(00:11:37)

Keshe (K): Today's teaching as we said on Tuesday – if you were with us on Tuesday – we have realized that a number of people have not or could not follow the teaching because it has been so rapid in the past few months, especially in the past four or six weeks. For that reason, we are trying to emphasize and bring back that we understand partially the totality of the knowledge of the plasma. And then we go into understanding the usage of it. We have finished with teaching in a way the matter state to the plasma state to other states. For that reason, we are going to process that we try more and more to understand how plasma interacts and how plasma comes into operation.

(00:12:30)

The biggest problem for us is we have habitually for thousands/millions of years relied on the matter state. And whatever we could not understand in the work of the field of the plasma, we have called it miracles and we have called it different things. But, in a way, we never understood the work of the fields, magnetic fields, (and) interaction of magnetic fields. And even till very recent past, till we have discovered what and how gravity is created, we made gravity the holy grail of science.

(00:13:15)

K: In so many ways, to accept the change from the mystery of gravity and understanding that gravity is the interaction of two magnetic fields, we have created and misunderstood and misrepresented the whole science being in physics, being in biology, being in chemistry because - as I have always said - we started with the matter and we got lost in the use of matter and we became too attached to matter. Now we started in the past few decades going further and further into it. We started centuries (ago), we called it the matter state, then we came to understand a little more of what we called chemistry where we started seeing interaction of fields or matters with each other. And then with it, we started understanding very much in different ways different approaches of the interaction of the atom. The problem with us as human beings has been that we started the wrong way... we started from the point of the creation.

(00:14:44)

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: We started with the matter state in our hand, in different shape or form, and we got to where we considered everything to be matter and not from fields because we could not see them, we could understand them. We could see planets running around, the stars. We could see the sun, we could see ourselves, day and night, and we started explaining what was day and what was night. We understood (that) the earth was not square or flat, and we started seeing the sun and understanding more and more about everything else. But the thing we never considered (are) the interactions between these entities. What causes them to move and what moves them to interact? So (the) human race got totally the wrong end of the science. We saw one end that was tangible to us but we did not understand where it came from. In a way, now we can understand more and more, we can understand, we can do everything totally differently. We started from the state which is totally close together and we tried to unravel it and tried to get into it, tried to understand it more.

K: But, in the past 100 years, that leap in the science due to interaction from scientists around the world has become much more (a) transparent science but, in that process, a lot of people made a lot of assumptions; we made huge (number) of assumptions. Whenever a scientist came along with something which was slightly different than the path of the thinking of the past, we went to or we opposed it because we could not understand it. We have seen the amalgamation of the knowledge has brought us here centuries, thousands of years. Now we call them computers and cars but go back (to) the knowledge of the science of the man. We choose foods, we choose certain foods, because the knowledge of our ancestors passed on to us (told) us what foods were good for us and what foods were not; which meats are good, which are not. These are all the sciences that we gathered, we gathered over thousands and millions of years to choose what fits the balance of the plasma within the body of the man. We never understood the totality of it. This is where humanity as a whole and the knowledge of the creation got lost.

K: But we have brought the knowledge together in pieces. Had we called, and worked with whatever and we saw the thunder of our ancestors as the fear of God wanting to punish them. They saw the cover of the moon with the light of the sun and they thought that was another miracle. And we have seen this gradually, now we understand this process and we are unraveling the truth and we are unraveling exactly what happens. But one piece of knowledge was missing and that was the knowledge of the creation of gravity. Now that we have found how gravity was created and you work with it and you make the coil, the gravitational coil and the magnetic coil. Now you can feel it and you can understand it because it interacts with the things you make and now we can start understanding the depth of the knowledge. In a way we started with the matter state and we came through the process until we got to the plasma. Let's look at it the other way, and let's look at the fields.

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: The fields in the universe come together and some interact and some do the opposite. The former became the gravity and the latter became the magnetic, the repulsion. (18.29 minutes). When they came together these fields in interacting with each other created what we call the plasma. Then when the plasma got together we got electrons and protons and we saw atomic structure, what we call physics. In a way before we saw the plasma and the work of the plasma we came to one step in the knowledge of man in the middle and we called it nuclear technology which became the understanding of the plasma. Before this level we just called the scientists atomic scientists because our knowledge went far enough that we could understand the physics. When the atomic structures came together we called them molecules and this is where our chemistry came from. When we got further down putting more atoms together in specific combinations, mainly four in a combination, this became biology. This is where our life comes from.

K: When we added more to the circle of biology we came to understand the essence of the intelligence. And then we added the 6 dimensions to it we came to understand the free plasma condition and the interaction of totality of the two which gives us what we like to call the soul of the man. (20.23 minutes). So we went the wrong way in the world of science. We started from biology/Intelligence and saw our physicality and then we started seeing it and became physicists, chemists, atomic physicist, nuclear and now we understand if we had started from the gravitational magnetic end of the science we would have had no problem. This is where we are and now when we speak about plasma and the fields it creates mayhem because it goes against everything we have seen, knew, or thought and it is hard to accept why we were so ignorant of what we saw every day. We started from the weaker point (biology/intelligence) and then we got trapped in the whole structure.

K: If the man had gone to magnetic gravitational from the beginning he did not have to go all this way. Going that way would have been very easy. But the man understanding the matter in the physical state went the wrong way. Now what we show here, we talk about magnetic gravitational and that is what is creating all the mayhem and all the problems that the technology is wrong, we are wrong, because it is the ignorance of the man who has bought this condition. Because we accepted the matter and now trying to say that for thousands of years we said we were correct and now we find out we were wrong is against the 'rule' and the grain of the thought of the man. So from now on we work in one level on the top. Now we can manipulate the plasma, the fields of the universe to create any plasma we like which with it we can produce any matter we like. As we understand more and more we understand that we go back through the sciences to the origin of the creation itself. And, the fields that have been created. This is why the present plasma technology and what we call the universal knowledge is in such mayhem with the new world of life and technology and science.

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: We have accepted so much that to say that we have been ignorant of the work of the universe is too much. This creates opposition and ‘something is wrong with it’, but now we have seen that it has taken some sciences hundreds of years to be accepted. Now we see universities and scientific organizations are rushing towards accepting because it makes sense and it has started working. Now we are getting news every week that different universities have started different collaborations. They are accepting the Keshe Foundation Plasma Technology now as part of their teaching. We see organizations of the atomic and energy in the highest level in nations supporting the information because it answers a lot of unknowns. A lot of unknowns and systems are not working; now understanding the plasma technology they can answer these unknowns. Look at the world through the aerodynamic—it’s finished. If you can take all the assumptions that were made and redefine it with plasma, it will start making sense in respect to the information of the world of plasma, field transfer and matter state. All the assumptions that were made in so many formulas by scientists to show they can prove something is working—now those assumptions can be brought into the equation and some of the mistakes can be corrected and some answers which we could not find in the world of chemistry, physics or biology now can be explained and corrected. We are adding to the missing assumptions in physics.

K: You have to understand this very simple thing: electron is a plasma, proton is a plasma, interaction of electrons and protons are two plasmas interacting and creating a field of themselves and we call that ‘atom’. This is the basis of the present knowledge after 60 years. If you had said to someone 200 years ago about atoms, they would have said the guy is crazy. When you start talking about chemistry they became alchemists because they knew and they could not explain. Everything spoken about protons today, had it started in 1916 just before WWI, they would have said the guy is a lunatic. We added to the knowledge but a lot of assumptions were made. It is not that the scientists were wrong; we can now fill in the assumptions. Look at all the sciences we have brought in. Science said the speed of light was the ultimate speed and we accepted that. On the one hand, it was wrong and, on the other hand, it was right. The speed of light that Einstein speaks about was correct but only in the matter state of the magnetic field strength according to optical observation. When you pass that it doesn’t apply because now we know that we can explain, show and create fields that are much stronger in the strength of the magnetic gravitational field. We can actually travel 100s to 1000s of times by the order of magnitude than the speed of light. So can we blame or support Einstein? This was the knowledge that Einstein had and no more. He worked in the matter state and he could explain it. But, he could see other things and he could not explain. Now with the plasma technology we can do that. Einstein should have remained a bookkeeper because in that purpose he made a lot of mistakes. He made a lot of assumptions. Look at the structure of light and the way he calculated it. It is nothing but assumptions. He wanted to prove whatever he came up with. But his work on the speed of light is correct in a very small way. But, only in the matter state of strength and if you go above matter state you understand it doesn’t work. But if you take the law of Einstein into the matter state of the higher orders, part of it fits, because the order of plasma technology and field interaction applies across all levels of the universe.

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: This is where we have gone wrong and this is where we start explaining to the scientists who do not understand what is going on, with all the professorships and PhDs they have, have gone down the tubes because, they worked on those assumptions. Now that we bring new knowledge they have to oppose it because otherwise they have wasted their lives. We have seen people who oppose it and cannot understand go down the tubes. Their professorship is down the tubes. We saw the first opposition from the man who supports it and now they find out his work is down the tubes. We see people from the scientists in the Italian nuclear and the American scientists have the same problems. A lot of their work has been done on assumptions; they sit down and they see now that bringing the speed of the plasma of different strengths of different magnetic fields changes the game. They see the reality and they cannot accept the reality. Now their degree is worth nothing and they cannot be called doctors or professors. They are human beings. At the end we can all add to the knowledge. The problem is so immense that we have to change the whole mentality of the science of the man up to now by adding to it and not destroying it.

K: This adding to the knowledge is creating a lot of mayhem for a lot of people. We saw when they added to the knowledge we became from the Atomic people to nuclear people. We spoke about atomic bombs and then nuclear bombs and now plasma bombs and everything that is bombs to kill, but we can work with peace. What happens is very simple; we started with physics and we could see matter and how matter attracts. In present physics we work on electrons and protons as the basis. In the interaction of these we came to chemistry and we had more of them. Then the more of the interactions brought us into biology. When we got the very first part wrong with assumptions, the whole thing has gone wrong. The physics, the basis of the physics in understanding the matter state by the scientists who brought it up because of the assumptions they tried to use to help to develop the knowledge of man they got wrong so it all goes wrong. In Farsi we have a saying: *if you put a brick down wrong at the foundation of the house, the whole wall of the house will be put wrong and it goes at an angle*. This is what has happened. I put a straight line which means part of the knowledge is correct. I put a second line (an angled line) and the assumption with present knowledge is not fitting in. But now you have to understand we made huge assumptions and then tried to prove them with wrong assumptions and this is what peer review has become. It is a club of those with wrong assumptions to review to say they are right. Anyone who comes for peer review with something that doesn't fit into that wrong is called wrong by their peer reviews. .

K: This is what we try from now on to bring for you to understand. This is why we see the evolution of the science in a very rapid way. All the 'science' was in the hands of the elite who called themselves scientists with titles such as professors and doctors now we come to a clear division. On one side you have the degrees and PhDs and on the other you have the human race--the housewives and the man on the street using plasma technology to make the GANS, to make the electronic

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

systems that are electronic in a plasma transfer and that have created bigger division in the world of science of man. Now the knowledge is so simple that anybody can understand. The others who made the assumptions have made themselves so elite that very soon they will be phased out. A housewife can show she can make a pen, use the plasma technology and her child doesn't have pain. We see now and we will show today the first Magrav unit in Italy which has changed from the Magrav to a power supply. You see the videos from the housewife and the man on the street. They have become plasma physicists. If the elite scientists don't oppose it, they have to pack up and leave.

K: What we see now is that the scientists who are supporting this slowly without losing any credibility because this is the correct way and they say we have the knowledge, we test it and we explain it and add to it. We can tell you that in a very short time teaching organizations, universities have started considering teaching plasma technology as part of the curriculum of the country. Italy is one if I understand correctly and in some of the schools in Italy in September, the plasma technology of Keshe Foundation will be taught at primary school level. We see this also in the Philippines according to a text I got from Renan. We see the same thing in Africa and the growing possibilities in other countries. It is the nations that accept the addition of the knowledge is not a danger to knowledge. The only opposition we see to this knowledge is the Jewish lobby. Jewish lobby is financing to suppress the Keshe Foundation technology because they work in the matter state and now they lose all their assets and control on humanity.

