Draft v3

Transcriber's Comments

If you thought last week's workshop was deep, welcome to an even deeper dive into the mysteries of the soul and how understanding of the soul influences construction of the spaceship. Being Christmas this was expressly addressed to the Christians, though MK being steeped in the Zoroastrian heritage long ago revealed that this date, the Northern Winter solstice, is in fact Mithra's birthday, borrowed by the Romans about 2000 years ago, and even more surprising that Mithra was a woman! (This was revealed in Workshop 33, long ago transcribed into [Book 5 of the First Year of Workshops](#) – see the section entitled 'Go back to the Zoroastrians')

Quite a short but concentrated workshop, this starts with announcements of developments in Japan, and especially Ghana where a partnership has been created between the Ghana Atomic Commission and the Kf Ghana... see the logo in the picture. The rest of the workshop is for those interested in how our souls fit into the greater picture taking account of the souls of plants, animals, planets, stars and spaceships, and how we need this understanding if we want to fly...

Going back to last week's teachings on the creation of man on this planet and the creation of life on this planet.

The sun, the earth, the position and gravitational magnetic fields of the earth where the tentacles of the fields reach every part of the universe.

Now you have to find the heartbeat of the Soul of the Man

Wherever I lay my head is my home

Living a Simple Happy peaceful life in Africa

Pending calamities beyond the imagination

More clues for construction of the Arizona spaceship

014754 Azar: good morning; I have 3 questions.

Yvan asks if we add Silver Nitrate to production of Hemoglobin?

A question from Andreas on flying

A question from James; could you discuss the concept of dimensionality and realms of existence?

Would the soul of a spaceship be a little bit like the soul of a new child that was born?

How does the Soul affect the DNA and RNA?

Merry Christmas and Happy New Year for those who believe in the path of Christ

Transcript

Rick: welcome to the 152nd KSW.

0638 Mr. Keshe (K): good morning, good day wherever and whenever you listen to these knowledge seekers series of teaching. First of all, I wish Merry Christmas if you are in celebrating and Happy New Year for those of you who believe in the path of Christ, which is on Sunday. We hope the New Year brings new horizons for those who see life in a different way. Today we try to go back into the depth of the teachings. As usual we will try to show you what is new from our point of view.

0729 K: In the past year or past 12 months we have seen achievements and progress. We see the coming year as the pinnacle of developments for the Keshe Foundation (KF). We have put considerable time and finances in supporting research. In the last days and weeks of the foundation this year we see our investments are correct and starting to pay off. Those who surround the KF came in as volunteers and who have put their lives and time in the KF have seen changes and movements that were not always expected. This had to be part of the report as we also did at the end of last year.

0835 K: we have changed the course and we carry on investigating in the past few months. It is necessary to guarantee to support the global structure of the KF. Those who are close to us and have seen us move in so many ways with the structure of the financing. They have tolerated this and will into the first part of the New Year until the changes are complete. My aim is to bring KF worldwide under the same banner and in the same strength and we have achieved it. World recognition and understanding the technology has been our objective. We have established 2 or 3 factories in the past year and especially now in KF Ghana. We are moving into the space technology in Ghana.

0935 K: you will see in the next few weeks the prestigious new center in the coming weeks and we have allocated 20,000 square meters for the space hospital that will be developed this year. We have received confirmation for building the first space launch pad in Ghana in the coming 12 months. We have reached government and they see what is going on we start seeing collaboration and co-operation in Ghana. On the other hand, we have invested huge finances in Tokyo and in different directions in the Far East because the tests that needed to be done on the scientific basis. KF did a lot

on testimonials and a lot on our research. After 15 to 20 years of teaching and working the scientific organizations are doing their independent due diligence on what we claim and what we are doing. This is what we have been looking for.

1105 K: the results and support we received from Tokyo University are amazing. I thank the people in charge for supporting us and relentlessly providing every facility possible to us to be able to find more and more in the research. As we told you the first phase was completed a couple of weeks ago on the CO₂. The 2nd phase will be finalized tomorrow on the cancer cells. I have seen part of the report that is to be published on the back of the second cancer test trials. The report will be submitted to the health authorities. Cancer trials in Ghana will start in the 3rd week in January. The data coming from Japan confirms the GANS cells using CO₂ need 24 hours and the final test conclusion is today. Now they are testing more in Tokyo.

1248 K: What this means is that according to the report the new method using GANS material in direct injection in tumors can lead to the total change of the tumor to nonmalignant. The process is the same for other cancers. What this means is a fundamental shift, and we will go worldwide in the coming weeks. By injection of the GANS on a specific way and processing and production which has been developed by the KF, the injection of CO₂ and other GANS materials in a specific way in a process developed by us can be used in replacement for regular therapy. Radiation therapy has been one of the biggest problems in the world of cancer with the side effects of the burns and more with not much success rate and many side effects. Our process will replace this. We see this as a process and not a treatment. KF considers this a process.

1439 K: we can inject the CO₂ GANS material directly into the condition of the tumor and watch in 24 hours as the tumor goes into reduction. According to the report this process has no side effects and the injection of this material and different types of GANS into the blood is a safe replacement for chemotherapy. This changes the whole spectrum of the cancer process. We do not go out to destroy to chemotherapy but we offer this process to the pharmaceuticals (companies) that are using chemotherapy to replace the chemo with all side effects with these injections.

1557 K: we work openly with scientists and doctors in several countries with full supervision of health and government authorities for initial and final

testing. We entered into human clinical trials years ago. We did the whole things backwards. We saw it works on humans and we now come back to the scientific confirmation. The scientific confirmation confirms the human trials that have been done by all of you across the world. You have used this on your wives, husbands, children, friends and patients and you have seen the results. Now the process is more detailed.

[Some New Understanding on how the Immune system works and further developments in Tokyo](#)

1656 K: the scientists involved in this research are puzzled, and in the past week we discovered something very interesting that was hidden from us in respect to how the immune system works in the man and how and why it works. We introduced a number of new GANSeS into the process that we knew are effective for eradicating diseases. We have seen amazing results and for the first time in modern science we can explain how certain elements in the structure of the immune structure are there to replenish the production of new cells and safe cells without cancer. We have seen rapid growth of the replacement cells for the cancer cells. The body uses the environment of the GANS to use in an interesting way the energy of the tumor for the betterment of the body of the man. This means they become the food for healing the wound at the point of the damage. The process is exciting and we have tested in the past 7 days on the back of the new tests where now we see how we can speed up the replacement of tissues. If you have tissue damage, muscle, cartilage, or flesh damage we have seen a process in the past seven days where we can speed up the recovery within hours. It is a very interesting development.

