

Transcript of 153rd Knowledge Seekers Workshop 5th January 2017.
<https://www.youtube.com/watch?v=iDFXcPckDCY>

Draft v3

Transcriber's Comments

On this first Knowledge Seeker workshop of 2017 I was disappointed to find that DL is a bad guy after all, after a few workshops back hearing MK talking about getting back with him to write a few more books, and their labeling as 'Red Circle' as a ruse to pull in all the pedophiles... Now it is revealed that this statement was in the nature of bait to pull DL out of his protection to see who he really is by looking at his websites etc. ... and according to the security team of the Kf there are some suspicious activities regarding 6 y o girls photographed in cubes and other things...

The workshop starts with Giovanni's report on the situation in Italy where government agencies are working directly with the Kf in producing pain pads and plasma materials for injured people in emergency situation after a big earthquake, which the Director of the Civil Protection now is scared as he sees the signs of bigger Earthquakes coming towards Rome. Also, there is collaboration with Ghana, as illustrated in the picture showing the scientific research findings in Ghana on decontamination... The rest of the workshop is basically deepening on the last 2 workshops of 2016 and answering all sorts of questions about the nature of the Soul, at one point saying... "If you understand the teaching of this week and last week a lot of you will start getting in touch with your soul" Azar has been dreaming with Mr. Keshe which leads to a whole other look at what is dreaming in the life of the soul? And all sorts of other questions on this Great 1st workshop of 2017.

Content Index

[11.19 minutes: Rick \(R\): Welcome everyone to the 153rd Knowledge Seekers Workshop](#)

[An Update from Giovanni about the earthquake situation in Italy](#)

[Italians will collaborate with Ghanaians in the decontamination and cleanup technology](#)

[MK closes in on DL](#)

[4537 K: let's go back on the science.](#)

[You don't need to be in the suit of the man and cover yourself in the spaceship to fly in deep space](#)

You can influence other people by the creation of emotion in the structure of your soul

It comes to a point to ask about different stages of sleep. Where does the soul of the man go when the body of the man is at rest?

Thou shalt not steal!

012750 K: Now we enter the true space technology – the true essence of the creation.

It is easy to transfer position yourself

014530 Azar: good morning, Happy New Year.

015020 Rick: there is a question from E.C. on the live stream chat: how do souls proceed to the next level after death of the physical body and what is the roadmap?

If you understand the teaching of this week and last week a lot of you will start getting in touch with your soul

015700 Rick: we have someone in the live stream that would like you to describe consciousness.

020208 Rick: this is a question from Denise; am I the director or is my soul the director?

Azar questions MK's private life regarding yelling at people like DL

022014 K: the process you have to think of is how you can interact with your own soul.

Another question on silver nitrite

Please publish your results on the internet so we can all work together

When reading scientific papers read the abstracts

023909 K: please try to understand that we haven't changed the teaching; now we have shown you the tools.

Transcript

[11.19 minutes: Rick \(R\): Welcome everyone to the 153rd Knowledge Seekers Workshop](#) of the Keshe Foundation Space Institute on Thursday, January 05, 2017. It is the beginning of the New Year. Today's workshop date numbers add up to 9 as an ending of the old and a new beginning as well, so we're at a juncture here, a new beginning. Mr. Keshe, I'm sure you have a lot to discuss today....

[An Update from Giovanni about the earthquake situation in Italy](#)

1232 Mr. Keshe (K): Good morning, good day to you wherever and whenever you listen to these broadcasts as usual. We try to open new paths into the new knowledge and how we can support each other with the new knowledge. We have an announcement regarding the Italian authorities in respect to the earthquake situation in Italy. Is Giovanni in the background? Do you see him on the panel?

1330 Giovanni (G): Good morning Mr. Keshe and everybody.

K: would you enlighten us as to what has happened in Italy because it is fundamental for the rest of the Keshe Foundation (KF) in Europe?

1345 G: yes, it is very important. It is the first time in Italy that we have official authorization from the civil protection to help to support the emergency for the earthquakes. This is an important situation because who gave us this authorization is one of the founders of the Civil Protection so he is an important person in Italy in this aspect. The other aspect is the Civil Protection in Italy is the first one in the world. Other countries come to Italy to study the structure of civil protection. So, this is an example for the entire world, this structure. When we have authorization from a structure in this way is very important for an aspect for the rest of the world.

1508 G: the situation is very big because there are 15,000 people affected by the earthquake. I spoke personally with the chief of civil protection and he was scared because now the position of the earthquakes has moved down near Rome. As you say a few weeks ago that this could mean that the next earthquakes could be closer to Rome, Falugia and so on. So, they need to have support in place.

1614 G: there is other news that the day after that we were given the support, all the information of our support became stable for the next time as a partner of the Civil Protection in Italy. The next time there is a problem they will ask immediately to us (KF) for support if there is something they need or to find out what we can do. So, the other aspect is that it is possible to make the same things in other European countries; this is now an example and we can replicate it in other countries like Greece, Spain, and Slovenia and so on. We can be recognized from the central structure of Europe. This is very important.

1746 G: something else is important. In this case of emergency some local chiefs of the regions have possibilities of recognizing the... like the rule... and they have the same level of minister of the earth. In this way and in this emergency, they give us this authorization. So, this is another important aspect.

1852 G: We go there with two trucks that are full of patches, one from Italy and the other from France. They will go tomorrow and give the patches. The people will know that these came from the KF and we explain what we give to them. After, we take some information from the people we give the patches to. Afterwards we will contact them to get testimonials and these will go to the government and the government can check the work of the technology. Finally, we work with the government in emergencies. This is the program.

2013 G: one aspect of the civil protection program is they checked that the people felt good because of the material we gave to the people. When they checked this, we became official partners of the civil protection so that the next time there is an emergency they will call us immediately to see if we can help them in the emergency.

2046 K: let me clarify something. This is what you have already done and that is why they have asked you to become part of the civil defense because they have seen the results.

G: yes. They have seen the results and we became official partners. The next was done to complete the process without any problems. It is simple to do.

K: thank you very much and congratulations.

G: you're welcome, Mr. Keshe, it's a pleasure.

2148 K: thank you, Giovanni and Sabrina have been working closely with Civil Defense Italy and as you remember the people from Austria, France, Germany and Holland shipped in a lot of pads after the first earthquake and after we opened the KF factory to the national government of Italy. It takes years to achieve such a position to become part of Civil Defense support. As you are aware now that we have received the authorization to be ready for the next disaster when it happens, they have seen the use of the patches. In the past couple of months, they already asked for more supplies because they wanted to use this for people who needed them after other disasters.

K: this gives us the acceptance on the medical level internationally once the second level comes in. I was talking to Civil Defense officials in another nation and they said *do you know what this means, Mr. Keshe? This means that you have become equal to Red Cross in a very short time. The difference between your organization and the Red Cross is that they have to buy tents, technologies so that they can help. With your KF organizations worldwide and now with the Civil Defense you produce everything yourselves and you bring new technology across very fast.* This is the beauty of what is happening. The requests at this level mean that our health patches, health pens and water have been significant to those in the last disaster. It has been shown to do the work and has gone to the next level. Now the data collected is just for the completion of the membership on this level.

K: this is important for KF worldwide to take steps. If you are setting up to be able to help nations in time of disaster, we will supply the confirmation letter to you to supply to your authorities so that it becomes part of the Civil Defense. This is important because now officially the health pads, pens and waters are shown to be working. Thanks to all of

you for what you have done. The major breakthroughs are coming one at a time but in a very extensive way. With this we can immediately join worldwide civil defense in the next 12 to 24 months. No organization has ever done this so quickly. It is because of your work. I have to especially thank Dr. Klaus in Austria, the people in Holland, the volunteers in France who made these patches to deliver and show that the technology not only works but shows international cooperation. It was not just Italians who made the patches and pens.

2502 K: this brings us to where we wanted to be. Slowly but gradually we are getting to where we should be as one nation. In the next 7 to 14 days you will hear a lot about new developments around the KF worldwide. This is important for us to develop and let the governments come to accept the technology. In Italy, we have a further announcement in the next 7 to 14 days that a lot of you know about what we are doing. We have been recognized on a very large scale through tests done on governmental support and local government support showing that the technology is highly acceptable for decontamination. It has taken us 3 months of hard work and I thank Paolo who is working relentlessly in Italy to bring this into full operation.

2602 K: the KF after next two weeks will be under the new management team that we put into position. It will set up a world water decontamination section. This brings everything back to headquarters in Barletta, Italy. This gives you a lot of leverage in water decontamination and any disaster. This will allow us to be able to submit technology rapidly to support. On the basis of environmental water cleaning we have had Alekz in the background who is working on a way for oil contamination as in Nigeria there is a huge problem with it. Other people who are familiar with oil business know that drilling holes for oil creates a lot of local pollution.

[Italians will collaborate with Ghanaians in the decontamination and cleanup technology](#)

K: We have set up a small unit that will collaborate with Italian organization at Ghana Atomic for oil decontamination. We brought in a petroleum engineer who understands both sides. He has seen the operation of the GANS and now when I talked with him yesterday, he sees how we can start possible decontamination and use of the GANS materials and other ways. We are breaking into this level of decontamination at headquarters in Italy. Giovanni is involved in it and he runs the whole of the Italian KF on that side. This will give us the opportunity like the oil disaster in the Gulf of Mexico. We can deliver technologies that are natural and are like the water of the sea but is all for oil spillages.

2807 K: as you remember when the Canadian government blocked us and imprisoned me for eleven days I was on the way to deliver this technology to the Gulf of Mexico. Now officially in Ghana Atomic KF Corporation we have put this in a Masters' and PhD degree program with an engineer who is a Ghanaian petroleum engineer. He has started already in the actual delivery of the technology. In the next 6 to 12 months we will hear from him as I asked him to put a team of African petroleum scientists together to solve

the problem. I see how it can be done and I saw how it could be done during the time of BP Petroleum in the Gulf of Mexico.