K: We have grown so much on the internet that the Jewish lobby with all their support, bringing people like financing people like Suzanne heavily to discredit the Keshe Foundation is not working. We have found the supporters of Suzanne Jewish Lobby spending three months in Israel to be trained in how to make things and now we find out the Suzanne Jewish Lobby is heavily involved in child trafficking. This is not our job; this is for the security services that are working on it and they will release the knowledge. Now you understand who is objecting. The reality is that we are all correct in understanding the knowledge. Those who are going to lose have to discredit. You see from this week you can go to the banks in Italy and buy a Magrav unit for a few dollars and very soon we will supply other technologies. We are on the verge of discovering new technologies that I give you today. I give you the basic knowledge and you build on it. I have to explain today goes beyond the imagination of a lot of you. Now you have entered this world of the universe.

37.45 minutes.

K: I have to explain something to you before we move forward. Next Thursday we will spend ½ hour specifically on the subject that Allan Sterling would not (now?) confess to raping his own children and be sentenced on June 17, 2016. We have discovered the full structure of Allan Sterling and his work and we are paying heavily for the work of people who worked on this section and were supported heavily by the Jewish Lobby. We have found all the contacts, all the hidden houses, all the

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

people who were involved and suddenly we have found a lot of people like “False Hope,” “Red Circle”, the German who showed up here—they are all connected. People like “Cummerand” (? Sp?) on the internet with *Keshe Foundation is a Scam* are all connected into child trafficking and into selling organs of the children on the health documentation in the West and other parts of the world. That is why we received the opposition because now the wholeness of these people has come out to stop the technology on behalf of personality of me and my foundation when in fact they are heavily financed by the Jewish Lobby because they are no more. The work in the Keshe Foundation and its people is 100% solid.

K: Next week, next Thursday we will spend half an hour and explain how people like Red Circle and Allan Sterling have been working as part of the leaders in child trafficking in the western Europe and America. What we submit is not an accusation. We submitted (information) last June and July about Allan Sterling and it took one year for him to be arrested. We explained how he was arrested and how we triggered that event and then you will understand to the day how we got him to make his confession and hand information over. Now the same process is going on with the Red Circle and the others who include 5 or 6 people on the internet covering the whole internet with all the things to do with me and my foundation. Now we find out they are all paid by one paymaster. We have found the paymaster and we can connect to every aspect of it. And, we can show the children and the people who abused them and the system for trafficking and then it is for humanity to sort it out. We brought it out and we have been proven to be correct and now we leave it to you to do the rest.

K: The problem is that the discrediting of the Keshe Foundation came through Red Circle and Allan Sterling and they were feeding it everywhere because now the Jewish Lobby in conjunction with the monarchies in Europe are losing their grip. All the wars have no reason. All the problems have no reason. Now by explaining the science you understand that you are all correct and you are all scientists. There is nothing to create psychological doubt in the work of the foundation. We see doctors—we had a teaching with them yesterday—and they are testing and seeing the changes. Now they explain that what they do scientifically can be explained in the world of plasma and can be added to help anyone. We see power supplies; we see everything else that is coming in to be delivered to be correct. You created the health pens. We don't sell it to you as secret technology. It is the technology of plasma and you are building them yourselves. You are taking the CO2 and the GANS and all we do is teach the basis the new additions to the knowledge.

K: This is important and from now we try to give you not only the confidence but the knowing that you were correct. All these side works have been to distract and to control. For the first time man is free. For the first time you understand this knowledge and you are free (to get) everything you want such as energy, shelter, food, medicine, materials, psychological support that you can create for

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

yourself. With the material you have that is created with your body, they cannot abuse you anywhere on this planet or in space. We do not need to be pressured in space by people who take to space because they can see how they can create, transport and how they can be anywhere at anytime. I started these teachings in a very soft way in the past six to ten weeks. Now we are going to the path of knowing that matter creates GANS and GANS create fields so now let's play the fields which are the essence of creation in the universe. Interaction with the fields brings to you what you want to have. So what we did, we did very gently.

K: There is a possibility that we might merge all the workshops on Tuesdays and Thursdays so that we don't cover the same material both times as we cover the same material on Tuesdays and Thursdays. So we add the Tuesday teaching into the teaching of the Keshe Foundation because it is not creating. You can follow the teaching in one path. This is important because then I don't need to repeat and go back with what was taught on Tuesday and the International becomes part of one teaching. From next Tuesday we teach from 3PM onward for the military of the Chinese government and the space technology agencies of their government. It will not be open to the public unless we come to an agreement with the Chinese organization. We would like to go public. We run a session with the Chinese in public. From now on, on Tuesdays if the Chinese allow, we will go into teaching space technology on Tuesday afternoon at 3 o'clock so from 2 to 3:30 becomes part of the standard Knowledge seekers teaching. One teaching follows another but from 2 to 3:30 we allocated to teaching to the military and the man of space. If you are military or a man of space, you have to get in touch with Professor Zhu in China. He is the head of the head of the organization for military and space and we have chosen a professor with a peaceful nation. We chose China as the head of space and military for the peaceful application of the technology and you can get in touch with them.

K: We have Dr. Klaus for medical and Dr. Ghatta for agriculture. We appointed Professor Zhu to be the head of Keshe Foundation in China for peaceful application of the technology for military and space and if you are a man of military being DARPA, NASA, Russian space agency, Russian Space Agency can all join on the Tuesday closed session teachings. Now we teach all of you and it will initially be in Chinese and then in English. On the other hand, the Chinese teaching will become part of the normal teaching of the Keshe Foundation as we have huge support in China. The Chinese will come back and teach us as much as we have taught them. The way we received teaching from Ghana, from now on we will receive teaching from China for us on a regular basis. The Chinese teaching will amalgamate what they want to teach us. The Chinese are nearly 1/4th the population of this planet and we cannot ignore that. We can support the knowledge to be spread, because the Keshe Foundation magnetic gravitational plasmatic knowledge is close to the Chinese understanding of Yin and Yang. It makes sense to them but they need to know how to use it too.

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: So what is the problem? How do we sit and where are we going to apply this technology? How we extend this knowledge is very important. It is absolutely crucial for us to understand the whole structure. Now that we understood you will see what we brought to you. We have gone over the first part of the teaching and now we start the trip into space and the space technology. A lot of you made the nano-material; a lot of you made the GANS and in making the GANS, coils and cores you added to your knowledge and made the pens. In the past two weeks we encouraged you by teaching you about how to use the coils in a different formation. If you use them in the flat formation, you use it for energy. We brought you the coil (48.31 minutes) in the flat formation to use in the Magrav energy systems. You worked with it and got your confidence. Then we showed you how to use two coils set at 90 degrees to each other. Now we get the plasma—it is the orientation. In the past few weeks with those who understood and developed the technology we brought you to the step of creating systems that when the two coils are at 90 degrees to each other, you create a field (49.09 minutes).

K: We created plasma and for you it was hard to understand. I explained to you very simply when you go back to the teaching and you made the core and you saw the GANS on the edge, and then you saw the water in the periphery and you saw free space and you could see a gap in the water where the tank was full and that was where the energy was. In your system and with this combination you can relate to what you have and what you squeeze. Now you have the speed of rotation and this for you will indicate the strength of the magnetic gravitational field life or medicine, positioning or creating matter. Now we have the rotation with the coils 2 ways plus the rotation of the GANS. (50.39 minutes). In each drawing I have shown you three rotations. These are the fields and the interaction of the fields now gives you a totally different understanding of freedom. It doesn't matter if you rotate it on its own or carry it as a movement of the plasma. Man has a beautiful tool that not many cultures in the universe have. In many cultures in the universe they don't have the coil structure in the core with the GANS field and it has been a problem for them in so many ways.

K: Man, understanding the knowledge they have with the matter and with the existence of the matter in making nano-material and with it creating GANS, plasma and fields this is huge knowledge which man adds to the universe. You are not going empty-handed. Man goes into space with the credibility of understanding his own culture and his own texture. So there is no problem; you bring the beauty of the knowledge to the table of the universe. You can in the nations and the cultures of the universe this knowledge of the cores and the coils with the GANS makes it easier to teach because then they can work with it. It is not that man goes into space as a subordinate. You go into space the way we take you as people who add something extra to the bouquet of the flowers of the universal community with the physicality of understanding and the knowledge of the understanding of the totality.

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: Now you have these systems with you and you have the possibility of now controlling. If you increase the speed of one, or of the two or you make opposite rotation from one to two or two to three (90 degree coil drawing 52.47 minutes) you create different conditions. Now you can pressurize with the speed in the way if you look at the field inside the 90 degree coils. With the speed of one or the other you can dictate the expansion of the plasma in the center. By compressing it you go to higher strength and by releasing it you go to lower strength. You start by the speed of light by 20 in the line of the green (in the coil/core shape) and you travel by the speed of sub -light by #3 or your red one. If you want to go very slow (-20), you can penetrate the matter state. We are talking the speed of light. Now you have the tools for playing with the plasma strength, contracting it or opening it or compressing it to go to the closer spaces, faster fields, or stronger fields, be it gravitational or magnetical.

K: Now you see man has in his hand every tool to be in space within hours if man understands the implication and application of the interaction of the plasma. What I have explained in the past few weeks, I brought you to this point. Let's see how you can use this new knowledge and understanding in part or in the combination of the two in controlling the plasma. We have shown in the past few weeks with Dr. Rodriguez and other doctors around the world, have started using these on their patients. We see the results and we see the changes in cancer, in behavior, in understanding and how the interaction of the fields creates direct interaction with the human body. We have doctors with Keshe Foundation and we did the 5th session yesterday and we start seeing doctors coming on board showing how they are using it and what they are doing with it and how they are seeing use rapid changes in the application. Why? Because the plasma they create in the fields which are not matured yet and their systems are very preliminary as they are using this (90-degree coil) and without rotation. They have limited capacity of the field and because the field is created by the lining of different GANS that are very similar to the body of the man, it gives them a field appearance which interacts with the body. (56.09 minutes).

K: What we are doing now in the medical section is that we are putting a bunch of these 90 degree coils around the person and as you have seen it is plasmatic and these plasmas move from one to the other and in that process the body of the man in the center of these coils interacts with the fields of the plasma and what it needs or doesn't need moves from one to another and cancer is reduced. You have to understand something important. This is the fear of the man and man has to understand one thing: cancer is the interaction of the fields which they found the gravitational field strong enough to absorb the energies. In absorbing the energies they solidify.

57.12

K: If you look and redefine this then we all have cancer because the body has used this knowledge of cell replication to create our bones. So our bones are a 'cancer' part of our body, but the body over

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

billions of years has learned how to use this ‘cancer’. Look at your kidney, liver and heart—they are more ‘cancers’. If you define the cancer, it is the amalgamation of the points where certain field attraction brings things to it. Kidney creates a field of attraction that it brings the liquid of the body to be filtered. The liver does it for other elements. So in a way when we see a cancer it is the amalgamation of fields the body is trying to adapt to. If you take the energy from it or allow a weaker field, by the principle of the plasma the stronger field reduces the weaker as we saw in 129. As the cancer in your body is transferring this field to the weaker one that is growing so it has less and has depleted of energy and you say it cures cancer. Cancer is not a disease; it is understanding the evolution within the field transfer within the structure in the body of man.

