

## Notes from 112<sup>th</sup> Knowledge Seekers Workshop held May 5<sup>th</sup>, 2016

(v2 2016-08-28) DRAFT (Transcription has not been verified. Double check info with video)

Notes courtesy of Cornelius van Dorp @ Keshe Foundation New Zealand (KfNZ)

Video link: <https://www.youtube.com/watch?v=N4NhfoX7Fsk>

In Belgium and Holland the Government is dishing out iodine tablets for the population for protection against nuclear radiation, and in this first part of Workshop 112 MK looks at the likelihood of further nuclear disasters around the world. He then delivers the solution with the Oasis unit and GANS materials for complete protection against nuclear radiation.

00:01: Intro Video – Together we can End War, End Hunger, End Suffering.

00:05: Rick introduces our favorite Knowledge Seeker – Mr. Keshe! We have a presentation from Thor John in Norway and lots of other stuff.

00:06: MK: Good morning, etc. Recaps the development of the Magrav units – lots of scientists and labs have tried to test them with meters and did not see any difference – this just shows their ignorance and lack of understanding as we now have thousands of units showing big savings in power bills. We have seen 2 small units reduce 6 MW usage by 10% in the first week. We now have the data for the use of 1 solar panel along with a magrav unit that will reduce power consumption from the grid by 54% in 1 month. The magrav unit makes the solar panel much more efficient. The original Magrav units we started them by gradual conditioning,

## Notes from 112<sup>th</sup> Knowledge Seekers Workshop held May 5<sup>th</sup>, 2016

(v2 2016-08-28) DRAFT (Transcription has not been verified. Double check info with video)

200w at first building up to 1200w load. However, now with improvements you just need to put a 500w load on the unit, e.g. a light, and you will see a 30% reduction in power usage overall. The new units all you need to do is put a 15w LED light on as load – from next week the 2nd lead will have a light bulb connection. If you have the previous unit – 2nd generation – then just attach it to a table lamp. The next generation will be just a unit with a lead to plug into the grid – you will not have to attach any load.

00:19: The innovations center may have now developed a unit that will bring at least 90% reduction in power consumption – it is now undergoing testing – if it is correct then we release the blueprint next week. We have tested a house for 3 weeks with 1 magrav unit – the first 2 weeks the power usage was 28kw and 30kw – the 3rd week we added a magrav unit with a 15w light bulb and usage dropped to 24kw – and we expect it to drop to 18 or 15 the next month...

00:23: We are developing a solar system setup with Sandor. The most used commercial panel at the moment is 250w per 1.7 square meter; so 1kw from 4 panels. With this system you will see an increase in efficiency so 4 panels produce 2kw – an increase of 100% in the efficiency.

00:29: After the success of the Dubai Conference, the Rome Conference is set for 9,10,11 of September – with hotel booked from 8th to 11th. Accommodation will be in 2 hotels. We will not disclose which hotels till 5 days before but you can book from today.

00:32: From today we are also looking for 1,000 people who want to be the first into space. 1st October we start teaching this group full time. These are our first MOZHAN (Man Originated Zone Habitation And Nutrition)– Man from the Planet Earth into Space! MK will be teaching testing developing from 1 October. We want 1,000 people who would like to be first into space. We have achieved lift and full protection, etc., so now it is time for the first crew. The fee for this is 10,000 Euro each. The 1,000 need to be prepared for 3 months of isolation to be prepared for space. Instead of paying Richard Branson and waiting for another 5 years, this way you get your hands dirty, you build the ship yourself.

00:43: doctors.keshefoundation.org is now open. This is ONLY for doctors. Not alternative doctors, homeopaths, etc. This is for orthodox doctors. From May 15th we begin training doctors. So we will allow doctors 10-15 minutes to present their cases. This will be led by an Austrian doctor who will be here next Thursday to explain how we will set up this system. Doctors can bring their cases and we will train in detail how to use the plasma technology for specific health conditions. We have MANY doctors in the wings of the Kf who have been waiting for years for the medical applications. Now with the recent development of liquid GANS as a health supplement, we can now spread the technology very quickly worldwide. Our supplements are manufactured in Bari but we are inviting pharmaceutical companies to take this and market it internationally very rapidly. ALL products will carry the KfSSI logo and be certified; initially from Japan and Italy. This effort will be headed by Mr. Kan in Japan who has done the testing.

00:54: We are applying for certification for our flying vehicle so we don't have the same situation as we had in Belgium where they confiscated the flying car because it had no certification.

00:56: There are a LOT of concerns regarding contamination from radioactivity in many different countries. Specifically, we see the possibility of nuclear disaster in Belgium. Holland and Belgium have been handing out iodine tablets in the last two weeks to their citizens; the reason being a potential terrorist strike. Our concern is not who is going to do what. Our concern is for the safety of the people.

