

174<sup>th</sup> Knowledge Seekers Workshop June 1· 2017  
<https://www.youtube.com/watch?v=4YROhX9-qh0>

v2 Draft

### **Comments by transcriber Cornelius van Dorp**

This is another very deep workshop with more teachings on the soul. Other points of interest were the first meeting of the Earth Council and detailed instructions for treatment of Alzheimer's, MS, and ALS, among many other subjects summarized in the hyperlinked headings following...

### **Content index**

[The beautiful 'virus' of sharing and being correct is bringing results though interaction with governments and the wealthiest people on the planet](#)

[There have been many questions on the structure of the soul, what happens to it and where it is, how it controls itself.](#)

[The soul is created out of the interaction of the fields, but this time without dimension.](#)

[Maybe we have to add this to our knowledge that in truth man in his physicality has been nothing but the incubator of the soul itself that creates the non-dimensional condition.](#)

[Once you learn to walk with the soul of the man it is very easy, no time is wasted and there is no energy lost.](#)

[The development from now on will be to develop the soul of the man and not to make the reactors.](#)

[Teachings on a pure heart and detachment from physicality and how this was not found in a visiting \(a\) 'Guru'](#)

[It is for the students to start understanding the gap and the dimension and the separation of the physicality and the soul of the man so that you understand what separation is.](#)

How many of you dare to find the soul, and then step down in it and see if you can make the physicality you want?

For those of you who are not aware for the first time the executive and the directors of what I call the soul of the man as the earth and the Universal committee and the Universal Council met yesterday.

Don't forget the essence of creation always has gravitational and magnetical.

How to correct Alzheimer's, Multiple Sclerosis, Amyotrophic Lateral Sclerosis, and the rest...

A merging of understandings; the physicality creates the soul, and now you use the soul to repair the physicality.

First question of the workshop is about possible detoxification or cleansing reactions when people start taking the GANS materials

Dmitri asks how to treat bipolar disorder

An update on Naomi's condition from Giovanni

MK answers a question on how to alleviate the harmful effects of vaccination, and lashes out at the "freaks and criminals sitting within the governments" who are responsible for the genocidal policies and technologies

K: About Mercury, we go back to the doctors in the medical teachings.

As far as emotions go, what role does sexuality play? How come some people are gay and others straight?

K: I wonder when we will make the tablet for the soul and stop taking the tablet for the headache?

Cary Ellis asks MK some important questions about GANS making with carbon sticks versus nano-coated copper, and other things

[Leon: my question: is the planet earth a constant element balance in respect to the sun?](#)

[Another interaction with Jalal and the Arabic world](#)

[An unexpected answer for the Dutch and other free thinkers](#)

[You can use the GANS water of pharmaceuticals at no cost](#)

[Keyvan tries to be precise and accurate with a question on the soul](#)

[The beautiful ‘virus’ of sharing and being correct is bringing results though interaction with governments and the wealthiest people on the planet](#)

1054 Rick: Welcome everyone, once again we will hear from Mr. Keshe with the latest news and teaching.

11:33 Mehran Keshe (K): Let’s see how we can contribute to the knowledge. Good morning, good day to you as usual wherever and whenever you listen to these teachings. As part of our work with Keshe Foundation (KF) we have seen many developments and changes and in a strange way we are seeing new developments and new ways. The beauty of what we see coming together especially in the past 2 or 3 weeks is that the KF has broken through the barriers of the governments. In that way, we have broken through what we call the elite of society. In the past 2 to 6 weeks especially since the Rome conference we see a huge turnover with the people of wealth and power as well as governments who have turned to the KF to see what we can do and how we can change society.

12:31 K: in the coming time, very soon we will announce further developments as the number of what we call the wealthiest people on this planet have come together with KF for the development of every aspect of the technology. Their wealth at the disposal of KF is the wealth of the Knowledge Seekers and the way you supported the development. Now we see that those who have the financial wealth have come to be around the KF and support the foundation in a very heavy way. Today as many of you are aware, we come to the point that Ghana Space Ship center has become the

focus of a lot of movement. The publicity which has risen through the Ghana Atomic Commission collaboration with Ghana KF has given us the opportunity outside Ghana for the people who are waiting for the foundation to make the first move so they can make their move; this has come to fruition.

13:40 K: I have to say in so many ways, it is time for all of us and not the individuals of us—the ones who back the teaching, the ones who teach, the ones who are supporting different structures of the KF in the background and those of you who produce materials at home and test them, and you have introduced the mother, the neighbor, somebody else to the technology. It is a collective move and not an individual move; none of us can have a claim any more that *this is what I did*. This is what we have done.

14:18 K: I always remember the ex-Shah of Iran who said *we have achieved; as a king, I cannot achieve on my own. It is the work of the nation and the king*. In so many ways it applies to us and we are collectively achieving it. The little inputs, testimonials, showing of producing different kinds of GaNSes, the little breakthroughs are collectively adding to the knowledge of man. The beauty of it is, as I said before many times, the biggest ‘problem’ we have in KF is the ‘disease’ which in a way I have infected you with, and that is to share knowledge unconditionally and as fast as you can. When we started sharing knowledge and those who are devoted to serving humanity have learned, you are doing the same thing. It is the speed of how fast we can share the knowledge the minute we found out that somebody might be able to have a use of it. This is a beautiful ‘disease’ and I hope the whole of humanity gets it. It is an ‘infectious disease’ of sharing knowledge and understanding the more we give in sharing knowledge the more we receive and we get enlightened.

15:38 K: this is the beautiful ‘virus’ of sharing and being correct and it’s not that we make mistakes. At the end, it serves its purpose to be correct. In so many ways we don’t need to worry what is going to happen to it. We are sure that something good will come out of it. This surety has raised a lot of support for the soul of the man. as many of you know we do not go in one position and condition of teaching and we try to cover many aspects of teaching to share the knowledge equally.

There have been many questions on the structure of the soul, what happens to it and where it is, how it controls itself.

16:20 K: I have received a lot of questions about teaching about the soul because man never understood. There are many questions and to go into this structure of the soul; what happens to it and where it is, how it controls itself. It is part of us and we try to break into it (the teaching) slowly so that many people in the future can understand. Maybe when we go to school in the first class they will teach us about our souls and all the rest will take second position. Our soul will see the history and biology. Our soul has the contact with the whole direction of the structure of the creation. Maybe we have to go back to the original, the way we have gone through the plasma, and we have discovered the effect of the magnetic fields. We have to realize that the soul of the man itself is created from the interaction of the fields and nothing else. There is nothing exclusive about it.

17:25 K: the reality of it is, it is us who have denied our own existence, as I have said many times. Maybe we have to start first in the school of life when we go to the first class at the age of 5 to 7 and they teach us about the soul, the operator behind our physicality. Then this way we can make decisions in the correct way from the onset. Maybe that way we can understand more because at a younger age the fields of the soul are much stronger.... Very strong! And we don't need to speak; the people in the class will understand each other and there will be no animosity, no problems as we see with bullying and the rest because they understand their soul structure.

18:18 K: it is us who have to do this for humanity. 100 years very few were being taught. 50 years ago, many people became part of the structure of the teaching. But we thought how to write 'a, b, c' and map 1 and 2 together to get 3, was very essential. In the process of time we have seen that education has become compulsory in more or less every nation on this planet. Maybe it (is) time for man to go back to the year before you go to school to teach man about the soul of the man. Then when he comes to the preschool classroom he understands the totality and reality, and children are very receptive. They can make that way. In the teaching of the Mozhans last week I explained to them the time you understand that you have reached the point is when you understand your own soul—the position of the soul and how you understand.

19:20 K: But you have to realize that most of the Mozhans are in their 20s, 30s and 40s and they have already gone in the different way of the physicality and to go back to the origin is too hard. It is literally like the salmon trying to fight to go uphill on the river to get to the source where he can find where he was created. The life of man now to go back to the soul is the same as the salmon fighting up the river trying to get back to the source where he started from. And then from there for him to understand the rest because he already came from the rest through the mother.

[The soul is created out of the interaction of the fields, but this time without dimension.](#)

19:56 K: it is important for us to start teaching the essence of the creation and of the soul. The soul is created out of the interaction of the fields, but this time without dimension. This is the true existence of the creator as the creator said *I made man in the image of myself. I came from fields, I radiate through them and I can make a copy of myself again from the same fields.* That is all it is. Even our souls are made out of the rays of the sun that is the origin of us as a planet and a solar system where the sun itself has come from the radiation of the fields of the galaxy and the galaxy has come from the radiation of the fields of the universe, the universe from the universes and then from the soul of the creator. Maybe this is what we have to teach and then we don't need writing in English, French or whatever the language because we understand the language of the soul, the line of the communication of the soul of the man.

21:01 K: if you understand this in the universe there are no typewriters, laptops or papers. Nobody has seen trees growing in the fields of the universe that we can cut down to make paper. We have to go back to learn about the essence of creation and then we become more mature so we can understand the totality of creation. This is what one of the fundamental teachings of the foundation has been over the past months. I have gradually built into the teaching because we need to understand why we are here and how we are created. We looked at the creation as the interaction of the egg and the sperm and we called it the fetus and then the life.

21:53 K: But we have to understand the interaction of the two at the beginning, as the onset, is actually the first part of creating and amalgamating the field forces of the universe so that it creates the soul of the

man. In the teachings of the past many times we have spoken about the astronauts who see lights in their eyes as the photon where the radiation from the cosmos enters the body and the brain and the change of the energy becomes the light in the eye of the man. If you look a step further in the womb of the mother is the liquid of the life and the filter of the strength where the right energy can enter and develop the soul of the man. So, in the process we understand a further step, that the womb of the mother is not just to create the physicality, but it is the absorption of the essence of the energies of the universe that converts itself to the soul of the man.

23:06 K: do we need to go one step further in understanding the totality? Do we need to understand that we looked at the womb of the mother as the source of the creation of the physicality? In the womb of the mother in the liquid of the life we become the source of the creation of our own selves in our own souls. The physicality is just a mirage hiding the truth about the creation of the soul in the essence of its created condition. Does this mean man has to go a step further and look deeper into his own creation that the egg and the sperm are just the incubators of the creation of the soul of the man in the liquid life in the womb of the mother?

23:58 K: Then if we understand this man has matured to the reality of the creation. This means that we looked at the life as the incubator and the first step for the creation of the soul, which becomes non-dimensional, and on its own becomes the strength in the dimension of the universe. As it has no physicality, it can travel the span of the universe and it depends on the interaction of the strength fields where it decides to manifest itself in and in what shape and form.

24:30 K: [Maybe we have to add this to our knowledge that in truth man in his physicality has been nothing but the incubator of the soul itself that creates the non-dimensional condition.](#)

This has become part of our lives and now we need to educate ourselves so that when you are born in the physical dimension you are taught to speak, to walk, to learn and to write. Now we have to go beyond that so that we understand that now the soul is the essence of the whole birth of the man. Now we have to learn the language of the soul and how it interacts and what it needs to feed itself and also how it writes in the soul of the man with the pen of the soul and not the physicality of the pen of the man.

25:18 K: this is what the teaching starts... this is what I said; we go into a new dimension. If we would have talked about this two years ago, it was beyond the understanding of humanity. Now gradually we adopt and we develop and we explain the true essence of the creation. And then once we understand this in the future we go to the next step of the development of the soul. What happens when the souls fall in love and they create their own creation -- the purity out of the purity of the totality without the dimension?

25:54 K: In so many ways I have shown you this in a very physical way in the past few weeks and nobody understood. In so many ways it is the only way I can teach so that you feel it, you understand it, and then when we open the door you have seen the light before. When you speak about the merge of the souls or what you call the souls creating a new creation of themselves, that a pure soul is created... It is very much the way you make the GaNSes, but the body of the man is the GaNS. When you put 2 GaNSes together you create a soul out of it. When you have the GaNS of CO<sub>2</sub> on one side in the salt water of the container and on the other side you put the GaNS of zinc and then you create the new GaNS out of the GaNS interaction. It is very much the same.

26:50 K: the GaNS of the sperm and the egg lead to the creation of the new dimension which itself in essence due to the liquid condition of the womb of the mother, or in the box of salt water, you create a new dimension in the soul of the creation with the interaction and creation within the environment of the GaNSes. This is what I said in many teachings recently. Try to use the GaNS water as the medium and not the normal water because the GaNS water, when you put it with the CO<sub>2</sub> GaNS and zinc GaNS it totally evolves in a different direction of what condition. Now everything is created out of the conditions of the interactions of the fields in the free dimension. That is what the plasma is—free dimension fields.

27:45 K: So those of you who have managed to create GaNSes out of the interaction of the GaNSes using the liquid water of the GaNSes, now you understand that you are entering into the creation of the soul of the system, exactly. If you look at it, the GaNS of copper for example is the sperm. The GaNS of the zinc is the egg. And the interaction of the two in the womb of the mother which is in itself a container in the GaNS condition is the GaNS water which you use in your container. And the child is the creation of the

GaNS out of GaNSes. You create a new dimension with some amalgamation of the two.

28:32 K: it is the work of the foundation followers to develop these technologies and then you come to understand how you create life. You create the soul without the physicality. Those like Armen and the others who have been with me for many years have seen the box of life that I carry with me for 7 to 10 years now. I have created that condition out of the understanding years ago. But they look for physicality of existence. I look for the essence of the soul, which I have created. This is what we have to do and we have to understand. Go back to the writings of **Baha'u'llah** bless His name; *Pray for your children 20 years before they are born.*

29:21 K: in a way now that you understand the process in setting up your system go back to the original teaching. I always said to those who have been working on the dynamic reactors around the KF, always pray for the soul of your system, and now you understand why. Because the dynamic system creates the 3-dimensional fields, which their interaction is the creation of the dimension of the new fields... what we call the free plasma. And that plasma, if you look inside it, is again hollow; this means it has a soul. This is what I have been teaching. The teaching goes on with the Mozhans to understand how to connect with that soul and not the physicality of the existence of the plasma.

[Once you learn to walk with the soul of the man it is very easy, no time is wasted and there is no energy lost.](#)

30:08 K: this is where most of the misunderstanding has been because the man has been so physical. You are looking for the rotation of the matter in your cores where in fact you have to look for the center of what you have created that you communicate with it and give and take from it. When you add to the soul of the man you communicate with the soul of the man. Giving to his physicality for it to convert into the part of the soul is very cumbersome and it takes a lot because physicality is hungry to take most of it. But once you learn to walk with the soul of the man it is very easy, no time is wasted and there is no energy lost.

