Introduction by Keshe:

There are people listening from every corner of this planet. More knowledge has been dispersed so beautifully and so balanced across this planet than before, maybe even the universe. You have the full potential in achieving everything in the universe; there is no need, no reason for any man not to reach success. Wherever you are, the way I taught you to make the coils as double, one inside the other, you have continuous and equal gravitation-magnetic fields

In the experiment we use nano-potassium and if you put CO₂ on it and you put zinc on it you have connected the emotion of the man to a stable condition and you will find a very peaceful man. Here we have the galaxies and the universities creating magnetically and we have used the matter estate with the magnetic-gravitational to dominate and create the shape of the plasma.

The nano technology and the nano materials which you have collected and developed in different ways by electric currents or fire or whatever has that advantage that the matter, the nano and the plasma is all the same so the connection is very solid and it is very strong. The power of the plasma technology the way we have taught it, is beyond the imagination of the man. Now we can create and control the plasma which is the mother of the creation of the universe. We are given the seed of the essence of creation. The Foundation does not belong to no one and is not made up of one anymore. You are developing it, you are doing it. We will still develop the technology in different names, in different colors, in different nationalities which do not exist. It is beautiful when we see the Christian, the Muslim, the Jews and every other belief are working together to build our systems. We have already become one faith, one nation and one planet. You have to remember one thing: dates are irrelevant and today is the last day of the Christian calendar. Tomorrow is the beginning of another calendar. One day is connected to another and we don't stop. The Keshe Foundation team is working around the clock and in respect to time, position, religion, country and now we achieve what we set out for.

Captions to graphics in the recorded segment above:

1. The inner body in the coils is material that can pass the ultraviolet ray particles.
2. The outer core is non-magnetic metal
3. We select hydrogen for the experiment because it is the simplest known element.
4. There is no neutron in the nucleus, only one proton and one out electron.
5. For full ionization only one electron has to extract.

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

6. Each material has a mag-grav sphere and it will be in effect with other substances to find its own position.
7. In the experiment we use nano-potassium to help hydrogen ionization.
8. There will be a new dynamic plasma field formed in the inner core.
9. The particles will find their new position again in the inner core.
10. There is an inner core which is led by the magnetism of dynamic plasma field of the potassium that will start to rotate.
11. The outer core will start to rotate slowly as well and its gravitation will prevent the leakage of the free electrons.
12. Light is produced of the inner and outer cores due to the collisions.
13. The ionization of hydrogen will be started by the potassium mag-grav fields.
14. The hydrogen outer core will be ionized from the inner core ultraviolet radiation.
15. Hydrogen and nano-potassium are placed in the inner core.
16. Its magnetic field will prevent the leakage of particles to the metal body.
17. The inner core rotation will make the electrons in the coil move directionally.
18. When the winding pass by the magnetic fields happens, the electricity will be produced.

Keshe (K): Let me explain. When I moved to Dubai to start teaching and the development of the technology for the Arab nations, I was told I had a schedule to meet today. I received an email asking me to tell of the escape plans for the future. Our escape plan – you are escaping to Dubai to the conference and if the parameters and the legality allow, we escape together to the big formation of China. And then we escape back to Italy for a while and then we escape back to Africa to support African nations and then we are negotiating to escape to Russia for a while for developing a program for 2 or 3 months. And then if America will like, we will escape to America when the new government comes to operation and they allow people of different colors into the nation. Then, please note, if you want us to escape to your country or continent, announce it.

K: As you have seen, as we move we change the condition of the positions. Now today you see that Rick has escaped to somewhere else to test the feeding system and the flight system. We all become part of the teaching structure of the world structure of the Keshe foundation. We start to escape to different places to teach. In so many ways we have become more or less, all together, one structure. In that way we do not expect to be in one place anymore because the number of the new plasma scientists are increasing and we are moving around to teach more one on one, to test systems and to put things into position and to be able to in a way to learn from each other and share knowledge. In

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

the coming days we escape to a country where I love to be and I have respect for the ethos of the people which is China. We stay in China for maybe 3 to 6 months because we are not travelers to come in and say 'hello' and go away.

K: I went to Iran years ago and stayed 4.5 months. Now here in Italy we have the manufacturing structure. We escaped to Italy because of life threats in Belgium. Now when we go to China we go to a full co-operation for development with their ministry to develop and to balance the forces of science, agriculture, industry and space and try to bring the ethos of peace to the people who are trying to defend themselves. When we come to Italy then we go to Africa which has been part of my life for a long time; I lived there, I worked there, I have businesses there and I know the pitfalls of the nations as one country, one continent. When we go to Africa we go for 6 months to develop everything from country to another to make sure the balance of knowledge is equal among the African nations.

K: Then we come to Italy again and we strengthen the links of the Keshe Foundation and the structure of running the country at the highest level and that we bring changes to the culture in a positive way and the industrial revolution of new science. This is how you will see a number of the top level of the Keshe Foundation traveling around the world. We go to expand the knowledge, technology and to bring a balance between the all nations. We are negotiating and spent time in Russia. I have worked in Kazakhstan and other parts of Russia for years; I have offices there. We will endeavor to extend the knowledge and I know that Russian space technology is years ahead. You cannot imagine the things I saw in the 1990s in the Russian space agency. We will cooperate with the Russian government, military, space agency, agriculture, and environmental to change the situation in Russia and the countries of the former USSR. It has been my home for a long time and I worked out of Kazakhstan. I am quite familiar with the work and structure there.

K: We are not going from one country to another; we are going from one part of one nation to another part. For us countries have become like cities at this time. We go to teach and bring everyone equal and we will carry on teachings on Tuesdays and Thursdays; it does not matter where we are in the world. You have seen that Rick has moved from one part of Canada to another to test and to feel the new feeding system which was developed by Ali and we can share. I will share with them what they have learned. Today we will see what Ghana has brought us. Kenya has been set up to start manufacturing in the coming weeks. We have come to the point that we need as one nation to structure the new way of working and that we are not blind or aligned with one part or the other.

K: We heard before in the last couple of weeks in respect to the testing and development in Japan regarding Fukushima by Tepco in the use of gas materials in production and development. I only go one step further when somebody understands. In the process of development of Tepco, their tests of CO₂ on mice, the Keshe Foundation in Japan took on the task of testing independently of the authorities to test the CO₂ and its application for health of human beings. The test was completed in January and we are now ready to report the testing on the mice and the first stages of starting the human trials which have been successful. For that reason we initiate our own international clinical trials which means that we are not tied up to European health organizations or FDA in China, Japan

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

or any nations. As one nation we have put the testing and clinical trials in the hands of every citizen of this world. What this means is that up till now we tried the Magrav system, the feeding of the plants and everything else. We did this independently.

