GANS Supplement: Improve immune system function, protect against age-associated health decline. Our immune system is everything that enables us to defend our bodies against disease-causing microorganisms. GANS supports our immune system by providing an additional deterrent against microbes. Keshe: Because you digest this as a gravitational-magnetic field the energy as we call energy gravitational-magnetic field is absorbed by your digestive system and by your lymphs and then it is the lymph which becomes part of the immune system by going through your bone. You strengthen the immune system by strengthening the weaknesses in your lymph and the body only takes what it needs. We see this as the possible solution for most of the auto-immune disease. It is possible from our point of view as we have seen. What we need to see is if you have an autoimmune condition. This is a new health technology and not a pharmaceutical but a GANS solution of natural material that we complete. Once the trial is complete we release the blueprint that everybody can use. We will manage to complete this in 4 or 5 months with data from 30,000 people around the world.

GANS lotion: GANS lotion is an extra-ordinary skin care product used to treat against a variety of skin conditions including wrinkles and UV-induced dark spots. GANS lotion boosts cellular energy products in support the damaged skin cell to repair itself while protecting skin from microbial activity. Keshe: the lotion has a direct effect on burns; pain disappears quickly and wounds heal quickly. We have seen extraordinary behavior from the material in the past.

GANS Eye Drop: GANS eye drop is a new ophthalmic product to support eye health. GANS eye drop contains energized GANS water to enhance metabolism and process numerous eye diseases like cataract, glaucoma and dry eye.

Keshe: With the eye drops the energy transformation is to change the condition of cataracts, for example. For the first time we understand what cataract means. Cataract is and comes of the age when emotionally you do not want to see what is around you with your eyes. It is too hard to see and eyeless, you shut down the body. When it comes to the emotion of the sight the body shuts down the sight because it does not want to see the pain of life, or the causes of pain of life. Cataract in principle is psychosomatic. Changes should work well for cataract. Eye drops should not be used with people who have had lens put in; don't use this for people who have had eye operations or use contact lenses.

The Keshe Foundation is offering GANS products to provide alternative processing of different issues.

Keshe: We want to see joint use of the eye drops and the supplements for people with migraines. From today we change the course of space technology. In the teachings of the past couple of weeks I have shown you the health units. Last week we showed a tool that creates the magnetic gravitational

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

field forces that creates the separation which is the strength of the emotion that led to the drop of the cancer cells from the breast of the woman. I told you I would bring the breast cells for you to see. The system has given freedom to the cells of the body to be released. You can see the pieces of the breast that body decided to reject using the system. This is about 10 to 15 grams. This was the piece of cancer the body ejected without the body being touched. We have jars of this that the body rejected. The hospital and the patient collected this in bottles. We have  $\frac{3}{4}$  of the tumor in this container; one quarter is kept by the doctors at the hospital who have never seen the body reject the tissue. The minute we place this unit, within 2 hours pieces of the cancer was rejected by the body. These were large chunks. This is important because now we can show the correctness of the technology in totality. These are early trials of the breast cancer. If you have cancers such as breast cancer and want to test if we can support this with the supplements. There are millions of energized GANS in the capsules and we are counting that this will help the body reject the cancer cells. We are looking for humanity to go to the next step and for pharmaceuticals to be the helpers and not the destroyers. We are not fighting with the pharmacy people; we are giving them a new direction to bring a new dimension of health for man. Once we have the data then we will release all the data.

K: Every one of you should be able to help. The reporting will be done section by section: Parasites, virus, and cancer. Report the good and the bad. We don't think there will be any bad. This is a natural material; when you eat food it goes to the stomach to convert to a gans. Now you take the GANS as a natural product. It could be a replacement in nations that don't have folic acid to support pregnant mothers. The proviso with the trial is that you have to sign the agreement on the website and we only accept the data for those who sign the agreement; you are a human volunteer to help others. If you buy the product or donate to the GANS trial, you can do whatever you like. In the trial we need to clarify the dosage, the material and the collected data.

K: There are paid dis-informants against the MAGRAV systems. We only take the data from those who sign the form.

K: Parents have to state what the drops are being used for with children with bad eyesight. You must consult with your doctor. This is not a clinical trial. GANS is used for cleaning up the water; it is industrial, commercial, and agricultural and now we test it under controlled conditions for people. We are not claiming this as a clinical trial but a material with industrial, commercial and agricultural. We will receive support from China, Iran. In Africa we support scientists to become data analysts. This is for the support of people on the planet. We have contacts with UK and Italian nuclear scientists. We bring this openly.

There are 3 products to choose from at the bottom of the page:

(1:03:43)

K: go back to the first time we did the teaching about 200 times ago, talking about how to make nano material. Then we opened the institute and we have the first students. The second team of knowledge seekers of Keshe Foundation was stated May 5, 2015 and they finish tomorrow. This is the second group of nano scientists to complete their training.

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

We have the 3rd year of the Knowledge Seekers that started in January. The numbers are increasing per term, per lecture, and per year. These are the scientists of the technology. I took you step by step and line by line from one to another to carry enough people with us and the knowledge will not be hidden, closed for the privilege of a few. The true space technology starts from today.

K: We manage to change what we have as molecular to make it a matter state to the same but in the nano singularity of the atom.

K: The breast cancer was on the outside of the breast and not the inside of the breast.

K: We are still in the matter state with the nano state. In conjunction with bringing the condition to nano state we added a new condition. Then we added salt. We still have a plasma that manifests itself in a matter state and we have to have a GANS. This has been the knowledge of man. This is why we launched the GANS for the trials because we know that it creates the effects. Now we start the cycle of the space technology. We created the GANS and we know the energy is there from the first time we show the massive power. There were many who accused the KESHE foundation ... they are paid to do this. There is something wrong with people's equipment? They have no understanding of the science.

K: We have seen the GANS and the effect of people where we used the GANS on the coils and you report power energy reduction, the cleaning of the water. We could create energy and there are applications of the coils in Health. We know how the field forces will come to operate. We come to another point. Up to here we are in the power of the GANS and the energy of the plasma and now we go into the true space technology. In space the interaction and strength of the fields leads to the creation and conditions of the elements of the universe. What we need to have is not the matter state but to be able to replicate the condition of the universe with the presence of the fields. But in the world of man we have tools to facilitate this presentation.

K: What are the data and papers produced by Benjamin? When you put the GANS into the river water you saw sediments; microbiologists confirm the destruction of the virus and the germs in the river water. We know the power is there. We added the GANS to the coils and we saw the energy and people reported the hybridization of electromagnetic energy and plasma energy reducing energy consumption. We have seen the power of the GANS from our friends in Australia and how a minute amount can change the growth of vegetation by 3 times. We have seen all these hidden energies. We know there is an energy power and it is time to harvest the power. To harvest the power of the GANS we have to be able to separate the GANS from the estate to one mono-element. We go back to the teachings where we have the transparent bowls where the GANS was put in the liquid. The people who made the first coils had the void in the center.

K: In that process from 2 years ago with the GANS I referred to this element and the knowledge was not there with you and you did not understand. When you look at the way the coil was set it is very simple: We created the core and we loaded it and we put GANS and water and then we spun the

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

core; what we achieved and saw was simple and it was the separation of the GANS to the boundary and there was an accumulation of the water and the hollow center.

K: Many times I explained that the water in that state was in the state of the GANS. The replication of this is in the human body; there is the structure of the water is in the GANS state and not in the molecular atomic water. I referred to this 2 years ago about the water to be in the GANS estate. Nobody understood so we went with the depth of the teaching because you know when you carry information of the magnetic gravitational state into the matter, the matter keeps within distance and structure the information of the plasmatic condition. Water itself on this planet is magnetic-gravitational and that is why we get germs in the waters and contamination in the waters. It allows the germs and contamination to absorb and hold due to the gravitational property of the mass. This is GANS mass of oxygen to most of the elements that come into it; that are how you get the contamination of the water due to the gravitational mass of the oxygen.