30:57 K: the only person who fully understood this was Christ, bless His name. This is what He did—He gave life to the soul of the man and He was

put to death. And He did the same thing with Himself. He found the key and the way He could access the soul without actually touching the physicality. So, He could raise anybody that was dead as the physical body on the ground. He elevated the soul and gave from His soul to the other soul. It does not matter if the soul has already left the body. He could see the dimension of it and He could give enough to it that the soul went back to the physicality and the dead arises.

31:42 K: this is the beauty of understanding; once you know how to walk, you know how to run and to jump and the rest is child's play. Very few people in the world of creation on this planet have understood this. The man who got very close to it but still he could not completely understand it was Buddha, bless His name. Buddha reached the very level of the soul and that is why in the last teaching we said we are finished with religions because they are all part of the mess man created for himself with the physical life. Buddha understood the soul and operated through that direction. This means that He was one step ahead of those who call themselves 'leaders of the faith'.

32:32 K: In His work he strived to explain in simple language the destination of the soul of the man in the body of his followers but they still could not see. This is why He touches the soul in His teachings and not the physicality of bending, praying and the rest of it. There is no banging on the head (like) on the wall in Jerusalem. The 'banging' will come in the right way that they can find their souls. You will find out more and more that now we teach in the dimension of the soul of the man. Those of you who have been followers of Buddha will find a lot of resonance in the teachings because now you understand the totality of what Buddha could not complete. This is part of the essence of the creation and not physicality of the man in the dimension that it shows him to work with.

[The development from now on will be to develop the soul of the man and not to make the reactors.](#)

33:42 K: it is important for us to understand the next step in the development of the Keshe Foundation. The development from now on will be to develop the soul of the man and not to make the reactors. If you know how to work within the soul, you know how to release energies that can make spaceship, gold, water, and can make the condition to feed the soul of

the man. The biggest problem for mankind to move into the dimension of the soul is how you feed the soul. I have to eat to be able to feed it so that my soul through the energy I absorb from my family and my friends or the food I eat elevates my soul to a higher level.

34:29 K: But in fact if you understood by what I taught just a couple of weeks ago, or even last week, that how the operation of the lung and the heart creates the condition of the pumping of the energy from the universal environment to feed the brain of the man that itself feeds the soul of the man. So, in fact our body has created a pumping system to feed the soul and with it to reduce its energy that in return it can be used for the physicality of the man. So, the most important part comes—how do I feed my soul? Where is the essence of the life that it feeds my soul that in reduction and interaction with its environment lead to the physicality of the man?

35:26: In so many ways this is where the gap in the knowledge of the man sits. How do you elevate and how do you feed your soul? How do we see ourselves in dimensions, which we have not been familiar with? Now this puts a lot of fear in a lot of people. Now if you are feeding the physicality then how do I use the physicality to feed the soul? If you have been waiting and looking for a way to elevate your soul, it is very easy and you should have learned it last week. I gave you the key and the key was to create a balance between your heart and your breathing so that you create the right environment for the right fields in the pumping of the heart and the lung to be absorbed by the brain of the man so that it feeds the soul of the man.

[Teachings on a pure heart and detachment from physicality and how this was not found in a visiting 'Guru'](#).

36:46 K: this is what we call a pure heart and detachment from physicality because now it is you who creates the process of the feeding. Many of you who have been in the teaching with us some two years ago and those who were in Desenzano with us, remember an Indian guru who followed in so many ways in the background the teaching of Buddha, bless His name, came to us with his entourage. They say his elevation and understanding among his followers is about 100,000,000 or so. He could starve himself for 21 days without eating any food. He asked for a private meeting without the presence of his entourage. We sat upstairs in front of each other in the teaching room of the KF in Desenzano. I said to him *you are a cheat*. As

the head of the organization he wasn't expecting to hear that from me that I call him a cheat.

38:10 K: He was taken a step back. I said to him *I know how you stop eating for 21 days but you have to teach this to your followers too*. I explained to him that he feeds himself through the operation of breathing air and by changing different conditions and positions in his lungs and by small movements he changes different energies which are absorbed and he feeds himself through the universal tap which we call the air that is accessible to him or his followers. Because he looked at it that he was breathing the air, which was allowing him to create energy and stay alive. But in so many ways I explained to him that by breathing a different way he absorbed energy through his soul and through his brain and that is where his food comes from. You feed your body through the energy of your soul in the dimension of physicality. He said, *Mr. Keshe you have found my secret*. I said to him that there was no secret. Nobody could see where you are 'hiding the coin'.

39:25 K: the knowledge to us has been apparent for centuries but now we teach it. Three years ago, I taught the same thing as I teach today but you as the knowledge seekers were not ready for it. But a master like him could hide it as a disguise and they saw it as his mystic 'power'. And this is what we are trying to stop for the man in space. We don't find many 'gurus' hiding things and they become "Mr. Guru.'

40:00 K: This is the purpose of the teaching and what I thought to the master. You have seen his pictures coming to KF and to the laboratory where the MaGrav cores were that Armen and the rest built. He found out he had to leave and he did something very strange. When he came down and before he said goodbye he put his hand behind Carolina's back trying to take her energy. And in so many ways we felt it. And it was responded back. We took everything he took before he left the premises. But this is how and why I teach this way. I could have taught you this years ago but now you understand more and more. If you could understand how the energy makes the soul then no one in space can put a hand on your back *and* drain the energy from you when you look at them as gurus. And they keep on making prophets in every corner of the world and the universe will become what they call 'corner shops'.

41:12 K: There is a joke but it has a lot of realities. In England if you have lived or been there they say *do you know why Pakistan never wins the world cup or move up in the football league and the World Cup?* The joke is that on every corner they see they an open shop. If you have been to England, every corner shop is a Pakistani shop. They serve humanity and the nation purely but with it they know the habit of the man and what man needs and whatever man needs they feed him. So, if we allow you to go out without understanding how you have been fed, the man will make a church and a mosque across the whole universe because anybody who comes with new magic, because you don't understand the operation of the soul, or the physicality, then the whole universe becomes a lot of mosques and churches in different names.

42:22 K: But if you understand the operation of the soul you can replicate what you are shown. You can understand what you have and you carry the same knowledge as they do. It is just for you to understand how the flower, the milk, the butter, the water in your hand which is your emotion and the physicality and the rest will make a cake, a pancake or give you bread. It depends on how you mix it and then there is no mystery. It is just for the man to learn at what measure he needs what to get what he was expecting. And this is the purpose of the teaching.

43:00 K: If you go back in my teachings I always said that I take man to be equal in the universal community so that he does not become a slave or subordinate to the rest of the Universal Council (UC). The reason was, and you looked at it, you will be taught everything in physical life, spaceship energy and the rest. But my target was the teaching of the soul of the man and for you to know and understand the essence of your own creation. Then you are ready to go into the expanse of the universe because when a man relies on his own resources he understands what he has, what he needs to give and what he can do with it. So, if a lot of you joined us to make a spaceship; the spaceship is within your soul.

[It is for the students to start understanding the gap and the dimension and the separation of the physicality and the soul of the man so that you understand what separation is.](#)

43:54 K: To my students in Accra when I disappeared to Austria, to Italy, to Turkey and other places, it was for you to start understanding the gap and

the dimension and the separation of the physicality and the soul of the man so that you understand what separation is. In my last with you I explained before I left *I leave you with the man of physicality and you have 2 or 3 masters with you. Armen is with you, Alekz is with you and Benjamin is with you. These are the masters of creation of the KF. These are the pure hearts within the structure of the foundation.* And I left you with a dilemma and you have to choose. I taught you the essence of creation through the soul of the man. You were looking for its physical position and you never understood that you are the soul and you are the creator. You are looking for the creator within you.

45:05 K: now you will have to battle between the masters in the dimension of the physicality or to decide the strength and position of your own soul and move to the new dimension. This is why we teach this way because if you are taught 'a, b, c' you will never understand where b is or what c is for. It has to be understood that the essence of the creation and the elevation of the soul of the man has taken centuries because man had to find out about his physicality, his limitations, his weaknesses and his strengths.

45:47 K: In so many ways this goes back to the teaching that we have done before. If you go from the bottom to the top, you know the whole structure and you have done it yourself and you are not afraid how to make it from the top to the bottom. We start with the teaching of the physicality and the teaching of what you call the prophets that you understand the correct conduct of the physicality for centuries. Now you have been elevated to understand how the soul is created out of the physicality. Your dimension and extension comes that now you become the soul with that dimension and extension how you manifest yourself in different dimensions in the universe back to the physicality.

46:34 K: The way you have come up the ladder, you know how to go down the ladder. You know you can make the whole ladder because you have been through it. I have said that many times in the business life. We see a father setting up a business even though the children are around him when he builds the business. And then when he makes an empire out of the business and he gives it to the child who was actually with him in the beginning in the market stall and in the first shop and the first company, and then in the first multinational companies. Then when it is given to the son, the company after a few years, or the third generation after a few years ruin the company. It goes bankrupt. Because the father understood how to set up

everything and he went through the problems, where the children only saw the wallet that the money came out of. They never had to solve the problems.

47:35 K: The father could find solutions in troubled times where the son never fought to find the solution and it collapses. This has been the same process how we see multinational family based (businesses) go into the hands of big organizations because the business was made by the father who knew all the ways to the top. The children were wallet suckers. They only saw what came out and maybe if they move the box from one to another it was very much. We have done the same with the soul of the man and the physicality of the man. You had the physicality and now we teach you about the soul that you have to go up the stairs and find it and understand its power and that you head a huge organization called the interaction of the soul of the man with the universal soul.

48:30 K: You were looking to shake hands with the aliens and see how they look. You never understood that once you understand the work of your own soul the man or entity you see in front of you in space is the chameleon of the soul of the entity. Then you find out you don't need to rely on what he shows himself as, but you see the soul of it. In my teachings to the Mozhans I explained recently to try find a soul and when you unite and you understand when you come and you say that you had a dream last night and we were all at the party and I had a glass of wine. The other ones say *yes you had the red wine and the other one says that you had the coca cola and the other ones say what....*

49:25 K: Then you learn to meet at the level of the soul. And they decide what physicality they do. In reality there has been no physical interaction. It is the dream of the man. So, we have been through the steps of making GaNS from the matter. This is how we started and this has all been what I call tricking the magic box to teach you the final trick.

[How many of you dare to find the soul, and then step down in it and see if you can make the physicality you want?](#)

49:53 K: The final trick we have arrived to is showing and understanding that everything comes from the soul of the man. And now how many of you dare to find the soul, and then step down in it and see if you can make the

physicality you want? It is very interesting. And this is the most interesting thing that no one bothered to try to understand. Christ came to Jerusalem in Palestine with black hair, dark brown eyes that were almost black, and then on the point of the crucifixion where He was on the cross and where He changed the physicality of the soul and then He re-manifested himself in the dimension of a new physicality not to be connected to the past where He took the new dimension of the manifestation of presence.

51:06 K: If you look at most of the European shapes of the Christ He became the blue-eyed blond hair and white skin. Did He go through the transformation of the physicality to the soul and the manifestation of what he wanted to be seen in the physicality dimension of the eye of the man? The past few days is what we call 'the vision' (?) in the Christian Calendar. (May 25<sup>th</sup> is the 'Ascension of Jesus') Our teaching coincides with that day and this is the time to co-exist in both dimensions, even though you have already been shown by one man.

52:04 K: Is this the essence of the teaching of today. He manifested himself to those of the European with blue eyes and blond hair. And nobody has ever asked the question: *how come in Jerusalem He was brown with dark eyes and dark hair and dark skin in the tradition of the Middle East. And then He manifests himself in the south of France with blue eyes and promotes that way that it does not conflict as the man with the black hair who was already on the cross.* Is this the secret of creation that has been shown 2000 years ago and man has not understood?

53:01 K: And now with these teachings we come a step closer to understanding how it was done. Was Christ in fact a magician who understood the operation of the soul? I say yes. But it was for men who misread His message and His work. This brings a lot of reality to understanding the work of humanity. This is what we said: *if those who are the members of the UC and the EC stop working on the physical dimension and understand the job is on the level of their souls and trust in what they do is their wish becomes their command, collectively as they met last night for the first time in a joint meeting, bringing the unification between the soul of the planet and the Universal Community, then they understand that it is time to elevate the soul of the totality of the human race.*

K: For those of you who are not aware for the first time the executive and the directors of what I call the soul of the man as the earth and the Universal committee and the Universal Council met yesterday.

It was beautiful to listen to them and how cordially they interacted and how the UC allowed the EC members who were present to speak. And there was nothing about the voting and whatever. It was showing the humbleness of how they came and how they want to serve. It is recorded and one day it will be shared with humanity. But this is the essence of what we established in bringing the two arms of the 'executive' and the legislation, which is actually through the soul of the man accepting to work as one without any papers written. It has brought the condition that we set.

55:16 K: We have already started the process of the unification of the soul of the man on this planet according to their language and the position they take in the different conditions and environment of this planet. And yesterday was a fantastic day for humanity. In so many ways I said it was the 31<sup>st</sup> of May; they closed the book of the past and by today they start a new day. This is what has been beautiful with it. We listened to the voice, but the soul of Australia when she was actually in the presence of what we call the 1<sup>st</sup> of June date. And we listened to Dr. Rodrigo and another member of the UC of what I call the EC in America where he was still going through the 31<sup>st</sup> of May timing. We saw the future and we saw the past and we saw the end and we saw the beginning at the same time.

56:24 K: That day will be remembered by many in the future when they understand. Because of working and speaking as one the soul and the elevation of the soul of humanity has changed as of yesterday or today in your time. We see a new birth of freshness in the soul of the man in humanity and we will see new dimensions of the world. It has taken thousands of years to do this and it is there for man to understand. The members of the EC have issued the first writing. It is for them to disclose at the time that they see as appropriate. Today, next week, or any time. For the first time, we have established a line between the KF and the UC and the EC that the physical dimensions of the needs of the two shall be met.

57:27 K: Nothing is coincidental. There is a reason for it and through the teachings many souls have been elevated. Many souls have found peace and by finding peace they have elevated their energy into a new dimension of serving humanity. And now we see the change. Today is the 1<sup>st</sup> of June

and the human race has taken a new dimension as what was planned in physicality years and years ago by different prophets has given birth to the final stage of its totality.