2904 K: Now we put the scientific team together. Ghana is the center of Excellence in space technology. This is another step in the collaboration with what we have achieved in Italy. These things would not be possible without the support of all of you. A lot of you have made or commented on what I said last week about reorganizing the KF. There are people around us and we have relieved a number of people from their duties and some people have moved into new duties. To become international, the way we have become means that we appreciate the talent of our people. We all came in as volunteers in different ways to help and support and work full time for the foundation.

K: we are looking for experts. Now in Ghana we have reached 22 and next month we will have just under 100 employees by the beginning of February. We have become part of the structure and we only employ masters' and PhD engineers at the highest level so we can leap forward. This is what we expect for those who have been sitting around and waiting for the factories to come in with the blueprint. The blueprint has to be your thoughts and the way that you think something can be done to put in the market place to help others. The cooperation and collaboration between the KF factories has to come from the heart and the understanding and not just waiting on a factory to be set up to give you a blueprint that you want to copy.

3048 K: We looked at Ghana deeply as to what the niche was here. What did we have here and what could we use locally? We have only shipped ten or eleven items from Europe to support us in Ghana because they weren't available in Ghana. Everything else we have achieved in setting up the factory is locally made. We are not looking beyond the borders unless there is nothing there that we can support or we have time constraints.

3120 K: Stop looking at the blueprints and what they are going to give us; the blueprint is what your nation needs. I get this from the people who are signing for the factories. *Can you give us the blueprint of the generator? Can you give us the blueprint of Magrav systems?* You look inside your nations to see what you need. In Ghana, we need clean water and to overcome a lot of infections and bacteria that cause internal problems. These are what we are responding to immediately: water treatment, places where the medical application is reachable at a cost people can afford. This is what your job is and not just looking for us to print a blueprint for you so you can make money out of it.

3212 K: look what you need. Look what is needed in time of emergencies to support yourselves. Use the local materials. China should not become the 'last resort'. China has to become the support system and if you cannot get something we have reliable sources in China that can help us. Use the coconut; use anything that is locally available to help bring about change. You don't need to have sophisticated containers to make Magrav systems or power generators. You don't need to have the most advanced whatever.

3255 K: in the past 3 weeks in Ghana Caroline has moved into what we call animal care. She has brought a change that doctors now have seen of dogs that have been dying (of

parvo virus and more) at a young age. She has CO2 and a very little amount of materials that she has put together to give to them freely and this is saving lives of dogs one after another as well as other animals. They are puzzled as to how simple drinking water can change the life of a sick animal. This was not available before in Africa and Caroline has been asked to give lectures in different cities by the veterinarians and other people who provide animal care.

K: In such a short time they see that animals they were losing are now back to being lively and running around in 24 hours. This is where we have to see what the demand is so we can meet the local demands.

(33:50 minutes). As I said you don't need to wait for something from America or for the approval of FDA of US so you can use something. Our ancestors as medicine men did not have the FDA and they saved the lives of men all their lives. I come from that bloodline.

3412 K: You are in South America and manufacturing in Peru; look and see what is needed in Peru. You are in Singapore, Australia or Philippines. You have worked enough; see what is needed. The whole hunger issue—give people a power unit and that is all they need. You are in the wrong place to start with—do what we are doing in Ghana, Alexz is doing in Nigeria, and Dr. Gwata is doing in Kenya. We are responding to the African need and the local needs to bring change. We are not looking to bring the most sophisticated things that you plug in and 5% of the nation can afford these things. 95% of the nation lives in the conditions that food is needed so they don't go hungry. We are responding to the 95%.

3513 K: you have to understand a fundamental point: we all thought that America was the land of honey until we saw the hurricane in Louisiana and we saw that America was worse than central Africa. Poverty is beyond imagination. We will see the data of how many children go hungry in developing countries. 35% of the children live below the poverty line in the United States, 5%(?) in Norway, 50% in Korea. In the richest nations people go hungry because they cannot afford the expensive food. The statistics are on the internet and have just come out—have a look.

3616 K: there is an English saying: *Fur coats and no knickers*. This means that people who used to have much now have fur coats with animals and mites in them, but they don't have the money to wear underwear under the fur coat. The western world has reached that point. The other nations are not far behind. We are not preaching; we are teaching how you can start changing the course. You signed up to do manufacturing and you want to do this. I don't want to give you blueprint of the generator and this and that. See what you need locally, respond to it and use local materials.

Water Treatment Results

Physio-Chemical and Microbiology Results

**GHANA ATOMIC ENERGY
COMMISSION**

Space Science Center-GAEC

3700 K: everything we have said about Keshe Foundation Ghana, the offices, the factory and everything else is 100% Ghanaian produced. It doesn't look 'brandish; like the laboratories of the western world but it produces material better than the western world does. We meet the demand of the local community and we put people back to work when there were no jobs and we put pride back into the nation. We are meeting with world leaders and they understand the change. It is your job—there is no more teaching of showing you this and that. You are learning and we just try to enlighten and teach more and more so that you understand in depth what needs to be done.

[MK closes in on DL](#)

K: the 3 websites of the whole Keshe Foundation (KF) around the world which are based by one miscondacted person, as we all know. As we said, we can see thousands of websites that all ends up with one name: D. L. That will be handled very soon because we need to bring people who can do the job for us.

3821 K: in a very recent high-level discussion one person brought to a meeting *have you seen 'facts' about KF? Have you seen how they have invested with the guy who is writing it?* It is one person, one man. I give you a warning: *we clean everything up. Do you remember when we put Sterling on the stand? He wrote a lot until exactly about a year ago, we opened his own hand that he had abused his own children. And he doesn't write anymore and at the moment he has become the biggest informer for FBI while he is in prison for 25 years for raping his own children.*

3908 K: people who are guilty write everything to divert attention. We teach to bring knowledge. People of the same get together and Mr. Sterling raped 2 of his own daughters. Look who has 2 daughters and writes (about KF) the same way (as Mr. Sterling did). We have evidence of child abuse and child trafficking through the website. We have hard copy evidence of this and it is shared with Interpol and other offices. The secret was that nobody could point a finger, so how could this be done? Look at the websites which are run by the same man. The victims could not remember so there was no trace. But the gentleman is a hypnotizer. Children are raped but they are hypnotized and the evidence is held to one side. Even his own children don't remember because he is proud to announce that he is a hypnotizer and they cannot remember what has been done to them when they are hypnotized.

4016 K: documents have been delivered to international authorities. Let them write; you know what the technology does. The biggest clue for how we can find out when there are no witnesses? Witnesses of the age of 6 have taken pictures and publicly announced they need to be taken off the website pages. You have to be 6 years old to get a free ticket to a cinema. *In which nation do you need a free ticket to the free cinema? Give us a picture of your child, your son or daughter, and they cannot be more than 6 years old.* Because when they are hypnotized they cannot remember anything.

4105 K: Now you see the truth of Mr. D.L. We praised him for him to make more mistakes. It is for authorities to track and we have achieved it. Go to the websites that are run (by D.L.) and you will see the whole mentality is run for abuse. Tools, writings, websites asking for children and for girls not more than 6 years old to be given the free ticket to the cinema. All the pictures have been given to the security services. If you are desperate for the cinema to take your daughter, send the picture to D. L. and he is a good hypnotizer. Now you know the truth of the child trafficking.

4156 K: the reason we have been attacked heavily since we came to Ghana is because we have leased a website with a secure line of the British government national securities. Some of you can reach this yourselves. These websites show the highest child trafficking come from Ghana into Antwerp. So, we are touching someone's income and they have to ride harder. Just go on the internet and write, 'child trafficking'. Ghana and Belgium are the highest rates and the most advanced nation in child trafficking comes to Antwerp and we know who is in Antwerp and why the attacks in Ghana have increased since we have come here.

4244 K: All villages have no records of children and don't forget that D. L. was born and raised in Africa and he knows all the loopholes. Hypnotizing does not leave any memories. Now you understand why we keep so quiet and we let D.L. write so relentlessly. We have the documents and we have the pages on the internet that are asking for 6-year-old girls. Funny enough one of the victims is on the front to attract young brown girls. This is for you to find out why and write to the world authorities and the police and ask why they are asking for pictures of children on a website that gives free cinema tickets. Don't forget to give them the link that D.L. says he was proud to hypnotize 100 people in the University of Brussels at one time.

4347 K: now you know why we were silent. We stay silent while we collect ammunition and information so that we can help. The links are there and very soon we will open a line called *Facts about D. L.* Go and check and what we ask is how many people got free tickets and how many children pages like Mr. Sterling's appear around the world. Now you know how the vicious attacks on us started. It was because we informed him that we have found the website and the pages looking for children when his company's name is on it. It is the company he owns that is run by his own family and the picture of his own daughter is used on it.

4440 K: We said we do the clean-up and it has started. We are not afraid to have a Zoom channel taken down when we have freed many children. The authorities in Ghana are looking and will issue warrants for the arrests regarding the child trafficking into Antwerp using the online internet hypnotism as he claims he is very good at it. Now you understand the cleanup comes on the structure. Go on the internet and you will know how you can get a free cinema ticket for your 6-year-old daughter. Why not 20-year-old? Now you understand how pedophiles work.

[4537 K: let's go back on the science.](#)

In the last teaching, we put a very clear indication and we were told this was going to be an important teaching but there was not so much. It was one of the most important teachings we have done because we have gone into the position away from the matter into the soul, the essence of the creation. This is what I said in the teaching last week. In the past weeks, I said we are going to the next level, which is the operation of your soul that gives you the manifestation of physicality. It is what man has not been aware of. This new teaching means a lot to those who understand and it means nothing to those who do not understand.