58.49

K: Now what we see we have to go step by step. We started with the coils and you got your confidence; we started with the two plates and then I brought a new dimension to the teaching of the plasma for health. Now we add the second panel on one of the open sides and a bottom panel. Now the fields in the box if you look from the top look very much like this so now you have a box with 4 sides, a top and the bottom. Now you have units on the sides with coils, coils on the 4 corners of the top and coils on the newly added two sides. Now if you look at it go to the patent of Keshe Foundation which released and there is nothing new here. You stand the man in a box which is covered with different strength units that are facing the man and units on the top and bottom and now the man stands in a balanced box. When you do this the balance of the coils in the right order, the top coils on the original sides (A) interacts with the brain of the man. the GANS for the A coils have to be zinc and calcium and the middle section of the body of the man works with the muscles and tissues and the GANS for these coils needs to be copper and zinc. The lower third is the immune system. The leg of the man is built to create the immune system to protect the above parts of the body.

K: You see the lower herbs on the ground: garlic, mint, many other herbs are close to the earth. Our bones are connected to the earth to bring the gravitational magnetic fields and like the herbs can disinfect the body of the man. We absorb that kind of energy with our feet and we convert in conjunction with the energy from the others to protect ourselves. (Drawing 1.02.14) here you make GANS that strengthen the amino acid immune system of the man. At the bottom of the unit you create condition that absorbs fields into the system. The bottom coil, the majority have to be gravitational. You create coils that help reject what is not needed from the top of the box. The coils are magnetical at the top. Now you see the future of space technology and the health of the man. It is simple now that we understand the secret of the creation. We are here as messengers of God to support man to go into space correctly and we deliver, as long as we can understand the process. When you don't understand we stop and allow you to mature. Now it is for man to man to move on and you have seen box of health and the Magrav health system which is in totality the total structure of the delivery of the health of the man which you see from the side, the side plate is vertical and has

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

3 pairs of horizontal magnets. The Magrav unit on the back side is vertical with a single row of 3 coils. That is the flatness of the man on the backside.

K: Now you have the capability to interact and develop systems which go with the application and implication of the systems and you can put the man in this box, support him for a few hours and lead him out to adjust his own amino acids, RNA and DNA and then bring him back out and you confirm that people are walking out of illness within minutes and hours. As we see the doctors are reporting this. Now you understand the box and that this box has a man in it and that this box has a field in it where now that you have the man, the man is created from his physicality to his emotion (1.05.10 minutes). The interaction of the emotion and the physicality creates the electron and proton and what we call the coulomb body of the man which is within the field of itself and is called the soul of the man. If you can control the fields in the box, the man can become anything when you carry his soul. When you carry the soul, the emotion of the totality of the coulombs barrier of the man, another word, the soul, into anywhere in space. When you deliver it you deliver it you deliver the man according to the environment in which he lands.

K: For us it is important to enter what we call the world of transportation in the universal dimension. This is important because you cannot build a ship and go to another place or send yourself from another position in the universe back to the environment in the body of the condition of man, you melt. You want to land on the surface of the sun with your body, your physical condition, you melt. But if you transfer the plasma of the totality of what we call the soul of the man in understanding the soul we lead to the creation of the emotion and the physicality at the point of delivery according to the strength of the position. Then you can land anywhere—in the coolest part of the universe or the hottest part of the universe. But, because we carry the intelligence and emotion with the full integrity of decision-making and survival, and now you made the box, you see gradually how others are developing it with all the As. And now you understand the fields with the body of the man in the box. (1.07.27). How do you transfer the soul of the man, the physicality of the man from a point in space to another fully intact? If you do it by atomic and molecular with every single cell, you have the problem of going from matter to plasma. But, if you do it in the field of the plasma strength it is a game for children to play. Don't forget you already have the tool in your hand and you have seen part of the work of the system.

K: How do you get man into tele-transportation or what we call Magrav positioning of the energy of the life in the universe? Let's start: If you understood the use of the coils, not in static condition, but in dynamic condition, the work of the cores in the dynamic condition, the interaction of the dynamic coil and the dynamic core and then you replicate it in a dynamic plasma condition now that you have created like the medical units, you will understand something very simple. As the coils rotate in the

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

core, and as you compress the inner plasma now you can go to create fields which you have seen in the rotation of the field strength of the body of the man. (1.10.07 minutes) we have seen changes in cancer. We have seen the fields have created that interacts with the emotion of the man. So we see the doctors reporting that in using this system people are happy, they change. They understand the position and condition they are in. Now we understand with the scientific backing of the doctors who are in this position with the foundation, we are creating technology; we are creating plasmatic magnetic gravitational fields, which are both simultaneously in the emotional level and the physical level of the man.

K: Now what have you missed? The same reactor if you can speed it up the right can give you the soul of the man in the strength too. There is no difference just because you haven't had the knowledge to understand it, now you understand it. If you make the systems to rotate and to be used and understand the strength of the magnetic field, the gravitation field, of the soul of the man you will create and shape the man. You can construct the man according to the environment because when the soul of the man is transferred and when it comes to position it manifests itself in his physicality. So now we will see how and what soul comes to understand and who will come to show the totality of their existence because everything in the universe has a magnetic gravitational field strength. Now that you understood this and now that you understand the simplicity of this let us open the door to the universe for the man. It will take you time to develop this but by the time you develop it you will understand how you can transport yourself across the universes if you know the strength of the destination.

K: You saw the walls and you put the man inside the walls. You created in your system a small anomaly which comes in the gap in the system. Now you create the system where the man is encircled in totality by the fields. (1.13.38 minutes) but, there is one difference: now you created rotation of the plasma in one direction. Create the rotation of the plasma in the same strength in a different direction. If you look at it from the top man is in the center with his hands and legs and there are equal circles when you look down at man. There are equal circles going around and now you have a problem. In the structure of this system you have to bear in mind one thing: you have a man that has a given specific gravitational magnetic field and that body absorbs fields from the environment at a given strength and it gives the same energy at the given strength to confirm its existence. If the energy is too much in the receiving or giving, we say 'he burned' or exploded and he's dead. Now go back into the teaching where we came with the core and coils and the field plasma in the center. When you make your coils you have to make a specific system and you can dictate.

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: I call the pink color going in vertical circles “1”. You put the man in the center with his legs and his arms and you create and this circle becomes you ‘1’. This is your first part. Now you are containing the body and all the fields of the body. This is the strength of the gravitational magnetic field that for a human being is on his point of creation which is earth. You want to go to planet Zeus and join us there. How do you create this? You need a magnetical coil which is your second coil and we call it “2”. And it is the strength of the destination of planet Zeus. As you change the fields and you have done this already. You move in the coils from gravitational to magnetical and you dictate and now the way you do the magnetical to be the strength of the destination, you transport the man in the essence of his soul from one point to another and it manifests itself at the point with the same intelligence and same emotion and the physicality acceptable to the point of presentation. And this is why you see so many creatures that suddenly disappear on this planet. Now you have cameras and you can record it. Because they decide the point of presentation and the point of appearance. So, the coils you make in reality is the stacking of these units in the correct magnetical way and what you literally do as I told you and what you see in this stacking unit from our people. (1.19.26 minutes).

K: Now you have stacker unit in the center and you have double coils. The center coil becomes your gravitational and the outer core becomes your magnetical and in fact what you see here as the crystal is the man itself. Now you understand why we started teaching the Magrav unit. In a larger scale in condensing and adding numbers but with a single gravitational magnetical field done correctly and the structure of the Magrav units done in the appropriate way is your machine into space to be manifested anywhere in space according to your strength. Now you understand that you have to create both gravitational and magnetical field in both layers because otherwise you lose the identity of the passenger.

K: This is how transportation in the essence that you can manifest yourself anywhere in the universe has been done. This is a gift from us to man to allow man to join the universal community. We have opened the door and it is for man to respond correctly so that we can teach more. Make the coils the way you have done. Governments have these finances to do these. Stand in between and if you do it correctly you choose the destination of your soul and you will see the strength of your soul and this is how we choose the council members of One Planet, One Nation, and One Race. Because we see the light they emit and the brightness and unity of the uniformity of the light within the structure of the creation. Blessed are those who understand.

K: Now you understand how we are in the process of developing a full system for man to survive in the worst and the best conditions in the universe according to his emotion and his physicality. It is important that you understand the totality and not part of it. All we have done in this process if you

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

look in the Magrav system; we put a little ball in the middle. Now the ball in the totality of the physicality is the man himself. It carries his emotion and it carries his physicality. And because he made of it, the man becomes the light of the creator in the essence of the creation. Christ, blessed his name, has done it and man has been blind to it because they looked at the physicality of it. Buddha touched it but never understood it. Because Buddha, blessed his name, detached himself from physical matter and he could work on the level of the soul but he could not see the transportation of the soul from the man from the village of the Earth into the universal condition. Now we teach all.

K: Understand the totality of the structure of the work of the plasma and the fields of the universe. If you look at it, you make and you 'write the letter, you fold it and put it in an envelope and whatever is written in that letter because it is in that envelope will be delivered at the point of delivery to whoever is the recipient. Now the number "1" in the center is the letter and the green number "2" is the envelope. And according to the rule of the transportation of magnetic fields you do not need to take long to get to your point. (1.24.48 minutes) You ease into the transportation at the point of the speed of the choice. Now let's say if you have a criminal hiding somewhere you have his clothes and you have the essence of sense like the dog can trace and you can replicate it. That criminal can hide within the deepest holes on this planet and we can find instantaneously where he is. You lose a child and instantaneously we can find where the child is because now we can create with the same system the magnetic gravitational field of the scent which is the beginning part of the emotion to the destination. Now those rulers who have killed, raped and pillaged, when they rape a child the essence of the child stays on their body. All we need to do, and we don't need the blood test any more, we can find the match and the criminal stands in front of you.

K: There shall be no place where the rulers of the world for their misconduct in abusing their power can hide any more. This technology and this knowledge will be so rapidly developed around the world by scientific and governmental organizations and by the women in the kitchens and the men in the garages. This is the problem: women are doing the whole technology in the kitchen and men in the garages. When we bring the man in the kitchen and the woman in the garage and they work together they will make everything together perfectly. And we see that if you have the clothing of your child gone missing in Africa and you put it in the system, you create the sense of his field and it dictates itself in a palace of the king in Belgium, the king is screwed and it will be done in the coming days. We ask the world leaders to stand up themselves to bring out their own misconduct that man does not need to judge them because the judgment of the man has been very harsh in hanging and destroying. The palaces of the kings will have no room as there has been too much suffering in them. Now you understand.

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: The problem is how you can develop this technology in its essence. The problem how you can control it so that you don't end up in the ocean in the Bahamas. You have to create the right environment where you want to land it. Transportation will be the backbone of the space technology of the Keshe Foundation because now you understand the totality of it, even though this is what I have told you up till now is a scratch on the surface of the knowledge of the universe. Even with this scratch some have problems understanding it. Make the coils, the inner of the copper. What are you going to do with the coil outside for your magnetical? Do you use the mixture of the GANS liquid to make a plasma? Now you are not conditioned to any because you create the mixture, you create the strength between the magnetical and the gravitational between the two and you decide the exact, precise point even somewhere in the universe where you want to meet your mother. *Mom, I will see you at the petrol station and the fuel station in the motorway* and you specify the point in space. You can give the strength, direction and position at that instance and as it changes so your field changes and you can never make a mistake. You both meet at the same spot in the universe. Because now you have tuned to be of the same strength change and the same position change.

K: Travel in space is so beautiful and the universe has more to offer for man to be busy to travel and to enjoy than ever making things to tie man to the room, the palace and the car. I own none because I know the value of the body of the universe. That is why I give all my work to humanity and the foundation because I have my own home and palace of the universe delivered. I wonder how many men will change. The totality of the strength of the fields you create will show your emotion. The totality of the fields you create shows the truth about your direction. The totality of the fields you create shows the state of your emotion and the condition of your soul. Don't forget; go back to the beginning of the teachings when I said *when you build the space ship people will not walk into it because they judge themselves and they know what they have done. The universe will not take criminals because the criminals are not there to enter; their composition will end up in a place we like to call hell when the physicality does not appear as the strength of the physicality and when the two tear apart.*

K: How do we create these systems? Now you are more or less halfway at the matter stage with the standing coil units. How do we get you to the stage with the core, coil and the field circles? (1.31.43 minutes) The Chinese are ahead and they are doing mass production of GANS. All of you are creating a few grams here and there. To produce the plasmatic condition of the composition of the elements of the universe you need mass production of GANS that with it you can dictate the physicality of the man to the liquid water of his existence. As I said by my arrival to China, within a short time we will put China in space beyond the imagination of the man. Mars is a game play; would you like to see any of the galaxies? Join China in the peace process of their demilitarization and in the unity we will teach you. Stay out and criminalize and you have no where to exist. The process is very simple; go to your understanding of creating these magnetic gravitational. You need

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

to understand the interaction of the fields of the plasma and then there is one little problem which I haven't told you.

