Keshe (K): Good morning. Today we have a number of disclosures. And as you are aware, all the work we do as we said on Tuesday, all our teachings, are to create a condition for man to take into space. As we said, part of the interaction of the human race with the universal community is for the man to start building up his own universal community and the understanding of what that means. It is not just one; we are part of the universal community today as we are. We are not aware of the family that is waiting to greet us. There are rules and regulations and there was a presentation ago that Rick read you the basic principles of being a member of the universal council. Interestingly enough we had a chat last week with the people who nominated themselves to be members of the council. You have to be aware that we work on two platforms: one is the platform of correct conduct and the other is the platform of knowing there are people at this moment who see the way they have abused the human race is going to change and they don't want to change. So, they try to infiltrate the Keshe Foundation and council do all sorts of things. We pray for their souls. That is all we can do.

K: In the meeting last Wednesday, I asked the people in charge of the universal council to make extracts and it's about 20 minutes. We have to know where we are going. It's not just teaching, but knowing where we are going and putting it together with credibility and understanding. I will be silent for 20 minutes; if you think and if you are to become a member of the council, or a supporting member you need to know how and why we sit behind it and how we promote it and support it. It's for the human race to enter into the universal community and this is part of the plan in bringing mankind together that we speak as one race, one nation and one group in the universal community. This is me talking to the universal council. The strange thing you will understand in listening is that I cannot become a member of the council. I don't take a position in the universal council because I belong to another council. Let's listen to the conditions of our becoming members of the universal community.

K on tape: The reason the language is chosen is not the language but to understand the true culture of the community because we might speak several languages but we don't understand the true culture even if we lived there a long time. The culture is embedded and ingrained in the ethos of the way the mentality of the nation has been set. The reason we chose the languages is not the words but understanding the emotion of the culture-- How it reflects and operates its

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

thoughts. If you speak two languages and they are not your birth language, and you speak fluently because you lived there for a time, as a guardian that is okay, but as representative of the language and understanding the culture it is a bit too far. The language is for understanding the brain of the thoughts, the way the community thinks, operates and this is the target. It is the culture ingrained in the mentality of the area or the upbringing of life in that area. When you nominate yourself as a member for the language, don't consider that you speak the language and you can understand it; it's the understanding of the mentality and the way the nation thinks from the foundation.

K: I was born in Iran and lived there for 15 years; then I lived in England for 30 years, Belgium for 10 years, and Italy for 2 years. In a way I don't belong to any of the cultures; I lost the essence of Iran by not living in that area. I lived in England for 30 years and even though I speak English and understand English I don't have the background of the culture ingrained in me. It's the same with the Belgium and Italian. So, when we speak of the language we have to understand the totality of it and when we make the decision to support the language it's not prejudice but to be there and equal to the others in their languages.

K: This is going to be hard for a lot of members of the council. If they understand this, they will do something else. Those who stand as guardian; it will be until we have those that understand the language and the culture they are there for. The way you elect yourself is not to be a member of the council if you see somebody else who understands more without prejudice. We will see the coming time when being a member of the council from humanity's point of view is a prestigious position to be in and people get carried away with the position. We have tried to uproot this from the beginning. It is not a privilege to be a member of the council, but a service. You are there to serve. In time, you will see those who can serve humanity based on need. Then you step down and support somebody in the group who is part of your culture in the same language as yours (that) can do better to serve humanity or that community.

K: The problem will come when the pride of the man takes over the position of the man. We have seen this in a number of people who decided to become a member of the council and before their acceptance they misused the position. A number of people have been rejected from the council for this reason. *I am a member of the council and I want to do this and that.* It is better that one says *as a member of the council, "I would like to serve humanity this way"*. You are not there to use the position for influence. This will be very hard. In a way... if I can put this way... that the members of the council should shine so that other people who are a torch themselves seeing who they can light up. In a way you serve and by serving you manifest the true essence of the man unconditionally. We do not look for a position or a seat to be a member. We look for

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

one in a group of people that speaks the language to shine. We are not looking for one man or member of the council. In time he will become a member of the community of the members of the council and each member understands the heart of the culture without prejudice. This will build to the position that when you meet as the council you color the essence of the whole planet. This is the purpose of shaking up the council.

K: The difference is seen with the UN when you become a ‘member’ and you decide with that group how you can influence. With the universal council, you become one in how you can serve the community and the council. Let me explain something that might shine some light on this. As I explained, I left Iran when I was about 16 years old. About 8 years ago, I went back to Iran by the invitation of the government. I stayed there for 4.5 months and within the first few days after going back even speaking Farsi and being a member of the Iranian community I said to one of my colleagues in the university that I was a foreigner in my own country. Being away from the nation and culture, I could not understand the culture at all compared to how I was brought up as a young boy in another country. I was a foreigner in my own country and I was more foreign in Iran than I was in England. I understood more about the English culture than the Iranian culture. So when we speak about nominating a language, it is understanding the culture, the needs, the beauty and the way the culture can support humanity and not what became like the EU with everyone getting in to get the best for his country and it didn’t matter what he did. You see that failure in the EU. They join in to take as much as possible for one culture. They don’t look to support the countries to be equal instead of putting a little bit in and getting more out. This is why we cannot achieve; we see the mistakes of the past.

K: We are important to be part of bringing peace to others in the community of humanity. It takes a lot to change the culture of the man. We are hungry for positions, titles, or being called ‘somebody’. Being a member of the council has to be in the heart of the man and not a name on the door. It takes a lot to do this. I tell my children that the man in the room has a position as long as he stays in that room and his name is on the door of the room. When you are outside, on the beach, shopping, or in the supermarket, nobody knows who you are: a farmer, a bricklayer, a professor or a doctor. In space no one will call you ‘professor’. This is what we are trying to bring back to humanity. This is what has to change and will change. The council has to be the flag bearer where people look at the humble man. We don’t carry the title into space; nobody knows who you are. So, I suggest that it doesn’t exist. If you look at my business cards, they carry no title with my name. The title of the man should be carried in his heart. If you can change belonging to the council, you can walk the streets and no one will know you are a member of the council. But they will feel the essence of the soul they are serving.

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: You hear without ever listening and this is what we are looking for. You change the position even if you are not on this planet. And you are in deep space, then the community you come from, you can serve as a guardian. This is what we are looking for; we are not looking for an office with a telephone and secretary and you're deciding who you want to help. It doesn't matter even if you think it wrong, the soul support will come correctly. We have seen this over and over and this is the future of mankind, and people will slowly start to understand. Titles will not come. In the coming time, you will see the seat of the UN totally gone; even the building of the UN shall not be there. They shared nothing but the title to carry on murders en masse. They carried murders in the name of nationhood for those who make money out of it with the murders. Anyone opposing it becomes a terrorist organization. UN at the present is nothing but a place for the slaughter of the man; the killing with permission. We have seen this in all sorts of places. That is, when the council meets, there is no say in what we are going to do; we support with your soul and you will understand what your wish is. The words don't have to be spoken; you will understand through the soul and the emotion of the man.

K: Let me explain something very clearly: We are teaching how to produce food that in the coming time, man does not need to consume and absorbs the energy he needs. If you absorb energy by emotion, then there is no need for your mouth and no need for your digestion system. How are you going to communicate? Now you understand where the council is going; you communicate with emotion. There is no deception as this is felt by everyone. At the moment, you are part of the first generation of the universal council and the human race is going through an evolution. So you understand that you will be like a transparent sheet and the more you see it, the more you shine. We are not offering position, title, or for others to elevate you above the others. There are 10 Chinese who would like to be members of the council. But we have one Chinese speaking and you have to look at the man or woman who understands more of the culture of China and by understanding more, he can bring more energy. The more giving to the Chinese community—don't look at what I can do and look at the others and how better they can serve the community and the language. Then choose which one; it's a new system. And even then if you see the only man standing then you ask yourself why they think you are this position and how far can I serve better, even the 9 standing next to me. We can all better serve the Chinese community.

K: This is how you will be received. We have a number of English speaking, French speaking, Iranian speaking and more. When you choose a member for the council, look at how better they can serve than you and not that you are better and you can do more. We saw this with the

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Spanish couple. We watched, we monitored. It was enough to remove one from the place because it is simple: just watch for is destroying the position and ask them to release the position. Just for those who proclaim or declare themselves as members of the council have abused the position. They are removed. Nobody can be removed but we announce the position to be open with a new soul; we are changing the course of humanity by the emotion and the soul of humanity. It's not by words, money, position, cars, houses, wages or salaries. I have seen this and I tried to avoid it and to bring it to be understood fully. The time will come for you to observe and to shine. I am teaching in the teachings that we have seen some shine. You will see it yourself and this has dimensions for the position.

K: When a man serves humanity and then the universal council for the human race, when he stands in front of the sun, you shall see no shadows. I hope you understand. We see no shadows in the sun; we see shadows only when there is a physicality connected to the material position. If you look for a true council, in the future when you stand in front of the light you shall see no shadows and you shall see entity. The soul of the council member will shine the same as the light of the sun. To me that mean you have radiated so much more than what is inside, that the inside cannot be seen.

(Conclusion of taped presentation).

K: Thank you very much; now you understand how we select the members of the council. In a way humanity selects himself for it. We have seen how some people are working around to become members of the council to do what they like and to damage certain things. The soul will bring it out in time and then there will be an announcement and it is part of the universal council. We will meet for the first time online in physicality in Rome. If you remember you don't need to be in Rome to be part of it. The presence of the soul will be part of it and we receive the beauty of the soul.

K: Moving on to the next step; if you remember on Tuesday, we extended the knowledge to the understanding of the entering into the plasma technology and fields of the plasma technology we are extending the knowledge into the way of opening the door into the universal community. In the next couple of hours, we will open your eyes into how the technology can be and is used in the wishes of the man to see. So many of you have shared. As you know, today I am not in Baleta but I am outside so you only see the white board we carry as a teaching board. If you remember, we have always seen in our processes when we had the pen, we directed the head of the pen to what was needed. With it (00:37.50 minutes) we have seen the effect of reducing pain

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

in the body of the man. We have brought coils, plasma and GANS and we mixed the two. We separated the coils and we have seen the doctors playing beautiful games with these. But all of these have continuously reflected the work and the fields of what has been produced. Now we know the fields exist.

K: Now, we start supporting the technology so you understand how correct the technology is. We have seen things and in the coming days and times we will ask scientists who have done tests to come on and explain. Those of you who have been testing materials for different aspects of testing, we will allow you to come on and present it. From now on, anyone who comes on to make a presentation, all your presentations have to pass security and you will see why. We had to play certain games to the points that we had to be finished. We finished and we opened our books last week to protect you and you will understand it. And then you understand why I speak about this now. In so many ways, when you use these fields, and you have seen the results, and you have seen the results in the Magrav systems where you put a number of coils up and you have seen energy and the production of energy.

K: Now we are going to the next step. On the 21st of June when we were teaching, we explained in a simple way that now that you have seen the fields where we actually from the plasma in its matter strength. And then we separated it in nano-material. And then we separated it into the GANS. And then we put the energy of the GANS in another entity in the water which is over these strengths, shape and color and they all give energies into the liquid of the water that we call liquid plasma. Now we use this liquid plasma and by the interaction of these fields on other fields, we created what we call unified fields. Now we work with this unified field of plasma. If you understood more, this itself carries the interaction of many different materials as you choose, and you understand that these GANS, once they attract and become part of this structure, now this plasma has the power of the totality.

(00:41.16)

So in fact if you put this plasma in front of the original material, you should be able to open the atomic structure of the matter of the original matter so in a way it goes back to the writing of understanding that the science and the technology comes back to free itself. You start from the matter to the fields and from the fields you can change the matter or create the matter you want from it.