K: In this process when you create the centrifuge of the rotation where the GANS of the heavy element go to the boundary it is because of the interaction of the magnetic condition of the earth and the water stays in the center and the hollow center is the principal matter. In the center there is a vortex and a hollow and then you have the water and then what you see is that you have the GANS on the outside. What we see and said from the beginning is this water is matter estate and other is in the GANS state. You can see that adding of the GANS to the waters in Ghana and we showed the property of the GANS in its totality. In Ghana they showed us they used the water from two rivers and they showed us in their report that they used the CO<sub>2</sub> and the copper oxide which cleaned up most things and they had to re-do their reading as the copper oxide GANS cleaned up most of the things.

K: In this rotation we saw the GANS water and in the application we saw the power of the copper GANS in the green in the rotation. It was able to dictate the creation of the GANS water and the separation of the higher order of the magnetic-gravitational fields which were in the center. What happened is that the field forces of the GANS push in and as they receive they push back to clearly hold and create this massive environment of empty space to create energy. This contains a HUGE amount of magnetic-gravitational fields. There is so much contained in the plasma. Then we went another further in understanding and we understood the effectiveness of this. We know the GANS has the power to interact with the water and in conjunction with the magnetic-gravitational field of the water can create field forces that any sediment and any mater. We know there is gold in the water in Ghana. We are told that they are mining for gold, silver and platinum in the rivers; it has so much power to clean up the water.

K: It can create sediment. What does this mean? It means the gravitational field forces and you can see the clearance in the water of the control system, how it cleans up. This shows that if you understand this process, I asked R. broke into this dimension and it was natural to him. When I saw this I asked R. To explain how he moved away from the GANS to the next step which is the true space technology and the condition of the plasma? R. broke the barrier through in his understanding and I said when someone showed the understanding I would bring forth the knowledge and that is

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

why we have this teaching today. We have moved away from matter estate of the plasma in respect to the creator of his own. This means we don't need to have the GANS of CO<sub>2</sub> to carry the energy of CO<sub>2</sub>. We do not need to have the GANS of copper oxide to carry the energy of copper oxide. Now that we have seen the water clearing and we have the application of the water and the coils from Bernie and we have seen how the rotation of the material came about.

K: In the past 2 weeks we went into the next two steps of plasma technology that we can go into the space direction. If you look at the systems that A. made and what we saw with Rick and others in Canada they said they could feel a 'lumpy' feeling. Why? They did not use the correct mixtures. We don't use exact mixtures and that is why it was lumpy. We were testing in the background what could be discussed in the plasma technology and we call it liquid plasma. [Liquidplasma.com](http://Liquidplasma.com) and [liquidplasma.org](http://liquidplasma.org) has been bought by the Keshe Foundation to launch newer space technology. Liquid plasma is the water. Now we go to the next step; we went from use of the GANS itself, to the water of the GANS which is the next and true, ultimate technology for use in the creation of space technology for motion. This test was done for me in Japan. There was GANS copper oxide. We don't touch what happened in Ghana or in the creation for agriculture applications. We went directly for the water of the GANS and this test had contaminated water from near Tokyo. This is CO<sub>2</sub> GANS in the state of water. In the next picture we introduced only the water and not the GANS. Now we see process without the GANS of CO<sub>2</sub> but with the information of the gravitational magnetic field embedded in the water.

K: Now for the first time we show independence from the material in plasma technology and that we can carry the information from the matter of the entity within another structure in the environment. If you go to Planet Zeus and there is not water, but the combination could be potassium, then now the water of that potassium could be your mixture. You have to carry the knowledge of the space technology. So, now we added the water which carries the embedded information into the gravitational magnetic field inside the plasma of the oxygen.

K: In the pictures shown you see the separation of the contamination in the water. The level of separation shown on the screen is very important and in the future I explain why. We see the conditions that show the fields of separation within the bottle. This is what we saw with the rotation where the center was empty with nothing in it when we had the coil. This time it is a cylindrical container. The next picture shows that you do not need to have the GANS to transfer the energy in a homogenous manner. In the last picture the water is completely clear; the interesting part is that the water still carries the information of the GANS and the magnetic-gravitational field. Now it has multiplied. It is in balance with the rest. This is the new concept in the space technology.

K: What is the next step? We don't have to carry copper, zinc and everything else and to worry if you got the mixture right or there was something wrong. Now what we do is to transfer the energy of the GANS into the water and if you understand this, when you make a cup with the water in it you have the property of every material in homogenous level. So we have managed to produce the liquid plasma for the first time and you do not need to have the matter. You add a few drops of copper oxide liquid water and a few drops of zinc and a few drops of GANS of CO<sub>2</sub> and you start building

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

the core independent of the material. This is the promise of the \_\_\_\_\_ mutation of the elements. Now you have the totality of the structure and you don't need to have the matter but you carry the property of the matter.

K: Last week I asked Arman, a genius in these things, to build a reactor with the GANS water of the elements. He is doing this. The core condition: you don't have to put the elements in for the GANS separation; now we go into the condition delivering the GANS with all the proper magnetic-gravitational fields inside it and the core itself becomes homogenous liquid plasma. What happens is now you have a core and there is no matter state of separation. You have a plasma which now behaves very much the same, and near enough to the plasma of the center of the sun (cell?). And in interaction of the different strength of plasmatic condition these creation of homogenous magnetic gravitational field prepares man for space travel into deep space. Now your reactors, your cores would be homogenous and if you understand what we explained in respect to the salt which is the linking direction then you can create the GANS. The space ship is ready for flight—homogenous with no bumps. And it is uniform. Now you make a pot of all the GANS you want and this time you don't have to measure more or less—it's totally equal in each core. Welcome to the world of space technology. It is so simple, but we had to wait for 2 years until the knowledge of man matured.

K: This way is very simple. Let me explain. If you look in reality to what we have done, we have the GANS of OC2 and this is your crystal bowl. In the very first teachings I said that the best material for these reactors would be ceramic and crystals. When you have a crystal bowl and you fill it with a homogenous GANS of matter now you will have the perfect dimension of reaction. We saw in the report of our Taiwanese friends that they used the crystal and filled it with GANS and they see the power. All you need to do now is to add water to your GANS and water of different elements of GANS and you allow it to settle. All you need to do is take a little bit from each of the GANS and add the water of your reactor in the crystal wine glass. Now you have all the energies of the plasma within the structure of the crystal glass. Then you understand the beginning of the spaceship technology. We had to complete the knowledge of man to the end of the matter state. Now we enter this space technology in its true form. This is not complete yet; we have one step to go but you have to understand this step before we go to the final step.

K: Now we have 2 choices; to complete the next step or you go for another few weeks until someone comes through to teach you. What we have done is we have brought the energy of the plasma which we have shown in the test in Tokyo and in the test in agriculture in Australia and we have shown in the test in Ghana that the energy is contained within the liquid. Now you so specifically in the tests that we received from the farmer in Australia how beautiful the energy of a very small amount of GANS went through the waters of 4 tents growing lettuce. You saw how the energy was and is continuous and does not need the GANS itself to be there. That was your trigger and nobody saw it. I especially asked the question and he responded that the water circulates and goes through his tank. What we have done and achieved is the confirmation of the transfer of the energy in the medium of water. We are not dependent on any more material. What we have done is that we have come through the process of changing the matter to the GANS and we have brought the energies of the GANS and

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

now we only use the energy and not the matter of the GANS itself. So what we see is all you need to do is to add the mixture of the water of the GANS into the water of your coils into the nano elements of your coils you make. You don't need to carry the CO<sub>2</sub>. We see that it will last thousands of years.

Q: Is the next logical step after the water the atmosphere package?

K: We will come to it; be patient. Now people who made the feeding stations; you need to start a new cycle of tests. They tell me that you go from one thing to another and we have to teach the steps that we can carry in totality for the whole of the human race. Now you have a GANS of orange or meat. All you do is add water and see how long you eat from it. It is there and it multiplies. What happens is if your GANS water is very clean you should not see any color. When I added the plasma of CO<sub>2</sub> into the water and you don't see the substance but you see the effect of it.