1919 K: our objective was to find the interaction between the immune system and the production of the cells. We went in using the materials as the replacement. The new combination we have developed is that in one hand the cancer cells are diminished and the healthy cells are rapidly growing at the same time. The test on the stomach cells today and tomorrow will confirm this in full view of the report. We have seen total change in cancer cells within six hours with certain GANS but they need specific dosages and characteristics. This means that we can bring a new process into the whole understanding of even infections. What we have seen in the past couple of weeks in the second trial, which are sideline trials to the mainstream tests for the cancer, is that we see immediate results.

2057 K: you don't need to wait months and weeks; we see it within hours. These tests confirm and change a lot in what we have assumed in the world of medicine in respect to infections and recovery. We have discovered the element that leads to the production of the rapid recovery of any illness. This gives us a new insight and is a major breakthrough in the world of science and health. We could understand and see this process for years and now we have found the element which is the key for the process of recovery from any infection. This has been important for us. We know through the GANSes that we can overcome viruses. This was important in the level of the molecular restructuring of the cells. This is important in replacing damaged heart cells and tissue and damaged brain cells and tissue.

2222 K: This has opened new horizons and in the coming year we will launch a 2nd line of research in Tokyo which is on this level. We open a new side of medicine in Ghana University that specifically targets immunization and recovery from infection. This changes a lot. This test has opened new avenues. We invite governments to join us for rapid deployment of the technology, which is safe and now we have the scientific data and reports according to the international standards confirming this. The reports have been submitted to the authorities and GANS of CO₂ and the GANS of different ratios are safe. They are not toxic, and effective immediately. Now we have to understand how this ratio of the GANS works on different parts of the body of the man. We saw this with the gentleman who tested for the lung cancer for his wife and used seawater in northern Europe. Now we can say to you sir, that you did the right thing. The use of CO₂ is a major breakthrough in health applications. We have scientific data that we have gathered.

2415 K: on the back of what we have gathered there is a spin off company in Tokyo, the same as we did in Ghana, with the shareholding of the Japanese authorities and with the university and we ask that this be started next week. After the 8th of January, the company will set up the same kind of shareholding with the university and government authorities in Tokyo. This brings a huge return for the Japanese research centers. They finance the understanding and we finance the rest. Getting scientists to accept this was the biggest problem to get them to at least give it a try and it was proven within hours to be correct. We have opened the pathway. We see this as the 3rd collaboration with another government and this is a major breakthrough for scientists who understand this and this brings progress in understanding the health applications.

2529K: the report that will be released to the authorities immediately is that the cancer cells within 24 hours are not there and the healthy tissues are growing. During the trial, we asked the scientists in Tokyo to mix their blood with the culture plates to see if the GANS of CO2 kill or destroy the white and red blood cells. The tests were negative. This means the cancer cells are depleted and the red and white blood cells exist and operate. At the same time, we introduced the main factor of the immune system and we saw the rapid growth of healthy cells and not cancer cells. Once the cancer cells diminish, the damaged cells start regrowing rapidly. It is amazing and we watched the cells reproducing. It has been videoed and we are sharing the videos and the pictures with the authorities so we can share with the scientists.

[2719 K: KF in Ghana as the research center for cancer is to open the second week third week in January.](#) We are looking for those who have tumors because it is very important for us to show this rapidly. We have doctors and all the tests will be done in the structure of the government hospitals under full supervision of the authorities and the ethical committees. We want to try up to 50 tumors; if you have tumor cancer, contact Keshe Health. We would like to test if you want to volunteer. The parameters are set and the doctors are waiting for us to announce we are opening the human trials. Through these channels that have been opened we especially invite the Norwegian authorities to send a doctor. It is important that through these channels we open the channels they have opened for us. If you are Norwegian, please get in touch with me. We will organize and we will pay for their trip for them to be here and to monitor the whole trial. We are part of the government structure in Ghana and these will be done in government hospitals.

2902 K: we are looking for those who have cancer that can be injected in the blood vessels instead of the tumor and we can support 100 cases initially in January. As we said, the trial process will run about \$5000. All the expenses are on you and your organization. Understand that these are trial processes and we are working on the data we have from the tests. These are processes and not treatments and are within the guidelines of the permits issued to us. All trials and tests will be done with the full supervision of doctors, ethical committees and governmental supervisors. You do not need to pay tens of hundreds of thousands for chemotherapy that guarantees to reduce cancer or a tumor. We have seen from our trials massive

improvement and changes with no side effects. As one race if you are interested Ghana KF Health will set up the path for you in the next few days for you to be able to receive the process.

3045 K: you need to have yellow fever injection 10 days prior to flight to Ghana and that is why we said it would be the 2nd or 3rd week in January 2017. By the time you have the injections and we manage to do all our work here, we will be ready to greet you. We invite doctors from other organizations to supervise the whole process. Our plan is to invite an international committee of doctors to supervise this process in conjunction with the doctors and scientists of Ghana. This gives it the international level that is needed to take it to the steps of international application. Our goal is to achieve a mixture of GANSes that brings saturation down in the first 3 to 5 minutes. This is magnetic gravitational saturation and not in the way of the structure. The cancer cell collapses in giving its energy to another entity.

3219 K: I thank all of those who worked to achieve this in the background including the medical team in developing, doing the work and dispersing the knowledge. I thank the scientists in Tokyo University and Ghana Atomic who work with us in facilitating everything possible. This has been an international collaboration of the KF supporters. Now it becomes international collaboration with other scientists. Data and case-by-case will be released internationally as the process goes on. Once 3 doctors sign the certificate that the cancer is eradicated, the report will be automatically published. It has been accepted and 20,000 sq meter space hospital facilities will be made in Ghana. We made Ghana the center of space technology in Africa. This is the beginning of it. We have an agreement that the space hospital, launch pad and factory sit within the same structure. This allows us to have the test facilities with scientific backup and with developments of new space systems all in one place. Everything is in the military zones of the Ghana Atomic Commission. Some of you have not seen the logo of the KF Ghana Atomic. KF Ghana Atomic is equally joint venture. Stanley would share the logo with us?

3447 Stanley: I have it here.

K: you will see this insignia on all the buildings where KF are operating in Ghana. It is the joint shareholding between KF and the Ghanaian government and the Ghana Atomic Commission. We are proud to carry on with the same collaboration in space in every aspect. The problem now is

how we carry on with the same collaboration in Europe, Asia, US, and South America.

3633 Stanley: give me a minute to bring the picture up.

K: It is a joint collaboration and a partnership in shareholding. In that process, all that we do in Ghana is under the supervision of the ministry. We are supervised and controlled by the ministries and everything we do is authorized through different channels, ethical committees and ministries. We have the opportunity and we changed the opportunity to the leap of development and the factory's products will be out in the public and we will have them on the streets of Ghana immediately after the holidays. We look for the same kind of collaboration with other governments around the world. This will change and it brings a lot. This is the insignia accepted by the government in Ghana and the KF. The logo is KFSSI in balanced co-operation with Ghana Atomic Energy Commission.