58:04 K: we spoke about the egg and the sperm and the environment of the womb of the mother. We had the prophet teaching the physicality and out of the essence of the physicality we have seen the birth of the UC and the EC to work as a soul and not in the dimension of physicality. But they know through their souls that they can reach the physical man to elevate their souls. And the process of what we call world peace has already started as of today. Don't forget they have been working in the background as one with separate teams or groups or individuals but now it works as one. The meeting of last night for those of you who were present was majestic.

58:53 K: The humbleness, the freeness of being able to speak about your own language where you came from and be proud of it so that it is taken with the heart and the soul of the members to elevate it and to understand it that in the language of the soul there is no division. One day the UC and the EC will decide to release these recordings and then you will listen to it. Don't listen to the language; listen to the essence of what was released collectively as one. It was very much as I said to myself as I listened to it: *United Nations has made with the World Bank and they decided that they give everybody the same amount of money so they are all free.*

59:44 K: when I saw it, and listened to it, the World Bank was the UC and the EC was the UN accepting the gift and sharing it amongst humanity in the soul level. One day the man will understand the meeting of yesterday. It is important that we connect everything to each other and everything to every point so that we understand the totality and there is no misunderstanding. Today I have told you a lot about the dimension of the soul of the man, but it will take man thousands of years to understand what was explained in the past half an hour to hour of teaching. There is so much hidden in it that in every word you can find millions of hidden solutions. It is for man to find out which solution is for him.

01:00:39 K: As I said we don't teach the human race but as we teach at the level of the soul the universe is listening and promoting itself because in their level it still applies what is here, but in different dimensions they did not know. I gave my soul to humanity but I know my soul comes from a very long time ago from far distances, and it comes from the essence of the

creation of the universe. So, it will not make any difference if you take a little or you take the whole lot to elevate your own soul. It is freely available and it is on the table. It is for the man to take to elevate his soul according to his own level of understanding.

[Don't forget the essence of creation always has gravitational and magnetical.](#)

1.01.29 K: In so many ways if we go back from the soul level and see what our soul sees once it releases its energy it comes in touch with the physicality of the brain of the man (who) in a way created itself from it. Don't forget the essence of creation always has gravitational and magnetical. The energy absorbed from the universe by the physical dimension of the brain, which comes through it, transfers itself into the soul of the man in a magnetical way as the gravitation of the soul absorbs what is given to it. At the same time, it receives the spectrum of the total energy because each part of the brain feeds the soul of different strengths according to its structure. And at the same time the soul receives so much from all dimensions at the level that is in balance with the physicality of the man. Then the soul of the man gives what is at the level of the physicality for the brain to filter out.

01:02:44 K: In a way if you look at it the brain works as the gravitational field and a pull of what I call the universal, what I call pools of fields that give to the soul. Then the soul gives back to the physicality what he wants to be seen as. It could be to feed the arms, the eyes, the legs and the rest. So, what do we see and how do we see if it's in the soul, and look at the physicality of the brain, which is the first point of interaction between the soul and the physicality. Then we can understand the structure of the brain. Because it is the brain that manifests itself on the feedback of the soul in so many ways with the structure of the physicality of the brain. Then it can take us to the next step of teaching, which is...

[How to correct Alzheimer's, Multiple Sclerosis, Amyotrophic Lateral Sclerosis, and the rest...](#)

K: Once the soul interacts with the physicality what is missing in the soul that ends up with the shape and conditions of Alzheimer's, MS, ALS and the rest... depression or expansion of the knowledge through the dimensions of the physicality. In the past 2 to 3 weeks, we explained the interaction of the

physicality with the child when it is changing from the womb of the mother in the world of water or liquid in the GaNS state, to a thinner GaNS state of what we call the air. Do not forget that even the air of the planet itself still exists in the pool of the GaNS of the solar system.

01:04:37 K: So even though we call it the matter state in respect to the energies of the sun, it is still within the GaNS of the system. As we explained in switching from one to another, we see problems in some children that we call lack of oxygen. They call it starvation of the oxygen and we see the disabilities in physicality. Now you have to understand the same thing can happen in the conversion of the energy from the soul to the brain of the man. As we saw disabilities created by the change of the environment, now we understand because of the feedback on the physical life of the man the same thing can happen in the essence of the creation of the man by transfer of energy from the soul to the physicality in what I call the transformer between the soul and the physicality, which is the brain of the man, where it transfers and transforms the energy from the soul to the level that the physicality can understand in the dimension of the physical structure of this planet.

01:06:00 K: in so many teachings I have explained that the brain of the man is nothing but a transformer. It transfers to the energy at different points, be it the arm, or a section to do with the emotion of the pain or happiness. And all that energy comes through the soul of the man. At the same time the same thing feeds the soul itself in the more mass mixture of the fields from different points of the brain into the center. If you understand this and understand the job of the transformer as the soul due to its strength receives more energy from the universe, as it goes through the brain of the man but in fact reaches the soul at the strength much higher than the physicality of the brain... very much like the light we saw in the eye of the astronauts as we explained before.

01:06:55 K: Then these transfers of energies to be filled sometimes part of the transformer brings the emotion into operation in respect to the physicality in a way that it filters a little bit more, a little bit less. And then in the physical life in the dimension of the emotion from physicality, which every cell of the body of the man carries, be it your arm, your heart or your lung, then the two have to interface and find out where what is not needed and what needs balancing. And in that process of the balancing sometimes in the interaction in the physical dimensions we have seen it in the form of

cancers. As we said cancers are emotion but in fact, the seed of the cancer in the emotion has created from the interaction of the pure energy that comes from the soul unconditional and untainted, with the emotion of the dimension in the cells of the body of the man which interact at the point of emotion we see different cancers accordingly.

01:08:00 K: So, in the same position we see the cancer in the dimension of the physicality of the brain of the man. We have called these cancers different names as itself due to change of its parameter, we see paralysis, we see lack of use, and in so many ways we see 'not operational' part of the physicality. We have done much research in diseases like MS and ALS and Alzheimer's. If you look at it and you understood what we call the children of the brain damage due to the lack of oxygen in the birth tunnel was in reality a physical change that has affected the seats or the arriving of the information from the soul of the man to the physical part. We can understand the same thing now can happen to the conditions that come from the emotion from every cell of the body of the man in respect to the emotion of the brain at the point of delivery to the physical part of the man.

01:09:13 K: So, if you understood that by changing some parameters and some materials which affect the operation of the brain, that it leads to further development of the physicality and we see the change in the children by taking some extra minerals in conjunction with creating conditions of the GaNS in the body.... We walk them out through the operation of the brain to see the physical change. Now if you look back at the same way where the emotion of the cells of the physicality in interaction with the fields which are coming from the soul of the man at the point of interface of the transformer where there is a physical dimensional problem in the emotion of the cell and we see these as MS, ALS and Alzheimer's.

01:10:14 K: So, in fact if you understood the operation of the physicality in the child where with the folic acid, the B12, which is a radiation source that gives back to the essence of creation, and with the minerals that have to do with the physicality of this life, if we understood that by changing the structure of the brain we have changed the physical manifestation of the child so that he can walk and talk, then for the diseases like ALS and MS we need to do the same. There is no difference in the dimension of creation. It is for man to understand the creation.

01:10:55 K: So, for those of you who are suffering from or you have connected with people who are suffering from MS, ALS and Alzheimer's, it is the same process and condition. You don't need a wheelchair for the physicality. You need the wheelchair to transfer the energy to the right point of the cell, so that by elevating the soul and the seed of the essence of the creation of the brain; you take the wheelchair from the physicality of the man and the man walks. I have done this many times and I have seen it. But I have seen people reverting back to it because the elevation of the soul was not there to allow because the pain of living was too much. Maybe this way with the new methods of using the GaNS and the others in conjunction with the physicality not only do we elevate the soul of the cells but we elevate the soul of the man that they transform the soul and the energy balance becomes higher, so that we see by changing the structure of the soul and the physicality of the brain, the physicality movement of the man changes.

01:12:12 K: so, for those of who suffer and know people who suffer from diseases like MS, and ALS the problem is not just like what happened with the child, that the physical condition switch came from the point of the birth from one environment to the other. But this time you have to cover and do the whole thing in the right way, but in a way, the same process because it is the same brain. For those of you who suffer from ALS, MS or Alzheimer's follow the same procedure with a big difference. The difference comes that you have to elevate your own soul; the difference comes that you have to elevate the emotional parts so much higher that the filters of the transformer of the brain of the man open up to a new dimension from the receipt of the emotion of the soul.

01:13:09 K: What this means is that those of you who suffer from these kinds of diseases, when you are given an MRI or whatever and you look at it and you see what I call the depletion in the physical structure of the brain, go back to the teaching of this morning where you learned to go from physicality to the soul and become non-dimensional and now you have to use your soul to feed the physicality for it to start allowing the arm which is paralyzed or the leg which put you in the wheelchair because you cannot walk, now you do the reverse. So in reality if you understood the teaching of today it is how, as we did with the children last week, to start creating according to the need of the man and balance the emotion, a new physical appearance so that you can walk again. The man in the wheelchair will develop the sense to be able to walk and to talk and if those of you who have

been working closely with people with MS, you will see two ways, especially with the ALS behavior.

01:14:33 K: Those, when you ask them and they talk and they cry and those, when you ask them they laugh. And you understand the one that laughs do die faster with the disease. Those who cry when you ask them questions are those who stay in the wheelchair for a long time. So, the emotion, the level of emotion in the brain of the man that receives from the soul has the direct effect in the speed of change in the cell and the physicality. In so many ways it has to be said if you suffer from MS, ALS and Alzheimer's follow the same procedure as you did with the child with the lack of oxygen. How do you do it? Then find how you change your own position.

**01:15:32 K: But in this process, you have to elevate the soul in the level of the emotion much higher. So, what you need to do is very simple. You need to take the same as the child: double the amount of potassium (as the minimum daily requirement), double the amount of the daily dosage recommended for calcium. Do the same with the zinc and sometimes a little bit more –3 xs for the magnesium because now you have to support the physical part to repair itself. And you do it at the point of both brain interconnection and the physical part of the body of the man. That is why you need 3x more magnesium, because magnesium is connected to the copper. So, in that process you again need to go back because now you have become the creator. You need energy on the level of the amino acid of the division, which comes in a way as B12, and the same as the child. You are producing new cells more rapidly and you need the same in the 2x or 3 xs more of the folic acid. (Transcriber note: also add the Omega 3 with the EPA 2x). But the difference comes with this that this time you take 3x the level of the CO2 and 5x the level of Zinc oxide plasma water (what we call liquid plasma). You have to change the connection and you have to speed up the elevation of both the soul, the physical soul of the physical part, and the connection between the emotional part of the physicality and the soul of the man. So, if you take 3x a day the CO2 like 30 to 50 ml even to 100 ml because you are a heavier mass as an adult.**

<b>Morning</b>	<b>Lunch</b>	<b>Nighttime</b>
<b>100 ml CO2</b>	<b>100 ml CO2</b>	<b>100 ml CO2</b>
<b>200 ml ZnO2</b>	<b>200 ml ZnO2</b>	<b>300-500 ml ZnO2</b>

**Because you are dealing with higher mass and not the child, so you need to consume 1.5 liters of the 2 GaNSes during the day, and you will find out you walk away from all conditions—gradually the disability of the brain which might and has manifested itself in the physicality dimension of the disability which you are used to.**

**01:18:35 K: What is recommended, which is very easy to do, is to put the liquid plasma of the ZnO<sub>2</sub> and the CO<sub>2</sub> and wash your hair just before you go to sleep. Just wet the head with it and you create a condition because now during the sleep time (when) the physicality doesn't have much function at the lower level it allows the soul of the man in the dimension of itself without the need of the physicality to operate much deeper and much faster.**

**01:19:11 K: so what you need to do is take the double zinc, potassium, calcium as recommended by the scientists and 3x the magnesium from 10 to 30 days. The body will take what it needs; and when its short it reflects it, because your muscle tissues have to start understanding connecting the soul part to its physical part which is copper too. That is why you need more magnesium to connect the physical part of the brain with the emotion. You are connecting the emotion of the physicality with the physical part of the physical body of the man.**

01:19:56 K: So those of you who suffer from Alzheimer's you don't need to take so much of the CO<sub>2</sub> and ZnO<sub>2</sub> as a GANS—you can reduce the GaNS to the double (200 ml). We measure the base as 30 ml per morning, lunch and dinner. You don't take any medicine; you just change the condition of your body.

01:20:36 K: Those of you who suffer from the physical part of the changes like MS and ALS, it would be good if you take equal measures of ZnO<sub>2</sub> and CO<sub>2</sub> (liquid GaNS) and just sweat your body 2 to 3 times a day at the point of disability, where it means the level of the emotion of the physical part of the body of the man is supported too. So, as you understood and we taught all the time you have to understand that with this technology we work with the fields. So, when you put the mixture of zinc and CO<sub>2</sub> on your skin, you create the condition that now they start communicating. And it fulfills all the needs of all the cells within the structure of the physicality. You have to understand what you are doing and not just follow it blindly.

01:21:34 K: The CO<sub>2</sub> and zinc oxide can be mixed in equal measures and rubbed on the skin. It creates what we call the effect of the radar. What you drank as the water, which is much stronger, and that is why we do up to 5 xs more comes to the inside. In a way, what goes through the structure and what you put outside the structure in trying to balance the fields between them, feed the soul and the physicality of the cells of the physical part of the body of the man, and you will find out you support the physical emotion, the brain structure and what is absorbed in the brain of the man by wetting your hair and allowing the transfer of energy through what is needed. In one way, it is the same; the soul feeds more CO<sub>2</sub> and ZnO<sub>2</sub> on the cover of the body of the man on the head. In that process, it repairs with the stronger going to the weaker and feeding the damaged cell part of the brain. You will find people with these diseases, what we call deformation of the energy in the transformer of the brain of the man will walk in no time.

