The picture is from Benjamin's presentation on the Soap Team in Ghana, where they have produced a soap with amazing antimicrobial properties... Prior to that in this workshop MK takes us to the pinnacle of the Magrav technology and teaches how to grow diamond crystals - this is the crystallisation, the final stage of the spaceship technology and so very simple - how to grow the right crystals from the fields to bring the form and the function of the spaceship into being - this is the phase when man the teenager gets the keys to the car and can now go for a drive to meet the Universal Community in a safe way MK says!

0001: Rick resets his 'World Going Around'. 0011: MK Good morning as usual... Today is the birthday of both Rick and Wince – so happy birthday old young men! Rick is 61.

## Notes from 116<sup>th</sup> Knowledge Seekers Workshop held June 2, 2016

(v1 2016-06-07) v1 (Notes have not been verified. Double check info with video)

0014: We are working with excursions with several Governments. Deep space technology means independence from this planet – man knowing wherever you go you are safe. Man has evolved and been kept in a very safe nursery – we call it Mother Earth. She has nourished us for thousands and millions of years. In a way the human race has become a teenager and it is time to enter the Universal Community. We've been nourished and protected and here is where the spaceship changes its position. Now you're an adult you can come home when you like – the spaceship program is the key for the car for the teenager going out into space – trained enough so he can survive the good and the bad and be safe to come home or make a home wherever you like! The teenager now has the key to the car to go out and travel around. WE are giving the key, we are building the car, and we are training from now on how to drive in the Universal Space – it will take time but we have laid a good foundation, the teenager can now start excursions into space and we have to learn the rules of the space conduct – where a restaurant and gas station might be etc. But right now we are teaching how to build the camper van – like the Hippies in the 60s made their VW combie campers – we can now make campers for space!

0020: We don't force our way of thinking but bring everyone together thinking in their own way – and this is what we have achieved across countries, races, colors, religions, etc etc. It took Christ 300 years. It took Muhammad more than that but because (the religious authorities) used the power of belief to control the soul of the man they got bogged down – but this time it's you – the soul of the man – who decides, and there is no limit if you conduct the ethos of the space in the correct way, not to harm, not to take advantage of space the way you've done on this planet, the fields of the Universe are welcoming and in so many ways (so many of us) have become part of the Universal Community. 0022: Now Internationally a lot of people have taken up the ethos of the Kf – trying to create Peace amongst men try to create systems that make man independent of the conditions that have brought pain and suffering to man for centuries – the comfort of having everything changes the position – changes the perception and the work – understanding the technology and how we can survive and become peaceful allows man to enter the Universal Community. Entering the UC with man who has been so violent for so many thousands of years is not easy. We will see reaction and interaction but in time we will see the process of the healing of the man away from his habit of killing to peaceful actions etc. etc.

0030: My teachings will gradually come to an end because I have created a condition for KSs in ALL languages and cultures to come forward and start

## Notes from 116<sup>th</sup> Knowledge Seekers Workshop held June 2, 2016

(v1 2016-06-07) v1 (Notes have not been verified. Double check info with video)

teaching – we have crossed the watershed – we’ve seen the Italians start teaching themselves, we’ve seen the Germans, the French, the Spanish, the Chinese, the Japanese – I will step down very soon. When we’ve achieved a handshake across the planet with the Universal Council I step down because I achieved my goal!

0033: In recent developments we’ve seen China and Russia come to an understanding – if USA makes a move against Russia China will release all the papers and dump the economy of the US – means China has taken the leadership of Peace – this is why we sit with the Chinese because peaceful behavior brings peaceful actions – so the final pieces are coming together in China as we open to the Universal Community – now we put the hand of peace to ALL the world leaders – we are the Keshe foundation – thousands of us world wide and each one of us adds to the mosaic of the beautiful cultures of this planet – it will be us guiding ourselves. (As the Hopi said We are the Ones we’ve been waiting for – also what Obama said in his first speech but unfortunately did not deliver the goods – not yet anyway!) Its not only growing bigger lettuces and cleaning the rivers of Africa, with this process We bring Peace!

0037: At this moment in time we have completed the teachings – the man can not understand any more – reaching the ‘field plasma’ we have reached the pinnacle and now we color in the picture – some of you will develop different methods for different applications. Nobody is wrong, double coils, GANS, Nano, all of you bring the knowledge of man on the table. But if you start claiming leadership of this country, that country, it means you have lost the meaning and the ethos. 0039: Bring the Nano tech, the GANS, the matter technology all together and see if you can become the first team to make an excursion on your own! It will be easy to get lost but if you have left beacons of light you can always find the way back home!