4645 K: it means that as we are going into the deep space technology we were used to the present space program to wear the pressurized clothing and helmets that we had to train for a long time in water to be used in space. Now with the new technology and now with the new approach not only will we get rid of the space suit, but now we understand the human body itself is a suit that can change according to environment that you arrive in. This was the change and this was what I said in the teaching and that was that people would understand according to their intelligence. We explained that the soul of the man is the center of the man and the essence of his creation and the essence of his existence on this planet.

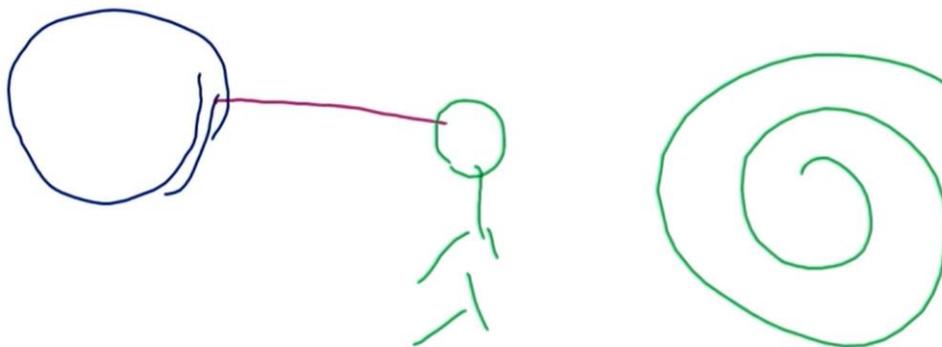

4750 K: Now if you could understand that, now when you have the essence and what we call in the world of creation the seed of life as it is called in creation and it is active, you can take it anywhere and it will go according to the environment. We have seen the man has taken an apple from one place to another part of this world; the apple has changed its characteristics to fit the environment. In essence it is still an apple; it used to be red or green and now it here (in a new environment) it is yellow with a slightly different texture because the environment is different. This is what is going to happen to man.

You don't need to be in the suit of the man and cover yourself in the spaceship to fly in deep space

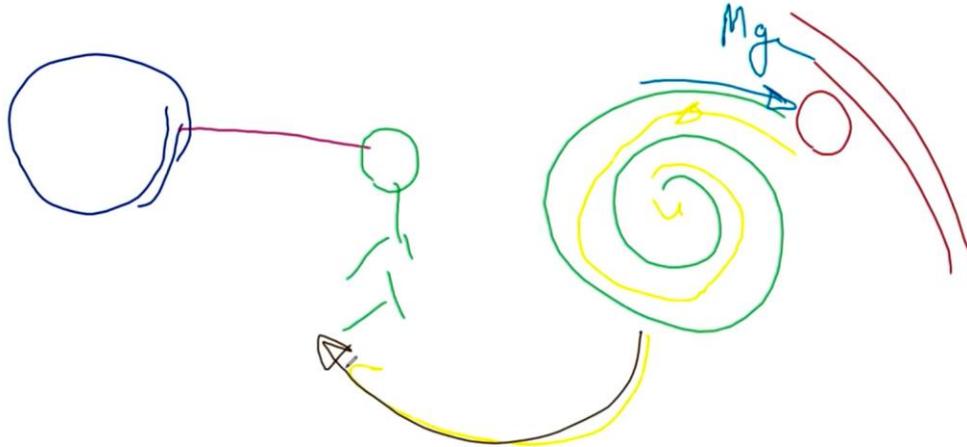

4844 K: we carry the essence and we teach you to understand the operation of your soul so that in space your understanding of it can manifest itself and yourself in the condition of the environment. You don't need to be in the suit of the man and cover yourself in the spaceship so that you still become a fish in the tank of the new world you travel into. To be able to live in the environment you have to become part of the environment. You cannot walk on the streets in planet Zeus with a helmet and a space suit and say *I want to be one of you*. It doesn't fit. But if you understand how you can use the essence of the emotion through your emotion to reach your soul, then in space you feel good, the emotion fits, the environment feels good and you take the manifestation and you dress the body of the man the way you want according to the environment you arrived in. This is what others are doing across on this planet.

K: They have reached the maturity of the understanding of the operation of the soul. This is why we are going into a deeper and deeper teaching. It is not that there is nothing in it; it means that you have not understood. It is my job to teach you more to understand more so you can overcome these 'phobias' and misguided information. You have to understand a very important condition. You have to understand a very fundamental point that once the man understands the reversal position, man will become part of the true creation. In plasma technology we teach... can I share please?

5112 K: In the space technology, we teach something very fundamental and that is that we say in plasma technology we go 'backwards' and we go into essence of creation. We go into understanding of the creation. What have we understood or did we not understand? We said that we create the soul or that the soul is created. (51.49 minutes). In this process, it goes through emotion with condition of the environment that leads to manifestation of the physicality. Go back to the teachings of the KF on plasma. (52.10 minutes)

K: We radiate out as magnetical (clockwise spiral) so that at the point of interaction with the environment it manifests until we see the physicality of it. We talk about what is on the other hand gravitational which means that we go back to the essence and what is not, comes back in. So, using the gravitational we can go back to the essence and to the origin according to the strength. Translate this knowledge back to this side and now you see the beauty of the knowledge given. (53.06 minutes)

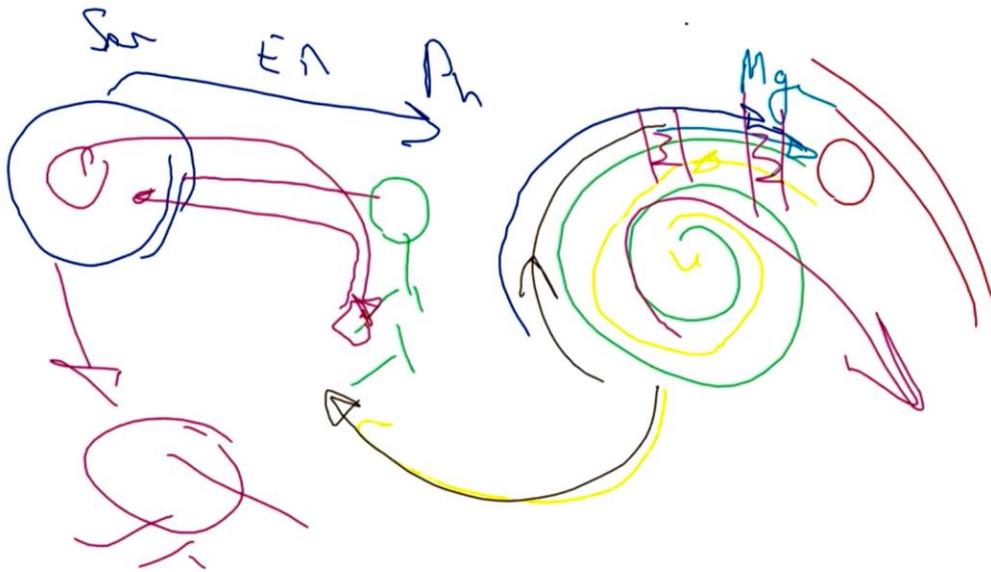

K: by the delivery of the fields we gave it physicality of manifestation and we did the same here (53.25 minutes) and we have gone from the soul through the emotion to manifestation of physicality. Now if you understood that how your Magrav system works and how there is always a gravitational against magnetical which is stronger, so the man only needs to understand it is the step on how to revert and how to use this physicality through his emotion to reach his soul. And then you can take the soul anywhere; the plasma of copper stays copper and it doesn't matter where you take it; the Atomic mass is the same. So, shall be the physicality of the man in respect to his environment according to the essence of the strength of his soul.

5413 K: now you understand what last week's teaching was about. Now you understand why and how we taught the GANS to the plasma and the rest and some people explained it and defined it in their own way. It is not that they are wrong; it is beautiful because *this is what I understand*. Every understanding doesn't matter if it is 'wrong' to us; it brings the fruit of knowledge to the man who understood its level. So, no one is wrong.

5450 K: now you understand where you are heading and what it means and why we have to study the existence of our own souls. It is the key to our existence across the universe. We travel with the spaceship as a group and we come to the destination. Whoever wants to stay can change to the environment. Whoever wants to carry on to the next station can carry on. And they become the manifestation of the existence in the new location. But the problem is that you have to understand different methods of the transportation and different methods of doing things and delivering things.

5550 K: It is you who has access to your emotion and no one else and it is you who has to understand the existence of your physicality through emotion of the environment and your soul has led to the physicality of the present and how you can go back and change. It is you who has to understand that you don't need the physicality of the term to be able to exist. It is you who has to understand that understanding that there is a structure of the soul and you lost an arm in accident, how could you create a new arm instantaneously? It is embedded within it and it is like as we said in the plasma, here is hydrogen, but here you have copper. It doesn't mean that the copper doesn't exist. Copper is still in the field strength in the plasma of the hydrogen. But at the hydrogen level it manifests itself as an entity of the environment. So, can you?

5715 K: so, as the essence you should be able to do, if you can understand your own creation and through emotion reach your soul. It is not magic and it means that those who don't understand have not matured in their knowledge. The more you interact and the more you understand your own emotion, the closer you come to finding the path to your own soul. This is our job. You are GANSes. And we put GANSes and we see the fields of interaction which is the body (?). The whole lot is the same pattern. You call it a plasma, a GANS, a matter state—it's all the same and it's all transformation and transportation of fields and nothing else.

K: there is no magic that you have to be afraid of. We have seen people who come around the foundation and after while say *we cannot do what we thought we could do. We would like to do something else for the time being.* It means this is good and this is how you have understood. Maybe the information that you carried and you understood is deposited in your RNA/DNA of your soul is there to enlighten your child in the future to go to next level of understanding. The beauty with this technology is that we don't expect everyone to be in space tomorrow morning. We allow those who understand and have understood to go to the next level by their own choice and not by our choice.