K: for the first time we become more as one planet and we do the international as one nation, one group and the clinical tests and trials are for the Keshe Foundation independently which means we open the trial to every man and woman on this planet. When they do clinical trials the pharmaceutical company pays millions for a company to find volunteers and sort out 'who is who' and for those who will fit the criteria for perfect results regardless of the side effects. Then they can hide things and it is fine tuned to a point that they can literally show the medicine to be tested is perfect and anything which is abnormal is eliminated in one way or another so they can pass the certification. We do not do this; we don't spend millions to find people to project numbers and hide the data on the effects on the immune system. FDA has hidden the results and it has caused mayhem in the public. Some organization may have paid money to hide the damages of the medicine being tested.

K: today we will start the international clinical trials of the CO2. We have made 3 products—eye drops, the supplements and the skin lotion. The clinical tests show no toxicity and it is safe to use. Now that we see the safety of the material we launch the clinical trials internationally and for all of us so we can go to the next step. We warn you the dosage we use is very minute and very effective. Do not consume CO2 in any amounts until we can release the results collectively. Then we can take the next step.

K: the website will release the contractual agreement for those who want to be volunteers and you can sign yourself up to volunteer and test these products internationally. Once we have the results in 90 days and we receive the correct information from all of you because it is a clinical trial and you report back to us everything that you see and observe and the changes. Then the blueprints of the products become available to all the nations simultaneously. We are looking for a broad spectrum of people who want to test the small, minute amount of CO2 in a controlled process. Then we ask the scientific world to write the paper that we publish on the Keshe foundation. We do not rely on journals that can 'play' with this; we have seen what national journals do. They control everything. The results will be on the Keshe website.

K: We are looking for up to 2000 people for eye drops, 2000 for lotion and 2000 for supplements. The cost has been placed by the Japanese team which brings it to 50 Euro per sample test and 10 Euros for packaging. The recommendation by the scientist is the supplement and lotion taken together gives a much better result. When you use eye drops you use the supplement as well. We have decided that you go to the foundation today and say you want to be volunteer. The diseases or problems we are looking for is as follows:

Lotion: psoriasis, skin cancer. This solution in conjunction with the supplement can change the skin cancer. Do not forget the scientist in Fukushima at Tepco have been in nuclear clean up for 2 years. We are relying on a highly qualified person who is a professor/lecturer teaching the subject. We give

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

it to this qualified man to bring it forward. This will be done on the banners of Keshe Foundation, Japan, and Keshe Foundation world wide.

Eye drops: people with retinal defects and eye problems such as cataracts. It can be highly effective according to the test results. The material gets rejected from the body and does not stay in the body. It releases the energy to bring the change. We are looking for people with eye degeneration and to bring those to light. You have to state what your problem is on the application. If you have a specific eye problem, submit your application. In this process we see how effective the results will be. If we see rapid change and perfect results we report this immediately.

K: Remember the UN did a 5 year trial in Africa and it was a success after 6 months so the trial was terminated and announced to be effective. When they tested circumcision to stop the transmission of HIV from one child to another it was very effective. We will do the same. If you have skin cancer and by using the lotion and supplements you have to report to us rapidly so we can help others as soon as possible. The whole structure will be released. We do this collectively as one race. Then the next step is the use of the supplement. We are launching 5000 units of the supplement while you are doing this and we are looking for a spectrum of changes. In countries like Japan and Russia and satellite nations where there have been huge exposure to radiation, and the west coast of Canada and the US, we would like you to participate. If you have digested any nuclear material and radiation on any part of your body, due to the results we have been given by Tepco, we think this material can be useful to clean up the body and get rid of the radiation. I have been in contact with Iranian health officials of the nuclear to test this in Iran for nuclear workers. If you are working in radiology, please you have absorbed radiation and we would like to test you.

K: There is a twist in this supplement. We would like to test a critical position: our tests go for two things—people with pancreatic, stomach, or intestine cancer we would like you for volunteers if you don't see a solution right now. We are looking for volunteers for those who have been using chemotherapy and see if we can take the horrible part of chemo out of the blood and digestive system. The new technology could work hand in hand with chemo therapy to take the side effects out of circulation. If you are using chemo and you want to see if the technology can be beneficial in reducing the side effects of chemo we would like to hear from you.

K: There is one more part: you have used products in your life that have put animals into suffering and other men into suffering who put their lives at risk to earn something to allow their children to live. Many of them have given a life for chemical trials for unknown chemicals. Our data shows these materials we will test have no side effects because it has no harmful materials. It balances the energy of the body. Maybe we can give back to society and at the same time improve our lives. This is huge data to collect and the process is for all of us to learn. When the data is in then we go to another level for the application and use of this material in a safe and transparent way; no data will be hidden. The scientists can look on the daily basis at the testimonials. If the pharmaceutical people are looking at the results of the chemo they can look on a daily basis. It will be the most transparent test of health in human history and this means that we are working collectively together for change. We

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

welcome the pharmaceuticals, research institutes to join us; we are not enemies of each other. We are working to find solutions for humanity.

K: If you as a doctor want to use the technology for your patients, fill in the application for your patient and ask the patient if he wants to volunteer and submit yourself as the supervising doctor. We welcome you. We are calling on the experts, the industry and the Keshe Foundation supporters world wide to join for change. If you have cancer in Africa and the aid given you doesn't work, you die. In Europe if you have skin cancer there is no solution; European health regulation doesn't apply to your health. Once you are in a coffin you are done and you cannot add any more to the knowledge of man. I have been in the situation with both cancer and the skin problem. I will volunteer myself for the tests because I received high doses of radiation during the tests 8 years ago in Iran and I still have the side effects. In a way I become one of the volunteers myself. See to what extent we can change the situation; now it is us as one planet and one race and us who have to develop the structure that we can help each other and ourselves in changing the patterns of control and the damage that has been brought in.

K: We will start building health systems. In Dubai we will show a new structure for the body plasma unit and was built in the West and will be there for the conference. A man built this and donated this to the foundation. It is like an MRI vertically standing unit for a whole body scan. If it arrives in time for the conference we will show the system. It was done by Keshe Foundation United States. A man who has built systems for 25 years designed and did this system. Orders can be placed to the US and placed in hospitals...this will be launched as a new product and this is for commercial use in hospitals. This is how we develop the technology together. We don't see any difference in the color of the skin, the path of belief and our souls speak the same—we are peaceful creatures that need to invest to save and not destroy.

K: the eye drops will change the emotions of man...as you receive the energy of balance and peace. If you live with cancer, you had lots of worried thoughts and you go through chemotherapy and more and you analyze your life. I have never rejected chemotherapy and if you take away the side effects away the chemo can create the condition for the cancer not to come back. We will monitor you for 10 years; we want to see the change in emotion and the effect on your life. What is the behavior of man when he is free? Does it change you knowing that you don't have cancer? Do you become more peaceful? We are looking for American Soldiers who were damaged by chemicals and many of them are committing suicide. We call on them to volunteer; we think the supplements will change the mental condition of the soldier. We can do the same for the Americans that we did for the Japanese with the radiation.