K: Maybe I tell you because a lot of you will face it. This is what you like to call the coulomb of the man or the soul of the man. This soul of the man has his own strength and to be accepted and correct with the universe has to be the strength of the universal community too. To be next and part of you has to have the same strength and there is no place for lying and cheating—on the surface, yes there is, but underneath, no there is not. There is a game played by the Iranian girls when they say “I don't love you,” and underneath the table they pull you to themselves with their leg. That cannot happen in the universe. It has to be plain, correct, you join and you are a part. There is no use trying to join men of space who reach this level (shown by a larger circle than the circle representing the soul of the man) and you are just a very small circle. (1.34.36 minutes) There are no stowaways. We don't have any. They cannot gain the level. They cannot jump in and think because the others have got (the energy of the universe) that they can go too.

K: This is why we push and encourage the unity of mankind and they all think the same way: but, you have to change the whole structure of the physicality of this planet. And that takes time if man decides. As I said before and we have seen it many times, when we announced the world peace program, the first time we held a meeting Europeans didn't come. Then the Italians broke rank and they came to the second one. And then we came to Italy. And today we see the Italian press starting releasing (information) about the Keshe Foundation. Italy will break rank very heavily because now they have everything. Giovanni walks in today with an Italian newspaper with him. Because now the process has started and governments, scientists and journalists understand there are no shackles from the Jewish lobby. It is for humanity and for the nation to save energy and to get better and we are getting involved in ever aspects of the culture and living in this country.

K: Decontamination: we are trying to sort out something with the sea and with the earth decontamination. And with energy in the coming time we announce the opening of the Keshe Foundation banking system in Italy. This was we can give and encourage the rest of you to do so. The way to approach is to learn from the Africans. Come in contact and work not so much as you do with the public, but put part of your effort to go into the scientific organizations and the universities, governmental institutions and education and show them the benefit of the technology. Tell them yes, there is a lot of misinformation about Keshe Foundation, that they are frauds, because this was paid by the Jewish lobby. The misinformation was put there in conjunction with the Illuminati and monarchies as we have seen in Belgium with the Jewish lobby to create as much mayhem that in discussion everything gets lost and they win. But this time they lost. Because too many people are creating. Tell them we are wrong? No problem let me give you a pen. You have a pain? Use the

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

pen and when it works come back for the next one. Start showing the working and the beauty of the technology.

K: We have given advice to those who have caused such mayhem: Shut your websites! Shut all the rubbish you put on the internet about Keshe Foundation and write what is correct and what it is or when we put you next to Allan Sterling there is no peace for you. Very soon there will be a peace – wiki. Very soon Sterling’s types of websites will be taken off the internet and all the people who trafficked on it will stand their own sentence. So our advice is very simple: bring it together and show the application and implication of it. As I said, on Tuesday afternoons we start teaching for the military in the Chinese language. Because the Chinese army and space are part of the Keshe Foundation to show they understand we can bring them all together for a peaceful nation. If you are American, we know you are sitting on our communication line for the teaching, but come officially. We wrote NASA: Mr. Nelson as head of NASA we are prepared to start renegotiating. You have been the fiber between NASA and working with us but the blocking of the Jewish lobby in Washington is now exposed. We are prepared to negotiate with NASA directory at the highest levels as we have done before.

K: The same goes with the Russian Space Agency. The present space technology is useless and finished. It is a matter of months that the Chinese will go beyond this solar system and above and the Americans are still busy to feed a few men on the face of this planet. I will take the Chinese space technology and their military to the level that they don’t spend a single cent on the army, but on the development of the comfort of the nation and the man into space. The team of Chinese doctors who are working in the background with our technology we support you to develop the latest health systems for the Chinese population. The other nations can join in. On Tuesday afternoons we teach the military on outer space and not for killing and defense. The military means being able to survive any condition in space and space means becoming the military to space and they become one. We don’t have any military; we will have space technology headed by the Chinese government scientists because they understood and took to the ethos quickly.

K: It is important to understand how we interact the fields and interacting the fields that result. The fields we created with the Chinese are the field of peace, brotherhood, equality and we get the reciprocal answer and that is how we work. This has to be with the man and the universe too. You have to learn to work and to be transparent. We start teaching heavily and I said to Rick this morning that I will teach something today you have never seen. Now you see it; it’s the transportation of the man through the soul of the man and not the physicality of the man. Some of you who don’t understand you laugh and it means you have not matured enough and that you lack the knowledge of humanity that has not matured enough to understand the detachment from his physicality and what

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

happened at the last minute and last breath you say *Oh my God! Where is my soul?* How can you have a soul serving you when you have not served the soul?

K: Understand that to make systems which are homogenous, correct according to their application, and which can work in any dimensions anywhere in the universe. But, understand that you need to keep the collective structure of the plasma of the soul of the man intact at any point in the envelope in the transportation in the universe. The postman is you, the envelope is you and the letter is you, if you understand what I have just said I wish I was in New York, I wish I was in London, I wish I was in China, I wish I was with my son, I wish I was with my daughter, I wish I was with my loved one. That wish becomes your reality. Go back on the teaching on Tuesday (June 7, 2016) and the purity of the true blood of the man how Paul from Togo showed us the same water and the same metals that the wish of the man created. The African nations will bring the beauty of the creation of humanity to the table. We see this step by step. Now you understand what I said two minutes ago: you are the letter, you are the envelope and you are the postman. Go back to Tuesday teaching where Paul from Togo showed us how the bottle of water is the creation of man and with it man wishes how and what he likes to appear. Now you understand.

K: The water is 95% of the body of the man. Time to create a GANS, but the GANS appears according to the wish of the man, to the place of the man to the delivery of the man. Wish peaceful and you will achieve. It will be very interesting in the coming time it is the first time man will see and it is the pleasure. I call them 'beautiful people' and you call them schizophrenics. Build these systems as they are on the screen and you will see, not the physicality, but the soul of two or three. Then you will understand how misguide man has been in understanding the reality of the creation even of himself because within the environment of the system you make, you will see three souls. (1:46:17 minutes). Each soul is individual with its own strength; or there may be two souls. Or as we have as advisors to the American government, there are eleven souls. Maybe that is why the Americans are so clever because they have someone with eleven souls in every dimension and it has been advising 6 past presidents. Now this is what I explained; in the coming time you will the strength of the soul. If you have 3, you shall see 3; if you have 2, you shall see 2. Then man can respect schizophrenia not as an illness but as a beauty to the creation to respect the 3 and to enjoy the 3.

K: Then those of you who claim to be 'pure' your soul and the condition of the reaction of the physicality and totality of your body will show the reality of the intention. A horrible time—you call this the truth injection given so you tell the truth. Now you have the plasma truth injection. Let's see how this works. I tell you *I love you;* you say *I love you too, darling.* What should be clear goes black. Uh oh. Was I the liar or were you the liar? Or something is said, *I am going to be the*

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

American president and I will bring peace. But I am being paid by the Jewish lobby to create as much war as I can. Black shall not be the skin of the man; black shall be the soul of the man. This is the beauty of the new technology; this is the beauty of the extension of the knowledge in the world of the creation. Now because you have started creating the plasma of the structure as one liquid plasma and the fields created it, it has one dimension. It is not a mixture and it is not an alloy. It is the Magrav strength combination. That is why when you look at the water you see nothing in it but it is all the same. But, in time when you understand to measure the real, you measure the color of the plasma before you added the GANS to it and you measure the color of the plasma after you add GANS to it. Then you see it is not the same color or the same transparency. But in totality every cell has increased the way it works in plasma technology and you see the same.

K: Start understanding the strength of the plasma and how it is. If you have thought on it, I see people are coming up with new ways of confirming the existence of the plasma. This morning on the way I saw something on the spaceship group of the Keshe Foundation. It was beautiful and I wrote a text for them to show this to Rick and we show the reality with the pen and the others and we see how are trying to confirm in their own way the existence of the plasma in the totality. Jacky, are you on the line?

Jacky (J): Yes, I am here.

K: Can you show the pictures and let Jacky explain what he has done? (1.50.58 minutes)

J: so I see the kids' workshop where you explained how you can play with an egg. I put the egg into an 'egger' and after a few days you see the next pictures. It was like a bouncing ball and I had the separation the yolk becomes like a small ball. The separation was with the yolk and the white and I decided to play with this substance. So I put the yolk into the liquid CO₂ plasma with a little CH₃ to give this some energy. This is the first picture. Then I put some caustic soda and normally it would become like a GANS; this didn't become like a GANS. It became a new form, new plasma. It is like the ball but in a new kind of matter.

K: Why did you put the caustic soda in it? What happened when it was just a GANS?

J: It was not becoming GANS. When I put the caustic soda to make it become a GANS, it became as you see in the picture. (1.53.40 minutes).

K: What happens if you just put the yolk in the GANS?

J: The caustic soda and the other elements don't change anything.

K: If have not put the caustic soda in it you still get the same shape?

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

J: Absolutely, the caustic soda, hydrochloric acid and those things don't change anything.

K: So this is what you go when you put this in the CO₂ GANS and the CO₃ GANS?

J: Absolutely.

K: So everybody can test this and let us see. This explains to you the energy of the GANS. If you put GANS water in the water and put the yolk and you get the change then it confirms more for you about the energy of the GANS. We have seen how we choose the GANS in different ways, and this is beautiful.

J: You can see the white in the next picture. The white is totally different and it became like the other GANS. The yolk doesn't act the same; it's totally different.

K: If you are online and you can mix the GANS, put the yolks of different eggs in the GANS water and extend the knowledge. Let's see if the transfer of the energy in plasma condition will give you what you are looking at. All of us for centuries have put eggs in the water and nothing happened like you have shown. We make scrambled eggs in the hotels with water because it is cheaper and makes more volume in the scrambled eggs. If you can put the yolk of an egg, the white of an egg or any other little thing, these are confirmation that you are dealing with plasma energy. If this is correct, and what amount of the liquid plasma of the GANS did you use, maybe you have to increase the amount of the CO₂ water. Maybe you have to work directly with CO₂. Maybe if you use different GANS of different strengths you can float the egg as it does when it is being cooked. This is to give you the demonstration that you are dealing with the energy system of the plasmatic condition.

J: Yes. It is clear absolutely. (Picture of the white GANS from the egg white at 2.00.16 minutes).

K: Thank you, you bring such gorgeous gifts.

J: The beauty of this is I am on the phone right now because I am getting the friend of Paul from Togo who is doing the Togolese Keshe Foundation.

K: Thank you, let him introduce himself. Can you explain who you are?

Baka Agu (B): Yes, I am the president of the Togolese Keshe Foundation and I arrived in France and I asked Paul, my friend and we are working together. My name is Baka Agu (? Sp).

K: Welcome Baka; explain what you are doing please. We saw beautiful work from Paul from Togo that brought a new horizon in the understanding of cancer to us on Tuesday. It will be nice for you to explain more of what is happening in the Keshe Foundation and what you are developing. Or we can give you time on Tuesday to introduce more about Togo. It is a new organization into the Keshe Foundation.

B: We just began and we are trying to have our authorities to be ... I'm not good in English.

K: Speak in French and François can explain or we have someone here...

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

B: That is even better.