1.22.51 K: As you build the brain cells as they come into operation we see the change in physicality. So, in so many ways, we should see no one with MS or ALS or even those with brain damage. If someone has been in a car accident and has brain damage, you can do this if you understand it correctly and restructure the brain of the man. This is what we are doing now with Naomi and we see her walking out of where, when she had the accident (last July 6<sup>th</sup>) it was so bad that the doctors put her in the section of the hospital in Italy where they just go to the mortuary afterwards. I explained this to Giovanni and I said *you have to save the life of your daughter by just following the instructions of how to use the GaNSes.*

01:23:40 K: When they send people to that section, Giovanni said *now I understand why only two people ever came without the body bag from that section.* I said that this was the section where they send the final stage for the delivery of the soul of the man when the physicality is finished. It shook Giovanni that he understood what he did he has changed the direction of the physicality and the life of his daughter. And now she is back at home; she has started walking and she will do more; at the moment, she is reacting with her arms. Very soon she will tell us what she felt. This is all done with the whole understanding of the structure of the physicality. We are building the brain cells slowly, slowly, slowly to the condition of maturity. This is exactly what happens inside the womb of the mother with the brain of the child. But this time we have taken over the condition as she cannot feed herself.

01:24:43 K: It is the same for all of you who suffer from these brain damages, even with a stroke. You can follow the same. Then you will see the physicality changes as now you build the essence of the soul of the physicality with the understanding of this position with the soul of the brain and with the soul of the man. That is what has to be understood. Those of you, who suffer from MS and ALS, try it! It is just drinking the water. And when you walk out of it, remember one thing. We have given the physicality freedom so that you understand the position of the soul. We have seen many people who come to the point of death, especially reversed from cancer and they become philanthropists because they have been there. They have to assess what they have done and what they achieved and what was missing in their process. When they are given a second chance they devote their lives to serving humanity.

[A merging of understandings; the physicality creates the soul, and now you use the soul to repair the physicality](#)

01:25:53 K: The teaching now as we see merges the two sides: the soul, as we understand more about its operation, with the physicality part of the man, which brings now if you understand, as I said just before, the physicality to create the soul and now you use the soul to repair the physicality. And once the man understands this then man decides how he manifests himself in every dimension of the universe. Maybe the disease of the man in the past has been the reason for the man to find his soul to the teaching of the present that he understands has no fear to go into space. And that now he understands that he can create any part of the brain he likes to manifest itself in different shapes or forms. Those of you who come out if this position to take MRI of the brain and let the doctors of the present time be baffled, but explain to them why, and the reason for, and how you did it. You will find out the doctors of the pharmaceutical industry become the doctors of the soul of the man as we have seen with Dr. Rodrigo and many others.

01:27:12 K: Those of you who look in salvation of physicality will fail miserably because you understand that you have not reached the master and that is the problem. **I give you this gift Mr. Laureyssens. You still suffer because you didn't follow my instructions correctly with how I gave them back to you. Use the GaNSes that you never made and then you will see your hand will not have what I call 'disabilities'. This is a gift**

**from me to your soul and I hope you accept it because I know how much you love to write rubbish. I give you the power to write more.**

01:27:51 K: Those of you who understand this process will find a lot of pleasure because you will change your life and because you change the lives of others and by teaching you are the example. As I said, blessed is His name, Christ, understood the change in the physicality and the soul and he used it. Now those of you who walk off the wheelchair will come to understand one thing –that the understanding of the man today has reached the prophets of the past, and it is in the writing of **Bahá'u'lláh**, bless His name. Now you understand the teaching. We came to teach the reversal that you can manifest yourself anywhere in the universe according to your wish, where the teaching of the past was how to find your soul so you can elevate it. Now we understand more things. One took thousands of years and one took a few years.

01:28:49 K: So for those of you who suffer or have friends or family who do, just get yourself in the hardware part of the supermarket and walk into the section where they deal with cleaning. And you buy yourself caustic that is used to clean the toilets. This was at least you clean the toilets of the life of the soul of the man so that it comes with a clean physicality. Mix the caustic with the copper and zinc the way it has been taught, and make yourself GaNSes, and you will find the liquid of life in it. And then you enhance and elevate the soul of the man through the consumption of the GaNSes (liquid) which is in the level on the balance with the soul and then you will find out that now you have learned how to change the physicality into the soul and from the soul back into the physicality, and see every disability walk away.

**01:29:53 K: In the future teachings, I will teach you how to make limbs, arms and heart cells so that you don't need the operation. In the medical teaching, we have already taught it but many people don't dare to do it because they have not gained that much trust in themselves. If you understand, those of you with amputations will have the full arm or leg back. Those of you who have a heart condition and they need to give you a new heart, you have been taught how to produce heart cells and tissues without the operation, so that you walk out and doctors don't see. I have done this many times and it works so perfectly but it is you who has to decide in which dimension you want to exist.**

01:30:40 K: We take the knowledge to the soul that the physicality will learn from it. In a way, we say we talk to the door so the world can hear.

[First question of the workshop is about possible detoxification or cleansing reactions when people start taking the GaNS materials](#)

Any questions? Will Azar be first?

01:30:59 Rick: I'm going to be first... A question asks if Mr. Keshe can share his plasmatic perspective on cleansing reactions that may occur as GaNS water or plasma devices purify and detoxify the body of toxins that are causing disease in the body? Some people may have a reaction to these toxins coming out; is there a plasmatic perspective on that?

K: Explain. Go ahead and promote him to panelist.

01:32:40 Rick: (after trying to get the panelist unmuted, and instead getting typing in the chat) People that try some of the GaNS water or a plasma device usually have a positive response and feel good. But maybe some people pushed it too hard or maybe it is just part of their detoxification that when the toxins come out it causes dis-ease, as in uneasiness in the body that might not feel good while the toxins come out, and might feel better after the toxins are out.

01:33:14 K: OK, let's talk a different way. Maybe what you call the toxin sits in the interaction in the field of the soul and the physicality where you still need to be and feel ill in the physical dimension, so that you receive what you need from the environment of the others to feed your soul. This is what you have done all the time, knowingly or unknowingly. So, the conflict or what you call the detoxification of the energy of the soul comes from the truth in fact that now you have to supply yourself with what you have been taking from the others by what I call attention seeking through being sick, or the attention you are getting from the soul of the people and their emotion. In so many ways it is the detoxification of the man's emotion that creates this. This means he does not want to let go because he doesn't know where he is going to get what he was getting free from the others by attention.

01:34:27 K: When you walk on the streets and you are limping or you are in a wheel chair, even people passing you say subconsciously *oh my God, he is in a wheelchair. You take and you become a beggar; you become a king in the chair of the wheelchair. Because when you get my attention it means that you have taken something from me. But now you have to start living with not being able to take because now you can affect your own physical dimension without taking, and this takes a lot and this is the job of the soul.*

01:35:09 K: I have seen this many times and as you go through the process of detoxification or what we call taking the GaNS (water) of the CO2 that you elevate or feed whatever is short everywhere, a lot of people come to the point that they put the material down. They don't want to use it because with using it they have to stop what I call soul sucking from the others, and this is not what they want because then they have no dimension and they have no existence because they took it unconsciously or consciously.

01:35:09 K: We have a case and many of you saw the video on the internet years ago. The gentleman was brought to us with Parkinson's and dementia. The daughter was a woman of medicine and she listens to all the teachings most of the time. In those days, I created the cups with the surrounding and we went walking with this guy for the first time on the street outside with the woman. And as we were walking it was recorded you hear the daughter say it is the first time he has walked in 15 years. He hasn't walked and he started talking and doing things. This all came because in the process of creating all the materials that you use now that I explained earlier for the development of the brain, for replacement of the cells that have been destroyed.

01:37:18 K: A few weeks before that he was still in the wheelchair and he would not walk because he was paralyzed. The wife has to push him and the daughter had to put him in the car and the rest of it. One day the wife left him in the chair where he had been sitting for the past 15 years said she was going to the neighbors. She usually went through the front door to the neighbor's front door. This time for whatever reason, she decided to go through the back door. And as she was passing the back window she saw the gentleman getting up and helping himself to what he wanted in the room. And she knocked on the window and asked what he was doing. *I leave you in the room as paralyzed and when I leave the room and I am not there, you walk.*

01:38:15 K: And she called the daughter and the daughter asked me if I knew what happened. I said, “of course, he has become a sucker and he just wants to take attention”. That was it. From that point on we refused accepting the guy that he cannot walk. We saw this a couple of times with him. And then as now he learned that he could feed himself we saw him riding a bicycle in Holland, 2 or 3 kilometers at a time. What I explained to the wife and the daughter was the same. He was used to the abuse of the soul. And now he has learned to do it himself. This is the beauty with the technology. When you give the gift of life, let them appreciate that they have done it themselves and not you; otherwise you become another prophet.

01:39:12 K: These people whom we see with these kinds of behaviors are called the detoxification of the soul of the man. They don't feel good because not feeling good means now I know how to do it myself and I don't need to become a soul sucker. And this is the habit of the man. We need to extend everything that always in the back of our mind is the elevation of the soul in the dimension of both physicality and the brain or what we call the emotion, and then the soul of the man. Maybe now you understand where your toxicity comes from. It is you who would like to carry on with the habits of the past. Somewhere in between the emotion needs filtering. In so many ways you do the work of what I call the kidney cleaning up what is not needed in the physicality, you have to do the cleaning up in the soul of the man in the transformer of the brain of the man.

01:40:16 K: That is very hard because by habit as men you are used to abuse because you want to take. When we are given freely we have to object to it because it is as we call the depression girls at the dinner table. They push you away with the hand *–I don't want you and with the legs they pull you forward 'darling'*. So, this is how the man plays with his own physicality and his soul.

### [Dmitri asks how to treat bipolar disorder](#)

01:40:50 Rick: Dmitri asks how we can deal with bipolar. Is it only zinc?

K: It doesn't exist. Bipolar in so many ways breaks into two ways – an emotional split that means we cannot handle and we prefer to compartmentalize each section, or it is the other side as we see it and what

we call the beautiful people. They have hidden themselves in the long term and appear in the older age, in a further distance in the age gap. And then you call it the schizophrenic. Bipolar-ness is the physical dimension of the man at a certain point who likes to split so that he can handle. If you look at it this way women are multitasking and men are single tasking, most of us. For us to be able to handle everything, we have to create its own compartment and then when we do that they say the guy is bipolar or whatever. It is just that we do not create the right balance of energy in the soul level and in the physical level we have to split it.

01:42:14 K: So, something like 80% zinc oxide and 20% CO2 for the long term, morning, noon and night for 3 to 6 months should show where you elevate the emotion that in a way you become multitasking in the level of the soul. But I have seen a lot of what they call bipolar are actually what I call beautiful people but they have managed to hide themselves. I have seen it coming up even in the ages of 50 to 60. Many, many people who are multitasking, especially women, we see the level of what you call schizophrenic or the level of different souls in the age of around 40 to 50. Because it becomes too cumbersome to handle the 3 so they start showing themselves.

01:43:12 K: And then you see the interest and operation of each and we see these mainly in women. Because women are multitasking they can hide what you call schizophrenia very well because they can handle it when they become aware of it. And sometimes they can do it to the point that it becomes too much with the children and grandchildren. Each one was responsible for one thing and then they say, "*oh she is becoming forgetful because she is doing the other*". But, in fact now each one is trying to cover its own dimension. We see this a lot. And then if you look at it, it shows in different dimensions in the physicality.

01:44:08 Rick: Mr. Keshe there is a continuation of the previous question and they are asking about toxicity caused by vaccinations specifically and how that can be dealt with.

[An update on Naomi's condition from Giovanni](#)

01:44:38 Giovanni: .... Good morning, Mr. Keshe!

Mr. Keshe: good morning...where is my morning coffee? (Big laugh from Giovanni) Do you want to ask a question? How is our little girl (Naomi) doing?

01:45:40 Giovanni: it is very good; I show for the first time the first MRI and the last one to the physiotherapist, and they say it was impossible what happened to my daughter. They changed all the exercise because the brain has completely changed. So, what they started to do with the daily program was obsolete. Now they start to see your teaching Mr. Keshe. *What I had done up until now was 'wrong'*. And so now they have to start to study this technology.

Mr. Keshe: is that the same physical therapy for the Olympic team?

Giovanni: no this is a new one. Naomi now surely can do more but the problem is that for this month was living in the apartment that was only for dead people. They don't want to lose time with the person they know will surely die. And for this they created a lot of problems for articulation, choking on food and now I work on the structure.

01:47:47 Mr. Keshe: what is the change now?

Giovanni: a big change; they start to open the jaw. If I ask her, she can stand up alone. And I help her with balance when she stands up. Now every day she is improving.

Mr. Keshe: can she walk on her own yet?

Giovanni: no, not yet, but the problem is not a brain problem; it's a problem of the foot, where there was not much therapy and there is a block to the articulation of the foot.

Mr. Keshe: so, we can see her walking properly soon.

Giovanni: yes, I think in one or two months.

01:49:00 K: I hear she understands when you talk to her now.

Giovanni: yes, sure she understands.

K: I hear she can show her thumb when she is happy.

Giovanni: yes, that is her smile. (laughter).

K: it is beautiful and it is nice to see you happy again!

Giovanni: Ah yes! Sure, Mr. Keshe! I say thank you again because of all the instruction you gave to me was very important for the change of this situation. I have the feel of my skin the change that was possible to do with this technology. It has really literally born a new brain.

K: you can see it on the MRI?

Giovanni: yeah yeah yeah! The MRI shows there are only some little scars, no big scar. The activity of the brain is completely normal like a person that is in good health.

01:50:51 K: so, you just have to fix the physical blockages.

Giovanni: yes, yes.

K: in the next month it is exactly one year; can you get her to talk by next month?

Giovanni: I hope so Mr. Keshe. I hope she will talk.

K: did you make the headphone I told you to make?

Giovanni: Oh no. I started to set up all the carts for all and for my daughter too. I have all the material. But I start to set up and produce GaNS at the house and the factory, maybe the garden too, Mr. Keshe.

01:52:06 K: For those of you who don't know Giovanni, he runs and heads the KF factory in Italy and the factory which just moved to the south. He has a lot on his hands. Thank you very much for everything Giovanni.

Giovanni: No! Thank you, Mr. Keshe. I want to say thank you to you and Carolina.

K: let us see if you can get her talking by next month. At least you are on the right track; thank you very much.

G: Thank you very much – bye bye!

[MK answers a question on how to alleviate the harmful effects of vaccination, and lashes out at the “freaks and criminals sitting within the governments” who are responsible for the genocidal policies and technologies](#)

01:52:46: The question was about the toxicity caused by vaccinations and what can be done?