3800 K: you will see this insignia all over the KF buildings within atomic Ghana in the next 12 months. It is important that we achieve governmental collaboration at this level as they are the beneficiaries of this technology. This is the reduction of hospital, health care, fuel bills, contamination and other areas so this allows savings for the government to be spent on the public. They appreciate it and they understand it. Thank you very much, Stanley.

[Ghana Atomic Kf will now focus on decontamination of water and air](#)

3902 K: now we go to the next step of the development which we have is decontamination of water and air. Next week from Ghana Atomic Ghana KF we will release new systems on the internet. We have developed the technology for cleaning up bacteria, viruses, germs in the contaminated water. We have the same kind of agreements and processes with the Italian government for the decontamination of a huge amount of water in Italy. The beginning trials start in Italy next week. They will start the whole testing and the first phase application of the KF technologies in January. There is huge water contamination across northern Europe for different reasons. The test is done by the government and the development is shown. The whole package is set and they are doing the final phase of completion. The systems are fully developed and we will release them. They have seen the changes we saw fundamental and it is not 1 or 2% changes. We have seen up to 95% purification and this is important for us to be able to do this in a correct way. (See Water Research Institute information at 40.38 minutes).

4126 K: the process of water decontamination is very important because most of the waters in northern Europe are contaminated. The authorities cannot stop the process that has entered in the water systems of about 10 materials that are cancerous. We have been asked to enter the trials and we did that 3 months ago. Two sets of trials have been done so far and the government is confirming the decontamination from 45% to 91%. We are submitting the 2nd cycle of the process, which will bring it to 90% plus. This is industrial pollution on a large scale. These companies who have and have been asked to use the technology are the companies that are paying heavy contamination penalties to the governments. It is not the process that we will try; they have tested it. I attended the first trial before I left Italy and came to Ghana and the results are confirming one after the other what the process of water cleanup will be. Most of the Italian and Northern Europe waters are contaminated and there are levels of huge amount of radiation in the waters that we are collaborating to show that it can be cleaned up.

4330 K: last week in the teaching I said something very interesting. For those who have different ideas about Africa we have pictures from Accra to show you how safe and beautiful this country is. The shopping malls are more advanced than European shopping malls. I told you about the trust of the man in the nation of Ghana. We took some pictures. Rick will share pictures. (44.11 minutes) You see all these things across Africa and it is lost in America and Europe and the western world. In the developing world, the trust of the man in another man is disappearing. But not in Africa and it's a

pleasure to see. We took random pictures. People leave powerful generators outside the buildings in Accra; they don't have to put them inside. The generators are on the street. People don't have the space inside the parameters of the building so the generators are on the streets. There are no padlocks or chains on these generators. The people have trust and this is the beauty of Africa.

4526 K: Here are pictures of gas ovens on the street left there by the man who builds them. They would be gone in one second in Europe. As they say in Liverpool *leave it behind the window and I take it tonight*. These things are there every night; they don't move it off the street. If someone wants it, the buyer calls the owner and man pays the owner. Here are pictures of the man who makes furniture and it sits there day and night. Nobody sits on it and nobody steals it. It is the livelihood of the man in the back of the photo. There are no doors, alarms, security system. You can drive 5 to 10 kilometers down the road and you see the most exclusive furniture show rooms you never see in Europe. These are owned by foreigners. Where the expats (expatriates) are, there are security and cameras.

4644 K: Where you work with the natives, the camera is in the soul and the heart of the man and this is a beautiful thing. You have to be there to realize

it. Supermarkets, furniture palaces, all with cameras nobody touches. You see hundreds of thousands of places in Accra. Here are photos of tires and wheels and nobody touches anything until they meet the buyer. This is the trust and where the soul of the man trusts the nation. You see the florist with all the vases and nobody touches them. He makes them and leaves them on the streets. There are no fences, cameras or security guards. They trust in their nation. This is what they don't show you about Africa because then it shows the whiteness of the rest of the world.

4813 K: You see this right across most of Africa. I saw this the first time in Gambia 20 years ago and knew I had been lied to about Africa. As I promised I shared pictures with you. When you come for the cancer process you can take more pictures and share them. The process is that the soul of the man is clean and so is his heart. The skin of the man is black but his heart is white; the skin of the man is white but his heart is black. That is the only way I can explain this.

[Going back to last week's teachings on the creation of man on this planet and the creation of life on this planet.](#)

4921 K: going back to our teaching of what we carried on last week. We explained the creation of man on this planet and the creation of life on this planet. Is it accidental or did it happen through a process? What is the next step once the life is created in the active physical way? We saw the energy of the star in conversion within the eggshell of the solar system at a given point has given life to a structure called a planet and then structure of the life on the planet, say human, animal and tree life. It has been the conversion of energy of a plasma from one state to another. In the process, everything which created it has its own central position of operation. Once life has changed into the process of replication and to remember how to replicate the process, the life has built itself a hidden memory bank. In the process of the life of what I call horizontal people (animals and human race) we have created a memory bank and we call it a brain. What is interesting for us, and what is supposed to understand as we've seen with the vertical people, what is their memory bank? Where is the heart and soul of the planet? Where is the central brain operation?

5219 K: in the body of man we chose our head and the brain was placed as central control. We have kept the operation of the control through the interaction of nonphysical entity that we call emotion. The question is,

where is this in the tree? Where is this of the tree, the central nervous system, its brain and its soul? With the man, we can say it is in the brain, but what about the plant and other entities? Is the aura of the man the eggshell of the totality of the physical body of the man? Does this apply to the plants too? The question is; it comes back to the essence of the creation. We brought matters together as the egg and the sperm. With it the accommodation in numbers and increase in absorbing energy from the environment was there to increase multiplication.

5419 K: We reached the point where the central mass has triggered and triggers a new dimension of energy that we call emotion. This is where in the process of development the interaction of the physical condition which is created by multiplication of the numbers in physical dimension and interaction in respect to each other in what we call emotion has created a central point for interaction as we said between the emotion and physicality and what we call the soul of the man. The question and the mystery has been *what is the soul? What is the operation of the soul in the body of the man? Why does the soul exist? What happens if we take the soul of the man from the physicality of the man? Would the body exist? The answer is No.*

5555 K: The body of the man is the same as the plant and the same as the earth, the harsh, the rugged surface with some liquid for the entrapment of the energy and the conversion of energy to creation of life on it. This is what we call the oceans and the seas. But the real existence of the planet is not the earth and its physical dimension. It is the fields that emanate from it. And it attracts with the other planets, moons and stars within the galaxy and within the universe. The fundamental point is this little dust of the earth through the gravitational magnetic field that creates within the center, what we call *soul* with its heartbeat, with its physical structure which has not been pulled to have legs and arms, but stays spherical, the tentacle of its field forces reaches every star, every planet, every galaxy across this universe.