K: While we are online I'd like to ask that you and Paul get in touch with Benjamin and Dr. Ghatta and Alexz and join us in the African summit in Ghana in October. You are invited and please join us. Explain what they do in Togo and we will understand more.

Thank you Jacky; we see the work of Jacky, people in Germany who are pushing the introduction of the knowledge. We are seeing hidden men behind a lot of work in Italy. Giovanni works heavily with institutions, government, and private individuals, anybody who is anywhere. That is the reason for the success of the Keshe Foundation in Italy. It is the same with the Keshe Foundation factory. They have brought the Keshe Foundation and the work of the foundation to governments and the financial world. They see us now as a new generation of money making and that is why they like to work with us. But they don't understand that soon money will have no value. We need people and we hear an Iranian working very hard in Germany to teach anyone anywhere. Soon we will bring him to the table and you will know him. He is on the Keshe Foundation Germany.

K: We see people working like Renan and the Keshe Foundation innovation team in Philippines in bringing the technology at the level of the government. Governments and scientists are responding to this technology because they can see it; it's very simple. We saw the pen taking the pain away. We saw contaminated water that you can now drink. There is no ambiguity. There is no discrediting or scam. The scam at the moment sits with the Jewish lobby. The hands have been opened and the same with those who sit with the organizations in the financing world and in communications. We don't have a problem; our problem is that the technology works too well and it looks too good. That is our only problem. The only problem is that you have to have the confidence that when you show it you know it. We saw it. If that air conditioning is there and you walk up to the office of the president or the health authority, you say that you have a new cooking machine. This is your water; this is my water and I put an egg in it and it boils. It is there and it is cooked; then there is no ambiguity and you don't have to wait for test results. As we have said, the results are so immediate. This can be measured in a blood test within 24 to 48 hours.

K: The purpose of the work for the foundation from now on is to solidify and give you confidence that this technology is correct. We now where all the scams against Keshe Foundation came from; they were centred on Allan Sterling's Facebook and he opened his Facebook and we see all the collaborators and all the false charges, child trafficking and everything else that has come up. It's very amazing. Six people took the whole world into hijacking because they have done it for so long. Red Circle has abused his own children for so long that to him it is a habit. Now we have 5 names of victims, two that were murdered at the hand of Red Circle. We will publish their names. So the conviction is on the table and the confirmation is by their own writing and not by us. Now we have two of his daughters who have been raped by him; we have two murdered children linked to him and

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

he has his own writing of exposure by pissing in the garden in front of a child. That is a criminal offense by any standard even by the standard of the Belgian government.

K: Now you see that 5 people who went out to discredit Keshe Foundation now found out that they are captured. We will give on one of the world Medias all the details and you will read it in the newspapers. You will believe it and this is your shortsightedness of how these people through the support of the king, or ex-king, have managed to keep humanity from being free with such beautiful technology that all of you can benefit from. It took the training of what I call the twisted eye woman to go to Israel to get financed trained and to create interviews and everything else and to become one Iranian, one Jewish and any other color as long as they can import children from Asia into Europe. We have opened all their tracks but now Red Circle we have a message for you. We have your two daughters that you raped. The same happened with Allan Sterling; that is why you supported him. Now we have two murders that are attached to you that you caused and have been part of. You confessed to the 5th one yourself. So, by any standard we will take you to the European court of justice and have your sentence passed by the law. The more you write the more you have exposed all of it. And now, security services are coming in. The eleventh floor is the right place for you to be. Nowhere to escape.

K: Carry the technology by its strength and its beauty and then we forget about this bunch of hooligans who kidnapped the world from this new technology. We have to understand the reality and the totality; try to play and you see how simply Jacky with an egg gives confirmation of the plasma. Change your plasmas. This way maybe the position of the egg in respect to will give you new measurement for the strength of your system. If the egg floats, what is the measurement for it? Do we make another egg time machine or an egg strength machine to understand the strength of the plasma? This is how we are back to the beginning of a new science and all of us, every single one of us is a plasma scientist, be it the woman in the kitchen, the man in the garage, the professor in the university, the doctor in his surgery. If we can use this technology to bring comfort to another man, we have served our purpose; this is how we increase the soul strength of the man by receiving. The soul of the man is very much like a huge gravity machine waiting for anything given to it to be able to give more to shine more. When you help man with the pain and he has no pain and he says' *God bless you* it means he gives you part of his soul and my magnetic gravitational system does into effect to catch every piece that is given me.

K: It is in the writing of Mohammed, blessed is his name; *I made man to create children that they may love me*. This means they give from their souls and that elevates my beauty. This is the job of us ... all of us. We know, we give and sometimes we can't give all in one go because the knowledge is not ready for some people to receive because with it they can damage themselves. I have given the

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

example of the old woman with a house on the edge of a desert with a king who knocks on the door and says *Woman I am thirsty*. She opens the door and says *Wait, I'll give you some water; you have to wait a few minutes and I'll get the water*. The king waits and the woman opens the door and hands him a bowl of water, cool and sweet with the sugar cake. But she leaves the pieces of the cane top of the water. The king, being thirsty wants to drink it in one go but the pieces of the wood of the cane keep interrupting his drinking. When he is done he asked the woman why she did that and why did she put the wood of the cane. She answered, *my friend, my king, if I had given you the whole water (without the cane) and you drank it in one go, because of your thirst you expanded your stomach and you would have died. This way you took it slowly, the body absorbed, you overcame your thirst and you are here*. This is the story of the King of Iran.

K: This is the same with the man; if we give you the chalice of knowledge in one go, you will be drowned. So bit by bit we take the pieces of the cane out of the water so you can drink more because now we are satisfying the thirst of the man for the new knowledge. It is our job and your job as the people who are familiar and close because you understand more and you have been here longer to teach correctly and to teach in accordance to what your people understand. Don't show too much and try to be too clever because they don't understand and they don't want to admit their own lack of knowledge and strength of understanding. Then they oppose you. Show a lake and show water that can kill an animal and put a drop (of plasma) water and drink it and it doesn't hurt you. This is how we have to behave. This is how we show the understanding in the small measure. I was at the table with one of the richest men in the world in the past few weeks. I put a drop of the GANS of the water in a glass of water and he was very apprehensive. I drank it. He said, *do you know something? We go to India a lot. This could help me and it could take it with me in the even of any infection. I can take this with me and put it in the water. I have diarrhea every time I am in India*. He immediately understood and Keshe foundation is financed with one billion dollars by one of the richest men in the world.

K: You will see the investment that comes into Keshe Foundation by world leaders and by world scientists and from the wealth of the rich to support the poor. We aren't asking for any return. This is how we have to reach the people. Because they know how it affects their life. You will meet this man very soon and he is proud to use the technology; he is proud to take the technology to his country and other places to be part of it because his motive is to serve humanity. Wealth has come to him as part of the natural process of the commercialization of his country. We are breaking through by example; we are breaking through by positive application of the technology and my job is to show more and more applications of the knowledge seekers. Go back to the Tuesday teaching with Togo. Go back to the teaching last Thursday by Ghana. Today in a few minutes we had more. You should have joined us yesterday with the doctors and how they are applying the technology to their patients and the results they are reporting. Join the people that are delivering systems which are now for the first time that Magrav units have become free power supply for everyone in Italy.

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: Rick, have you received Fabio's video? This is the first time we have shown this and Fabio is one of the teachers at the Keshe Foundation and he has used the technology. This is a Magrav system which is built by Giovanni for a gentleman in November. He helped him to make it and now you can see this is a simple man made system in Rome. You can see this; it was videoed on Tuesday by the husband and wife. We have seen this already in London and now people who have been on the system for 5 months to a year are reporting the same results. A lot of this is in Italian so Giovanni will translate.

Giovanni (G): There is no light here. Now we go into the kitchen and there is no light. Nothing works in the kitchen. There is no light. This is a connection on the wall connected to the Magrav. This is the proof the Magrav is working and giving the energy to the lights. The Magrav is working and gives energy to the refrigerator and the lights. Thank you very much; I am really happy with this Magrav. Before there was no light and I'm very appreciative. The Magrav gave energy to a multiple outlet that also had the lamp plugged into it. The energy company says no electricity is used today.

K: Now you see the first delivery of the Magrav system with power that is independent of the main. Because the plasma is charged enough to run the refrigerator and the lights. We have received a number of these reports and the man is a teacher in the Italian teaching section and the unit was made by him. You can test your Magrav system every now and then to see when it is gradually becoming a power supply. The technology is perfect in essence and knowledge and now as I said on Tuesday we start strengthening to give you confidence that the mayhem created by Red Circle. Because he was discovered to be head of child trafficking in New York, he did not want to be exposed. Now he is exposed and the man he trusted as his right-hand man brought into Keshe Foundation was raping girls, 3 or 4 who were his own daughters. They same a simple thing: birds with birds, wolves with wolves. And we have seen the wolves.

K: Try to explore the knowledge and explore the expansion of the knowledge. Don't wait for patents; there are no patents in the universe. We don't have a European patent office, a world patent office or a universal patent office. So try; play and bring the knowledge. Many of you know that next week you will get the emails for the GANS products for the skin, the eyes and the lotion. We have been told that by next week we will receive the certification and we can release the materials. We are waiting for certification and this is why you have not seen your materials. Once the certification is in transport, we are covered. We are told that once certification is received you will receive your emails and a confirmation of the application sent back to Keshe Foundation Health. Then you start receiving. If the countries don't allow the receipt of the material, we will send you instructions and you can build it yourself.

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: Don't forget you paid to become part of a world-wide survey. We don't go to pharmaceuticals and borrow billions. We participate with the people ourselves and people will sit to organize the data and bring everything else together. 120 euro for research to participate in is nothing compared to what we are delivering. As part of this I explained last Tuesday I started using the CO2 GANS myself because I suffer from a very bad eye degenerative disease. Now we see the process: I can see at this moment and I can report this testimonial. I could not see to read from 10 centimeters or 20 centimeters. I changed my phone from regular to the larger screen so I could see it. This is 4 weeks ago. We can provide the purchase bill for the units because I could not see. 8 days ago on Sunday I started using the GANS water of CO2 on my own eyes. Because it is becoming critical, sight was not easy especially at night. Concentration and lack of seeing, when you see your frown to concentrate on seeing the little words and all sorts of things. Now if they put a cover of my book, I am about 10 meters away from my book on the table. I can tell you where the words clearly on the book *Origin of the Universe*. This was impossible.

K: I have been teaching in this room for nearly a year now. I had to go close to my book to read and I always asked myself if there would be a day that I could not read my own writing any more. I stood with Giovanni in a government office on Monday in a corridor and I said I can read from the other side. He answered that he could see but not read the words; I could read the words better than he does. So I am testing the GANS water of CO2 directly. I put it in a spray bottle; I shake it every now and then and fill it with tap water and let it settle and spray 2 or 3 sprays directly into my eyes. Then I rub the water of the GANS around my eyes on the side of the eye. When you receive your drops don't drop them in your eyes; the change in the structure of the eyeball with cataracts has changed the construction and the structure of the eyelashes too. It has changed the structure of the muscles around the eye to accommodate the eyeball. When you use it, rub the extra liquid around your face around your eyes. What we have seen from the report from the doctors yesterday the presence of the CO2 allows the generation of new tissues. This means that you can change and with any changes it balances it. If it is needed, it will build it. You see different changes. As I report before on Sunday night the first time I used it I had pressure on a part of my brain on the writing side and I am left-handed. I have had to adjust my writing and that was the first thing. The next day I had a change in the strength in the tip of my tongue and sometimes I still feel that. It is as though my eye has in some way a direct effect on my taste and the tip of my tongue. As the body assumes you are going blind it has to strengthen the other organs. How would you taste or understand the smell of the banana and you cannot see?

