Keshe (K): we have moved into a new structure of teaching and the next step of the development of the technology. From now on after slowly building up, we are working on the next phase of the foundation. We showed you the blueprint and a lot of you made a lot of things. More people have come to the foundation and they want to learn more and more. So we are bringing in a workshop/lab condition. We will move the whole teaching into a lab where from now on when you have something live or we have something live we are testing we can show it. This is very important for the teaching of the foundation as the new program and teachings take over. We have an environment where we are in a lab; we can show and test tools in the lab. All the reactors and systems are built here that we don't want to move around. Everything we have tested for the last 20 years is here. If we want to test something or you want to ask for something or if we want to develop a new technology it is here. This is how our technology is going to go and how our teaching is going to go.

K: in that progress we announce the new changes; as you have seen in the past 3 months we have started separating the teaching in a very specific direction. We have started the medical application teaching with doctors and they have the medical applications that they can test. They come back to us and share knowledge with us. We have started agriculture and the 2nd session was yesterday. Next week we start the space and military as we promised you. With the space and military we show technologies, how things are done, for them to be easy to understand. In that progress we cannot allocate all the times to different things so we have to make some adjustments. After the 15th of July (2016) the Tuesday afternoon teaching ceases to be. The international teaching becomes the international military/space teaching. This means that all the public teachings will be on Thursdays. I will still teach on Tuesday morning to the students who have paid 100 Euros. Tuesday afternoon is for governments, military and space and we have a number of nations who will join us. We will work to bring what we have promised. Wednesday morning is open for agriculture and Wednesday afternoon is open for military and space because it is the most important part for the astronauts, cosmonauts, and Mozhans.

K: we are bringing in scientists from NASA and Russian space agency and we work with them closely. We work with governments like China and Ghana and their space institutes. Ghana Space Institute will be one of the first teams that start the space teachings. Then we go to

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

different African nations and their space agencies. We have seen them writing to the Foundation that their military want to know more. We go to the heart of changing the military applications and we have told them that the time for making references to killing is over and we showed them the technology. We are not teaching them how to make new weapons and we are showing them how the weapons they have are obsolete. Teachings will take place here and in some cases we go into the military and space agency laboratories in different nations for the teaching to develop further.

K: today Keshe Foundation will present a totally new presentation especially targeted for security services. We have asked for agencies like CIA, Interpol, Russian Intelligence Service, the police force and others to watch the program after 12 o'clock. This is important for us because as you know we are a scientific organization and in this process we find a lot of people come around us and are not part of us but have used us to complete their own clandestine activities. We saw how the criminal organization headed by Alan Sterling was attached to us as they were reporting on energy but in the background they were accessing and abusing children. His life sentence was passed by the courts in the United States two weeks ago. Strangely enough on the back of the same development in the past few days it was announced yesterday in Holland that the biggest pedophile gang in the world has been opened up with 75,000 members. Part of the people who were sitting with Alan Sterling group were part of this group and they have been arrested. It is in the news today. Go read it.

K: We see the effects of our work and the intelligence agencies working in the background connecting the dots together. In our developing new technologies, these criminals came around us to benefit for their own activities. We don't want to be involved in it and have nothing to do with it, but as they use us, when we find out we opened the books and we found one of the biggest pedophile organizations in the United States headed under the energy which is part of our work to attract children. We have seen a number of people on Facebook and Alan Sterling websites pretending to be children who were trying to learn and in fact they are mature people in their 40s and 50s with Facebook pages in Europe. Go back to understand that we are scientific and now without our wanting it those who use organizations like ours come to bring and attract children and attach themselves.

K: one of these people who has been in this job for a long time is called Red Circle. We open the story about Red Circle and how it evolved in a number of patent deceptions and a number of copying patents from scientists and publishing them after their death because they had access to the material of those scientists and claim it to be there. They signed patents after they killed the

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

scientists. At the same time they took patents out of Europe and took them elsewhere so they could then bring them back into the countries. These are not just allegations. Our investigation team headed by Sandor has been working heavily with this for the past year or so. It was his work and the redundancy for the past year that the file was so complete that when we handed it over to FBI it took them only a few days to confirm and start the investigation with Alan Sterling that led to his arrest.

K: After 2 o'clock we do the section we call the Facts about Keshe Foundation and M T Keshe and how without us knowing and being innocent in the world of technology and science, we got pushed and pulled into the clandestine activities of the others who had used us to reach what they wanted. We can show connection with child trafficking directly with Red Circle and his family. They brought in young children of a certain age to abuse under specific categories. We show how they claimed to be patent owners where they had no patents. They claimed money laundering from other activities from killing scientists and trying to benefit by it. We will show a laundering system set up in Belgium by a group of 4 or 5 very influential people. He is one of them. And then we see how he goes about doing character assassination and we see on the internet. My team is fully aware and we are standing by. We have been told the security services are here. We will hand over our dossier after today to the security services.

K: we have to carry on with our work and developing technologies and people cannot be abused for what they have done now. We deliberately set up a trap last week to bring what we wanted and it worked. We set a trap at the advice of the security services who knew the reaction. The same as we said before as we were advised to do with the Alan Sterling case and to go on one of the chats with Carrie Cassidy and say who some of the victims were that we actually knew of. But we needed them to walk in and two days later they knew and Alan Sterling was arrested. They didn't need to go through a long expensive court case because when he confessed to it himself, the case was done. That was the advice of FBI, the security services and the social structure how it could be done. We used the same knowledge and technique last week (with Red Circle). We needed to show it was their business.

K: You will see these facts as Keshe Foundation has opened up the information. We will show you how three times the same man has copied other peoples' work, pretending it is his, and he has killed for it. Accidentally by cornering him he had to eat his own poison which led to his own brain hemorrhage while I was watching him. He was trying to get me to eat a sandwich on the table and it was the only sandwich and I refused. He had to eat it because I was watching him. He walked out and claimed to have a brain stroke. He was helping me to write the books.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

At that time I was weakened by the other poisons and when I came back from Iran he wanted to write the book. The poison in the hamburger was okay to him because half of the poison was already in me from earlier times. He created what shows up as signs of liver cancer. There are two more scientists who were killed. The second one is dead. The side effect of the poison in the hamburger brought him a brain hemorrhage. This is exactly the way the compression scientist in Holland died in July 1999. His work appeared to be patented by Red Circle with his name and documents on the internet. The documents supported that the scientist and Red Circle worked as a team. This is why they went on the rampage on the internet discrediting us because they knew we were wise to them.

K: he knew and he had to create a lot of false facts. Today we bring a member of the public whose name was put on Keshe victims. They don't belong because the mentality of Red Circle is the black men from Africa are stupid and they do not understand so he has gone to African Facebook and brought those names and placed them on the Facebook as victims. He entered 600 names as 'victims' of Keshe Foundation 'scams' and they don't exist. One of them is one of our own scientists. He even put us, without my wife even knowing as part of the 'victims.'

K: When the intelligence services looked they found there are no 'victims' of Keshe Foundation. Look at the entries and it was all entered under Keshe 'victims' by one man. If you were interested in the science and he liked your picture he put it on the Keshe 'victims' list. He put people from Tunisia and other parts of Africa as victims. We will show the emails to you so you understand how they operate. It is a very organized criminal organization. There have been a number of murders and we will open that information. That is why we asked security to be present. We open a section this afternoon and then we close it once and for all. It is important for the national security services who work with us, the military and space people to understand what is going on. We have been explaining for the last couple of weeks and now that they understand they have joined and we start the process of spaceship technology.

K: nothing is wrong with the process. You enjoyed it and you saw new life, you have seen a new direction and you have been made to understand that you have as much knowledge as the most advanced scientist in physics, biology or chemistry. You have become scientists yourself; this is the essence of the new technology. We opened our blueprints, and we opened our work. We get so many people sending us copies of their electricity bills that include 50 and 60% reduction. No electricity consumption for some people (who are using the Magrav units). We took the biggest shackles of the problem for man which was energy and now we are taking our work to the next step. This is important for us and for you.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: a lot of you have joined us and you come and watch and wish to make what you see and be part of developing and understanding so you can do this yourself. The reason we brought you into this workshop today is that we announce a new section of the Keshe Foundation and we call it 'the workshop.' It is under [workshopatKfSSI](http://workshopatKfSSI.org) or [workshopatspaceshipinstitute](http://workshopatspaceshipinstitute.org) or workshopatKeshefoundation.org. When this is completely set up it brings you to where you live, what country, and what city, where you live and you look and see where the workshops are for learning to making a system. There is a workshop near you. Keshe Foundation supporters have been doing this in small groups around the world. And now we have brought this into an organized section. For example, in Germany you can go on German workshop and see where they are, how much they cost and you can book yourself into a course and you know in several weeks time' you can learn to make a Magrav system, a pen, a pad, the generators, the spaceship lift system. Everything will be taught step by step. The teaching has been theoretical up until now. And we now go to the next step. So look on the websites mentioned for the workshops.

