

## Notes from 113<sup>th</sup> Knowledge Seekers Workshop held May 12<sup>th</sup>, 2016

(v2 2016-08-28) DRAFT (Transcription has not been verified. Double check info with video)

Notes courtesy of Cornelius van Dorp @ Keshe Foundation New Zealand

Video link: <https://www.youtube.com/watch?v=dpHneJMd-Cg>

The picture is of a Health system from Beijing, one of the numerous health systems being created around the world, shown by Klaus from the Austrian Mother ship, who is now coordinating the new Doctors' workshops at 2pm EST on Wednesdays...

00:06: MK: Good morning etc. As a family we now have to set up new ways of communication with our own rules.

0010: The Peace will come through the application of the plasma – Peace Through Plasma – PTP – Lasting Peace. With the new armies, the arms will be to FEED humanity, not KILL humanity. The Governments will see that there is no need to spend money on defense. We are creating a condition that fighting has no place in the structure. The strength of the technology will bring us peace.

00:13: Bookings are now open for the Conference in Rome to show the tools of peace. We are using two hotels and you have to pay up front or your booking will not register.

## Notes from 113<sup>th</sup> Knowledge Seekers Workshop held May 12<sup>th</sup>, 2016

(v2 2016-08-28) DRAFT (Transcription has not been verified. Double check info with video)

00:15: The German manufacturers are going into production. They have new technology different from the Italian products. In the next few weeks we will also see the Arizona factory start producing.

00:17: In Italy some banks have come into partnership with the Kf... From 1st June in Italy you can get a MAGRAV system for 10 Euros per month. We are delivering 9 million units to the banking system – this is only for Italians. They will get 30 – 50% reduction in their power bill immediately. This is how we are encouraging all Kfs around the world to organize themselves.

00:20: For the rest of the world, we have withdrawn the donation/contribution of 250 Euros, and anyone can now order a unit for 499 Euro plus postage and packaging.

00:21: As for the medical products, we are getting certification in Europe. We are looking for people to test the materials and report back. These will be produced in Italy and Japan by mid to late June.

00:23: The first doctors' teaching is next Wednesday the 18th. Is is being organized by Klaus in Austria. We are asking doctors to come with cases. We will bring the innovation team to cooperate, and they will produce the systems. Please book in advance with Klaus so we can organize sessions efficiently. The first generation of doctors will deliver the information to the next generation of doctors, etc.

00:26: The Universal Council has appointed a secretary general – Sandy. Ali has taken over as Webmaster for the [www.universalcouncil.org](http://www.universalcouncil.org). We are putting in place a detailed plan.

00:29: MK goes over the structure of the star formations built with Gas/GANS reactors to create the field and produce lift/ascent/descent. Then there was the evolution to copper coils 90 degrees opposed. To make the skin of the craft, we have to understand the 3-layer skin of the man. MK draws a 90 degree opposed set of coils and indicates the free plasma in the center as 1, the horizontal and vertical coils as 2 and 3, with the 2 coils inside rotating separately to the sphere outside and interacting to form the 3 layer tangible skin outside.

00:36: There is now another way of doing this without the use of motors to rotate. This is more like the natural systems of the universe where we never see any motors. This is what we saw last week with our Romanian colleague. You can do this with a pumping system to feed the tubes. The speed of the feeding will create a condition of interaction without rotation.

00:41: Then we move from liquid plasma to FIELD plasma. Two of the foremost researchers in this are Vernie and Armen. Giovanni is also moving ahead and we will also see different developments in China. You will ALL see more and feel more as your understanding increases on how to create and control the plasma.

00:43: Fields of plasma interacting is similar to the process of different clouds in the atmosphere creating thunder and lightning. You will hear huge bangs and noises like thunder. The first time

## Notes from 113<sup>th</sup> Knowledge Seekers Workshop held May 12<sup>th</sup>, 2016

(v2 2016-08-28) DRAFT (Transcription has not been verified. Double check info with video)

Douglas heard this he panicked. It is the thunder and lightning of the plasma state which shows it is coming into operation. The interaction of different fields in this way is also very much like the boom of breaking the sound barrier.

00:48: The interaction of the solid GANS fields of the body in interaction with the liquid GANS of the blood creates the noise and motion of the beating heart at the center. The same as planets and stars and galaxies – and the same as your craft will create its own heart and heartbeat. This will allow immortality. The same heartbeat supports a 10-year-old or a 100-year-old or a 200-year-old, etc.