K: When you go into eye degeneration and loss of sight the body starts programming other parts of your body to become stronger to replace it. I didn't see major changes, just a little bit that you put in daily occurrences in your life. Again on Monday, Tuesday and especially yesterday I felt very heavy

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

pressure on my eyeballs. There was heavy pressure and I thought they would come out of the sockets but I couldn't put a finger on the pressure. It was like a lot of muscles were adjusting and pushing and pulling. On Sunday I noticed I couldn't read properly any more. I thought something was going wrong; it had worked for a few days. Then I realized that something had changed; I see the same light but there is a problem. In the past ten years with this degeneration I have been pulling the muscles and closing my eyes and I'd put a little finger in front of my face to read things. Now, the change was different. I have to open my eyes to read as I am reversing having to frown and look at the light to be able to read. I have to open my eyes and I see better. My son said I looked like I was frightened (with my eyes wide open). I can see better now. You see different light and it means the whole body is restructuring. I realized I could feel some weakness in the right eye, some laziness. Most probably the other muscles pulled. Now I think it is coming into balance. I don't feel the laziness from one muscle.

K: This is how we are developing this technology. This is how I have used it; this is what has been done for me and in less than ten days I can read nearly normally. But I have to adjust because a lot of adjustment has been done. The strange things are the past two days food tastes very differently; it tastes good like something that is desirable to eat, but it creates a lot of hunger; it creates an enormous amount of hunger. Why does it do that? Has it changed the habit that by not looking at the light in a different way? Does it use a lot of energy to create and reorganize and that energy shows up as hunger? Is the body reorganizing itself so that it needs a lot of mental and physical energy? Is it part of the process how it is? I put my testimonial in the use of CO₂ for the eyes. We have seen the testimonial on the use of the CO₂ on the skin of Dr. Nash in Ghana last week. He says that by using the GANS, the discoloring and two tones on his arm is gone and now the hair is growing back.

K: Strangely enough we had the same report yesterday by one of the doctors in the doctors' teaching. So when you use CO₂ for the skin it changes the discoloration and two-toning. It didn't make the skin of Dr. Nash to white; it changed the tone to the rest of the skin color. We have the same report yesterday. He has the discoloration and blackness on his leg and now it is disappearing and becoming the color of his skin. Does this mean that we can use this for people who suffer two tone skin on their faces and everything else? If no someone asks them to join the trial for the skin as we already have two results. There is another thing; listen to Togo's story. In Dr. Nash's report last week he said the hair was growing back on his arm. Yesterday the doctor reported the same thing as Dr. Nash. Now can we use CO₂ GANS water in conjunction with CH₃ or on its own as a lotion for baldness? Yes, Giovanni says yes. I am okay with the baldness I have on the back of my head; it is perfect and they say it is the sign of maturity. You know the old story that the one with the full head of black hair can't know; the one with the white hair and bald know but they can't. So the best is the grey silver like I have. We both can and we know.

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: Is it possible that we change the transfer of the use of the knowledge for the hundreds of thousands of men who spend hundreds of euros every year with 2 or 3 drops of their GANS water to start growing hair. Go back 6 or 7 years ago and one of our people said on a video that her husband's hair was growing back. We know this technology does that. Now we are receiving more confirmation. This gentleman on the bike, some of you know who he is, we have seen the growth of the hair in many cases in our trials. You missed that in the public. Go and listen and they tell you how CO2 disinfects the wound and helps the tissue grow. 2.34.50

K: You have to understand that skin cancer is created by a changed in the environment of the soul level of the body. And then bone tissue is growing; is that the attempt by man to get the scales back like a fish? Because man might need it? Now you put the CO2 and change the gravitational magnetic environment then the change is no change and the cancer disappears because you changed the environment of it. Start deciphering the technology and the understanding of it in the full meaning. Start getting trust in what it can do. We have seen here in Italy in trails that if you use the GANS of CO2 on skin fungi, from the pool or whatever source, applying the CO2 two to three times for someone who had tried every cream and every cortisone for 20 years that didn't work, and the two applications of CO2 that there is no fungus or skin infection.

K: We see that if you have a burn, a mosquito bite, the spray of CO2 GANS water relieves the pain and soon the bite is not even there. We have seen the application of the GANS water for malaria. You can use it in toilets as a disinfectant. We are using the CO2 in swimming pools where by now with the heat of summer after two or three days without chlorine in the water worms grow like nothing. We don't see any worms and we don't see any chlorine. Start applying the technology. You travel to countries that are not hygienic; carry your own CO2 liquid GANS and disinfect everything. You have seen this is correct because scientists from Ghana Atomic Energy have shown you it is correct. You carry your own disinfectant. There goes the work of the companies who make all the detergents in the big bin. That is why the Jewish lobby doesn't like us. If you have a child with diarrhea or a person with cancer, I explained this yesterday to the doctors and it is public knowledge that we teach you and have to explain.

K: go back on the Keshe Innovation Center where one of our scientists made a 10 to 15-minute presentation with a full chart of the mini amps to show how the CO2 does perfectly. The CO2 in the water in the tube made the water from acidic to alkaline. Now understand another part of international scientific research, and the scientist who did it has put in prison many times because it did not fit the **Unilever** (?) and the pharmaceuticals. Now they can put all of us in prison and leave a few outside. There are 7 billion of us and a couple hundred of them. When you add CO2 GANS the

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

water changed from 6.8 to 7 and 7.2 and the rest. Now go back to the present research in the scientific world. An admired scientist was discredited by people much like Red Circle because they were paid to do so and there were false accusations in courts. Alkaline water reduces cancer; so you go every way to drink water and eat food that is alkaline because now we understand. Acid has a heavy magnetic gravitational field and absorbs heavy energies which needs cancer because cancer needs the heavy energy. So they feed each other. Now you take the GANS of the water that has been proven scientifically by the Keshe scientists in the Philippines that it changes from acidity to alkaline. You drink this alkaline water and you change the strength of the stomach, the lymph transfer of energy from the intestine. The energy of the level the cancer was used to through the acidity of the strength is not there, so it cannot feed it and it gives its energy out to the weaker plasma of the lymph and there is no cancer.

K: The scientist who proved the connection between alkaline and acidity and the cancer, he is 100% correct. But he has been victimized and imprisoned by the pharmaceuticals and WHO which is supported by the Jewish lobby to stop it because they cannot sell you chemo therapy for thousands of euros and so the doctors can have nice mistresses in different parts of the world when they order your chemotherapy and you don't need it. Now you take the GANS water and drop a few in the water and you make the water alkaline and start drinking 2 to 3 spoons a day and you change the structure of the acidity of the stomach. The strength is not there and it cannot support anything. And you change the environment to weaker. The strength of the lymph is gone with the machine like Dr. Rodriguez uses to deplete energy from the plasma of the cancer. It is so easy. Would you like to be a doctor? We call you a new plasma doctor? Do we start giving PhDs to the single man in space who calls himself nobody because he is the last man standing? Do we need to carry titles or do we need to understand the totality of the knowledge? Now you see how beautiful the technology is becoming. We have opened the hand of the Red Circle, the paymasters and the kings.

K: If you have cancer, try this. You change the alkaline and that will help you. Then we have doctors and scientists online to help you with the rest. Make yourself a patch of CO₂ and put it on the position of the cancer. You have lung cancer? Do the same. If you have a brain tumor make a patch with CO₂ and zinc oxide and a little bit of calcium because you need to create new cells that replace the cancer and you are done. You should be able to work with it. Now you see how gorgeous this technology is. We have managed to shrug off the terrorists and now we can show the beauty of it. Giovanni says we have the water downstairs made by the same man that shows he is on the fringe today.

K: Realize that you have food poisoning from the restaurant; use a couple of drops. It is not the solution to everything. The only thing you are doing is changing the environment so it can go on

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

through. We have seen this with the doctors and with the soap (Ghana). Inside your body the amino acid is already there. All you do is add the CO₂ and the way it is added to the soap and it energizes in different ways and it becomes alkaline and takes care of Salmonella and everything else. For skin issues drink the CO₂ in a moderate way that is internal; it changes everything because its energy gets absorbed. You have a condition with anorexia; you don't have to do anything with anorexia. It is a psychological problem that allows energy to be absorbed and the psychology needs confirmation. All you need to do is use CH₃ plus Zinc Oxide with a little bit of CO₂ GANS water without the anorexic knowing. They will start eating like a pig. The only problem you have is now they go from size 6 to size 12 and they need new clothing. I don't mind having a fat child and a healthy child.

K: Start understanding the beauty of the technology. We took our time and took all the pressure, accusations and everything they could throw at us. All was headed by the same man, the same terrorist, the same abuser, the same murderer of two girls we know of now. Because they were afraid they would be found out. We find the two and now it is open and now we show you every beauty of the technology. Today I showed you how the cancer can be changed. I showed you can stand and travel on the same board; I made you a man of space, the health masters and I made you equal. According to your intelligence you take what you understand more. The history of the man, the health of the man and the opening of space to the man is on one writing. You don't need more if you understand it. You have to oppose it if have something to hide or if you have done something which your paymasters would not do.

K: I have one question to ask and it is simple. How much do we need to be in any of these positions in space travel or in the space of our own physicality to overcome what travels within us as germs and infections? When we become the germ to travel what is the germ inside us that we need to control? Because you understand the totality of the knowledge you can handle them both at once. This is the knowledge of the universe that was not given to man and abused by those who knew it partially twice. In the coming weeks I will open the history of mankind that you can see and how man has done, how man developed and became generations and traveled across this planet. And how different races were created; if you have a doubt, we will make it a live presentation and you will see your ancestors and how they became tribes and how you became cities and part of the structure.

K: If we show you and give you the bowl to drink in one go you will suffocate and kill yourself. Because you will be ashamed of what man has done to man. Understand how you can use and how you can develop. If you understand even the shape of the egg and repeat what we saw with Jacky you understand that you need no cookers and you can cook anything. Do we need to create a new system of the conversion of the plasma that inside the plasma, cook food because the heat field of the magnetic field will cook what you want, or do we still use fire? Understand the simplicity that Jacky

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

showed us. Take an egg and heat the egg. This absorbs the energy; you absorb energy by the fire into the egg to fry it or boil it. If the GANS strength is enough to change the color or the hardness of the yolk into different strengths, now you have found yourself a new way to cook. Microwave is now Magrav waves and we have entered the condition that we do not need to burn anything and use energy. If you understand this process, it's very easy. We saw the cup with the egg and the energy transfer. Now we make a system that the energy transfer of the universe when it comes through the liquid, starts cooking without boiling. You receive and cook to the strength you want—hard-boiled or soft boiled eggs. Now you see the beauty of the technology and our patience in teaching and the burden we were under was worth it. No wood has to be burned; now you can create different layers of GANS that absorb the energy and if you put this in it you get boiling at 110 degrees; if you put this in it, you are cooking at 30 degrees. 2.51.49

K: This is what gradually all of you will add; your names will become the names of the future because we don't talk about the engines and the others and we don't talk about Mr. Watt, or horsepower. We talk about Benjamin's soap; we talk about every one of you as the new scientists of the new generation of the Magrav systems. You teach us and we show it; we are open and we display it; you have all the Keshe Foundations around the world to share knowledge in your own language.

Gladstone (G):

K: Is this the gentleman in Australia with the antennas on his roof? Has the house flown yet?

G: Good evening Mr. Keshe. I haven't flown yet.

K: So plasma technology is safe.

G: Yes. Let me show you the Facebook site? I want to show the coil hanging from the roof. (2.54.57 minutes). The coils are linked together in a series. The mechanical side is linked to the roof and gravitational site externally. Within the coils you see a red ball. It has GANS in it and I have crystals and other items within the middle of the actual coils. What I have noticed over the last couple of weeks are calming effects in the house. My wife and I have noticed a slight frequency. I am not sure where it is coming from. I have a plastic ball at the bottom of the coils that might be CO2 GANS. That is the system and two weeks in everything seems quite calm. I was wondering if you can advise me as to the set up of the system and if it is correct.