K: If you are running workshops or you want to run a workshop contact workshop@keshefoundation.org and tell us who you are. We will do a credibility check to see if you are correct. You tell us what country or countries you want to teach in. We bring different countries together to teach. Specific developments will be Zoomed in and out if we need to do so. In this process we are teaching you 'hands on.' You don't need to buy anything. You go to a workshop in Germany and in that workshop you are given all the tools. When you walk out of the workshop after two days you have a Magrav system. All the materials are there for you; you have a health pen you can use, and you learn other aspects of the technology you can use. We have seen Mr. Falamini in Germany developing this technology, this way of things very rapidly. We have seen Renen doing this in the Philippines. We have seen workshops being done in the French-speaking part of Canada. We have seen workshops in Hawaii and all over the world.

K: we are bringing in all the workshops no matter where they are under one banner of the Keshe foundation and each country tells us how much they want to charge for the teaching, the materials and the two-day course and the backup they bring in. At the first workshop you register and we do a security check. 25.25

The teachers of the Keshe Foundation –you tell us what you want for the Magrav system or other things to be built, for the facility you rent for the teaching facility. We will accommodate you. They pay the foundation before they attend your workshop and we transfer the funds to you. From now on we a new type of employment—teaching, teachers of the new science. Men who make things. We estimate several thousand people will start this process in the coming months

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

and they will start teaching. If you have made a Magrav system, you want to make a Magrav system, you are unemployed and you want the revenue, the teaching of the technology is what is available.

K: as I have said, the employment with this technology will be huge. If you want to do it as a donation it is there too. But from now on you go on to 'workshop' and see what is nearest to you and you can go to it. Look at the nearest place in your country, where you can go to learn and how you want to teach. The first one we announce is in Germany and we will bring translators online to tell how he does this. Next week we will announce the German teaching. He has been doing this every weekend in Germany for 3 months very successfully. You will see him on German Facebook. We bring him into Keshe Foundation to head the workshop section. We have brought two of best support, Rick Hammond and Brett, to support if it is needed so we can structure this. The team coaching of Keshe Foundation is part of this new way of teaching.

K: if you have been teaching, trying to teach one to three people, now you can do it through Keshe Foundation with support. If there are people waiting to hear from you, we allow you to make videos from your teachings. During the Thursday international teaching these videos will be played in intervals. If you are running Keshe Foundation workshops in Germany, Spain, America or Portugal you make a small video and we play it. It will contain who you are what you are doing and teaching and you can reach more people. We allow you to reach more people internationally and teach the technology internationally. We do these kinds of seminars in September or October for governments and we go to facilities in different government sections and we show them how to do it. The first part of this will be done in Ghana and the space agency Atomic Energy people. Hopefully before Christmas we will be done in Iran. We are hoping to do a live teaching workshop from Tehran if we come to an agreement that my security is guaranteed within the structure. We do this America, China and anywhere a government wants to show their doctors, engineers, and scientists how and what the changes are.

K: those of you who do the workshops and become good at them, when we are approached by the government to demonstrate you become the representative in that country to present the technology in workshops to their scientists. We have seen this done in Ghana and in China, and a number of other countries. People are going physically to governments and delivering the peace message and the military understands it. Now we start receiving requests from military and different governments that they would like to be part of the technology to understand it. We have to go this way and I kept saying we are finished with the theoretical teaching. Now you

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

understand why and it is a matter of building, developing and showing it and for you to be able to share the knowledge openly.

K: we teach doctors how to make systems for their own patients. A lot of doctors are building their own systems for their own application. The same will go for the agricultural. We teach the man of space how to make systems to be able to protect and use immediately in the present space program in a number of nations. We have become an international force, a scientific international force and when I say 'we' it is all of us and includes every single one of you who made a core, listened and contemplated that this technology can change humanity. Your wishes have supported us. We don't work on the physical support; your blessing that we receive is part of our work. In a way you support us in different ways. We need to establish solid ground and this comes when people work with it, feed it and see the benefit of it.

K: let us have Mr. Armani come in from Germany. You have lived in Germany for years; are you fluent in English? Please introduce yourself and tell us what you have done and why you are now part of the Keshe Foundation teaching, but before you go, we will explain something else that we set up for Red Circle and you will understand. Go ahead.

A: good morning, evening to everyone around the world. I am happy to be part of Keshe Foundation; I love it. I am 44 years old and have lived in Germany since 1988 and I am German, Iranian and human. We started to spread the news and are supporters of Keshe Foundation for a long time. We have set up Facebook pages for Germany and others. We try to get the members all together and we have over 10,000 people. We try to make the knowledge available to everybody in physical form and not just theory. People have come from Holland, Germany, and other countries to build their Magrav and gain some other knowledge. We are making the parts and giving people the knowledge directly in hand.

K: you have been running the workshops for nearly 3 months and we have been keeping an eye on what you have been doing. Now you need to organize and tell us how we can support you as the new generation of the teachers of the new science and how you see the function of the Foundation to support you and groups like yours with support now.

A: this is very nice and if we get support from Keshe Foundation we will become much stronger and become much more in the hearts of the people. Many people know Keshe Foundation and many want to bring knowledge to the people and we want to get people to get together to makes sets. I think the Foundation can help us to collect us together and bring us to a new level.

K: can you give us more detail now for other people who want to run workshops. (37.05 minutes). This is called Magrav for All! Please explain the pictures.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

A: you see the Magrav parts that are ready to be created into a Magrav unit so people can take them home and use them.

Power point presentation:

MAGRAV FOR ALL!

Magrav Power in every house! (Photo 36.58 minutes)

Spreading the KESHE Technology.

You see Magrav parts and anyone who comes can build a Magrav to take home. Some parts take more time than in one weekend. So gans is made ahead; the wire connections are made by members of the workshops. Many people have different experiences and we elect them to a part such as winding coils and people learn and participate making coils and capacitors. We see to it that people do it well.

Magrav Power in every house!

Spreading the KESHE Technology!

Learning by doing in our “hands on” Workshops!

MAGRAV FOR ALL!

- 1. Magrav Marathon Workshop*
- 2. Promotion of the Magrav Marathon Workshops*
- 3. Flexible financing*
- 4. Cooperation partners for Keshe Workshops*

Yesterday we did a short cut to explain what we do and everyone should be able to make or have a Magrav. We made a financing system to make it possible for people to have a device; is someone has money and no time and someone has time and no money, then they can be partners and the one with time will build two units, one for each of them.

1. Magrav Marathon Workshop

Knowledge sharing for anyone

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Skills are shown and shared

Participants will be guided to build their own Magrav

And take it home.

Concept to spread Keshe technology:

Community – sharing application

Support by workshop team concerning Magrav

Application

Participants receive access to various online meetings; various exchange platforms to share their knowledge.

1-3 days Workshop details:

Depending on workshop time Magravs are built from prefabricated parts.

Some parts are already pre-made. For safety

Reasons it is not possible to operate all machines.

What people can do:

Winding coils; connect coils; coat coils, wind

Capacitors, coat capacitors, prepare gans balls,

Assemble all parts to a Magrav.

For production of the coils we have created an understandable routine. Each participant has the opportunity to use tools which were specifically developed for this purpose based on Sketches and other Documentation on

The Magrav.

2. Promotion of Magrav Workshops

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Promotion of our workshops is done through Facebook and/or personal recommendation

3. Flexible financing...Magrav for All!

To make everybody able to participate in Magrav marathon

Workshops and build their own Magrav, we have developed

The following solution:

There are different ways to come to a Magrav:

The goal is to help people with different resources (money, time) to match.