K: This comes from physical to plasma and this comes from earth science to universal science (00:42.07) where now you can make whatever you like now that you this field in your

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

possession. This is what is in space. In space nobody gives you a cup, iron, bread; you gather the energy and if you want to convert it to tangibility, you bring it in reverse to the find the matter state. In a way, if you look, we started with the matter, we came to the plasma, and we can create any matter we like from it because you sit in the center of the creation of the fields and their control. You should go back to the teaching from the beginning; we said you won't take food, medicine, animals, nothing with us to space. At that time it was a puzzle how you would go without a payload of food. Now you understand you have whatever you need at the point of demand anywhere in the universe because now you have the fields. You have seen how you put the orange and you tasted the orange. You want the fields to change the position of cancer and it has changed cancer. You wanted to create metals from materials and how you transmute matters from one position to another. We have seen the transportation of the elements in the last 24 hours through the health teaching.

K: We will confirm it further and you will understand. We have separated agriculture and health from public domain because most of the people in the public domain do not understand what it is and how it is done and they can create problems for themselves. In so many ways, now not only have we seen transportation, we have seen what we said in the test and we have shown again and again how we transfer elements from one position to another where we choose and dictate where we want it to be. And as we say in English, "*the proof of the pudding is in the eating of it*". It is, in fact look where the element was and now when you go to the condition where it was you cannot find it in another place or it moves its energy to another place. Whatever has been taught in the knowledge and the science by the Keshe Foundation through plasma technology by your work is correct. We will bring the scientists who do these things if they want to. As we have said, we start bringing for you to see the proofs so that you build up the credibility for yourself and nobody else.

K: It is for you who have to be happy and satisfied with it. (45.12 minutes) Understand that a lot of fake information will come. I have made a decision for the last 12 months to allow some fake work to come in to open the hands of the people who are working in the background to discredit the information and technology. You will understand very soon. I don't apologize, but I want to open your eyes to understand how we work. I want you to understand how devious the present holders of power are there to do. They have done a lot of discrediting, but now you are making the Magrav systems. You are making the systems and applying them in the homes. Now that we have seen this power energy separation, on Thursday we give you new opportunities.

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: On Thursdays we have made new progress in so many ways for the next development of space technology for entering man into the universal community. How do you know the community exists if you cannot see it? How do you feel there is something there if there is no communication? How can a blind man see if he has no eyes? He walks with his feeling and the field, the wind, the motion he feels. Man has been blind to the universal community because man has always looked at the matter state. If he is showed something, he believes it. Now we open the door to the universal community to the eye of the man. If you understand this, you will use the emotion and the soul, and you will see the creatures of life of the universe. It needs training and understanding and it means to be able to translate the knowledge to the satisfaction of the man and the soul of the man. if 150 years ago we would have told you that you could go from one country to another on the planet within a few hours, we would have been a laughingstock because it had taken a long time (using) camels, donkeys, horses, ships and boats. Now all of us travel across the world within a few hours.

K: In the coming weeks and months we will travel the same distances in minutes and we will say *why didn't we see this before?* We are preparing for it, but in traveling in that space and speed, you want to see. You have been blind, how can (you) see the rest? On Tuesday I start teaching you the night vision of the plasma binoculars and how, you make systems that, as long as you use your physical eye you can witness the existence of universal creatures until you get to the point in trusting that what you have is equal and you do not need the eye. What do we do? We made the Magrav systems, the GANS plasma systems, and we put the patches on our bodies. We saw cancer being removed and changing, diseases disappearing and all kinds of things. What happened? We put the body of the man in the middle and patches or coils on either side. This transfer caused energy levels inside the body to be balanced. Now if we do the same but this time we create a field transfer that different fields strengths in different parts of this new system can create a field interaction in this line of vision (00:49.23) that by you standing here and looking into it, because now you look through the plasma of the system, of the universe. Depending on the strength you create, you shall see the creatures of the universe.

K: Now you look it with the physical strength of the eye of the man and the other strength of the plasma of the universe. For the first time man gets a chance by looking down this tube to start with, he can see the other creatures of the universe. They exist and we must receive the confirmation we can understand, not in our language, but with our emotion we understand the line of communication. I have tried to raise this so many times in the teaching and now you understand why. When we put two babies next to each other they don't speak the same language. It doesn't matter if the mother is Chinese and the father is Russian, the grandmother is black from Africa and the great grandfather is a yellow from somewhere else. But in their

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

communication, the babies know each other, who is what and what position they have and what they need to do. This will be the same with the man standing on this end looking down the tunnel. (00:51.08). Now, it is not the eye of the man but the emotion of the man which shall understand and see and communicate with the universal community.

K: If your intention and understanding is of him, you shall 'hear'. If your intention and understanding is that he is a nice food, you will know exactly what will happen to you—precisely. So for the first time slowly, slowly we start opening the eye of the man in how he can see. We have seen those who have been set up by others to discredit and have already claimed immediately what they can do. We will show and we will see. But those of you who understand will see and those of you who make these systems will see. (00:52.13). You made coils in different shapes. I have been trying to explain to you in the past few weeks, to try to do something different. Try in your Magrav systems and in your space systems coils which are not made of solid copper but coils which are hollow and tubes. Now you understand why, because if you manage to make these coils as tubes, the tubes always have double tubes so the field strength of one affects the other. You have brought magnetic and gravitational and then you create a plasma system.

K: Now start putting your tubes at 90 degrees to create the plasma so you can create whatever you need to do. Now put the same double coils next to each other (53.19 minutes). Get this solid and at this point (several coils in) you will see different kinds of creatures of the universe and because of the different change of the material here you shall see the other. So now you understand where we are going. Now you understand that it is you who will make the binoculars of the universal plasma. It is you who by intention inside of you will create the condition of understand the others. So, what you need to is very simple. What you need to understand is very simple. You have the tools and you produce the GANS. You dictate GANS and you brought in the GANS of different strengths. When you look into space and see a planet, by assessment of the scientists they tell you these are the elements and whatever of that planet. If you can create the magnetic gravitational fields of the composition of the elements of that planet, or a star, or a position of the universe you will see the style and type of creatures that live on that planet exactly as they are.

K: You what kind of life is supported and what the mentality is of this planet. If I want to see the human beings and I see the mixture of the gaseous part of the planet creates the amino acid and if I create exact composition of the amino acid strength and its matters, I should be able to see the emotion and the soul of the creatures of this planet. And through it I shall see the physicality and

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

the live physical condition of this planet. We do this already. From the beginning we were all nano makers and we never knew that. We didn't know how. We see the image of our mother, our great grandfather and all we see is image of people we don't know. They tell us something and later we had a dream and we understand it and we know it. Because at that point the knowledge was given to your soul and your soul received it from another soul. It takes time for the soul to be in the position that the physicality sees what the soul was told before.

K: But strangely enough the soul you receive the knowledge from this planet, from now on you opened the door. It is the same as you having a dream about your mother who died years ago but she tells you the story of what is going to happen and warns you or tells you what is about to happen in your dream. Dream is emotion and the connection between the soul of you and the soul of your mother which the dream knows and the soul knows that in translation you know this is the voice you knew as your mother's. In understanding that plasma field is 'mother' you create the image of the mother and the voice of the mother. The message of the soul to soul is transferred to the understanding of your physicality. Maybe for the first time you understand what dreams are.

K: When you come to this position and this understanding and into the position of understanding the communication between the souls and when you see the creatures of the universe it is the soul of the mother. It is you have to understand the language and what it means to your physical understanding. They will teach you everything you need to know. Man will never be in safer hands than in the universal community unless you make the mistakes and the greed of the physicality of the man takes over and it will see the punishment of it and that punishment is very simple: stay home; you don't belong to the universe. Then you shake with the shake of the planet and you shiver with the blowing of the volcanoes. Man, if he does not open the channels to the universal community has already made his own doomsday. It was not made for you; you have made it for yourself. The knowledge is free but don't abuse it because the abuse brings you back to the prison of the village you came from.

K: It is very simple; once you understand you have done it to yourself. We are not making a member of the council; we are not making a supporting team of the council. We are making one member of the council of one race, one planet and that is the objective. Start building the Magrav units for the vision and understand one thing. (1.00.19 minutes). You can make the environment of this plasma that you are inside of it and you see the totality. If you remember a few weeks ago I spoke of transportation through plasma. (1.00.34 minutes). Now you understand what it means. To get more confidence take a few of these coils and put them in front of you and make a few

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

and put around your head and you shall see with the eyes. What you see is not fake because you have created the structure like the amino acid of the man of the planet and if your wish has been to join because it looks like a good place to see, transportation and communication will be instantaneous. But don't forget; before you take the chance understand that the creatures of this environment are not food. Learn first how to feed yourself on the plasma of the universe because when you are hungry there is no food to where you have gone if you don't know how to feed yourself.

K: The members of the universal council and the members of the human race have to learn one thing. Creatures of the universe are not your food. This is not like on this planet where you eat what you like going beyond the border of the soul of the man let alone the atmosphere of this planet. To join the universal community even within this planet when you start looking and see the other creatures of the universe that are mixed amongst you then it comes to the raw point. There will be those who will fight and they will be seeing their own demise. There will be those that will amalgamate and they will see the glory of God. The glory of God is the peacefulness of man to be among the universal community. To be able to see the beauty of the creation across the universe, none of you would spend another second on this planet once you see the beauty of this universe. You don't have time. Why did you stay for such a long time in a place that is such a mess?

K: So much killing and destruction, abuse and now you are free. We will see how you will change. This is your first test and it's the first time due to the communication available to man we have given you the first chance to the opening of the universal community. Look at us, see us, we are peaceful, calm, generous and prepared to teach. If you make a mistake it is your mistake and not ours. Understand the work and you will support it. Misunderstand the work and you are in your own prison. In a way by showing you what to build I have given you your doomsday and your day of judgment. All of you have been waiting for heaven or hell; it arrived on June 21, 2016. The heaven is opening the man's soul and physicality to the universal community. The hell is taking you to this planet where you kill each other like rats. We will see the pen I gave you works; you have seen the Magrav system deliver energy. You have seen that we deliver. Understand that we deliver. We deliver the message of peace for mankind to take. Not all of you will take it in one go. It's too harsh to accept because now the rule of the game has changed. As I have said if you understand why I played this tape first from the universal council it's simple. When you stand in front of the man in the universe you see your shadows because he is peaceful and you are not. He has everything he wants and you don't

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: You cannot kill; you lie and he doesn't. So you stand like a patchwork of the darkest parts on the surface of the sun. And each dark spot has its own color: greed, murder and thieving. Now you have to reflect back onto yourself and you become the prophet of your soul. You release your own 10 and 20 commandments and live by it. Now you understand why the writings of Mohammed (?) say that man at this age has reached the level of the prophets of the past. It is not that you become prophets; now you understand why they were shunned. Understand the translation of the word in the essence of the soul and the emotion of the man and not in the physicality of the man. (106.56 minutes)

K: With these systems I show you more and more systems so you can see more of the universal community and I show you how to open the atmosphere of this planet into the universal community without even leaving this planet. I will open and crack the shell of the end of this solar system. You have been inside the dark and I show you how we crack open the shell without even leaving the shell. Look into the true universe and then see which one you want to choose; to be here to suffer or to be part of the others who live in the space where you are content, peaceful, and equal.

K: Start making these growing plasmas, the universal plasmas it brings. If you don't see it means that you have not created the condition for it to be seen. It is like night glasses. You can buy any kind of glasses but if it is not the right thing you shall not see in the dark. Now we opened so that man can see through the darkness of the universe and you will be amazed how closely you have been sitting among the universal community. You will see how close you have been within and how long you lived among us, but the blood of the man which is the amino acid of the man which is the structure of this planet will stand out. So if you understood now you have become the prophet of your own soul and the messiah of your own soul. I have said many times *I am the messiah*. Every single one of you is messiahs and now you understand.

K: When you do everything correctly and are correct you will shine like the sun and become a member of the universal council and the universal community. So please go back and give the credibility to the technology, not by you but by us. We start opening the technology so you understand. In opening the technology we have to show those who are full of dark spots and we see how they operate. They set up and we let them play because we were waiting for you to see how they operate. What they did in reality works and I can show to you but not what their reality wanted. Let us explain what has happened.