K: I have explained this before and the toxicity comes mainly through the mercury in the brain. The addition of the mercury in the brain has caused the problem. This needs a knowledgeable doctor to be able to reverse it. It is by extraction of the mercury from the brain cells. Mercury is dangerous to work with and to be near to. It needs the development in a way to what like Dr. Rodrigo and our doctors in South America did, in a way because the mercury is in such a minute amount, but very effective in the brain. It has to be extracted from the brain cells and Dr. Rodrigo and other doctors know how to do it, but you have to understand that you don't introduce a new material into it. At the same time, it does not matter how much energy or brain cells you produce due to the level of mercury in the brain, the removal of the mercury in the brain is paramount because with these MMR injections the doctors giving them actually inject mercury directly into the blood cells and that touches the emotion of the physicality and the brain. (Note: the doctors giving the MMR not the KF doctors treating the vaccine damage).

01:54:30 K: There is a procedure that takes very little time but it needs an expert hand and I see this with Dr. Rodrigo in Washington and the doctors in South America who understood how to remove iron from the tissue and how to remove calcium from the breast. It is of the same order and it has to be understood fully. You don't need to touch the mercury but you can work with the materials near to it in the same process so that in the spectrum part of it will touch the mercury and deplete it. And then you see the change. But at the same time, you have to go through the same process of developing the new brain cells that have been damaged.

01:55:24 K: As I said before keep away from (the triple antigen vaccine) and try to do the single injection (referring to the MMR given as 3 single

injections). We see the new forces coming especially in northern Europe trying to put the parents in prison if they don't go with the 3 injections. (Editor note: also in Australia) But what will be interesting as I said, is to ask the ministers, their grandchildren and their families to be injected and watched for 3 years. If nothing happens then I will bring my child. The ministers themselves are avoiding having their own children injected at the highest level. So why should this only be for the others? This is a complication that we have to handle and at the same time there is a way that I see it can be done. We take the injections from the doctors who are giving them. Do not touch them. Do not open them. Put them through GaNS water, which allows the mercury to be extracted from it, and then give it to the child. There is a process where this can be done. Then we have no objection.

01:56:39 K: I keep on suggesting different ways to do it to suit the parents. The injection of the MMR; let them seal it and sign the cap so they can see they don't touch it. Take it home and put it through a process of extraction of the mercury from it. Then give it back to the doctor to give the injection. The problem is not the injection but the level of mercury in it and the combination of the materials. You can do this and it can be done. I don't see how and why it is being pushed so heavily except the pharmaceuticals have got to return the money that was invested to inject to kill.

01:57:30 K: As I said a few weeks ago we received a message that the world population cannot be more than 500,000,000. *We have to control it and 500,000,000 is the maximum. I said OK if you want to control it let it be your life; you put your life and get rid of your life first. Then the other 6.5 billion will be perfectly alright because you are not there to control the 500,000,000. He says no, we have to be here to control. So that means why don't you kill yourself first and then do it to the others? Anybody who says they are from the organizations who want to control populations say to them OK everything has to be by example. You kill your own children, your own family, your own daughter, and then yourself. And then we follow you.*

01:58:10: This is the way it should be handled. This is what I said to the Illuminati very recently: *If you so much want to control the 500,000,000 and get rid of the rest, put your own daughters, your family, your grandchildren, your immediate family and friends as part of the 500,000,000. And then we will talk about the other 6.5 billion you want to get rid of. He said no, we*

*are the controllers. I answered you are freaks and a bunch of criminals sitting in the organization of the governments.*

01:58:40 K: You see the same position in the Iranian government now. The president of the Iranian government that was reelected works on the very clear understanding mandate where they say the power of the military says *those who served and get their families for going to the war and fighting against Iraq have a say. Those who haven't defended the country have no say.*

01:59:04 K: So, anybody who says to you that the population has to be 500,000,000 because there is not enough food, say *OK we start with your family. You bring them in and whatever shape or form, you want to use to get rid of humanity, do it with yourself and with your family and then we follow when you have done your brothers, your sisters, your uncles, your children, your grandchildren, and the rest, then we stand as the next in line.* And let them see if they can stand the loss of their own blood.

01:59:36 K: Until it hits home they don't understand. *If you are there to control the population to 500,000,000 and you want to get rid of 6.5 billion which divided is about 1 out of every 12, first of all, put 12 of your dearest on the front line and you can be number 12. Or I become #12 if you can kill your own sister, your own mother, your own blood, by execution, by injection or whatever method you choose for the rest of humanity. Every single one you kill you bury and then you go to the next one. And then we see if you have covered the procedure of how this has to be controlled.* We hear this a lot coming from Bill Gates science people that they have to control. Please put your own family as the first 12 on the front line. For every 12 you kill then we give one person from the other family and let's see how this works.

02:00:27 K: This is a very fundamental point and it is just the excess of power. If it is good to kill 6.5 billion then part of it has to be yours too. Then you can bury them by the matter you choose. You have total freedom – hang them, shoot them, whatever you do and what you decide to do with the rest of humanity do with your family first. Then I will stand as #12. See if you can bury them. The mental disorder and grief in you will not talk. You know exactly what I mean. As I said before in the interviews, the Senate opposed the Iranian peace talks 5 + 1 that they would veto it. I said to them in a presentation with Mike Harris: *you show me a single member of*

*the Senate who can oppose 5 million to 10 million jobs in such a depression in the United States. The following Monday the head of the opposition group said they decided, it was finished and they had the signatures. Now we do the same.*

02:01:34 K: *Anyone who tells you they have to control the population of humanity down to 500,000,000 say please that is reducing 12 people in every group so the first 12 are your family. We leave it to you to do because we do not want to get our hands dirty with any of it. You line up your family—your wife, your children, your mother and then when you have done 11 executions I'll become one. But you have to bury them one at a time. You will find out it is buried. Talk is cheap because it pays for the pharmaceuticals to do what they wanted.*

02:02:17 [K: About Mercury, we go back to the doctors in the medical teachings.](#)

We can show this in the KF research group in water decontamination. As you know, we have developed technology that now is proven with scientific data coming from the government. As we know, there is a big problem with the farmers with the nitrogen that is released. Nitrogen contamination is a very big problem. We have shown that we can reduce in the first step about 59-63% within a few minutes with the new development we have done. We are going into a second phase that is about 95%. A lot of money that was getting spent by the farmers for nitrogen contamination and the rest of it, we have now found a solution for it and it naturally becomes a very good fertilizer the way it is coming up as it shows.

02:03:17 K: I received a report yesterday from the Italian laboratory. Maybe we take this back into Ghana and work with the Atomic Energy Commission and we will find very rapidly what we learned at the center (Italy) with the decontamination of the mercury from the 3 injections (the MMR vaccine). This is the only way we can do it, but meanwhile it (the mercury) has become part of the structure of the brain and it is in atomic molecular. In a way, it is very easy to decontaminate it but it is very hard to remove it because if it is in one position we can extract it. Dr. Rodrigo and others have done extracting with the other metals and calcium. But mercury is very tricky. It has to be done before or don't put any at all from the beginning. But why they put mercury to link the 3 injections together is

beyond my understanding. I have not understood yet. Maybe we don't have a criminal mind and that is why we don't see it.

[As far as emotions go, what role does sexuality play? How come some people are gay and others straight?](#)

02:04:36 Rick: Trevor has a question in the Livestream: He says... *as far as emotions go, what role does sexuality play? How come some people are gay and others straight?*

02:05:04 K: Carolina is laughing. I am going to answer this very carefully because pressures of life touch the soul of the man. And what we see in the dimension of physicality is what our soul has decided to have. I have never seen anything wrong with which way the humanity decides to express itself in respect to its emotion and in respect to its sexuality. It is the way our soul decides and our physical body follows, but in so many ways our soul not all the time sees the needs of the physicality in the environmental existence or in the process of the development of the physical part the physicality takes different shape than the emotion. This is where the conflict comes. In fact, there is nothing wrong; it is us who decide from the beginning whether to be a male or a female, how we decide to look, how we decide to walk or if we are paralyzed. In the future in space we decide to manifest ourselves in different shapes or forms.

02:06:46 K: Maybe on the earth we like the physicality of the woman to be in the body of the man with the behavior of a woman, and then on another planet it will become vice versa, because it feeds what we need in the level of the emotion. You find very strange things if you look through what you call 'homosexuals'. But the strange thing is they understand the female, or the female understands the male, and they behave the same way. You see we say men are single task and women are multitasking. Those people are truly taking pleasure in the emotion of the woman but in the body of the man. They are multi-taskers exactly like women are. There is nothing wrong with how we express our emotion in the dimension of physicality. What counts is what the soul is at peace with not with what others perceive.

02:08:02 K: There is nothing wrong being homosexual, lesbian, straight, gay or whatever you call it as long as the soul of the being is at peace with itself and it can give more than it receives. This is what we see and the

physicality has taken the form of what the emotion did not want to be in the level of the soul. So, we see the emotion is different than the physicality manifestation. There is something wrong that needs slight adjusting in what I call the transformer or the brain of the man. Either behavior or preferences do not change the emotion, the level of the emotion, understanding of the emotion and life in the physical dimension. It is very much as we said with what I call the beautiful people. In this essence, it is the same thing and the physical body one wants to be in and it is different with the emotion and the soul. It receives from the soul that manifests itself in a different level of strength.

02:09:25 K: We see the complex behavior. It is natural and not everybody is A and B. We have an A, an A and a half, and then B. And there is nothing wrong to be there. There is nothing wrong with what you call homosexuality either way if the soul is pleased. But if it is used in a different way as we see for the promotion of the certain target because we get more out of it nowadays, then that is not the way it should be. We see a lot with the musical world. We see huge numbers who pretend or become off the behavior of one or another, because they have huge supporters and they become very famous very quickly. We see that heavily in the music industry now. The promotion of the sexuality or one way or another has become a racing team in the media and nobody is aware of it. But if you really look at it, you see the most famous actresses and actors are known to their community to be and they elevate them because they have a connection with somebody who is like us so they elevate them. Or they like to behave like that. We saw that with a couple of famous actors and actresses.

02:10:56 K: And we have seen that in the White House very recently. The homosexuality in the White House was very prominent but it was well kept 'behind'. And then we saw the misconduct by the president. But in fact, it was not misconduct by the president because the president was alone on his own. The disclosure was very hard for the White House to disclose. As a lot of you are aware, the White House has what they call the Lesbian Suite. It was created because of the disability of one of the presidents in the past and as the president was disabled in the wheelchair the wife preferred to show loyalty to the president and they built a different section in the White House known as the Lesbian Suite for the wife of the president, where she had physical pleasures. That apartment was used in the past 20 years as those who are close to the White House knows who and what.

02:12:04 K: The good thing is if you are open about it and don't hide it behind other allegations. This was one of the biggest secrets, not in the last president, but the one before that and the one before that, and before that. As they say the presidential Lesbian Suite has been used frequently in the last 20 years. Being open about it is one of the problems of the society because it is us who cannot accept it. But within them, it is very acceptable. And in a way, it feeds the soul to be happy in the condition in which the physicality has found itself.

02:13:00 K: Go back and read how these things are handled at the highest level. Outside we shake hands and say hello with the wife. But inside things are different. We have seen that with the King of Belgium. This has to be opened up. He has the position of being a king but at the same time he has preference for the male and the female. We have seen a number of children coming out of the marriage. Read the book; it's on the internet. I don't accuse or make accusations. Four children have been made by insemination. He likes the pleasures of having his own children but he does not like the physicality of the interaction with a woman. So, it is with the king and the queen. We see this with the Middle Eastern king who has chosen to lead a celibate life but he lives a homosexual life in the background. But he keeps his nation in front of a lot of things and he is serving his nation. Just look into it and you will see it.

02:14:12 K: it is us who has made this a taboo. If we take this taboo away like we have with the schizophrenic, you and I call them the beautiful people now we know what it is. It is a pleasure to have when we understand the totality of the transformation of the man in the physical dimension. Hiding it causes problems because you have to do a lot of things to hide it. Being open about it then is that there is nothing wrong with it. I learned something beautiful from Elton John years ago when he was very young and we knew of his homosexual part. It was very hard for him 30 to 40 years ago to let it be known in public. When a question was put to him on live television he answered it very directly and he put the school of thought on the listener and not on himself that *OK - I am of the preference of having a love affair with another man but I want to be in the physical emotion of a woman. And it is acceptable to me and my soul and that is all that matters.* That put the British public into a lot of thinking. *How could this man be so?* But it brought a lot of thinking into the society. That was in the British community about 30 years ago when he opened the door.

02:15:49 K: It is not making it taboo but accepting and understanding it takes a lot of pressure out of the families of these people. It has become known but we have to understand that it is the physical dimension that has taken a different direction than the emotion in the brain of the man. Can you give them more GaNS to make them comfortable? Maybe then we will find out they transform to the physical body of a woman. Then that is possible. It has been done before and it can be done. But it has to be for them to understand how to change the physicality in the level of the emotion. Or they prefer it this way because they receive what they need as the energy to support the soul at that level of existence. These things should not be taboo. (Mr. Keshe drops off).

02:17:40 K: Sorry my laptop ran out of battery. So, this is the problem that is with us as humanity and it is for us to understand that there is existence between the emotional and physical. Sometimes you find men who are very, very masculine and women who are very, very feminine. The more physical you are the more the emotion and the physicality are in line. This is the level of understanding. We have to understand. It is not that there is something with the world of creation. Creation shows the beauty of itself whether it is the woman in the emotion of the woman and the body of the man, or one of the two. Now we understand the operation in totality and it is us who have to accept the reality that it was us who did not understand the totality. I don't support gays, lesbians, single sex or double sex. It is for us to understand the essence of creation and the reason for it. Then it is for one according to his own upbringing and phobias and whatever to accept whichever.