00:58: ALWAYS keep a supply of GANS of CO<sub>2</sub>, CH<sub>3</sub> and CuO. Now we know that 3 teaspoons daily of the CO<sub>2</sub> GANS Water will reject all radioactivity from your body. This is scientific data from Japan. For more serious contamination make a bath of 60mls/gms of CO<sub>2</sub> GANS. Put that in 5L of water, let the GANS settle and then add the water into a bath. You need 5-10 litres in the bath (keep the GANS for making new batches). At the same time, take 2-3 teaspoons of GANS water internally. This will bring complete protection from radioactivity (Remember to use the Water of the GANS not the GANS itself).

01:02: There is a big problem with the 3 Belgian reactors. They have millions of cracks in them. They should NEVER have been commissioned. The man who signed them off then became the safety head of the Nation! This is a problem in any case, and now there is the threat of terrorist activity.

01:06: MK describes the reactors. They have 12-foot-thick concrete protecting walls. The ONLY technology that can blow up these reactors is a special missile that digs itself through the concrete to the reactor core. This technology is held only by US and Israel (Not comforting!) This is a worldwide problem: Chernobyl, Fukushima, and others, but now we have the solution.

01:11: MK warns people NOT to go outside in case of a nuclear disaster – do not even LOOK outside! If you see the light, you are already dead. If you see a mushroom cloud, you will die from cancer over a longer time period. So stay indoors immediately you hear the warning and start consuming GANS water: 1 teaspoon 3x daily and wash the body with the same water. You can use CO<sub>2</sub> patches and CO<sub>2</sub> water. For lung protection, inhale air through a straw going through CO<sub>2</sub> GANS. You have 3 applications of the health technology: lung, skin, and gastrointestinal tract.

01:18: Describes how to get a ping pong ball and fill it with CH<sub>3</sub> water and spin it on a laptop fan mechanism. You will hear a whistling noise at the edge of your shield. You can use lead or sulphur as well but be careful with sulphur (can create sulphuric acid). At the boundary of the shield, the noise will go from the back of the body to the front. To intensify the shield you add more lead or sulphur and this brings the shield closer. This is your OASIS tent. X-rays, gamma rays, nuclear radiation are all in matter state and cannot enter. Stay within your boundary – you might see shimmers and you will hear the noise.

## Notes from 112<sup>th</sup> Knowledge Seekers Workshop held May 5<sup>th</sup>, 2016

(v2 2016-08-28) DRAFT (Transcription has not been verified. Double check info with video)

01:29: If there is a nuclear disaster, it is very easy for a government to turn the disaster into a treasure trove and convert the Cesium and tritium into Gold. MK looks in detail at the unimaginably huge sums the Japanese government are making out of their tanks of contaminated water and hints that the Belgians may be looking at that!

01:36: The fat on top of the water is our survival kit to live. We eat meat and vegetables, etc. to absorb the amino acids. Now this fatty substance is your God given gift! To extract, you dip a pencil or something, transfer it into clean fresh water to take out the salt content. What you are collecting is GANS of amino acid. Wash it 2-3x to take the salt out, reduce the water, then place it in a sealed container. You can also add just a touch of CuO GANS to disinfect. Then you place it next to or on top of a glass of water and you have everything you need for amino acid structure of the body: "you don't carry cows with you into space!" If you put some CH<sub>3</sub> on the side of the glass, in the same way, this helps the transfer of the energy. Always carry some CO<sub>2</sub>, CH<sub>3</sub> and CuO for protection, and the amino acid for food.

01:41: In space you also need to be composed and in a settled frame of mind. For this you need ZnO<sub>2</sub> GANS. With this and CH<sub>3</sub>, you can walk people out of Alzheimer's and Fibromyalgia.

01:51: Most cancer, especially that relating to the sexual organs, is emotionally related. In this case, use CO<sub>2</sub>/ZnO<sub>2</sub> patch to satisfy the emotions. Use it directly on the area of your cancer.

(v2 2016-08-28) DRAFT (Transcription has not been verified. Double check info with video)

The picture is of Floren's (please excuse spelling) magrav unit made from liquid Gans inside plastic tubes - the new and much easier way to open the Plasma with Liquid GANS...

01:57: Floren from Romania who lives in Norway comes on. He has made a reactor from two rings surrounding a small ball. The rings are made from a smaller diameter tube inside a larger diameter tube. He has used CuO for his gravitational component and CO<sub>2</sub>/ZnO<sub>2</sub> for his magnetical, and lead GANS in the ball in the center. Very interesting. It looks like it has a heat shield around it but it doesn't feel hot. The tubes and ball vibrate and he can also hear a whistling noise. MK says yes, this is a sweet whistling noise – and gets Armen to describe the noise he heard with his system something similar. MK says you use CH<sub>3</sub> as a field expander, and Pb (lead) as a field concentrator. Armen says he had 11 ml of lead and 10 ml CH<sub>3</sub> in his spinning copper bob.

02:07: MK reveals that the 'group of 7' referred to in Workshop 111 is a team of scientists in China. The teachings are being translated for them real time.