K: If you understand why I wrote the paper about the correctness of homeopathic. The world of science does not understand. In this we don't carry information; we carry plasmatic. In homeopathy we carry the vibration of electrons. It is totally different. But that is why we could explain the correctness of homeopathy. Doctors have not understood this. If I can without any color, take the water from copper oxide and I now have a mixture of 2 elements; if I add enough and I chose a crystal wine glass to be my reactor now you have the essence of homogenous non-matter condition plasma and if you created a centrifuge rotation in respect to environment now you can create a homogenous base core reactor and a top core and start seeing the homogenous structure and approach the take off of the man in the condition of the space ship.

K: Those who deny this deny their own existence because the structure of the skin of the man, every organ of the man whether it is intestines or the eyes is created out of 3 layers. They create their own image; look at everything in your body—every element and every shape and size in your body—this core with the GANS with water created the eye. Look at the structure of the kidney---it's the same process of creating 3 magnetic gravitational fields that create the field hollow within in kidney to filter the matter that comes through it. Look at the shape of the heart and how the cavities are created by the structures of the 3 layers of the skin of the heart muscle. The creation of the cavity in creating the gravitational magnetic field as a center in a circle and it is the essence of the transformation of the elements from one position to another and the extraction of one to another. The urine and blood goes everywhere from your toes to your head. Only when it reaches the gravitational magnetic field in the gap of the kidney because it matches it, and then it transfer and that is how you clean the blood.

K: The body of the man does not carry that much lymph from outside the bone to inside the bone. It carries the magnetic gravitational field which in part of that process the field of phosphorus and calcium is added to it and in the confinement to the bigger gap in the center of the bone manifests itself as bone marrow in the GANS state. DNA and energy levels become RNA.

K: Now you have built the first reactor without the elements. We know that it works as it did with the same water for the lettuce in the farm in Australia; the GANS never traveled through the lettuce. The energy of the GANS traveled through the reactors of the high level to bring it back to itself. Now we

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

have a new direction of the true space technology without dependence on the matter but on the fields of the matter. In space you rely on this kind of condition creation to absorb fields from the environment of space that you can feed or create motion and energy.

K: Is this the end? The answer is no because you are still in the \_\_\_\_\_ of the matters of the energy of the plasma and matter state of the water. What do we do? What is the next step? It is well known to the man and he needs to understand the totality. The energy of the GANS in the bottle floating in the river. We saw the energy of the reactor on the lettuce farm in Australia floating from one reactor to another. This means that the GANS state is independent of the matter but you can use matter if you need for it to be carried to become independent.

K: There is one possibility out of many and that is very simple. Take the state of the matter to the next step. You have a cup with the water in it and the GANS in it. You can evaporate and separate the water into the container of the reactor where all the energy is delivered and you carry the total plasma without matter. So now for the first time we come back to what was told on the paper I wrote called Unified Field Theory of Creation. Now you take by evaporation in the direction floating the plasma into the containment where you only take energy and plasmatic condition mix and by forcing it, increasing it you can travel the space of the universe without the matter state. This is the creation of the universe and the creation of the magnetic fields and the creation of whatever you want to call it. In one stroke you finish with the matter estate. This process I call wafer plasma. You create the plasma and it is yours. See [waferplasma.com](http://waferplasma.com) and [waferplasma.org](http://waferplasma.org) which have been bought by Keshe Foundation. It is free for all of humanity to have this knowledge and add to it.

K: Those of you who want to carry on testing the water, carry on. We need you to add to the knowledge of the man. Those of you who go to the wafer-plasma condition you take the water out of circulation and you allow the free energy to be delivered and you will have the true plasma. You have to remember to use all your elements to be nano coated that diffuse. If you can, create a GANS state pipeline that your plasma does not release its energy to the GANS but the GANS becomes the road that the GANS energy can go on. There are technical details and once you understand you can extract the energy from the glass directly. We have to go by what you understand at this time.

K: Now we have entered the true world of plasma technology.

(1:57:18)

We have entered in a non-conditional copy—a copy of the sun. Every star works on this condition. What you will find out is that stars are creating matter in the boundary that you can collect. The energy of the plasma in time will reduce and lead to the creation. Now we go to the step which is the biggest nightmare for technologies. Last week destroyed the imagination of the weapons they created to kill. Now, I can give a bigger nightmare than before. As we said at the moment weapons and aircraft manufacturers are in the mayhem of chaos they are trying to dump as much hardware that they manufactured which became useless last week. They will go bankrupt and Lockheed Martin your shares are worth zero. The technology of Boeing is worth nothing. I will show you why.

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

K: You saw and we clearly showed this last week and you see a line. I showed this unit to be the magnetic solid state condition (the unit in a 'wide' C shape that treats cancer but a larger version took down a US drone.). Now if fill in the gans of the water and I place in the same position as what we have in the 'wide' C shape and I control hundreds of thousands of kilometers. Now we have gone from matter state to the total plasmatic state. Those of you who want to force peace, start manufacturing. The structure is there. Understand that by creating the GANS of the material in a homogeneous way and understanding the position of them within the structure, tonight every man can sleep in peace that no one can ever kill another man with a threat of nuclear or hydrogen bombs. If they do the power of the energy that is released by the plasma condition will be so enormous that the matter state of the nuclear warheads would explode within their compartments by the energy. We have made nuclear weapons as of today obsolete. It will be very interesting to see how much more GANS we can put in the cup so that we see the effect of it in the felt tip pen used on the white board...

K: Keshe draws lines. When he puts the GANS water on the felt pen, there is no line drawn. It only takes a few drops. We have finished with the enforcement of the false hopes of mankind and we destroy you if you don't listen. It takes a few drops of GANS writes of the science of the man in space. Now extend the power and we shall see. I promised with knowledge I'd bring the forces of evil and their killing with the death machines to an end. Today it is shown to you on the board. Yesterday I spoke with a colonel in the American army and asked for the American military forces to allow the testing and now you shall see. The testing is complete and we did it. Drawing the lines with the GANS drops that don't show up: Now you exist; now you don't. I don't even need to touch it; the field is so strong in operation that it will carry energy. So what we are asking of you is simple: do we need to create weapons of technology to kill each other or bring the new science in the matter condition?

K: Now you don't need to guess what is in that bandage. Now you have seen what is in a glass. Let us have one understanding; if you manage to create vapor, the strength will be the same as the star. You see the existence of the entities and millions of what they call tens of thousands of light years away. Now that knowledge is in the hand of the man and it is you has to make the mixture in the cup or as a vapor of the GANS, as a vapor of the plasma to become itself the entity of itself.

K: We have reached the point of maturity of existence. This has been the promise; the blind shall see. Use the water the way we send it to you; the blind shall see if it their intention to see. If you are blind anywhere in the world, I would love for you to use the eye drops and let us see if we can make you to see through the true eyes of creation. We have done this twice in the past 10 years; it shows positive. The deaf shall hear; use the new technology which we deliver and let us see if we can make you to hear. Would we allow by the creation of the GANS patch on the local court of man to let him speak for the first time—the dumb shall speak. We open the understanding for humanity. To what extent shall we go what can we allow? To what extent can we bring the forces into interaction of what we promised? Do we need to go into the rivers and put more GANS in to the contamination to try to

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

clean up? Or do we just add the water of the GANS and the rivers become drinking water and the fish will live and what is not to be shall not be.

K: We will be able to create the crystal bowls in the cities where the energies will be for the feeding of the man. But, the bottom line is very simple. I complete the space ship program today in one way and we have a long way to go. We have come to the point that we understand the totality and that when you drink a cup of water you do not know what you are about to receive. One thing is for sure: it is not poison; you only take from it what you need. If you intention is to travel the expanse of the universe, you shall travel. If that is your wish then you create the energy. We bring the new science of the plasma technology where it can only benefit the man and it cannot be abused. Let us see those who reject it; those are paid agents whose financial benefits are about to crumble. Remember to use the water for your coils. You don't need to continuously produce GANS. Once there is enough there you put the GANS of the meat and vegetables and what you need and you just need a drop. But, as I said, let us complete the trials so we all have a measure of understanding.