K: 10,000 volunteers will not be enough; we have done so much damage to ourselves. If you are infected by AIDS our reports show this could be effective. This is stated in the scientific report for the trial. Also hepatitis, viruses and diseases are affected by the supplements. We take this knowledge to China to see how we can work in conjunction with traditional Chinese medicine. The door is open even to the pharmaceuticals. If you need more data or can help us to analyze the data in

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

a different way, please contact us. It's a new way of cooperating. Language and teaching are not barriers.

K: We have been told that from last week we will transcribe all the workshops within 24 to 48 hours we will have the teachings in 80 languages. The first will be the 107th workshop. You can listen to the teachings in your mother language. In China the three books are read on the radio channel on the internet.

K: Go back to the health teaching. The pens are now commercially produced by Keshe Foundation that you can order from the website. It carries the certification and will work as it says it will. You can order them or develop your own version. We carry the blue packaging which is the color of the planet. We are stocking 20,000 pens. We have the new health pad that is manufactured in Italy and has a health certificate. It carries CE certification. There are instructions for use. In the coming weeks we will launch 20 new products from Keshe Foundation in Italy. When you receive the power units they will be in the blue boxes with our brand. The benefit of what you develop is for humanity.

K: Now we see the power units working and we will send requests for people who bought the units for what can be improved and what the results have been. The second generation can be put into use immediately. Don't put more than 500 watts into the unit. You can slowly do the work and you will see the gradual drops. In China we have seen 80% drops. We see 20% drops in a huge school in Abu Dubai which has only 2 units in the whole huge complex.

K: We will put the units in 2 hotels in the Emirates. The cost of electricity is a problem for them. The savings will be in the pocket of the nation. When you don't have to build new power stations and you can put out the hybrid home unit that uses the units. There is not the burden of debt to build new power stations and you don't have the environmental damages from them. We are talking to government levels of many nations. China and Japan will become major suppliers. We do not support that we can make cheaper units for China. We work to create jobs in Italy for Italy, in the US for US, in China for China.

There were false accusations made against the Magrav units by paid dis-informants. We had to wait for electricity bills to come and you have seen the reductions. We saw 20 to 25% percent reduction at night time from a solar cell system. Don't look at meter reduction only; look at the power supply you have put into the grid. You may put 10KW last month and now you put 12KW with the Magrav unit.

K: I have a system I have used for almost 7 years; it is a system when you put it on the arm and it was developed for a cancer patient. Within 2 hours of attaching it on the left side, we saw pieces of the cancer drop off. The system looks like a 'widened' letter C or letter U or like a bicycle handle. It took me months to develop. When you touch it you feel its power. When you place it on your arm it creates a specific condition. These are some of the most powerful systems we know. The process is simple and I try to demonstrate this with a metal ink pen. The effect of the magnet matter state is not relevant. It barely holds the pen but these are some of the most powerful magnet states we have.

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

These are like 7 centimeter magnets and you can break the tip of your finger with these powerful magnets.

K: You don't create by placing a GANS structure, magnet structure. The plasma state is more powerful than the magnet state. The field forces created by the GANS inside are more powerful than the matter estate. The field forces where you place the GANS are out from the bottom of the letter C or U on the magnet shape out nearly 10 centimeters. We use the matter estate to change the plasmatic state. This does not work on matter condition; it works on emotion that is so powerful it overcomes the matter estate. For what the emotion receives and a man finds with his balance with an illness and he renegotiates part of it. When a woman decides not to do anything with breast cancer it grows outward from the breast.

K: The original shape of the breast changes when untreated and you get 'mushrooms' growing on the outside that start at the nipple. When we put the system on within 2 hours the body at the emotional level decided which piece it would reject. Because now this is the first time we have shown a medical, health emotional unit. This means this system is in touch and control by your emotion. It takes about 2 hours to release the information for the physicality to determine for itself. It decides which 'mushroom' cancer will fall off. The hospital and Keshe Foundation both have some of the tumor material which is black inside. The matter estate changes to the emotional state and the power is through the plasma and the emotions. Do not forget your body is in a GANS state, not a matter state.

K: They use our system when I am teaching to attack us with microwaves. We know this technology. When I switch off my speaker it shuts off.

K: Look at the Magrav system with the power unit and we showed with American 110. This gives you what you need from what you have. You decide what you take from the source. The emotion was the cause of the cancer to start with. When you such a big chunk of the body, it is flesh and a live entity. Some of these cancers have a separation. The blood circulation did not seal itself with the lost of the cancer tissue. The plasmatic estate decides what it does not need in the cancer 'mushroom' tumors. What does this mean? If we can use this technology for people in conjunction with MS it is the operation of the emotion that decides the physicality of the paralysis. For this you would make the reverse of this letter C or Letter U structure. This is how you bring a coma patient back to life. You allow the body to find its own balance in the emotion that can feed the physicality.

K: You can use this system and the nano coating and speed up the growth of a leg that was lost. Give the brain what it is short of. We have the ability to speed up the growth of the organs. We don't interact physically; we allow the emotion that is much stronger. You can speed amputation growth if the emotion and the soul for the loss are needed to justify its existence. This is an emotional unit. The new approach in health application in physicality is different than what we have been taught for centuries. You are going to the essence of creation and the power of the emotion is stronger than the power of the physical of the plasma in the GANS state. This is a major breakthrough.

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

K: When we offer the GANS in the tablets or lotion we don't touch the physical part but we support the emotion that creates the new condition. When you put the concentration of the GANS which is emotionally controlled, you satisfy the emotion that caused the cancer on the skin. It is not magic. We have to understand these changes and not try to find a 'cure.' If you understand the process we can change the condition. This is important; if you understand the process you can change the condition.

K: Go to the opening teaching tape that we explained that we have developed a technology of the matter state of the energy when the nano and the GANS are of the same energy and the same parameters. This is the knowledge of space. This is how the Iranian air force captured the most advanced American plane. This technology makes the present tools of war obsolete. American Officials at the table in Brussels asked me how the Iranian AF could capture the most advanced American plane. The American, Russian, Chinese military are all the same with this technology—they have become invisible. This is the beauty of the technology. We will bring peace through the advancement of technology and not through the fear of it but through the power of it. One second you are there...in the matter estate. In space technology blocking of the frequency we have dynamic plasma reactors.

K: I have a magnet with a balance of amino acids that I developed. World leaders have asked me to be careful of what I say so as not to disturb the world balance. Now you are in the same boat—the Chinese, Russian, American military with their most advanced aircraft with the new plasma technology become invisible. Are we spending more money in developing useless military equipment by the controlling military powers? Now they are in same boat – the most advanced aircraft with the technology of plasma have been shown the military application of the plasma technology. Now for the first time I put this on the table.

