Note: The last 1.5 hours of KSW 120 was a disclosure by Mr. Keshe where he presented his personal history and exposed the Red Circle. The first part containing the KSW is in a separate transcript document.

Keshe (K): KfSSi disclosure of MT Keshe and how the Keshe Foundation was born and how it has been abused and misused. This morning we heard from Mr. Amini that he received a telephone call from what we call ‘terrorist of the internet’ Suzanne that she wants to ‘destroy’ because these people are committed. There were emails to the others to give their pictures too. This is a pattern and we are establishing the pattern. The most important thing is to establish the pattern and then you understand the work of these people. We don’t accuse; we don’t make accusations. We deliver solid information. We might run for an hour or two today but this is important.

K: This is about MT Keshe. I was born in Iran in (a) normal family. My father was part of Phillips International in the X-ray division. I was introduced to the world of medicine from a young age from going around with my father to the hospitals when machines were delivered. I was around the world of radiation the day I opened my eyes. This was through the fields of X-rays, gamma rays and everything else. At the age of 8 or 9, when I was watching man trying to go to the moon, things did not make sense to me. So many times I watched and thought *this is not the way to go to the moon*. I remember the summertime in July watching the moon because I knew a couple of us (humans) had made it to the moon in a box, Apollo, to go to the moon.

K: I always had a dream and I could understand the work of the radiation, that there was another way to do it. One day when I was with my father, I lay under the X-ray machine, and my father said, “*this thing is going to go through*”. I said to him that if it could go through that entire table and through me, then it has a different meaning and it has to be different. I spent all my time in my life in a very conservative way; a very open way developing an understanding of the cosmos. By the age of 12 or 13, I knew I wanted to understand more about the work of the universe. The only passage through it was through the nuclear industry. By the age of 15 to 16 I came to

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

England. I graduated from primary college by the age of 22 as a nuclear engineer specializing in reactor technology.

K: When I went to the university for the interview, I explained to my professor that I wanted the seat at the university. At that time, it was very difficult to get into the university to become a nuclear engineer or physicist. There was huge competition. 13 or 14 people a year were graduated by the university. I was the only one that (they) would every few years train as the reactor controller. I was under the supervision of Dr. Shogan (?) who was over most of the nuclear reactor controllers. He had his own nuclear reactor in the basement of the university, Queen Mary College, and then moved it somewhere else nearby. He trained me well but he understood that I was not happy with my education because this was not getting my questions to him answered.

K: Dr. S. said to me and had a meeting with the other professors and he told me to get my degree, walk out and prove what I was talking about. I walked out. In 1981 they just got me through my degree. I didn't even want to finish and they convinced me that they got me through the exams and my knowledge was beyond what they understood. I sat for 2 or 3 papers to get enough marks for 2 or 3 years and they would see that I got my degree. I agreed. I came out of the university and it was impossible to carry on and do the work where you knew you could not work in the society, in the government structure where you are working.

K: In my time of education, I worked for British Nuclear Fuel by recommendation from those at Queen Mary College in one of the most secret (sector of the) English nuclear industry. I walked in the cow shed...you hear the stories. After about 8 months coming in as a fresh boy, I was given an individual office because I understood too much. I would not accept signing (the) secret act with the British government. They said there were two choices: I sign and I can stay; I don't sign and I leave. I left. There should be no super-secret knowledge and I say that in my ethos. Knowledge should be free. In that time, I was told by British Intelligence that when I leave the nuclear industry, the way I understood it, I would never get a job anywhere in the nuclear industry unless I work with the British government the way I was working. I refused.

K: I entered private business and I ran multi-national offices in Africa, Asia, and Europe individually without support from anyone. I built a very wealthy structure for myself. I was working very little and spending a lot of time on research. I have letters that show on June 14,

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

1985 from NASA confirming the receipt of the newest space technology not using fuel and confirming they received it and they are considering. In that process, I carried on with my development. There was something that was not correct in the whole structure. How come we did not understand the gravity? I have drawn, designed many reactors; I was trained in reactors. These were physical reactors and nothing was theoretical. I built most of these reactors with my own hands. And then it came to the point in early 2000 I could see the gravitational field; it was so simple. Why were we looking so far away from it?

K: I went in 2001 and 2002 back to the British Nuclear Fuel and said I wanted access to a centrifuge and nuclear material. And as a nuclear physicist, it was my right. Being a British resident in 2003 and 2004, we came to an agreement to meet and I met at the Military Museum in Manchester in a very small office with 4 or 5 people. We couldn't even fit in there. I said to the officer from British Nuclear, "*why are we here in a military British museum?*" I knew where (the) headquarters is, I used to work there. He said that no, it was where we were meeting. Immediately, a man in the room introduced himself to me and said, "*Mehran we have been waiting for you for 20 years. We knew you would come back. Welcome home*". I said, "*there is no home*". I signed a confidential agreement with a Minister of Defense, not Ministry of Defense.

K: It was at such a high level that it could not be leaked to the Ministry and be discovered. In that process with British Nuclear I will not move my technology into the military but British Defense technology needed the technology because it would have given them the upper hand worldwide if they could deliver (a) system with gravity. We negotiated and I was not happy because I wanted a guarantee from the British structure. I know MI5 and MI6 very well. In the business part (of my life), I had collaborated with MI5 and MI6 in a couple of situations.

K: Then I realized later on how they allowed me to be so open and work with security services in my business life. They were watching me. They were part of me and they could see my communications on a regular basis with NASA. They could see I was constantly talking to NASA. So they made it comfortable for me to become extremely rich working through the British system as a foreigner for different applications in security and disposal of legal materials that the British government confiscated and were destroying. I showed them that they were using the wealth of the nation, so let's use it and we can make it into a multi-billion organization for the British government.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: At that point, I was unprepared to work for the ministry of Defense. I wanted guarantees that my knowledge would only be used for peaceful applications. In that process, they invited me to impress me to what is known as the Farmborough Fair. There is one of these events in Paris and one in Farmborough every year. The military aircrafts are shown in each city and huge contracts for aircraft and military hardware are sold. The first 2 or 3 days of this show is closed to the public and only for ministers, presidents and the rest who come to buy arms. I received a call from the Ministry of Defense from the guy we call the 'handler'. He said, *Mehran we are inviting you to Farmborough*. I told him I did not want or need to go to Farmborough. He said *no, come to it, you will see and it will open your eyes to what can be done*.