0040: Today we have something new from the atomic energy commission in Ghana – we will see a new material today again developed by an African nation. Today we have some thing new – a way to understand the technology very easily. Go back to the beginning to the very first KS workshops (transcripts can be found in A NEW DAY ON EARTH and the other 6 books of the first year of teachings published by the KfNZ – and many of the transcripts and notes have been catalogued and archived by Michael Foisy on <http://www.transformacomm.com/en/index.htm> - kia ora ki a koe Michael for your great work! What we taught in the last few weeks about field plasma has always been on the table but not seen or understood! MK draws solid bars showing the Nano mono atomics on the surface, and then the GANS spheres floating separated from the matter. The Nano and GANS shows the behavior of a diamond – so we

## Notes from 116<sup>th</sup> Knowledge Seekers Workshop held June 2, 2016

(v1 2016-06-07) v1 (Notes have not been verified. Double check info with video)

already know how to grow a Diamond crystal – the crystal grows only in a certain balanced condition. If you look in from the side you see only the darkness – the black Nano coating – but if you look vertically from above you will see the most beautiful crystals and superconductivity. This is the way to grow crystal! – You already been there but you didn't know it! Now with composite material and bigger and smaller spacing – if you make the right spacing you dictate the size and form of the crystal because each point takes position in the crystal. 0045: So you have already been crystal makers with your Nano and GANS ... you allow nature to take the position it likes – so those of you trying to make the perfect crystal look at this – you have to look to the medium so the GANS does not go free but forms into crystal – it is the space of the universe and the boundaries that can control the fields and control the freedom of GANS into crystal.

0048: The CO2 kit is the world of the Universe – you put Nano copper and Zinc plates and immerse them in salt water... MK describes again how the plates create the GM field of Carbon and then the O2 from the water joins it to make CO2 GANS from the carbon. So now we look at this with the new teachings of the last 2-3 weeks of 'field plasma' – this is a good example – the fields of the Cu and Zinc create the GM field of Carbon – then form CO2 GANS. After a while the system doesn't produce so much – you have consumed all the O2 in the water – if you feed O2 into the container you will have CO2 till the cows come home. You have already worked with the field plasma to create CO2 – so all of you have been in the diamond business from the beginning!

0053: Lets take it a step further to create the fields that make crystals – so if you can follow the principle any one of you can grow a crystal of any size, any color. I used to be a diamond dealer but I realized with this tech they are worthless – you can grow a huge crystal for a few cents. The Innovation center in the Philippines is on the path but have not understood completely – you are a beautiful team! Now you can grow crystals that have the unified field – go back into my teachings – I always said the future of the SSI depends on crystallization! You make a reactor out of 1 crystal – then what you have is mono – controllable and then a star formation of crystals. The positioning of your crystal has to make a crystal structure itself. This then can create the structure of your spaceship.

0058: Now the race for space is getting hotter. Now you understand how simply in 10 minutes we change the course of humanity – if humanity understands what is on that board (4 hexagonal crystals in a star formation) This is the beginning of the teaching of the true space technology. We have in the past 2 years walked you through the alphabet of understanding the Universe – now we come to building

## Notes from 116<sup>th</sup> Knowledge Seekers Workshop held June 2, 2016

(v1 2016-06-07) v1 (Notes have not been verified. Double check info with video)

words, letters, sentences, to be able to survive in space. Now you have the tools too understand this – a lot of you have been through the whole process, Nano-making, GANS-making, Field making, Crystal making – and now we see where we sit. 0059: now its time for you to all work together on the Internet to understand the crystal technology – try to share – try to understand the plasma crystal tech – what we call the field technology can create ANY diamond structure. You need to understand the totality of the structure.

0100: The knowledge has been shared many times, but those who were in control of the understanding never understood, and those who understood tried to become the Pharaohs and World Leaders. Now the knowledge is taught right across so everybody is equal. This has been done before but overcome by the greed of the man – the greed of the man is still very strong but will not win this time... Why is it that we see pyramids in every corner of the planet? The knowledge was shared but because of the lack of communication in totality it was cascaded by those who used it to rule – this time there are no rulers and it has been shared correctly. This is why you see pyramids across the planet – those who had the knowledge took it to use it, to rule to be better than the others – these were the pyramid builders. Now for the first time with the mass media the knowledge has been shared correctly and in totality you are ready to join the Universal Community through understanding of the technology, not by just making a Nano layer, or “I’m better because I put some coils on top of each other”!