5728 K: this is the beauty of the interaction of the fields. There is no single star or single planet or single cosmic dust, which has no connection with this planet. This is the truth and this is how it stands. When we speak about the gravitational magnetic field positioning of the earth in respect to the sun, if it was only the sun, then the earth would have gone the full fixed diameter radius around the sun. But we know this is not the way because Jupiter, Saturn and its moon, Venus, meteorites, other galaxies and field forces

within the galaxies of universe all dictate the position of this planet in one way or another in a bigger or smaller dimension.

5846 K: so, the physicality of the body of the earth due to its center and what we call the creator of magnetic gravitational of its soul has connection with every other entity in the universe. Put the magnet in the middle of the paper and add as much iron dust as you like. You will see that it will affect and touch every single one of them—even the ones that are slightly loose or totally loose. If you move them, you see others in the parameter of the interaction with it. It means it still interacts. So is the soul of the man. On the birth of the man when the soul of the man is created, the soul of the man reaches the soul of the total entity of what is in its information of his plasma and the connection with the rest of the universe.

010022 K: if this is understood you will understand how to make approach and contact with other entities that are of the strength of the soul of the man. As I said many, many times you go to a football match with 100K people in the stadium. You don't connect with any. You walk out and you see a man or woman across the road that you have never spoken to before now because it is the fields that balance. You are there as a lover of the football but you are there as the strength of the fields of the soul. In the structure of the life of the man there is a hidden wisdom. Maybe for the first time I explain.

010127 K: the hidden wisdom within the strength of the soul of the man is the connection between the atmospheric condition, which we called the creation of amino acid, and its matter state, which is the physicality of its entity. Many of you have wondered why the blood flows. Stand still for a second and understand. In the matter state of the physicality of this planet, iron is the magnetical part. In many of my teachings in the past I have explained that in the gaseous part the magnetic gravitational fields that behave like a magnet condition is the oxygen. Now you see the marriage of the two. Oxygen, amino acid with iron of the planet is the hemoglobin and both are in magnetic field condition. The combination of the two, the levitation of the liquid, one is attached to the physicality of the matter state and the other is attached to the gaseous and the water. Now you understand why blood flows within the body of the man. This is the secret of the creation.

010325 K: this is why when the two interact and the soul that is created is now connected to every entity on this planet. In the same way, it is

connected through its creation and the link of its interaction to the other entities in the solar system and beyond. Now maybe for the first time you understand why you have blood as liquid and the behavior of liquid GANS flow in the body of the man. Two magnetical conditions in interaction creation of the infinity which creates levitation not connected to one or the other. Unless you bring it out in the condition of the one, then the other gives up or replaces its energy with the other fields and solidification. This is why you see blood dry on the skin of the man once it is out of the vacuum condition of the body of the man.

010438 K: if you understood this you will understand clearly how the soul of the man has been created. The soul of the man is created of the total entity of the elements of the structure of the matters within the solar system, which have found balance within the physical structure of this planet. It has telephone number dialing code and it always calls the earth. You can go anywhere in the universe and if you understood this you know how to go back home. This is part of the teaching of the deep space technology. This is what I call your *call back home card*. But, if you understood this you understand further how the soul of the man operates.

010549 K: every blood cell, every cell in the body of the man has this connection and operates through its connection collectively through the emotion. The emotion is the part between the soul and the physicality. Emotion is what you call transition energy and what is called 'dark energy' because man never understood that from the source to manifestation there is a transition. So now that you understand the structure of the physicality and its dimension of the emotion it should be very easy to understand that emotion itself has led to the creation of the physicality. So, you can measure any emotion from the soul of the man to the physical part. But the interesting part comes when you enter the soul of the man. What is the soul of the man? Where is it and how does it operate?

[The sun, the earth, the position and gravitational magnetic fields of the earth where the tentacles of the fields reach every part of the universe.](#)

010718 K: go back to a few minutes ago in the teaching: the sun, the earth, the position and gravitational magnetic fields of the earth where the tentacles of the fields reach every part of the universe. Now take the soul of the man; it is the same as the center of the earth and it interacts with every other soul

where the physicality of the man has finished. The physical body of the earth does not reach every galaxy or star or every planet on this solar system. But the fields of it does and know if they are moving forward or they change their position and adjust themselves. So is the soul of the man in respect to the _____ and the other souls in the universe and within the structure of this planet.

010830 K: the soul of the man interacts more freely with the entities of this planet because it is near and made of the same or partially the same. Now you understand the soul of the man can reach other souls. Its position is dictated and its power is given to it in respect by the others. If you change the position of the soul and increase the level of the energy of the soul, you will create different field strength interaction and position. But those of you who understand the world of medicine the way I just explained now you understand why in elevating the soul of the man you increase the field on the body of the man and within it you change the character of the man. Because now it is different evolution and dimension and now there is different position, strength, absorption and giving to the others and receiving from the others.

010949 K: Spaceship technology has to be the totality and not a finger movement (?). Spaceship technology is to understand the essence of the creation of the soul of the man not the physicality of the man. This is the secret and those who understand this will travel the spans of the universe without ever moving their own physical body. And this is what has been hidden from the man and his knowledge. The spaceship of the man is the soul of the man. Those who get into spaceships are those who have not developed to the next step. It is the interim and how long this interim will take depends on the maturity of the soul of the man.

011102 K: Can you elevate your souls? The answer is yes but you have to understand what you add to it and where you add to it because when you have the structure of the soul of the man it is the same as the soul of the planet's heartbeat. The heartbeat is the exchange between the energy of the soul and the boundary of the physicality. When they match, they have to exchange. Earth has a heartbeat. So does the man. The sun has a heartbeat because he has his physical boundary and the center of the energy of the soul. And the exchange and balance of one to another he needs the transition. It is like a sound barrier: one is weak and one is strong. One is trying to go through and hits the barrier of the physicality which is the storm.

It is the waves of the tsunami when the energy of the water comes and hits the solid shore and has to increase... (?). There is no difference.

[Now you have to find the heartbeat of the Soul of the Man](#)

K: now you have to find the heartbeat of the soul of the man in respect to the others and then you will find the position of the others. Blessed are those who are wise and understand. Do you ever need a motion of physicality to reach another point in the universe, or is the physical transformation and the transition, which is confirmation of the existence that you try to desire to achieve?