K: I went to Farmborough with my wife. In Farmborough something strange happened. I went in as a simple business man to meet everybody and I walked into a huge building that belonged to Lockheed Martin. I had been to many shows for 10 to 20 years. You walk in and you can talk to anybody. I walked to the receptionist and said I would like to discuss the matter of the development of new technology in which the missiles become useless. The lady said to wait; she would come back. I waited and a very short man came. I explained to him that I had a technology I wanted to discuss and I was talking to the Minister of Defense. I would like to know if we could collaborate to develop it further. He told me to come back at 12 o'clock. I said *no problem*.

K: I went for a walk and came back at 12 o'clock to keep my appointment. There was nobody in the building or around the building; the whole place was empty and the door was open. I walked in and started looking. They were showing the latest aircraft, the F18s which goes up vertically. A man came up and touched me on the shoulder and asked me if I would like to walk on the other side of the grass. This side of the grass is American territory and the other side of the grass is British territory. We want to speak to you. I told them I had nothing to say. There were two of them and he showed me a card. He was MI5 and the other guy was MI6, British Secret Service. I asked him what the problem was. They said they could not speak that I would have to go outside on the balcony. If you go to Farmborough you know the building very well.

K: When we walked outside he told me that I was under arrest for selling intellectual rights. They were my intellectual rights. He told me that I was offering Americans technology that belongs to Britain. I said, *"Bullshit, I am Iranian and my technology belongs to my government. Secondly, I am working with the British to develop peaceful applications"*. The discussion went on and they cornered me on the long corner of the balcony. At that moment I had my phone in

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

my hand (talking to) who was virtually the first in line to the Minister of Defense. I said to him that he set me up. He denied it. I said that he had brought me there to take me down for selling my own technology and he didn't even know what was inside of it. And they were forcing me with this. He answered that it was a mistake. I said if it was a mistake, there were 4 or 5 black cars and loads of police and the whole area was cleaned out as though I was a terrorist. I told him I was walking out and they would not get anything from me.

K: There was a conversation with the other two on their mobile phones. This went on for about 20 minutes. I am shouting and literally saying whatever I like to my handler with the Ministry of Defense, the right hand man of the Minister. At that moment the talk with MI6 and M15 and he said, I can hear the voice of a woman talked to these guys who said, "*we have made a mistake. Back off*". I said, "*you made a mistake, not me*". They said that they know him and Minister of Defense was talking to MI5 and MI6 saying that he is one of us and you made a mistake. At that time the situation was out of control, there was so much going on. They wanted a guarantee from me that I would not take my technology to Iran. I told them I would give them no guarantee; I was Iranian citizen and I carried a national ID for Britain. They refused to let me go from the balcony until I guaranteed I would not go to Iran. I told them there was no guarantee. I walk out of this into Iran; you have made a huge mistake.

K: At this moment it got too confusing. MI5 and MI6 were literally shitting in their pants because they were going to lose a scientist. They said, "*okay it was a mistake; let's talk, and go back to Manchester and officers will talk with you. We can sort it out and you can talk to the Americans*". Everything disappeared...the cars, the police. If you go to Lockheed Martin in Farmborough, the balcony has a door with a column in front of it and it's a swinging door. They said I could talk to the Americans. I came to that area by the door and stood there with Caroline. Both sides were locked by FBI and CIA and the short man appeared. He said to go back to Manchester and they would call me within 14 days from Washington. "*We are prepared to negotiate for Lockheed Martin for the development of the technology. Do not stay here, walk out; we agreed with the British*". So now I knew that they were sharing the technology.

K: I told them that I was going home and not dealing with anything. I will keep the technology to develop it and one day I will use it. There was a lot of discussion and apologies. I walked back. This place of Lockheed Martin was at one end of the runway and if you have been there you have seen that. It is about 2 or 3 kilometers; the length of the runway. Caroline joined me later because she had the children at the hotel. She was given clearance as the wife of a scientist to

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

come into the secret area to see the technology by the British as they were showing us how much they trusted us. We had green pass visa and Caroline had the same, as they knew, we were always together.

K: When we were walking back I said to Caroline that I had wasted my life by staying in Britain. I am going back home and I will take the technology to Iran as they are a peaceful people and we can develop it. She said, "*Mehran, let me talk. On the way I passed a Belgian section here so let me talk to the (?)*". And I said, "*no*". Carline went to talk to them and came back and said they want to talk to me and I said no problem that I would not talk; I would listen. We walked back almost to Lockheed Martin to the Belgian Air Force Show offices. They said that an ambassador from London had been called in and I could not talk to them until the ambassador arrives. He arrived while they negotiated. They said that if we went to Belgium they would give you everything you want in Belgium since your wife is Belgian. We will not use the technology for military application. The name of the gentleman is all over the internet and you know who he is.

K: Caroline and I moved back to Belgium in September because we already had a home there. We left our home in England and met with this man. And he took us to University of Brussels. They said the scientists at the university have to confirm the discovery. For 7 months, every couple of weeks they sent me more questions and I answered more thinking that I was working in the framework of the structure. Then this was handled by a professor who used to be head of the University. He said that he would give me some advice.

K: They brought nuclear physicists to understand if I had discovered the gravity. They brought one of the most genius doctors that I know, Dr. Deare who worked for the British Nuclear in the military side in England. Dr. Deare came to Belgium to talk to me as part of the final decision and the discussion was set for 1.5 hours. She got up after 10 minutes and said that I had discovered gravity and to accept all of my technology. Then they said to me that they were going to write a report. I waited from March and having been there since September I asked what happened to the report and I was told it had been sent to the government.