K: Those of you who are handling and fighting with cancer make a bath of water and enter into it the emotion of zinc oxide and copper oxide and lie in it. Let us see. Or use the lotion so we can understand it. We have entered a new dimension of life. From now on this race will become responsible for the rest of the work of humanity from now on. We are given the chance to create peace through knowledge and this was done twice in the past. But this time we are mass teaching and it is not to one priest or to one king; every man is a king and the knowledge is spread equally. So, now we have come to completion part of the new knowledge. We can understand this. For the past two years we have sown the seed of the knowledge and there is no magic. You did this step by step; you repeated it and you did it.

K: If I had shown you this two years ago you'd have thought it was magic. But now it is the understanding of the totality which is very, very simple. It is so simple it will shake the structure of humanity. No one can be abused and no one can abuse anyone. Now you can have whatever you like. As I said you don't see any color but you create a more powerful system. You don't need to create water. The collection of the waters from the GANS will create it and it is you who don't need to create water to add to it. You create the CO<sub>2</sub>, the copper oxide, a small amount of lead and you are in the same position. What can you achieve?

K: The same way as the GANS divided themselves into the copper in the water and only the plasma in the water has not converted into the matter state in your plasma cup you will get the same. What is going to happen is very simple. If you have your crystal cup in front of you get the plasma of copper; you get the plasma of whatever and then you get the plasma of whatever else was in there WHICH WAS MADE BY INTENTION. Then what happens is the rotation of the interaction of the different plasmas creates both the magnetic and the gravitational fields. If you look at the crystal wine glass now you have the plasma of the universe in the cup; every layer will sit on its own strength. Being the creating is emotion it creates its own positioning. This has been the dream of man to create motion and energy without energy.

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

K: It will take centuries for man to understand and unravel the knowledge of today. We give the knowledge equally for man to use it as he understands it. It is no different in different cups of plasma. Now we enter tentative steps. First the steps in standing in the world of plasma technology—tentative steps to enter into the understanding from the matter state to the plasma state of the universal community. There is no better time to bring this and show it. The man has now entered the knowledge of the understanding of how the universe works and to serve the world community. This is fine-tuned to the day and time. We have to let you know that you understand the process in totality. Now that we have the full knowledge of the plasma technology the man now receives universal knowledge. You have become truly elementary students of the universal community because you have all the knowledge and technology to join.

K: Let's see what man does this time around and how he will use this knowledge to improve the level of existence for every creature on this planet. This is why I keep on telling you that we call upon the world leaders to stop the process of killing and put in the process of the peace because now people can enforce it. You increase the amount of the zinc water in this cup and walk around Palestine and Israel and feed the people of Syria and Iraq. They will not know why they were ever fighting. To them it is a cup of water they drink to satisfy thirst but in reality and in essence the peace is in the keep. There is enough energy in the cup of water to satisfy every need of the man. Emotionally and physically and you find out the Jews will kiss the Palestinians and the Palestinians don't know why. They had the cup of water (of peace).

K: If you want to understand it, this is the Holy Grail. I chose a crystal cup to fully illustrate the Holy Grail to understand you are the Christ. The water carries every energy to bring peace and tranquility and save man from hunger. Make your own holy grail of peace with the intention of peace and walk the streets of Palestine and you will understand there will be no "Jews" and no "Palestinians" because we all become one.

Q: Can we boil the liquid plasma to get the vapor?

K: One of the options and you have to know what you are doing so go back to the teaching. I have shown you the instruction of the magnetic-gravitational field. We are not using anything else. Now that you made it homogeneous it is very easy to extract. We have a lot of supporters in Israel, Palestine and across the world. Made the zinc oxide water and the CO<sub>2</sub> and add a touch of CH<sub>3</sub> GANS water to it and you bring to the man, connect his soul to his physicality and you give him enough energy to be strong enough that he will not be abused through his emotions. Then you find a man of peace.

Q: What if we add this GANS water in the water plant that distributes the purified water. We would be feeding all the people that buy this water. This would be a good fast and good way to comply with the peace for all the people.

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

K: I have told you and repeated to go to the church this Sunday and when the priest gives the cup of wine add it to the wine. Mix it into the wine and let us see if it is the true blood of Christ and his intention for peace.

Q: Catholics don't drink the wine.

K: You don't have to drink it to receive it. You will understand in time. The time has come that the false name of God used by those who wear the robe of God will walk away because they will not be able to hold the chalice because to them it is too strong to lie to. The men of war will not be able to remember why they are carrying the guns. The same with the man of the robe; they will not be able to tell lies. So they will not be able to hold the chalice to deliver what is the truth. You will find the soldiers and the priests both walk away from the wrong path.

Q: We should give the judges this solution also.

K: We should start with ourselves and then judge the others.

E: What you have revealed today is amazing and I wrote an article in 2010 that is relevant to what you are talking about. I say that everybody start making peace bonds and take little jars and put them in the rivers and the oceans and spread it everywhere. It will change very quickly. We were using 432 Hertz to send any frequency as it was a carrier wave. With the GANS energy it is much more powerful; this is incredible and amazing to be part of this to bring humanity to peace. This is truly amazing and I hope you stick around for a long time to keep teaching us.

K: We have a long way to go yet.

J: Have you looked into super ionized water.

K: I will stop you there. This is in the matter state. We have finished with the matter state.

J: I understand.

T: As this technology may satisfy or feed the emotion, will this give humanity an opportunity to look inwards to the nature of ourselves and perhaps change that nature?

K: That is the whole purpose. We don't behave like communists that everybody will take equally and it has to be. We allow the man to be equal to respect others and there is not any division among the men. That is the end of the wars. You have to understand this knowledge has to be carried on to the next level in space. The peace and contentment is the beginning of the opening of the door of peace in the world. If you understand this you carry this into space and now we have become truly the man of space from today we have to understand this is the love of Christ. If you remember a few months ago when we introduced space technology and how you create the plasma of the structure of the space ship I said that those with the wrong intention will not board the craft. Because it much like the water of the river (Ghana) and the mud in it as we saw and the space plasma is the water of the truth.

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

The man will walk away. The sediment in the container will sink. The man of wrong doing will never enter this space because the craft is built to be peaceful and that is the intention within.

K: I teach you something very strange. In time the people who go to space will report this and then you will understand. Because the structure of the space technology is peaceful and the energy that is absorbed as a level, it doesn't matter what entity you are, those men who initially enter space to be equal and the rest of the path of the presidents and kings and the rich who want power and want to reach space so they become the rulers, they will find out the only solution for them will be chosen by the system is the minds of them on the space diary. It does not mean death but it means rejection of the environment in which the reactors operate which means there shall never be conflict and division in space. Those are people who think they become a part of this will understand. Those of you who come to understand to be the part of humanity for understanding of creation will understand that there is only one way and one choice and one direction and that is to unify man irrespective of his race, religion or position on this planet. And we have achieved it and the progress is so fast that no one will know.

K: For the first time the men in South America, the Russians, the Chinese, the Japanese, the Iranians, the Africans, the Europeans are all doing this together. Take a vote among yourselves. We have already become one. How many of you will be truthful enough to drink from the Holy Grail? I do because my intention is peace and for man to bring peace among each other; this is our intention and we will carry our intention because it is correct. How many of us will challenge the peace: The president, the farmer, the man on the street? With this technology we will no longer have beggars and the poor; all will be rich in their souls and full in their stomachs.

J: I want to give you some data and I have done for 2 weeks what you are saying. This has opened a new space in my life. I went to trial with two persons who don't know anything of this technology and they came in my room and sat in front of the glass and it was instant. They connected with themselves and they see the mirror and they hold the life. This is the connection in no time. It was beautiful to see the peace in these people. They look at life in a totally different way. It has become so clear. It is like the glass you have yourself. There is no delay and it is instant communication with the soul. I have a beautiful set and I go to the big lake and the atmosphere of the region is different and beautiful to see.