011316 K: the soul of the man when in the center of his brain is made, controls, communicates, develops, structures the physical body of the man and his interaction with the others. Those of you who thought of the shape of my hair and the position of my heart or whatever was done because of me, you have to understand that at the point of inception everything which is within the field of the creation of the planet had a say in the structure. It included what your job is going to be while you are here, how you are going to look while you are here. You need the timid behavior for the one who is a giver to give and for the one who is a taker to take from the timid. You need the strong man that from his strength he gives and by his strength he elevates the others. And it is the souls who have decided, not the man himself. But in the process of creation, if you understand that in the process of time of life, you can change the strength of the soul, to elevate the soul to the levels of the strength of the other entities within the universe.

011500 K: And as I have said, birds with birds, wolves with wolves because you have increased the level of the soul in the true level and not by stealing and absorbing from the others but by increasing the availability of the fields which are available in the soup of the universe. Then you should be able to see and communicate with the other souls at that strength plus your own. It's like the language and you will see this.

K: This has never been open to the man because man never realized that he can use his physicality in the right way to change and elevate the strength of his own soul. **Don't forget the heartbeat. Don't forget the heartbeat.** The heartbeat comes from the interaction with the fields of the soul, which is going, and the reflection of the strength of the matter state in respect to its environment. The sound barrier and what we call the noise of the sound

barrier—if you have been in aircrafts that passed the sound barrier and they made that noise, now you understand how the heartbeat is created. It is the same noise. You have to understand the soul and the strength of the soul. If you understand and you want to measure and if you have elevated your soul or you have not or you are managing to reach a higher level... listen to your heartbeat.

011723 K: the change of heartbeat gives a lot of indication and the number of the heartbeats give a lot of indication in the structure of how much the soul of the man in transition becomes the matter (?). Then you understand why you carry blood... and why your blood carries your emotion... and why your emotion dictates your physical manifestation. Then you understand why many times I have said that I am ashamed to be in the body of the man. It is not the soul but the physicality of the manifestation of the physical body which has bothered, and changes. This is what you have to understand. The soul is exactly like a plasma. It carries the hydrogen, the copper, the zinc, the plutonium and the others, which are stronger in the center. We have not managed to understand this. It is not that it is all plutonium or hydrogen. How much you take from its magnetical that you add to its gravitational that increases the mass in the center and elevates the soul of the man.

[Wherever I lay my head is my home](#)

011935 K: every position in the soul has a control for the strength of the physicality. If you understand this and you can operate within it, would the life have a time difference? Or the physical life of the manifestation of the planet has a time in it and if you free your soul you travel the planet as the soul of the man from earth, and the man says *wherever I lay my head is my home. My head carries my soul so it is home.* If you understand this teaching of today, you will reach the maturity of the universe. And for those that this is just a ‘talk’ you have a long way to go to understand your own creation and interaction of your physical by the manifestation in respect to others. Understand that this physical manifestation itself has limitations with the fields of your soul, which is the universe. Would you like to talk to Mars or would you like to be on planet Zeus to see a beautiful soul?

012144 K: Try to understand the structure of your soul and then the doors of the universe are open. The limitation of the man to open and reach the spans of the universe is the limitation of his physicality and his heartbeat. Many times I have explained this. Within your soul you have the structure, which

is field connected through your emotion to your physicality. And this is a very, very small part. The rest is what the soul does to put you in the position of what you need and what it needs to BE. Death is not the end. Death is the beginning of the freedom of the soul when it needs to find dimension. But, in that dimension it has to find its physical interaction. It is the division of a neutron into new protons and electrons if one understands. It is the maturity of the time and the maturity of the time comes with the understanding of the totality.

012345 K: try to bring all the knowledge we have taught over the past years and then you will understand the totality has come to a final point. If you understand the operation of your own soul, you will understand how to interact with the soul of the craft if you are still physically attempting to fly. You don't need the remote control and you don't need the control. The physical control is too slow, far too slow. Try to understand that the soul of the man in the small part of his operation is the image of his physicality. But it has other dimensions beyond it that are much different, much stronger or much weaker, which has the interaction of the physicality with the other levels of the souls and the freedom of the travel in space.

012510 K: then you understand why we still fly and still make the space ship and we still try to get the GANS and the coils. Because, as I said a man will take from this technology according to his intelligence and no more. The child is happy with a toy car and a man is not content with a Rolls Royce! Another man sees life with a jet plane and another one sees it with a bullet, a gun and a missile. The position is, *do we need to taint our life? Do we need to taint our life with the matter on the matter side? Or, do we need to open it to be open to accept the totality of the energy of the universe?* Try to understand the operation of your own soul.

[Living a Simple Happy peaceful life in Africa](#)

012641 K: A few days ago, I was talking to a guy and he said, *you know, Mr. Keshe, I don't have any bad feelings for anyone and I have my love for everyone. I live a simple life in Africa but I am happy and at peace. No one can touch me because I am at peace with myself.* This has taken millions of years to take the wisdom to the man in Africa. This is to understand the strength of your own soul, and this is to be truthful to your own understanding of your own strength. But do I need to elevate it? To me in

Africa we can reach the space technology in the true sense much easier than the rest of the world because the heart of the man is still pure and untainted—at least most of them. It will be very hard to find the soul in Europe, America or other countries. The purity comes out of the richness of the continent. If I am hungry, I don't need to steal. I can still walk even within the capital and from the trees in the city I can get a plantain or a coconut to satisfy my hunger and thirst.

012838 K: in the rest of the world where do I go, because there are no trees and the trees have papers on them and they are fixed to a wall. We see a calamity awaiting man in the coming time. Then we see the true soul of the man. But would this mature the man? I was explaining this in the past couple of days to my son. I said, *you don't remember but in the mid-80s we had a cold war between the East and the West, between communism and what I call capitalism. I was explaining to him that communism had a strength of its own very correct within its structure and lived the life within the parameters which was accepted to itself. But, the capitalism was covered with lies and deception. The change of what we call the 'end of the cold war', which meant no bullets were fired, but we still don't like each other, did not come down by the Berlin Wall. It came down 4 years before by Chernobyl. It took a disaster to unravel and to open the door. It took a nuclear disaster where if you were in Western Europe at the time you could see high levels of radiation and you didn't know where it came from. The Russians were sitting on the blowup of a full nuclear reactor and they didn't want to talk. But they couldn't hide it because the disaster was too big. That was the time when they asked for help from the capitalists. "Help us, maybe you have the technology." Nobody had the technology. The only technology we had was the hand of the pilots who did the kamikaze and flew as many times as they could to cascade the nuclear reactor and cover it. But that accident gave the seed for an insight out of a disaster that 3 or 4 years later allowed the opening and the breaking of the Berlin Wall, what they called the 'end of the cold war'. And now we see a bigger cold war but this situation is going to change in the same way. This time it is the other way around. The disaster in the West will put their hands out to the rest of the world to save them. This time there are no western kamikazes because they are all kamikazes themselves. This time in the coming time will be when the West does its own destruction by an accident. It will be an accident and they will not be delivered. The same as Chernobyl—last time it took 3 years to bring communism down and in the West expected the East, because the West was more Communist than the East but nobody could see it. The appearance*