K: I received the report and then the people who brought me in said I had to speak to a certain office within 2 days after I received the papers. I was told a company had been set up to look after the technology and it was the biggest company in space technology. You know the name. The name starts with V. We are not making any accusations but they came to destroy our website

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

as Alan Sterling did. In the website for Keshe Foundation, all these documents will be released so you can see it step by step. (When) I met (them), they took me to the company and I sat from March to July and we went through the step-by-step design of the first of what we called gravitational magnetical system. The scientists of the company sat every day or two that we met and at the end of the meeting they signed that this was the information that was transferred to them. So this is how the knowledge was transferred and it was obvious.

K: Then a very strange thing happened. At the end of the discussions they told me that the Prince of Belgium was coming to the company; which was very unusual. Later on we found out that they were trying to prove to the Belgium monarchy that they had found the gravitational system and the prince wanted to see it himself before approving. We agreed to sign a contract to develop the first magnetic gravitational system. To me, you have seen these reactors here, it should be a maximum of 18,000 and I saw a figure asking the Belgian government for 1.7 million. I asked them what was going on; they were robbing their own nation. They answered, “*no (and) that this was the way it was done*”. I said I had a problem with that and I could not agree with it. We were negotiating and I went to group and I said I needed a lawyer who could understand my contract because it was not correct in some way.

K: I was sent by them to a so-called lawyer. We call him “B”. I walked into his office and there he was (with) his secretary and he opened the door. Things did not add up because when I was with the V. Company they always said they had control with the Belgian government and there was a man inside who could do everything. The secretary opened the door and introduced me to Mr. B. I told him I had a question before we started. I had the contract from the V. Company in my hand. I asked if he had written the contract. He said, ‘*maybe*’. I asked him if he knew it was illegal for him to negotiate the contract with the other party and then sign the contract. I said I was walking out that this was a deception and he was acting criminally. He told me to sit down. He started writing pieces of paper he gave to Caroline with four names on it. He said that if I did not sign the contract, I would be killed by these companies. Caroline and I looked at the paper. And you don’t want to know the names of the ‘kings’; you go to their petrol stations every day. The petroleum groups and military groups were among the four he threatened would kill me.

K: I said to him I would take a walk and he could take a hike. You cannot write a contract and mess with the other side. I know enough about international law. Later on we found out that this Mr. B. is a very key man in a lot of things I will explain. He is not a lawyer; he was disbarred for deception and crooked jobs by the Belgian courts. He could never stand as a lawyer. Even today

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

he is writing and practicing when he is barred from everything. This man played a heavy game in the life of the Keshe Foundation. Most of you understand. At this point, when I was in Belgium, we had friends and we tried to find a way to bring the technology into the open. We call him Olivier and there was another one who was a notary. We started the Keshe Foundation and called it Keshe Technology. If you go on the website, you will find it.

K: About that time, Olivier was on holiday and said he found a company that could do angel financing. And I said, *“no problem. We will go to see them”*. He came back from the holiday and we went to see angel financing. And we call it 3 because it is part of the structure later on. We started negotiating with these 3 people that we met. They were 3 directors of this company that were belonging and working as the financial arm of a major ____ company. We call it “C”. So C is financing B, and 3 finances unknown to everybody, B was the so-called inner circle lawyer of B. This Mr. B was (in the) inner circle of the V. This man sits as a board member of every entity and he is not a lawyer, he is a criminal. And when the new technology appears, he decides how they are going to handle it and how they are going to share the benefits of the technology.

K: In talking to “C” and then testing the first parachute... I gave it to them, the first time we knew. (See the picture of the water bottle at 00:28.25 minutes). They tested it. They said to me that it was impossible... nano-layers, graphite and graphene without nano-materials. They said they would call me a terrorist unless I gave them the technology. I told them to take a hike. So Mr. B not being able to get the technology for a second time went with his connection to the head of the Asian Nation and created a program called *“Keshe Foundation is a terrorist organization because he is producing grapheme and graphite”*. And all of you do this nowadays with the caustic. They said this was terrorism. They were advanced in nanotechnology and had spent millions on it and now nanotechnology was made with a few cents.

K: In that meeting, company “3” had 3 people. One of them said he paid for the patent to be written. And they had already paid 3,500 Euro and they had the receipts for them. They paid to one of top patent writing companies in Belgium and they told them after 2 or 3 months that it was so complicated, *“we cannot do this”*. The person from “3” said they asked for their money back and the patent company said no because they had reviewed the work. It was impossible and they would keep the money. So one of the directors of 3 company said he knows a man who can write your patent and we said, *“no problem but we had to see everything”*. Caroline and I put several tables together at home with all my paperwork to prove that the technology is correct.

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

(00:30.17)

K: This man walked into my house, looked at everything, and they talked to each other in Flemish which I don't understand. The man from here, we call "G" (00:30.35). He said they paid for the patent. This man we now know as Red Circle who will write the patent. He was in my house and he saw all my research because I thought I was working with trustworthy people. But now they knew and they stole the technology with the V company, but they couldn't see the key. So the pattern was that they would get the right patent for this and then we will get the information that they wanted. So "G" paid the Red Circle man for writing the patent. This is Peter robbing to pay Paul...they steal from each other but work together.

K: So the Red Circle man entered into the cycle of the Keshe Foundation. I introduced him to my other two people, highly beautiful people in the foundation, in the process. From there on, our problems grew and grew. Every time we attended a meeting, the thing went flat and we couldn't understand why. Everytime I went to a meeting on my own, everything was perfect. But if the other two came in as advisors, everything went flat. Caroline couldn't understand how this was happening until 2008 when I went to Iran and we found out more. But in that process, Red Circle introduced to us a number of people they said would help to finance and build. But in fact, in the present research, these are all a bunch of pedophiles and murderers and people who steal intellectual rights. And we will show you the evidence in a few minutes.

