

Notes from 111th Knowledge Seekers Workshop held April 28th, 2016

(v1 2016-05-07) DRAFT (Transcription has not been verified. Double check info with video)

Notes courtesy of Cornelius van Dorp @ Keshe Foundation New Zealand (KfNZ)

Video link: <https://www.youtube.com/watch?v=L8j2Tom4BLg>

The picture is from around 0219: where MK shows the boundaries and field interactions of GANS WATER with fields of ZnO₂ and CO₂ like yin and yang in salt water between zinc and nano coated copper plates.

Apologies again for the long gap in workshop transcripts - this is the first Workshop on which we have made notes since WS107 as I have been occupied in writing down the Proceedings of the March 2016 Global Ibogaine Conference in Tepoztlan, Mexico, soon to be published...

This workshop was given the week after the One Planet One Nation One Race Conference in Dubai, which was attended by Carolina – MK, for security reasons, remained at the SSI in Barletta, and joined via Skype as well as on Workshop 110, which was a very concentrated transmission only 1 hour long and focused on the Geographical Earth shifts pending on planet Earth, and which promoted the fast

(v1 2016-05-07) DRAFT (Transcription has not been verified. Double check info with video)

release of the secrets of the Oasis system for protection of the people of the Earth.

0000: On the SSI youtube video there is a 5 minute silence before the One Planet, One Nation, One Race promotional video starts. 0010: Rick Intro. MK begins by recapping his recent warnings of imminent big geographical shift on the planet with millions dead – very important to develop the Oasis system – MK is calling on Governments to be involved with developing this technology for their people. But we also have a team of 7 who will demonstrate this in the coming weeks...

0015: MK recaps the Iranian program in 2007 which involved manipulation of Gas and Nuclear matter to produce alpha wave radiation to produce lift and energy. Then at Descanzano nano materials through GANS and PLASMA produced the alpha waves. So we have plasma from nuclear and non-nuclear materials – now we come to the next step – how to manipulate the Plasma? This is where we share the process of lift, zero time communication, and PROTECTION.

0022: We are now coming to the creation of composite fields of GANS of WATER. With this system Armen showed creation of a sound barrier last week – we show the video shortly. This is with the WATER of the GANS rotated at 2400 – 2500 rpm. The next step is to bring the 90-degree opposed coils within the rotating sphere containing GANS of Water. 0028: This will be a new tool – highly powerful, highly energetic – with these you can create fields beyond the imagination of the man.

0030: One planet Video plays as Rick and Favio reset the system as they are having some technical glitches. 0038: Workshop resumes. 0044: Making a system from a hollow crystal ball you will create lift very quickly from the liquid plasma – they are setting up a website www.fieldplasma.org - the name has been retained for teaching Kf Lift and spaceship applications. So for medical apps the copper coils on the walk-through units can be replaced with double spheres containing different GANS waters. 0056: We will show how Jackie (In Switzerland) detects the outside of his plasma field. This is why we used a radio on the wall that was on at all times in Descanzano, and you can also use a camera (as Armen did last week)

0106: With this technology the GM field shielding of the planet can be altered to protect from meteorites etc. as well. This is why the World's militaries need to cooperate – all countries need to work together and focus on protection from what is to come! 0109: MK shows a picture of a refugee ship from WWII absolutely overloaded with people trying to escape the War zone – says this is what it will be like when we create our ships to escape – but ours will be space ships and OASIS

Notes from 111th Knowledge Seekers Workshop held April 28th, 2016

(v1 2016-05-07) DRAFT (Transcription has not been verified. Double check info with video)

units – these we need to develop VERY quickly to help people escape from what is to come (sounding more like Noah every day!) 0110: We will become the refugees of space.

0118: Armen plays his video demonstrating a sound barrier on his small copper bob rotated at high speed. 0122: 2nd Video – just 2 mls of lead (Pb) GANS water in the spinning copper sphere. 0126: MK explains – the shielding allowed the sound of Armen’s voice, but both the noise of the rotating sphere and the electrical field were shielded from the camera microphone – this is important for space ship development so you can talk across shielding but be protected at the same time. Also the shielding was changed by Armen’s thoughts and INTENTION - you will see you hear the noise of the spinning sphere then quickly followed by Armen doing something – so it is responding to his thoughts – this is Liquid Plasma that is demonstrating changes in response to Intention.

0140: MK talks about getting crystal spheres made by Swarovski Jewelers- they are already experts and will be a good source for crystal balls to develop this technology – put GANS of water inside them and VOILA! – OASIS System!
0144: Still waiting for Jackie’s Video of plasmatic light with visible boundary in the plasma. 0156: MK calls for Russian, American, Chinese militaries to get in touch for private teaching on military development. However Kf will NOT negotiate with the European Space Agency while they have criminals sitting on the Board (MK is referring to Mr. HB – see A NEW DAY ON EARTH for details)

0205: More teachings on unraveling the richness of the plasma, how we interact, how it delivers – and how you share what you want to share – e.g. you don’t use aluminium if you want protein. 0212: We will see how many of the men on earth we can save from the coming earth changes – but remember it’s the totality of creation we are saving, not just man (This IS Noah’s Ark we are building) 0219: MK explains how to take the water from different areas of the interaction between zinc and nano coated copper plates – shows the curvature of the fields, where there is ZnO₂, where there is CO₂, the yin and the yang separation of the curved fields from the composite GANS field. 0222: This is to teach about the Water of the GANS or “liquid plasma” – water from different parts of the box is yin or yang - or at the boundary it is balanced.