K: This is the force of the plasma in a minute structure. The field forces are so strong that as I said plane exists and then the plane disappears. Our colleagues and friends, share the knowledge with your people. Carry the message to the White House—there is no choice but peace. Once you understand, the military hardware is useless. We have opportunity to change the course for the betterment of man without the use of war. I can show you and we have tested a field zone in which no bullet will fire. We can replicate what we call forces which create the firing of a bullet. If you can block such a field force with such a little thing, no bullet will fire in Syria. The knowledge is in the hands of the Keshe Foundation supporters and is not mine anymore. We can change the course of humanity by the application of the peace. Now let's play the game and see how our knowledge can be forces which create the firing of the bullet. Now let's see how our knowledge can become the tool of peace. You have seen the fast field (American plane) which such a small system can collect.

K: Now you understand how the Russians managed to cripple the most advanced American naval forces. When the officers came off the boat they handed in their resignations and said their government could not protect them. Now we put the hand of peace to all the nations to stop the production of the tools of war such as the most advanced rockets. What is good for the enemy is good for you. I did not negotiate in the back ground one by one; I put it in the teaching to all the

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

nations. Come in peace and let's change the military equipment to the peace equipment. We took factories that produced weapons after the breakup of the USSR and made factories that produced pianos and beautiful music.

K: President Obama your term of president will be remembered if you push the button of peace and allow the Keshe Foundation manufacturers in the US to go into large production. My hand goes to President Xi of China; we respect you and my silence tells the rest. If you manage to produce the elusive rotating reactors of the elusive coils and you can block the Americans. You have read of two Russian planes were passing over an American boat. You dictate the position of the lock of the one plane over the other plane and you have the 'Bermuda triangle' of the plasma technology. That is how simple it is. You on board on the of the planes decide the strength and with the magnet you never lose your connection, like the connection of a mother to a child. Small reactors are operational at every angle. Read the reports of disabling one of the most advanced systems in American history by two planes crossing over.

K: What is the next step? How can we enforce peace? We can use and show the peaceful applications and bring the nations of the present time to invest into this spaceship program that benefits all of humanity. There is no choice as of today for the most advanced American planes, Russian planes, and Chinese planes. Obama asked if they could have their 'toy' back. That is how we made the most advanced spy plane into a toy. Obama was correct. How many more Arab nations are prepared to buy the most advanced spy planes from now on? Now that they know they have become toys; and who would buy these very expensive toys? These spy planes cost millions. I made a call years ago about the F18s being obsolete. Who wants to buy a toy that creates a financial burden for their nations? It cost \$10 to paralyze the most advanced navy and army in the world.

K: Religions and color of the skin are irrelevant and borders make no sense. We bring technologies to China that will change the structures within the peace movement in the world. I don't see a nation more deserving than the Chinese. This system the way we taught you to nano coat with Zinc Oxide and CO2 and you will find out why I have told you this for a long. The field forces released by these plasmas are bringing the peace to the emotion of the man. The soldier has been taught there is an enemy and that has given him the reason for existence and the reason to fight. If there is no emotion to fight in the army is there a need for an army? Do we need more applications? In 10 minutes I can destroy every type of weapon to destroy man with a magnet and the operation of the GANS.

K: Here is another one. If I place this between your legs there is no prostate cancer within two hours. There is no womb from the cancer within 2 hours. You have a power supply which you plug in and you a unit belonging to one of our friends. Here is a simple system. You have a consumer; you can build these at home. Connect this to power supply and put on the cancer point on the body of the man. The plasmatic energy goes from in to out and you place another 'in to out' in the front and the 2 systems are connected and plugged in. You created a path. Plug one end to an LED light or draw and you create is the power through the electro vibration into the plasmatic forces. Say you want to change lung cancer or a brain tumor and this creates a portable unit that cost about \$5. Do you want to go into chemo therapy? We used this in the UAE and the instant we connected it the cancer pain

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

disappeared. It was amazing. This man had been operated on for a tumor and it re-grew he couldn't sit. His emotion was to die. After 3 weeks he came back and asked if he could use the unit. It ended the pain.

K: Last night we received a report from the man with lymphoma cancer. This is a combination of technologies he used and the tumors of 14 centimeters have reduced to much less. He has two young children and deserves to live. He could feel the work when he plugged it in. People who use this immediately feel the field forces. We will release these in coming weeks in Italy. You cannot use this willy nilly and you have to understand the gravitational force of the organ you are going to use it on. Nano coating and GANS coating have to match. You have to understand the structure of the kidney or of the liver and if the cause of the cancer is from metal such as zinc or calcium. Then by using the right GANS you interact with the seed of the cancer.

K: Zinc is connected to the emotion so there is an emotional problem when you see the blood test for a cancer patient. If you use the two units you have to use Zinc GANS. Now at the present time when we fight cancer it has a seed. We see the Chinese health reports that the tumor reduces by 80% and they cannot reduce the other 20%. With this technology you attack the seed. Why? Because in this system, the cancer became the American boat under the airplanes. You block and transfer energy to another position within the structure and dump it and you take the seed out. When there is no seed the rest cannot take energy and is indifferent to the rest of the body and the area it is in. You need balance for this cancer. This technology does not destroy; it collaborates to bring balance. This is how you take the seed, the essence of the cancer out. I have taught this to the doctors. You don't destroy the seed; you change its energy and it isn't in balance in the body and there is no need for it.

K: sometimes tests take 2 weeks come back; understand the rise and elevation in the minerals and the semi conductors in the body. That rise shows you that this material is going to be used for the seed of the cancer across the body.

K: Three world presidents have been invited to our conference in Dubai; we will see if they turn up.

K: There are different ways to apply the technology and you have to realize what is needed and how you can apply it. I have had a shoulder pain from falling off a horse for a long time. What I do is very simple. I plug this into the electricity. Be careful with the nano coating. I need to hold on to another system and allow the balance of the energies to go through my body. Notice how I hold them. The holding is very important. I am holding the totality of the magnetic-gravitational field and connect with what the cause of the pain is. I hold the 2 coils in the palm of my hand with the fingers around it. You hold another system in the other hand. When you take the straight coiled copper and put it into a circle the minute there is a pain you can use it. You can use these for cancer and you are dealing with the plasma. We change the structure by understanding the reality and the totality. What we need to do is to change the position. If you look all we have done, we have replaced solid matter of the GANS with the plasma technology.

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

K: I did not develop the letter C or U unit to bring down planes or boats. The Americans are our brothers and equal to all of us. They have chosen a path of killing as a means of control. Why have I developed this technology? In space you need to be able to control the space ahead of you. If I change this unit you will understand. We have shown control systems for flights with the 12 system outside. I need field protection of the highest direction strong enough to dilute any space particles. You create the field of protection. You want to create protection from space that nothing can touch you. The field of protection is huge and it can expand stars if you know how to do it. Now you see how we developed and it has taken me years to do this. It was not created to bring down a plane or stop a ship; it was created to protect man in space at the highest speeds of travel. The future is so far ahead of you. You can open or close the fields with the plasma technology; this is how the universe is made. I have a system in the house that protects him and he can expand it as he wants. He can receive any frequency he wants and he can shield with the plasma technology. It will shock even men in communication. Give me a satellite and you can stop a satellite from operating with this open letter C or U. Go to the controllers which are the military satellites. If they are used for military operations they will not operate. If they are used for peace operations they will operate.