*of the freedom is not the freedom. We see the same in a very short time where nuclear reactors and other accidents will show the true nothingness within the structure of the West. Then they (the West) will call for the East to put the helping hand out and this time help should have a condition and that is what we said...**health, energy in exchange for peace.***

[Pending calamities beyond the imagination](#)

013354 K: This is what we see and this is what will happen. Now it goes back to the teaching we had this morning. It is the soul of the man who has to be ready for this change. As I said many times, in a very short time the boats going from Africa with thousands of people on them will be reversed and there will be thousands of whites trying to get to Africa to live. As a child, when they did a survey they said to the children, “*do you know where a chicken comes from?*” *The children said, “Yes, from a supermarket.” They think the chicken lives in the supermarket because that is where they buy it. That is the extent of the knowledge of the man in the West.* We have got to raise the level of the soul of both sides that when the time comes the door is open on both sides. And it does not have the conditions on the passport, the visa, and ‘we put you in the refugee camp’. The refugee camp of the man at the time of the disaster should be the whole planet.

013520 K: we see calamities beyond imagination but they are man made and triggered by natural forces. **The reason the teaching of today was on the status of the soul is because we have completed our teaching.** Many times, many people asked if I could explain about the soul. I have taught you everything you need (to know) about the soul today if you understood the truth. Remember in all the teachings we said the strength of the gravitational magnetic field of the plasma reduces to the point that it becomes the strength of the matter state. There is no difference. The strength of the soul of the man reduces so much in strength that it reaches the matter state, which is the physicality and the manifestation of the man. You were interested in plasma; I was teaching about yourself.

013700 K: you were so materialistic that you forgot that you are a part of the matter itself. It is not that the minute that you understand that you don’t need to feed yourself or need to live. Living is part of the process of contributing to humanity and the universal community. So now you understand that I have been teaching about your own soul from the first

teaching, but you were interested only in the matter state and you forgot that you are part of it yourself. The center of the plasma is the soul of the man and the circle still reaches the matter state strength, which becomes the emotion of the man because what goes through the emotion is how to find his motion to reach the matter state. That is why we call it *emotion*. And then it is the manifestation and don't forget what I said in all the teachings. Hydrogen sits on the edge but within hydrogen is the energy of the gold, platinum (plutonium?) and uranium.

013820 K: It depends on how much of giving you give to reach the state of the gravitational magnetic field of the others. So now you understand that all my teaching has been about man himself and his soul. And if you understood all the past hundreds of teachings you will come back to one point: *I have been teaching about yourself to yourself*. Remember the song: *I can fly!* If you understood this with the strength of the soul of the man, you can fly in any dimension. It is you who decides the dimension.

013925 K: I have said many times when I teach about the soul it will be the final chapter. And now I have told you about the soul. In a way, I have taught about your soul from the beginning of the first teaching. If you read the first chapters of the Book One and the last Chapters of the Book Three, I have shown you how two eggs come together and two magnetic fields that create plasma and at the end I have shown you the creation of the universe which is the totality of the soul. As messengers, we have a habit to write in riddles. Otherwise it becomes too simple and it becomes meaningless. Any questions?

014040 Jon: as you were talking I got to thinking about the field plasma that we are creating and I heard in the past that a lot of the space craft that are operating are actual living entities and they too have a soul...the space craft has a soul.

K: you mean the spaceship...

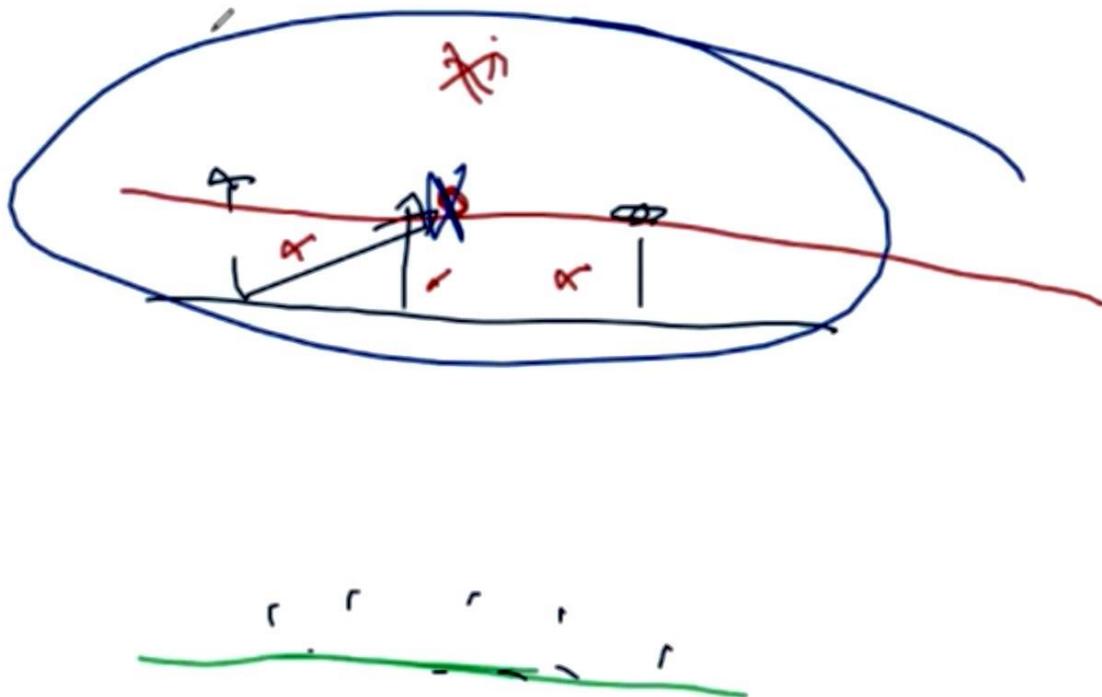

Jon: the spaceship. So, is the field plasma that we are creating is there something that has to be added to that plasma or does it have a soul?

014129 K: If you understood the totality you understand it has its own soul and that is why you connect and direct through the soul through the emotion. In a way, you break into its emotion. If you look at the way I looked at the systems you built in the past few weeks, what is missing to get your system triggered is that you haven't found the soul of it. You haven't found that

imaginary center. You haven't found where the field plasma works. I am going to share a screen with you and then you will understand.