5910 K: going into space in the deep space without understanding the structure and the working of the soul, the emotion and the physicality is jumping off the Eiffel Tower with no parachute and hoping to survive. There are 3 problems with jumping: first of all you have to get the leap, second the building opens like a funnel and you never land outside the building. You hit the physicality and the high bars. It is the same traveling in space. First there is the fear of going, opening and then it is the fear of how we do this and how we achieve and how we see and how we operate, and then how we would like to be operating where we are. Also, there is how much we want to go and to what extent we are prepared to take of the height of the Eiffel Tower. Do we jump off the first lift? It's safe and we might stay alive. There is nothing we can hit except the ground.

010055 K: Or do we understand that jumping off the first lift and then at that first level I have trust in my soul and I can develop technology within me with my own emotion that I can become a bird of space. In the space, there is no land to crash into and it is how you want to proceed in the open plasma of the universe. That is the beauty of it. And it takes time to learn; take did not take off the first time he took to the wings. From the east to the west, the travel took several hundred years. Chinese were the first flyers for several hundred years before their white brothers ever tested it and traveled. But it was not to be known, so they had to be the first...

010157 K: This is what many men before us who have managed to develop to the next step and have understood the existence of the universal community have already joined in the pattern of life of the universe. This time it is not a few; it is teaching for the masses. We think the man is mature enough that by majority of 5 to 10% we can carry the rest through. It might fail but it is a chance worth taking for what is to come.

010237 K: many times I have said in my public teachings, the revolutions like the Iranian revolution in the 1970s and 1980s did not come out of nowhere. It came because fewer than 5% of the educated were trying to carry 95% of the people who thought it was their right to have everything just because they could read a little bit more. That is where everything stands: 5% carrying the 95%. We are trying to increase this number to at least 20 to 25% in the coming years so that in trusting one the rest will understand. Then we can teach more to open the community. It is no use opening the space universal community to man when they are still carrying side arms and they think with their weapons they have the latest technology.

010342 K: what you call the will is the connection between the physicality and the emotion and the will can change the condition of the soul and through it the condition of the soul can change another man's job. I came across one of the top men in weapons strike (?) that is a weapons technology of the most advanced military companies in the world a few years ago. (garbled 1.04.31 minutes). And in a very simple way I made my wish that this man should not be in this job with this harmful technology.

[You can influence other people by the creation of emotion in the structure of your soul](#)

010452 K: You don't need to go and protest. You need to understand your own soul and that the creation of the emotion in the structure of the soul of the man reaches another man. Then men will disarm themselves and you shall see my work very soon. (garbled 1.05.29) 2 weeks ago it was December 22 can we operate through world leaders without their knowing we are doing so because this is our wish...?

010555 Vince: you are breaking up. ... (silence while server changed...)

010712 K: What I was saying was when we met a man who was head of weapons strike technology and the head of the strike technology, I understood the man was not happy with his position and my wish was for him not to be there. Very shortly afterwards he moved on. He left the job. The point is that our wish has to be our way of bringing peace and as I said, we are working in that direction.

010742 K: As I said... I don't know if you heard it... we gave the world leaders until the 21st – 22nd of December to organize and come with a position regarding world peace and it did not happen. I said we would take over and we have taken over and very soon you will hear about our work. We will make the difference but 'We' is not 'Me', it is 'Us' as the followers and our wish to have a peaceful life. It is the response even to the souls who have not heard about KF but their wishes are for world peace and the end of wars. It takes time, but we are very good at it and we will deliver.

010834 K: a lot of world leaders need to understand the wish through the soul and then they become servants to their souls and the souls of their nations and as One Nation to the soul of humanity. Try to understand something very simple that I have been teaching on the medical side for a long time. Start to understand the process of connecting with your soul and to understand the process to connecting to your emotion that you can reach the soul. (1.09.12 minutes)

K: In some of the health teachings I have taught in the past for example if you have a finger which is not functioning the way it is supposed to and it is paralyzed or not moving, in the teachings we explained that you go to your emotion and into your brain and you send the information to the finger to move and you follow it through your arm and your hand to the finger but you don't move it. You just test that the information comes there.

011000 K: then you do the same thing for the second time but you don't move it. You don't take the intention of moving the physicality to match the emotion. Then I teach that this time, the third time, you send the information from the emotion that you want the finger to move and then you inform the physicality to follow the emotion. Then you try to move the finger and it works. It needs practice and it works. Those who have done it have seen how beautifully it works. Scientifically, a couple of scientists at Liverpool University tried to support that sports people have replicated it and it works.

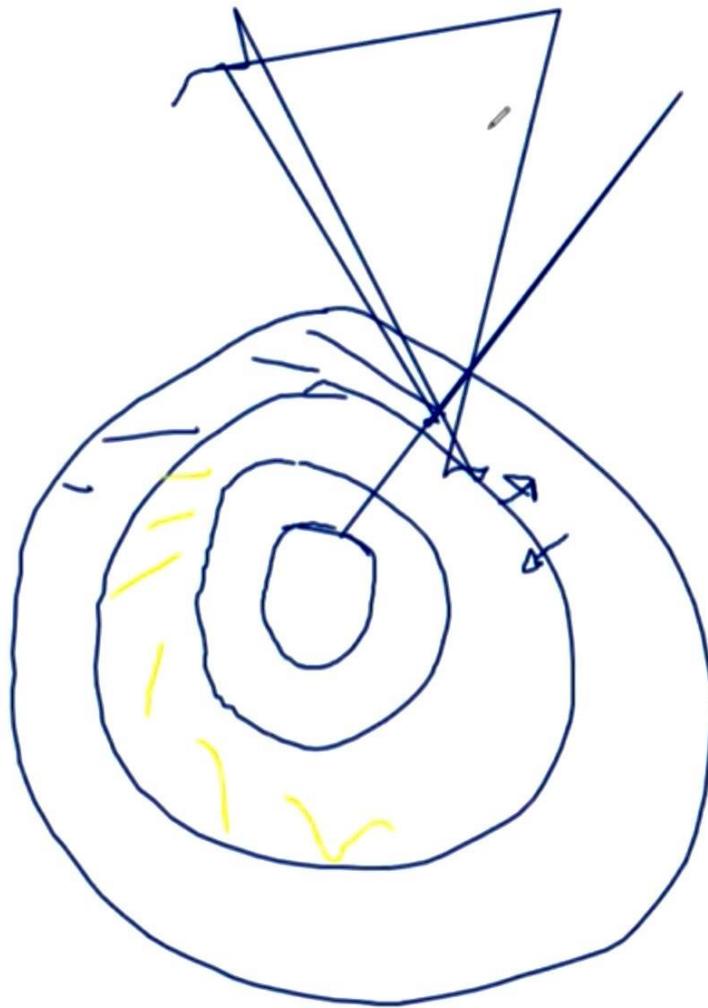

011055 K: Now reverse the process. Send the physicality through emotion without moving the finger to feeling heat on the tip of the finger and then try to feel the emotion

of the heat in your brain. **You start establishing how to go through your physicality and your emotion. Then try to see how your soul responds. This is the way that you connect to your soul. You bring your physicality: I want the physicality to change that here I do not feel the pain of the temperature which is too high for me, but I want to be comfortable where my soul is physically happy.**

011142 K: This is the process that we are trying to teach. It is the reversal. Up to now it was magnetical and I am trying to teach you the gravitational and the feedback. The feedback goes to the soul and the next time it has to reflect back and to give out as magnetical. You have to understand the reality. You have to understand the truth and the essence. There is no use as I said in the teachings in Barletta when there was a guy sitting there that with his emotion he could move. He pressed with his eyes and arms and said *it is not moving; there is something wrong*. But he never understood the essence of the soul and ask it to move because that will give you pleasure, it will move.

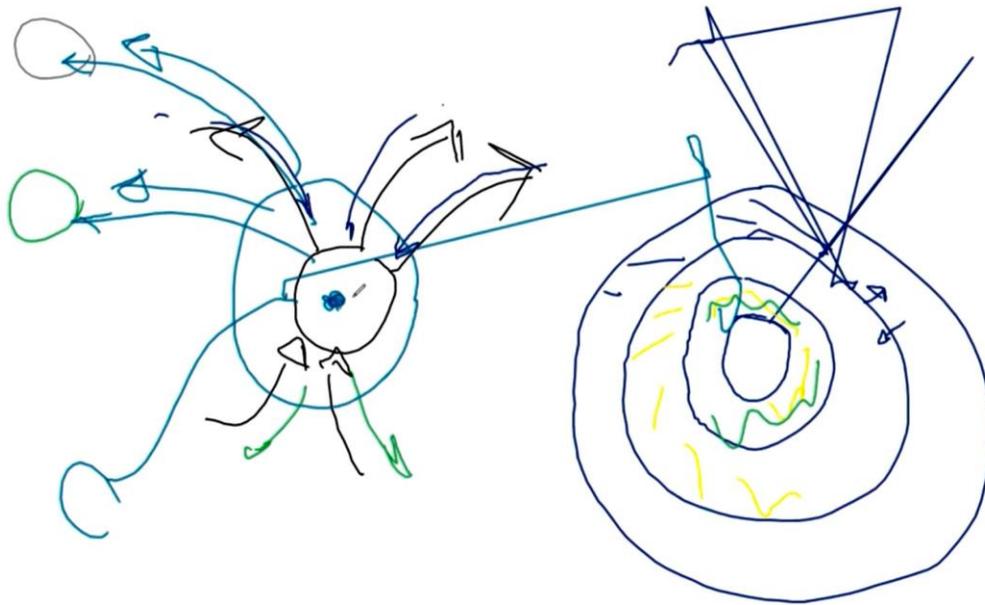

011257 K: this is what we have to learn and this is the reason we announced last week that it would be one of the most important teachings. Those who are physical and feeble... they laughed; there was nothing there. Those who were wise saw the wisdom in the deep space travel. If you understand that within the plasma of the matter sits the plasma of every matter, sits the plasma of the connection with the universe, then you understood that you can lock into any condition anywhere in the universe and travel with it in zero time.