K: So, what is the pattern has now become very clear. Every time a new scientist comes along, they have a man pretending to be a patent writer—he is and it is of inflatable dildos. How could this man write such a patent as he was going to do for Keshe Foundation? He was there to steal. But strangely enough we saw more. Everything fell apart and nothing was happening. They were putting us under so much pressure that we would become desperate to give them everything. I knew I would not give it; it is there to share with the world and I will release it. At that moment because of the pressures, my child was born and we wanted a birth certificate and passport in my name. But if your child is not registered in your name, it is registered under the mother's name and then it is difficult to undo. So I went to the Iranian embassy to get my birth certificate and it had been lost somewhere.

K: They said, "*come in Mr. Keshe, we have been waiting for you. We have been waiting for you to come to Iran to develop the technology for peaceful purposes*". And I said, "*no problem*". I managed to get the birth certificate for my son that was issued in my name. This man is a murderer and I will tell you what he did to Caroline. Then I told Caroline that there was a

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

problem and every time we go everything goes flat. I am not prepared to discuss anything with him and I will go to Iran. I travelled securely thanks to the Iran president. And when I arrived, I was greeted as a scientist the way it should be done, and looked after. I developed the technology and my agreement was to send 5000 Euro every month for my wife and son for living expenses. They found out that the payment came from Iran to KB bank in Belgium and they stopped the money. They told my wife that the only way you can receive money from Iran is if you set up ‘food’ for us. I said, “*Caroline, send me a sandwich and I will send 5000 as a receipt for the sandwich*”.

K: This was again the job of Red Circle. They found out and he made a lot of threats to us. He wanted to put pressure on the wife and child with no income. Thanks to what we had, I came back from Iran. I had to come back because they won’t let money come through and I am not going to send ‘black’ money through the borders. He came to meet me in Paris and he was the agent of the master. He was under pressure for not knowing where the top scientist under his surveillance had disappeared to. When I came back from Iran in October, he suggested that I write my things in a book in several languages. “*I’ll help you do it*”. I said I’d do it in several weeks and he said that was impossible, it would take 6 months. So I said I’d write it and I’ve already written part of it. He said for me to come to him and we would do it.

K: Caroline refused to let him in the house because we had seen indecent activities around our son before when he was in the house: like pissing in the garden (in front of) a 2-year-old boy and showing his private parts to our boy. Now we understand he did this because he was a pedophile. So we started working to write the first book at his house in Antwerp. I would drive 100 Km to sit in a café to finish the book. When the first book was finished, he said he wanted to go eat. We were already in a café. He said he wanted to go to a famous chain of hamburgers in Belgium. I told him I couldn’t eat; at that time, I was fighting with liver and kidney pain and I was told it was suspected pancreas and liver cancer. I couldn’t eat. This all started when I started writing with him after I came back from Iran.

K: Now I see the same pattern; the guy poisoning me slowly at the time with repetition. This was done to me in Sosano. You get a small dosage and then finally a big dosage to finish you off. He has done this to three scientists and one is dead. We will release the name today. And then, when we went to the hamburger (place), we had finished the book and they thought they had the key to the knowledge. He brought one hamburger. He didn’t bring two hamburgers for two people, only one. He said he bought it for me and I told him I couldn’t eat and I wouldn’t touch it. He insisted

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

that he bought it for me and I said I had a problem. He ate the burger. I never had the discussion, but I love hamburgers and my children are hamburger addicts. We made them addicts to it. He walked out and came back in and said he saw flashes in his eyes and I asked him why.

K: He said he was seeing stars. I said I was going home. He ate his own burger... it wasn't mine, because I wasn't eating. He just wanted coffee and that was his explanation. Later I found out that burger had the last poison in it for me to die. But he had to eat it so he poisoned himself with the hamburger he bought to finish the last round of poison for me. The next day he said his hand was paralyzed and he had a stroke. So the poison caused the stroke. Then he had to go to the hospital because he had a stroke that he said was from all the stress from writing. "*No darling, you ate your own bloody poison. That was the piece I was to eat*". That is the pattern of the way that he works. At that point, I carried on working and this goes on to the 2nd and 3rd book, and he tried to poison me again. I had one policy: I would not eat with him and I would not eat in his house and I would not let him in my house.

K: If (we went to a) restaurant, I would watch what he touched and nothing came to my table. It was an instinct that there was a problem and we never told him. Every now and then they would send the police to harass us. They blew my car up with my sister in it. They harassed us with guns organized by the police. They came to kill us with 8 officers and Caroline was getting beaten up and I was on the phone with her when she said they were beating her. Then there was a whole process of confiscation of materials saying it was illegal to have it. They beat Caroline and then we got into the car and we drove to Italy. We had friends here who welcomed us and now we live in Italy. Thank you very much. Over 3 years in Italy, we have managed to get the knowledge out to millions of you. These are the facts about MT Keshe and Keshe Foundation.

K: When we came to Italy, he lost. When we were in Belgium, he introduced us to others and said we had to be known. He said he brought me somebody who has contacted you called Allan Sterling. (Transcriber note: His actual name is Sterling D. Allen). He wanted me to give an interview and I didn't know and thought it would be good to be known. I gave an interview to Alan Sterling. And then other problems came with it. When we moved to Italy, they followed us and poisoned us as you all know. They had a Belgian man giving poison to me, my wife, my child and even one of the students who touched the poison. We are dealing with a murderer. Something very strange happened when we came to Belgium. Mr. Red Circle went to Hong Kong to show how the technology worked carrying a patent that he knew he could not do in Europe so he was going to try to cheat the Chinese. He did the same thing with another

technology in Australia and the scientist from that one is dead and he died in July 1999 after they gave him the same poison they tried to give me.