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: Now we go to the facts about the Keshe Foundation. If you remember last year we exposed Mr. Alan Sterling as a pedophile. He claimed he is not and it was slander and he made a virus and destroyed all our teachings over one year. We have all the documents that have not been destroyed. We took our time. And because we knew we were correct we collaborated with agencies because he was a pedophile and he was one of the top guys and we saw the Blue (Red?) Circle going to his support immediately. He is another one. And we withstood three attacks aimed at wiping out the Keshe Foundation. In their attacking the Keshe Foundation we became a “scam” according to how they built up the claims the Keshe Foundation scam with the same group and they made the Keshe Victims and everything else. It was very strange.

K: There are a number of these people because they are all pedophiles and they all work for the same boss. We have followed the Red Circle going through different Facebook that recruited people to come to the Keshe Foundation to claim something and then go to claim to be a victim without our ever knowing them and for them to create a profile of victims. Strangely enough Mr. Alan Sterling was arrested and confessed. We would like you to see the judgment and how correct we were about him and about the rest of the lie. Play the judgment about Mr. Alan Sterling.

Rick: It will be a pleasure after all that this person has put you, the Keshe Foundation and all of us through. This is the article from *The Daily Herald*.

K: Understand that on the Facebook for Mr. Alan Sterling and people like we saw like the people who came in and said have you seen the warrant for Mr. Keshe? These were all pedophiles coming after teenagers and young people. . It is actually from Austria and we have all your documents. They pretend. Here is Mr. Alan Sterling; read us the judgment.

Rick: *Headline: Fountain Green man sentenced to possible life in prison for sexually abusing two infants.*

K: His two infants are his own daughters who he raped and they were ages 3 and 5. That is exactly what the Red Circle has done with his daughters.

Rick: They didn't say rape here and this was the word Mr. Sterling was so worried about.

K: He has claimed sodomy of his own children.

R: It's not rape; it's actually sodomy. *A Fountain Green man received the maximum sentence Friday for sexually abusing 2 infant girls between 2003 and 2009 while living in Eagle Mountain. Sterling was sentenced by Judge Gerald McCabe to 15 years to life from the Utah*

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

State Prison for two first degree felony charges for attempted sodomy on a child. The sentence for each charge will run consecutively to each other but because of the sentencing guidelines, prosecuting attorney Greg Johnson said Alan Sterling will likely have his first parole hearing in 22 years. Certainly 22 years minimum fits the needs of our community, Johnson said. Alan (Sterling) age 52 was also fined \$20,000. He was found through a joint operation between the FBI and the Utah County Sheriff's Office. A court affidavit states the FBI became aware of Alan Sterling in December, 2015 when they found his YouTube channel. In several videos he admits to being a pedophile who has committed several sex offenses against children the report states. The victims were interviewed in January 2016 and told police that because of their age they don't remember the abuse, the reports state.

K: Now let us write how we worked with FBI. Last year when we found his process as you all know we asked our connection within the CIA to support us, that we needed to bring this man down. CIA immediately put us with FBI who took up the case and researchers of the Keshe Foundation delivered all their research work to FBI in August of last year. We worked closely with FBI regarding this case. You have to understand the research of Keshe Foundation and one spending all his holiday gathering hundreds and thousands of pages of evidence that opened to the others and how they are operating. In working with FBI in November we knew everything was intact and it was a matter of crossing the T's and dotting the I's.

K: Then around February of this year in our communication with FBI they said if they get him he will disclaim it; we need him to come to us. I told the FBI that was no problem. That was just about the 14th of February. I asked Carrie Cassidy to interview me because she wanted to know about the free energy. I said that I would bring Alan Sterling on but without damage to Carrie. She said *as long as you don't go too far*. We agreed and I gave a live presentation interview knowing the Red Circle and Alan Sterling were listening carefully. Listen to the audio that is available on Carrie Cassidy website. I said, *we know the victims of Mr. Alan Sterling are his own daughters. He and his company knew that we know. On the 20th they walked into the police station and completed the file that he has been a pedophile*. The story didn't finish there; we operate correctly.

K: In doing so and by looking at the Facebook of Mr. Alan Sterling as has been reported in *Veteran's Today*, we saw one of the biggest judges in America committed suicide because he has a full connection. Then we saw a number of people who are collaborators and Red Circle was one of them. And then we saw another group of people sitting there and security people followed. Then we released a number of people you see on the Red Circle list who come and

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

claim to be. It's easy and these are supplied to us by the security people. You see the names and these are all pedophiles. They are all paid to become victims because that is how Red Circle works. We see huge numbers and you have to be careful. They came on the Livestream presentations and made all names of accusations. You will understand one thing very simple. One of them is S. Abdul Latif and you know who are; how come you are a victim on Mr. Red Circle list. You are now a victim and you were paid and now we see how they are faking; there are no victims of the Keshe Foundation.

K: Another one, go to the list, is Mr. Selmani who played the game by Red Circle to become a 'victim' of Keshe Foundation. Another one is Mr. Latif and you see him again as a victim. Strangely enough they appear in 50 Facebooks with Red Circle in the same gathering of children. We saw on the Tuesday teaching out of nowhere *have you seen Keshe has an international warrant for his arrest?* Yes we were watching you. But on Tuesday we saw a pedophile from Austria appearing and writing articles in a way to discredit us; have you seen it? It's very interesting—he is one of the guys at the top of Peswiki. He is acting and playing young people's music and is German speaking from Germany and Austria—this is Mr. Thomas. We know who you are and Interpol will visit you very soon. Be careful because everything has been recorded. That is why we can talk easily.

K: You have to understand that we could not disclose this until we saw the conviction of Mr. Alan Sterling. Strangely enough Mr. Sterling, Red Circle, somebody called Suzanne and somebody called False Hope all have connections to children's charities, *Hope and, False Hope* has escaped from the United States to Morocco and has been interviewed by the police in Morocco parliamentary committee for trafficking. That is why you don't see her around much but she just puts things one...nobody knows. But she was missing on the 30th. On the other hand Suzanne, who claims everything else, has a brother in Holland that runs the hidden house for trafficking children from India and Tunisia. Strangely enough the gentleman who turned up in a Keshe Foundation in a teaching said he has hundreds of black guys in America working and teaching. And he has a child support group in Tunisia. This is very strange because they are all in child trafficking and they are all part of the Alan Sterling group. These are all open to us and we had to keep an eye on them and on Europe.

K: Then strangely enough these people all work from third world countries trafficking children. And then killing the children. The Keshe Foundation has supported to see the information comes in and we have a very vigilant group. What we see now is that Tunisia appears again and again by another group again connected to Red Circle. He is the head of one of the biggest pedophile

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

organizations. We followed back to Facebook where he and the victims appear together. Now you understand that all the victims are fakes and built by him just to do the job for his king; he is paid to do that. We have something strange to tell you. That is that we have evidence that the Red Circle has been involved in poisoning scientists to kill them with liver cancer. We released the names to Interpol. He is paid to write patents and once he gets the information the victims in a way by the material supplied by his bosses, the same as they did with me, to make as the victim died of liver cancer or had that kind of problem. Interestingly enough, I was one of the victims and I know another who was very high profile and high energy and he poisoned him too. We have taken his file and he doesn't know.

K: There are no victims of Keshe Foundation. Just look for their names and follow them on facebook. Red Circle and they appear together on some 50 facebook. They are going on Facebook and asking to become victims of Keshe Foundation and they will pay them. He has an open account at the Central Bank in Belgium and has no problem paying a man in Africa— 150,000 or 100,000 just like Paul did. Now you understand how they operate; we had to wait until Mr. Sterling was done and now we can release it and we have physical evidence of people trafficking children and murdering them. This is the job of Red Circle and now you see it and understand exactly who we are. Yes, they have become part of the students and they pretend to be students and they are not students.

K: We know and we keep the information away from our own team for security that we do not blow anything out. Understand something very simple: child trafficking brings a lot of money to sick people and a lot of money in their back pockets. Red Circle is the headquarters of it. Don't take me at my word; go and check and see how they appear everywhere. They try to be a student and teach and then they go and become 'victims' on the other side. It will be very interesting to see other names. The followers of the Keshe Foundation set up a website and we are looking for the names of the children who have gone missing and it's an open line. You can go on and look at it. It's set up not by us but by our supporters. Look for the victims; it is time to stop.

K: It's time to stop the silence of these people killing children and to stop murdering scientists. Now you understand what it is and we are asking you to break the silence today and enter the children and scientists who have gone missing and who there were in contact with. You will be very amazed in one of the entries of Alan Sterling by a comment in the Utah newspaper that reads by Shana: *Oh my heck; that guy has been to my house and he wrote an article about my husband's business. He also featured one his videos on his you tube. What a creep! What a creep!*

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: Now you understand how they work. We have brought one of the biggest pedophile organizations in the world and the bottom is falling out from under them. Red Circle you are nailed more than you thought and all the people around will put your name in the website at the top where you have your own category for attempted murder and raping your own children. Alan Sterling denied it and so did you. You had to pay 500,000 to them to come back to you. Papa made a mistake. Half a million was more than enough from the State. We have your own confirmation about a 2.5 year old child which is a criminal offense. There is another victim of yours and you are involved in the murders of two Moroccan children in the 1990s. We release their names and they go on the list. You are the one that handled the trafficking of the two daughters by the rape and you are the planner and the backbone and that is why you are controlling the politicians and we have seen how you destroyed the politicians who came too close to Red Circle.

K: It is on the internet how you destroyed politicians and the scientists. (1.29.55 minutes). You are a murderer—two girls 8 and 10 and you have been trafficking. I wonder if your boss shared the bodies of those two children. We don't lie; Alan Sterling case shows that. We have been too close to the information. So, now you know how they are making the 'victims of the Keshe Foundation. I suggest to you Mr. Red Circle to close them because we have taken copies of everything. All your communications across the internet have been reported. Just wait—it took us a few months and now we are coming for you. You have to realize one thing: children are protected by the law of God and not by your abuse. You are a sick man; when I read this article by this woman who said he was in her home and I fed you and you gave me poison to give me liver cancer. The liver cancer came when I came back out of Iran and we thought it was radiation, but you poisoned me at the table when we were meeting to write the first book. The same thing with the other scientists—liver cancer. You are a murderer of the first degree and a raper of your own children. We open the books and you are involved in attempted murder. I don't know if the other scientist is still alive. We will find out very soon. Two attempts of murder of the other scientist and me. And twice you attempted to murder to kill me.

K: You raped your own daughters; I don't know if you raped your boy—we thought you were straight. You were involved in the two children in the 1990s. If you are in Belgium go to the London Tower; the man who killed your children is sitting there. This is the responsibility of the Moroccan community because they fought hand and tooth to get their daughters back in the 1990s. Go back and look at that. Mr. Red Circle was most likely hiding the bodies of the children

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

in his house. Now you know who you are dealing with. Denial and then creating distraction to discredit and you have seen the same thing with Mr. Alan Sterling. 1.32.39.

K: We have seen the same pattern of work with the bosses of Komer (?) in Singapore working for child's health and translating medical files and selling children's organs. You pretended to be a boy, a child, wanting to know the technology, the same trick as your friend, Mr. Thomas in Austria. I check everything before we disclose for the past 6 months. We were told we had to wait for a judgment and it has been done. Our Moroccan community in Belgium where the two children were hiding was not with the two. They were with Red Circle and he can see the two dead bodies any times he likes. He sat watching them to be killed, pretending to write a book. Now you know all these things about the Keshe Foundation and all things against Keshe was to cover a big organization of criminals. A man who broke into it, they tried to murder... I am that man.

K: I am the victim; all poisoning was documented in hospitals. Now we understand. Please carry on with the work of the foundation; we are all perfectly okay and the technology is beautiful and has brought a lot of peace and joy to a lot of people with pain. Doctors and scientists and scientists are testing the technology. Doctors are reporting cancer from a dog as non-existent. People with 10 cm diameter cancer were reduced 80% within weeks. We see people with pains and people with different diseases working with the doctors are walking away from pain and disease. Their salvation has been the technology. We have seen from the reports in Ghana from the Atomic Energy Center how we have literally destroyed every bacteria everywhere. River water in Africa is safe to drink (where the technology has been applied). We don't need to pay millions of dollars to clean up so a child doesn't die. People don't get diarrhea; a drop of water is a disinfectant. This week I have signed an agreement with hospitals in Africa and we have signed an agreement to treat the malaria on a scientific basis the way we have seen the other reports.