0231: We start teaching workshops for doctors on Wednesday afternoons – Wed mornings are for the Man of the Military, and Wed afternoons for the Man of Medicine – we bring peace and Healing – so if you are a doctor make an application (and we send your application to the Man of Military to vet – ha-ha –

Notes from 111th Knowledge Seekers Workshop held April 28th, 2016

(v1 2016-05-07) DRAFT (Transcription has not been verified. Double check info with video)

lol) 0233: military cost and spending is the same for countries whether they are at peace or war, the same number of people are employed – so now we can use the military budget to build roads etc. – this is where we change the guns to implements of peace – We have started certifying the Health application – MK talks about people doing trials around the world on the newly developed products – CO2 eye drops and skin lotion etc. etc.

0240: We are also close to commercial production of the Night and Day panels- Giovanni is at it! These panels can produce heat from the suns field and light from the Magrav planetary field during the night – the development is ongoing! 0241: for those who have managed to extract and use the liquid plasma the next step is simple.

0250: Kf China Shenzhen group have produced some beautiful stand up systems that now have permission to be marketed on eBay. The structure of these systems is a macro scale replica of what MK used in his cups for years – now being built beautifully by teams around the world! MK asks the technicians around the world who are creating these systems to collaborate with doctors for testing them.

0257: MK announces the 71 members of the International Council formed in Dubai and says they will meet again at a Conference in Roma September 9, 10, 11. 0300: Rick shows some pictures from the Dubai Conference. 0323: Further details of the Conference in Roma – not so much security needed – all the financial resources of the Kf will be in the hands of the Council to use for Peace. 0328: Carolina talks about the Conference and the formation of the Council – there was so much talking hardly anybody got ANY sleep – she might as well have not paid for her bed!

0340: A French KS (Dominic?) shows a small globe he bought at Dubai with glittering lights and white powder inside it. When he replaced the water with GANS of SEA WATER the glittering star like particles would not settle but stayed circulating in the atmosphere of the sphere. This is a demonstration of the plasma effect of the sea water GANS. There is some discussion and some people point out that these ‘lights’ are just little plastic particles – however MK says this is still an amazing application produced just at the right time to demonstrate the effect of plasma inside a crustal ball and how it creates different colored lights in the field. MK deepens on the ‘crystal ball condition’ – especially powerful with lead crystal – you will see the lights like different colored stars – just like in the little globe from Dubai airport! (but also extending into the planetary atmosphere over your system) 0347: Richard Ubique mentions that he has been getting similar effects

Notes from 111th Knowledge Seekers Workshop held April 28th, 2016

(v1 2016-05-07) DRAFT (Transcription has not been verified. Double check info with video)

from the use of lead GANS. 0348: MK says that with the crystal ball tech you can protect a country from nuclear weapons – talks about placing a shield over an entire country!

0354: MK draws a system he created when he was in Einhaven, Belgium – pre 2012 – this was a sphere with about 37 spikes each connected to a control panel, the inner sphere was inside an outer sphere. He filled the outer sphere with different Waters of GANS or different structured water, and started seeing different colored lights which helped to understand the energy absorption of the plasma – different lights in different conditions – depending on what was released to the GANS of the water. This was how he started seeing lights and now he introduces liquid plasma.

0400: An English speaking female new Council member describes the amazing meeting in Dubai and the formation of the Council “a lot of us didn’t know why we were there but it all came clear in the 3 days – we are a group of people to represent Peace on Earth and the Universe”

0404: MK announces a special meeting on 20 May in Barletta for BIG Solar Farmers – people running 10-20+ Megawatts into the Grid – this is a closed meeting for these manufacturers – organized by Sandor. 0409: We are also cooperating with Pharmaceutical Companies to market the new products – MK understands these companies are mostly Jewish but he welcomes them on board anyway (lol – MK is Jewish himself)

0411: MK begins to wrap up – thanks the group that is working with glass and crystal balls – go back to understand the interaction of the fields – in disaster protection we first need to create light and shelter – need to use huge differences in absorption and repulsion – e.g. if you create massive absorption with Lead (Pb) this is a channel for release of the material – gravitational becomes magnetical and you see the release of the shield and the light. MK describes in detail how to place one rotating crystal ball filled with Lead water inside another rotating crystal ball filled with CH₃ water. With this system there is no need for vacuum and expensive seals etc. to develop to the next step. You should be able to see the lights and the field protection – your system will show the field condition around it. You have to find the balance, and you can also create lift this way.

0415: You can create triple boundary and with the middle one create anything you need. If you get it right you will not need to rotate the spheres – the plasma will create its own rotation in 3 layers – you don’t need a motor, the plasma will

Notes from 111th Knowledge Seekers Workshop held April 28th, 2016

(v1 2016-05-07) DRAFT (Transcription has not been verified. Double check info with video)

automatically rotate at the speed you need. This is a freedom you have when you use liquid or vapor plasma – our colleagues will show these developments in the next few weeks – Armen is ahead of the bunch but we also have another group on the line (apparently listening in another language) MK will guide them to produce the first public OASIS system in the next weeks. MK gives big thanks to the group – who are listening and will produce this.

0420: Wednesday morning will be for the space and military people, and Wednesday afternoon specifically for doctors. Innovation center will develop systems based n the doctors requirements. Kf R&D is cooperating with Governments and Militaries, and this is happening very rapidly in China. 0425: Thank you very much – the 71 members of the Council will meet in Roma in September and another 73 from all the languages of the Earth will join them to make 144! This is a new world with no borders, and these people will be delivering Peace throughout the planet – 042837: End.