011350 K: those who are wise will understand what has been spoken over the centuries. Go back... if it is hard to understand... to this point.... let me share... 011340 ... If it's hard to understand go back to the basic principles. I will try to see if I can do this in a very simple way for you to follow. If you remember this was the plasma and if you remember this was another plasma. (011457 tries a new technique on the white board but has problems initially, then succeeds in drawing the plasma in layers).

011605 If you take a very single plasma and consider layer by layer of the plasma on this side in respect to the above you are identical. On this side, regarding to here you are gravitational. Hydrogen, copper, uranium—a lot of people ask me why I keep talking about uranium/plutonium. I am a nuclear physicist and I've been trained that way.

011700 K: I will convert this into a way that you will understand. Take a magnet; you are magnetical and you are gravitational up to your understanding recently and today. But while you know you are magnetical and you are gravitational too, and reverse. Now go back... what about other entities? What about other things that carry the same? You are magnetical to one or gravitational to the other. You understood how you can go in the matter state from one to another and now you understand how you can go magnetical and be in one position or the other if you understood the essence of the soul.

It comes to a point to ask about different stages of sleep. Where does the soul of the man go when the body of the man is at rest?

011814 K: can I be in different places at the same time? If you understood the operation of the soul, yes. You become like a loudspeaker coming from the same deck. One speaker is in one room and one speaker in the other room. But you have to understand the line of connection. This is the first time I teach this. But you have to understand what it means. In reality you have done it all the time, but you have never understood the process. You sit at work physically doing something but the emotion is handling something else. This is the multitasking of the soul of the man that man has never understood.

011932 K: you are with one person and your mind is somewhere else doing 'business' while you are talking about homework with your child. You can do the same with the soul of the man, but it needs expertise and understanding of the truth and the reality of the presence of the soul and the position of the physicality of the soul. Because, now as you have seen, you are connected to different points because of the field strength. **But it comes to a point to ask which all of you know and in the present world of science they call it different stages of sleep. Where does the soul of the man go when the body of, the man is at rest? Or, is the physicality of the motion the time part of the soul gets engaged with the physicality of environment of the existence?** We do not teach; we enlighten. It is for you to understand and to enlighten yourself.

012111 K: many times in the teaching I explained... what language do the children speak when they come out of the womb of the mother in China, India, Africa or South America? Bring them together and they don't see, but they feel and they know the hierarchy of their position. **What language does the soul of the universal community**

speaking that we understand in the essence but we have ignored for the sake of survival in the physicality of the village of the earth? This is the enlightenment and this is why in the teachings before I said that by the Christian New Year we have finished with the teaching and now we start teaching the language of the universal community.

012215 K: the language of existence means understanding the interaction of the process of the interaction of the soul of the man. Where does the soul go when the body is at rest? Where, and in which dimensions, and why do we dream when we are asleep? Or, actually is our physical existence the dream of our soul? Why do we see, contact and communicate with the things we don't do during the daytime but at rest we do? In the next few weeks we say *I had a dream about this. I had a premonition. I saw this a few seconds ago.* This is because the soul has already seen before you do because it was set up to be that way and because you have ignored your own true existence.

[Thou shalt not steal!](#)

012342 K: This is our job—to open a channel for the man to have control, not to control, but to interface in interaction in the operation of his own soul. Then ***thou shalt not steal.*** If you steal from yourself half of the information goes and that half is not there so you have half of the body. This is the teaching of the space technology. The waters, the GANS, the pens and the pads are how we have to keep the man of the materialistic world happy. And we have to but it has taken time to bring those who understand to this level now so that they start finding a path through their own physicality and emotion to where the physicality and emotion came from, which is the soul of the man.

012444 K: this is where we now enter the true space technology. We have finished with GANS and nano-materials. Now we have to use the GANS of the body of the man, the nano of the skin of the man to use the line of communication of the field of the plasma of the GANS of the man to reach the soul of the man. Then through it we decide where we want the soul to manifest itself and in what shape or form according to the environment of his appearance.

012523 K: It is getting tough going; you worked so hard to make nano-materials and you worked so hard to make the GANS, the cores to fly, the generators going, and now the guy (Keshe) goes to another dimension and what are we going to do with this? Nothing—understand it and embrace it and fly with me!

012557 K: The spaceship of my heart embraces humanity. It is not changing the goal post; it is extending the understanding of the soul of the man. But you had to see the physicality. I put the thing in nano-material, I put water in it, it goes from alkaline to acidic but it is the same magnetical to gravitational so it must be a field force. It does something. Now you have seen it working and that GANS, that container, that ball is your body and the environment of what it holds. Use the fields to reach the soul of the man and through it you reach the soul of the universal community.

012652 K: This is the secret of the teaching. As I always have to feed you with turning your hands around your neck to feed man. But, that is part of the teaching process. This is the burden of the teacher to understand until he carries his students across the line. I'm not interested in nano-coating and the GANS. I know the path of the soul, but it had to be done. I remember when we taught in nano-material and then we went to the GANS and everyone shouted, *oh no, he has gone to something else*. We lost half of the people who were coming to the nano-material, something they could touch. *Now he has spoken of the plasma and we don't see it any more but it does something*.

012750 K: Now we enter the true space technology – the true essence of the creation. It is you who have to give it the physicality and to live with the physicality and now you have become the creator of your own creation. Now, you are the 'god'. Now you know if you do wrong with the physicality you have to pay back with the soul that created the physicality.

012826 K: *Thou shalt not steal*: then you live the life across the universe and now this is the next step of the teaching. You wanted the generator because it has to be that you wanted the electricity. Go to your soul—warm and cold don't matter wherever you go.

012855 K: a few days ago, around Christmas, I was working. It was so hot that even the sweat was dripping from the tip of my tie. And I said this is so foolish. We have the knowledge to change the structure here without any cooling system at 24 degrees Celsius but we have to stay here because that is what it is now. The plasma is not a structure that you put it that this is principle, this is the transition, and this is the matter state. What is a transition to me is my matter and what is your soul part is my transition.

012954 K: Man, has to understand the totality of the operation according to interaction, which is needed or wants to be present at the time of interaction. We have done it so many times but we did not understand. Have you seen the man on the phone? He is sitting next to a mistress and talking to his wife on the line? He is shouting down the line—*it is not there, it cannot be done, you don't understand*...holding the phone he says oh, *darling, I love you*.

013039 K: where does the love of creation sit? Or have we decided to be positioned in the present condition? This is what we have to understand and what the new teaching is about. The goal post has moved from the GANS to the soul of the man, and God help you man, I hope you'll understand. Understanding it will open the key to the universal community. Disgracing it shackles man to the world of physicality and all its problems. The time of transition is harsh because you got used to it for too long.

013151 K: The problem is not a problem until there comes a time of transition. Accepting and understanding the acceptance is the biggest problem. As I said before I read many comments: *why has he gone to GANS now; he was teaching about nano and it was perfect. We made all the cores with the gases and now he has gone to little balls with GANSes*. Now we change the containment; it's the physicality of the man with the GANSes in it and the soul of the man inside it. Try to operate it.

013248 K: those who achieve it will enter the universal community and when they talk about it to the others they will say *you are stupid, you are dreaming* because it is beyond the limit beyond themselves and they cannot understand it. As I always say when I was in Tehran 8 years ago, a guy said to me *my uncle came from Moscow in 40s and 50s. In Russia, I was in Moscow and they have something that is metal that flies and they call it flying metal bird.* They laughed and said *we cannot fly!* A few months later they were at an airport and one of these metal things landed in Tehran. I said *I've told you and I've seen what you see. At that time, we were stupid and ridiculous. Now we are all stupid because we accepted it.*

013345 K: In Africa, they call it a metal bird. Since when does metal fly? Now we have come to accept it because we have put engines on it. We have to come to accept the transition of transfer of our souls because now we have found the engine to it. The maturity of the man comes from understanding his own soul and no further. Then if you understand it in a later position, you want a spanner to open a nut so you have to go buy the spanner. If you understand the operation of the conversion of the energy, you have two choices: you create a spanner in your hand to open the nut, or you understand the nut is made of a collection of fields and it has the essence of existence. You transfer the energy of the wanting of the physical position and it satisfies your need according to accommodation that you made for it. Do you need a spanner? Or do you have spanner of the universe?

013504 K: when we speak this way at this moment, it is all like talks as it is very far for you to imagine. It takes a few times until you make the core and put the GANSes on it and find the motor to rotate it and see things move and you achieve 129. Those who can't understand it say *it's wrong and he's cheating.* But you understand it and you have seen 1 to 9. You are enlightened. Let the fools be fools. You have reached the destination of the creation. Now how would you like to put this body of the man on a motor and rotate it 5000 RPM so you can separate his juice, his GANS and find the soul in the center? Any volunteers?

013612 R: that is a good point and that was the exact RPM I put out with my globe of water that I was rotating and trying to get a center bubble in it. Now you are saying you can't just do that to get the core of a human.

K: you can do that.

R: perhaps you can only do it once in each entity perhaps. Hahahaha!

K: but what are you going to do with the soul that you separated in the middle? How would you like to put it back together again?

R: then it would be in a different environment and Humpty Dumpty wouldn't necessarily go back together the same way.

K: you never know. If you have the right glue and you find all the pieces.....

R: but like you say once you have a 'hard-boiled egg' and you try to smash that together again it's a different situation.