02:10: Floren shows his system on camera: a 3-stacker system with the 2 double rings and central sphere. He says the tubes were transparent but the next day they became white and wonders why? MK asks him if he nano-coated the tubes? Floren says yes. MK says sometimes

## Notes from 112<sup>th</sup> Knowledge Seekers Workshop held May 5<sup>th</sup>, 2016

(v2 2016-08-28) DRAFT (Transcription has not been verified. Double check info with video)

the nano-coating reacts with certain type of plastic to make it go white. This has to be clarified (no pun intended?)

02:20: Vernie comes on and explains the feelings of tingling at the back of the neck. This is the plasma connecting to the body

02:24: MK explains that Gravitational field will turn IN and CLOCKWISE, and a magnetical field will turn OUT and COUNTERCLOCKWISE. So this is how the fields interact, they don't collide.

02:30: Vernie explains more about the rotation of the plasma – counter-rotating fields, depending on which GANS use. This can be felt depending on the interaction...

02:36: Vernie describes the new Car Magrav unit that now interacts with the person driving and responds to the person's INTENTION! MK asks about the efficiency of the new Car Magrav. Vernie says the car previously ran at 14 km per liter, but now gets 23 km per liter and getting better.

02:39: MK advises Floren to change to 90 degrees opposed tubes in his system and to make 3 more sets for a star system, then play with the CH<sub>3</sub>, lead, CO<sub>2</sub>, etc. For example, the TOP core needs to be Pb to create the variation in the density of the plasma.

02:43: Also comments that the fact Flores could FEEL the unit meant that he had transferred his amino acid fingerprint to the system.

02:47: MK explains how to make a GANS out of a drop of blood and lymph and place it in the center tube of the inner ring, and the magnetical of the outer ring. Also the little ball in the center with the same mix; then it will connect with your soul.

02:53: The next step is to create a field of plasma with NO matter condition or GANS of water. This is what we will be working on with the 1,000 people from the 1st October. As a start to creating free plasma MK asks if he really needs anything in the Center ball?

03:03: Heather in the USA sent some GANS, CO<sub>2</sub> and Water of CO<sub>2</sub>, to her awake friends and is starting to get feedback on her research. Using SRT – Spiritual Response Therapy – with a pendulum, a sensitive practitioner was astonished when he got 25,700, 26,700 Hertz, which is very close to the frequency of Christ or Buddha Master. (MK mentions the SQ, which Vivek in Singapore quickly Google's to find it is the Spiritual Quotient – as opposed to the IQ Intelligence Quotient or EQ Emotional)

03:10: Female from Oslo, Norway, introduces a 35 minute video made by her other half (pronounced Tooban) who has made various Magrav units and medical units in their home – she says they are living in a complete plasma bubble and this video presents their situation in Norway.

## Notes from 112<sup>th</sup> Knowledge Seekers Workshop held May 5<sup>th</sup>, 2016

(v2 2016-08-28) DRAFT (Transcription has not been verified. Double check info with video)

03:13: Before the video starts, another KS asks for more details on how to use the patch on cancer. MK turns it over to Vernie. Vernie says he uses the patches with Water of GANS: wet tissue paper with the GANS water and sealed in a plastic bag. With cancer you need a higher dose of GANS as well as the water: 3-5 layers of patches. It gets more powerful, layer by layer. CO2 patches helps inflammation very quickly. Burns heal quickly with 3-5 layers. Also CuO and CH3 layers are important in some conditions, and if you have infection, a layer of CuO in the middle is good.

03:17: The KS adds that he uses cotton cloth with CO2 GANS. Puts the cotton cloth around the paper and then into the plastic bag. But if it dries out does it stop working? MK says no. You still have the dried GANS.

03:19: MK adds the next step with the pain pens is to take out the copper wires and replace then with GANS water. For big tumors, a drop of lead oxide at the tip will suck fields out of the tumor.

03:25: The Norwegian Video starts and Tooban presents a series of stacker units set in wooden boxes:

1. A 3 stacker
2. A 5 stacker with a crystal in the center
3. A 6 stacker with larger capacitors and Christmas decoration balls in the center. Very powerful with lam and oven on the load side with all his computers and battery chargers
4. 4. A smaller 3 stacker unit but made very powerful with GANS and split capacitors. Seems more powerful than even the big units and can handle megawatt loads
5. 5. A stand up health unit with helmet and pens. VERY impressive work. A young friend stands in the health unit and describes his strange sensations: very calm but at the same time very active. Very weird! Feels like it is bringing peace to his body.

03:41: Rick stops the video at 15 minutes. MK says beautiful work but the coils will now have to be replaced with liquid GANS.

03:45: MK makes a further announcement about the ROME CONFERENCE – SPACES ARE LIMITED SO BE IN! AND ALSO PLACES ARE OPEN FOR THE 1,000! MK jokes that Armen will probably be the Captain, but Armen says he is not interested.
