

Notes from 115th Knowledge Seekers Workshop held May 26, 2016

(v2 2017-09-17) (Notes have not been verified. Double check info with video)

Video link: <https://www.youtube.com/watch?v=IM4zEI4SHHI>

The picture is from about the 0107 mark where MK goes back into the health teachings, and in response to Steven Zang's health unit from China built with some of it in Aluminium coils, he explains why it may not be a good idea to use aluminium in the health units, though OK for the car and house magrav units. This workshop goes deep into the 'field plasma' a development from the liquid plasma and vapour plasma and by all accounts the ultimate step in development of the space tech. It also contains a few questions from our own Gladstone Watt who appears to be trying to make a flying house in the South Island of NZ Te Wai Pounamu - lol - good on you Gladstone kia ora koe!

0011: Rick: Welcome everyone. 0012: MK: Good Morning etc. As we have seen the teaching has moved to a new phase of space technology – in space we travel with Gravitational Magnetic forces, we don't float.

There are a couple of announcements.

1. The Chinese leadership has appointed Professor Zhu to mediate between Kf

Notes from 115th Knowledge Seekers Workshop held May 26, 2016

(v2 2017-09-17) (Notes have not been verified. Double check info with video)

China and the Chinese government and military. We accept this appointment of Prof Zhu to head the Kf China. All the 7-8 laboratories in China we support and approve – all the work is handed over to Professor Zhu of USPC – there is now a plan underway to produce 2 tons of GANS materials a day.

2. Tests are ongoing in Japan which will allow certification of the decontamination materials into the market in Japan independent of Tepco.

0019: In the reactors you are developing for space, as we explained in the last few workshops, you are creating a condition of motion and lift. In space we will not see motors or engines like we are working with the spinning reactors at the moment. But how do we do it in space? – We have a number of choices. You can create GM field plates – with GANS of different strength in different positions so that field flows create rotation in the center of your reactors – this is field plasma, not liquid or vapor plasma. In space you always feed from strong to weak field strength, you don't need motors or engines. 0025: This is the way the Universe works and will now be developed by the Chinese labs. Look at the surface of the planet – it is the interaction of the fields that decides where the solid continents and liquid oceans sit. The solid core structure decides the thickness of the atmosphere; this is contained by fields, not matter state. The shapes and forms of galaxies are shaped in a similar way by the fields of the stars within.

0029: In space you might not be able to find copper metal but you can create the field of copper by interaction of different field forces. Field plasma is the ultimate step in space technology development and the Chinese are heading the development. You have now to become masters of mixing liquid GANSes to produce the field plasma – several Governments are now running with this. You are working with atomic masses of e.g. Mercury, Lead, Gold, Silver – you create the GANS, then the liquid plasma, then the field plasma.

0038: This is in the writings of Baha'u'llah (bless his name) “when man understands the transmutation of elements – then the man achieves the maturity of his intellect”. So you understand now you can do exactly the same in reverse – now you have the plasmatic fields you can take them down to matter – the cycle is complete. You can create hurricanes without moving your finger. 003934: You can create oceans of winds travelling across the universe at the speed of the universe itself – its for you to learn how to manipulate – I have taught you in the past 2 years and now plasma tech in its field transfer technology is pretty much the ultimate step. There are a couple more steps but the knowledge of the Universe will take a couple of million years to understand – it is beyond the knowledge of

Notes from 115th Knowledge Seekers Workshop held May 26, 2016

(v2 2017-09-17) (Notes have not been verified. Double check info with video)

the man at the moment but you can create systems to enter the Universe and also to create a peaceful solution on this planet. If you understand the knowledge released today you have reached the point where man can fly to any point in the Universe he wants to.

0042: Man has been left behind because of his own ignorance and his violent behavior. This way you create motion in the fields of the plasma and predetermine the boundaries of the plasma – layering in sequence. You can then create a boundary with a safe environment – scale it up you can travel the Universe, scale it down you can dictate to grow any tissue or replace any organ in the body with field forces – you can produce the shape and color of the banana you like – etc. etc. etc. etc. 0050: Any questions?