There are people have money but no time.

There are people who have time but no money.

These two groups can be brought together.

The 4 models:

1. I am motivated, but have no money and would be happy if someone is sponsoring my stay and participation, so that I can build 2 Magravs (for my sponsor and me)

2. I can afford it financially, but do not have time and would

Like to sponsor someone who builds a Magrav for me and himself.

The 4 models:

3. I am technically talented and can visit the workshop to build it for you.

4. I have either money nor time or etc. – I try to wish the

Magrav for me.

Are you interested? Then you simply decide for one of the

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Models. There are platforms on facebook and others where the builders and sponsors can find each other and where the individual models can be selected.

4.a) Keshe Workshop cooperation partners in other locations

Most items of our Workshop Magravs are prefabricated as a

Modular system in our Workshops in Meerbusch. These pre-

Fabricated items can be received and assembled in different cooperation places.

4.b) Training for Magrav marathon Workshop partners

For partners and workshop organizers, there is a 6-day

Training in Meersbusch and soon in other locations

(calendar)

Contents:

How to structure Workshop, storage and administration for

Ongoing workshops.

How do I teach the knowledge and what kind of tools and machinery is needed to make it become a successful time for all attendants.

Introduce different platforms, meetings and communities for

Networking.

Keshe Technology Teaching

Via “learning by doing” Workshops

We will establish our Workshop Model all over the world.

We should have in every town a teaching and learning by

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

*Doing Workshop center. To make it possible for all people,
To have the direct connection to Keshe Foundation and
Build anything themselves as they understand the knowledge
And its benefit.*

*MAGRAV MARATHON WORKSHOPS are well known in
Many Countries. People from Germany, Holland, Swiss,
Austria and Luxemburg have already attended our workshop
And Workshop Model.*

*First negotiations to Groups from Taiwan, USA, Argentina and Peru are getting in place
and will follow.*

*In a short time we will announce the first locations and dates
Via keshefoundation.org, facebook and other communication
Run platforms.*

A: we teach how gans can be made as part of the workshop. We teach how people can do finance sponsoring with someone who has time and not money to make Magravs for both of them. Wishing rightly is an important part of this technology in getting your visions done. We see many people come and build two Magravs and take them home. Now people are able to build the Magrav or finish them with help. We make this easy and it is important for people to have contact and to have the technology. People have to start somewhere and we can make everything ready. They are then motivated to research and follow the teachings. When we are in different locations in Germany we planned in the following weeks, some people will follow the workshops in other locations every week. Nothing is impossible.

K: thank you and Brett and Rick in the background will support Mr. Amini in the background. You can join to learn and join to teach. This is becoming strong by sharing the knowledge. Everything has to be organized. It is cheaper to learn to make it than to buy from the

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Foundation. This will be taught in some countries in the school by permission of the government. In Italy we start teaching the plasma technology in the school. Thank you Mr. A. for your thoughts. Send your applications to the workshops at Keshe Foundation and Mr. A. and the team will look out for you. Thank you Mr. A. for your presentation and your continued teaching.

Mr. A: thank you Mr. Keshe for your work and I love how this is going on. We tried many months to generate and we made the decision to organize and we try to share.

K: I know the Italians are dying to run with this.

Mr. A.: we will share the knowledge on how to run the workshops efficiently.

K: Mr. A. how much do you charge in Germany for the workshop?

Mr. A.: we want to charge 250 Euro including the Magrav they can take. If they want more they can build more. Some people come in and build 5 to share with family or friends.

K: legally in the framework of the knowledge or teaching you can make whatever you like without certification. When you make a system you are responsible for what you make. When you buy from the Foundation they must license from the source. So when you make a unit for yourself, with the standards we have in the factory. We do see some who are manufacturing and selling under the logo of the Keshe Foundation we will take action because this is illegal.

K: If you produce goods in Canada or America it must have certification from Canada or America. We have sold internationally and we ask people to accept the responsibility of receiving the international goods. Our factory is in Italy and we produce to the Europe standards. We are in the standards internationally. But, if you want to make and sell things which you have made, you are responsible for them. Please do not make mistakes. We have seen people putting things on the internet trying to sell Magrav systems and these are not certified. All the factories for Keshe Foundation in different countries will receive certification for that country. Some countries allow courtesy certification as their nation does not have a set standard. They allow the confirmation of C-certification. Keshe Foundation will release systems to a number of nations as supplies with C-certification and you will see this in the coming weeks. If your nation accepts the C-certification then it allows the units to come into the country rapidly. Some states in America are accepting this as long as the unit has the white box according to fire standards.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: we are looking into different organizations but please if you are making units and placing them on the internet. If you don't have certification you can be held liable for anything.

Mr. A: there is something else. It is very important for us to not just make one model as we teach. We should get our personalities in them and many people make many designs and colors as you see on the Magrav units. We make the star formation with the gans and this is the best thing I saw. It means that on top of the Magrav we have 3 coils and we put 9 coils with wound copper that are coated and we put the star formation over the Magrav and with different gans in the coil. The last picture shows this. Some people make crystals on this formation on top of the Magrav.

K: that is fantastic. Thank you. Mr. H. I need to ask you something. We never talked until the last couple of days when we were setting this up for Keshe foundation. I have been told if I am correct and you need to confirm this. Do you know the lady called Suzanne who asked for a picture of your daughter some months ago? Am I correct or wrong?

Mr. A: it was not me, but I did have contact with Suzanne some months ago.

K: were you asked for the picture of your daughter?

Mr. A: it was not me, it was someone else. Once she was in Italy and she called me and said she had something to show me and we had to call the police. I told her I would not act with her until she had something definitely in hand that showed there was something wrong. I stopped contact with her at the moment.

K: but you know she asked for pictures of people's children?

Mr. A: I read it somewhere and it was definitely someone from our group.

K: when is your next teaching?

Mr. A: we have a teaching every Friday to Sunday and Magrav workshop. We try to set everything with Keshe Foundation on the calendar so everyone can see where we start and where we move to the next workshop.

K: do you want to tell us the next one?

Mr. A: the next two workshops will be in Meerbusch in Germany which is a small town near Dusseldorf. It starts Friday at 11 o'clock until Sunday. If someone wants the 6-day training we

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

do these from Tuesday through Sunday. This is on Keshefoundation Germany on facebook, or they can call me or email me directly. Or they can book from the foundation directly.

K: thank you and welcome to the Keshe Foundation family.

K: Benjamin from Ghana is a professor teaching in the institute. He understands the technology very well and he is head of Ghana manufacturing as well. He will show something very interesting that has changed a lot of things in a lot of countries. Please listen to how to clean up your rivers and benefit by this.

B: I hope you can see my screen now.

K: you are becoming more and more proficient with your picture.

B: we are working with the water of the gans and people are beginning to appreciate the use of the water of the gans and the gans. When you visit the private place he had a problem for a long time and he asked me to help him. I did a cream for him that he applied and he said he felt it in the anus and he felt sensation in the esophagus area. He said he slept well for the first time. Dr. Nash was taken down by malaria so I have to prepare some plasma for him to take. The next day he came back to work dressed well and everyone wondered where he had gone. I did the water for him. He is here to help us with the sediment analysis.

Essence of Trace Metals in Our Bodies (1.14.29 minutes)

Sediment Analysis Report

B: these are trace minerals that are present in our bodies in minute quantities. We will begin to go through some of them and see why we need them. On Tuesday I was sharing with those interns who live here. I told them the normal way of medicine. I shared with them how Keshe Foundation analyzes a problem when you bring the problem what I know is that you are asked to go for the lab check and then analyze the deficiencies in your blood. You can bring balance back to the body. In essence metals are in the body.

The Human Body Facts!

The human body is virtually made of every element found in nature. So man is a little universe in totality.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Every element you find in the universe and heavens you can get in the structure of man. Man is the microcosm in the macrocosm. You are the world inside of you. As you see we are little universes. When something gets out of balance we can experience problems with our bodies.

The Body Structure

The human body is made up of four major constituents:

Water 60-70%

Proteins 16-20%

Fat 10-12%

Ash (minerals) 3-5%

The minerals play a vital role in the health of the person and you need balance to insure health.