K: The GPS – the American satellites that were no longer necessary were thought up by a man in Tel Aviv. He developed the technology in England. We have hundreds of satellites that become part of the peace plan today. Don't forget every man has the power to test it, but don't block the communication satellites that we need. When they asked me in Brussels how the American plane was taken, I asked one of the CIA guys for his napkin. This was explained to the American officials on the back of the napkin in the back of a café at the American Embassy in Brussels. It took less than \$10 to capture that American drone. We can use this knowledge for peace. We have all the tools to live a comfortable life and one of the biggest problems for man is how to create the peace without the fear that others will use the technology. It's easy—trust in your soul and the decision is correct.

K: Now we have learned of a tool of peace and now we will learn the language of space so we don't make the mistakes of destruction. We could have peace for the men of this planet and the universe. We will bring peace to space. From now on every day and every presentation will break new barriers that forces man to choose peace without a single bullet. We have shown the tool of health is also the tool of peace and the tool of protection in space. If you understood the systems you will see you can create systems that feed mankind without man having to feed himself.

K: Rick has moved across Canada to find out how to feed himself with this technology.

R: We are here and I am together with several working on Keshe Foundation in Canada and do some of the projects. You can see the device in the background. There is the Magrav unit in this and it was purchased by Z. and given to A. to use with his system. It needs an adaptor to plug into.

A: As a group we gathered in a circle and pray for the planet for love and peace. We wished everyone well on the planet as the first step to send energy. The second phase was to receive energy and balance our own bodies so we can be balanced and operate well. The energy got calmer. We use the palms of our hands to connect with the fields. While we were sending the energy I felt the surge

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

of energy. It was a prayer and the source of creation will hear it. Balancing the body takes longer because it is connected to the emotion. We tried to use our bodies as transmitters to ourselves and to family members. WE connected and interacted.

R: I have an old knee injury and it started aching and I had to rub. That wasn't negative and it's where the energy was binding up and trying to get through. If I had stayed and worked with it, it might have freed up more. People are having good results with the pen and the wraps combined for knees.

A: Melanie went inside the system and it's stronger and more interactive.

M: I went underneath and it felt like I was crawling into the core and I asked for permission. I could feel and see the angels and felt deep healing and I had an emotional release.

Z: This was profound. I can still feel it. There is like a boundary interface and a visceral pressure gradient with the plasma of my physicality and my emotional center. It would change as I moved several feet away and then walk like a penguin moving left and right to detect the difference in gradients and this was easier than walking directly toward it. There was a field strength difference like the difference between the egg white and the egg yolk. I have a tendency to position myself away from the ground and this was very grounding and it was a balanced energy.

T: My approach is different and I'm not used to sensing things and it seems objective to me. I have to adapt to this and it is a different approach. I felt when I stepped into the room there was an atmosphere like a temple. I tried to sense the whole thing and I felt a strong pressure in the heart region that was hard to bear.

R: You felt this when you came in the room. Your heart knew right off the bat.

A: The more that people come in we connect with our energy systems. It's a bigger field and if everyone has the same intention for peace and love it multiplies by hundreds of thousands. Then we said we wanted to experience drinking really good spring water.

R: I was quite dry before we did this and I was no longer thirsty.

M: I felt hydrated after we did this.

T: I was thirsty when you mentioned it and I felt that mouth was doing tricks and I wasn't as thirsty ...then my mind took over to say I was thirsty.

Z: That was my first attempt and it was interesting. I took a nap later and I woke up with a drool like R described and I don't usually do this when sleeping. This would be the side effect I had.

A: We did the fruit experiment and everyone picked up a fruit and tried to 'taste' the fruit.

M: I picked the watermelon.

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

Z: I wasn't hungry; usually I just desire coffee. It's the understanding that it brings in what one needs and maybe not what one desires.

T: I tried to put myself in it and trying to 'taste' the blueberry. I don't know if I was nourished. I didn't have the taste in my mouth.

A: There are a few groups that have come to my place and it changes the energy. People come in with reservations and doubt and when they come closer they relax and they open up energetically and it brings people together in a deep way. When you first came you were strangers and then it felt like we'd known each other for years.

T: The unit facilitates this in a faster way.

A: So Donald Trump wants to build a huge wall and that is stupid when we want to create peace and this is creating fear and separation.

Z: We are not in that jurisdiction but we will ask for a change for the good.

A: We had a change in Canada and they are down to earth and here to serve people. We hope to see more leaders here to serve as leaders to serve people.

K: You affect the emotion of the whole place. Hate has sold a lot and fear has delivered a lot. Many have made money off of this. Trump creates division. People who get to the position with billions back up family to continue it. You see the ruthlessness of your ex-prime minister of Canada. These people are temporary and we look at the long term. Today we show how the defense technology has become to the arrows of the man in Africa. The people who instigate war are just temporary. The governments are always temporary. They come to create mayhem for the bank account. Do we need presidents or all we all presidents who are peaceful and don't need the tools of war. We don't take sides. So don't fan the fires in your presentations. We call for the hand of peace with these presidents. We don't see the separation and the walls are there to create money for a few. We have seen this in Canada where I was for 11 days. Where is your prime minister now? He has lost his immunity. Soon we will see other world leaders who hide in the tunnels and the rat holes, these leaders will be crying for protection with the UN passport. These petitions will come down and we don't interfere. We change the structure and we don't interfere. Let them build their wall and they become the prisoner of their own wall.

K: I want to ask Z. a question. First of you explain your background as you have a different experience of life and people need to see your experience. You are a student of the Keshe foundation. You have been trained by life training to have a different approach to the energies and feelings in the body of man.

Z: My interest was in the realm of anthropology which I pursued in the university. It gave me some tools of observation and the ability in my research to come across many modalities across the world which I assimilated. Those have been highly beneficial when I started working with plasma

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

interactions. They have always been here but they were apprehended and interacted with by many spiritual traditions, ancient ones. A lot of them could not comprehend the full picture so this brings the opportunity to get a fuller picture and make it more useful for all of us.

K: I will explain something. You said when you walked in you could feel the energy when you were going through a 'barrier,' and you explained it as the interface between the white and the yolk of an egg. Where did you feel the feeling first—in your stomach or your heart?

Z: It was simultaneous and I felt it in my emotional center and my heart and also my solar plexus area and my heart palpitated at one point. Every step when I was 'penguin walking' (leaning from right to left) I noticed the field was bumpy and A also confirmed this was bumpy and not a smooth sphere. It was a bumpiness of the earth if you were to subtract the water off the planet. It's quite a bumpy planet. Speaking of the yolk, as I got really close there was a membrane I could feel where the gradient was concentrated.