0104: MK draws a flying hemisphere and draws 4 letters under it – E for Energy, M for materials, H for Health, F for Food. He then goes on with more words about man being another flavor on the bouquet of the Universal Community – its up to man how long this flavor will last. 0106: In each lecture there is a piece of the puzzle – it’s up to you to bring this all together – I just deciphered a very small piece for you this morning. You’ve been in love with diamonds – here they are! You’ve been dreaming of your space ships not made out of Iron and Titanium – now you have it! 0113: You can now grow crystals that if you turn the bucket (container) upside down the fields can equate the fields of the brain – you can repair the brain plasmatically by growing crystals – if you use the right crystals. MK talks directly to Dr. Rodrigo and draws the health system replacing the GANS coated coils with crystals. You don’t even need to see the crystal.

(MK goes on to give many more details of the way to create the fields in a plastic bucket by creating CO<sub>2</sub> or CuO GANS – then afterwards the fields stay in the container even when you remove the plates – and this is the way to grow crystals. The Chinese are the furthest ahead with these developments and these are being

## Notes from 116<sup>th</sup> Knowledge Seekers Workshop held June 2, 2016

(v1 2016-06-07) v1 (Notes have not been verified. Double check info with video)

developed at a Government level. There are 2 main peace making leaders, President Xi and President Putin who are developing this first and the Iranians have had the tech for a while but are not going outside their borders as they have learnt the lesson and been through the era of empire expansion. USA on the other hand is still under the control of the war-mongering cartel and busy manufacturing WOMDs to continue all the killing and destruction!)

0135: Benjamin comes on and presents a great Powerpoint Presentation about the History and Science of Soap making and then introduces his Soap Development Team, and walks us through how they created this beautiful soap from natural ingredients. They have created an amazing soap that has huge anti-microbial properties – tested on E Coli and Salmonella with total annihilation. MK responds that this is a world changing moment in history – these are the tests that were done in Sierra Leone last year with the Ebola virus but were shut down by the WHO working to promote pharmaceutical and corporate interests. But now it is out in public and cannot be stopped. MK says actually this soap is a Hiroshima bomb hit on the bugs and they don't even need to use the soap! – they can use the GANS or soap water and work through the fields of the GANS. CO<sub>2</sub> works well but CuO adds potency –

0258: MK announces a collaboration with the Emoto group in Japan for producing water with LOVE and GANS fields – you can use this water to chelate metals like mercury and Nickel from the body – don't use CuO or CH<sub>3</sub> – use CO<sub>2</sub>. CO<sub>2</sub> GANS will fix a lot of neural damage done by mercury amalgam fillings – you can strip metal toxicity from the body with CO<sub>2</sub> GANS water.

0303: MK reports that he started using CO<sub>2</sub> Water drops in his eyes – first of all he had a strange headache, then a tingling on his tongue on the second dose but now 4 days later his vision is amazing – he can read numbers from a distance he couldn't before. This morning for the first time for a long time he woke up without a feeling of pressure in his eyes. Yesterday in the doctors teaching he asked them why he had a tingling on his tongue and a headache at the back of his head? They decided it must have been making adjustments to the whole brain (occipital lobes).

0317: MK announces the link for Italians to get the bank deal in Italy for the Magrav unit – or it can be bought by anyone for 499 Euro. The Italian deal is now 21.56Euro per month for 3 years (instead of 10E per month for 12 years) after negotiation with the bank. The Italian bank is Banca Intesa San Paolo – the biggest bank in Italy with over 6000 branches- and then into Germany France Spain Netherlands with Deutsche bank.

(v1 2016-06-07) v1 (Notes have not been verified. Double check info with video)

0333: Klaus from Austria comes on in response to someone's question about their being a short video presentation made for doctors so if people want to introduce their doctor to the Magrav technology they can show them the vid – this will be made soon. 0334: Dr. K from Kenya is starting some experiments on seed treatment – to be presented soon – lots of research underway.

0340: Rick officially closes the 116th KS Workshop and wishes Vince happy birthday, and Vince responds before lining up the Rome Conference promotional video, followed by the MOZHAN video – and we finally find out what MOZHAN means – these are the spaceship builders and excursioners – Man Originated Zone Habitation And Nutrition! Interested people if you have a spare 3 months to go and build a spaceship please apply today at [www.mozhan.kfssi.org](http://www.mozhan.kfssi.org)

034526: End.