Composition of the human body

The body of man can be seen in various compositions:

Mass Composition, or atomic composition

Molecular Composition

Tissue Type Composition

Cell Type Composition

When you analyze the body you do it in the several ways above. The cell level is where the metals are needed for the good function of the human body.

Breakdown of the body by Mass

<i>Element</i>	<i>Symbol</i>	<i>Percentage in Body</i>
<i>Oxygen</i>	<i>O</i>	<i>65%</i>
<i>Carbon</i>	<i>C</i>	<i>18.5%</i>
<i>Hydrogen</i>	<i>H</i>	<i>9.5%</i>
<i>Nitrogen</i>	<i>N</i>	<i>3.2%</i>

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

<i>Calcium</i>	<i>Ca</i>	<i>1.5%</i>
<i>Phosphorus</i>	<i>P</i>	<i>1%</i>
<i>Potassium</i>	<i>K</i>	<i>.4%</i>
<i>Sulfur</i>	<i>S</i>	<i>.3%</i>
<i>Sodium</i>	<i>Na</i>	<i>.2%</i>
<i>Chlorine</i>	<i>Cl</i>	<i>.2%</i>
<i>Magnesium</i>	<i>Mg</i>	<i>.1%</i>

Trace elements include boron (B), chromium (Cr), Cobalt (Co), Copper (Cu), fluorine (F), Iodine (I), iron (Fe), manganese (Mn), molybdenum (Mo), Selenium (Se), silicon (Si), tin (Sn), Vanadium (V) and zinc (Zn). Less than 1.0%

B: If you go to the seashore early in the morning you can lie down and get a good fresh breeze.

B: Nash did an analysis on these.

What is a Metal?

Astronomically, a metal by definition is any element other than hydrogen or helium. Hydrogen and helium make up roughly about 74% and 24% of a baryonic matter in the universe respectively. The Milky Way galaxy's disk is composed of only 2% (by mass) of heavy elements.

B: in a nutshell it is in minute amount but it places a significant role in our bodies and without them we cannot achieve harmony and balance.

History of Metals

Metals have been used by the humans since 6000BC. Gold and copper were the first metals to be discovered. The primitive man used stones as cutting tools vis-à-vis a weapon. Man started using the metals as ornaments for beauty and his general wellbeing (Health). The wealthy folks in some parts of the world predominately Asia, eat Gold. For instance in Abu Dhabi and Japan gold is eaten.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

B: we have a lot of gold and copper in Africa. When man found he could use the stone as a knife he could also use it defend himself. You have salt and other minerals. The next thing you have to do to after you have what you need is to defend yourself because man became selfish and didn't want to share with his neighbor what he had. As a matter of fact man used metals to defend himself. The general wellbeing use of metals includes the eating of the gold powder for wellbeing. You can find articles on the internet on ingesting gold.

Why Do We Need Minerals?

The body needs these mineral elements for the proper functioning of the human body. These needs include the proper formation or function of: Blood, Bones Teeth; The body's physio-chemical processes; the physiological processes that the body's internal organism uses to maintain water balance, etc.

123.21

The Right Dosage

The right dosage or balance needed for the proper functioning of the body can be categorized as:

Macro Elements: Dosage requirements greater than 1 gram

Micro Elements: Dosage requirements less than 1 gram

This is what is known in nutrition science as trace minerals. If you take too much or too little you get problems so you have to balance what you take in through eating. But, in the Magrav environment your body takes only what it needs.

Source of Minerals

Minerals are normally found in our food and in water we consume. For example, foods like wheat, maize fresh vegetables, fruits, sea foods, meats and oil.

These are sources of minerals for the bodies.

The Theory of Dr. W. H. Shussler

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

According to Dr. W. H. Shussler (1821-8898), a physicist, chemist, and homeopathic doctor, there are 12 salts essential inorganic minerals that the body needs to act optimally, every day. According to Dr. Shussler any deficiency in these inorganic compounds could create disease and dysfunction anywhere in the body. Restoring the body to proper state is easy, as each inorganic salt in deficiency can be identified by the symptoms their presence or absence creates in the human body.

This has been proven by medics all over the world. If you have a headache medicine will have you take aspirin, codeine. But when the person is eating properly. Research on Shussler as there is much good work. I made a gans water plasma for someone to expel phlegm. That was a sign that the body had accumulated phlegm. When you lack balance, mineral or metal, in your structure you will experience deficiency and this results in the diseased body.

The Causes of Diseases

The Essence of Disease in the body is therefore the deficiency or the excess of these essential minerals in the body such as Calcium, Ca (20), Magnesium, Mg (12), or Potassium, P (15). No balance means no harmony and you call it sickness and we call it deficiency.

B: Like I said earlier Mr. Keshe will always ask you to get lab tests and bring the results. We are looking for total harmony and your normal state of health.

Essential Minerals

Apart from the organically bound elements there is hydrogen, carbon, nitrogen and oxygen which are known as Amino Acids. There are other inorganic mineral elements about 20 or so which are essential for the healthy functioning of the body:

65% Oxygen; 3.5% Nitrogen, 9.5% Hydrogen and more (see previous table).

Macroelements

Macroelements which the body needs in the excess of 1 gram can be further grouped into two categories namely principal anions (-) and principal cations (+)

Principal Cations include Calcium (Ca), Magnesium (Mg), Sodium (Na), Potassium (K).

Principal Anions include Phosphorus (P), Chlorine (Cl) and Sulphur (S).

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

In a nutshell we can see the human body as a cell or a small battery. In the sickness we check to see if the body is too acidic or too alkaline. If you are too acidic the body is out of balance. When I was in school I read other books on homeopathic. I started experimenting in myself. The water you can extract from foods you test, you can check for acidic or alkalinity. You can see the effect on the body with the periodic table.

Macroelements – Calcium (Ca)

This element number 20 on the periodic table. Calcium's atomic weight is 40.08. Calcium (Ca) is responsible for the healthy formation of bones and healthy growth of the nerve cells. If a child is born and is calcium deficient, the child can develop rickets which will show the appearance of bow legs.

Magnesium (Mg)

This element is number 12 on the periodic table. The atomic weight of calcium is 24.32. Magnesium (Mg) displays an essential role needed for the formation of healthy bone structure. Its deficiency leads to muscle spasm which culminate into calcium deficiency.

The effect of magnesium can lead to the deficiency in calcium and an imbalance in the balance. You need the macroelements.

Sodium (Na)

This element is number 11 on the periodic table. The atomic weight is 22.99. Sodium (Na): the body behaves as a cell. Sodium is needed for the proper formation of the electrolytic structure of the blood. Sodium is also needed for the proper maintenance of health pH level and the Osmotic balance.

If you have a meter and put it at 22 you can see it is dependent on your body structure.

Potassium (K)

This element Number is 13 on the periodic table and the atomic weight is 39.098. Potassium (K) is also needed for the proper formation of the electrolytic structure of the blood.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

When you lose some content of the cell, you become weak; too little potassium is imbalance of the body.

Phosphorus (P)

This element number is 15 on the periodic table and the atomic weight is 30.974.

Phosphorus (P) is needed in the body for the proper structuring of the bones and the teeth.

It is not a hard and fast rule that calcium deficiency is the only cause of improper bone and teeth structure. You can do a feed so that you body is brought back into proper balance.

Chlorine (Cl)

This element number is 17 on the periodic table and the atomic weight is 35.4527.

Phosphorus (P) is necessary for proper intercellular and extracellular functioning of body fluids as well as maintaining Osmotic and proper pH balance. Phosphorus plays a vital role also.

Macroelements—Sulphur (S)

This element is Number 16 on the periodic table and the atomic weight is 32.066.

Sulphur (S) is an essential component of several key amino acids and vitamins. Sulphur is responsible for detoxification of aromatic compounds within the body.

If you not properly detoxified you have toxicity making you sick. Microorganisms thrive in your body. In the 1990s there was also a lot of research on worms and they are not in your stomach but run through your blood system. The blood is the sewer and it is 'dirty.' Some people will have asthma. Tissues have been analyzed and there could be decomposed worms in the body in thick saliva from the mouth.

Microelements which the body requires below 1 gram:

Iron (Fe), Zinc (Zn), Manganese (Mn), Copper (Cu), Iodine (I), Cobalt (Co), Nickel (Ni), Fluorine (F), Vanadium (V), Chromium (Cr), Molybdenum (Mo), Tin (S), and Silicon (Si).