00:51: Different types of humans were created at different times and places around the planet; different types with specific flow of the plasma. This might explain how the different blood types arose: O, A, B, AB. These types came from different areas of the planet. We did NOT all come from Africa as is taught in the schools. Now that we understand the interaction of the liquid plasma, and in a very short time the interaction of the GM fields, you will understand you can create the human structure ANYWHERE in the Universe if you create the right conditions.

00:55: Your skin is part of your brain structure. So if we feed you with the plasma strength of a 10-year-old, the man of 90 will return to youth. We have already seen postmenopausal women return to regular cycles.

00:57: You age through TIME but if you understand the interaction of the fields you can create a plasmatic time machine. We have already seen the first developments of this at the Innovation center. Some details of this revealed: you become part of the 'time capsule' or 'time zone machine'.

01:02: We now start teaching how man will interact with the creatures of the Universe.

01:06: MK tries to raise Kim at the Philippines Innovation Center to describe the noise he heard from the plasma field interaction. Renan tries to find him and MK goes on to describe more about the huge plasmatic field forces that interact to create the rotation of the matter state as in planetary/star/galactic systems. This is how we understand how Venus rotates the opposite direction from the other planets, and how the stars interact in REAL time (the light that we see did not travel for many light years – this is a delusion of modern science – we have a real-time interaction)

01:10: With the system as shown by our Romanian friend with his 90 degree opposed double tubes of GANS, you should easily be able to create the skin of your craft. If you go into total plasma condition, you will see time change around you.

01:12: Kim and his family dog come on creating some amusement (and also some interest from the Kf mascot). MK asks Kim not to show the technical developments he has made with Douglas as people are not ready for them yet. Rick suggests the dogs might be discussing the teachings! Lol. What Kim is describing, MK says, is the plasma state creating a traffic jam,

## Notes from 113<sup>th</sup> Knowledge Seekers Workshop held May 12<sup>th</sup>, 2016

(v2 2016-08-28) DRAFT (Transcription has not been verified. Double check info with video)

returning into itself with high energy, and creating a big bang. Kim's wife was shocked. The electricity went down as he fed a HUGE amount of energy into the grid. There was a big humming sound followed by a big bang and a plasma spark.

01:21: Man will interact with other species in space and man will learn from them, and they will learn from man. Man carries knowledge that other races in the Universe need. It will run both ways. Man does not enter into space as inferior; he will enter space as another flower in the bouquet of the Universal community.

01:26: We are ALL created from the interaction of the fields of creation at specific points. As we were created by the interaction of the same fields, we are ALL ONE in the cycle of existence. Life is NOT the exclusivity of this planet or anywhere else in the Universe.

01:28: Man has already been part of the Universal Community but he chose to close the doors. Now by building our plasma systems for peace, we return. A large number of you are expanding the knowledge in a VERY RAPID way. Understand the principles: what interaction leads to what effect; what condition leads to the process you want to achieve. Nothing is impossible! In the next weeks and months, the knowledge will expand so rapidly that Peace will be enforced. We enforce the process of using the knowledge collectively.

01:30: The next step is the development of your spacecraft to escape the shackles of your plane; but also understanding that you enter the shackles of the Universe. We will lose a large number of people due to lack of understanding. It's not just a process of releasing the knowledge, but we also have to raise the intellect of man so he understands the knowledge and does not blunder into unsafe conditions.

01:32: Giovanni asks a question about how to judge the speed of the pumping of the water GANS in the new systems, the liquid plasma systems. MK says you will see different interactions and release of energies, and goes on to describe how with certain speed and strength of the liquid plasma, you can create satellites outside your central system. This is how moons are created around planets, and this is also how you can create satellite crafts around your central craft.

01:40: Mario from Canada living in Bangkok comes on saying he thinks he has a crystal tube reactor without any crystals or tubes. He opens his camera and shows his system built from tubes and crystal balls at the angles created in the pattern of the Flower of Life. He had coils at the apexes, but with recent teachings has taken these out and replaced them with plastic composite GANS filled spheres (intending to replace them with GANS filled crystal balls). Describes how he has tried different types of GANS: CO<sub>2</sub>, CuO, CH<sub>3</sub>, Pb and Amino acid. When he spun the central sphere, he thought he felt an entity enter the system.

01:48: MK explains this is how an electron and a proton work together, and how a moon and a planet work together, how twin suns work. One is always creating a condition to feed the other

## Notes from 113<sup>th</sup> Knowledge Seekers Workshop held May 12<sup>th</sup>, 2016

(v2 2016-08-28) DRAFT (Transcription has not been verified. Double check info with video)

and this causes a gradient. He goes on to describe how to sense the rotation of the fields in this system, and how this creates different strengths of plasma.