K: None of you can be wrong. You have to work on the parameters of the effect of what you have built. If you transfer these sideways and make them in a different column and make GANS between it, then you can the transportation of the emotion from the house to what you want. The outer ring

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

can have zinc oxide coils and then you will find the peace they had in 'hippie land'. So we learn from you and you are telling us what you are observing with your family and environment. Is it a placebo effect? The reality is that it is so. We make happy chains and hang them like we do other things in our houses. Things that bring happiness in the house. We don't become superstitious about it but we understand the science behind it. You made a happy chain, so why not? Do we need rock and roll or just a happy bit hanging on the ceiling? Is that the future of happiness that you have shown us? We can call it the Gladstone happy ring. Bring the knowledge; it is beautiful. We thank you for it. We don't need measurements; happiness is measured by the government of what is known as a happy nation. Let us know more of what it does and what the happiness means to you. What is the jar on the table in the photo?

G: The jar has CO2 GANS in it and there is a plastic ball that is at the bottom of the coils that has CO2 GANS in it. You can see the cable also. I am trying to involve a number of GANS to see how it comes.

K: Maybe add zinc oxide to it. That touches the emotion and you are creating the field strength that creates it or needs it for that connection. Maybe you will be happier to be around the house. We have seen this with what you were talking about with the antenna. We were talking about it in the medical section the other day. A lot of people suffer from the masks and waves from the waves from the mobile phones (cell phone towers?). We have tested a lot of things in time and have found a couple of solutions but not all of it. Now, by use of these antennas you can change the reception by the body of the people and have no problems living in the house. I have done a lot of work in this field. If you see the change and you know people who are affected by the microwaves or antennas, make a chain and give it to them to test it and see if they can live in their rooms without pain. These people live a very painful life.

G: One more question: I have an analog aerial on the roof of aluminum. Could I use that as an antenna?

K: Why not! It's a good suggestion; nano-coat it I don't know what you are going to receive. It becomes a good observer. It may be part of your energy supply as well.

G: I will coat the aerial and it becomes the receiver.

K: Make sure everything to the line is also nano-coated. I see these and what you have suggested I've gone over in my head. In Italy when you drive there are about 200 of them sitting on top of each apartment block. Everyone has to have their own 2 or 3 of them. It is like everyone is trying to listen to God somehow and God comes from only one direction. If you nano-coat them, I think the whole building can be supplied with energy from the environment without any power supply. Because in time, you receive all kinds of energy. We have done an aerial conversion years ago. You know the cars with the antennas which get pulled up, and not the new embedded glass version. It works beautifully in the car. Thank you; let us know when you become a happy house. Do you

observe the environment in respect to the birds and anything that has changed in the flora and the fauna? If you haven't taken note of them.

G: It's coming to winter in New Zealand where I am living so I haven't noticed it; I will make notes of that.

K: It would be nice to see if compared to last year you see more birds or less birds. It is strange when you bring this in. Here where we live 3 or 4 weeks ago we were collecting mosquitoes, bees and butterflies that flying around the garden and they ended up in the pool. We were using nets to collect thousands of these every day. About 3 weeks ago I emptied 4 or 6 liters of specific GANS water into the pool; now we don't see a single fly in the pool. There have been the worst storms around us in the past two weeks. We came back and there was like snow in the street and there is not a bit of dust or a leaf on my pool to collect. Where are they all going? There is a plastic bag that flew in from the storm. These things affect the environment. Caroline was testing something. We mixed CO2 GANS water with a little bit of mosquito spray and are spraying in the house on the floor and the walls. We saw only one mosquito last night and before we were covered with mosquito spray.

G: There is one funny thing that has happened to our windows that face north. They become dirty like they are attracting some kind of particulates. I don't know if that has anything to do with the system. The whole front of the house, the window glass, is speckled as though it is attracting.

K: Just get some CO2 GANS and some water and wash the windows with it and see if it comes back. It's a good changer of the environment. People are testing CO2 in so many things it isn't even imaginable. They see results because it is something they wanted to do. Don't use GANS that affect our body and our environment because we are amino acid base.

K: What is this bag?

R: This is a picture from Stanley about interesting CO2 pads. I received two cases for people who are using the CO2 pads and they see black dots on the surface of the pads and they would like to know what causes this discoloration.

K: Is it on the inside or outside?

R: It is on the inside on the tissue.

K: Add a drop of copper oxide into this. We have seen these and these are bacteria or viruses that are depleted from the energy. All you need to do is add a liter of GANS of CO2 or CH3 and add one drop of copper oxide. Then that doesn't allow life existence to live inside it.

R: Is it possible that the pads are pulling toxins out of their bodies?

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: Yes, that is quite possible. We have to learn to analyze so we know what it is. Is it bacteria or the energy? They are homogenous in size and they will have a pattern to them.

R: It was common in the older days to use poultices with Epsom salts to draw out poisons as with an infected place where you had a thorn.

K: It was used commonly in Europe.

R: They used the poultices in the wars and that drew out the toxins; that was before antibiotics. The poultices were much simpler. I had an infection in my knee from a tiny piece of metal. I went to the hospital and if it got worse it was a blood-poisoning situation. They wanted to put me in the hospital bed with antibiotics for a week before they would even treat it or try to remove what is in there. I was sweating at that thought. I asked how to do something alternative. And they made me sign a release so they wouldn't be responsible for my losing my leg or my life. I went to my wife's naturopath and he suggested the Epsom salt poultice and told me how to do it in 30 seconds. Within 2 days all the infection was gone and whatever caused it was gone. Before that I could barely walk. The CO2 pads might work in a similar manner by pulling out the fields and withdrawing infection or pain.

K: We are coming to summer; there are many people using the CO2 GANS against sunburn and they are reporting huge changes. We see it on the children when you rub the CO2 on their faces for sunburn or people with bad sunburns. They peel and there are no scars or damage when they use the CO2. The application of the new plasma is very different. You have the three layers of skin and this becomes a 4th layer. The skin is in the middle and the body works its own system. You get the new layer of the skin with the CO2 and the burned layer peels away without any bleeding. We have seen this with cancer of the breast. We need to understand more of this and transfer the knowledge.

R: François says he has some patches with these spots on them.

Sylvester (S): The picture is coming from Mr. Sobel in Hungary and he made these pictures. He used the same patches on himself and his wife and it comes from the same CO2 source as the CO2 in the pad in the picture. His wife's CO2 patches don't have dots and his show them. He was diagnosed with mold allergy 1.5 years ago. He showed a video and his patch only had dots on one side. I will transfer the copper oxide information to him.

K: If the patches persist in this with the dots we have to ask if we are taking cancer from the body and putting it in the patches.

S: I think the second thing you said was the feeling of these people. The gentleman showing now had a great number of moles on his body. He is an oversize person and he used the patches on his left

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

cavity pain and it was relieved immediately. He cured himself of shoulder pain. But he found these dots.

I could request that they send these to you for testing.

K: We will let you know; we prefer not to go public with our testing location because of the internet and the swamp around it. It's a lot of work to be financed by governments and the institute?

Jane McD (J) mentions that moles can be seen under UV light. It would be good to see if the black spots on the pad reflect the map of the moles on the person under a UV lamp to see if it is a similar pattern.

Armand (A): If you seal it properly this will never happen to it. Vacuum seal it and I left them open and the air going in caused the black spot.

K: What happened with the black spots?

A: It is a fungus.

K: It would be good to find out.

A: I see this when the patches are not sealed properly. If they are vacuum packed, they will never go black.

K: We have Renan on the line and they have 6000 of these and they have been distributing them. Have you seen this in the Philippines?

A: See this is vacuum packed. This is a new type of patches. (3.20.15 minutes). The patch shown has two circular coils in it of some type and is round. The coils follow the shape of the round patch.

K: Go back to what your new patch is.

A: The round black patch was made for lung cancer. And this patch with the double coil is a zinc patch.

K: Armand is a master at the Keshe foundation. If you show it, you teach it.

A: I have CO₂ and zinc oxide water in both of them.

K: Tell us what you have done.

A: I create a flow which exits out of one patch. The pads are not coated and the plastic is nano-coated. The black ring is the pole magnet and the magnet with white rings is the ring magnet.

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: So one is flat and one is ring and one is converting the energy of the conductivity and you have the zinc to touch the emotion.

A: I have one more this is a nebulizer (3.22.48 minutes). I nano-coated the clear plastic part. It gives a mist. And I plan to put CO2 in it that they can breathe.

K: You are using the plasma vapor?

A: Yes.

K: I hear it works very well on the lungs. Am I correct?

A: Yes, it works very well on the lungs. I have used this 4 days and now I don't cough in the mornings at all.

K: Armand used to cough heavily when he was here. Can you show us your breathing system, your shisha? He sent the picture this morning. It looks like a hubble bubble and it's good for his lung. What is in there? (3.24.14 minutes).

A: The water has CO2 and zinc liquid plasma.

K: How does your breathing feel?

A: It feels very normal.

K: You have to use something like this with liquid plasma for 7 to 14 days. Because it is plasmatic it imprints the energy field on the RNA and the DNA and becomes permanent. Viruses will no longer attach. How does it feel not to cough in the morning?

A: Very nice.

K: Are you still smoking 20 packs a day?

A: No, two packs.

K: Has it changed the taste in your mouth to inhale?

A: It didn't change anything in my mouth but I eat a lot.

K: Are we going to see super-size Armand? Do you feel any pain or expansion in your lungs?

A: I feel normal. I don't wake up and cough for 10 or 15 minutes.

K: Maybe this is the condition of 'pre-flight'. What else has changes such as in sitting and standard?

A: I didn't check it.

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: You change your breathing and your capacity changes. When you don't breathe well you tend to bend forward or your shoulders go down. We have seen this in many trials. When you have better breathing your composure changes because your lungs fill up more. Let us know if you still carry on the smoking.

A: Do I need to add CH₃ to the nebulizer?

K: No, CH₃ increases the growth. You don't want that. You have to use CO₂ and Zinc Oxide. Don't use copper oxide for the lungs. If your breathing is a problem when you use these systems for the lung for breathing, what you do is not the CO₂ that creates the condition. The science behind it is very simple. When you have the lungs moving and functioning with cancer or your breathing they have to convert the energy in a system that becomes like hydrogen.

K: When you use these systems and why it brings change has simple science behind it. When you breathe in your lungs, you bring air with the nitrogen and with the other gases into your lungs. The tunnels of the lungs narrow as much as possible. In the stomach you have acids to convert the food from matter state to nano-state to GANS state and it goes in your intestine and becomes plasmatic and then transfers the energy through the walls of the intestine into your lymph. (3.29 minutes) The reason we have liquid in our lungs is the same process. The liquid is another caustic converting the gases into nano into GANS and at the last bit they transfer the energy to the broad (?) cells. The lung is a digestive system converting the same as the stomach which is for solids and liquids and the lung is for the air. Because man was created out of the air of this environment first.

K: You are amino acid which is the combination of oxygen, carbon, nitrogen and hydrogen which is in the environment of this planet. Plus, if you look at some of the amino acids there are other gases there as well. Man has never looked into this. Maybe it's time to do this. When you breathe air in, you bring it to the digestive system of the salt of the lung and convert it to a GANS to a plasmatic condition to the field and then it absorbs and transfers energy out. As we have said many times, nitrogen is a centralizer that releases energy at the rate of conversion. So you have oxygen which gives us energy for conversion. What comes out of it is the balance of carbon or CO₂. Then it attaches itself to its own creator and we say we inhale CO₂. the process is instant in the lungs of the man so when you breathe and you have a problem with the physical structure of the lung like tumors or COPD, when you breathe air to the already produced GANS system, in a way what you do is very simple. Here is the collecting energy in the lung (3.32.07 minutes); the energy conversion is already in a GANS vapor and when it comes into the lungs it is immediately absorbed by the lungs. In being absorbed it gives a relaxing time for the lung to recover. Now the lung wings do not need to expand and shrink. So you have already taken the energy into your lungs. These breathing systems which you make with the GANS are in fact like the mechanical heart and lungs they make to help people. These are those systems and I have used them effectively for many years.