K: In the coming weeks we will get the sediment report from Ghana Atomic Energy. It is very interesting and this is a gift from us to the Chinese people when we go to China on how to clean and decontaminate. We have developed technologies to clean air like the air in Beijing and Shanghai very rapidly. We have developed the technology of what you call the new plasma generators. This plasma generator is getting developed as we speak and we are offering it for sale for 1800 Euros. We have advanced to shrink the size so it becomes a manageable size that we can use. And that has increased the price to us and this is reflected in the change. You can buy about 3 KW of plasma generator to be delivered in 90 days from the order placed with the Keshe Foundation today. We have said that one by one we will tell you how the technology works. If

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

you remember last week an attorney and student of the foundation sent us a video showing us that his refrigerator works without electricity. It was nice to show.

K: Rick, have you received the video from Giovanni that we can play?

Rick (R): Yes

K: What happened is that last week I came to Rome from Baleta to see the system. It had to be real and I had to check that it was the 3rd to 5th unit we have seen do this. What we did, we switched off the main and there is no electricity in the house. And you will see and understand what our power unit that is coming will deliver. (1.38.43 minutes).

G: What we are seeing is Mr. Keshe holding a hair dryer and there is a heater, another small appliance and refrigerator. They didn't have any more plugs to add, but the plug indicator light is on. This is connected to the main portal. There is no electricity in the house. The fan light over the oven is off. So these items are running off the Magrav and there is no other power running on in the house. This is June 20, 2016.

K: Now you see the system we are offering is at 3 KW and whatever extra you can use is your benefit. We are moving away from the Magrav system into generators. We build the system as one family across the planet. We withstood the trials and the failures. If you look at the first Magrav systems they are still working. But now what we have done is to go to the next step and we are developing the complete unit and you will not have to rely on any supply. In a way that is wrong; we have built the energy that relies on the plasma supply of the unit. In so many ways if you speak of fields and not plasma we have fulfilled the dreams of one of our most beautiful scientists who studied before, Tesla. This time we do it with the plasma. Tesla showed us the field flow and I showed you plasma flow. He showed you one direction of the traffic and I show you both. And the traffic on both when they come together is massive and there are no losses.

K: There are absolutely no losses in your system. There is one thing for sure. We will make mistakes in assembling one screw or one nut. But we are not and have not made any mistakes in the science of understanding the plasma. Those who are feeble look for a screw; those who understand appreciate the totality. I received something very interesting this morning from Africa. This is a scientist from University of Africa and this is his explanation as a scientist and a professor: *On Monday I had one Magrav unit and was asked to explain it to another and I did. We entered into the realm of electrical engineering and he said "current squared times resistance equals the power is eliminated."* It does not make sense anymore. These are two of

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

men of science of the power that understand there is no resistance because the plasma flows freely so the basic equation of the power that you work on does not exist. This is a man and professor who will be a speaker at the Ghana conference. These are the true men of science in Africa who don't lose their patents because they have no patents to protect and they share the knowledge freely.

K: For the scientists in Cerne there is something wrong because they lose their income. So a professor in electronics has explained this to you in a very simple way. $I^2 R$ equals power does not exist in the world of plasma technology. Now they understand that in the world of nano layers and plasma there is no friction and nothing but the flow; it is the river that runs with the high speed. And it's you who throws in the bucket with how much you want to take out of it. The new systems we deliver will be in 3 parts: the main part will carry as it is the Magrav unit that carries the certification; the other parts are not part of it, but in a way they are fuel tanks and they are conversion systems. We are asking for 1800 Euro and we will deliver all the Magrav systems.

K: There is a problem and I have to explain to you. In my talks I have said we have delivered everything. My team came back to me and said there was a problem and we had not delivered everything. There are twenty six left for Canada. Canadians want us to certify our system for them. It is not our responsibility. We certified according to the EU certification. If you buy from anywhere around the world and want to import our goods for yourself, you have two choices. We change our shipping arrangement. We give you the company and we give you the bill and when you pay for it, you become the shipper. This way we are not at fault and you are buying the goods on your own terms. We don't take money and not deliver. You wrote from Canada from the Keshe Manufacturing and want certification. We manufacture in Europe for Europeans. If the rest of the world wants our products then you ship it yourselves. Once you have paid us the shipping goes back to you.

K: Arizona Keshe Manufacturing has gone to work and they are assembling their systems. Soon they get American certification. Then Americans can have that. Documents for Keshe Foundation Canada have been signed so the Keshe Foundation Canada is going into production. I thank Rick and the team of Canadians who are working so hard in different ways with different companies. The Keshe Foundation in Austria has gone into operation. I have signed the agreements this week. But, Austria will concentrate on the production of the medical systems because we have Dr. Klaus there and our team who understand the health units. Today we have 11 applications from Mainland China; actually there are 12. In our future days we will release for

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

these 12 groups to start manufacturing in China. There are other manufacturing like Germany that have been signed and they are waiting to see how they will solve problems before they start manufacturing. On the other hand other countries are very well set and you will see production. I apologize to Taiwan Keshe Foundation; you understand the situation and be patient with us. I have signed your documents and they will be released.

K: We support other countries across the world and we work with Brazil and South Africa to achieve this. Australia—we have to stay within the law of the nation and if you set up a company it has to be within the laws of the country. We cannot agree with setting up outside the rules. If you don't other people who are part of the Keshe Foundation will set up according to the law. All the nations in Africa by next week we will have the manufacturing set up and Keshe Foundation signed. Kenya will be done next week; Nigeria is complete. Remember that in October and cannot get reservations in Europe, the Africa nation conference is set up for Africa and we are inviting a number of scientists from different universities round Africa to present papers who work with the Keshe Foundation.

K: We are highly credible and energy associations would not have approved and none of you would have stood still for one second to understand that. The abusers had their rampage to do. I am proud to announce that in the coming days we will have Iranian scientists on board with the Keshe Foundation with health and other areas. We told you and being born in Iran we will bring Iran to work with the plasma technology with us inside. Their papers will be published across the Keshe Foundation as they find out and define more about the technology. Don't forget the Iranians are the leading scientists in nano technology and the plasma in the world. I thank the Chinese Foundation for their donation and in allowing all the technology and the work we have done to be transferred into Chinese. The Chinese need to learn this. The Foundation is solid and belongs to you and we are building it and structuring it and the structure is the foundation and we build the rest on top. Teach as much as you can.

K: Do as many experiments to show the angles and beauties of the science and share it with us. We have come to agreement and we start testing with different organization and with different government authorities. Go to your governments and tell them you want certification and Keshe will deliver and Keshe will test. It is very easy because we carry certification documents from Europe, Africa, China and every where else. We are launching an interesting point: we have seen the end of the biggest fear of man with cancer. We can deliver technologies and you have the technology so learn how to use it and go to the doctors to understand it to eradicate the cancer. We have doctors in the background who listen. If they come and explain what they have done in

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

the medical section, raise your hand. If you see your knowledge can help to serve humanity with what you have done, please come and raise your hand and come. You are another knowledge seeker and you learn with us and share with us. But we respect your position and your expertise. Are there any doctors who want to share their achievements with us? Stanley, do you see any of the teachers or the students or doctors.

S: I am reviewing.

R: I remind the viewers if you are a doctor and want to speak put your hand up so we can make you a panelist and you can speak.

Arman (A): May I speak?

K: We have at the Keshe Foundation the first professorship of the institute. As you know Benjamin in Ghana works with other students and teaches at Keshe Foundation in Ghana. He has become one of the first professors to teach Keshe technology at the University. So we have a professor and a master; Arman is the master. Go ahead.

A: I am helping a lady with the cancer and for ten days she has been applying the patch, drinking the water and taking the baths. They did the MRI and cancer shrunk in size in two. The doctors could not understand how it was. It was 10 and now it is 8 and that was in 10 days. She has no pain and she was diagnosed with stage 4 cancer.

K: Are there cancers anywhere else in the body?

A: No, only in the lungs. She is eating normally now and couldn't eat well before.

K: Do you have the documentation of the cancers?

A: Yes. I have a CD of it and I want to talk with Dr. Rodrigues tomorrow to discuss it.

K: You need time; don't rush.

A: I'm not.

K: Last week we spoke about the lady who benefited from the system and then we received communication from the husband in the background. I do apologize. For me if I share my life and knowledge freely then what you gain has to be free as well irrespective of condition and position. I understand and respect what the condition was. In so many by our coming forward with what we have and what we have learned, we give the credibility because the life is credible. If we see what we have seen, if we have doctors, and most of them work with us from across the world and many are already asleep in the middle of the night. They appear in our afternoon

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

sessions most probably or from different parts of the world. We have a large team of Chinese doctors that will join us. When I get to China hopefully we can bring them in. These doctors will show us more ways of doing things.

K: Are there any other doctors here?

S: Dr. Rodrigues is here.

K: Good morning and I thank you for being part of the teaching; would you like to discuss you have seen change with the technology please?

Dr. Rodrigues—changes he has seen; 2:

Dr. R: 38-year-old woman with breast cancer, spread to femur, ribs, spine, right side of brain—frontal, occipital and temporal-and she came here and I put her inside the health unit for one month for one hour three times a day. She also wore the helmet. Eight days after we started she had an MRI and the tumors in the frontal, occipital and temporal right brain had disappeared. After one month we made a scan and all the tumors from the bones were gone. After one month there are 2 tumors on the cerebellum part of the brain reduced 80%. We made a test of the metals in her blood to determine what kinds of metals are in her tumors. She is doing great.

Dr. R.: The second patient is a dog that had cancer in his left leg and had 2 tumors the size of golf balls and I put the dog inside the health unit. One tumor was in the muscles and the other was between the skin and the muscle. Within 10 days the one between the skin and muscle disappeared completely. The tumor in the muscle was reduced by 80% in 10 days. After one month we took a blood test to see what metals were involved and it was iron. In two days the tumor disappeared completely after I added CH3 (iron derivative). The dog is cancer free and full of energy and running about.

Keshe (K): I want you to make it clear. Did you see cancer markers in the blood tests?

Dr. R: All the blood tests are normal. The cancer markers were significantly reduced and the woman was waiting for the test for the metals. But everything is doing great. The tumor markers are low. The liver test where the cancer has metastasized is clean. Everything is working normally.

K: You are doing a test on Alzheimer's'?

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Dr. R: Yes, I have a lady with Alzheimer's and has had it for many years and for the last 9 months she has been completely 'out' just laying on the bed unable to communicate with anybody or to walk. The lady who was taking care of this patient was using cold packs on her face in order to wake her up to feed her. I started using the pads with Zinc, CH₃ and CO₂ patch and gave the two patches and asked the caregiver to put the patches on the water container. The lady said she would see her in 3 days. So I waited for 3 days. The lady's son called me and was excited and crying because an hour after she drank the water she recognized her son and was talking and calling him by his names and asked why we was so weak. She said she wanted to walk. She is doing her great. I gave her only the GANS water of Zinc, CH₃ and CO₂ on patches. The patches were treated with the GANS water of the Zinc, CH₃ and CO₂. Those were then placed on the outside of the pitcher of drinking water for the woman.

K: So you put the patches on the outside of the water container and she drinks the water from the container?

Dr. R: correct. She is doing great.

K: Anything else you can report with your patients?

Dr. R: Yes, patients with diabetes, and two of them were put on the health unit. 5 days after being put on the health unit, for ½ hour twice daily and all the neuropathy disappeared. Blood sugars are totally normally. They are still coming to complete the treatment for 3 to 4 weeks but they are already doing great. The state of mind and awareness are improved. There are no dramas in their minds and they feel energized.

K: How do you feel as a doctor that you can do this after practicing many years?