02:19:14 [K: I wonder when we will make the tablet for the soul and stop taking the tablet for the headache?](#)

**We should actually do it with the zinc water—that is your ‘tablet’. One of the best ways to support the elevation of the soul in the dimension of the physicality of the brain is to use potassium GaNS with zinc oxide. The development will be very rapid and people with ALS and MS—this is what they need more than anything else, where you mix on a ratio of 50 to 60% zinc oxide and 20% potassium and 20% CO<sub>2</sub>, and you will see fantastic results right away. People with Alzheimer’s will walk away. People with MS and ALS will just walk off in months. Don’t forget we just heard from Giovanni... we fixed the brain and now we**

**have to fix the physicality. The physicality has been in the wheelchair for 10 years. How do you fix it? It takes a lot and it takes time. But when you wash with the same on the physical structure you will see the difference very rapidly. We have to find and understand there is a new natural way without medicine so that you can change a lot of things.**

02:20:44 K: But now we have to understand that most of the problems can be fixed through the brain but it has shown itself through the physicality. Do we want to change a man who has the pleasure of a woman but the physicality of a man? Don't we create more mayhem inside him? I have been through this enforced physical change by the outside. When I was a young boy in the first year of school, my writing with the left hand was a big 'crime'. Oh... I remember my mother and the teachers: *he is left-handed!* I was the first left-handed boy in the family. They came to an agreement; they did a *coup d'état*, a revolution against me; the teachers, the school and my mother. I do half of the homework of the rest of class in the evening, but I do it with my right hand. They forced me for months to write with the right hand. Now I have the capability to write with both the right and the left. But naturally I am left-handed. I remember they enforced this. I remember telling my mom that this was not fair because I was left-handed and I enjoyed being left-handed. She said no there was something wrong in my brain and I had to write right-handed.

02:22:06 K: I went through this commotion and I was forced to write with the right hand and sometimes if I put my mind to it I can write with both hands the same thing at the same time. It has given me an insight into the injustice of man just to look right in the physical dimension. I carried that pain with me for a long, long time because it was too much. I am left-handed and I enjoyed being left-handed but I was forced to use the right hand with any trick possible. I remember once that they started paying me if I used the right hand I would get this and that. We have to leave the soul in the dimension of physicality it has chosen, and appreciate its beauty.

02:23:06 Zane: Mr. Keshe I want to thank you for everything. A while back you told us to remind you about something. Do we have time for it?

K: explain. I can't remember.

Zane: I'll have to go back in my notes, I'm sorry.

[Cary Ellis asks MK some important questions about GANS making with carbon sticks versus nano-coated copper, and other things](#)

02:24:04 Rick: We have an ongoing question with Cary who wants to ask about the operation of GaNSes and a specific method. It has to do with the creation of the GaNSes with the carbon stick method.

02:24:54 Cary: Hi Mr. Keshe, it's Cary Ellis and I have so appreciated your teachings and I have traveled and taught some workshops. You talked last week about washing the caustic off and I've always been careful about that and teaching that. I know at one point when the carbon GaNS stick method was brought forward you are affirming now that the primary way to make GaNS is with the nano-coated copper, and I appreciate that, I honor that and I've always taught that. I also know that when the carbon stick method came out, Arvis brought it forward, I loved the GaNS that I have made and it seems to do very good things. I know you want things made in a very particular way so that we get the proper results. I just wanted to know if you would talk about that. Many many people have asked and it's a question that is up right now. I understand the carbon stick method is maybe not approved right now.

02:26:34 K: Nothing is approved or disapproved. It is just that we have to understand the difference. Carbon is 12 and copper is 60. It is the force of 5 to 1. This is where it comes from. With the zinc and the nano-coated copper we create the magnetic fields from the nucleus point of view. This is the difference. With the carbon, you create the atomic structure with a draw where in that position the process is so rapid that you produce carbon, which you have to support with oxygen. And if you produce CO<sub>2</sub> from the physical element of the carbon you are connected to the physical dimension of the material. It is very much like the iron, which is in a metal condition and a physical matter condition, coming in touch with the amino acid produces the blood. But if you put the GaNS of iron in a different shape or form into the amino acid you produce pure blood, the real hemoglobin.

02:28:10 K: You still produce the same but it is not the same strength of the same order. They are two different things. The iron you take as a tablet is very different from the iron you digest from eating let's say red meat. The one you take as a tablet is in the matter condition and you absorb all of it. In the one you take in the meat, the body only takes what it needs. This is the problem with a lot of the food. This is one of the reasons that I explained in

the teaching earlier today, that when you take the magnesium, zinc and copper you take it with CO<sub>2</sub> and zinc oxide. Because you create the condition of entrapping it or delivering it in the environment of the body of the man. The body only takes what it needs. When you take a magnesium tablet all of it goes in because it's stronger so it enforces itself. When you take your tablets, such as potassium, calcium, magnesium and the rest, you take it in the environment and condition of the zinc and copper and the CO<sub>2</sub>. It's a totally different process.

02:29:35 K: Now you convert; you distribute as an atomic molecular GaNS level. With the others, it is different. It's the same thing with the CO<sub>2</sub> (carbon) sticks. You have a huge, massive force sitting in the copper, which is 5 times more and you literally strip it out. It's like taking the clothes off yourself and standing in a huge wind tunnel and getting everything stripped off you very fast. That is all it is. But the essence of the carbon you create in the zinc plate, and the copper plate is the GaNS state magnetic field. It is totally different structured plasma where with the copper (carbon?) stick you create the CO<sub>2</sub> very fast but it is not recommended as such for use such as drinking the plasma water unless your body needs it. It is a big difference. The (Morris Oxford?) and Rolls Royce are both cars; it depends on which one you want to drive.

02:30:45 Cary: one of the discussions that has come up is the fact that the carbon is a nano-material. What do you think? The question is that carbon is a nano-material. It was a piece of bamboo and it makes a nice carbon stick. I know the purity of the carbon stick would make a difference. But the idea that started it was that it was a hexagonal molecular structure that I believe the nano-coated copper is. I am trying to understand the difference in the molecular weight.

02:31:33 K: There is a big difference in the understanding. There is nothing wrong with both of them but what do you expect to operate with them? Do you understand? That is the difference. You will find out when you work with the GaNS plasma of CO<sub>2</sub> you have the natural effect. With the CO<sub>2</sub>, you create from the stick you have a different dimension and strength of the plasma. You think your body creates that kind of condition? I don't think so.

Cary: OK, very good.

K: as we say in English, *horses for courses*. *Just because it's a horse it doesn't mean that you can put it on the race track or put it in the flat race.*

02:32:27: Carry: how about making nano-coated copper GaNS with a coil. I'm in a country now where only simple things are available in very small amounts. I am in a town in Mexico where I am teaching a couple of classes. Getting materials is a little more complicated so I'm wondering if a heavy copper wire made into a coil could be used instead of a plate.

K: in a condition that you are in you already have access to pure carbon that has been converted if you want to look at it that way. It is the ashes from the wood fire. That is your best solution. Let me explain. If you make GaNSes of the ashes of wood, because the wood has already gone through the transformation in the process the same as the carbon stick. But you will find out it how you play you will find what you need. In South American people for centuries have burned wood for centuries for heating and they found out when they threw out the ashes they were getting very good results for growing food in places that food never grew. They grew beautiful vegetation to eat.

02:34:28 K: Then they started burning the wood and using the ashes in areas that they could cultivate. If you go to South America, you will see places where the land is totally black. For centuries, they burned wood to create ashes to create nano-material to absorb energy so that their vegetation could grow. This was done by the Israelis after the 1960s war when they took over the Sinai desert. The Israelis came up with a fantastic system. They tarmacked the desert. Then they brought in new topsoil and put on the tarmac. The oranges you see coming from Israel come from the desert. These are big oranges. They understood the potential of using the land, isolating it or putting a topsoil with a lot of things on it. We see this now becoming part of the norm in Africa where we are trying to change desert to food centers literally by GaNS materials.

02:35:40 K: This is what I suggested to the Chinese government. As you know, the central China desert is moving to Beijing very heavily and they have tried everything. The simplest thing for Beijing to do is to literally water the GaNS and put seeds on it and it grows and solidifies in the desert and it costs nothing. What you are talking about is the same thing—creating a GaNS or creating the environment of the GaNS. When I was in China years ago this was a discussion of what they were going to do with the movement of the deserts into Beijing. It will run Beijing over in the next 50

to 100 years most probably. But by changing the environment you create a condition where the trees and plants can root and it stops the movement of the desert. There is no other solution. And it costs literally nothing for the Chinese government.

02:36:31 K: And you do the same when you put this in South America in the remote areas, the ashes are your best GaNSes. They are already a nano-material and you have to find a way to convert it and put it in a ratio with an electrical connection and discharge and you will see GaNSes produced in the middle. If you understand you don't need to do anything. If you comprehend the technology in its truest sense, you can always adapt the technology to what you need. If you remember you will not forget that it's there. A lot of our people remember that this is what is done and what they have to copy. If you comprehend it, you can change it. Many times, the central bar of the batteries are fantastic and gives what is needed. The biggest gift the Europeans gave to the Africans was the pure 99% copper sheets in the batteries they couldn't dispose of in Europe. They dumped them in Africa and these are the best resources now for Africa. They can open the battery and take the pure copper sheets out and now a lot of these are being taken out of Africa to process into the back door to feed the nation.

02:37:52 K: We have to find the solution. Carolina and I used to go around in Belgium and buy the batteries. People thought we were such idiots to buy the battery for one euro each. What they didn't know was I could make a one-thousand-euro system out of it. It is what we see; we used to wash and clean them. Armen can tell you that we did this in Desenzano. The beauty is what you don't know in how to use it. But in these kinds of conditions you have everything.

Cary: Yes, there is also a battery that has a Zinc plate and a carbon stick in it.

K: All the batteries that are disposable go around and collect these. The casing is the biggest resource for humanity for power. Use the stick in the middle the carbon and the zinc oxide and now you produce food. It has lost its energy in the physical dimension but if you understand the power of the GaNS and what it can do, you take out the center pin of pure graphite and wash it. You take out zinc casing you wash it and clean it, and then nano-coat the zinc plate and you have your food. This is the best energy source

for man. Because it is supported by zinc but not by copper it feeds the emotion much easier.

Cary: yes, this is beautiful. I know many who have been utilizing that. There are many of us who will continue listening, Mr. Keshe, for your ongoing comments on this and we are all learning all the time. There are people outside the first-world countries that are trying to find ways to do this. I want to be doing this right. Thank you so much for talking about this.

02:40:00 K: I will tell you something you can do if you understand. If this can be explained in a different way: when you open these batteries, you have the center graphite in the middle and you create CO<sub>2</sub>. Use one battery cover as nano-coated and another as non-nano-coated. And then create the GaNS of zinc oxide and use it for feeding... you can feed the physical body of the man through the soul and the emotion of the man that the man does not need any physical food. This is the secret of those who move to the level of not eating and those who tried it and say sometimes they can eat and sometimes they cannot eat.

02:40:50 K: If you use the zinc oxide at the level of the soul which takes the GaNS out, make the GaNS of zinc oxide. Make another GaNS of zinc oxide and the ratio difference produced as the zinc oxide in the middle from the 2 GaNSes, you can use that oxide, the liquid plasma of it, to feed the emotion and the soul of the man that the physicality does not need any food. Those people who have been drinking food, CO<sub>2</sub> cocktails and GaNSes of plasma water are trying to feed the physicality to feed the emotion that it does not need to feed the soul. But in a way if you feed the emotion at the level of the soul then your physicality is fed and you don't need food. You feed the headquarters and the rest are already fed; that is the simplicity of it. This is what a lot of people don't understand.

02:41:51 K: In the 3<sup>rd</sup> world nations the governments of west with their technology have left a lot of batteries to be dumped in the 3<sup>rd</sup> world nations. The batteries are actually their food and energy supply. The only thing is how to use it. You know they say where there is a muck there is money. The muck is what they throw out with these batteries and if you understand how to use it you have massive energy resources. Take the zinc out and nano-coat it. And create the zinc GaNS in the middle. Take the copper and the carbon that you had originally that has already nano-coated itself. Nano-coat one layer of it. And then use the GaNS that you produced in the zinc

between the two plates and put it around tissue or even the leaf of a tree and wrap it with the GaNS inside of it. And put the zinc nano-coated on top of it. Now you have yourself a natural battery that will last for years.

02:42:58 Cary: beautiful. May I ask you to talk about the electricity (dropping in and out 2.43.15)

K: please repeat.

Rick: we are having trouble with the transmission.

02:34:36 Cary: the question of the use of electricity with the GaNS process and knowing with our original nano-coated copper process we don't use electricity. And then some have come up with a method of using a wire in between the metals in the GaNS process to flow the natural electricity in the salt water in between the metals. And then the third method would be to add a tiny 'trickle' charge and connect a battery and some connecting a phone charger. And what we have dealt with is reducing that because usually the amount coming through is too much and we are trying to keep it below one amp or one volt.

K: Is that for producing GaNS material?

Cary: I'd say when the carbon stick method is used that seems to help the process. I have had people who had a little regulator that could cut it down to .06 or .05.

02:44:50 K: Can I explain something? The process, because once you enter the GaNS level, the current you put through the matter state is the creation of the flow at the matter level. That is why you put all the energies at that strength into the material and that is why you get a faster result. Now with connecting a wire you have specified this is the energy you need and you have put a filter on it. The wire connection is the filter limit, the limitation that you dictate. Then because you dictate all the energy that comes to the system comes at that level. That is why it works faster. In the other ways, randomly what is available at that level is created and used. So, in a way when you connect even to a fan or LED we are dictating this is the range we want to stay at and anything above that we take out. When you put the wire directly between the two then you dictate exactly what you want. And you don't desecrate it so it gets released in the atomic structure from one to the other.

02:46:18 K: You live in a village but you have a lot of noise of cars. You must be in a very good village.

Cary: I am muted so I don't know where it is coming from.

02:46:30 K: So, this is the problem; it's not a problem it is the understanding more. In a way, the speed we have bulldozed through knowledge in three years is now good that you ask these questions and open it up to clarify a lot of things. As I said we can teach about the soul of the man and the elevation of the soul. At the same time, we can teach about the physicality and the dimension of matter, the GaNS and the nano-coating. Because we have new people and we have people who are elevated to a new level of understanding.

02:47:02 Cary: so, thank you and one more question. In a remote area, we are taught to use an LED light to get CO<sub>2</sub> GaNS versus zinc GaNS in basically the same process of making it. Do you have any additional thoughts on how to get CO<sub>2</sub> instead of zinc if you don't have an LED available?

K: you mean to produce GaNSes?

Cary: yes.

K: just connect it to a different piece of metal than the two you are using. If you have a copper wire coming from the copper plate and you have copper wire coming from the zinc plate and one is nano-coated just get a piece of aluminum and connect the two wires from the two plates to the aluminum. You need to create a balancing so that anything over is used and you get a constant. When you produce CO<sub>2</sub> with the LED for example you produce a specific type of GaNS. You have dictated the condition. It is the same when you have connected to a motor and the GaNS you produce is still CO<sub>2</sub> but it is tuned to the level of the motor. When you do it with the LED it is done to the level of the LED in your power consumption.