[It is easy to transfer position yourself](#)

013732 K: this is how people like Rick who started these teaching programs with the nano-materials and the GANSEs and the cores, now they understand. **You have 2 choices and they are very simple. The secret of the communication and interaction of the physicality sits with what we call the potential difference and the current flow. It is you who dictates what the potential difference is going to be and it is you who decides through the soul how much emotion is to be passed on to be the current of the flow in respect to the environment. It is that simple and no more. It is to understand the totality, it is to be the essence, to become part of it and to understand the position of it. It is to be in essence the totality of the total, to be part of the plasma of the universe rather than being on your own. Then you can transfer position yourself.**

013909 K: **in the coming time when the man understands go back to the position of the Magnets. It is you who changes the emotion and the physical appearance of the matter state of the energy that you can move yourself across the universe without doing anything. You just change the rate of the giving and the taking and then it changes position to where you want and where you fit. Or you become the nomads of the universe. You change it and land and you don't know where you are but you decide to spend sometime there until you would like to move on. It is you who has to understand that with this knowledge you should be able to control the giving and taking from the soul so that giving and taking is like the way magnets dictate the positioning. Put the circle magnets next to each other. If it is stronger, the distance is more. Now we have the reactors that can do Magrav positioning. You can soul position yourself.** It takes time. We set up the knowledge and the course of the line to achieve it; it is for you to understand it. Otherwise it is under the sound. In times in the past, many have achieved it and will achieve it and then you find out the path to it comes from the detachment of the soul from the physicality. Then you understand through the line of communication of the emotion and the soul that you can give it any physicality you like. *Wherever I lay my head is my home. The head of the man is the soul of the man and the home is where he has his physicality to rest, to hold on to the physicality and to contain it as well enjoying the sharing of the souls and the fields of the others.*

014136 K: I guide; I don't teach. I enlighten; I don't force. Now people like Armen are banging their heads and now he has gone from the core to the coil, and now where am I going to find the soul? It's always finishing as one thing instead of all of it which is the universe. **Try to understand the strength of your emotion and what that emotion can interact with and position. Try to understand the capability of the soul and then the physicality will be child's play. Try to position your soul and test it. Start little by little and then as you get confidence you find the pathway of the motorway (freeway) to it and then you can do whatever speed you like.**

014303 K: that is what I said about the computers on the control systems are useless because your speed with the speed beyond the imagination and you want to control the physicality. You go through it and you would not be able to contain man in space with aluminum frame. That is why you make the frame out of the plasma to withstand the

condition of the soul in control of the craft. Go back to my teaching. I always said computers are too slow. **It is the man's thoughts and emotions that will create condition of the motion and with it the plasma of the craft according to the environment; now you understand.**

014353 K: go back to the teaching of about a year ago where we put the spaceship as dots on the ground and in the pictures. And, a year later we see the interaction and attraction of those fields by Jon in Arizona. There have been little blips; now we have to make the transition of the emotion to the matter state so that you see the physicality of the craft. **There is a discussion and a school of thought that says there are nations who are in touch with those from outside. We have always been in touch with humanity from outside and never stopped and will never stop. We know the path of the soul to the man and his greed and his connection.**

014501 K: understanding the interaction of the fields of the plasma of different strengths leads man to his soul. But it has to be able to understand that in that path he needs a stronger field than the physicality that is free and we call it emotion. Any questions?

[014530 Azar: good morning, Happy New Year.](#)

K: I was expecting you Azar. Go ahead. Happy New Year.

A: last time you spoke I actually thought it was a very very important teaching and we are trying to transcribe it because, just like the world of Baha'u'llah, it has a lot of hidden words that we have to really understand because sometimes being in physicality makes us not to be able to understand certain things that you are talking about. Actually, sometimes after you are speaking I fall asleep and I usually have dreams and you are always in the dreams.

014630 A: Last time when I woke up two things dawned on me about my dream. One was our language is so primitive although we have so many vocabularies. It is so primitive because we created the language to cheat and lie and to cover up. The true language is the connection of the mind and once we make that connection we talk to the emotion, which is beautiful. If someone loves you, the love of emotion is beautiful. The second thing that dawned on me is that everything we created outside of ourselves like a home, a plane, a car or even the cup we drink from, inside of us we wanted to have it in physicality. But we no longer have to do that; we made the air so cluttered.

014717 A: it is like a disc we can fold everything we want inside our body. If I want to have a home, I can create one wherever I want and just be there. If I want to fly, I can do that. But the way I felt was so great and I just wanted to share that. The second thing is that we always talk about emotion to the soul and one thing is not clear to me if you can explain in detail *how can we practice and recognize that emotion? How can we do this to get to the soul? This for me is a puzzle. Is it love? Is it a feeling? When we talk about emotion is it something like an inner emotion that I can feel? I need some kind of detailed instruction to understand.*

014811 K: **The emotion we talk about is the line of communication from the beginning to the point of manifestation of what we call the delivery of the expectation. You call it fear, love. If you are strong enough to be within it, you still need to have a strong center. Its flow allows for you to be a part of the transition of it. The transition doesn't come from the center of the plasma to another point. It passes all the elements of what is available and the strength of it. What this means is that there is always a higher strength that it needs to dissipate so that it reaches the point of your existence. So, there is always what we call the intermediary at the time of transition. There is no other way; if you were at the center it is non-existence and it is a standstill. So, at any stages, no matter what our comprehension is, we are still in the path from the beginning to the point of manifestation of comprehension. You might be able to shorten the emotion that it is instantaneous but still this has to happen from the soul to the physicality. So, you call it transition time or you call it the emotion; it's all the same.**

A: Thank you.

[015020 Rick: there is a question from E.C. on the live stream chat: how do souls proceed to the next level after death of the physical body and what is the roadmap?](#)

K: the roadmap of the soul, if you live in England, you go up M1 to southern junction 19 and you turn left on M6. You drive for another while and the junction 19 again takes you to Manchester. This is a road map. ***Souls don't have a roadmap. The map of the soul is delivered by the soul itself according to its comfort and presence. Maybe sometime in the future you can make your soul GPS. At the moment, it does not exist in the universe.***

015116 R: OK, well E.C. has another question: *if nothing happens when trying to understand the soul teaching, does it mean that I am too disabled on the emotional side and death is my only hope of enlightenment?*

K: why does man see death as an end? Or change? So, when you can connect your soul and manifest yourself somewhere else you die in one place and you will come alive in another place. Or, is it the same soul and you look different? The soul is the collection of the free existence of the fields without the attachment once you die of the physicality. But still itself has manifestation of existence in respect to the environment in which it has existed. Any other questions?

[If you understand the teaching of this week and last week a lot of you will start getting in touch with your soul](#)

015230 K: **if you understood the teaching of last week and this week and the way we will carry on, you will soon understand and a lot of you will try hard to reverse back the heat and feel it and show your emotion. And then you will start getting in touch with your soul. Then through it you will create the condition of the transfer. It takes time—it could take longer than the time it took you to make the nanomaterials, the coils and everything else or it could be instantaneous. It depends**

on the clarity of the soul. And it depends on the understanding of the knowledge and the use of the knowledge.

015327 R: Anonymous says, *'Good day, Mr. Keshe'. Your talking has answered more questions than I have since going 'out of body'. I am proper thankful and grateful for your sharing.*

015339 R: then Akshire asks, *do the fields in the GANS in the reactor systems align our physicality to emotion and soul?*

K: you can use it. Armen has done it once or twice and he 'jumped it'. But, I don't say anything. Armen has a beautiful soul but he is too busy. He was born too young at 7 months so he jumps things and doesn't see them. I have seen it once clearly done by Dr. Eliya Kostova when she was in Descanzano. But she wasn't aware of it. But Armen saw it and tried to repeat it. He repeated it but never understood it. Making the cup of life, making the cores, making things I have done with the core members has just been a path of trying to put the essence of the creation of the soul in the physical matter that you could understand... because Man is physical.

015528 K: There is a connection between the physical dimension and the soul. We call it emotion but if you find a path of it and understand the process of it, it is the transportation across the same media, because matter itself is a plasma but at a given strength. The soul is a plasma itself but of a different strength. But they are all plasmas, they are all transfers of fields. Try to not shortcut but to understand the path and the method to understanding and then you have achieved it.

Any other questions?

[015700 Rick: we have someone in the live stream that would like you to describe consciousness.](#)

K: why should I describe it? You explain what is consciousness to you? Is it the behavior of the physicality that has nothing to do with the soul? Or is it witnessing through the soul the behavior of the conduct of the physicality, with no emotion? **Go back to some of the teaching we have done before. I always say that what we eat is 20% of what we take from our environment. The other 80% is absorbed through the fields and given out to the fields. We can't just always take. We give and we take. We empty the cup of the energy of the universe and the universe gives us what we need.**

015806 K: now, by the same standard only 20% of the emotion of the man carries through the reflexes of the neuro system. The other 80% is free flow between the point of delivery to the extent of the emotion and the soul. Because it is so fast the matter state, the GANS state super conductor, the nerves are too slow. We call it reflexes sometimes or we take actions without knowing.

015845 K: Caroline watches videos and some of them are fantastic. The father is asleep and the child is on the sofa and he just topples over to fall off. The father in his sleep just

grabs the child. The body is at rest and the soul watches its responsibility, what the soul has given life to, because at the time of sleep there are no reflexes. We know all the ways our souls work but up to now we could not understand or explain it. We always put some other things to it because physically it had some meaning to it. Now it doesn't because we understand more or less, at least we hope we understand that we can explain it and we can use it.