Dr. R: You never see this in medicine. Learning medicine is not this. This is like 'playing with the disease' to make someone else you are treating richer (in health). Even all the doctors who went to school to heal people. We were deceived. The medicine we learned was not the correct one. I remember one day that you said you said the human body is a machine of the universe. The more I understand this, the more I use this technology, it's incredible. I do believe that we can control the body and bring the body to balance. What I have learned is not just the health unit. Then I see this it's a source that has given us the power to heal ourselves. That is what we are learning to do. We control the plasma and the energy. It is not that the plasma is there to heal us. It's not that. We feel the energy but when we think about one part of the body, we sent that energy to that part of the body and we control that energy. It is giving us the power we have inside of us to heal ourselves. This is like having a beautiful car without gasoline. You are owner of the car but you don't have gasoline you can't use it. But you are the one who controls the car. So you are the one that controls your body. This energy gives you the power to use it and use your own power and heal yourself. When people are aware of this they have better results. I have

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

seen people come in to the unit and not focusing on healing don't receive the energy. When they focus on the body, they control the energy ...

K; they control the plasma.

Dr. R: Yes the plasma; this is just a source for you to raise the power of yourself and give the power back to you. It's beautiful; this is the way I see the plasma. I love the energy and knowledge.

K: Would you like to tell us how you dealt with the cancer of the dog as it was a specific job. It's important as we have doctors listening and I gave you specific instructions and you followed them. As a doctor explain how you saw the cancer and what you did with it. How did you deplete the cancer? Teach us, please.

Dr. R: What I have seen when we have cancer I see the 80% reduction but most of the seeds of the cancer are involved with some metals. So we have to do blood tests to see what kinds of metals are involved with the cancer. Once we find the kind of metals we make the GANS out the metal and use it. I use patches connected to the nano-coated copper on either side of the patient. The rest of over; it only takes 2 or 3 days to make those tumors disappear. We see the cancers reduce 80% and then we use the patch with the metal and the tumor disappears completely as that was the energy of that tumor. It is energized by the metal that shows up in the test so when we use the GANS of that metal the cancer disappears.

K: You have taken the most powerful way of using another part of the technology where it is like a pearl; you take the seed away. I have to explain something. Dr. Rodrigues listens to everything and does everything exactly. He gets the results from it and this is very strange for a doctor to do this. He followed the pattern for making the coils; he makes everything himself. He followed making the GANS patch with the iron as we explained that you transfer the energy of the material the way it is in the body. By doing this he has conquered one of the biggest mysteries with this technology. When Dr. R. told us that 80% of the tumor had disappeared I told him that there was a seed holding the 20% in the tumor. It is usually heavy metals. I suggested and I have said in many teachings that cancer has a seed that pulls the gravitational energy. No one ever dies of cancer; they die of lack of energy. I told him to make the GANS of the iron. And then he made a caustic of it and transferred the GANS of it into the patch. What happened is the transmutation of the energy. Because the iron in the center of the cancer is plasma in the GANS state, now it is in a stronger position because it receives a lot of energy. With Dr. R. putting two irons on the patches on either side, the habit of the plasma is opposite the habit of man. We look at how we put it and it worked. With plasma you have to learn that you put two weaker patches

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

on either side and the cancer cell that carries the plasma of the iron tries to bring the other two (the patches) in balance so they are equal and all the energy goes to the two patches or to the two plates in the healing unit. In a way it empties itself and there is no more iron. When that center is gone from the tumor there is no support for what is attached to it and that is how the cancer disappears. I have done this for many years and now we see this proof for the first time (from a doctor).

K: We had a case yesterday in the doctor's teaching and I was explaining how to transfer the energy of the tumor from the brain. I asked if the doctor saw a flake on the skull. The doctor said yes.

Dr. R: Yes, there was an indentation in the skull.

K: The seed of the brain tumor is usually calcium. In making the health pens that she makes the doctor sees the flakes on the outside of the skull in the hair. The doctor said she had seen that. That is the transportation of the actual calcium inside the brain to the outside where she put the health pen. For the first time we understand and we have the science and the knowledge to do this (treatment successfully). I explain in the teachings that the beans and carrots you eat don't pass the stomach or the intestine. The energy transmutes from the inside to the wall to the lymph. Now with these two doctors we see this confirmation. Now that we have created the reverse we are transmitting the elements from inside the body to the outside. We have seen the disappearance of the cancer when we did the blood test and knew the seed held iron. And in the other case we have seen the calcium physically on the outside. We need to do more and more and we invite more doctors to extend this knowledge. Thank you, Dr. Rodrigues; you have been a great asset for us and we have learned a lot from you.

Dr. R: Thank you Mr. Keshe; I have learned a lot from you.

K: We usually do the doctors' teaching in the afternoon so the doctors in the Americas, Europe and China can find time to join us. If they like they can allow their cases to be measured without using the names of the patients. We just heard the biggest learning for man on the planet for thousands of years. We have managed to overcome cancer by just the fields of the universe. We are not injecting; we are not pulling anything out. There is no operation. We have understood the essence of the creation and doctors tell us one by one about the changes when they practice this technology. They see the changes and now they have the tools to save the lives of their patients. People like Dr. R. make the tools themselves. Keshe Foundation Austria is making the tools. We are actively building systems for American support.

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: We see the Philippines moving the technology into universities and hospitals. The technology is solid and it proven by governments, scientists and doctors by ordering man into the 'kitchen.' It is beautiful to see and now others can report what I have reported for years and in an easier manner. Now we have seen how they have to deceive us with false victims to stop man from being freed from their shackles. There is no chemotherapy and no radiographs. There is no cutting open and putting families without fathers and mothers and mothers and fathers without their children. From this week on we are proving more and more that we have found the solution for cancer. The Keshe Foundation as one race, one family has found the solution for our families at least for the cancer and the others. (2.19.41 minutes) We might change or we might have different names but we are all one family.

K: Now we have seen it; the biggest mystery and fear for the man is buried for the man and we have no fear from cancer. As we saw from Keshe Foundation in Ghana, bacteria is killed. As I said I have signed an agreement in Ghana to start testing the technology for HIV and malaria. But as we share the knowledge we share knowledge with your further. If you have CO₂ and just the water of the CO₂ I have asked the scientists from the nuclear center in Iran to do this for me and we will see the Iranian scientists shine. Not only do I have respect for them because I was born there but I have respect for them as some of the best scientists in the world. We will see what they share with us. I have asked the same thing from Ghana.

K: I have news for you; one of the biggest and I have seen many people over time who have seen problems in hospitals after operations because of infections and cross-infections. The doctor touches something and the wound is then touched internally leading to infections. This leads to a lot of pain and death. I have asked the Iranian and Ghana scientists to look into this and the answer should be very easy. I have asked them to get the authorization to do tests; as you know the Ghana scientists are very precise. We would like to make a GANS of CO₂ plus copper oxide plasma water. We sterilize our knives, scalpels, our tools and everything in the operating room 100%. But once the incision is opened the breath of the doctor, the touch of something that is common to operating rooms, the touch of the nurses unintentionally brings cross contamination and infection. In so many ways we see when the skin opened up in certain places it leads to cancer in those places.

K: We are asking the doctors especially surgeons; if you work in any kind of industry it is good to have knowledge from you. Make a GANS of CO₂ and just put all the tools in the operating room in this water. It can be put into sacks that you open with gloves on. We make the GANS of these waters in surgical room. Everything you use in the operating room, knives and all, can be

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

put in this liquid. It doesn't matter because it is all sterilized. We have seen from the Ghana Atomic Energy report that nothing was in the bacteria studied and every bacteria was dead when they used CO₂ solution. When a doctor wants a knife and he takes the water out of the liquid and it is sterilized. And then because the doctor puts his hand in the water to take the knife he cannot cross contaminate. It is already sterilized. When you want to close a wound just use the same water to wipe the wound from that container or another container. You will sterilize the wound and kill all the germs. The beauty of this system as we heard from Dr. Rodrigues if there are any cancer cells, because you have the CO₂ environment cancer will never grow. The infection will not be there; complication from operation does not start.

K: I come from a medical background of working in and seeing hospitals from a very young age. I went around the hospitals and I have seen a lot of things like the parents crying in the hallway over the child they lost, or a child who has lost his father. There are so many people dying in England along with post-operation infections, so maybe we have found the solution. We will get the results from the Iranian scientists very soon. I thank the offices of the Iranian president for supporting the Foundation. I thank the Iranian nuclear physicists who have started collaborating. You can understand one thing: it's the process that we have to understand and not the science. We see now that we are testing, if you spray the CO₂ in the water, just make the GANS of the CO₂ and when you go to a public toilet or a house with a smell, just spray with your CO₂ spray and you disinfect it immediately. If you have odors in the house, they are fields and the odor is the crystal dimension of the gas. You will find the odor disappears instantly within milliseconds. There was a smell, there is no smell.

K: Caroline tells this much better; you can use the CO₂ as deodorant. She is testing this and she walks around spraying CO₂ on everything possible and we see the results. If you have a skin infection, spray the CO₂ GANS on it; do the same with a skin cancer. Spray the water of the GANS of the CO₂ and with a very little copper oxide. If you have a burn spray CO₂ on it. I have tried the CO₂ in my eyes. IF you have foot infection, a corn that creates pain, spray on it and patch it; we have seen changes. Use the knowledge to bring comfort. If you are bald, use the CO₂ water and just brush your hand on your head—she will love you. I don't know for how long, but now you look very handsome. Understand the process and in the kitchen use the CO₂ GANS water for cleaning around the house especially if you have young children. Try it. There is not any longer the last man standing. If you understand you can save your life.

K: We still don't know much of this technology and it needs to be opened up. We opened up the medical technology application and the agriculture and land application and we opened up with

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

the Fukushima contamination. As we have seen in the recent publication by Tepco, the Japanese government lied to the public for two months about the reactors. It is in the public now in Japan and people are very angry about it. The head of Tepco announced they lied for two months and were told not to tell. They continue to lie that they have not used the Keshe Foundation technology, but they did use it. Habitual liars cannot stop.

K: We have pictures of our team in Fukushima on the ground. And as you know, I release everything and I will release this by next Thursday. As the Japanese government lied for two months that there was no meltdown, they lied about Keshe Foundation also. The same as we have seen with other people who make criminals by paying them to become 'victims' of Keshe Foundation. It is very easy for people with a lot of money to create mayhem as it brings them a lot of pleasure. I will personally file a case against the Red Circle for attempted murder as I already have in the Italian courts. I have the evidence that I was the victim. He is a murderer and he does everything he can to divert attention. Create a diversion so he can escape.

K: Understand that all of you are correct; the technology is solid. Bring more in of what you are achieving and we are telling you what we know and we are releasing the blue prints. We have seen a report from the innovation center in respect to what the doctors tell you about the acidity of the stomach or the saliva and the alkaline. Let a simple application be shown to you. Renon are you there with what you showed in the medical training to the doctors yesterday?

Renon (R): Give me time.

K: What you will see this is knowledge belonging to the foundation which is you and was shared with the doctors in the medical training. Understand in a simple way how you can change the acidity of the mouth if you have mouth cancer with simply touching the water in your mouth. If you have stomach cancer you can swallow the water. We need data so we ask you if you are in a village far from Dr. Rodrigues and you and you have stomach cancer are in the villages of Togo or another place. This is how a family looks after each other. What you will see with Renon is they have taken a smoker with a high acidity level and used the CO₂ and then measured it for the alkalinity. They have tested this outside the body with the CO₂ liquid plasma. It is a very impressive data if you understand it and if you are a doctor and can use it.

K: Understand it and apply it; this is what we are looking for. If you have the mouth cancer, try to use the water GANS of CO₂; do not use copper oxide; please don't use it for the time being until we can tell you more about it. You can use copper oxide but it has to have a ratio so that you don't change tissue or muscles. Are you there Renon? 2.34.01

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Profile: 30 years old male 160 lbs. Married 14 years and chain smoker with at least 14 sticks of cigarettes per day. Take note that the subject did not quit smoking for the duration of the study.

Next page: Renen and his team used the health cup, PH paper, and plastic containers.

III. Experiment set up:

Mr. Jomar Oscares, 30 yr. old male chain smoker is our test volunteer to check on the effect of AIR PLASMA on a person's body. Subject is made to breathe AIR PLASMA via PLASMA health CUP as we know how to build it. They used the pH paper for measuring the pH of the subject's saliva. The saliva was measured on X hour intervals to check on PLASMA longevity/effect.