K: Once you understand the work, could we call this the chalice of love? Would we go to the rivers and just pour on top of the river and let it run and let every man and animal who drink from the waters come in peace. This is what we said before and what we carry on doing; this is what is at the heart of the process of the change.

K: This is the part where we have to bring peace to be peaceful with ourselves and the interaction is you who have experimented and tested it. At the beginning was drinking of the orange when the orange was on top. Now we come to this step in the understanding of the totality. In the coming weeks we will go in the development of the tools of the space technology for deep travel. Now we understand how to manipulate different field forces to be able to create the condition that allows you

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

to create what you need. We came from the matter state to the plasma and now from the plasma state and now by control of the plasma we can control any matters in the universe. The whole structure is the process of building and building and building.

K: I want to tell you something very strange. This is the day of fulfillment. 14 4 2016 which added up  $1 + 4 + 4 = 9$  and  $2 + 1 + 6 + 9$  and  $9 + 9 + 18$  and  $8 + 1 = 9$ . Today is the 14th of April 2016 and today was promised in the book of the past so we have completed the promise of the holy books for man to understand the new cycle of life.

J: What if add some water at the water works where they fill the water for the city? We could add it where they process the dirty waters.

K: Use your imagination for whatever you like to do. The most important thing would be for this message to get to the White House and Obama saw his reflection. Walk these cups into the palaces and give to the kings to drink from them. See which of them will drink sincerely; they know by drinking it their term to be the kings has come to end. They know of their own injustices. Give these waters to the world presidents and the rulers and see how many of them will drink and have many will have the peace cup. Let's see if any of them will bear to drink.

J: What if this is given to them unconsciously?

K: You have to give it to them with full consciousness. We are not thieves of the mind. We are there to bring quiet conduct.

A: If you use this water for nano coating your coils, you carry the same?

B: The signature of the GANS in the water will have that information of the GANS that you have already used.

K: This has been used in the past 2 to 3 weeks by Bernie in coating the coils and we have seen significant difference in the performance. That why I asked for Bernie who is handling the research on this side. It is already being used and we have transferred production in the factory. Don't forget we already use, if you see the coils from Keshe, these already carry GANS from the water for the past few months and this is not something new. We don't GANS coat, we dip in the water of the GANS. Now we make this public knowledge. Bernie has used this as the coating of the coils. This is why I explained not to touch the coils that have the coating of the water. You don't need to GANS coat with the matter but you GANS coat with the water. When you nano coat and GANS coat with the water, it is transferring the energy wood, copper, the layers of the body of the man when you hold it in your hand. The knowledge and the technology are coming all together and it's linking together.

B: In the application we always use the water of the GANS in the health patches. We are using the patches in our outreach and it still has the function to release the pain. The CO<sub>2</sub> and Zinc Oxide was produced on 6000 patches already. We have distributed this in the outreach programs and all have the

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

same functions as the original. We replicate through the water and we don't need massive production of the GANS anymore; we just replicate through the water.

K: These patches are produced by Philippines Foundation by Brennan group and they have sent me a sample. What they have done, they don't put the GANS of CO<sub>2</sub> and they put the GANS water and they see the same results as the CO<sub>2</sub>. Once you produce the material it stays in that condition of the plasmatic construction of the water. In a way as we said this is a confirmation that the water in the cup would carry energy of the plasmatic condition of the matter of the GANS which was given to it. You have to realize as part of understanding the theory or principle behind it. In this process if you remember what we speak about the GANS of the water, the GANS of copper oxide is in the water, the GANS of other elements are in the water. So what the atomic structure of the GANS in the water creates is a magnet for everything to hang on to. Look at what we said. CO<sub>2</sub> (carbon dioxide), CUO<sub>2</sub> (copper oxide), ZNO (zinc oxide), CH<sub>3</sub> (iron-carbon compound), all have oxides and the center is the oxygen and the carbon attracts to the carbon and now you have the energy to deliver. Now you have water as the central energy point and you have the Hydrogen link which is kept as part of this structure and then you add carbon into it. In the structure of the earth you have structure of the oxygen and the water becomes magnetic. You have all the attachments that make the water magnetical. You connect in the line of communication with the neuro system in the acid, you connect in the line of the energy and that is why it is so powerful.

Q: Is nitrogen GANS also generated in the water?

K: Yes, you have the copper and you have the hydrogen and the nitrogen properties. You can add CONA (amino acid) and you have CO<sub>2</sub> and OH<sub>2</sub>; one of the coppers in any form will behave in the giving and taking as the nitrogen. You have different combinations of the oxygen in the gravitational magnetic field. You have CH<sub>3</sub> which plays another way. You have different combinations that the nitrogen is released. You make the proximity of the hydrogen atom to behave as water or to behave as nitrogen. That release of energy allows the release of energy from the hydrogen atom.

K: Concerning the health unit project where use the crystals and drill holes in them and fill it with the right GANS water mix we could direct it to the pain or organ of the human body in combination with the health unit, correct?

K: We are talking about the water in the plasma we are not talking about the actual content of CH<sub>3</sub> of CO<sub>2</sub>. But the potency is the same. Those of you who make these new water units or liquid plasma; you will have a field day in understanding of the new science. You will become frontier scientists in the plasma technology where the water carries the information. We have seen this in advanced core gas reactors in the British system and I studied these 30 to 40 years ago when I was working in a cow shed. The scientists could not understand the behavior of the carbon. We used graphite. The carbon as a GANS was very clear to me in the 1980s. But the total forces of it and understanding that takes a long time. We understand but we could not see the actual forces behind it. This is why I use the liquid glue in the medical systems which was very easy. These hot glues are CH bound and they behave much like GANS do in the reactors. The property of the GANS condition of the carbon and

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

the water was very apparent in earlier times in the cooling system. Three Mile Island was part of this and the scientists didn't understand the structure of the plasma.

K: Now you will have to understand how to change the matter of the plasma. You will have to understand how to go from the matter to plasma condition. This is the next step and to do that is very simple. Going from nano material to the GANS state was easy. Now you have to understand how you create matter out of plasma. Creating matter out of plasma is much easier if you understand the concept and the principal. You have the matter and you created the GANS and from the GANS you produced the plasma. How do we go down the ladder? Very easily. You create enough plasmas and the interaction of the field among them or in the plasma is the creation of the friction of the field forces. You separate the plasma and now in the space you have to create an interaction in the field of the plasma that the friction leads to the slowing down or the reducing of the strength of the plasma that is in the matter state. It doesn't matter what state of matter you are in. It could be earth or a higher order. This is what happens with planet earth with the gravitational-magnetic field with the sun. The gravitational-magnetic field from the sun with the earth with the field from the earth to the sun creates such a weak structure out of the friction that is called the nitrogen or the oxygen. The interaction of the fields in the case of the earth between the sun and the earth leads to a matter state which comes across it. That is the residue. So, creating matter out of plasma is much easier than creating plasma the other way around. You use the plasma interaction and create friction that allows you to create what you call the matter state.

K: here is something interesting to look at. This was made by mistake. It is called Keshe Foundation beacons (small pyramid containers). We are able to fill in these containers and all you need to do is fill them with the water of the peace and let these beacons stay around the planet. In the time to come we need to leave the beacon of peace around the world. Fill it with CO<sub>2</sub> and Zinc Oxide and what you have is the beacon which continuously releases fields that are in tune with the body of man. This is what you see. All you have to do is leave beacons on the planet. It would be like what we do with the temples and we feed them and someone fills them with water every few centuries. Look to the temple of the man. This is the future of humanity where most probably it is why people made the pyramids. It is where they got their energy?

Q: Can we download the blueprints?