020000 K: in his training I watch my sons. They close their eyes and the other one tries to feel the fields of the other one, where he is and what he might do as part of their martial arts training. They have to stand 3 in the middle and 4 or 5 expect which person around them is going to be against them next. It is not that they feel the emotion; they feel the soul and it opens up but has not been developed. This is why Eastern defense systems like martial arts extends in that direction to extend the physicality through the emotion to the soul of the man. This is because the soul of the man extends to all of the planets and the universe and tries to assess and feel. We need to get trained. We cannot go out the door, and run a marathon and win. It takes years of experience and years of training. The first day we do 20 meters, later we do 100 meters. A few weeks ½ a km and then we add more meters and build it up. You have to understand that to win a marathon is too much effort for the physicality. To understand the soul is so simple and we do it all the time. We have forgotten it; in forgetting it he *does his job and I do my physical part when I need to have contact. Our own denial is the cause of our own problems.*

[020208 Rick: this is a question from Denise; am I the director or is my soul the director?](#)

K: oh, there is a problem of who directs and who is the producer. The producer and the art work all sits in one place. Don't forget at the end of the day it is your physicality that shows the emotion and the delivery of the behavior of the physicality. So... was it the soul who moved your arm or is it you who moved your arm because the guy was pushing you?

020309 R: do all the creatures in the universe speak the same language or understand each other?

K: of course. We understand it too, and I explained this to a scientist recently. I explain it to you if you understand it... In the body of the man the information flow in respect to the immune system is so much that it will occupy the whole of the brain operation in traffic of the information from one place to another. For the production, the brain has decided to carry a separate colony, or position as a substation; it is a gland. In our soul transformation into understanding the physicality our soul is aware of the communication of the universal language. The physical part has been made the brain of the man for it to handle this physicality while it operates in the universal condition. The gland is our brain. It is the substation for the soul and it can leave it to do its work while it is busy with the physicality of walking, changing, selling, colds, flu or whatever.

020454 K: the very interesting part: look and go and understand now with the latest technology with scans and MRIs how they locate which part of the brain is responsible

for the hand which is on the top right. The legs are on the same parallel, and the rest. What happens from the soul to that position of the arm? Why do you have different layers of the nerves, some for consciousness, some for blablabla, because it needs to reduce the strength from such a strength of the soul to the point of physicality? When you touch or feel burn, the soul, the emotion feels the neuro system on the brain and not on the finger. That is how it is done. When you put a needle in your finger and you feel the pain, the emotion does not go so much to the location. It is already felt by the position of the brain in respect to that cell.

020602 K: It is the filtering from the soul to that position of the brain that reduces the strength so that it can feel the emotion in the strength of that field as the matter state of that position of the nail. This is what the world of science never understands about the operation of the brain and the physicality. This is the problem; this is where the physicality of finding the line of what we call the nerve and the neuro system leads us and we say this is it. Where does it go? How come it goes in one point and then it suddenly disappears inside this disc. Then we say *this part is responsible for the hand and the arm.*

020654 K: You have heard me many times as I teach this: the side of the ear is for the fingers. Just above the ear is your hand. Across the top to the middle is your lower arm. Inside the brain going up is your upper arm; then there is the shoulder because it is closer to your brain and your soul. But in fact, the neuro system responsible doesn't go in a connected line. It works in the transmission of the fields. And the interaction at that point is with the emotion of the soul. Voila! All the biological books written about the brain goes into the bin. Now you understand the truth.

020747 K: you can go and when the science of man delivers further, you can touch a specific point and say *I want the tip of the left finger to feel pain. And you just feel the energy on a certain point of the brain and you feel pain. Is there a wire connected to a single cell or is the energy level with that is zero-time communication and you feel it?* **This is how you return people back out of a coma. You operate the brain and then the brain connects to the cell. It is not through the neuro system but through the space of the cells. Man has got a lot to learn about his own physicality, let alone the soul of the man. Today is a glorious day and one day we will explain to you why.** Any other questions?

[Azar questions MK's private life regarding yelling at people like DL](#)

020903 Azar: I have one more question: do you remember there was a teaching and you were talking about your personal life. You were in London with Caroline and you were in a location that you said they set you up. You called the guy who was in charge and you were yelling at him about what they had done to you? What did you feel at that moment; is that a normal reaction?

020940 K: in a way that's a physical reaction and in a way ... you have to understand the way we think and the way we work. I don't look at the next step; I look at the totality

and what it brings at the end. Our goal in that meeting was to show and to bring in a way to show that missile technology was useless. That is why I went there. I have a better technology and your missile technology is useless. The goal was 20 years to bring disarmament and to show those “new” technologies are useless and we needed to talk of something more.

021030 K: In 20 years, maybe it was 2005, which is 13 years now, if you would have achieved understanding we would have saved millions of lives of those who were killed by the Americans because the guy at the top is of the heads of the Illuminati. Am I responsible for death or for the soul of the totality? We react according to the time and what our physicality says, but the whole lot is the end. Many times, I sat in the Toronto airport with this guy threatening to kill me and showing me his gun and telling me he was going to shoot me in the head. And I said that one day he would see the return of his action. What puzzled tens of officers in nearby rooms who were asking questions through him was that I laughed at them. They were so stupid; they didn’t even know what this was about, and what was carried in the suitcases.

021143 K: the decision was to steal from me and to disgrace me. The one who ordered that? We see how she got disgraced in the last election in the United States with a bigger embarrassment and a bigger shame. I have to act and behave as part of the physicality, but the ultimate goal is achieving what we want to achieve and that is the unification of mankind, as well as world peace as well as opening into the universal community, which is the end product. It will happen over time.

021230 K: as we said earlier on the hypnosis and the little girls regarding Mr. D.L. He hypnotized them and nobody knew that. We opened the secret and we delivered as we did with Mr. Sterling when we announced his victims were his children. Now we open the hand of D.L. Couldn’t we do this a few months ago to save other children? But the security services had to do their work. If you live anywhere in Europe call the Interpol and show the pages of the hypnotist. That is how they did the children. That is why there is so much rubbish written on the internet by the same man. We informed his children that we know about how they have been abused and about the hypnosis. He thought nobody would ever understand and his writing became harsher.

021319 K: Now go on the internet and look at the happy cube. *In the cube, you will be happy.* Six-year-old girls and children for free tickets to the cinema. We know the consequences but we have to allow the authorities to do their jobs. Pedophiles find ways to do things and we cannot stop the wars. We tried to create the tools.

021402 R: there is a question that came up that I wasn’t going to bring up but now I think it is important. Akshire asks, “*is pedophilia a gravitational requirement for the souls who commit atrocities against others*”?

K: it is so shameful it is better not to discuss it. These people have no essence. There is no place for the soul of people like this. As we know, we stood a lot; you, Rick, went to a near heart attack when Sterling brought the Livestream down the first time and the second time.

R: that was a rough time not with just the live stream, but the emails.

021500 K: now you look; you and I and the rest of the team took the whole wrath of it. Now today we kept quiet about D.L. and now it is on the internet because we are working with the security forces for his arrest. Because there are others involved in it and we have to get the whole team. We stood while our websites were taken down. How much rubbish is written about us every day by the same man? We saw the same thing with Sterling. He went rampaging... rubbish every day because he knew we were at him and that we could get him.

021544 K: please, please go and see why you are prepared to give a 6-year-old daughter or girl for a free cinema ticket? It's on the internet because the girl didn't need to go to the cinema. The pictures are already taken while they were hypnotized; it is his expertise. He is Jekyll and Hyde. And everything is written so openly. Sterling went and put everything everywhere: *I am a pedophile but nobody can touch me because I have the biggest judge behind me.* We saw what happened to the judge (Scalia) and now we will see what is going to happen.

021622 K: Please inform the police across Europe and see how many children have had a picture taken for a ticket to the cinema. They can't even remember. That was the key nobody could prove; now we have the hypnotism of the expert and all the tools of 'holistic' sexual tools and 'state of the mind' on the internet. Nobody could get him; now we have got him.

021654 K: we informed the police of Belgium with all the references. We put one terabyte of redacted information with the police. The facts about D.L. will be set up and passed on. This is how we collaborated with the FBI with Sterling. Now we can do the same with D.L. And (information) how scientists were killed the same way. We have the link and we can give it to you now but there are so many people around him that the International Police are working on it. That is why we took so long.

021730 K: A lot of people asked me why we let this guy write all this rubbish about Keshe. I am and I can take it; I am big enough to take it. Now you understand why. *Happily cubed for children under (the age of) six.* And we sell these things to branded names across the world. The only thing no one asked is how many children had their pictures taken? They can't remember. *The hypnotist does whatever he likes, takes the pictures I like and put them on the internet and make a good living out of this. I share it with the people that are in corporations, the King, and the House of Lords.*

021817 K: it is the same with the guy in Sierra Leone who was very close to Sterling. It is the same with D.L. who takes pictures of the sick people as translators for the children and documents for hospitals in the United States. They sell the sick children. The guy who set up *Facts About the Keshe Foundation* has worked for a company and now he is sacked now. The company sacked him to protect themselves because they are in child trafficking. They were sending pictures of sick children to the United States and transporting sick children to the United States to be abused. We have found out a lot

about Mr. Kumara in his ‘facts about the Keshe Foundation’. And he was brought in by D.L.

021916 K: now you see how pedophiles work together and there are websites with these guys. One has already gone to prison for 25 years (Sterling). Go on the Facebook of Sterling and you will find both of these guys in the top ranks in child trafficking, even sick children. They have no mercy on them. The companies are in the United States and in Sri Lanka. They deny and say he doesn’t work any more that they sacked him. He sent an email out that he is going to kill Keshe because I lost my job and you told my company. No! The company knew we found out what they are up to. The curse of God is on the soul of these people. Let’s talk about better things.

022014 K: the process you have to think of is how you can interact with your own soul. Now you have to understand how you can work with your own soul and how you cannot touch another soul until you understand the working of your own soul because when you interact it is to give and not to take. And when you give you receive more. A lot of you should have achieved this point that the connection you used and you understood through your emotion, you react physically. Your emotion carries the essence of your soul in the interaction with the other souls. Now try to learn the reverse but don’t put yourself in the centrifuge. It will be very hard to get the soul back together again to its physicality.