01:54: MK says not to use so much Pb. Mario says he uses a Pb/in alloy. MK asks what is the atomic weight of Pb: 197. What do we have similar to use? Silver! He says he automatically does not like Lead as he was brought up with it around him. His father created Pb sheets for protection and they always had a horrible feeling. Mercury you don't want to touch either. He goes into an analysis of the molecular weights and tells everybody to use a combination of silver and gold. It is the plasmatic mass of this that is critical. Douglas also created Pb GANS and thought it was horrible. Silver and copper work perfectly together as do Silver and Zinc. Silver feeds copper. Copper absorbs energy from mono atomic silver so it brings healing to the body of the man.

02:00: Your emotion interacts with the system too. Try to add GANSes that feel good; see what materials are used for what.

(It is also very interesting to look at which planets are associated with different metals, and how they interact, and how the planets influence the properties of the metals during conjunctions and eclipses etc. For example gold is associated with the sun, and silver with the moon, copper with Venus, Pb with Saturn, Tin with Jupiter, Iron with Mars, etc. as researched by Lili Kolisko (<http://borderlandresearch.com/book/working-with-the-stars-in-earthly-substance>) and presented in a recently published video from Thomas Joseph Brown – Workings of the Stars in Earthly Substances (<https://www.youtube.com/watch?v=AkMA0xZYif0>). See previous post on this Facebook page, and also a wide ranging excellent presentation by Alison Davidson at the 1990 Borderland Sciences Congress...)

02:01: MK mentions that this is similar to how different crystals and stones can be used by choosing the stones that interact with specific chakras and incorporating them into healing pens – a way to create different flows ... In summary, use silver and gold and understand from the molecular or plasmatic weights which is the giver and which is the taker. Look at the mass weights and create a field flow and motion of the fields. Change the GANSes and make composite GANS even using different plant roots like ginger, or even other materials. In Bahrain they grind pearls to create a healing substance. This has energy released on a calcium base that interacts with the immune system of the man.

02:10: MK repeats to walk away from Pb – It is an extractor of energy and it does not give back much; use silver and gold! “I will teach you how to produce GANS of silver and gold out of thin air but man is not ready for it yet” To Mario: “This is beautiful – but experiment with different strengths and different field interactions – create the field flow!”

02:11: Lucas from Austria: asks a question about his ping pong balls, which seem to create a field of 50 – 100 meters – is this correct? MK says: Yes. Lucas asks how far the fields can go? MK asks Vernie to explain. Vernie explains how they started putting the reactors 1 foot apart,

## Notes from 113<sup>th</sup> Knowledge Seekers Workshop held May 12<sup>th</sup>, 2016

(v2 2016-08-28) DRAFT (Transcription has not been verified. Double check info with video)

then 1.5 feet, and now 3 meters. The field expands a lot when you add a load. For them, they have worked out how to sense the edge of the field by the effect it has on the combustion engine of their car. MK asks if we need to take a car with us to read the fields? Vernie says no this is just an example, but it is quite interesting to perceive the increase in power of the car when it gets to a certain proximity of the Magrav system.

02:21: Lucas says OK he tried to create a peace field in Vienna with a couple of reactors and he feels it is a big field, but how big? His system has two ping pong balls about 5 cms apart rotating at about 2900 revs per minute. Has amino acid and Zinc GANS inside. He recognizes it is getting more peaceful in the area but wonders what should be the next development? MK does not offer any comments, just says Thank You Very Much! (In the first few Knowledge Seeker workshops, more than 2 years ago, MK commented on the clearing effects the little experimental reactors in Descanzano had on the atmospheric chemtrails –indicating these fields are HUGE in dimension)

02:26: Klaus makes a presentation of many different health units built around the world in the last month or so. There is the original blueprint from the Philippines, Chris Young's in Taiwan, Rodrigo in Mexico City, the Mother Ship in Austria, then many from China in the last week or so. Units are getting more and more professional. Then last week's development was the presentation of Thorbjorn in Norway, and now the next development will be to develop systems with the liquid plasma, and also systems to work with the doctor's teaching starting next Wednesday. Klaus asks interested doctors to get in touch and he will send a form for them to present their cases.

02:29: MK repeats his request for doctors to send an email to Klaus and get authenticated.