K: So we have a murderer with Red Circle. This is why you see scandals and fraud. When we opened the hand of Alan Sterling, he knew that we know too much. The others were gathering a lot of information with Alan Sterling and a lot of similarities with Red Circle came up. They knew we were on to him so he recruited all his agents. Suzanne, False Hope, a black man who came to the center to kill me. He is the head of the organization for murdering scientists. We will show you one by one and you will understand. So in this process when by accident one of top guys was in Hong Kong and saw the patent and caught the man trying to patent something that they cannot patent. They were sure I was going to be killed like the other scientists so they went to start production in China by placing a patent as being a friend of mine.

K: So, we came out politely and we knew what he was up to. Before we knew what was going on, we found out that Alan Sterling was the head of a big pedophile organization and the boss is Red Circle. We just heard from the most beautiful African man that he doesn't know what Red Circle is, has never been out of his own city and has no passport. Now he 'became' victims of Keshe Foundation. If they can't get what they want, they discredit. He has done this with the most reputable politician who was also a millionaire in Belgium. He was brought down 10 years, so he has done this before. In that process, Mr. Red Circle has now no choice; he has ½ million plus golden handshake for getting the information and a penthouse when he didn't have a pot to piss in because he was hiding the money from stolen technologies.

K: In this process once we got Alan Sterling, he knew we were after him. Our team in the background worked very hard. We kept quiet and I kept very low. I asked the security services to find us information on Alan Sterling and his team. Wherever we took it, Red Circle popped up. His soldier interviewed him. His chief of command, False Hope, Red Hope, interviewed themselves to give themselves credibility. They were putting out false information. Go to every one of the 650 "Keshe Foundation Victims" and they were entered by Mr. Red Circle himself. Not by them; they are just faces to build numbers. He didn't know that I set him up for it. In one of my teachings and go to it, we have him as a murderer and it was well planned. (Transcriber's note: Probably referring to the 18th International Knowledge Seeker's Workshop held March 3, 2016). In one of my teachings I said, "*people have been looking for victims and we can only find 5 or 10*". We knew we had to start building evidence and we had to show it to the government that he was a murderer.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: So, he said now he was going to build the evidence and so false names would come on the Facebook. We set him up and he walked into it. We waited until the verdict for Alan Sterling came in two weeks ago. Remember what I told you in respect to Alan Sterling? I worked closely in my businesses for the security of the British government for the business side where we could sell goods to generate funds for us and the government. I would chit-chat with them and learned a lot about security. At the same time, being a nuclear physicist in Russia and other places, I was well-trained in what we have to do to protect ourselves. I gave an interview with Carrie Cassidy. I spoke with the FBI and all these calls are registered. There are no coincidences. The FBI agent in Utah called me originally in November and I called him in January and February. He said, *“Mehran, we have got him (Alan Sterling). If we bring him in, we have to go through a very expensive court case. If he walks in, we are done and we don’t need to do anything.”*

K: I said, *“leave it to me”*. I called Carrie Cassidy and said I wanted to give an interview but Alan Sterling is going to be discussed. I can’t let you but if you ‘walk it through’ I won’t say anything. In that interview on the 18th of February I said, *“we know who the victims of Alan Sterling are; these people rape their own children”*. And he knew that his cover was blown. They only needed to arrest him because now he was in the open. The next day he walked into the Utah Sheriff’s office and turned himself in; the following day he was arrested for raping his two daughters. So we knew how to get to these people was to the original victims, the daughters. We sent a message to his daughter. In the past two or three days, we saw them saying that we were stalking his daughters. All we sent to him, and we have a screen shot, was the condition of Alan Sterling and one of the scientists that he has murdered to his daughter telling her that her father was a crook and a murderer.

K: He knew that we found the first scientist and we know that he was murdered. Then he says the Keshe Foundation has written to my daughter and I love you and the rest of it because we sent the information. We pinched the dog to make the cat meow and the cat meowed. He wrote it and he walked into what we said that the father and daughters work as a team and we will show this more and more as these are the evidences on the internet. Now we know. Red Circle is in the business of stealing technology for his government and he gets paid very well. And then the payment is in two ways: partially cash and partially children. We know how he gets children for his bosses too. Now we have another goal: to do this the way we did with Alan Sterling. He has raped his own two daughters first, sometime in the past. They were the same age, between 3 and 6 as (were) the daughters of Alan Sterling. Children cannot remember anything between 3 and 6

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

and you have to remember that Red Circle advertises and he has done it himself... a lot of hypnotism.

K: He says he has hypnotized 100 people at one go in the university where I get my documents. I have been going to the nest of the bees where they are accessing my technology. And so he hypnotizes children. We have found out what he does to children. He murders them and he literally beheads them. He has said this on the internet. We will release it and you will understand how he works. But, this story goes long before I ever came on the scene. Security people from CIA and FBI, British Intelligence and police and Interpol are all sitting on the line. They know I told them I would release this today. Give this to your government please and you will find out how he works. What has happened is the story goes long before he attempted to murder me. In the 1980s and 1990s, a well-known businessman wrote a book on using financial cycles to make yourself a millionaire. And he made himself a millionaire and became a pain in the backside of some and he wasn't willing to share his wealth with them. The backbone of the programming was how to make money and a lot of people made money. They put him in prison for 5 years because he didn't share the information and they made a lot of accusations about him.

K: He, like me as a correct man, found people were after him that were linked to a pedophile group. He went to the source of the pedophiles in Holland and in a shop they give him a video on how to be a pedophile with children. This is all on the internet. And then he watched it and he knew what they were going to do to him and he didn't talk. He went to prison and got out of prison because they were trying to get his money. In 2010 or 2012 a man named R started a new political party and Red Circle has written how he worked with R to set up his own party. It is on his website and we have taken screen shots from it. In fact, when he went back and I remember this because he was at the opening of the Keshe Foundation, and he kept saying that he had to leave and kept pushing that he had to leave. I said, "this is the opening and you have supported the foundation". He said he had to go because R has a television interview and I have to be there. He left for the interview where everyone at Keshe Foundation remembered him leaving. Mr. R, why he wanted to be there and why he was put around him, was that Mr. R. watched a video and that is why he stopped everything of a girl being beaten up, slaughtered and murdered. The problem here was the murder was carried out by Red Circle. He wanted to make sure and if he remembers and does anything, I will discredit him.