IV. Test Parameters

Day 1: Breathe on Health Cup (1x only)

Day 2: Breathe on Health Cup (every 4 hours)

V. Data

Test 3: 1 time instance of breathing in CUP

Observation: There was a significant increase in the pH from 5 to 9 after breathing on the health cup. The increase of pH was sustained for 2 hours. A significant drop was observed thereafter

Test Results shown at 2.38.51 minutes.

In the 2nd diagram you can see a significant rise in the pH where this man was made to breathe on the Health Cup every 6 hours and the saliva pH dropped back to original levels. More photos at 2.39.28 minutes.

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Goal *CO2 GANS Water changes pH Level of Saliva to Alkaline* *Accomplished 6-15-16*

Updated

Prepared by

Team: Danny Mayol

I. Materials Used

- a. pH Paper*
- b. Water of CO2 GANS*
- c. Saliva—a male person age 30 who smokes 15 cigarettes a day*
- d. Plastic container*

II. Experiment set up

a. Allow the Subject to build up some saliva on the mouth and swallow it. After that rebuild some more saliva and spit on the containers labeled as Container A and B.

2.42.19 minutes. Subject did a 10 minute reading every 4 hours. Container A had 3 drops of CO2 GANS water added to it. Container B was the control.

III. Results

- a. Sample B—Saliva with pH level = 5*
- b. Sample A—Saliva with 3 drops of CO2 GANS water = pH level 7 to 8.*

R: This is why we feel great when we drink CO2 water. Most people have been drinking CO2 energized water and feel refreshed and sometimes it is 'sweet.' We can tell the pH level increases. Right now we are testing how many layers of drops of water with the pH level transferred to the containers. With the simple testing of the pH we can conclude that the CO2 can increase the pH level. It helps change our physical bodies in our stomachs. This is the simple test we have done. We are doing ongoing tests; this is only one case and we will do other tests. We are going to do a test with a smoker and a non-smoker so we can compare the difference of the pH levels.

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: What is the next step of development?

R: The next step is the one you presented yesterday and we will test water with one drop of CO₂ GANS and see the effect of the pH. We have seen the application in these tests but we need to prove the pH level would be over even when it is dropped to a different water. In container A we drop the CO₂ and we will drop into container B which is distilled water. It will still affect the pH. We will test what the limit is on transferring the information. We will see if it can transfer the same information from one water to the next water.

K: So you take a drop of water from a cup and take it to another cup and drop it in that cup and do this 5 or 6 cups and test again and see what the pH is to the end of the testing?

R: Yes.

K: It is very much like homeopathic. You make the tincture and our bodies make the plasma tincture. Everybody can do this.

R: It has been proven with the patches we are using. We don't put any more CO₂ water GANS from the source. We don't let it dry out. 25% of the bottle is left and we add more water to it and add that to the spray bottle we use on the patches and the patches have the same effect for relieving pain.

K: We used that with Arman. That is perfect. Thank you very much. May at this point we can announce something very strange. As you know Ghana Keshe Foundation is part of the university structure and the Ghana government. As you have seen a simple man with the knowledge of science like the Keshe Foundation in Philippines and around the world are developing things that are beyond the imagination of the present man and it doesn't take long to do. As part of the Keshe Foundation we don't see why men have to spend 3 years in universities to write thesis on the papers. Hopefully in the next few months there will be 10 PhDs in Ghana University and for one year. We don't see why people have to spend 3 years hanging around when in this 1 year you get this PhD from the university on the space ship program technology. Especially in Africa we will offer 10 PhDs in the university in plasma in one year. So this is what is coming up and what is on the discussion table with our team in Ghana and we are finishing negotiations. The results are fast and you don't have to wait for months with laboratory equipment when you have cups and CO₂. 2.49.33

K: We will set up factories and we are offering 10 PhDs in the coming months. If you are in Ghana we will give you the contacts. If you have an idea that you want to research we will give you the facilities within the university. This is the beauty of the technology and the Ghana Keshe Research is now moving to the university with certification from the university. Renen you have done a comic for children to understand plasma. Do you want to disclose it at this time?

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

R: I will show the initial pictures as we are looking into having a comic and this is a draft to view how we go about this with children. There are a group of artists and book writers working with the foundation and they have decided to have a project of making a comic book.

K: Maybe others who are good with these things can join and assist the Keshe Foundation for Children so that children from the age get the right idea and don't have to change their minds halfway through their education that what they have been taught is something slightly different or had omissions that need to be filled in.

R: This is a book using patches showing the super hero of *Plasma Man*. (2.52.33 Minutes) and how people share the technology. It s a comic with instruction and a short story so that we can set different story books like this. Contact us at the Innovation Center if you can help build this type of educational material. We can also do actual printouts for this for schools or in your communities to be purchased from the Foundation. This will help increase the series of books like this regarding telling children about the technology. This is one of the things in the background already that we have set up for the comic sections and the children's section. Once we have approval from Mr. Keshe on how to proceed we will share the information and put it on the website of the Keshe Foundation.

K: We have a presentation by our people from the east who have a channel on Facebook and have up to 8000 viewers in a week. We would like to share the knowledge this couple has brought us.

R: Is that with Arvis and Liepe?

K: Yes, with the food.

R: There is the food one and we have the carbon stick technology.

K: Show both of them. Is that Arvis? He is on the panel that he is there so he can explain.

Arvis (A): I'm here.

R: I have the pdf of liquid plasma kitchen and the pdf for easy carbon stick technology and there is a video of GANS production of the carbon stick. (2.56.37 minutes).

K: please understand while Rick is setting up that from now on because we showed information from Paul from Togo whose paymaster we found out is in Antwerp how we allowed them to

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

come in and show how they are working. From now on anyone making a presentation will have to do this a couple of weeks before so that you can be vetted and then we explain with disclosure. People listen and believe you and this is how you lie on the internet. There are many scams put forth by those who call themselves the ‘victims of Keshe Foundation.’ We will from now on do a thorough examination of any video for every aspect and it has to pass security checking before we accept it. Make sure when you make these presentations that you don’t use anyone’s names or records so that they can be claimed on.

R: I’ll play the video. 2.58.39 minutes.

Clean water is like distilled water

Check your water with pH stick.

For better performance start with 7-8 pH water

Tip: You can use less salt. With salt content you can control your current!

K: The speed of going through this is very fast.

R: We can go through the pdf part by part where he explains it.

Carbon Stick Method:

Today after the 118th teaching we saw that the nano coating of copper is still a huge problem in the GANS production. It comes off the plate and people cannot produce good GANS. If you put the electrode plates outside the GANS jar and that takes a very long time to produce the GANS. We need something faster and more effective.

We are happy to share our new technology for GANS production in GANS of very high quality. It doesn’t matter what kind of GANS you produce—An, CO₂, Cu, Fe, or even food GANS. We have done a huge amount of experimenting with GANS and now we are ready to share our results with everyone earlier as preview. We wanted to share more, but we did not finish yet and we will upgrade this technology very soon. All was started some time ago, last October (2015), when we tried to understand what is the nano coating we use for any GANS production so far.

Our question was, “Where do we get Carbon for electrolysis with Fe and nano coated CU plate in slat water electrolysis?” Then we realized that black layer on Copper could be CuO

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

or it could be a Carbon layer that makes all process open. Mr. Keshe has told us that Nano coated copper has hexagonal structure, if we look from above. Check out information about hot alkaline (caustic soda) black oxide (CuO) process. The Cu surface coated in this way has to be treated with oil, wax or lacquer. After the finishing treatment, it gives not only more aesthetic appearance (matte, glossy, lustrous), but also improves corrosion resistance and anti-fiction properties of the nano coated material, but there is a problem if you put this nano coating in electrolysis.

***Nano coated Copper** according to Keshe Technologies is Copper Oxide (CuO black) layer on copper plate and carbon. But there still is a problem to control the GANS production process. It gave such different results, depending on temperature, type of salt, purity of materials, power used in electrolysis, etc. It is the reason that we see such different GANS produced by different people, because each of us uses slightly different materials in slightly different conditions. For example, iron oxide can change its color in different pH conditions and up to seven different colors could be obtained. They can change its metal oxide crystalline structure from simple structure in solid medium to very complex crystalline structure in alkaline.*

Copper oxide or black oxide has similar structure in Graphite. When you nano-coated your copper spirals with the torch, you clearly see rainbow colors showing up and becoming black very quickly. This property is also common for both Copper and Graphite crystals. It is one of the different forms of Carbon. Graphite crystals also have hexagonal structures or bee comb layers of hexagonal structures network. If you could achieve separating these graphite layers to one single layer, you can get superconductive, super resistant and at the same time super elastic material, Graphene Oxide (GO). We started to experimenting with replacing Nano coated Copper with a simple Carbon stick, so our surprise was great when we realized this works very nicely and gives more convenient results.

I asked Arvis, "How did you find out about this solution?" He smiled and said it was in front of my eyes all the time on my work table, but I as too blind to see it. I thought Carbon was the base of all known life on planet Earth and the fourth most abundant element in the Universe. It could be soft in pencil and hard in diamonds; carbon comes in several forms or isotopes (C14, carbon dioxide (CO₂) and in the air is an ordinary Carbon (C12). Carbon forms almost ten million different chemical compounds which means it makes up the majority of all chemical compounds.

It is exactly as Keshe told us. You don't need the copper wire, take it out. Now I can understand better what he meant by this. Suddenly I see huge how the applications are of the Keshe technologies in any aspect of human life. I understand that it is so wonderfully simple, easy to use for everybody around the world even if you are on the move. But are people ready to appreciate it? I could use this technology to feed my selfish EGO, but I felt it is more important

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

to come together and show all the experiences. We have to build together our foundation with equal opportunity for everyone. This is the beauty of it as Mr. Keshe says.

All of us are living in the duality of this world and it is our choice to decide which force we feed. We decided to publish this simple method for human use and send it as quickly and widely as possible. So please share, download, translate and make it available for everyone in the planet. Thank you Mr. Keshe for your knowledge you have given to all of us. (3.06.06 minutes).

How to make GANS using carbon sticks

Carbon sticks (pressed Graphite as Materials: Carbon sticks
Replacement of Nano coated Copper other plates (Cu Zn or Fe),
plate salt water, power supply,
alligator clips, jar

Set your electrolysis wherever you are

In this planet; for power supply you GANS production starts
Can us simple battery or solar panel immediately, it is the liquid
With carbon stick to the negative and vapor coming out of metal
Any materials to the positive. Plate and nice bubble (CO2)
coming out of the carbon stick.

GANS production starts immediately

And it is the liquid vapor coming out With this method you can
Of the metal plate and nice bubbles obtain different fractions of
(CO2) coming out of carbon stick. GANS. It is very easy to

can get very pure Separate them from one You
another. (3.08.47 minutes)

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

CO2 GANS.

We tested power supply settings

And these are the best- 0.50 01.1-

For most of the GANS. You need

very low amperage to make the

GANS in a jar. For CO2 production

bring it up to 0.6A and do not look

at the voltages. More amperage is

needed for the heavier Zinc Oxide

or other metal GANS that will be

produced.

For CO2 GANS reading it is very
alkaline pH 10-12.

For the best CH3 (Fe) GANS set
power up to 0.12 A. If you
want to catch red-orange iron
oxide (FeO3), or more power
will catch the FeO4 black iron

oxide. You can use each of

Them for different applications.

The orange part carries more

Oxygen. (3.10.07 minutes) and

use it for feeding. It also

contains CH3 metal group

Essential for living organisms

And contains more than 100

Amino acids and is lighter in

Mass; black is more dense and

And is good for use for
batteries.

Results from Copper, like from Iron, electrolysis could also be very variable depending on conditions, material and the medium used.

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

*Food GANS made with this method is very light, very energetic. You can feel the energy just by holding a jar in your hands. You can feel taste in your mouth and can to try to even smell it.
(3.11.13 minutes)*

GANS water is strong enough for different uses.

You can use the GANS in liquid state and make paste or make powder by drying it on a flat plate. We are still working on these techniques and will publish upgrades in the next few days and weeks. It could help a lot of people to get very fast and good results. We tried to keep it as simple as possible. Follow us on Liquid Plasma Feeding Facebook page and You Tube channel.

