and give a platform to anyone who wishes to freely share his or her knowledge. 0011: We are creating a One World, One Nation, One Race passport – no visas required for anywhere in the world – birds don't need a passport when flying from Europe to Africa, nor do whales when passing from one ocean to another – why should humans have to carry passports?

0015: Further reports of the ability of CO2 GANS to clear radioactivity in Japan. Some people are asking questions as to why we are not able to ingest CO2 GANS – apparently referring to an experiment in Japan in which Mice were fed CO2 GANS and cleared not only radioactivity but also flu virus from their bodies...

0018: GANS materials when incorporated in Nuclear Reactors will take away the risk of meltdown or radiation leak – a huge advantage and increased safety in the Nuclear Industry. MK is inviting the scientists of USA, Russia, China and Iran to collaborate in developing further systems to increase the safety of nuclear reactors world wide so we don't see any repeats of Chernobyl or Fukushima...

0021: MK asks Rick what is on the plate today? Rick: Well we have the Taiwanese plasma tree! MK: Yes – these are 1st Term Knowledge Seekers who are already experts in the plasma technology – please show the video! This is a medical unit based on the Medical blueprints release – we have seen the 1st model in Philippines, then a development in Austria, now in Taiwan – this unit demonstrates for the first time the flow of plasmatic Gravitational-Magnetic fields... 0026: Chris Yang from Kf Taiwan gives a presentation from the Plasma Lab – their Mission is to study and share Keshe Knowledge publically and freely – by and for the community. He then presents their walk-through medical unit including a frame and helmet made from Nano coated aluminium, and including 2 or 3 pain pens connected to the system – one of these having grav effect and the other mag – demonstrated on a video by showing one of them attracting a small piece of Styrofoam with a wire in it floating in water, (gravitational) and the other pen repelling it (magnetic). They found the Styrofoam interferes with static electricity so now planning to test it with wood instead.

0042: MK comments that it was Taiwanese scientists who were given the USB stick 2 years ago by their Government and decided to release it to public – setting off the whole process of the Release of Knowledge through the KS workshops – Complements them and now the Plasma team on their good work! MK inquires

Notes from 107th Knowledge Seekers Workshop held March 31, 2016

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

about the 4th experiment mentioned on the power point, which is about using a pain pen with Ginger. CY explains that Ginger *Zingiber officinalis* is a powerful Chinese medicine – so they are trying the idea of using the GANS of Ginger in the tip of a pain pen (Much like the Pain Cannon produced in LA that had the GANS of Iboga) MK suggest they could try a copper coil in a piece of Ginger root – or they could actually try the same with banana! Lol. 0045: CY presents a range of different types of pain pens with different coils – with perceived effects being very different – a lightning-like ray from one and shorter but wider spinning ray from another etc. 0050: Kf Taiwan has a plan to collaborate with a TCM doctor and an energy therapist. They are also doing a Magrav power system workshop to teach people how to make the power systems. 0052: MK advises them to wait on the Magrav car systems as they have introduced some improvements – soon to be presented by Vernie and Renan in the Philippines.

0100: Rick announces Jim and Lisa MacDonald with their agricultural experiments – not coming up on zoom so delayed for later – (at 0238hrs) 0102: Rick shows Heather Bryant's scheme of sealing CuO GANS packed inside a CH₃ pocket inside a CO₂ Pocket. MK approves of the scheme – it is what he taught yesterday in the private teaching – this is a way of focusing the power of the different GANS instead of randomly mixing the GANS. MK shows a scheme of CuO inside, CO₂ outside that and CH₃ on the outside – now you can concentrate or directionalize the CuO or use specific GANS for specific reasons.

0113: MK announces the Austrian team has started clinical trials in collaboration with a medical doctor. 0116: MK talks about targeting e.g. fixing heart valves or kidneys or cancers in different parts of the body. This is a new development and we need to collect data to convince the doctors – as in the previous time when some doctors became aware of the power of homeopathy. Kf needs to collaborate with the doctors so the technology is properly understood. 0124: “we already have a doctor in New Zealand who has transcribed most of the teachings”. Doctors are generally carers and those who care for their patients will discover that this is another tool for helping their patients who are in pain – once they see the first results they will carry on – we need to build these medical units to show the doctors this technology works. 0127: Klaus explains they are documenting every step in using their walk-through unit and helmet, and collaborating with a doctor. 0129: We are setting up a database of medical knowledge as a blueprint for the doctors to use.

0130: Heather Bryant comes on and explains her work with the health pads. She is a physiotherapist of 25 years experience. 0134: MK talks about a patient they are

Notes from 107th Knowledge Seekers Workshop held March 31, 2016

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

using a specific pad on a specific position to treat lymph cancer. 0139: Pictures of Renan putting someone through a walk-through system – MK shows how you can target certain organ systems – e.g. kidney to ease dialysis problems – lung focus to relieve pneumonia. You can not only target the place where the problem is and then target the rest of the body to adapt to the changes – to bring back normality and this way you bring back to valance the physical, mental and emotional structure.