K: When Mr. R. has realized who he is, he did the same thing to him he did to me. And he opened a scam on Mr. R. on the internet saying everything was wrong with him. And it was the

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

exact copy of Keshe victims and he has done the same thing with the gentleman, Mr. R. He is a very well-known politician and businessman in Belgium. (00:56.01)

K: The question was how do they get access to the children and how do they bring the children in? He uses his false identity that he has made pixels, flat pixels (pictures?) and it is not his; it belongs to a Japanese inventor. And, something else in the publication of the company with his daughter, they ask a very funny question. "*We are looking for 3 to 6-year-old children to photograph.*" Do you remember Suzanne asking for photograph? They send a photograph of the children and if you like it, they kill it for you. This is what his job is. The CIA has the full dossier on these documents. So he and his daughter are on her Facebook looking for 3 to 6-year-old children. We don't know how many children have gone missing. There is no location where pictures are taken. The enticement for taking a picture is a free movie ticket. Would you take your child to take a picture and send him to a free movie where after the movie and on the way home the child disappears? They like it and somewhere the child is sold. Now you understand why we have become a 'scam' and why the Keshe Foundation is discredited by him with so much effort and how ruthless this man is and no life is worth anything to him.

K: You have to understand he is that his specialty is blowup dildos. What has happened it seems is that his bosses decided sometime in the past to use him because he had no understanding of what he is doing for patent writing for bringing children and scientists? In the late 1990s a Dutch genius wrote and developed a television video compression program and then this made billions for Bill Gates. This program was written by this man in the 1990s, and accidentally when he was with his team working in the background, the day before he signed a \$100 million Euro contract for his invention, he died strangely with a heart attack or stroke. Nobody knows and they would not allow an autopsy. Remember the judge who recently died in US and they didn't allow an autopsy? They know when they do an autopsy it shows how they were killed. Would you like to read the name of.....? Go on the internet and it's in the Dutch news in July, 1999. (Transcriber note: Refers to Jan Sloot - https://en.wikipedia.org/wiki/Jan_Sloot)

K: This compression technology over 15 years ago was worth trillions and the man had his hands on it. The patent writer was with his team that starts with "A." A travelled with me to Korea to see what I give to Samsung to murder me. He told me many times 'they' were going to kill me with guns. He was telling me that he was going to kill me if I gave the technology to Samsung. Strangely enough, this man killed a man who writes patents for what we call Mickey Mouse games, the toys. And now in 2002, with his collaboration which probably nobody knew, the

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

secret of the man who wrote the patent for the video compression was submitted to the Belgium patent office. So a dildo man became the patent writer for the most complicated video compression technology that ever existed. Go through the patent office of the Belgium in 2002. They waited a year or two until everything died down to order the patent to be sold. The money he got from “B” who organized everything and they set up the financing for the most advanced video compression financing to trap scientists and everyone else.

K: Now you see that the circle is complete. The man who says he is the son of the king introduced us to Red Circle. So, they are all in it and they have own lawyers, and police force. What happened in 2002 after the murder of the scientist you will find on the internet. I worked 5 hours to finish the patent and when they submitted it the day before when I was traveling home. The two thieves were now fighting for their position. Another patent he did in Belgium was one for which the partner had already submitted under his name. The fight between these guys has gone on for a long time. Have a look, it is on the internet. We have all the documents. So, in that process they already killed the scientist, they took his patent and under reading the documents the key with the man in Holland was that he did not give the last two keys. So what they did was to kill him and steal the floppy disk that had the key on it but they could not decipher it. So in that process they already killed the man and they could not have or bring the money they stole by murdering the scientist.

K: So this man says he is a patent writer, but he writes fake patents. He talks a lot about his patents and where he made his money. The patent doesn't belong to him; he just puts something with a name in the Belgium patent office to cover himself and he starts bringing some of the money from the murdered scientist that he was given by his bosses to put into operation. Because the patents he says he has done for the 'funny cubes' were written in 1988 by the Japanese and the Dutch and they didn't belong to him. He faked it. Then he submitted another fake patent to launder the money. At the same time again his bosses, Mr. B., came across another person like me who went to Mr. B. He went as usual to the 'nest' for financing and then Mr. B. set him up and they got his black box and it was kept at the head office. They wanted to see the black box creating energy. Strangely enough, he ended up with the supposed liver cancer like me. He was poisoned because he would not give his secret.

K: If you are a Russian, please go to the documents of the Russian girl who was shot and burned in Belgium. Mr. A. who is a collaborator, we submitted information to the court for years, and we couldn't get through the structure. Mr. A. and Mr. Red Circle poisoned the scientist with

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

energy technology similar to mine. We have 3 scientists we know of who have been poisoned—me, the scientist in Belgium who we don't know if he is alive or dead, and the scientist with the video technology. I have shown you a graph and it shows charges and that comes from these Belgian scientists. How come everyone gets liver cancer when they are scientists that come into contact with Red Circle? He has murdered two scientists: a Russian girl and two scientists, and the girl we have seen and many other girls. He is the head of the biggest criminal organization in the world. He is not the cube which is happy; the cube is the coffin of the children. That is why he sells them so easily through pictures. The whole problem is that they are operating freely in Europe because now Mr. B sits in one of the highest positions in the European Space organization. We have seen a lot of scientists in the past 2 to 3 years dying and he organizes all of them. He owns 250 companies with the latest patents. He threatens the people.