K: did you feel you were walking into an energy field?

Z: I use the word plasma field because I realize that it is a sphere and it radiates out from the center.

K: Let me ask you a question. As you walk toward it did you feel the energy goes across your body or was it around you as if you walked into water? Did it go from the face to the back of the head?

Z: That is correct. It was stronger part in the front as I walked toward it.

K: If you go back to the teaching as I go back to 8 years ago, we had a very powerful system and I called this the 'tickle' factor. When you walk into such a short field you tend to feel it and it touches you and it is like when someone puts a hand on your stomach and tries to tickle you. You feel the pressure of the touch and I call this the tickle factor because it touches you and it's an invisible hand. Many times in lab in Iran people didn't know what I was doing but they walked into this plasma barrier and we called it the change. This is the tickle factor. When you touch it you bend forward you feel it. This shows you are entering a new plasma strength which you feel in the center of your body. This is what we call the kuna maier (?). It is nice to see that you feel that as you walk into it.

K: The next step for you, A, is very simple and all of you can do it. Find a point that all of you agree to be the barrier, the point where you can feel the force more strongly. Then start adjusting your coils in one direction until you start seeing light. Now you have a very powerful system. You need to adjust the coil base slightly and then from the point where you feel that point that tickle factor where you walk in, then interact more with the other two bases and you should see the structure of the aircraft, the space ship. Now you some of you can create the boundary and try to feel it and you try to see the strength and to see if the strength increases or reduces. Use the Magrav power system and that will give you the total energy you need.

K: You can (can't?) control it because these Magrav systems carry copper oxide in a small amount with the CO₂. We loaded them that way for the future. If you can adjust one of the base sides in the

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

side near the walls you should be able once you connect the power unit and you play with it to create the first 'shimmers.' This is what we call the bright light in the sky. You will not see them on the other side or you may see them if you created a balance. You create the interface between your system plasma and the plasma of the planet. Now having such a powerful system with Magrav unit it should be much easier to see the shimmers first. And then you should see the first of the spaceship. Be careful; you can walk into it to dismantle it and then you have a structure in your room and you can't do anything with it. Start with one side as you said it felt very bumpy. Try to move your magnetic and gravitational coils back and forth. It is going to be a trial. It may not happen for a month or two. If I was there I could do this for you in a day.

K: part of creating the shimmer and the structure is to create your own emotion. It is the desire to create peace and bring the balance. Move one of the three bases very slowly, fraction by fraction. Increase the power supply as your plasma very slowly and then see when you will see the shimmers. It is like light without anything else. This is the boundary of your spaceship. You have to adjust your coils. You are very, very close because a number of you can see and feel the barriers and now you have to bring the 3 layers with 2 layers in the background and one in the front. Then you have to adjust the others to build your spaceship. If you do it right with adjusting for a couple of weeks or months you should be in the flight position.

K: It is beautiful to see all of you together. I hope to see most of you in Dubai.

K: Is Benjamin with us? Last week they had no power in Ghana for the internet to be powered up. Next week if we can't get Benjamin we will release reports and we go to the next step to compare the sediments and the microbiology. They told us they have seen a huge difference.

M: I want to share some information. It is about the fields the plasma devices make.

K: Make sure we do not see your desk top.

M: The device is connected to the light and the light wire goes to the device and you can see the plasma field around it. I have another one that is not connected. But it is giving a reading. We can prove that when connected they make a red connection. I was testing and they will hold the plasma device and it was giving reading in their bodies.

M: I have this bottle with chicken mesh and it will.

K: Move away and let's see how long until the light goes off. Go back to your connected coil and move away from it and see when the pen finishes. Go to the coil connected to the ring itself. Move backwards to the camera so I can see where the light goes off. When the light goes off that is your shielding and your barrier for your coils. Bring the separate coil and see if you extend the boundary of the first coil. When you move the coil the pen will still work. We showed this in the emotional unit...the extent of the plasma is huge. Come back out. If you put the other coil to the edge of where the light was on.

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

M: This one has magnets.

K: The magnet state is too weak and we have shown that. What you have to do and it doesn't matter where you put. Take the magnet coil away. Bring the connected coil to the middle of the table and keep it in the sphere shape and let it lie on the ground. Move back and you see the field. Don't touch it because you become part of the system. Can you stand that set of coils on its own? Put a book behind it so it can stay in the p spherical shape. Move back to the camera. Go forward and you see where it lights up. Now go to up and the distance up is much bigger than on the table because the table absorbs part of the plasma. It uses it. If you could hang your system in the air you will be amazed at what the fields can be. This is what we show with A. When he hooks the Magrav unit he will increase the power because the coils are hanging. Then you find you can create beautiful magnetic gravitational fields which is the initial shielding. All of you doing this are on the verge of creating the spaceship. You are creating matter, the state of tangibility out of the interaction of the gravitational magnetic fields.

K: The coil you carry with the external and the internal create the total spherical condition so the field forces are having both gravity and magnetical and the magnetical internally to the gravitational. The center ring is stability and the outer ring is shielding. The inner ring creates the dimension of holding on to and the outside ring creates the balance condition. This is a beautiful presentation; it is gorgeous.

M: There is CO2 GANS, the nano copper coil, a little of the liquid of the nano coating process which is a blue liquid that I put inside and some _____.

M: I made a second tube I'd like to show you. It is an improvement.

K: Make sure we don't see your screen as there are hackers in Germany and Belgium standing by to take a photo and take down your system. These are internet terrorists. There are people in the government trying to jam everything.

M: The second tube has a rack that we can put inside.

K: Is that copper or coils on each other.

M: The sphere is copper and I am going to make a reactor. I made the inside coil (inside the coil). There is a copper pair of coils inside a smaller glass above this.

K: I hope people realize the time, effort and ingenuity to build this. He is combining the dynamic coil system with the core system and a multi-layer coil system. There are 3 spheres inside each other. If you are putting GANS in the copper sphere and having 3 spheres inside each other, make sure the heaviest of the GANS is in the center core and the lightest of the GANS is in the outer core. The heavy center core will attract the gravitational pull and extract the fields from the environment and you will find your system will work perfectly. Try to use something like copper oxide. You can use phosphorus or the lead GANS for the center. In one of the teachings we emphasize that the amount of

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

the GANS is not important. The way you load the GANS is important. If you mix a small amount of GANS in the large volume of the water it is more effective than loading huge amount of GANS in a small amount of water. When you have a little GANS the field effect is still the same so when you start loading up the system you maximize the load of the GANS; try to use a moderate amount of GANS. Use more liquid water because the interaction of the layers itself will create the gravitational magnetic field. The gravitational magnetic field of the planet is not the plasma itself; it is the plasma being able to float with the centrifuge rotation of the inner core. Take that into consideration when you load up and you find you create a huge magnetic field.