0145: MK describes how these systems are perfect for replacing immunization – we have seen the recent case in Italy where the court awarded damages to parents for damage done to their child by mercury in the vaccines – particularly harmful is the combination of mercury and magnesium in multi vaccines. We can make a GANS of the virus and allow people to drink it when exposed to the virus they will quickly form their own immunity – vaccines are no longer necessary. MK has seen the damage done to his own children by vaccines a week or two after injection and this is life long damage – now we can make the GANS of the virus and give it in the form of drops at the time when they get the infection e.g. measles. There is no longer any need to inject our children with poisons – this new technology is perfect for treating these diseases. MK makes an appeal to the world leaders who might be listening to research and introduce this new method of immunization. 0155: The way we made a GANS of banana or orange, the way Tepco made a GANS of the flu virus – the same way we can make a GANS of measles. MK makes an appeal to doctors and researchers out there to use CO₂ GANS against measles and other diseases such as chicken-pox – you can extract it from the body, make a GANS of it and feed it back. These viruses are easy compared to the viruses we will see in space. 0159: When we learn to deal with these viruses the age of man can extend to thousands and millions of years.

0203: Heather Bryant tells how she took some small vials of CO₂ and seawater GANS and put the vials into drinking water at a consciousness gathering – very evolved people there who were impressed and could feel the energy. She also put some CO₂ GANS under the chair of a person being worked upon and it seemed to improve or make much easier the process of emotional release. 0214: MK explains some technical details of how the oxides like CuO and GANS of CO₂ lock onto the COHN of the virus and reduce their energy back to Hydrogen – you can actually use the virus energy to benefit the man. 0220: HB shows her Facebook pictures of using the small GANS vials to energize the water- asks MK if this is the best way? MK says yes this way you just use the plasmatic fields – however the plastic can become a filtering barrier – may be better to use glass vials. The

Notes from 107th Knowledge Seekers Workshop held March 31, 2016

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

seawater GANS is so powerful because it contains all the elements of the planet. Some questions on safety of the seawater GANS – MK says it is part of our life on the planet so it is safe – also talked some more on the experiments with Mice at Fukushima and how the CO2 GANS fed to the mice detoxed radioactivity, but it did not neutralize it took it into the urine which still contained the residual radioactivity. 0235: Discussion of the Use of Rock Salt, which has less impurities in it than sea salt...

0238: Jim and Lisa MacDonald – Presentation on Agriculture and Keshe Plasma Technology – they have had remarkable results from growing Lettuce commercially using aquaponics and hydroponics – with a huge increase in yield and faster maturation of the crop in high temperatures that previously stunted the crop – just from putting a bottle of sealed CO2 GANS influencing the water circulation with its plasma field. 0307: MK responds - Remember the Chinese experiments showed protection from cold temperatures – you have showed us the same thing with heat – CO2 GANS structured water makes the plants more resistant to extremes of temperature and pressure. They harvested 2 weeks quicker and with 2x greater mass. (This is a similar effect to the way the crop seed is effected by crop circles – increased resistance to temperature extremes, dehydration and darkness – as demonstrated by Professor Levensgood et al Massachusetts)

0316: In this case 50mls of GANS was able to structure 22000 Litres of circulating water - MK relates it to the clean up of Fukushima water where a small amount of GANS was able to clean huge quantities of water. 0319: MK comments that with increased number of bottles of GANS they might increase the plant mass even more and also probably replace the need for the fish in the aquaponics – in the future we will not need to capture and use other animals. MK enquires where the lettuce is going – all to private customers restaurants etc. Therefore might be good to look and see if there is increased social calmness and peace – Jimmy will make enquiries

0337: Ghee presents his pain pens, which have small containers of GANS inside them with the normal double coils Nano coated and GANS coated. MK goes over the original pain pen designs then takes a look at the additions – says maybe this might be an answer to the problem of when we get lack of neural conductivity in the spinal chord due to compression. We already know how to regrow cut nerves but when the nerves are mashed up we still have a problem.

Notes from 107th Knowledge Seekers Workshop held March 31, 2016

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

0400: MK goes back to the lettuce and raises the question of whether the lettuce changes genetically – whether it goes back to original or whether it is a new genetical specimen? Jimmy says he has started some experiments – not with GMO seeds but Hybrid seeds. MK asks if he can access some GMO seeds with terminator genes to see if the CO2 GANS can override the terminator gene expression – he knows the answer he says but it would be good to see some careful experimentations such as Jim and Lisa have already done – Jimmy says he will try it
0404: Thank you very much for today
0405: Renan comes on and presents the case of a patient with Duchene's Muscular Dystrophy – they need a doctor to interpret the blood results – will relook at the case next Tuesday – End