K: But strange of the strange, go to Australia and look for the compression company set up in Australia. They could not decipher the code, but they brought a young programmer to try to decipher and they thought they found part of it. In Europe, they could not do it because clearly it was the murder of the scientist. They come up and opened the company in Australia and his name is as the director and the major shareholder. It is strange... a vibrator seller sitting on the board of the most advanced compression technology (company). He did the same with me and when he was sure I was going to be killed, he went to China to sell the patent. He wanted to control the Keshe Foundation as though it was his. Now you understand how we have all been taken for a ride by a murderer, gangster, terrorist and pedophile. When a man writes *I piss here, I piss there*, and he exposed himself to a boy of 2½ years. He only likes them when they are 3-years-old. The girl who was killed was anally assaulted. He is not interested; read about Alan Sterling who did the same thing with his own children because they won't touch them in different ways to leave evidence. Now you understand how we ran for our lives from this criminal organization and the criminal.

K: What we want to do is very simple. You have listened for an hour to the story of a man who set out to save humanity but what I want to know is that we are opening two websites, one named missingchildren.help and we would like to tell us if you know children that have gone missing, where they went missing and how they went missing. The type of children he likes is blond as he did both of his daughters. But he likes Africa. He went to Africa to bring the name of people like Paul to put on his list of supposed "Keshe victims." He was born in Brussels. If you know any scientists who have died mysteriously send it to us. It goes right to CIA and other intelligence services. If you know any children who have gone missing around Belgium, France, Spain or Portugal, such as the English girl who went missing who was sold by photograph by

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Hope. False Hope sold the picture and the girl who is well-known on the news is back in Morocco escaping from the US and at the same time still trafficking children.

K: Keshe Foundation is solid; you have seen that we work openly. You see him as head of internet organization. So what you see is that we have to protect our children; we are dealing with a man who has hypnotized his own daughters so they don't remember. If you read the judgment for Alan Sterling, (it) said the infants were so small they could not recognize or remember but Mr. Sterling agrees that he has done the job. He would cover for thousands of others they have trafficked and murdered. We passed this information that he was involved with the murder of the two Moroccan girls in Belgium and we do not accept that the police of Belgium will take any action and it will be done by international police.

K: And, as of now if you go back on the internet, False Hope disappeared on the 30th of June and she didn't put anything in her Facebook. That day she was with the parliamentary committee crime squad of Morocco ordered by the king of Morocco to investigate her activities. She is close to being arrested as they complete the process as we have seen with Alan Sterling. She was interviewed and released until they find out more of whom she is communicating with and when she is done with the interview in time. She escaped from America and we don't know how many American children she has murdered or sold on the internet through Alan Sterling.

K: Suzanne is in the same game and that is why I asked Mr. Amini if it was his daughter and he said it was not. It was one of the people around him. And unfortunately we have sad news for you and you see this guy so low and you see we work without borders with other countries and he accused me and one of the hard workers of the Keshe Foundation of Germany of child trafficking. That is why we are chasing him because we were chasing him and found out everything about him. My team, some 40 of them, is solid, loyal and committed to humanity. Unfortunately, Red Circle is a man who has killed very easily and we don't know how many other scientists he has killed. We are looking for the names of children who have gone missing around Antwerp. This is his patch where he takes children, hypnotizes them, rapes them and then he enjoys to do what you read.

K: So there is nothing wrong with the Dutch or Belgian politician; there was nothing wrong with the scientist who got murdered in Holland; there is nothing wrong with the scientist with the Russian wife who used to live in Antwerp and we don't know if he is alive or dead. And he had

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

to go to the coast because of the cancer and he was trying to survive, the same as I was. We think this scientist was given the last portion of poison to drink. He was the man who brought the way to measure the nano-material. He said that was what he was done and he was probably trying to save his life to stay alive. We have evidence for attempted murder and the murder of two scientists. If the Dutch police stay silent now that we have brought information, there is something wrong in security and the police of Holland.

K: Don't forget, when they knew that I was not leaking any more information about my system, the King of Belgium came to see me in a café 4 or 5 years ago. He was literally begging me for it and said he was going to kill me if I didn't give him the technology. I told him *to take a hike and I am going. When I go, you go.* He left and then he abdicated. That was the first time in the history of Belgium, because the blood of the children of which 50 were killed in France was linked to Red Circle. When the top man finishes with him, the crumbs are used to dispose of him. The truth is nothing more than the cover up of the acts against the children by Red Circle and his people.

K: Do not send pictures of children to anyone on the internet. It is illegal for underage pictures to be taken or requested to be taken in any of the European countries. How come on his website he asks specifically for children 3 to 6 years old and his daughter does the same. They have orders. We see Red Circle, Alan Sterling and we know the daughter has to follow the father's order because otherwise he will be exposed. Now you know the facts about us. We all live in our closet and lead our lives and work to bring up our children and lunatics like him disturb everything. The scientist died, the children died, and I saw so much of the children who got beheaded as you have seen. So Red Circle your circle is 'reddened' completely: you are a murderer, a thief who steals scientists' patents and at the same time we have asked the security services to join us in the way that we got Alan Sterling. We are going to get you and your boss very easily.

K: Part of our team is security services because we bring them in to protect ourselves and all the details have been passed on. Every copy has been passed. And with a new website with supporters, we will leave all the documents we talked about today. Go and read how he murdered the child, how he patented a dead man's patent. Have you ever seen a dead man walking? Yes, the man is dead and Red Circle walked with his patent. And then he fights with the others who stole it because of how much they were going to share out of it. We have given the information to the Italian police and Italian court system. Now we don't make accusations.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: This website will go up and our supporters will put up their website and you can read. Please contact the Moroccan community and tell them we found the murderer of their daughters. Because these two girls are the ages he likes to have that he has written on his website; the ages are 3, 4, 5 and 11 and 12. Have you ever seen someone writing the ages of children he wants to take pictures of? We have taken snapshots of his websites and his daughter's website with all the names on them. They cannot deny it. It is categorizing for customers; they are after 3 to 6-year-olds. The others after they took the girls in Belgium remember that children of young ages don't remember and that is why they take them. He beheads them.