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: So what you do is stop breathing and converting in your lungs; you bring the air with the CO₂ load the same as you do when added the CO₂ to the soap. Now you add the oxygen, carbon or nitrogen which comes from the air and you add it into it so it is loaded. So when it comes into the lungs it doesn't need to do the conversion because it already received the extra energy and you change the environment of the cells in the lungs. Then the body has time to heal and to recover and transfer the energy. When you put the two health pads in the standing unit inside-out on either side, this you can do what you do with the air where in the mechanical system you connected the nano-coated material from one patch to another. Here the doctor will tell you he has the two pads and he used the air and he has two plates and the plastic on the plates allowed the energy to be conserved. (3:33.54 minutes) Most likely you can walk away if it is not too late from the lung cancer. You cannot use these patches and you need Armen to make you the patches for the body because the cancer conversion could be in other lymphs which are in balance the same as the lymph of the lungs.

K: You have to use the full-body system for every cancer not just because you see it in the lung. If you don't process it properly in 6 months' time it will be in the liver, or it's already in the liver and it shows itself in the liver in 6 months' time. But the process when you breathe the CO₂ GANS water from it as the air goes through it exactly as the soap that Paul from Togo showed us last week. They made a combination of GANS with CO₂ and they killed the germs. Because the energy was low, the germ had to give energy to it. In the breathing into the lungs you have the air and its additional energy so the body doesn't need to absorb or convert the GANS so much. Then you find out the body has time to relax because it has received its energy and then it has time to heal; it has time to repair. The energy was used for pressurizing the lungs to absorb the energy of it for the blood and now the lungs use that energy because they are receiving it from the new energized gas for healing itself.

K: I was explaining this to a doctor recently. These breathing systems are like mechanical hearts. If you have certain heart problems and you can afford it, they disconnect your heart and connect it to a mechanical system for 6 months or a year. Your heart still works in conjunction with the mechanical heart but because there is not as much pressure on it, it allows it to recover from its damages and then they take the system away and your heart starts working perfectly as before. These breathing systems are the same as those but it is a natural process. I will give you a tip. A lot of people who have heart problems even certain kinds of blockages; please do not try this without the supervision of a doctor who is part of the Keshe Foundation knowledge, understands it and can support it. This is for doctors who work with us and listen to the program. This is directed to our Chinese doctors in the Chinese team because I know you work this way. If you make a ratio of 6CO₂, 3CH₃, 1 CUO₂—the ratio is important—if you use this ratio and put the patch on you will get physical repairs. But most of the heart problems have psychological problems because the heart is the feeder of the psychological part of the body of the man.

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

K: You can do a very other simple: 5CO_2 , 3CH_3 , 1CuO_2 and add 1Zinc Oxide . This is for the doctors; please if you are not doctors because if you use it you feel the change in the palpitations differently and you have to have a doctor to control that. What we teach everyone on this platform so that does not have to do with you, please do not try. If you are a doctor and you are looking at vein blockage, the support of the heart valves to replace or you want to do it, it is very much these kinds of combinations. CO_2 is the cross information in the blood, CuO is for the muscles (and change the ratios for what you need), CH_3 is to energize the blood so that the body does not look for energy and put pressure on the lungs to bring energy for itself and it supports itself in that point and then because the blood of the man is the supporter of his emotion you have to add zinc to support the energy of the emotion. You will find out heart recovery in 14 to 21 days and up to 4 weeks. You have to get the condition right and you have to understand the conditions of your patients correctly to be able to do this.

K: There is no need for open heart surgery, blood clots, blockages of the main arteries. If you develop a patch in the teaching with the doctors and remind me, I can teach you how to do it. You can actually release and open the arteries very, very softly with this process. There is no need for the open heart surgery and the transfer of the blood vessels. This is a special technique that I show you and it is dangerous if you don't know what you are doing—do not touch it. We expand on the knowledge so doctors can understand how to help themselves. If you do this and if you are not knowledgeable and you are not a doctor, when you put the patches on your heart you will feel pressure. It means it is interacting with you. Don't go any further with this because these are powerful systems. You can put a patch in the front and a patch in the back and within 6 to 8 weeks there is no need for any kind of heart surgery at all. In certain cases when it is diagnosed properly and when it is handled properly then you can see your patient walk away. If you change the combination in a certain way, it is good for where the heart valve is collapsed or damaged. You rebuild the heart valve without operating or anything else.

K: This needs a special combination and we don't teach this in the public but it's good for the doctors in the background to remind me at the doctor's teaching. If you are not a doctor doesn't touch this information as you can put yourself and others at risk and this is very, very delicate. I use it and I am fully aware of the knowledge of how to use it and you can do wonders with this and you can use this in conjunction with the breathing system to support the lungs. You can give the lungs a rest. You give it a long rest and it allows the development of what it needs or repairs what it needs. At the end of the day what is created in the lung is to feed the energy into the physicality of the body and that is what the lung does. It is here to operate with the heart. In certain approaches with the mixture of the breathing you support the energy to the heart and you give the heart a rest. It is exactly like a lung

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

and then you allow the repair. This has to be done by physicians; if you are not a physician please don't do this. I have seen a lot people making things like this and this is not child's play.

K: We see the first science and the first approaches of how we can walk away from tens of thousands of euros for open heart surgery and you can do this for less than 20 cents. But it has to be done by the physician. If you are not, you are responsible for the soul that you hurt.

R: Renan can give you a report on his patches.

K: We need to talk when we finish the class; I need you to do a couple of tests from the doctors' teaching yesterday.

R: What we have been producing here, I only find the black spots on patches that are being kept for a long time. These black spots were only seen on one patch out of 100. It is correct and I think it is a leakage. Most of the patches are moist and some of the packages were open so there is possibly contamination from the patches. I have kept some patches that I reuse every time and I keep them in my bag and they are with me always. Sometimes when I reuse it, there are some black spots. It could be a growth and I don't know what the growth is. I can check it in the microscope. It's part of the test tube so maybe there is a growth there. It is better to seal it. Use harder and more durable containers and you have no development of spots inside. I think with the tissue or the napkin with the CO₂ is a good environment to grow certain elements because it is energy. So, you need to seal these properly. And handle them carefully in making these patches. When it dries we observe that even though it is sealed it dries when it is exposed directly to the sun. The plastic patches bloat with gas sometimes and is effective in the way that the liquid plasma has transformed to vapor. It also has a soothing effect on pain as well. This has been discovered with the sealed plastic patches where the liquid GANS evaporated. We also try reusing the packages. If they have leakages, we just repack and wet them with CO₂ liquid plasma and they can be reused for yourself if you want to recycle. You can do this when you don't have many patches available.

K: You distributed thousands of these in the Philippines.

R: We distribute when we have the outreach activities in the slum areas. We give them there and they know how to make them. Right now in different areas people are reproducing these patches to give to their neighbors. We are working in community surveys for those who are living in the slums with no permanent homes. We teach them to do pens and patches and now they can liberate themselves from the problems with the medicines from the government doctors.

K: Are you going to get testimonial data on how this works with these people?

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

R: Yes. In our language we have testimonials and we are getting them from the youths and their parents. Most of them are videos telling what has happened and it's in our dialect. We can do an English interpretation with these videos so that more can understand. We can gather them as it has already been working for them for two months. In that place we invested a few months ago. We have testimonies from people and we are asking others in the area who collaborate in this medical mission.

K: let me ask a question: one thing that will be interesting that we discussed, so would you ask your team to do another beautiful job like you did last time when you showed the GANS in creating what you call alkaline water. Could you ask your team, the same group, if they can now test the liquid GANS, when we put the CO₂ GANS water into the water? Does it make it alkaline? We need the scientific proof and you have done a very good test with the meter. Could you test it and do this for next week?

R: Yes, we are setting that up now and verifying it as you were mentioning last week during the doctors' meeting. We are already doing the CO₂ GANS drops and we are getting some data as we calibrate the Ph meters. We have Ph meters here so we can check for different levels. We will see what the variations of the liquid GANS are and we can show it.

K: Could we see this next week?

R: Yes.

K: Could we discuss it with the doctors? We will show it next week in the public teaching. You it will be interesting to know if you have cases with the liquid GANS water on the patch, in breathing and after breathing and collect the saliva and test that to see if that has become alkaline.

R: So by using the breathing straws we will investigate the Ph level, the alkaline level of the person.

K: please because then it will add to the knowledge. Do you want to share anything new?

R: Not yet.

K: As we said today we became the man of space. Now we learn the first spaces for the transportation of the man to fit any part of the universe. And, for man to be able to travel. At this moment it is very far-fetched...the same as when we spoke of the GANS and the nano materials two or three years ago. Now that we have the men of knowledge, science and government behind us maybe it is time to start developing the true space technology because these machines of the transportation can be used in conjunction with the star formation for deep space travel where you don't need to send a craft. You deliver a craft to a point in the excursion. You don't need to cross the atmospheric barriers or what you call the coulomb barriers of the planet. This way of delivery has huge applications and implication in space where you can deliver yourself within the center of

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

the planetary system or the stars or galaxy without ever passing the matter state of it or interaction with the fields of it.

K: Because when you travel you travel at the rate of the conversion until you arrive at the destination point. It is very much when you are traveling where a truck carries the envelope, a plane carries you or you are sent by jumbo jet. What you have sent is irrelevant. When you cross the seas, the storm, the road or a mountain or you go through a tunnel it does not matter because it does not change what is in the envelope or the structure of the envelope. Now you have entered that condition. On the other hand, we have seen how the new technology can be used for conversion of the health because it these are very important and change the emotional and physical imbalance for the whole rest of the body. Do we walk in and walk out a few times without any cancer, without Alzheimer's, without arms and legs missing because they were blown up by bombs built hundreds of years ago by man through his misconduct? Would the land mines that cause the loss of an arm or a leg because somebody made money off the sale of the land mines, and 15 or 100 years ago it was left in the ground and we didn't see it and we walk into these cabins and build what has been missing because in our name there should be peace called here on a toe which as blown up?

K: We are entering the real world of the creation of the plasma and its application. It is for us to decide how we take humanity this time. Do we take man at the point he was with the animal ness, the murder and the killing? Or do we go the path of the universe as a peaceful culture with peaceful ways so we can enjoy and join the universe than a few patches of land on this planet? This is our task and this is where we stand. These teachings will bring man to a point of decision-making for himself with the full consciousness of what is to lose and what is to gain. Is it worth it to carry on with the same behavior as before or the beauty of the universe is so beautiful that we sacrifice a few pieces of land to see the beauty of the lands of the universe? This is what this teaching of today was about for those who did not understand. This is not a dream as now we see patches, breathing and everything else.

K: Now we start seeing the beauty of the technology. Now we start seeing the effect of the technology and now we see what it brings us. It brings us peace, comfort, health and food. Are we going to fight for nothing or are we going to accept to do nothing for a piece of land? Because now we have seen it and you deliver it every week, little by little the knowledge of the man is getting stacked up more than the past thousand years in a few weeks and a few months. I ask you to ask yourself one question. Whenever you give this to somebody is the world peace worth it for all the wars to convert and change with a piece of copper? That is all it is that you are doing—you are playing with a piece of copper. The new technology is simple in its application and its implication. Thank you very much for today; we will meet you on Tuesday afternoon for 1.5 hours as part of the

Transcript from 117th Knowledge Seekers Workshop held June 9, 2016

(v2 2016-06-15) DRAFT (Transcription has not been verified. Double check info with video)

normal teaching. On Tuesday after 3 o'clock we join Professor Zhu and the military and space and these will become part of the peace military and not the war which is the act and behavior of the nation of China. We thank you for being with us today and I hope we learn more in the coming time.

R: This is the end of the 117th knowledge seekers workshop on June 7, 2016.