I hope other people also will share their experiences as soon as possible. All advanced GANS masters can find their own ways to upgrade this technology. For beginners in GANS production, we offer simple starter kit for symbolic contribution. It could help us a lot to move on in our research.

They have a kit that is available for 20 Euros. You can make a lot of GANS with this simple tools including carbon sticks, + 1 Cu strip + Cu GANS; carbon stick + Zn + ZNO + CO2 GANS; carbon stick + Fe + CH3 GANS.

(3.12.52 minutes).

A: This is the base. Start with this and you will get good quality GANS. Then we can learn how to use the liquid plasma. We will explain the different metals and nano coats. The nano coating will continue to oxidize. I think I will show more.

K: can you tell us in reading your procedure, all you do is get pencil?

A: No, in the pencil there is clay.

K: explain. Can you just buy a pencil and do this? I want you to explain to the public. So you put it in the container and do the rest of the procedure.

Renen, can you pick this up? If he is in the public domain you can use, and make it easy to put it in the GANS production with the others. Thank you for the knowledge: it is so simple and you

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

are getting a lot of traffic and people are understanding the easier way. Try to do it simpler, and don't add the music to it. If you will edit this, we can show it on the website.

A: We have done this already.

K: I hear you don't have a bedroom any more.

A: No, now it is the couch. (The bedroom is the research lab). See 3.16.39 minutes for pictures of the graphite plates. This is used in metallurgy.

R: Some people are using the rods.

Arman. 3.17.22 minutes for picture of his graphite.

A: polish the graphite.

K: If you give permission to the foundation we will put your information up as part of the blueprint so people can follow it. It is a beautiful way that you have shown this to us. You have a lot of people looking at the Facebook and are learning it.

A: Some people ask if I will show them how to build an emerald.

K: No problem, you can build anything you like. If you have the material you can build anything. In that bucket you can build the biggest diamond for the lady next to you. You just have to put the right patch around the bottle in which you are creating the CO₂. The way you separate the carbon from the plate and you will see diamonds of any size. You will be a bigger producer of diamonds than the Russian government. This is serious. Let us understand what happens with the carbon when it becomes a diamond. It is a carbon and if you give it the right environment it grows like popcorn. So think of a way to blow it the minute it comes off the plate before it oxidizes.

Every single atom on that plate can be whatever size of diamond that you would like. 20 carat, 10 carat. Whatever. The carbon comes from the center of the earth as atomic from high pressure and the position of it. Literally when it goes through the volcanic eruption it created nano atomic carbon. And then at a given structure it just pops open and becomes a diamond and it depends on what level the conversion of the popping comes. That determines the size of the diamond. You can produce as many diamonds there with out any temperature but with creating the right condition for it to pop. This is very easy. When the first person does it you will be laughing at how you can all do it.

A: I think it will be like 'we don't see what is front of me.'

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: Thank you for the knowledge; this solves the problems for Arman and the manufacturing group.

Arman: Yes, Mr. Keshe let me show you. I have some graphite here.

A: Be very careful it is very strong. (03.21.59 minutes). I can feel the energy just holding this plate above my hand (03.22.08 minutes).

Arman: I am sending this to Arizona.

A: They are not allowed on the plane from the mainland of China.

K: So they export it from China. Arvis can you explain what these carbons are?

A: It is graphite.

K: It is still a carbon. So explain since we can see you, how you do it and show us physically so people can follow you. Please keep the bedroom out of the action. Move on with your fantastic knowledge.

R: They also have a presentation called liquid plasma kitchen with his HcL and NaOH method for food GANS extraction. This is a pdf presentation.

A: This one is an old one.

Liquid Plasma Kitchen (Food GANS)

Arvis - Liepa food GANS extraction with Hcl/NaOH method inspired from M.T. Keshe and teaching of Keshe Foundation but modified for future experimentation. (03.25:26 minutes)

K: This is dated in May, 2016 and already it is outdated. He is moving too fast in the kitchen. Let us learn the basics.

R: reading from pdf:

What is it?

Arvis Liepe is follower of Keshe Foundation Teaching from year 2015 and he says that this technology resonates perfectly with his own life experience. One day I will tell you his story also. He feels like he is in perfect connection with Keshe Foundation people and is trying to apply the

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

technologies in his own life. He was one of the first persons who decided to make Keshe pain pens with crystals in France at the end of October 2015.

He started with pain pen in rosewood and made several Magrav for his home experimenting with plasma reactor. You know, our home is so plasmatic already now that people can't lie in our home. It brings peace and calm, when you feel this energy for the first time; it is like getting a 6th sense in life. He is the only Keshe Foundation council for Latvian language and he gives his contribution also for English and French speaking groups.

Today we decided to share our own Liquid Plasma Food Kitchen method, based on Keshe Technologies but with some modifications.

Arvis said, "I usually go my own way; I am not a good student. I am always asking too many questions" Let's look at digestion process in our body and try to get essence out from it.

Liquid Plasma Food GANS

I love food, its smell and taste and colors and all my friends know how important quality of food is to me. I still very strongly believe that our bodies need salt and sugar, all depends on how much. We also need fats, especially as we are living and having to be prepared to live in Cold Climate. Water is important and your intention for life is more important than ever before. But sometimes he thinks: it would be very good to replace cooking and eating with pure energy; imagine how much time, money and space Food takes in our lives. How much time and energy do we spend to move food through our body? Is it possible?

Let's try together. Materials: You can find them in every home: Hydrochloric Acid HCl 23%; Caustic soda (NaOH 100%); Quite huge amount of CO2 GANS water (several liters); Heat resistant pyrex bowl; heat resistant jar or bottle; Fine kitchen strainer; Electric heater or other pulsating devices. I used Lab Hot Plate with Magnetic Stirrer (baby bottle heater also could be used); Lot of distillate water for your CO2 GANS solution, and a little bit of salt and sugar. Other conditions: well-ventilated room or open area, mask, gloves, safety glasses, free day to do it, a little bit of your favorite food. Take account that you are dealing with strong chemicals so take all precautions.

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

I don't suggest that you mix different foods; I prefer to make a set of them and then choose what to use depending from our needs and desires. If you mix all together you get grey colored liquid plasma food, not very attractive looking. I feel like an artist and liquid plasma kitchen is an art. To create an artwork you can't mix all the colors together. You have to play with tones, shadows and light. We have four main tastes: sweet, bitter, salt and acid. To get a right combination to feed your brain with these tastes you have to apply the same principle like in the kitchen. You combine sweet with acid, bitter with acid, bitter with salt, salt with sweet etc. and use different flavors spices. Do not forget your emotional part is very important, love what you do. It is the same in the traditional kitchen, if you don't like cooking how could you make good food?

Liquid Plasma HCl/NaOH method by Arvis Liepa

You know, I am a molecular biologist and I was really skeptical about the Liquid Plasma Kitchen. I am a very grounded person. Arvis say: You are my EARTH like mostly women do. He is my AIR and an inspiration and we both love FIRE in action. I am looking always logical explanation, essence of Truth. I made my first Food GANS when Arvis was at Dubai conference. I wasn't satisfied at all with my result. After Dubai Arvis was so enthusiastic and said we are missing something. So we started to ask many questions around, but no clear answers were found. So we put Feminine and Male energy, Knowledge and Creativity together to get the essence out from Food GANS.

I was thinking "We have a constant electrolyte balance between the plasma compartment, between extra cellular and intracellular medium during—passages of solines we always have ALMOST the same schemic: plasma →interstitial medium →cell liquid and vice versa. There are exceptions—see the red blood cells, direct contact with the plasma environment (hence their specific membrane characteristics).

Yes, Arivs pointed at me and said, "Let's go back to school and study digestion system step by step." With this method we tried to replicate the natural human digestive system. We just our digestion with the teeth (blender); in this stage the pH is neutral to facilitate the movement of the food into the stomach. In the mouth some types of sugars start to decompose.

In the stomach is a very high level acid medium (mainly HCl with pH1) is added to decompose the food mash in temperature of 37C; proteins are decomposed to amino acids. Digestion

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

process in your stomach could take up to 2h all depending on you meal (vegetables decompose fast, meats slower).

Then acidic substance from the stomach goes into intestines where it is a completely different medium with very strong alkaline (intestinal juice, pancreatic juice, bile) all nutrition particles are taken into the intestines. There a huge amount of water involved (your body is 72% water). You take only what you need; all other will be evacuated.

Maybe sometimes it is better not to learn so much, but just keep it simple.

Let's start with chewing: Blend your favorite food in a bowl using a blender.

Add the same amount of HCl (in this case 23% HCl is used), like your stomach does. Usually digestive problems start when your stomach does not have enough HCl for food decomposition. I also added a little bit of sugar for more energetic value of the final product. Put your jar with food + HCl in heat resistant bowl with CO2 GANS water (plasmatic medium) and keep heating at around 37C for some hours. Heat is the presence of the Fire energy and is well known as a main source of organic decomposition, to get atomic level substances. You can do this in the hot summer sun. (03.34.54 minutes).

When liquid has become dark brown, approximately after 2 to 3 hours, you have to neutralize the acid. Add a touch of salt (NaCCL) and then add little by little caustic (NaOH), do it very slowly because reaction could be instantaneuous. Keep stirring (do not use any spoon; GANS can attract any other information from the field, until caustic doesn't react any more with acid. Then add distilled water. So you have made very strong salt (NaCl) solution. Let it settle for 2-3 hours on electric heater. For you personal safety, just do it in very well ventilated room, open window or outside in your garden, etc. Remember you are dealing with very strong chemicals. You have to add CO2 GANS water and filter it with fine kitchen strainer. For further process, use any filtered liquid. Now it is time to wash it with CO2 GANS water, liquid becomes a little bit foggy and very light in substance. Let it settle down, wash it again, let it settle down and do this several times until you get transparent water and very nice layer of liquid plasma food. With this process you wash out the salt from the liquid. You get very homogeneous solution.

Now put it in a larger jar and add CO2 water and you will the solution becoming more cloudy. Slowly fine particles also become visible. Let it settle down for some time and you will see the first GANS on the bottom of the jar. Wash it again with CO2 water for several times. I let them settle down in sunlight for some time.

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Repeat the process until you get transparent water on the top and nice airy GANS substance on the bottom. You have to wash out mostly all salt. It has really blown my mind; it is so nice, delicate and looks like it responds to your thoughts. Some more pictures. We will keep you updated on specific liquid plasma kitchen GANS in Youtube and Facebook, etc. It looks so slight, delicate...(3.37.47 minutes).

K: This is fantastic what we have seen. When you come to the point of understanding we add to the knowledge. Life on this planet was created as you see. Vegetation is a part of the structure of making the horizontal people. In a way the vegetation created and digested and produced the first GANS. We came in the next step of life with the horizontal ones, the red blood cells and we are human beings. We have seen that this is not coincidental. Jacky works with a lot of things in the background. We have reached the point to understand the beginning of creation. You show how the GANS was made. I let Jacky show what he has and then I will explain how life was created on this planet. Somehow all of this is coming together. This is the right time for man to understand how he was created on this planet—the origin of life. Jacky could you share with us? And thank you Arvis for sharing. When you have more, don't put any music on it. Thank you for your contribution to the knowledge.

A: This is crucial to understand.

K: What is the white one? This is the cheese GANS. We have made of ginger that is eggshell white in color. Thank you for sharing knowledge with us. We respect your knowledge and it will be interesting what comes next and it may shock you. I asked Jacky to show you what he has been working on. You brought the knowledge and you used what Jacky is going to show us. And I will show you how we were created. It's a very natural process and following your teaching we extend the knowledge. I had not seen your program. So you will understand how simply life is created. Jacky, join us and show us. Thank you again and I hope your 'cooking' tastes as good as it looks. You have a gorgeous smile. Thank you again.