0051: Mario from Germany – what is the difference between the GANS and the liquid plasma fields, in the way they interact? If you combine two different GANSes and then get the liquid plasma in water and it's a combined field like a new kind of material that exists in a meta-state – what is the difference in how they interact? MK: If you look at the GANS state when you mix GANSes they will have GM fields in respect to each other because they carry different structure – this is explained in Book 2. MK draws a diagram to explain what he is saying – When you have a GANS of Copper with another material even though they are in containment, if you look at them they are positioned with respect to each other because the central GM field is different. When you go into the liquid plasma now you have the same origin – so the gapping, the distance, is constant – all you have done you have created a condition of overloading the same plasma with different strength – this radiates according to the mass in the environment which is released. This is the homogeneity of the plasma you have created. In the GANS state you have positioning. In the liquid state you don't – but you have the field strength release and this is what you are looking for and each field in interaction will interact with its own. So (with) the freedom that you do not have here (in GANS solution) you create a spectrum of interaction. Here (liquid plasma) you do not – you are very much at the same level but within the structure of the same atomic mass. Mario: Thank you – that makes it clear to me! (Clear as mud over here ☺)
MK: Thank you very much!

0054: A question about the developments in China. MK repeats that this research into ALL aspects of the Kf technology is sanctioned at the highest level in the Chinese Government and they are committed to developing the technology of Peace. The Kf in several countries is collaborating with Governments – we have

Notes from 115th Knowledge Seekers Workshop held May 26, 2016

(v2 2017-09-17) (Notes have not been verified. Double check info with video)

seen this with Ghana and their atomic energy commission. The same process is underway with Russia and the USA. The technology has now proven its credibility and is understood by scientists. China will lead the spaceship technology, the new energy systems, the food systems etc. etc. We thank President Xi for his clear leadership.

0058: A presentation, via Rick, of Steven Zang's medical system. He has made this up of copper and aluminium coils. MK says you can use any metal to create a coil but you need to understand its field plasma and best to avoid Aluminium. He talked about the fact that 30 -40 years ago there were some Government programs to create rain by dispersing aluminium dust in the atmosphere, but these were stopped when the harmful effects of aluminium when it is ingested were understood – Aluminium particles are ingested then act as GANS of aluminium in the body of the man (In fact there is plenty of evidence for continuing use of MASSIVE amounts of Aluminium and Barium in the Chemtrail programs now continuing for 20+ years over Western Nations – USA, Canada, NZ, Australia, UK, Western Europe)

0107: MK goes back to the white board and explains more about ingestion of elements – draws a body with a mouth and intestine. When you ingest a food in matter state, in the mouth with saliva and stomach with acid it changes into Nano and GANS state – then in the intestine the energies from the food are released into the lymph. But there is zero-time communication between the brain fields and the body cellular fields, and what is requested by the brain allows the absorption of the energy by the lymph – to the specific cellular structure. So when the energy is absorbed by the lymph it is already targeted to be delivered. 0111: If you go back to the Health Teachings with Dr. Eliya Kostova we explained that no matter ever crosses the wall of the intestine, it is the energy, the plasmatic magnetic field, that crosses the wall into the lymph – the 'field plasma'. Only the food converted to Nano, to GANS, and already determined by the cell via the brain to be needed, is absorbed. 0114: Aluminium creates a specific field which is in the bandwidth of intellect and depression – that's why you don't use Aluminium because even if you create the plasmatic fields in such a focused way you create the field to be absorbed by the digestive system and into the brain.

0115: Mario asks about use of Silver coils? MK does not answer directly but sounds skeptical saying you have to understand what you are putting into the body – do you want to put the plasmatic field of silver into the body? 0117: Rick asks if Steven Zang's alum coils can be used for space technology? MK: Yes – no problem.