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Iron (Fe): This element is Number 26 on the periodic table; the atomic weight is 55.845. It is an essential component of the respiratory pigments hemoglobin and myoglobin formation. It is also essential for oxygen and electron transport within the body.

It is essential for blood in your body and lack of iron causes you to be anemic.

Zinc (Zn): This element is number 30 on the periodic table with an atomic weight of 65.39. Zinc (Zn) plays an essential role in healing of wounds. It is a key component of more than 80 metalloenzymes. It plays an important role in the reproductive health due to follicle stimulating hormones (FSH). Zinc is active in the synthesis and metabolism of nucleic acids (RNA, DNA).

Zinc and copper oxide help with wound healing. Men can benefit from zinc in reproduction issues.

Manganese (Mn) is element number 25 on the periodic table with an atomic weight of 54.93. It is a cofactor or component of several important enzyme systems; it is also essential for bone formation, the regeneration of red blood cells, carbohydrate metabolism and the reproductive cycle.

You can find a lot of this in watermelon which is good for increasing reproductive health of men and women.

Microelements: Copper (Cu) is elements number 29 on the periodic table and the atomic weight is 63.546. Copper (Cu) is needed by the body for the formation of the pigment melanin and consequently skin pigmentation, for the formation of bone and connective tissues, and for maintaining the integrity of the myelin sheath of nerve fibers. Copper plays an active role in the metabolism of Iron and therefore hemoglobin synthesis and red blood cell production and maintenance.

Our forefathers used cooking utensils made of copper and lived long. In Auyurvedic medicine it is one of the essential metals that are used if someone has stomach problems. Water left standing in a copper cup and then drunk will help to bring relief to intestinal issues. We see copper oxide is too physical and works hand in hand in blood formation.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Cobalt (Co) is element number 27 on the periodic table with an atomic weight of 58.93. It is a very important component of cyanocobalamin (vitamin B12) and as such is essential for red blood cell formation and the maintenance of nerve tissue.

Iodine (I) is element number 53 on the periodic table with an atomic weight of 126.9044. It is a key component of the thyroid hormones, thyroxine and tri-iodothyronine, and as such is very important for controlling of the metabolic rate of all body processes.

Nickel (Ni) is element number 28 on the periodic table with an atomic weight of 58.6934 and is responsible for assisting the body to absorb when absorption is needed for the body. It is present in the RNA and DNA of the human structure. It also assists in absorbing glucose and plays a major role in the production of body enzymes.

Fluorine (F) is element number 9 on the periodic table with an atomic weight of 18.9994. It is responsible for strong skeletal structure as well as good teeth formation.

Vanadium (V) is element number 23 on the periodic table with an atomic weight of 50.94. It is responsible for controlling of sodium and the metabolic function of glucose and lipids. It also assists in reproduction of red blood cells. It slows down cholesterol levels in the blood vessels.

It is one of the amino acids.

Chromium (Cr) is element number 24 on the periodic table with an atomic weight of 51.9961. In its trace quantity it plays the role of ensuring an effective glucose balance. It also contributes to the breaking down of glucose as well as fat in the body. It is effective in regulating balance of insulin levels.

Molybdenum (Mo) is element number 42 on the periodic table with an atomic weight of 95.94. It helps in the breaking down of toxic build up in the body due to sulfites. It also assists the body in the production of uric acid.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Selenium (Se) is element number 35 on the periodic table with an atomic weight of 78.96. It helps the body to fight against infections. It plays an effective role in assisting antibodies to fight against bacteria and viruses.

Sediment Analysis: by definition a sediment is any particulate matter that can be transported by fluid flow and which is eventually deposited as layers of solid particles on the bed or bottom of the body as water or liquid.

Sediment analysis of Birium:

K: It was a very nice presentation. For those of you who listened to this, now you understand what is about to come. The elements that were state up to now are what we need for our life. Our ancestors and most of us today take it from drinking the waters of the rivers. In the process we have seen in the changes of human habits, some of the elements in the water have increased and some have decreased. In the new technology, plasma technology shows how we can bring

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

balance or reduce it. When this is shown completely then I will explain to you how significant the sediment study is to the Keshe Foundation and the work we do in the background. I see this is from another river and we will explain this. It is very important. On the other hand for governments, the Chinese authorities this is important for you as you have contaminated rivers and you see how simply this can be done. This has been done in Africa with barely any cost. These analyses have huge application in water desalination.

K: At the moment that costs millions of dollars; the emirates do this and they are rich nations and can afford it. African and third world nations do not have the millions to do this. Now with the introduction of a simple gans, we see the changes and how big the difference is. These tests are done with a controlled amount. If you produce and use higher quantities then you see total eradication. But you have to understand that we don't want to eliminate everything. We want to reduce this to a level that is acceptable. That is why when we see iron values in the test from 75 to 27 that is good. This is what we need. We need to be in a position that we can use but we still use the right amount that our does not become deficient. If we need to eliminate it totally we see we can do a second cycle. Please go ahead Dr. Nash.

Dr. Nash (Dr.N): with the sediments analysis as we see on the screen we set iron as the control and it was 75.849; after three treatments it was 27.481.

K: can you tell us, did you use gans in the test or copper wire that was nano-coated?

Dr.N: we just put the nano-coated copper wire in the water. With the copper wire there was a slight reduction to 75.134. But with the copper oxide there was a huge reduction to 27.481. Then for manganese our control was 79.724 and with the nano-coated copper wire the reduction was to 42.429. But with the copper oxide treatment it dropped to 19.260.

K: has the copper gone up?

Dr.N: the copper has gone up from 37.273 to 69.633 because you are using copper. With lead it went from 40.001 to 2.085 with the copper oxide treatment. When you come to nickel the control is 165.613 and it dropped to 141.749 and then with the copper oxide it dropped to 37.560 which is very significant. For Cadmium it was below the control levels throughout. For Cobalt it was also below the control levels. Arsenic levels went from 0.493 in the control to <0.001 when using the copper oxide. Mercury controls started with 0.904 and finally with the copper oxide it was below levels at <0.001.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

K: may I ask a question? The nano-coated wire is number 2 in the test and copper oxide gans (water) is number 1 in the test. Why do we see the increase in lead in the copper oxide? Is there an explanation?

Dr.N: yes.

K: so the control was <0.001 and then with the copper oxide it was 2.085? Is this correct?

Dr.N: yes.

K: this is interesting as there is an increase in the copper because you introduced copper to it. If you use the plasma of the copper oxide, you will eliminate that. You have data from River Birium? Do you have that with you?

Dr.N: I don't have it now but I can get it.

Sediment analysis of Offin

Sample Analysis Report

<i>Total Cobalt (Co)</i>	<i>mg/kg</i>	<i><0.005</i>	<i><0.005</i>
<i>Arsenic (As) by Hydride</i>	<i>mg/kg</i>	<i><0.001</i>	<i><0.001</i>
<i>Mercury (Hg) by Hydride</i>	<i>mg/kg</i>	<i>1.800</i>	<i><0.001</i>

Comment: results presented are based on samples as submitted by client.

Dr.N: there was little sediment treatment for evaluation. The control of the raw sample is #1 and the treated sample is #2. So iron started at raw was 12640.80 and with copper oxide treatment it was 78.198.

K: did you use copper wire or copper oxide?

Dr.N: copper oxide is what we used. For Manganese untreated is 401.40 and after treated it dropped to 33.884. Then we have copper that started at 400.80 and after treatment dropped to 119.329. For lead both values are <0.001. Then we come to nickel which started at 2943.60 and after treatment was 168.053. Total cadmium was <0.002 for both untreated and treated. Cobalt was <0.005 for untreated and treated. Arsenic in both treated and untreated tests was <0.001. Mercury was 1.800 for untreated and <0.001 for treated. These are the Offin sediments analysis.

K: what is your conclusion?

Dr.N: the conclusion drawn here is the drop is significant for iron and in all the trends you could see the treatment was significant. Nickel was a significant drop. We see clearly the efficiency of the treatment using the copper oxide gans. We did a third test on fish tank sediments.

Dr.N: the green tank is the control and the yellow tank is created.