2.48.28 K: anything above is dissipated because below it doesn't move. So, you put a filter. You add these connections. If you connect one to the other directly, you don't do anything because you are using the plates as matter state and you have no control except unless you are using a filter. Just use an element that between the two and it can dissipate energy and create specific energy such as CO<sub>2</sub>. Also get yourself a piece of wood and take the

skin off and connect it to that and you will produce a totally different GaNS of CO<sub>2</sub>. This is what you have in nature. You produce a GaNS at the level of the vegetation, which is best for the vegetarians.

Cary: beautiful!

02:49:30 K: but once it goes 'dry' you have to change it. You should have done it by now! The skin is a nano-layer and you don't want that. You need a dynamic one; you need a live connection. Put the stick in the glass of water and connect it to the higher part. You have to keep it moist to keep the transfer of energy across.

02:50:20 Let me touch on something. **In the battery operation, you use acid because it means the giving of energy and it is a high level of hydrogen available.** In the connection with the salt you produce life, the energy at the level of life. That is where you produce GaNSes. This is the difference. That is why we use salt. When you create salt the energy absorbs from the environment and dictates what kind of GaNS is produced, where with the alkaline base it dictates one type of energy to create life. Where it is acidic you give so much that the life cannot be sustained. That is the difference of why we use salt or we use acid condition. And the faster we understand this the easier it becomes in the elevation of the understanding of the totality.

02:51:19 K. So, when you are dealing in that side and you want to produce GaNSes that are connected to alkalinity use exactly where it comes from...the plant, the branch and the dynamic life. So, you can use it at the level if you like let's say GaNS of cauliflower. Take the skin off and the green part of the leaf and then you can produce a GaNS that is at the strength of the cauliflower. It is very simple.

Cary: wow! That is awesome.

02:52:06 K: I should have thought you would understand that by now.

Cary: This is very cool. When I was teaching in South Africa some wonderful people brought 'shungite' which is a carbon-based rock with a hexagonal structure and we made CO<sub>2</sub> GaNS with it. This was in place of the carbon stick and it made a beautiful GaNS. So, I am curious if you have a comment on that. Also, would you speak to how much electricity is proper

to run through the carbon stick method if we were using a trickle charge either from a battery or a reduced phone charger or not? That seems to make the GaNS work.

02:53:07 K: Yeah, but the thing is we do the same thing in the factories. We put big plates and big 50-liter containers and we connect them. Then we choose a power supply and we put 2 to 3 volts, one amp, two amps and we see massive production. Because in that level we are not concerned about anything because we just need the detachment and the attachment of the material to the coils. The rate of the current dictates the rate of the flow and the color of the material. Different energies have different colors. This is the beauty with a lot of teachings, which a lot of people don't understand. You put the copper plate and the zinc plate with normal current and you get CO<sub>2</sub>. You put the nano-coated copper with the non-nano-coated copper and you get a very green production copper oxide. When you increase the voltage, you get orange color because now you are separating most of it in the atomic level because there is not enough oxygen in the water for it to be oxidized. When you increase the voltage very high the separation is so fast that it doesn't even go through the separation in the GaNS state; it goes directly into a nano-material and you collect nano-material from the bottom. The rate of the flow dictates the speed of the separation of the molecular into atomic into the GaNS. That is all it is.

Cary: Wonderful; GaNS is just such a wonderful material and I know those of us who make a lot of it love it.

02:55:06 K: The GaNS is the most pleasurable material in the world if you know what to do with it. I tell you why; the body of the man and the body of the woman are made of GaNS. We haven't extended our knowledge because of the taboos we carry in our head, but what do we touch when we hold our partner. ... a big plasma of GaNS. I bet if I connect you to a leaf of a tree and your partner you will produce a beautiful GaNS if you sit in the bathroom in the pot. We have created limitations to our own understanding but the reality is no different.

02:55:55 K: Why do we feel good when we hold our partner? Why do we feel good when we hold our children? Why do we take pleasure in holding our grandchildren? Because we are more mature and they are less. In giving we take what we don't need and we mature them. That is why kissing is so

common in man because it is an act of emotion and the transfer of the physicality at the same time.

Cary: Beautiful. And I see Arvis who brought forward the carbon stick and I know he uses a solar cell.

O2:56:52 K: It doesn't matter what you use; it just depends on the speed of separation that you put through the material. If I was you or anybody else, do not waste the carbon stick. Use it the way I said and you will have huge energy sources if you understood what I said.

Cary: beautiful, thank you so much for talking about this.

K: thank you very much; any other questions?

O2:57:19 Leon from Germany:

K: You sounded like our friend from Iraq... where is Azar? We miss her today!

L: I waited for her to ask but...

Rick: I don't see her on the list today.

O2:58:05 [Leon: my question: is the planet earth a constant element balance in respect to the sun?](#)

This means that you have for example 50 tons of gold on this planet and it cannot be more and it cannot be less in respect to the sun's MaGrav fields. So, if I took some gold from this planet and fly to another planet, this gold I took should just disappear. So, I think it is not possible to take elements from this planet to another planet somehow. And our planet would reproduce the gold that was taken, or the water that was taken.

O2:59:22 K: let me answer you; your assumption is 100% wrong. The planet absorbs and converts energies from the environment of the solar system. And it has no limitation in what it absorbs... it absorbs according to the central field of the gravitational magnetic field. So, if we are in an environment where such GaNS are available in the magnetic gravitational environment it will convert it to gold. You can take as much as you like. But if we are in a position in the environment where a given specific magnetic gravitational environment is available it converts to gold and it will convert itself back to gold.

03:00:15 K: It is the same as you say in the energy of oxygen in this planet is constant. It is not because of the constant interaction between the fields of the earth and the sun. They continuously produce hydrogen. Where do they go? In the breathing system in the process of life in the fields of this planet we convert it to another field strength, which is needed by other planets and other structures in the universe. If you think of it, the amount of energy produced in the hydrogen, nitrogen by the interaction of the fields of the earth and the sun we should be continuously growing up to a new size of atmosphere. It doesn't do that; because there is a limitation of what we convert and what we use. What we use we release into the atmosphere back to the solar system so that the others can use it.

03:01:07 K: So if we pass in the position that the fields of it are available then at that point we convert the material. Instead of raining water we are raining gold, which in reality if you could measure the nano-structure of the given strength of the field of the planet where it is equal to the gold, you will find out that you will be correct in gold. This is the reason why the oceans are holding more gold than the solid part of the planet. Because it is dynamic they produce continuous diverse field strength. Some of it is at the level of gold so it is attracted from the environment of the plasma of the solar system. When man understands this in the future we will even create gold which comes from the structure of the fields of the galaxies. We are not educated well enough to understand. But with the knowledge we are gaining in the future I will tell you the gold is from the conversion of the planet internally itself and this gold has come from the place of the plasma of the solar system and this gold is from the plasma of the galaxy or from the solar system because when you transfer the time is non-existent.

03:02:37 Leon: Yes, I understand. My worry was about the use of technology that would start producing copper and we would have too much copper.

K: It's a balance and whatever we don't need we release.

Leon: I could take the energy from somewhere that does not belong to us and maybe the planet has the mechanism to have this in balance. But we start to think to do something good or better it could dispel something. So, I thought there must be an answer in plasma technology because that is how nature works. Also, there is a question that when I take for example a gram of metal from the earth and I didn't ask, I just took it, it must not also give to

me. I just take it and it is taken un-freely. Somehow, I think that the position of the MaGrav in the material is still connected to this place. So, if this MaGrav would have the opportunity or possibility to go back and just disappear and it goes back to the place it is from because it was taken and not given.

03:04:50 K: The thing is... when you live in a structure like the planet in a way you have been given the freedom of the rights as the others use you. If you look at it, you think you consume everything. But you have to understand that the body of the man is a converter so you convert the energy to existence of the others to feed. But you only look at what you put in your mouth. In that process of conversion, it is not just that you create heat. You create huge amounts of energy, which other elements, maybe visible or invisible to man, need for their existence. We are all converter systems at different strengths. You always find that the other things exist because of the conversion we do with our bodies. There is no one-way traffic. If you took all energy and it all stayed in, you would become a balloon and by the time you are 50 you would be the size of your nation.

03:05:57 K: we don't because we give energy back. We are all part of the conversion system in one shape or form whether it is the brick or the body of the man or the body of a bird. It is all the same. There is always a taker for what is given freely. If you look you have all the birds in the garden but each one eats certain seeds or certain parts of the plants. There is enough for the others then. At the same time, it is the same for the body of the man. You can diminish it; it takes energy and it gives energy. What it gives it is given in freedom and the right of the path to use. It depends on how much we need that we take. At that point, it is the same. When you see a tree growing it is not that you watered it... it is the energy that is freely given by the earth for the entity that it allows it to take what it needs. It is the receiver who decides what it wants to receive, not the giver. I always say to Carolina, *I give everything, I give you my life and my love*. It depends on who wants to take what from it and then they are elevated to that level.  
Leon: thank you.

### [Another interaction with Jalal and the Arabic world](#)

03:07:20 Jalal: I have 2 questions for you and I have good news for you and Carolina and I have a question for Rick. I asked Rick to promote me when I

raised my hand. This is feedback for Carolina—not next week but the day after.

K: This is the language of the soul.

Jalal: I hope so Sir... The first question: today we learned how to make a high level of GaNS. Are we also making the high level of amino acid also?

K: Yes.

Jalal: Are we using salt with the CO2 water?

K: It depends on what kind of emotion you want to create and what kind of physicality. In each GaNS there is a different emotion level.

Jalal: Next question quickly... Are there any talks with the Arabic nations for this technology?

K: Maybe not this week after I wrote Mohammed off in the background.

Jalal: Yes, you have spoken about that in the background. (laugh)

03:09:34 K: As you know I said this in a very strange way but there is a lot of reality to it for those who understand... *You know they brought Moses at the time the male children were killed and somehow Moses ended up in the basket and was brought up by the king, to become the end of him and then he became the king. I have been brought up and nurtured by the Belgians to bring the end of kingship and they do not see it.* The same has happened: I have been brought up in a culture of understanding Islam, Christianity and Judaism, because this way by knowing you understand the weakness but you understand point of mistakes and you can correct it.

03:10:34 K: So, for you what we do with the Islamic world is very simple. As the term has finished...Ayatollah Khomeini said once *we do not know what to do with this guy.* And I think now they know they could have done a lot but they didn't do it because there is a time and a term. We don't look at it as an Islamic Country, a Jewish State, or a Christian state. We look at it as One Nation. So, as we see every child has different behavior. It is for us to understand it and give it enough that itself comes back home to the father. And that is the whole structure. They can kick and shout but they cannot change the course.

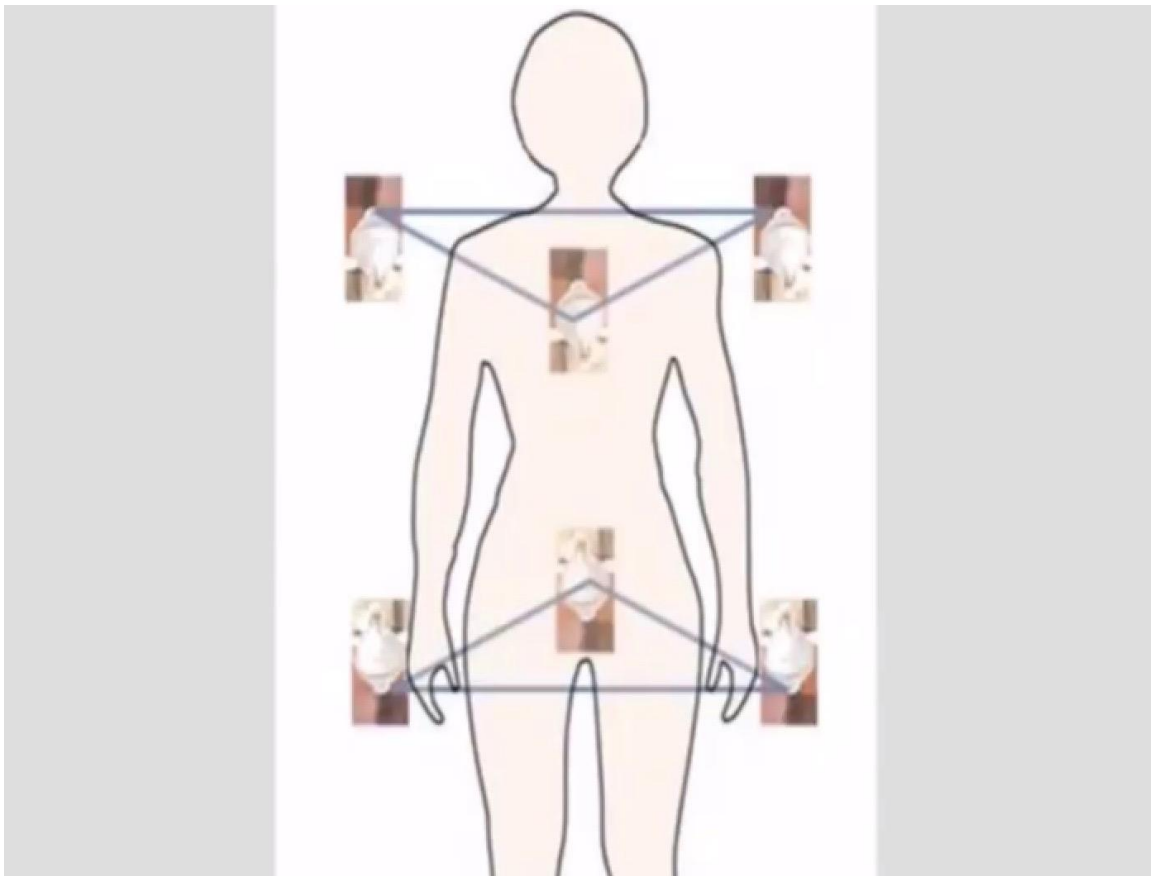

03:11:25 Rick: I got an email yesterday that says, *“Dear Mr. Tavakoli, we have one group NGO (non-governmental association) in Iran with 2000 members and they are researching energy. We would like to collaborate with your group and make your plasma reactor in Iran”*.