Notes from 115th Knowledge Seekers Workshop held May 26, 2016

(v2 2017-09-17) (Notes have not been verified. Double check info with video)

0117: MK: Now you see the teachings of 2 years ago coming into practical application. Each part of the intestine has different strength – absorbs different field strength – e.g. Vitamin C absorbed in certain section of intestine, another section the composite of red meat, another of Nickel etc. The stomach and intestine have the same 3 layers as the skin, and the structure of the layers dictates what is absorbed.

0120: Francois asks if when MK mentioned Thyroid gland did he mean Pituitary? MK says the 4 Parathyroid glands are the ones involved in the physical structure conversion of the field forces. One of these does the field conversion, one of them the matter of the emotion, one the matter of the storage, one of them the field transfer of the conversion for matter/solid state to plasma state, one of them is responsible for most of the conversion of the free fields to calcium only – that supports the bone structure. The 4 parathyroid glands have a role in conversion of the field forces to the GANS of the matter that is needed.

0122: MK explains that the deep-water resources discovered in deep layers of the earth crust are not from rainwater filtering down, this is H₂O created by the field force of H₂O at that level. The same thing applies to the use of Aluminium and its accumulation in the brain of the man. Same applies to lead and other isotopes. Its not all the isotopes of Aluminium, it depends on the rate of decay of one of the electrons in the boundary.

0124: A question from Mozhan in California: Is it possible to use the plasma field to travel through matter? MK: Of course – it will be a game play in times to come. Matter is very low in energy, you create a higher strength but low enough to understand the GM positioning of the matter state.. We use this knowledge in the detergent technology – in the old days we had to boil the clothes so the detergent could clean the cloth, now we use a smaller dimension, using oil of orange to enter the gap. There is no state that man cannot travel through.

0128: Mozhan: can we reduce the size of the matter with use of plasma – e.g. the size of the Earth? MK: Yes, in the same way that we shrink a virus – MK then raises the example of E Coli in the rivers of Ghana so the same applies to bacteria as well as virus. He draws Mr. Cohen on the white board – COHN – the amino acid at the center of the virus – then you have a plasma field that attaches due to the strength of one of the 4 elements, or a combination of them, that becomes a supplier of energy and it takes over – the plasma of the GANS then depletes the virus or bacteria so the GANS water can be used for sterilization or immunization. Another example is the experiment done in Tokyo where the mouse was infected

Notes from 115th Knowledge Seekers Workshop held May 26, 2016

(v2 2017-09-17) (Notes have not been verified. Double check info with video)

with a flu virus, then after being given GANS had no toxicity or side effects and NO INFLUENZA! The GANS depletes the virus.

0134: The same applies to the use of GANS patches in Cancer – you can use patches of different strength and create a gradient difference – same with 2 pens either side 0135: A few weeks ago I spoke about the time machine – traveling through time by the strength of the fields – this is the same principle – you become a sailor on the high seas – now you can create the sails to catch the magnetic winds of the Universe. 0136: In the patches you made with CO2 the CO2 is the weak part, the virus is higher strength – the energy flows from high strength to low – if you want to take you put a weaker field, if you want to give you put a stronger field etc. etc. MK shows how he used magnets of different shapes and strengths to achieve the same effects on his health cups – you can walk a man out of cancer immediately, but usually they will need to use a machine several times for the emotion to sort itself out and come to alignment with the physicality (or something like that)

0144: Rick asks a question about grounding of systems e.g. standing with bare feet on earth. Some systems have a grounding point, others use salt water as a dump – can MK explain how we ground in space? MK says “Oh in space we can ground easier than on earth! Then says that his neighbors think he is crazy because he walks barefoot on the earth and lies on the ground a lot – he gives and takes with the earth to bring balance to the physicality and emotion. People who live in high towers especially need this. You can use your head and hands also to bring balance e.g. putting your head against a stone wall – you take and you give to come to balance – same goes for lying on a beach – different strengths with different types of sands.