K: Dr. Nash in the river waters what is interesting especially because we know from the past there is gold mining and exploring for diamonds and more in these rivers as Benjamin explained to us. Have you evaluated the metals at the bottom like gold or silver or did you measure.

Dr.N: we have not for now.

K: please, we would like the data for gold, silver and other metal. When you get those done I will explain why it is important. There is data we will use here in the coming days in our development and teaching with the government. Can you go back to the one step before Offin, the first river, The Birium? What is interesting in what we see here is the reduction in mercury. We see the reduction in arsenic and most of the elements. Mercury is one of the biggest problems in the western world because it is used in dental fillings and this shows that if you use the gans water copper oxide, or to start with the CO₂, you reduce the amount of mercury poisoning in the body of the man.

K: this is extremely important. It has a lot of application that we have discussed. Look at the drop in arsenic and this has application in the world of science and medicine. This is fantastic what you have shared. Do you want to add anything Dr. Nash?

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

DrN: we are doing something in the background that we will share with you. We will get the results and share with the world.

K: how is your agriculture development going?

Dr.N: yesterday we started treating containers of seeds. We will share step by step and share the results.

K: Benjamin it is important with the agricultural side that you join us in the agricultural teachings on Wednesday mornings. Do you have pictures of your teaching a couple of days ago with the pre-doctors?

B: I sent it to Rick and it was University of Ghana. There are 30+ students who are itching to know what I am doing.

K: thank you Benjamin you are doing great work in Africa. What is the position of the conference in Ghana?

B: I am finalizing and fine tuning some things we want; a committee has been formed here. I am sharing the technology with 50 students. We were actually using the conference room the chemistry lab and they needed the room so I had to go through my slides for the students very quickly. These are biochemistry, applied chemistry and agriculture backgrounds. I shared in a way that everybody could get some of the technology. The topic was *Influencing a Better Tomorrow Using Plasma Technology*. This cut across transportation, health, forensics and medicine. The students were fascinated and especially about the flight system. They asked me to come again and present it again.

K: do you see Paul in the background?

Paul (P): I am here.

K: would you share the knowledge with us? Hopefully we get to meet Benjamin and Paul at the Keshe Foundation October conference in Ghana.

Let me explain the insight Paul has brought in with the different way the Africans ancestors used to use and understand the technology and he brings that to us now. 2.24.55 minutes

P: presentation

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Gans produced another way.

P: We will share another way to make Gans with the mind; we exposed the different value by putting the concept. On our presentation we will offer another way to make Gans with the mind and we will expose using sheep, chicken and beef fat. Mr. Keshe asked me to make a presentation on making Gans with the mind.

Education background: a. Education on human body and human essence; b. knowledge about creator; c. knowledge on different creatures; knowledge on different energies which component the things in the universe. ($E = m$).

P: We have learned to practically how the body of the man has been done and how we can manipulate this body. We started learning this about 3 years after we are born. We learn knowledge about the creator and they offer how the creator is creating. After we get our education knowledge on different creature that teach us how to live with different creatures, how to understand and interact with them. After we get knowledge on different energy which components are in the universe? They show us that the energy is equal to the matter. That shows us if you want to get to the matter you have to get to the totality of the energy of the background. If you want to get to the matter you have to learn in the background how to manipulate the field of plasma and energy to be able to combine the different fields to get to the matter that you have. For them, they show us that energy is equal to the matter so if you want to get the matter you have learned about the energy about the specific matters. If you want to get the energy of a certain matter you have to learn how to control. This shows us how to connect to the energy and the energy to the matter.

Knowledge about manipulation and transfer energies from anything in the universe to another one (Earth energy, Air energy, Water energy, Fire energy).

Knowledge about how to use your own energy to block any anti-forces against you (we have learned how to break the stone, iron, any matter with the mind).

P: Before we have learned for instance to use plants, stone, everything in the universe to produce something else. From there I have learned from more than 300 plants what we can do with them. We are playing with the plants and using the energy for different creatures to play with this. Here specifically we have the energy of earth, air, water and fire. The plants are using energy from the environment and to become what they want to become. We are using the plant or the creator to get what we want. We must start to move the energy from the leaf to get what

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

you want without touching the plants or the creators. We know the total energy of the air without touching a creator. We have learned how to move energy water to get what we want and the same from fire. From these we have learned how to use the energy of the leaf of the plant. If you have problems you can move energy from earth, air, water or fire and transfer it in the body of the man. He gets the totality of the energy and becomes stronger than ever. We learn how to manipulate energy like Mr. Keshe is showing us and to get everything we want.

P: from there they teach us how we move any matter from any mass with the mind. They teach us how to break any matter from any force coming against you. After we get the knowledge of how to use our own energy to break an anti-force against you. We have learned how to break the ion.

So we have learned how to break iron and stone with the mind. We have learned how to break or destroy with the mind. Our education programs that we have on the knowledge were concentrated on using the mind to make anything you want.

Why should we think about another option to get Gans?

Answer: Impossibility to get the material and possibility to extend the knowledge.

How have I produced Gans without nano coating?

Answer: I have used the method of transferring the energy, cooking the thing in the universe with the mind and the motion of the flow of the energy from the Earth and from the Sun.

P: so they teach us that according to all the background we have I have question: why should we think about another option to get the Gans and you were saying it was impossible to get the material here from Africa and the possibility to extend the knowledge to let people enter another dimension. This is why we are giving this knowledge. How have I have produced the Gans without nano coating? So first I said I have used the method of extracting the energy and think in the universe of the demand and flow of the energy from the earth and from the sun. We have learned in our education how to, for example, the energy from the sun to any place in the universe. So we have used this technique to move energy from the sun and to move energy from the center of the earth. We have energy in the center of the earth. We have first moved these two energies. We have used this process to be able to create energy like the creator.

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Process

Find a stable environment; sit down comfortably; unify your body, soul and spirit; connect yourself to the universe; use your mind to capture the energy from the center of the Earth and bring it to your level; use your mind to capture the energy from the center of the sun.

They ask us to be the Adam and Eve of the universe.

P: to make the Gans this is the process I will show. First we have to find the stable environment. Use the processes above. It is important to unify your body, soul and spirit and this process is not possible without doing this. You have to be one to connect to the universe. Now you connect yourself to the universe and when you do that you can now operate like the creator. When you connect yourself to the universe you use your mind to capture the energy to the center of the earth and bring it to your level. Go inside the earth and move the energy from the center and move it somewhere in your environment and keep it there. This is the first thing. The second you use your mind to go to the center of the sun and get energy and bring it to your level. This is the second process.

Put the energy that you have captured into your bottle (you will previously have put water in the bottle and on different plates. Make a connection of the wire on one of the plates at the plasma field of the universe. Disconnect yourself from the energy of the universe. Then after disconnecting, put the bottle in a safe place and after 21 days you will have your Gans.

P: when you have done these steps, you have to put the energy that you have into your bottle. Before you do that you have put water in the water and on different plates such as zinc and copper. You did this before you started the energy process. When you captured the energy you concentrate on bringing it to your environment and then you move it into your bottle; you did this with both the energy of the earth and the energy of the sun. You make a connection of the wire of the plates and the plasma field of the universe. You don't make a physical connection. You just put the plates in the bottle and connect them with the plasma field of the universe so they have enough energy to produce what you want. When you finish this you disconnect this from the environmental energy; this is energy is too powerful to stay connected. It's like you want to jump and move in the universe, so you must disconnect yourself and you have to be unified on this dimension. You have to disconnect yourself or otherwise you will go into space because the energy is too powerful and you will become like the energy from the sun.

After 30 minutes, you disconnect yourself from this energy.

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

P: after disconnecting you put your bottle in a safe place and after 21 days or more you get your Gans.

K: his line of thought is very strong...he's disconnected from the conversation.

P: my network was disconnecting. Sometimes it is 7 days and I have the gans and sometimes it takes 21 days. It all depends on your concentration and the work you have done or the energy you captured and put in the bottle. When you capture the energy and put it in the bottle. When you bring the energy from environment from the sun center and combine it and put it in the bottle you put your intention to only copper. It is like the same process like Mr. Keshe has shown us. It is still nano coated but at the plasma field state of the environment. This is how to make Gans.

K: can you show us the bottles you showed us last time please?

P: I don't have it here.

K: carry on.