K: We own all of it. In reality we are looking to create the condition and we can enforce it and we have to understand that in none of the processes we work we allow a gap in the knowledge, a gap in the understanding that others that go in the interest of themselves to abuse it and control it. In the coming time if you understood a simple word, if you understand communication, and I have said this many times, and you understand GANS combination, if you get the right GANS combination you create the effective line of communication that the present communication in the world is obsolete. The present world of interaction even in the computers is too slow. You have to look and communicate directly with any part of the universe. Don't forget one of the properties carbon stays in the GANS state in atomic, molecular and plasmatic state more or less the same as the GANS in the crystal condition. This is why the carbon is the line of communication between cells and the

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

communication in the body of man. Because carbon is one of the few elements in the universe which in all states behaves similarly and you call it graphite and carbon and more. So in the new world of communication look into the carbon that you understand is operation that is used for instantaneous zero time communication. You have to understand how it connects itself even in the amino acid.

K: As is said there is a lot to teach in different aspects of the knowledge and science. It is not enough to create a dome to create a home, but how you heat the home. This home is not matter estate but is connected to the emotion and is connected to the rotation of the plasma and cannot be diluted or affected by others who use near enough the same technology in the space of the universe. There is an element to bypass or superpass that is agreed and used by all the creatures of space that allows no element to bypass or superpass and every entity stays and keeps what that entity is. That is why most of the space ships as you observe all look the same in color. It is the common denominator that has a silverish color near to green and yellow. It allows you to keep your work, spaceship that will not be intruded or overcome the magnetic field and works across the universe. We have to learn about the plasmatic condition that creates the space tangibility of any entity you like to make.

(3:06:59)

K: At this moment in time the atmospheric condition of the planet is good enough. You have the knowledge where you will learn how to produce the material that is the GANS of the plasma and not the matter, which leads to and creates the physical tangibility which can be and hold the condition anywhere in space.

L: You mentioned about the new world banking/financial system and that you would release information how this would be. I was involved last summer in the creation of the new system; otherwise it would have collapsed by the end of Sept. Can you give us some ideas about what is going on?

K: When we get to it we will let you know. Understand one thing: there are no banks or no churches in the universe. So there is no currency. The only currency is what we give as the essence of giving and the true essence of gravitational magnetic energy. I have not seen any evidence of dealer notes, green notes in the universe or any ATM machines where you cash some love.

K: At the moment there is a big dilemma with governments around the world in how to deal with Keshe Foundation. What will we do with it? This dilemma is not as we say it is. Even the establishment of the Keshe Foundation in different countries has become a dilemma in how these people will affect the total industry, the economy and the culture of the nations. In the next 6 to 12 months as the manufacturing increases and becomes much simpler we will see that the whole structure of the economy will change. It changes because we have to change it or need it. It's a huge difference. In a way the human race at this moment is running around 24 hours a day to pay what he committed himself to serve the others by them having a life without him. You are running around to pay the electricity bill, to keep a man as a director of the electricity board. You run around creating the water to keep the man as the head of the water board. Then they punish you for what is naturally

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

free. Then you spend all your time to feed the man who runs the supermarket who is to be fed because he collects all your food. And then you look at it and he himself has 10,000 products on the shelves and there are 10,000 more boxes of the same thing which he has become the boss of.

K: We have conditioned ourselves to be burdened of our own demand. With this technology you don't need one but you become part of it because you want to. Now you get something because you want it not because you have to have it. How many of you run around like crazy to pay your water bill when you can have what is natural now you can have this technology and you can have all the water. They can disconnect your water if they like. Next time I will show you how to clean all your clothes with this technology. There is no need for a washing machine. Understand that the dirt on the clothes is a matter of state and it has a magnetic and gravitational field. Now that you know how to create a full spectrum would you like to have ketchup or tomato juice? Or would you like it to be blood.

K: Now Mr. Company you don't need a job. It's all the same material and you don't need to have hundreds of different things; it is just understanding how to manipulate the strength of the plasma and then you have what you want to get. In the few years the little boy in his first years will be as wise as the old man in any fields to meet his daily demands that no one can abuse. We have just started the journey of peace and it is fantastic to see how we will end up in a very rapid way.

A: Regarding the energized water of the GANS....

K: Don't call this energized water; this is plasma water. It is liquid plasma.

A: I understand. I made some trials with this water on me first of all and a friend of mine with a stomach problem. He had a hole in his stomach and he went to see the medical last week because he was very ill with very big pains in his stomach. The third experiment was on my parents' cat and was in surgery last December for tumors which were removed along with the genital organs. I drink the water for 7 to 10 days; it was the water of the CO<sub>2</sub> and the Zinc and the combination with the water from GANS from several healing plants. I drink it normally and put 100 ML in the jar and I drink this water all the time and I feel well and energized and I have an interesting understanding of myself and other people. It is very positive and I feel very good.

A: I gave my friend 20 to 30 ml of this and I taught him to put the GANS in a glass of water and to drink and collect the water from the top. He has good improvement in his illness within 2 days from drinking the water and has no stomach pain and he got back to work. This is in 7 days for him. He will go to the doctor in some weeks to see in what stages he is in. With the cat I gave the cat the GANS and only the CO<sub>2</sub> and Zinc Oxide to drink and I made her a patch with the same GANS and put it where she sleeps. This is ten days later and the tumors after the surgery about a month ago there were new tumors starting. These tumors are smaller but very interesting thing is that she is now in heat. She made strange sounds and behavior and it's not normal if there are no reproductive organs. We said this to the animal doctor and he said it was not normal as there were no genital organs. He cannot explain this and I think it is because of the GANS.

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

K: We have reported this for the past 10 years. When the GANS touches the emotion the cat can become mothers. You satisfy the guarantee of survival and life goes into production which is very normal. We see this in the men and the women which is also normal and we understand this. It applies to the animal world as well.

A: The cat is not in the 'man about stage.' She is in the stage without any genital organs.

K: The emotion is the same; the physical part is taken away but not the emotion. I have given a talk that is recorded in the confirmation of the gender. It is possible. If you understand the magnetic gravitational field of the body and you understand the creative fields of the intention virgin birth is 100% possibility. In the virgin birth if there is the desire to be and the wish to create is there, you create the fields as you wish.

K: You created the fields for the orange and the steak. Now you understand you can create a tumor in your body or you can create balance in your body. I have given a couple of lectures on this. We have added to the knowledge; the emotion is the creation of the physicality and we do not need another creature to be with you if your intention is to guarantee survival. In the other teaching this week I explained this in a soft way. What if you are the last man standing or the last man in space? You come to the point that you have to divide or you have to die. In that way become your fundamental plasma. Would you wait until you die or being in charge of your emotions to decide to create yourself a companion? This is the true story of Adam and Eve. The desire to confirm your existence at the point of physical demise, you allowed this soul to create what you called a partner. It was the split of one to two. You have to understand that is what we call the fundamental plasma which changes from a neutron to an electron and a proton. The proton in size is equal in total mass to an electron. If it was not they could not keep their position. One holds energy and the one with equal size creates size and the other creates motion. The creation is the atom, the fundamental structure.

K: We came up with Adam and Eve because of our lack of understanding but it was the split of the soul where we know the soul can lead you to the higher order of creation. The desire or intention of the creator is the mother.

A: Do I leave the patch with the cat?

K: If you leave it they go to it; if they don't need it they throw it out of their nest. If they need it they go to it. The same goes for your friend. We talked about supplements earlier in this lesson. He could have an ulcer due to the stomach bacteria or by physical damage. When you bring GANS to it the pain goes but it is a long term and he should not use it more than 12 days maximum because the body will repair itself within 14 days. You can drink the GANS for energy, but for a process we need to create a measurement. This is to bring the measurement to tell people how much to use. Fill in the form and let us bring structure in the use of different diseases. We know this works for ulcers. The beauty is it works for pancreatic cancer and the liver cancer. We need to establish a boundary. We want 30,000 to join the study.

(3:26.40)

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

We need a broad spectrum and hopefully we will get the communities of Iran, Ghana, and China to scientifically collect the data we have and give us an answer. I respect them clearing the direction for this research. I thank the authorities in Iran, Ghana and China. They have done enough to bring the change to the structure and now we can all benefit by it.