02:31: Lisa from China comes on and presents developments from the person who made the Fat Boy: Mr. Chang. Four double coil reactors inside a sphere. Photos are shown by Rick with written descriptions This is a new version of the Fat boy but much fatter. MK says "It's getting VERY fat, this fat boy!" (Lisa chuckles). The next shot is a close up of the wires, then a picture of the whole system; the big fat boy in the middle with lots of satellite reactors. MK: "My God! The fat boy has had a lot of fat children!" Lisa presents a diagram showing how they are all connected. He wants to fly but he hasn't seen much yet she says.

02:39: MK says he has created a flow but there is a LOT of leakage of plasma. He switches to his screen and draws a simple arrangement of a star system with 3 at the bottom, symmetrical. One trouble with the fat boy arrangement is that the field is flat, not 3D. There is a rotational flow but no dynamic flow. You have to learn to compress the field inwards and also to look in 3D; not just have a flat flow of the fields.

02:45: MK says he should start tight. As Vernie explained: 1 foot apart, then 1.5 feet, then 3 meters. 99% of the systems created by people are workable but people have not understood how to work them. Mankind has looked at birds and created planes and rotating systems called

## Notes from 113<sup>th</sup> Knowledge Seekers Workshop held May 12<sup>th</sup>, 2016

(v2 2016-08-28) DRAFT (Transcription has not been verified. Double check info with video)

wheels. Now we have to look at the stars and planets and study the way they position themselves. Why is Uranus working sideways? And why is Venus going the other way? Look at the plasmatic flow of the field: they flow like rivers in the sky!

02:50: Now we have opened the Pandora's box of the knowledge of the Universe we have to continually add to it. We have to understand it and follow it the way it is done in nature.

02:52: Dr. Rodrigo from Mexico shows the upgrades in his walk-through unit. Very nice. He now has a very heavy helmet: 8 pounds. It has to be suspended from a wire as it is so heavy. It has Zinc batteries with it, and the system is adjustable to focus on any part of the body.

02:59: He presents a canine who had two golf ball size tumors on one leg that diminished down to pea size; one of them in 3 days and the other one in 7 days. Also there was an incredible change in the behavior of the dog. The dog is 13-years-old but after treatment is behaving like a young puppy, with better attitude and more energy. The system effects emotion and physicality! MK advises doctors and people using these systems to observe emotional as well as physical changes. Rodrigo says a LOT of people want to come and experience this beautiful healing field. Presents a case report of a female patient who had multiple brain tumors in frontal, temporal, occipital and cerebellar lobes and also in the liver. Five days after a series of treatments an MRI showed NO tumors in the liver or the frontal temporal and occipital lobes; just a small one in the cerebellum!

03:08: Rick plays the rest of Thorbjorn's video from Norway. The next 15-20 minutes with more details of the medical unit and the plasma batteries, and also different effects of different GANSes. Also examines and theorizes about the effect of the geometrical structure of the GANS materials – e.g. the pentagonal structure of Copper GANS etc. etc.

03:34: MK comments that he would like him to experiment further with mixing materials, develop this further and come back to teach his findings – very interesting work – look for the glows and lights!

3:39: Armen shows the system he is working on: 4 dark spheres – looks like glass. Says he is able to transfer the plasma into empty balls and then you have just the interaction of the plasmatic fields. NO matter any more; now dealing only with plasma – into the dimensions of the FIELD plasma.

03:47: MK comments, "Armen in the next couple of weeks will have a VERY big surprise for you lot! He is working on something very interesting. You will all be very surprised!"

03:48: Vivek from Singapore Technical Support has received a presentation entitled 'A NZ Magrav Health Unit' created by Kiwis who do not wish to present it themselves due to health concerns for themselves and their loved ones, so they have sent it to be presented. The unit has a lot of attention to looks, very aesthetic – more practical and less experimental. Instead of Perspex to protect the coils they have less dense material PVC and PET. Vivek presents

## **Notes from 113<sup>th</sup> Knowledge Seekers Workshop held May 12<sup>th</sup>, 2016**

(v2 2016-08-28) DRAFT (Transcription has not been verified. Double check info with video)

extensive technical details with some variations from the Philippines blueprint unit. MK asks Vivek to send the presentation to the Innovation team to examine it and if good, it can be posted on the blueprints site

04:07: Time to Call it a Day! There is an announcement from Sandy about the Q&A session to start in 1 hours' time. MK says that this is the secretary general and what a good thing it is that she is a female!

04:09: MK comments that we are moving forward VERY fast! Please book for Rome as we will close bookings very soon!

04:11:01: End.