Cancer Medicine

P: according to what Mr. Keshe exposed last time I was asked to use the fat from the animals and test this. For this we used:

Components and Properties of Ingredients

We used fat from sheep, beef, chicken and person.

Sheep fat + citronella + lemon +soursop +ladie's fingers +CO2 Gans Water.

K: what you are showing is highly scientific and he showed the chemical components of the elements on last Tuesday's teaching. He showed the components within the structure of the materials used. He has put the full detail as they have in Ghana. Soursop is an African root; Paul has a proper definition of the components within this. He explains how and then afterwards I will show the connection of this.

Components of Sheep Fat

Saturated fats: 50-55%

Unsaturated fats: 43%

Saturated Fats:

Palmitic acid: C16:0

Stearic acid: C18:0

Unsaturated Fat

Palmitoleic acid: C16:1w7

Oleic acid: C18:1w9

Anachidonic acid: C20:4 w6

Omega 3

Omega 6

P: ladie's fingers we have decided to put these because we are using. We have added ladie's fingers to make the body recover very quickly. We have the component of sheep fats above. The sheep are from the butcher; I bought the fat from here. I have shown the components above. If we see separate fats we can get palmitic acid with carbon 16. Stearic acid and the Carbon is 18. The palmitoleic acid we get carbon 16; oleic we get carbon 18 and anachidonic acid we get carbon 20.

Omega 3

ALA (Alpha Linolenic Acid)

γ-linolenic acid: 18:3 ALA

Eicosapentanoic acid: 20:5 EPA

Docosahexaenoic acid: 22:6 DHA

K: when you see a component like this with the 18:3 and the EPA and DHA, these are components that the fats are come from an animal that is free in nature and it is not brought up in

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

heavy farming. The component of EPA, when you are short of it, you have attention deficiency. If you don't get DHA you become hyperactive. Our ancestors used to eat the fat of the chicken that has the same composition. Now we buy from shops that have more EPA and you will have a hyperactive child. You can go to the pharmacy and buy a product called more EPA. 500 ML 300.15

K: you see the child just comes out. When you have hyperactive children you use DHA. This is how our bodies converted to use what the animals and plants supplied to us. That is why we see the Africans are still very calm people. They still have the knowledge of farming and don't have mass farming like we have. When you see a factor of more than 6 that he will explain, this is a natural condition. The mass production in chicken farming means they don't have the 22:6 DHA and we are not receiving the amount we need. That is why we are seeing hyperactivity of children in schools. In Africa they naturally receive what they need from their food. The animal in the mass production farming has stressed the animal so much that the EPA has disappeared from its blood. These are highly scientific data that you are seeing in front of you. We understand this in the background because we are using this in the science of the space technology. This is very interesting data that Paul is delivering. This is more scientific than any professor in the West can supply you. This is the natural science of man and it is explained to us in the language of the West.

P: next step please.

K: these are the components within the elements of this fruit. What Paul has done has helped an Italian gentleman who understands your work. He will use this with garlic and our doctors in the medical section in South American and Peru have a food that has the same process you are showing. They are adding this to the gans. The doctors in South America and Europe are using the information that you have opened our eyes to. We will bring this out to the public once the doctors are happy to present the public lecture. You have explained how fruits and vegetables as medicine. This is exactly what is done by the medical center in Peru and she told us of a fruit. Is Dr. Klaus here?

K: please don't mention the names of doctors. When we come back we will explain this to you. The materials which you see are very scientific and with the doctors and those in the US who are part of our teaching are using the vegetables with this mineral content to combine with the gans. They are using it in conjunction with the zinc and they will bring a new dimension to medicine and this is why governments and the armies want to join in. You have opened a new door. It doesn't work unless you add the gans to it.

K: I have to explain what you are putting on the table is highly scientific and it's beautiful the way you have presented it.

The Chemistry of a Lemon

What makes Lemons Sour?

The sour taste of Lemons is caused by the presence of organic acids. The major acid in lemons is citric acid which makes up around 6% of the lemon's juice. Other acids are also present, although in much lower

concentrations than citric acid. Malic acid is one of these present at around 5% of the concentration of citric acid.

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

Vitamin C, Lemons & Scurvy

Lemons contain high levels of vitamin C, also known as ascorbic acid. The levels in lemons are around 50mg per 100g on a par with oranges and around double the amount of limes. Vitamin C deficiency can lead to scurvy, a disease that causes loss of teeth, jaundice, and eventually death. In the 1700s all British ships were required to provide a lemon juice ration to all seamen to prevent this disease.

K: you have to go to the Tuesday teaching to understand this; it has been explained before. Carry on.

Citronella

P: Mr. Keshe I have discovered that a component of citronella is CH₃,

K: good morning!

P: the component of citronella is CH₃ and we can get CH₃ from citronella.

K: this is what you call lemongrass.

P: yes. I want everyone to know how citronella is connected.

K: when you have CH₃ it is an energy supplier and it delivers a huge amount of energy in a Gans state when you transfer it into Gans. It is an amazing product. When you have a lack of energy, you mix this with the Gans and it is like eating a gallon of (oranges?)

We have introduced Ladie's fingers. (3.10.48 minutes for pictures)

Molecular Components of Ladie's Fingers

Crude protein 23.36%

Carbohydrate 42.68%

Palmitic acid/C16:0 32.14%

Linoleic acid/C18.2 30.94%

Oleic acid/C18.1 29.13%

Iodine value 112 mgl2/100g

Sponification value 182.20 mgKOH/g

Peroxide value 7/31 mg Equv.O2

We decided to add Ladie Fingers.

K: explain to us why you added the Ladie Fingers.

P: When someone has an accident we use it to let the body of the man brings back its own structure. It helps the body to grow tissue very rapidly. If you can put it in cancer medicine it will help to get balance rapidly when placed with CO2 gans water. This will help to grow the tissue of the man rapidly. We are helping the body to grow tissue.

K: are you doing this in Africa?

P: I am doing this for a person.

Cancer Medicine 1

Sheep fat, Ladie's fingers, citronella soursop, CO2 gans water.

We mix the ingredients and cook it and add CO2 gans water. When we are cooking we want to extract the elements from what we are using. Everything was put together in the pan. I added the CO2 gans water. I cooked it for ten minutes at a boil. All the elements of the sheep fat disintegrated. This is what I have extracted and how they look. After 3 hours it becomes white and solid and it can be used by the individual. This is the Medicine 1 with the sheep fat. (pictures at 3.17.45 minutes).

Chemical Components of Final Product 1

Crude protein 23.36%

Carbohydrates 42.68%

Palmoic acid/C16-0 30.94%

P: The mixing is the same process with the other fats with the same elements and put to boil to get the extraction of the elements. You can see the chart for the beef at 3.39.08 minutes.

K: how do you apply the medicine?

P: if we detect where the cancer is, we rub it on the outside of the body in that area. Now I am making another medicine in liquid form to drink with CO2 gans water because I was contacted by another person whose wife had cancer which is inside of her. So I devised this to use the liquid that we have mixed with all the elements to drink it. The other cancers we can rub on the outside of the body. Mr. Keshe this product is very mysterious. If someone gets in an accident and 4 days I gave him the medicine and he rubbed it and after one day he could walk and yesterday the injury was all healed. Another person had _____ and I rubbed it. It became very big. After 2 hours it was ready to be opened. This morning he said he was fine. This is very, very powerful. So I am giving it to be tested.

K: let me explain how we our doctors are using it. Because you put the CO2 gans in it, you can add it at the end or during the process of cooking. The gans is not affected by cooking. But if you add your gans after cooking, now the matter inside the liquid becomes a gans state. All the components you have used are in the gans state. What we have seen with the South American doctors is that they use this as a coating on the nano coated coils. You can use as the coating for your coils for those doctors who are listening. This has shown to be working effectively. Now that we have new knowledge we are asking the doctors to use this as nano-coating on the coils and apply nothing directly. In the case of the work of the foundation we coat the coils and it is in

Transcript from 120th Knowledge Seekers Workshop held June 30, 2016 – Part 1: KSW

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

the gans state that is used. The pen coils can be used. We don't consume it or touch it but it is added to the coils. This is fantastic information you have brought us and we add this to the blueprint of the other teaching that you brought us before. We have medical doctors that are using different herbs and saturation of different elements and giving us reports. They are using it for cancer and more. This way we build the magnetic gravitational fields of the elements and you never come in touch with it. As you said use the fields of this. This is beautiful, thank you Paul.