[More clues for construction of the Arizona spaceship](#)

014225 K: In Arizona, you have built a platform and you have placed your reactors on it. In the last talks, we had I explained to you in a nutshell to try to raise your reactors. Very soon as part of the process what you are doing, you will learn something very interesting. If you place the top reactor and the 3 base reactors in a way that the line of the interaction of your 18 reactor cores sits within the imaginary or what we call the free plasma you shall fly.

014332 Jon: and it's a living being at that point.

K: yes, but it has no physicality. This is what in the last talk we had that I explained to you to raise it. I can't tell you to 'put it there' and 'put it there' and you will fly. We have seen this in Descansano with Armen with the 4

system and we hung it and we saw it rotating and lifting up and down. But it didn't have the structure needed with the 18 reactors. The 18 reactors create the physicality boundary. The soul sits within the free plasma. If you look the top reactor is the brain and these are like the legs and the arms. Once you achieve this point, you achieve the creation of the space ship. But because it is a free plasma it is a plasma created out of the totality then the man's soul 3 and 3 (?) and if you can tune it at the strength you decide the full system.

014510 K: you will learn the pilots of the future are the men of truth in respect to the desire of their travel which means they can manifest the point of destination to you at any point without you ever arriving because they can create the condition of the connection. This is zero-time travel. Zero-time travel is not actually traveling in zero-time; it is opening the time to yourself to see the truth. We call it the enlightenment. When you can create the strength of the destination you are at the destination. The system you are setting up in Arizona, you are getting there. I saw your 12000 RPM reactor this morning and it is fantastic. But, you have to understand the position. In a hidden way go back into the pictures of the unit that Marco has set up and I put up. You see it. There is a reactor set on the top core and there is a reactor star formation underneath. And the plate with the balls sits in the middle. As I said I hide too much because the man is not mature.

014705 K: Set your system; you have already achieved your envelope, you have already achieved the donut and you have already understood partially that you don't need the transformers if you can transfer and feed it back into your own base internally. Then you have created your own energy. Then you are the pilot. Any other questions?

[014754 Azar: good morning; I have 3 questions.](#) K: are we back with your soul again?

Azar: I know. A couple of questions...the first question is when you talk about the emotion, the soul and the physicality are you talking about the principal matter, the dark matter and the antimatter?

K: I don't speak about that; I speak about the principal matter, the transition and the matter.

Azar: where is the heartbeat, in the emotion? Does the heartbeat belong to the emotion?

014830 K: it is the interaction between the physicality and the soul of the man at the strength of the emotion. Have you ever thought for one second

why does your heartbeat increase when you get emotionally triggered?
Maybe you will find the answer this way.

014902 Azar: I understood; I have another question. You remember when Jesus, bless his name, was in the garden talking to God with his disciples before his crucifixion, who was he talking to?

K: did such a conversation ever take place?

Azar: well do you know if he had a conversation with God?

K: I don't know; I wasn't there. Ask your soul; it might have been there. When you speak to the soul and when you speak to the man don't forget it goes back to the 12 disciples because it covers every angle of the physical dispensation of the fields. It is the field that feeds back that creates the dimension of the physicality at the strength at which it does. The problem is not who he was talking to; it was which soul he was trying to reach. You know we have a repetition of the life of Christ and the life of Bab, bless his name. When they went to put him to the firing squad he said, *I have not finished yet*. They put him against the wall and 900 soldiers fired into the wall. They couldn't find him because he was back in his room sitting with the last messages. When he finished then he said, *I am ready*.

015109 K: it looks like magic but in a way, the soul of the man was ordering the 900 that it was not time. The soul does not need to speak. But the man needs the physicality of the voice to confirm his own receipt of information. Sometimes you have to speak for the ear to hear but the soul has already received the message. When you feel the pain of your child or your parents thousands of kilometers away did they speak or did you feel their emotion, which passes through the soul beyond the physical boundary? And is it only you that has that strength that receives? It is zero-time travel. We have seen it many times but we didn't understand it. Maybe now we do.

015230 K: this is what I said. And I have shown this to some people. The cry of the man for the disaster to come has been felt through the soul of the man and those who are there to support and save are sitting at the outskirts of this galaxy and this solar system. Man shall see very soon. It is the same as the when the child cries to the mother for help. And the soul understands it and the field comes to the father that the child needs help. So, the cry of the man has already gone out and has been heard. We are too much involved in physicality that we don't see the reality. Any other questions?

[Yvan asks if we add Silver Nitrate to production of Hemoglobin.](#)

015342 Rick: someone asked the question the last couple of weeks that I haven't got it through, it's Yvan and he is part of the panelists and he would like to talk about the production of hemoglobin specifically asks if we can go back on how to proceed with silver nitrate in production of the hemoglobin. Do we add silver nitrate early in the nano-coating and add it to the salt water and the CO₂ of the hemoglobin production? In that case how much of it.

015423 K: he will try it and tell us. You will find out in some part of using nitrites with amino acid you will reach the color of black, pitch black. Don't look at it—ask why. Then you find the path to the soul of the man and now you understand why some are so black in the soul... The thing is when you use these things especially with hemoglobin you have to see if it is alive. We have to see if it is still operating and not just because you added to it. This is the problem. Just because you added it and said that you added it you have to see if it is needed and if it allows for hemoglobin to exist---or does it convert it? ...Any other questions?

015622 Zane: this is Zane.

K: where are you from?

Zane: I'm from America. I just wanted to tell you that you have been the greatest influence in my life and I really appreciate everything you have taught me to this point. Thank you so much for being you. I love you and thank you.

K: you're welcome. Any other questions?

[A question from Andreas on flying](#)

015705 Andreas: good morning Mr. Keshe, this is Andreas from Switzerland. Thank you very much for sharing the knowledge as you have been doing for a very long time. I just want to explain one key element that is for me the most important to understand in my desire to fly. In my early childhood, I had the very vivid dream flying like Peter Pan and the feeling from then is still with me. This is why I am looking everywhere to achieve to fly somehow. My question from the understanding of your teaching is related to the opposite of flying which is the fear of heights or fear of falling. For me the understanding of this emotion is that it is coming from when we

have the gravitational and magnetical field strengths there can be no falling except the focused experience of the gravitational field strengths.

015836 K: I explained something in the teaching of today. Maybe this covers different aspects of what you are talking about. Any man who understands the balance between the iron and the oxygen can levitate himself. Don't forget when we increase or put a stronger magnet against a weaker magnet or a stronger plasma against a weaker plasma that we can change the strength and the position of the two changes. So, levitation or then flight in respect to a fixed position like earth, once the man understands this, is very, very easy. You have the iron as the amino acid and you have the oxygen in every single (part of) the amino acid. One is hemoglobin and one is the oxygen.