M: I have experienced that we can put things outside of the cube. We can put coils outside when we use these different sizes of crystal containers. We can put the piece outside and have a different position outside of the stacker on the inside of the cube. I can put this above the cube also.

M: I am making a GANS and inside is a copper plate and I put CO₃ inside. I have another GANS of nickel. I have used apple cider vinegar in one of the GANS.

K: If you use the apple vinegar with the fluid of the GANS of the copper and the zinc this may give us a new battery operation and this would be instead of using the salts. This might give you a better reaction. If you put a nano coated coil in the pen this will give you very powerful energy. The energy released by the GANS gets absorbed by the nano-coated coil and it becomes very powerful energy.

K: I explained this before: You separated the matter into a nano and then you made it into a GANS. If the GANS is more powerful than the nano and the matter state you put in it the field forces from the stronger GANS will force the energy into the matter state and the energy of the plasmatic condition from the matter. So, what you have brought the Keshe Foundation has done. They have inserted nano coated material into the GANS material and we see a very powerful energy.

K: M put the GANS on the table.

R: We have the GANS and we put a nano coated coil inside and we were able to plug the energy of the GANS into any electrical system. We should identify the strength of the GANS in the container. Is it more magnetical or is it more gravitational. When we identify that we can copy it to a battery and another container on the battery. Our understanding of the plasma always connects to the gravitational and the gravitational always connects with the magnetical. We can apply GANS from a container with nano coated copper inside and we are able to trap the energy and make a power supply for a magnetical or a gravitational.

M: I was making this in my home and the weather was very hot. My skin is very sensitive and I could feel the plasma fields. I was making the capacitor and my skin was sensitive and in the night when I got done, I connected it and I was able to field the energy from the plasma. I had to make it less hot in my body. It was hotter.

M: I have an argument with a person who said the energy was going from the tube. She was surprised as she was able to feel the energy coming from the tube.

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

M: she had a device and had a meeting and the environment was not very friendly. She was talking about a plasma device and she thought it was interacting with the group because after they were friendly.

K: A brought this up about Donald Trump; carry plasma reactors to his meetings and we will see if we change the man. Maybe he finds peace at the table in the discussions. Put plasma reactors in your pocket and go to the meetings and change the environment and maybe change the man.

K: here is a piece of information. What was happening in Ghana in the GANS they are producing they see a huge change of energy production by adding starch to the GANS. In a way the starch has the parameters of the copper. What has come up in Ghana is they use this very effectively. As we do in the factory we add a small amount of NAOH which guarantees the production of coating. This continually resurfaces itself. This is what we did with the new generation of the power generators and systems cannot break. We have added a small amount of sugar to CH₃ but what Ghana is doing is much easier—you add a little starch and the NAOH is there and it continually produces the GANS and the hydrogen is available. Your systems become much more powerful.

K: M just showed us the GANS of tomato. Tomato according to the research, we see a huge reduction in the number of prostate cancers in Italy. In the Italian community compared to the rest of the world and when you cook tomato it creates a chemical effect that interacts and is beneficial for prostate and prostate cancer. What is important is if you are developing for medical application try to create a GANS with cooked tomato with the skin that you can replicate the plasma energy of the tomato in the specific reactors, rings and coils that you make. That energy can be in such specific coils for cancer. We have seen the changes and how it works. Test this on the prostate cancer. A man delayed this for 10 weeks and delayed his surgery and then did not need the surgery. He is one of the health people that helped us with the coma patient. He called after a few weeks and they did a preoperative check and they could not find the cancer. Present knowledge tells us that we understand the plasma in respect to the prostate and the plasmatic energy of the tomato affects the structure in the stomach with certain cancers. We know from the research that if you can use and produce a GANS with the tomato in the skin, in that cooking there is a layer in the skin of the tomato which is in balance with the balancing of the emotion and it works.

K: Thank you M for sharing with you; thank you for the knowledge.

R: I am from the US and I'd like to show you my health unit. We remove the set of coils and there is one with the batteries and we have to remove some coils. So now I have a box and I remove them out of the box and each of them is removable. I created another box to stack the coils like books.

K: You can change the nano coating—this is brilliant.

R: I made a helmet and found a way to rotate every coil. 4:07:28 minutes.

R: We can remove those coils or put them back or remove the center or the outside. All the coils are made of nano-coated copper. I have a new helmet waiting for the C-wire. And I found a company

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

that will build it with the zinc. On the bottom of the standing unit there is a container of water and there will be Plexiglas to protect the jar of water. I have all the pens connected to this unit someone would stand inside of. I remember when you first taught us when we were in front of Jack's device and feeding from it. You said we have to give before we receive. This is incredible and if I go inside this unit I don't feel much energy. But if I address the entity or consciousness of the device before I step into it (almost looks like an airlines scanner device) then I receive the energy. If I give love and gratitude to this energy that is coming to assist with peace I feel a wave of energy that lasts 30 seconds to 1.5 minutes. I ask for peace and then I ask for love for my body and every time I ask there are waves of energy coming to my body. I can ask it to bring energy to any part of my body and I feel incredible. I have had so many beautiful experiences with people. One woman wanted to come because she could see a field (a bubble) around my house. It happened 2 months ago.

R: Now the woman brought me a drawing because she can see the connection with the neighbor's house. And it goes toward all the houses in the neighborhood and creating little bubbles of energy towards the other houses. I live in a place with open minded people. I have some patients to discuss with you. I am a doctor and I have 2 severe cancer cases.

K: You are a medical doctor? This system you have in front of you. You made a beautiful frame and you have to add to the bottom part of the frame. What is interesting is that now you have covered the top of the body; you need to add a section to the leg part. Let me show you as I have built it before. What is important is that you need a unit facing the other side of the bottom and must have a specific structure. You have to have 3 leg systems and not 2. you must have 3 layers and what you do in the cancer cases...the lymph is too big and you need to reduce the size and the outside coils has to be magnetical to take the energy away from the lymph outside the bone. Your filter ones have to be gravitational so once the lymph crosses the bone and becomes part of the bone marrow and you energize it to increase the immune system. This is very important and we are working with a special chemotherapy case in Germany. Do not connect the outside to the inside. Increase your coils. Now you see G. on my side and what you see is that the tissue muscle is outside and the bone is inside. What happens with the chemotherapy is that the lymph is energized too big and cannot cross the bone inside so you take the energy to bring it to the strength so that when it comes to the bone marrow you energize the bone marrow to add to the immune system. In that way you allow the body itself to create its own protection and once that comes in there is no need for chemo therapy. Take the energy and make sure it stays in line especially with the femur. The femur is a very big bone and you take energy from it. The stomach energy is absorbed to the lymph and it goes to be absorbed by the bone to become what you call the amino acids and in the way DNA, your DNA is produced from it and then it attaches itself to the amino acids.