K: I am sorry to bring you to this. We are a scientific organization and you have heard the story of my life and my family. Totally by accident by trying to bring the technology for you to enjoy such as the Magrav units, the pen, the pads, the medical units... we have paid heavily for it. We don't get support for the Foundation; it stands on its own. All the donations, if they are lodged, get stopped through his boss by the bank in Belgium. That is why we don't receive it. They stop it. Thank you for understanding us to be correct and supporting us to be there for you and your family. We share the knowledge, we are here with you and we will take man to space as we have promised.

K: We see how the Africans with their pure hearts bring the treatments for cancer and how the Germans work to bring the factory into production and work with the others. We have seen people like Richard go from Holland to Germany to set up the factory so he can help the others because he believes in it. We set him up to bring the trap: Red Circle you are on your own circle. You are a murderer and I am ashamed to lay eyes on you and in so many ways humanity is ashamed for your breath. You killed a scientist; you are involved in his murder. We know you were single-handedly involved twice in trying to murder me, plus blowing up my car and everything else. And, strangely enough, I told you when I came back, before I arrived, and I have told you this on other teachings. I called my wife securely to tell her I was coming back next Tuesday and that was at 10 o'clock at night. The next morning Red Circle called my wife and said that the Prime Minister of Belgium called him to say that Mr. Keshe in ten days from returning from Iran has to attend the office of the Prime Minister. We thought why would they call Red Circle? He wanted to show that he brought me back and now he was going to kill me.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: Now you understand. It wasn't accidental and he made a decision to show how far he could go and who his servants are. We saw the Prime Minister of Belgium; we saw one of his paymasters and then we say it. I have to tell you something about Mr. B. He was in a Flemish Parliament, or assistant to the Chief of the Cabinet and he was kicked out because of inappropriate actions such as stealing from subordinates. So there is a huge history of murdering, deception and Red Circle sits at the top. What we see that is a victim is the cry of the wolf. We have put all this evidence on the internet. We see today that people are telling you that their names were taken by him and put on the "Keshe Foundation victims list." Six hundred and fifty are not-victims and there is one real victim which is humanity and of the biggest murderer. He is a serial killer and we have seen him in the shape of doctors and policeman and every shape or form. Now we have shown you one of the most devious murders and serial killers of children and scientists.

K: Please go to him and mark yourself as the human race victim in hands of whom we have exposed—Alan Sterling and yesterday with European Interpol. The gentleman introduced as "A", when you see his name and we gave this to the court in Belgium. A is part of this group (and) is the close friend to the one who was supposed to finance the Keshe Foundation, apparently with no money, but had millions and he was the same man who was supposed to part of the financing for the Dutch scientist who died. He has been kicked out of Thailand for anally raping a ten-year-old boy. The government of Belgium took him out. Two children were raped and when you see his name open it up and go to the Interpol report that is on the internet. These are a bunch of pedophiles gathering children, raping children, killing scientists for what it is. We are dealing with the most organized criminal group in Western Europe headed by one man who has never been uncovered.

K: We covered Alan Sterling, proven to be right and my team will put Red Circle well circled in the coming days. We submit further documents to the CIA and the others that the Belgian police have no enforcement because this is international crime. I am Iranian and asked the Iranian government to take action. But the Dutch police have to look into this. The patents have been taken to Australia and the Australian police are involved. He tried to go to China to get the patent. We are very well known in China for what we do. He is well organized with crimes and the stealing technology. How can you write a patent in China when you are a happy cube patent writer and a dildo patent writer? That is all he does and his intelligence is only for stealing technology. How can you be a partner in the most advanced compression technology in Australia? He knew in New York he would be caught for murdering a scientist. All the details are on the internet and we handed over to CIA and Interpol and we handed it over to every

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 2: Full Disclosure

(v1 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

embassy. Every country should know that their scientists are in danger and children will be murdered by his organization. Red Circle, you are ashamed to breathe the air of this beautiful planet that is one of the most special places in the universe. You have dirtied it with your breath. The foot you put on one of the most special places in the universe and you have dirtied it with your breath. I wish your mother had never given birth to you. You have caused so much pain for so many people.

K: Thank you for today. Go to the Keshe Foundation website and start learning how to make the systems. Help humanity like the rest of us. There is nothing wrong with your knowledge. There are no victims. The people who tried to be ‘victims’ when you did that, they get pictures of your children and then you really become victims. That is why they have been going around calling the child of Alexz. That is why they have been going around making allegations about one of our teachers and his children. That is why we are called about the children because this is the way they are. We are dealing with a murderer.

K: I will speak with the Imam of Belgium. And we let them know where they can find the grave and where the murderer lives. He is so low that this is his pattern. He brought Africans to put on his victim list. He says he is a child trafficker with another Iranian to divert attention. That is what he does. My team is solid; they are perfect people and we support humanity. But tell your young daughter that we will make her face the face of child abuse across the world and you try to stop it. That face is not innocent but is another one helping you to get children. I will put that face all over the internet plus your grandchildren. You must have raped both of them; that is your habit. This is when I was in your children your grandchildren don’t get near you. They sit in a corner and won’t let grandpa touch them because they might be touched like you did with your own daughters.

K: This is not theory; it’s fact. We read it and we have seen it and you admitted it. You exposed yourself to the 2 ½ year-old child and pissed in front of him. That is an illegal act in the house where it is you and the child alone. Thank you for today. We come back next week and we bring hope and prosperity to humanity but we had to wait for Mr. Sterling to be in the cage so we could defend ourselves. You have seen it; you have nothing to hide. Teach and let’s bring peace to humanity. Thank you very much for today.

(End of the 120th workshop for Thursday June 30, 2016)