Jacky (J): I want to start from the beginning...it's a long way. This is the beginning of the story. This goes back to when you spoke of the diamonds and the crystals. At that time I realized we could create new kinds of matters. And soon I understand that I don't want to take diamonds and gold into space. I am most interested with life and I researched on how to make things differently. I started with the eggs and showed you the eggs. (3.44.32 minutes). When you speak on the kid's workshop the difference was the egg was with the shell. When it is without the shell

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

it is the matter state. I started playing with the plasma and looking at it in different ways to understand it. I made some incredible experiments with the egg. This is the yolk of the egg (3.45.04 minutes). I realized the combination of the full egg that was in a soft matter. Then I experimented with the egg white. Then I started to play with different GANS (3.45.25 minutes). I made a lot of different GANS of food.

K: This looks like a jam shop, but it's a GANS jam shop.

J: The feeding system was working for me and I have been on it for 4 months. I eat a few solid foods. But with all the experimentation I made some GANS with 2 small copper wire and nano-coated copper wire. (3.46.32 minutes). I made some GANS and at that stage I said I keep the energy. I take the energy of the GANS and now I will try to release it. I want to show the release of the energy of the GANS. (3.46.59 minutes). I put the acid solution on the GANS and suddenly all the GANS took on a shape.

K: Go back again with exactly what you did.

J: You see the beginning and the wires.

K: That is the copper wire and the nano coated wire.

J: There is the current that gave me this.

K: How long did you keep the current going? (3.47.47 minutes).

J: One or two minutes and I did this 5 or 6 times at 12 volt. This is when I put the acid into the GANS. When all the acid was in the GANS there is a final liquid (3.48.23 minutes). It is a green liquid. I understand at this point what you say about the fields. I remember different things you have spoken about in creating life with iron, magnesium, and more. So added some magnesium and some zinc and after a few times it started producing shapes in the liquid. (3.49.10 minutes).

K: Is the electricity still connected.

J: No it was not.

K: But you see a heartbeat on your plate.

J: It's incredibly odd; this is where I discovered how much energy we keep in our bucket. The brown matter is a free matter and continued growing and growing. You can see what it is becoming. There is no electricity and this done in 24 hours. (3.49.57 minutes). This is what you get in your bucket. I am using a zinc plate. The zinc releases so much energy.

Arman: Do you have a caustic in your solution?

J: No. It is the acid.

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Arman: What is your solution?

K: Did you tell him you put other things in there?

J: I put magnesium, sugar GANS, special salt that I get with the evaporation of my old GANS, and it is like GANS salt.

Arman: And you connect that on the top of the container?

J: Yes. I put some iron on the liquid plasma of iron and a little bit of GANS of bone marrow and a little bit of GANS of protein.

K: everything is just a 'little bit' but how far is a little bit? Do you want to show us more?

J: This is another view of it. (3.51.49 minutes).

Arvis: Mr. Keshe, do you remember when I did this two years ago and it blew up?

K: This is not creating oxygen. You see this is a pattern and you see the jars underneath and around it? What we created is like the womb of the mother. We are surrounding the box with different GANS. We are surrounding the box with the environment because this is how life is started. If you allow this to carry on you will most probably end up with 2 things. I have asked Jacky to do another using iron instead of magnesium which creates growth. This and fat will create the green. We start seeing the structure of life and this is how life on this planet started. It started when the acidity of the planet balanced with the salt that was released with it, with the strike of the lightening that happens on most of the planet. ...people have to realize that when you are in space there are environments with heavy lightening. This is the planet upon which life shall start.

K: It is the release of energy. That is why I asked Jacky how long he used the volts...it was a minute with one volt or 2 volts. But that is all it is. Half of the condition of the creation of life is the release of energy that it can start. It is like taking a match to a fire. You have magnesium and every other element to create a vertical entity. And then with the one with iron in it you start the horizontal. But we seek the creation of wide things. The ground in the condition it was created becomes the trunk of the tree. In the man the brown became the skin of the man in Africa. Look at the color in Jacky's experiment. This is not the first time, because Jacky showed me this and now you understand the process of life. This is how life is started—gases coming in touch with metals in an acidic environment of the planet and then being there for a while and then the change of the condition when you bring in the salt, the acid and a strike of lightening and with that right condition, life begins. Then you have the conversion of the energy from acidic to

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

alkaline creates the first process of the current flow. Then the carbon and the plasma of the GANS creates the connection and that is how everything started life on this planet.

K: If we didn't have the acidic environment from the beginning and the salt environment or there was a reverse of the two, there would have been a different combination. At a point when there was a balance with acidic and alkaline and it doesn't matter which one came first, the second with the delay of the energy that could start the process and in most cases it is the lightening. It has started and it will not stop. It has everything that it needs which includes the salinity in the water that is there. (3.56.14 minutes). It will grow its own brain, the legs, and the arms in the water which is there. Now you can see if any of you understood this process and the process of our friends in Latvia who created the food GANS with the right condition you. You shall create a living, inter-dimensional being. There is no other way; the only thing is that now because you have a bucket and you have a control, you speed it up. But when it finishes if you have the time in your time to finish it, it will have legs, fins, the lungs, the stomach, a heart, a brain and everything else because it is a natural process. Don't forget that once the process starts, you are in the room and you give the information to make a copy of a being.

K: For a long time I have been trying to replicate this and haven't managed because I never understood the principle behind it. The acidic and the alkaline and the transfer of energy across, if you put the right elements in it now you understand the possibilities and the creation of GANS. You have created life. In deep space you decide to have a steak, if you still have a mouth, you can make your own steak. And now you understand how to mix it. Do you see the reason I asked Jacky to put the bottles underneath? (3.58 minutes). I did this because like the womb of the mother you still need to receive some of the energy of the planet plus what you add to it. Any of you, if you understood the last section and this section, can create any animal that you like depending on the salinity and depending on the process you can create a fish, red meat, white meat or even chicken. It is the process. The calcium gives the beginning structure. The radiation from the fields of the plasma is to support life. If you change the combination of the GANS beneath the bucket you will get a different animal because now you are introducing different energy into the system. Test this and come to us in a few weeks time and you will say there are things moving in my water. You have become the creator of new life.

K: That is how simply life started on this planet. There is all the mayhem behind it and the truth is, *is there a God or has man become one of the freak accidents of science of the mixture of the chemistry of this planet? I am of the school of thought of the second. There is no God, but it is the god that means the evolution of the release of original fields that have led to the creation of*

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

being different conditions anywhere across the universe. (3.59.50 minutes). When you see part of the field of the originality if we call the original field the creator, then yes there is a God because he created the original fields. The release of the origin of the fields of the plasma you call the origin. Choose another name for it, the Creator, God or whatever. (4.00.14 minutes.)

K: Was there an intention to make man or was man a by-product of the interaction of the fields? All of you now understand the interaction between the ratio of the salt, acidity and the salinity gives you the kind of life that you like. If you understand this you understand why man can breathe out of the water and if you change slightly by a factor in the salinity of the body of the man, then man can swim any time, anywhere on this planet. It is the ratio that has made the difference.

K: Thank you Jacky. Do you have the second one, the white one with the iron?

J: Yes I am working on it. I have a different set up and it's a totally different reaction and I try to master the process.

K: Thank you very much for sharing your knowledge.

K: We meet on Tuesday with the public teaching. After the 15th of July the teaching will carry on to the end of July and I won't be teaching any more. Tuesday afternoon sessions will be closed when we are not there. The doctor's and agricultural teachings will carry on. The doctors have learned how to walk. Let's see how they do. I will be in the background for help but there is a lot of development that needs to be carried out. Don't forget we announced the beginning of the Keshe Power Magrav unit as a generator and will be delivered in 90 days. There is a limit to the numbers and there will be 12K to 13K and then we have to adjust. You will receive the Magrav unit with the C-certification. We have a number of people who would like to pay for the Mozhans and they want to pay cash. You have to send the finances to the account of the foundation and then you go through the security clearance and we will decide when to close this. Then we enter the next phase of teaching. We start the Mozhan much earlier than announced early. We will not allow people to come in half way into the teaching. We start teaching on the internet to set you put. You want to be ready for the flight systems, take off and landing, before September.

Transcript from 119th Knowledge Seekers Workshop held June 23, 2016

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: We had many people up last week and we are the passengers of earth. If you are joining us on the Mozhan please complete as soon as you can. It has to come by bank transfer. We have seen a number of fake accounts that call themselves Mozhans. These are all imposters. The whole thing sits with the Keshe Foundation. There are people selling products that are not produced by the Keshe Foundation. Any distributor who joins us and is selling any product that is not carrying the certification of the Keshe Foundation, please do not buy from these people there are fakes and they use our boxes with the Italian numbers on them.

K: You can go to the website and purchase the generator. If you joined for the eye drops and the rest, please respond to your email so we can start shipping. We will see what the next steps are. We will announce further developments from the doctors as you see with the cancers. We are now looking for those who want to be tested for cancer and work with the doctors. Build the systems for the doctors so you can teach them. we put a value on this for development costs and we are looking into that when the doctors agree to the value of the process then we will announce it and people can come in. we will start building centers for cancer in the next two months and you can fly where there are not restrictions on the health applications for the man.

K: You wait until I am in China; if you can come to China or Africa we will open the health centers where you can come in and go through the process and go back. This brings a huge amount of wealth to those nations and at the same time brings a huge amount of knowledge to us as the foundation that we can process it. I have committed this foundation to correctness. We try to have you become part of the technology and development and not just sit here. We teach you when you come as a patient so you can go back and teach others. We will announce a program for the cancer and there will be a fee and we will consult with the doctors. We have managed to defeat cancer for the first time. We will announce this in the next week for people who can plan centers and be part of the foundation. We are looking also regarding the 20,000 square meters of land near Baleta to run tests for development of the food. If you are an agriculturist or you want to test contact to us. The land was donated to the foundation.

K: If you want to try different types of GANS and see the effect, the foundation pays for the production of food. My first thing will be to produce non-gmo seeds. I want to see how much we can modify using the GANS. The information will be free.

K: I thank and congratulate all the Keshe Foundation groups. We have broken one of the biggest pedophile rings and put on the leaders in prison and our children are safer. Now we have to work

to the put the rest of them away. We know the control of the system comes from Red Circle in Belgium. Now we know he is involved in two murders, attempted murder of 2 scientists and exposure to a child. He is responsible for the murder of 2 Moroccan girls and this is where Hope operates from. They were killed under contract.

K: please look after your children. These are wolves in the clothing of man. There is one on the Tuesday teaching pretending to be a teenager and he is a 47 year old man in Austria. Go to Alan Sterling Facebook and you will see him very easily. We have to do one thing; we have to show these people their place is with Alan Sterling (in prison). This is where they belong. We have filed and we carry on to bring Red Circle to a court of Justice now that we have shown correctly (with Alan Sterling). A murderer should not be running his shop in Europe because he is protected by the murderers. It is important; this is our children. Keshe Foundation supporters have set up a website where you can enter the names of children who are missing. Share the knowledge with us of any scientists you know have been murdered—where were they. We will build a structure and the international security is asking us to help them.

K: You have seen Suzanne brother living in Holland and having a ‘safe house’ and they have a ‘charity’ for children called “Hope.” There is another group running a ‘charity’ out of Tunisia. You can see the similarity. We will see the release of their system in the newspaper and all the data which has been collected. You will understand how they all operate under “Hope” which is supposed to help orphans and sick children. You have seen it. At the beginning they speak to each other as though they don’t know each other, but they have been operating underneath. Check into the brother of Suzanne in Holland and the hiding house for the children they are trafficking. These have been found and the information will be released in the newspapers. The same with False Hope in Morocco. She is soon to be arrested as happened with Mr. Sterling. The one at the top of the nest in Antwerp overseeing everything, your card is up. You were involved with the murder of 2 Moroccan children.

K: please join us to protect and release the names of children and scientists who have gone missing. This will all be publicized through appropriate channels about the rapists and murderers of children and scientists. They have one place to go and that is with a life sentence like Mr. Alan Sterling. Please don’t punish or prevent your children from speaking out.

K: Thank you for today. We have shown we deliver correctly and it is our job to protect society and join the universal community as peaceful people.

Thank you very much for today.

K: The Magrav generator is valued at 1800 plus tax and shipping. Now that we have seen it, there are other uses.

R: This concludes the 119th Knowledge Seekers, June 23, 2016.