K: Ask your friend to be tested; usually with the plasma you need 14 days for the change to the physicality of the plasma of GANS. You have to understand that you are not only changing the physical structure of the change in the stomach; there is a bacteria, yes. But in a way there is an emotional settlement in the same way as the machine that we showed. You have to understand that you process the physicality and the emotional as well.

A: I understand and I drink this water now for about 10 days.

K: You can drink the water as much as you like, but you have to understand that the intention counts hugely. You drink the water to receive the energy which you might need, but the intention of your friend is to reverse the process in his stomach. It is the same water but the intention and the need brings what you need from it.

K: This is one of the reasons for the past few months when people asked me about the cup of life and I kept on explaining it but kept away from promoting it because I knew the time would come that we would deliver this cup. It does not need the containment but the next step from here is how you can bring the energies to it without actually ANY material. This is what you need in space. You still have a step to go; you go from the plasmatic condition in the water and we go to separation of the water in the plasma so that we can collect this energy. If in reality you look maybe for the first time you understand that there is no difference between this process and a process we showed you in a coca-cola cup 7 or 8 years ago. But man never understood.

Q: Anu is suffering from muscular dystrophy which is a muscular degenerative disorder and he would like to know if plasma can help him to regenerate his muscle tissue.

K: I would love to tell you. We need a large number of you to do this as there are a large number of you suffering from this problem. Maybe the suffering can do its work. You have to realize that we don't make claims but that you will give us data that collectively we will use without claiming it. Maybe yes, but we have to understand what the origin of the problem was. You see a lot of people don't understand that it is better for them to deny it because then they don't have to live with it. I explain this in a very simple way. I want to read this to you so you can understand exactly what it means. This is a communication and I sure he is listening because he has been on that track for a long time. What I teach you is what runs the whole structure on the health side. If I find the communication I wrote to him I will read it and you will understand how the reality stands in respect to our work. Understanding the movement and the motion of the system.

K: Any other question while I look for this.

Q: H has some questions and is interested in the GANS information.

H: I am not trying to 'sell' any of this.

K: I understand.

H: I am excited that it seems that the earth is at a place that we are bringing this opportunity to you; you are such a master in how you are grounding it and bringing it in. Thank you.

K: Thank you. Hopefully we can help more people.

(3:35:23)

H: I did some research packs I was going to send to my friends who are pretty multi-dimensional. They can tap into plasma fields or consciousness levels. I wanted to see if there were any questions beyond what I had on my questionnaire for them that might be useful feedback for the group and what we are doing with the health patches.

K: You have to understand YOU produce the health patches. What was the intention of the receiver? Does he need it or are you trying to force a position on the other end of it? That is why a lot of people will say this works or this does not work—it's because their intention was not to receive and it doesn't matter what you give them. This is a problem. Intention to receive is 90% of what you do. 10% is making the patch. You give the same thing to everyone and one says it doesn't work and one says it does work. It is because the intention at the beginning was to receive it. If they cannot confirm they wanted to receive it then it means it cannot satisfy their 'existence.' It doesn't work. Alex put this beautifully. It was the expectation of the receiver.

H: There is a whole other side to this. People may have to get past the symptoms of the disease and where their consciousness and emotion is allowing that disease to exist. They have to process that.

K: You are a medical woman and you understand that better than others.

H: Medical and otherwise as far as consciousness is concerned. The biggest part is the consciousness side.

K: You have to accept and if you consciousness accepts then it means you are ready for the change. If you change will you still get the same? Many people are not prepared to do that because the change means that you have to make certain movement. Am I prepared to make that change because I don't become the sufferer that I want to be.

H: There is an opportunity; there is a multi-dimensional field in terms of the health patch; bring it into contact with a human body that is in a state of dis-ease, then the part of that human that resonates with the field, that Christed vibration, the person's DNA and cells are going to have a chance to resonate with that and increase their frequency.

K: I am going to read you something that might resonate. This is from a man who has a specific condition. I wrote to him and said to look inside of himself to see why he had done that to himself.

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

Then when you answer me I can make the system for you from your own body. He wanted me to make a system for him to see if his will could overcome my system; then your will is stronger so he can have pity on himself and say that no one can help him. Then he would be saying that the Keshe health patch system does not work. Until he finds out why he has done that (disease) to himself, I cannot help him. That is why I have stopped that work for others. People have to find out why they created the problems for themselves. They need my system to prove themselves that they are stronger in emotion and override my system. I am only a man but I cannot understand how a man like this can do this to himself when he has control over his own emotion. He can blame others for his shortcomings. If you are the man, find out how you have this condition and then I can make a system out of you to overcome what you are blaming yourself and doing to yourself. That is why I stopped making systems for people such as this as I do not understand the pattern of lies they need to hear and for these people to make me part of their mental game. They can come back to me when they have answered these things for themselves. Then I can make a system for them and not make me a game for their emotions as they have done with their own physical bodies for their emotion. I wrote this to a man. His answer was very simple: thank you; now I know what you think and why you are not making my system. So I have not found the reason yet. I have done this to myself because I was looking for the love, empathy and pity of other persons, especially my mother. But these motives when I read your book two years ago, I thought I had found a solution for my illness. If you want, I will try to work with you to resolve my problem.

K: So you understand, these people know the cause of their own problems. These people, if we try and they don't want to be progressive because the illness justifies their own existence you and I can produce many systems. These technologies only give what you need and your only receive what you want to receive. Nobody can change it. No structure can change it.

H: That is been what has made me step back from the healing techniques and energetic work. I am aware that people create their dis-ease for an opportunity for their own expansion. So what is it for me to take that away from them if they are close to making awareness?

K: A lot of people don't want to process their emotion. It's like the world leaders—they don't want peace. Wars confirm their existence. A lot of world leaders have this style of mind in their lives. These are crisis makers that confirm their existence for a need for a leader. Nobody who is satisfied needs to create a crisis. A lot of war leaders at this moment in time are the makers of the mischief themselves created so that they are needed and this is the same with everything in life.

K: If you put the camera you will see something strange. This is our little mascot of the Keshe Foundation. My hand is full of GANS and the dog licks it because he knows that he needs it. He licks the fingers because they are full of GANS. The animals know by instinct what is good for them. If this was not good the dog would not choose it. Animals by instinct know what they have. But we refuse to take it because in so many ways we have confirmed that by taking it we do not need to be the suckers for the emotion of others. It is very simple: we give unconditionally and then the people who receive it put a condition on it to confirm that they exist for the (purpose of their illness). What

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

about taking it and just let the body take what it needs? This will not happen because then there is no need for any suckers and for them to confirm that they exist by taking from others.

J: Now I understand perfectly why a month ago you gave me hell when I told you that I drank the GANS water. Now I understand why.

K: We try to keep things under control because we know. People start going with it and doing things uncontrolled and they can create mayhem and mis-information.

J: I understand that; I only did it on myself and I only try things on myself. I am at the age where I have no compromised things so I can take those risks on my own.

K: We don't need to take risks; we need to understand what is involved. A lot of people say they make GANS and we saw people start drinking GANS: a Chinese man did this.

The CO2 was no problem. Somebody took the copper oxide and we have to do this correctly. We have vultures and men of wrong doing after anything we do to help man because they don't exist to help. The reality is that we are doing this world wide. Which one of us are they going to blame? They go on the internet and make fools of themselves. This time we are involving national governments. The existence of a nation called Belgium is irrelevant. We know it is the land of the terrorists. By pedophiles and killing scientists they become irrelevant. The rest of the world has to exist and this time we have to exist in the condition that major societies and governments get involved in delivering. We show you today what has been done and suddenly they are ready to release the water (in Japan reactors) and everyone can ask where the tritium is. The tritium is not there; nobody can ask where the tritium is because we have become scientifically correct. The governments are on the run who are the wrongdoers.