K: Paul, May I ask you a question and you know where we are going because we talked about this last week. You were put on the list of the "Keshe Foundation victims." Did you put yourself there or have you ever heard of the Keshe Foundation Victims?

P: no, I never do this.

K: so somebody forged your name and put there to be a victim.

P: yes. I was never in touch with any of them.

K: I understand you have never been in touch with Red Circle and he is forging and using Africans and African names to put on his list because he knows they are rarely checking the list. If you will hand your emails to the Interpol and CIA and the Russian Agency we have explained what this is.

This shows another forgery and deception headed by the Red Circle criminal organization. Thank you again, Paul for your work. Hopefully we learn more from you next week.

P: I am working to build to work with something with more gans.

K: As I said, Africa will shine. Those who think they are 'above' the blacks have used and abused them for centuries. Now you see scientists, natural scientist (Paul) was put as a victim of Keshe Foundation by Red Circle.

K: Now we are gathering evidence for the conviction for murder of Mr. Red Circle of a number of scientists. They go out and create false information that there are a lot of victims and there are no victims. If you look on Facebook Red Circle, one man has entered the list of everyone himself. We have taken a photo shot of all lists on Facebook. Because there is a condition of murder (by Red Circle) we will show you after this teaching the facts about Keshe Foundation and we ask the same from Mr. Amini who received a call from Suzanne who is part of this Red

Circle organization that is financed by G plus One and organization that sits in Israel (not necessarily Jewish) that is trying to milk the human beings out of everything they have.

K: We will give you evidence today of a man who is a scientist who became a victim without his knowing it. There is false information all over the internet by Red Circle about Keshe Foundation. He has planted 600 names put in by forgery. Keshe Foundation has no victims. These accusations are done by one man who has done this to a number of people. You will see documents today and we have organized two websites which we will announce later on. We put all the names of the children and the scientists that this man has murdered. This is how it is done; you will see the whole pattern of the work by Red Circle and you will see suddenly how everything has changed. We have become victims and if you are on the internet with an African name Red Circle has put you on his list as a victim of Keshe Foundation.

K: there are a number of organizations in Belgium that are involved in these kinds of scams. They (investigators) are rapidly moving into Belgium. Yesterday it was announced that of 75,000 pedophile people around the world in the biggest pedophile ring ever uncovered and over 300 people have already been arrested and put in prison including Mr. Alan Sterling. He was the last pin they needed. Now we see the head of the Mafia organization, doing child abuse, sexual abuse and advertising on the internet to get children. He has discredited scientists and politicians because he is a very well organized criminal. We open the books to show you. Paul was one of them put on the list for Keshe foundation victims for 6 months. We set the trap for him last week and he fell for it. A number of people who he is writing about are working with us in the background until we lured him where we wanted. We wanted to show that he and his daughters are committing child abuse and we have the proof of it. They target the children they want and they get what they want. We used the same process and we got the evidence.

K: let's go to Arman who has something new to show us. Is he still there?

V: I don't see him on the list.

R: he said you wanted him to show the picture he wanted to share. (3.51.35 minutes).

K: ah, yes. This is important for those of you who are in testing different things. Arman was showing this a couple of days ago. He is in America and we have more communication with him than they do there. What this is, is very important. If you produce amino acid on top of your CO2 boxes. Each one of these amino acids has different properties. I explained this in the doctors' teaching yesterday and this is good for the public knowledge. That is, when you make a

(v2 2016-07-09) DRAFT (Transcription has not been verified. Double check info with video)

CO2 box, the amino acid you collect on top contain two or three different amino acids. The ones that are near the copper sometimes have a yellow-reddish tint which is for the red muscles. The amino acids on the zinc side are more white and these are for your neuro system. If you use different plates, like zinc plated, we have them here in the lab, you see them and each plate makes different kinds of fats/amino acids because they absorb different kinds of carbon, hydrogen or nitrogen. You can see the fat is very different than if I bring a fat from the CO2 box which creates a soft fat.

K: If you look this amino acid is very thick. Look at the closeness of the plates and it has created a different type of gans. If you look at the amino acid on the copper it is very different from the CO2 amino acid. Each gans nano texture of amino acid has and possesses different energies. When you go on your structure of working and making as we saw with Paul each amino acid in these containers absorbs a certain kind of energy fields to themselves. Even though you have COHN it is not all the same. Each plant, each tree and each time you breathe in and out we create different amino acids. If the system you made has a matching gravitational magnetic field, you absorb it. Or it absorbs itself.

K: When you have the box and you put in it a copper plate or you make another box and you put the plates in it, even though the waters look the same each box has created a different magnetic gravitational field in it. (3.57.29 minutes). So this attracts different carbon strength, but the same oxygen, nitrogen and hydrogen. So one box might have C12-2 and the other might have C12-1. So the first amino acid could be for your lung, where the other could be used for the tip of your toe. Just because you collect amino acids from your containers does not mean that they are the same. Each plate has a different amino acid. As we explain the knowledge of beating the coils and liquid you can bring it together in a very powerful energetic combination. For example when you put 1000 beats per revolution everything goes to about 12.41. If you do this at 1400 rpm you may get 12.18 as an example. So 12.41 is for your brain and 12.18 is for your toe. So when you make these amino acids do not forget that these are all different and you can use them for different applications and different purposes.

K: in so many ways everytime you create even your amino acid in one container is different if it is on either of the sides or the center. (3.59.34 minutes). You have to understand. If you don't have that much amino acid, then always use a container where you drain the gans from the bottom and the amino acids do not interact. That is the only way to get pure gans of what you are making. When you use the syringes to go into the mixture when you bring it out it is oily to the touch because you absorbed the amino acid. Whatever you absorbed into it you transferred

to the gans that you brought up. To make a non-contaminated gans you always need this process and you need to understand that you are in a magnetic gravitational environment and everything counts. Everything is well in hand if you understand it and you can produce everything you need.

R: I have a communication about more pictures from Dominique (D). They are from the workshop on some of the things are building form the earlier workshop we saw today.

K: let's share them please.

D: I come from France near Limonges; these photos are of my workshop which was for cabinet making. I met Jacky who showed me a lot of things so I can share the knowledge. The purpose is to share with friends. I agree with the presentation and the purpose for me is to offer to people who come with all the literature to make their own coils and more and also their friends. So they can leave the workshop to make coils without electricity where you can use the hands. There is nano coating with a little fire on it. Then I did a drawing to show people what we are doing. It gives them detail to understand where the current goes and where the flow is. And I have gans production for the coils and I offer people to go home with a kit with the plastic box, the nano coating and different plates and for people to be able to make the gans by adding water and salt. I made a set up with the coil stacks (4.06.10 minutes).

K: how do you teach? Do people just come to you and you make everything?

D: people come because I offer weekend workshops and I prepare all the kit components for them to take home. They make the coils, nano coat. And I want to offer them to feel in the body when we use this technology and an explanation of how they can connect the unit at their home.

K: thank you for sharing.

K: people have been doing workshops and we are organizing so more people can come in. Please send your application at workshops@keshefoundation.org and we support you if you want to teach 30 or 100 people a month and you can make this into a beautiful job.

K: this picture sent by Dominique is fantastic. (4.08.34 minutes). You see a globe at the bottom and you see a paper behind it. What is that?

D: it is the peace treaty for everyone to sign at the beginning of the work. This is very important to me.

K: this is the paper we put out 4 years ago and you sign for the technology of peace. Millions of people around the world have signed it and committed themselves to world peace. You can download this and this is between you and your soul to use this technology for only peaceful application. There are 17 or 18 languages on the website. We ask the military and governments to sign it and some have. We know that one person has signed it in his personal name, but not the name of his nation. We salute you President Obama but we have to see how the nation and the person come together.

K: it is important that we understand the change and giving it to the ethos of the foundation. Let us support you in a way that becomes a new cycle of friendship, work and peace. Thanks for your time.

(End of workshop.)

(Note: After the workshop, Mr. Keshe gave a 1.5 hour “Disclosure” on his personal history and the exposing of the Red Circle. The transcription of this portion is in a separate document)