015950 K: If the man understands this, anyone can fly or levitate in respect to the earth. Depending on the strength you change from the metal iron in respect to the oxygen. In flying or moving across the universal span it is again the understanding of the gravitational magnetic field strength of the position, and what and how it is compared to what you are. This goes back to the medical teaching and now maybe some people understand. I said that the red blood cells are taxi destined (?). This means when the blood cell passes the lung that cell only has energy for the tip of the toe cell and not for the brain or the heart cell. Because only in that position is the strength that is needed to deplete the energy of the cell so that it can be recuperated back to the toe.

020107 K: Understand the interaction of the sweet water when it enters the ocean of the salt. Understand the interaction of the mixture of how much oxygen you can put energy-wise. Do you take energy from the air in respect to the ground or do you take energy from the ground in respect to the air when you position yourself? Then you have to understand do you take energy from the level of the universal condition at that point of the destination to match? You will find out that spaceships in the majority of cases are the point of gathering of the souls than the physicality because they enjoy being with each other. It's a spherical expats community.

020215 K: Expat covers the whole of the universe. They are all expats but they are expats from the universe. When you decide to travel within the space ship is when you decide to be part of the others' interaction. That is the misunderstanding of the totality of a lot of people. Very much (like) you go to South America but you have friends from Africa, Asia and Europe

because you like to be around them. You are all expats. But in the community, you like to be with them. You will find out that the spaceships of the future are that way from every culture in the universe and they like to enjoy each others' existence as friends. This is by the will and not by force. These changes a lot. ...So you can decide if you want to levitate and float in the atmosphere of the earth or you want to join the spaceship above or you want to make it yourself. Don't forget the spaceship made by the man is of the strength of his emotion. So, it is a physical matter entity of this planet. It is the trust in one's soul that lets man take off and to travel. ...Any other questions? Andreas: thank you Mr. Keshe.

[A question from James; could you discuss the concept of dimensionality and realms of existence?](#)

020449 Rick: there was a question from James in the zoom chat: could you discuss the concept of dimensionality and realms of existence? Are these just constructs of the mind or should that be seen in relation to the evolution of the soul, i.e. the higher the elevation the more they are perceived so to speak.

020518 K: this may be environmental condition dependent. It depends on what environmental condition you like to manifest. If we change the strength of the immune system of the body of the man, we can make man to be in the direction and position of anything. It is your immune system that puts a limitation on the understanding of, because you have put a filter. Our restriction in expansion in so many ways in the physical dimension has been predetermined by our ancestors in the existence of our immune system. Anything above a threshold is seen as a problem. It has to be brought within the parameters that it can operate because the atmosphere of this planet has conditions and limitations.

020640 K: Why do all the animals have a blood temperature of 37 degrees centigrade? ...Or 36.5 degrees? It is the conversion rate that comes in respect to the gaseous and the matter state and the transition of the speed of the fields of the soul in the matter state boundary. It is a very interesting observation. Go back to the heartbeat. Why when you see someone you love does your heartbeat change? It is only between you and your emotion and nobody outside knows.

020740 K: Is it the connection between the connections of the souls that transfers energy at the speed the physicality cannot handle? Then we should be able with the knowledge we have to measure the strength of the love. Love has a strength the same as fear and joy. Now that we understand we can do this why don't we increase the level of the whole thing to the level of loving and let the whole world love each other? It can be done. And the number of people around the KF who work is enough to create but the position of the fear is worse because we have allowed it.

020854 Azar: in a couple of occasions I had the situation of the heartbeat that I saw strangers and my heartbeat started to increase. What is the reason for that?

K: ask your soul. Your soul recognizes before you do. Does it create the heartbeat of fear to protect you from what their intention is? It does this because it is aware of the soul. Or is the heartbeat the intention of the love and care? Don't forget you look at your heartbeat and the soul has already connected. It knows of the intention.

Azar: thank you.

[Would the soul of a spaceship be a little bit like the soul of a new child that was born?](#)

020951 Rick: there is a question in the chat from Krasner: *Mr. Keshe, what is the main motivation of the soul? Are there different motivations for action in different souls? For example, the soul of a spaceship might have a different motivation than a human soul.*

021018 K: it is you who created the spaceship, or somebody did, so it carries that emotion. The intention is by principle and living a balanced life.

021048 Rick: would the soul of a spaceship be a little bit like the soul of a new child that was born?

K: it is the same as the soul of the planet because that strength gives you manifestation of your physicality. It is what I call 'home'. I feel comfortable in it. This is why I said that in some cases you can't invite others into your spaceship if it is primarily made for yourself. But if you make it dimensional you can allow many. As I said in other teachings, children of the universe with the man's soul as part of it will be fantastic. Physically, we will not be able to reach because of the strength of the amino acid; we would kill each other. But we can marry through the soul and the

children of the soul have no dimensions unless they decide. Man will learn about this in a very short time.

021210 K: the way your heart beat changes when you see a beautiful woman, man, child or dog and you fall in love with a woman because of the heartbeat. It will happen in space for man. But unfortunately, physical interaction is an impossibility. But a marriage through the souls will lead to the life of the balance between the two and the child of the soul is so beautiful. Man still has to learn and has a long, long way yet. If you look for the birth due to the interaction of the sperm and the egg and you know it came from the physical manifestation of the soul, now imagine if the souls do this without the transition. It is so beautiful. You call it a virgin birth because there was no physicality.

[How does the Soul affect the DNA and RNA?](#)

021344 Rick: one other question that goes along with that is from a Chinese person: *hello Mr. Keshe, how does the soul affect the DNA and RNA? Thank you very much.*

K: it is the creator of both--one in the level of emotion and one in the level of physicality. In the Chinese culture, you have the yin and yang and the emotion is that fine line between the yin and yang. One is the soul and one is the physicality. The fine line is the emotion. One always reaches the other and the return comes to itself depending on its strength.

021457 K: if you understood the teaching of teaching of today you have unraveled the mystery of the universe because the teaching of today had nothing to do with the physicality of the man. It has to do with the fields of the creation of the essence of the creation and it's the same across the universe. You need the energy to create the matter and the interaction of the matter allows the free levels of the understanding of the freedom of the energy. It is what you call the soul that in its interaction created the fields of its own matter state to confirm its existence that you call the physicality. If there are no questions understand what we taught today and you will understand the whole mystery of creation. Otherwise it is just the wind passing man.

021616 K: thank you for today; have a wonderful New Year if you are on the path as a believer of the Christ.

Azar: thank you, Mr. Keshe.

K: thank you, goodbye.

021629 Rick: thank you very much Mr. Keshe. OK, that brings to a close the 152nd Knowledge Seekers' Workshop for Thursday, December 29, 2016. Next week our presentation will be in 2017, hopefully.

021704 Keshe: don't forget this is the 9 (2016) and the other one is 1 (2017) which is the beginning. Goodbye.

Rick: thank you for that reminder, Mr. Keshe.