0149: This has a huge application in space – if you know how to dump, it is a very effective way for discharge of energies, especially if you have meteorites ahead of you – you don't want to destroy – by dumping you saturate – you release the energy so the gap increases and you can go through it. Space ships carry high energy packages for this job. You can dissolve a missile like sugar in hot water. For the past 2 - 3 weeks I have started teaching these techniques for the systems – how to create wind, how to dump, how to create motion, how to communicate. For storage and dumping you have isotopes of matter that have very low radioactive base but very high cosmic radiation base – they act as capacitors for storage of energy and Pb is one of them. 0153: This applies to sleeping with mattresses – these with steel/iron springs can cause all sorts of diseases – transfer energy onto your body in a harmful way. Try to sleep in a room that is full of Nano coated Zinc

Notes from 115th Knowledge Seekers Workshop held May 26, 2016

(v2 2017-09-17) (Notes have not been verified. Double check info with video)

– you will walk around in love with every creature in the universe because your emotion is satisfied.

0154: Question: Can humans control fields without having GANS or liquid plasma? MK: Yes, you can do! You have to understand your own being and then you can create anything you want and show it to others. You can create a meteorite like this – it is very easy but first you have to understand what you want to do with it. You hold your hand and create a plasma ball as Caroline taught last year – (Health workshop 43) – it needs a lot of understanding of your own strength.

0157: Mozhan asks MK what he meant when he said creating matter from plasma is an art. MK: You have to understand at what point the plasma reduces strength to be in a matter state. If you control the rate of the reduction of the plasma then you can create anything between your hands. You dictate the emotion with your brain, and with your hand you dictate the position and create gold, or bread, or anything you want. Christ (bless his name) did this 2 or 3 times but the people didn't see it – “This is My Body, This is My Blood” – that was how it was done.

0200: Monique is concerned about the use of Aluminium in her Magrav unit – will this create a harmful field in the house? MK: No - not harmful like the medical unit where the energy is sandwiched and has nowhere else to go. 0203: Thorbjorn from Norway received a patient with cancer yesterday – looking for some advice. MK says he can't comment as he has set up a structure to work with registered doctors. We must make contact with one of the Kf doctors and then he will work with us... continued in part 2.

0209: Gladstone Watt from NZ. He has linked up 7 magrav units in a stack to the metal roof of his house – he has a large energy field entering the ceiling and coming into his room. MK: What are you doing? Are you trying to make your house fly? Lol – GW says his house feels calmer. MK asks where the gravitational of the 1st coil and the magnetical of the 7th coil are connected? GW says the magnetical is connected through a Nano coated cable to the roof and the Gravitational end to a capacitor that is connected back to the neutral. MK tells him to connect the gravitational wire at the bottom to an antenna attached to the house and keep the magnetical to the roof. This way he will receive a massive amount of energy form the cosmos and bring it down into the house – the feeling should be different. He has to find a point to feed the gravitational – if you connect it to earth it will not gather in the house – needs to collect it from the cosmos and feed it to the house. MK says to use a zinc galvanized chicken mesh and connect the gravitational wire to this and he will have a fantastic time!

Notes from 115th Knowledge Seekers Workshop held May 26, 2016

(v2 2017-09-17) (Notes have not been verified. Double check info with video)

0215: More developments in making the 10 Euro per week units available. Fabio is working on this. MK asks the rogue agents to please call the banks now – they are waiting to collect their email addresses etc. for immediate action by the Italian Police – “the Carabinieri are waiting for you!” Also from the 1st of June there will no longer be the obligatory donation of 300 Euros if you wish to buy a unit, they will be available from Italy for 499 Euros.

0220: We have closed all dealings with Belgium – the reason for this being that the Belgian State will soon no longer exist – it will be divided between French and Dutch – we see this process coming up – you will soon understand why. Also we are moving a lot of our business into China where the currency is solid – this has to do with a new global banking system developing.

0222: A question about being involved in the trial of the GANS water health supplements for skin, eyes, etc. MK: These are not purchased – you pay your 60 or 120 Euro to be involved in the trial. We are setting a structure to collect data for international development. Sabrina is working on the system for public testimonials and GANS trials.