K: What you need to do is you make a system that is very easy to make. You have the bone marrow in the center. The lymph cells are very big because of the chemo therapy and this is the problem with chemo therapy. The cells are too big to pass into the bone and it cannot go through the holes in the bone. You need a triple layer system and take away the energy to reduce the size of the lymph to small enough to go through the bone. In that process it mixes the condition with the phosphorus (?).

Transcript from 108th Knowledge Seekers Workshop held Apr 26, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

The majority of the phosphorus in the body sits in your bones. Wherever the bone marrow, the lymph adds to itself that is going through the body through the bone and that phosphorus becomes your DNA and by the time it comes to the lymph then it becomes amino acid with the full DNA structure. What you brain adds to it may complete the DNA at the top of the bone or by the sucking of the blood that is going up from the bone and this becomes the T-cells. When you build the system you need to build the system in a way to extract plasmatic energy at the point outside the bone and then once in the bone you have to add. Remember the simple thing about the magnets. Two north poles add energy; two opposite poles are the field forces. Two south poles take energy away. You have matching systems around the leg and around the torso and they must match. The way you set this up is how you gravitational to magnetical and magnetical to gravitational. Try to make the batteries from the back of the body to the front.

K: Your structure is perfect. Add energy remember to use 2 north poles. The energy has no where to go but out. If you want to reduce energy in your plasma in your system you put two south poles. That means you extract energy because the south poles are where the fields go through. When you want to create a passive field you use north to south. Exit with exit (north to north) gives you power. Entry with entry (south with south) gives you drainage. Exit to entry gives you a flow. This is how I set all my systems for years. Now you have a system for the upper part and you help the body. Every bone creates its own bone marrow. That is why you have the bone structure. The majority of your immune system comes from your femur so you need two of these units on both legs. These are small, long units and I usually use a very small long system and I place the strong coils...stagger your coils and don't put them in a line. You strengthen the bone marrow and decrease the energy of the chemicals from the chemotherapy. This is why I support chemo therapy and I have 2 years of blood cells. You T cells and B (D?) cells will come into operation and you have a system where the body controls itself and you don't have to worry about secondary cancers.

R: Can I use 18 gauge wire instead of 14 gauge?

K: You can use anything; the gauge doesn't matter. Try to have two separate systems. All legs are not the same. This system is extremely effective for child leukemia. What you do is strengthen the bone marrow and get rid of the problem of not enough red blood cells.

R: A woman with breast cancer is using this and had a lumpectomy. She had a baby and had metastases in the right hip and had a hip replacement. She has metastases in the ovaries and the lobes in the brain. She comes here every day and feels energized and she is on chemotherapy. I haven't been able to figure out how to use the helmet to help with the brain tumors.

K: You have to understand the forces. The cancer cells have traveled up the spinal cord to the brain. What it is in the brain it is a clear indication that the cancer has found a zinc connection. Most of the neuro system support comes through the zinc. You have to produce one of the coil systems you made for the helmet and nano coat them with the zinc and put them in the reverse polarity. Do not put them on the magnetical. You have to put them on the gravitational. All of them have to be gravitationally connected and you connect your gravitational system and you connect your magneticals into a zinc.

You take the energy from the zinc and take energy out of the zinc. This explains why it is in the breast and the womb because these are associated with reproduction and the only solution at this late stage is to deplete the zinc from the energy. We see this with people with the mobile phone tumors. You need to zinc hold your system. The whole GANS is enough with no CO₂ or CH₃ GANS because they work with the cancer. You have to connect to the gravitational entry and take energy from the magnetical and you must make sure it is the same with all; the cancer has gone everywhere. It might bring emotional depression for awhile; just carry on through it.

R: so I change the coals on the helmet.

K: The center coils of everyone you will make gravitational. You connect the magnetical ones with the zinc. Most likely by adjusting the gravity by twisting you can adjust to the zinc. You need to position all and connect your supply and do not use the Magrav unit but use a very light GANS battery supply, maybe 4 for the whole system.

K: You have your inner coil and your outer coil. You have the inner gravitational coil of each one. You have to connect your battery to the gravitational and do not connect the inside set of coils to the outside set of coils. Connect the magnetical of the outside coil outside and not to the inside set of coils. The health units in specific cases must have small variations and the Magrav would not be used. You have to deplete energy from the brain cells and you will see some depression for a couple of weeks. Do this 3 or 4 times a day for 45 minutes to an hour. You have to introduce it and let the body learn from it. The brain will learn to create the balance. There is a 5 to 10% chance of survival after it goes into the spinal cord. You can also strengthen the coil for the leg and energize it with CO₂ nano coating. Don't add zinc to the leg system.

K: If you look at the skull it is not solid and it has a layer and the liquid from the skin of the skull, lymph is created and this bone is exactly like the femur. It has an intermediary section which is the bone marrow of the skull and it creates its own amino acid and you can use CO₂ GANS by putting it inside the helmet and let the lady wear it. that allows because of the way the brain works, the amino acid in the brain is the same structure as the bone and as it comes through it sinks in to become part of the brain and you can dictate the change. Give her the helmet with the CO₂ health pad to increase production of the amino acid. You have to strengthen the immune system of the amino acid of the skull. You need to increase the immune system of the brain with the CO₂ patches in the helmet and you allow the bone immune system of the skull to increase by wearing the helmet 3 hours a day. You have to create 2 dilutions of the CO₂ GANS—one is very powerful and one is very weak. The strong powerful one will wash through. Brain cells cannot defend themselves because they cannot receive the immune system from the skull so you have to wash the blocked channels. You have to use the weak one to feed it and the powerful one to wash it. Normally this takes 3 months. You create the immune system. If you look at the skull of the man and put the brain inside it, the brain cells are produced by calcium DNA dropping off the liquid of the skull layers and they sink to the center of the brain. You can control the production of the brain cells.

K: The patches will dictate to the nearest areas in the brain. You can control this with the children with disabilities that lack of oxygen caused something not to produce right. You use the same technique as I have just shown you. You can specify paralyzed areas of the body or brain hemorrhage. You can support the growth of the cells and the man rights everything. This has taken 20 years to develop. You have to understand the process of how the brain works. You have to bring zinc support for the emotion. You bring CO₂ and you bring zinc oxide to support the emotional disease. Alzheimer's is an emotional disease and you support this with the zinc and CO₂. What you have to do with Alzheimer's I drop in the support and it takes 2 months. With the side systems I support the emotions. This teaching is for doctors who understand. Let us develop the medical team to support this. We teach in different languages for scientists.

K: Try to use the cups on the helmet. Wherever you see the tumor use only the system that is near the tumor on the helmet. Adjust the system according to that. Try to handle one area at a time and just target the field of the cancer. You can make a team of doctors and do teachings on Weds afternoons and we can go case by case and how to adjust the system.

K: You create extraction forces of energies and this is a special setup and I use the ring magnets. This is specific job for a specific cancer. This case was special as the tumor came to the amino acid of the spine and traveled to the brain.