012144 K: this way you go back to the teaching on the potential difference on a field difference between your manifestation of physicality and your emotion and the flow of the fields to get to physicality from the soul. It doesn’t take that much; it takes less time than it took Armen to build up his cores and put them on the set.

022230 K: I have to tell you something. I spoke just now about *happily cubed*. Do you know what we have found out what D.L. does? They put children in the cube and they take pictures of them naked. That is why it is called *cubicly happy*. You didn’t know this is the same as the story of the pizza (Pizzagate) that is going on in the United States. We have unraveled the whole secret of how this is happening. Six-year-old children and girls fit perfectly into the cube for the misconduct of the hypnotist. Now you know the truth of Mr. D.L. We’ll give you more and it is all in black and white and he cannot erase it. It is on the internet memory and kept in the archives.

022337 K: It is one of the 70,000 to 72,000 list of names that has just been released a few months ago by Interpol. D.L. heads the list. Good Morning Mr. Laureyssens... You are caught. Any other questions?

[Another question on silver nitrite](#)

022418 Q: I have a question... Can I use silver nitrite for treating _____?

K: can you speak a bit slower so I can understand? I don’t know; and if I know I can’t tell you on this program. Silver nitrite has a connection with one of the nitrogen of the amino acid and silver has the behavior of the potassium that gives energy to nitrogen.

Depending on the condition, if you create and the way you produce it and the way you bring the interaction, the way it feeds and the way it works and the way Silver because of its radioactivity in its isotopes in its cycle of its decay works because it has both positive and negative and they are switching alternately. It creates what we call back flow. If you look at the decay cycle, scientifically go into the decay cycle of most of the isotopes of silver and potassium, you see B+ and B- and B+ and B- which means there is a switching and a current flow. It has to switch. And the energy surplus between this switching is what the body uses.

022621 K: This is what is done in the generators. If you remember the generator that was shown a few months ago where Douglas was showing two motors switching back and forth, one has the current that is positive in respect to the other and one has the potential difference. That is where the switching comes from. Don't just look that these are the isotopes. As a nuclear physicist, I look at the switching of the power. When there is switching, every time you switch energy is released or absorbed. That is how radioactive material in the cycle of the body of the man works. It's not just that they do this; it is the isotopes cycling and the microseconds switching, the nanoseconds switching and energy is released. It is just like quartz. It switches back and forth. In the switching energies are released or absorbed and then because it is connected to nitrogen it is near the structure of the amino acid so it depletes or makes the surplus. That is how these things work. This is how it cures. We know there is a scientist who actively promotes nano-silver. I support such science. But there was ambiguity in the science and now we have cleared it.

022752 K: we had a meeting with a couple of our people in the past few days with a scientist who says for the first time he tries and he can explain how the GANS plasma water works and he will publish his papers in June and July in different articles in published magazines with peer review and that the plasma GANS is correct and he has shown the effects of it. And, in reality all we do is put the plasma GANS on paper tissue, seal it in a bag and give it to the Red Cross or what you call the Civil Defense of Italy. They have tested it physically and it works. Now scientists have seen it and they are trying to put data to it.

022837 K: We will have a lot of research in the next 2 to 3 years on these things. Do you know why? The scientists had a pain and put the water on it and it works. So, it has to have something and we thank these scientists for putting data to this. Our colleagues in the foundation know what we are talking about and we don't release any of their names so they don't become targets of Mr. D.L. and his team of pedophiles. You notice that we don't show much from people on these teachings; they threatened these people's lives and the lives of their children. People and their children are vulnerable. These people have said what they can do—they hypnotize the child. Now we know how they work. 022917 K: please send the information to Kortrecht.

[Please publish your results on the internet so we can all work together](#)

We are waiting for the 'wizards' and their masters to understand the science and not just 'if it works'. If it works, what is the location and what is the content material? (2.29.38

minutes) What does that bone or muscle carry and how much of it and to what extent? Yesterday I was in the lab with our scientists with 20 to 25 culture plates on the table and the researcher said *Mr. Keshe, you see the first water is good, but in the 3rd and 4th water something changes. It was puzzling how this could be; because it's the same thing and it shouldn't be reversed.* I went back thinking and walking around the place and I said *I know what it is. Why is the culture growing the reverse?* I went back and told them that one of the tanks that has been used has a problem. We opened up the tank and there was a problem. Otherwise we would have said that the technology doesn't work.

023048 K: we found the solution; you have to go and find where the interaction comes and does this logically and not just what suits you and then you understand. The beauty of the present time that we are teaching is the access to the internet and to the knowledge which is on the internet. I was puzzled and I asked our webmasters over the past years how they solved things. I was surprised that within seconds or a few minutes they come up with the answers. Then I realized what they do. While you are talking to your webmaster, he is typing the problem and he says *what is the question and here is the problem.* Ask your question in writing to the 'god' of the internet and things will pop out. Find the connections.

[When reading scientific papers read the abstracts](#)

023154 K: one of the key things to understand in any scientific paper you read is not just to read right through the scientific papers. You will never understand because one day they are chemistry and the next day they are biology and other things. Read the abstracts. He says abstract and I have changed that—I say, 'understanding'. Read what the intention is and then you understand what is to be. Usually you can read the last 3 to 4 paragraphs of the conclusion. Most of the time it is said to fit that they say it is done and proven. But, in fact, look beyond it and see the connection of how they have tried to cover it or they have achieved it. Then you understand the process. Was the school of thought with the abstract the reality with the science?

023313 K: I said many times that before I start submitting my papers, especially when Mr. DL walked in my house there would be 3 or 4 tables filled with papers as well as my suitcase. I used to walk with suitcases of papers from other scientists to prove what I say is correct because there is something about it here in one of these papers all highlighted with yellow. I never read what was in it because the process is irrelevant. The school of thought, the abstract of what they are trying to do, gives you the understanding of what someone else was thinking and what was the school of thought behind it...unless you are trying to set up a parallel process.

023400 K: You have a question: *does the silver nitrate work?* I have shown the silver nitrate—go into the atomic structure and the understanding of it. Now take this across to the writing of the plasma side of things. And then see in that section what materials exist. What is in the joint? What are the factors? What elements are there to interact that you can introduce and remember all the time that amino acids are weak.

023442 K: So, whatever you make in the matter state GANSeS are stronger. Two things can happen. You can use the element as an intermediary to an injury or whatever. You put a weaker mixture and a stronger mixture. 2 to 1 is usually the best and what this means is that you work with atomic mass. Take a tissue paper and measure: put 5 ml of the GANS plasma you made in one tissue and take another tissue and put 10 ml of the GANS plasma. Make 2 sealed packs—2 patches, one on either side. What happens is according to the ratio mass the 10 is trying to bring the 5 energy up with the middle. One is on the positive magnetic gravitational with the damage (injury) in between and it is just depleted.

023543 K: Voila! You are physicist-scientists-doctors. Understanding the work of the plasma where the stronger always feeds the weaker to bring it to balance and to be just. This is the story of the universe. You never take and you always give so that you bring the others. When you take, you are lost because you want anything given. But when you are giving then does this side need it or does that side need it? I like rice and I don't want potato. I like meat; I don't like chicken. If I go and grab only the meat and potatoes, which I don't like there is waste. This is not the way it works.

023642 K: Understand the process of creation. Understand the balance of the universe and why you have twin stars. One is slightly weaker than the other, but one carries a slightly bigger mass or volume and they try to balance. Look at the electron and the proton. One is 1/2000ths of mass and one is more volume and then they try to balance each other. And in that process they move and they interact. The truth about the strength of the electron is not what is written in the science books. That is why the electron moves so rapidly but it keeps distance from the proton. One has the potential difference and one has the current flow.

023804 K: If I could write the books on physics and electronics there would be none of this rubbish that exists today. But because you built a system, it works in the matter state but it does not work in the real, true plasma of the matter structure. If the plasma of the proton was always so strong, it would absorb the electron. But how come it sits there? How come it exists and how come it moves so fast? How come it works in the bandwidth? How come it can gravitationally magnetically position itself in 360 degrees where the next point is? ...where I am going to catch the next one (ball that is spinning).

[023909 K: please try to understand that we haven't changed the teaching; now we have shown you the tools.](#)

Now we take you to the understanding of what we had to teach 3 years ago, which is the introduction of the man into the operation of his soul through the operation of his physicality. We had to see the powers, the movement, and the existence and build trust in ourselves. Then what we do to ourselves is correct. The matter time took a long time; but I hope through the operation of what you understood in the matter time you can reach in your own soul and you can open the door of the universe to yourself and to humanity.

024006 K: you have to understand we are not here to teach. I go back to what has been achieved in Italy; this is the opening of the acceptance of the medical application by a government. It means they have seen the effort and now the Italian scientists have to write the formulas on how the patches and the pens work and how the water helps the sick. It is hard work and I thank people, especially Giovanni, Sabrina, all the Italian team and Dr. Klaus who went to such effort to try to get these patches delivered a few months ago. There was support from the French, German and Dutch teams who delivered these boxes and now you have seen that the whole of Europe can benefit from it. You have become like the Red Cross in supporting and actually doing what was claimed to be not needed but doing the right thing and showing that the technology works.

024125 K: in the coming time, we will teach more now that we have gone into the real teaching of the understanding of the operation. I try to teach you how to manifest things through the operation of your soul in the coming times. This needs understanding and conversion. When we changed from the gas core reactors to the GANS there was a lot of hullabaloo. We spent so much time building these coils/cores for the gas motors with the big blocks. Now he uses a ping pong ball and it does the same thing better. What is wrong with him? That is the only way I could take you.

024202 K: Now I take you to the realm of the creation and I hope you enjoy the trip. Thank you very much for today and I'll see you next week.

Rick: Very good, thank you, Mr. Keshe. This ends the 153rd Knowledge Seekers Workshop for Thursday, January 5, 2017.