0226: Another question from Gladstone Watt: He has been experimenting with treatment of human waste. MK: answers by describing the research results coming through from Ghana where they have been treating highly polluted river water. They have now created new soaps that can handle any bacteria. MK reads the data on how the different river waters were reduced in coliform count – many to zero and ALL reduced dramatically. Research is continuing, including in China, to be able to treat the water for E Coli without harming other organisms. We know from Sierra Leone that CO₂ GANS annihilates the Ebola virus through taking the energy from the plasma of the protein. By adding GANS of CuO you can eliminate all bacteria but we need a balance of CuO and CO₂ so the fish and other organisms are not harmed – so we are looking at a combination of Zinc and CO₂ GANS with a small amount of CuO - you add energy to the river with addition of CH₃ but you take energy from that which is above Carbon i.e. the plasma of the virus/bacteria. You try to stay in contact with the marine life but anything above it you take away with the CuO.

0236: MK goes back to his diagram of how to handle a virus – the diagram with COHN inside and virus field around – you remove the virus shield and what do you have? Amino acid! This is a food. You change a dangerous virus with appropriate GANS for transfer of energy to a life-giving thing. This is the same thing we did in Tokyo – we used a radioactive element to create gold! You don't

Notes from 115th Knowledge Seekers Workshop held May 26, 2016

(v2 2017-09-17) (Notes have not been verified. Double check info with video)

destroy anything with the new technology – you change the situation. You have the bacteria or virus, you take the energy from it – inside it sits a usable amount of energy/food.

0240: Rick has a question from Sandy who asks MK to describe a situation where the Universal Council might be useful... MK says that as she is the secretary general she can tell us herself – Rick chuckles... MK says he is a foot soldier. Rick suggests that subgroups on Facebook might be a useful way. MK says yes Carolina has been setting them up, for example now a Facebook site for Vets after the success of Dr. Rodrigo with cancer in the dog.

0243: Rick reads the 1st Rule to become a member of the UC – “The Universal Council member should shine like the light of the Creator to be the source of light for other souls and radiate the light of the Beauty of the Creator and have and try to reach all attributes of The SOUL of the Creator. In time creatures of the Universe see this light and not the physicality of the man. The attributes of the Creator have been stated in many scriptures of the men in the past”

MK: I think that is the totality of it! This is the rules and conditions, and maybe this is the rule for humanity as a whole, but we will see in time what will mature...

0244: Rick reads the 2nd Rule... “Secondly, you are through your soul a member of the Council. The members of the Council can’t announce themselves as a member of the Council unless it is announced and registered under the Council’s panels, and no members of the Council can speak of themselves being a member and influencing their opinion or words – at this point they immediately loose their seat on the Council and a new member can stand for the position. Those who try and show they are better servants of humanity, they do not stand a chance to take a seat in the Council. Selection of the soul of the Council comes through service through giving from the soul and not by talk or physical actions.”

0245: MK: The process is very simple – a lot of people who were in Dubai and announced they want to be in the Council, then they went out to use it to dictate, and immediately they lost their seat. Before September we will announce the languages we have filled as members of the Council and if your nature is to serve humanity then you can come to the Rome meeting and stand for the Mother language to which you belong. We then work with the governments to implement the technology of Peace. We have seen this with only 1 world leader in the past – that is Mr. Gorbachov who put the soul of his nation ahead of his position and as the head of the USSR he submitted his nation to freedom of his soul. It takes a lot

Notes from 115th Knowledge Seekers Workshop held May 26, 2016

(v2 2017-09-17) (Notes have not been verified. Double check info with video)

of man to do that – a lot of freedom from physicality and he is still among us – he is sick but he is still among us!

0248: Sandy: Do Council members have to be in Rome? MK: No, we open zoom channels. People can stay in their own countries. If you are on planet Zeus you can't be there but you can be there with your soul. 0251: If you are Jewish and speak Hebrew please get in touch – you can do a lot with the Muslims and Arab people – you don't need to be there physically. Also a lot of African people will have trouble travelling. Abi Jo Obitsky volunteers to be the Hebrew speaker member of Council. MK: Shalom and Salaam are all the same – get in touch with Council – we work as a team to elevate the soul of the man etc.