K: Ask yourself, couldn't they have put the water in the sea from the reactors before? For the last 3 weeks we have shown that they created gold and then we see the presentation that they think everyone is the fool like before. They show the nano gold structure they are using and they knew that we knew they were up to tricks. They can release the water because it is cleaned up. So there is no harm. But this way billions of assets that were stolen from the Japanese nation in the private banks in the deposits of the directors of these companies such as Tepco (the company hired to clean up after Fukushima). They could have offered the technology immediately and you see lorries and tanks moving in there. The farmers of Japan could make a living. They could clean up the farms in Japan. It is their responsibility to deliver the technology if it is given to cover an American company (Tepco) which is sole proprietor of 60 million dollars to give it to the Americans who have been contaminated by the waters from Fukushima on the west coast of America.

K: Is the life less important of the actresses and the rich people and the poor people of Los Angeles than the few directors of Tepco have lined their pockets? We give the technology freely and unconditionally to the man who came and spoke and he has now delivered this material. Do you know what they did to him? The American government put his wife and 4 year old child in prison in the United States. This is the 'decency' (so-called) of one of the most powerful nations. He had in the

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

presentation to give all the information of the technology that is correct. He had to fly to Los Angeles to his wife and 4 year old daughter on forced documentation that was produced by the American companies on his family. The 4 year old child is half Japanese. You don't want to know for us to open the shameless behavior of the United States government in respect to this situation with Tepco with Keshe Foundation. We have withstood all sorts of problems and it is not just Keshe Foundation but the people around us who continue to be intimidated by these organizations because they know their time is finished.

K: You have heard the part of the release of the technology which is given by the Keshe Foundation to the Japanese nation. My respect goes to Yukoko who came to the Keshe Foundation 2 years ago. She went to deliver the correctness that was hidden and covered up. By now how many Japanese have died of cancer when the solution was in the hands of Tepco? Now it has become huge money in the private banks in the deposits of the gold of the material of the nano gold structure. They show it because they believe people don't understand. We don't know and we don't ask; we just give and the truth comes on its own. I would like to be present as a nuclear physicist with every right as an international figure in the atomic-nuclear structure in plasma technology when Tepco releases the waters of tritium in the waters of the Pacific Ocean which is going to be washed into the west coast of the United States to kill more Americans. Fortunately they have removed the material (tritium). Tritium takes up to thirteen years to dissolve. Such a massive amount would reach across to the United States in less than 3 months.

K: I would like to be there when such a thing is done. Let us open the books and say 'we are wrong, we made a mistake and the Keshe Foundation has proven it cannot direct energy.' But I would ask what that white material is there. Maybe it's not nano gold and the way it was delivered in the development of the technology to Tepco by the man you have seen that we support because he has withstood every crime against humanity for the Japanese government. They took his child and her mother into custody to get him out of the country so he will not be present to show more achievement than the structure of Tepco. Let us be as one—we don't care what Tepco has done, is developing and is doing. We support them because we gave them this technology.

K: But now, let us share in the knowledge. We don't need to see what the analysis report is. I told you that the openness of the African nations will bring the rest of them into shape. You have seen the results from Ghana because they are so open; their culture is open. This has more value than the corridors in the West. If I tell you we know what they are doing with respect to the Keshe Technology... but you are developing, everyone of you who comes on a Tuesday or a Thursday. Governments are on top of this to see how they can make money and control and they find out one by one that we created for this balance so they cannot use it. Our technology is copied and it brings balance and that is the opposite of what they wanted. They wanted it to abuse.

Q: I tried to produce this plasma, but how is it with the CH3 GANS. The other GANS are clear in the water but the CH3 is not clear.

K: You have to find the ratio for it to be clear.

## Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

Q: You mean to put enough water in it?

K: You have to find it; it's the same with the blood. You try to make the GANS of the blood and if you don't use the right way it is very difficult to make the GANS of the blood. You have create a condition that is a composite GANS—the CH<sub>3</sub>. This means that you add another to it; I explained to you it is a composite GANS and you bring another like the CO<sub>2</sub> and the water you collect now has the characteristics of both CH<sub>3</sub> and CO<sub>2</sub>. I don't spoon feed you; you have to find ways. If you busy trying to correct it, you are good. If you have the balanced field which of you can put it on the coil and create emotion in the plasma that you start seeing in the interaction of the field. But do not forget that you need to produce the gradient flow for the balance. Your coils have to be in the condition that you create the flow of the plasma. You have to create the gradient flow so that at the same time you have the rotation and this will give you the physical tangibility. Without it, nothing works.

K: You have to create the gradient positioning which is what I was teaching to Ali last night. You have to create a right field pressure so it brings the life and the tangibility to the user. The totality of the three creates balance. The top structure of your spaceship is created by the interaction of three; the height and the strength come from two and the totality of the three creates a third balance which becomes the creation. One becomes emotion and the totality creates the soul which creates the physicality which is the man. This is your physical structure. I see people who do not understand. The masses sit and analyze everything to make the reserve, to make real gold of what they do not understand. They become victims in the physical life. Listen to the teaching and understand it yourself and test it yourself. This is why when we said in the beginning that every step, every reactor made is capable to fly. At the end it is how you create the plasma which counts.

K: The gentleman told us his friend had cancer or an ulcer. It will be interesting with those of you...and I have a lot of respect for this man in Europe who has done everything to save the life of his wife. He has made the GANS of seawater and many gallons of it to make the baths. Use the GANS with the water for the bath. Let us see that we can change the physicality. If man understands, and I tell you what to do, if you make a bath of water with the right combination of the GANS and you put a paralyzed man in it, he will walk out of the bath with no help. The body in receiving the right and the correct physicality of the emotion and using the energy of the man and you immerse the man in the bath of the water which is the correct GANS of magnetic energy and it brings the Physicality and the emotion in control with the mind.

K: To put the man in the bath you create the right plasma inside the water and you bring everything into balance. In so many ways you create a condition that now you don't need the reactor. The water with the plasma, the liquid plasma, becomes the plasma of creation you find in the womb of the mother which has the balance to give and take what you need. If you are paraplegic, try to understand the condition and if it is the right way and the right condition you shall walk, but you have to get the condition the right way. You will not need to be in a special hospital or a special place. Maybe those who suffer with this will be cured when there is enough Zinc Oxide, enough CO<sub>2</sub> and enough CH<sub>3</sub> and the others that satisfy your need and you will find out you will walk. Have we created the ultimate cure and the ultimate system in the body of the man? Yes, the body of the man when you

## **Transcript from 109<sup>th</sup> Knowledge Seekers Workshop held April 4, 2016**

(v1 2016-06-08) DRAFT (Transcription has not been verified. Double check info with video)

submerge it, it has to find its own balance. Would we sink in these waters? If you get the balance correct you walk.

K: You can walk with Parkinson's and in a few sessions you walk out. It is now for the man to find the dimensions. Let us do it together and do it correct and totally as one nation, because when you have in the bath of say nuclear GANS, the water in the field reacts with every part of your body. What you need you take, what you don't need you give. Now you are in the confinement locked in the GANS state so your body finds the balance. It is not magic. You will see even if you understand which is beyond the understanding of a lot, you put a dead man in the bath and if the intention was not to die, he will walk because you can still make connection between the physicality and the soul in the man. This is what the Christ did. You do not understand what I have released in the technology today. Those who do understand will change the course of humanity in a very short time. Let us collectively – go to the Keshe Foundation on the testimonial every day. You can and look and you will get the knowledge of the man the way we give it freely. But let us be in control because 99% of 7 billion people will not have such knowledge. We have to be able to control it and give it to them freely so that they can help themselves.

Q: how does one become a member of the team for health applications?

K: In the coming days we are trying to set up something with the Iranian government as this needs governmental support to back up computers. We hope we get the support of scientists from Ghana and other countries such as Italy that have tested the GANS. Then we will work with the British and UEA; there are a lot of factors of nuclear and space technology in this education. We need to bring a lot of people together. At the moment the new ideas go to the Keshe Foundation innovations. At the end we need the governments to come in, even though they are coming slowly. But they see the movement and they want to be part of it. We have made the contact and requests and this will be in cooperation with the Iranian, Ghanaian and Chinese scientists. If the others like to join us they are welcome.

M: Go to the FAQ on the site and the support button and then select innovations.

K: We will call it a day; we have made enough waves on the knowledge of the man today.