03:11:54 K: Tell them to walk to the Sharif Tehran University or go to the president’s office and ask for the research center and present office. They have everything there. They can speak with the senior professor, the senior doctor who is Dr. Jalali and they will put you right. Iran has been using the technology in a different way; we have already developed it. As I said, I hope the people that are organizing in the background will be able to organize it that we will be in Iran in the next few weeks as part of the teaching. I know there is havoc in Iran and if I go, what is it going to do this time? But we go with the message of peace and teach everything to the Iranians too. I understand the language and the culture. I hope I understand part of it. The last time I was in Iran I said I was a foreigner in my own country because the culture had changed so much. The culture of knowledge is the same everywhere; it doesn’t matter where you go. In Iran, we have a huge support base with the Iranian community across the world. It is part of the nation.

### [An unexpected answer for the Dutch and other free thinkers](#)

03:13:18 Rick: thank you, Mr. Keshe. I want to show a picture and there is a question about it. Can you see the image? These are 3 and 3 double core reactors.

03:13:40 Tro from the Netherlands: Hello Rick, hello Mr. Keshe... My question... this is from the 95<sup>th</sup> workshop where you said if you have the bottom part of the star formation; you can use yourself as the reactor. I thought if most of the body that is controlling the physical side of the body, if we can support that and create a tubular formation so the mid-point is the solar plexus to support the cells of the body and by that create support for part of the brain...like the 7 the reactor, or the 9<sup>th</sup> as you call it, which is the level of the strength of the higher plasma. The strength of the copper of the physicality can raise to the strength of the zinc of the soul. In that way, it balances the body and the soul at the same time.

03:16:36 K: There is nothing wrong in what you are explaining and it actually makes a lot of sense. But it depends on how much you want to elevate and how fast. Is the body in the dimension of the emotion of the brain ready to accept such a change?

T: That is always the question.

K: You never know until you try. We see with KF Manufacturing in Austria that the faster we move into GaNS dynamic systems the better and faster results that we will see. But we have to understand how these mixtures are done, how they are put together and how they can be applied. You will see a lot of new dynamic systems coming very soon from Austria. It is the essence of understanding that is closest to the reality. But if you just put GaNSes of materials we produce, or we put GaNSes of the GaNSes inside we will see something totally different results.

03:17:50 T: I was planning to use the zinc oxide GaNS in the inner core and that is acidic.

K: If I was you I would never do that.

T: It is too high?

K: No. You have to understand the process. You are trying to feed the soul and you are not trying to extract from the soul. When you want to promote a feed, you put it on the magnetical and not the gravitational in the center. Do you understand? Understand what you want to do first of all. If you are trying to extract then yes but you have to understand what you are doing and what the purpose is. **The reality is that when you put the CH3 inside and as it radiates out it gives more to the zinc so the zinc can give more to the body.**

T: I was not planning on using CH3.

K: but you have to or you are trying to drain your soul.

T: it's the mixed water GaNS that is slightly acidic.

K: you are trying to give it energy ... you want to radiate energy out.

T: yes. The outer core is alkaline so it is gravitational and in that way the fields have to connect.

K: hm hm ... try it and let me know how you feel.

T: Well I am busy just experimenting.

03:19:50 K: You are from the Netherlands and there is something important and we have to discuss it as part of the KF work. You Dutch have created a huge problem for yourselves and for a lot of other people. But it is not a problem ... in fact it is what we said months and years ago. I'm going to be very diplomatic, very correct, very direct.

T: You can be very blunt with me!

K: Not you, I'm talking to the rest of the Kf and the rest of the world. That's my problem. You are not my problem; my problem is bigger than you. You Dutch have a habit of freedom of expression and everything else, and that has given you a totally different insight to the world of creation. I enjoy being around you Dutch and I have enjoyed you since my childhood.

03:20:50 K: But in the recent past many KF supporters especially in Holland and northern Europe countries have started making these GaNSes of these funny mushrooms if you know what I am talking about. Before you used to smoke these mushrooms and you used to feel internally the impression of freedom of the mind from the soul and the body. But some of you as you walk down the streets of Amsterdam and you know what I am talking about. As you go walking, you go high in the emotion and feeling. There is a huge consumption of what I call narcotics. Even the police officers working are very high because they consume so much of the air.

03:21:38 K: I have seen more police officers high in the center of Amsterdam than the drug traffickers and the smokers. It is a joke between us and them. But, in reality what has happened is many Dutch and some of the northern European people have started making the GaNS of these mushrooms. And they are putting them in the dynamic cores and putting them on the coating of the coils and they are creating huge emotional interaction to the point that some of the people are high 24 hours a day, plus the neighbors and plus half of the district. Before it was you who smoked it, but now the fields of it go across kilometers.

03:22:26 K: And with the more and more people producing these we see a reaction coming up in Holland and in the Dutch mentality and environment where the freedom of the use of the mushrooms has created a new dimension for the pleasure of man. At the moment, the whole neighborhood is high in some cases, because the field transfer is very high. We had cases we had to deal with and it is to the point that we have to bring it to the front. Please do not make GaNSes of mushrooms, or cocaine or others that you have done. I know it's a high for a whole day and night... for a long time... but you are making a lot for your neighbors who don't want to be in that state.

03:23:23 K: I know some KF followers have used in dynamic systems and they report all sorts of things to us. But please refrain from using these

because you have the knowledge. Or speak to the neighbors and see if everybody wants to be high 24 hours a day, 7 days a week, 365 days a year. These systems go beyond the dimension of the house. On the other hand, as I said months and years ago, if you understood, this is the end to drug trafficking. Because now one shot can give you everything you need for years and you don't need to buy. So, it makes the drug traffickers bankrupt and we get rid of one of the biggest menaces to mankind. But now that we see that some people have moved because I have had to deal with a couple of cases recently, personally and directly, please refrain from producing.

03:24:18 K: Understand what you are doing... it is not just smoking a joint any more. Now it is the whole neighborhood joints that are being fed by it. In so many ways you are making... this is fantastic. When I looked at it I said that now what I have been telling them they did not understand but now they understand and there is a physical manifestation of it. If the GaNS of the mushroom can cover neighborhoods, now you understand why we said to put zinc oxide in your cores and rotate and put it in the water so that it can reach the whole of humanity. We needed proof of the pudding and in eating it a lot of people are reporting these things.

03:25:00 K: So, we know the fields go beyond the system and affect everyone. In one way, those of you who are using zinc oxide and CO<sub>2</sub>, now you not only elevate your own soul but whatever is needed by your neighbors. Now you will find a whole change in your neighborhood. But what we see in Holland those who found the freedom and tried the mushrooms now you are making the whole neighborhood very happy. But you have to ask them if they want to be happy. Maybe you live in a very good neighborhood from now on. Even the guy who comes to steal finds so much pleasure in giving that he leaves something behind instead of stealing. I make myself very clear about this now. We have seen this now and a couple of times in the past few months. Please if you even do it, put it in a remote part of the house or garden as long as it is not near the neighbors and you are not making the chickens flying in the garden of the neighbors if you understand what I am talking about.

T: One thing is sure there are no drugs in it.

K: I know, but some of the innovative members of KF in Holland and other countries have tried it. We have seen it as a continuation. This is what we said before. We don't talk about it until it comes. Let those who want it do

it, because others will find fault with them. We see it as it is part of the culture of the nations. In a way, you can walk down the road and give everyone a GaNS of something and they will be very happy people.

K: You get the same elevation with the GaNS water the same thing as you get with the CO2. It is very, very interesting because it has proven the technology is 100% correct. Our energies transfer from materials. Our dear friends in Holland, especially with the freedom you have, you have shown a very big point... that the GaNS materials work and they touch the emotion. Please understand what you are doing.

T: In a way, I know from...

K: I know somebody that you know very well that he is using it very nicely for the whole neighborhood. You know what I am talking about.

T: I think so.

K: I think so too. Thank you very much.

T: thank you very much.

### [You can use the GANS water of pharmaceuticals at no cost](#)

03:27:50 K: I want to explain something very interesting to you expanding on this. Many pharmaceutical drugs are so expensive that people cannot afford them. And many children die because of the prohibitive cost. If you have used and understand the GaNS, you can use the GaNS water of the same at no cost. As I said we will bankrupt the pharmaceuticals but we will still need them to use them if we need to. So, for example if you don't want to use the paracetamol at home you can keep the GaNS of the paracetamol for the GaNS water. It does the same thing but you have to know how to make it and what concentration you need to take. There are some prescription drugs that people cannot afford and we see this especially in the United States and people can't afford to pay for the drugs. So, in one dose you can make enough that you don't have to commit yourself to bankruptcy with it.

03:29:02 K: These are the things the technology has to offer but you have to understand it and you have to follow the dosage and acceptance of it. It is not anymore, the GaNS of CO<sub>2</sub> but understanding the GaNS of what you call the medicine for what people suffer from that are prohibitive prices. This way you can produce the GaNS of it in a very measurable amount. Don't forget when you convert it to GaNS the body takes what it needs from it and you cannot take an overdose. **So about 30 ml of water is usually recommended for any consumption.** If you are on the heavy drug prescriptions that are breaking you and taking food away from you just so you can stay away from pain, you can produce the GaNS water of it very simply as you know, and you can consume it without breaking the bank and without worrying about putting food on the table because of the next injection. This is a solution in a way with drug addiction if you add to zinc oxide. People can walk away from drug addiction.

03:30:24 K: I taught this many months ago but people overlooked it. If you have someone who is a cocaine addict or a heroin addict, you take 80% or 90% zinc oxide plasma water. You take 20% of CO<sub>2</sub> and a drop of the GaNS of cocaine. Then you connect it to the emotion and people just walk away from it. The addiction is resolved within days. Because you satisfy the emotion, you have connected to the cocaine and you release it so that it has to satisfy the point the cocaine was satisfying. And then that is it. It is the easiest way to get rid of addiction.

03:31:13 T: Can a bubbler of zinc oxide GaNS do the same thing by connecting to the emotion?

K: Yes, but this way you connect exactly to where the cocaine or heroin was linking to.

T: No, no, not with cocaine; just with using the zinc oxide.

K: No, no, I am talking about people who have addictions. You can use the zinc oxide and the CO<sub>2</sub> for the elevation of the emotion and the soul. But for addiction you have to give exactly what you were satisfied with because when you get addicted it means that you are satisfying a certain need. You have to pinpoint it and just even one drop of the GaNS of the cocaine or the heroin by the man of science into 80% zinc oxide and 20% CO<sub>2</sub>, will stop the addiction within days and even if they see cocaine or a cigarette.

03:32:16 K: But I give a piece of advice for those who want to quit smoking, you have to realize that those who have been heavy smokers for 20 to 40 years, understand just because you satisfy the need, you have to change the physicality, because giving up the smoking after so many years creates new dimensions of problems in the physicality. In so many ways you can get rid of the addictions in a matter of seconds. There won't be any more drug problems because you can stop the whole addiction in every direction. **Even if you are addicted to pharmaceutical medicines such as Valium, you can come off it very rapidly.** If you have people in your family or friends without them knowing, you can give them what they think is a glass of water and walk them away from addiction. ...Any other questions?

03:33:36 Q from France: I have a question. As I told you two weeks ago, a patch loses its vibration strength after about 5 hours. So, what I did instead of using a GaNS water I use it in a suspension of GaNS water. It is a mixture that we obtain when we pour water over the GaNS. The suspension contains the tiny particles of the GaNS. You won't see any GaNS on the patch. But the tiny particles are enough to maintain the vibration of the patch and it does not decrease for 10 days. So, I will really appreciate your comment and advice.

K: You mean you put the GaNS in a glass tube or a water glass and you pass water over it?

Q: Instead of taking pure GaNS water I took what I call a suspension. I pour water over the GaNS water. I don't let it mix but the GaNS does mix slightly with the water.

K: You put some GaNS in a glass with water and then you pour water over the container and you call it a suspension. But the GaNS never comes in touch with the water because it is contained.

Rick: He is saying that he pours it directly into the GaNS and GaNS water and it mixes and he uses the mixture.

K: You only need one single grain of GaNS in the water and it will do the same. One CO<sub>2</sub> GaNS carries the whole information. We have known this for a long time.

03:36:40 K: This is important... let me explain something that I explained before. It was a test in Ghana Atomic that we did 3 or 4 months ago and we

took the GaNS water and we reduced it by a given ratio from the next amount from the last one. With that we have seen the diminishing of the power when we use it for cleaning or disinfecting. We mixed the CO2 in the GaNS water. We took 100 ml GaNS water from that and we again took 50 ml of the 100 ml and mixed it with the water. And then we measured the strength in cleaning contaminated water. We saw the change and it reduced by dilution of the GaNS level. But when we carry some GaNS in the dilution the strength stays the same.

03:37:46 Q: it is important to use a glass container instead of the plastic container for water GaNS?

K: Yes, I just poured 3 glasses last week. This is what you get with the KF... the units you buy with the alkaline jars.

[Keyvan tries to be precise and accurate with a question on the soul](#)

03:38:25 Rick: one more question from Keyvan Davani, it's a long question:

K: Oh, he's still there! Hi Keyvan!

Keyvan: Can we go back to the soul? ...Because I have a question and I will try to be precise and accurate as possible. You taught recently in the private workshops in how to teach children through our soul. You have been talking about our emotional center, the core of our brain as I call it, or the representative of our soul. It is as small as a pea. It is like a gel. How we can we literally train and practice, starting with the children but also us as adults, to go deeper? The condition for me is to always be in the ethos of peace. You often say that plasma seeks balance. Once we are in that balance and in that ethos of peace how can we go deeper into the stronger and stronger field strength of our emotional center, from which we can radiate out and manifest and realize the collective wish of all of us with the EC, the UC and all of us? How can we go deeper and practice it? I remember you telling us from childhood how you did some practices to find and localize your emotional center. Do you understand my question?

K: No you are going everywhere but I don't see where.

Keyvan: you talk about the soul and I see this in this so-called evolutionary process, but how can we tap into the stronger fields of our emotional center and our soul?

03:40:50 K: The thing is... this is what I was talking about earlier in the teaching... if you are trying to go through the physical part it is very difficult. But you can still achieve it because the food, the plants, the food we eat does that. Or if you understood the teaching today, every part, through the operation of the heart and lung you decide and dictate what can be received by the soul of the man or through the emotion that it feeds through the physicality part of the brain. So, we can the old way and try to understand the further understanding of the knowledge of the feeding of the soul and absorb directly from the environment from the whole body of the man the energy that is needed, and then feed it back through the soul through the dimension of the physicality. Then you have done your job and you understand and you have done the whole thing.

03:41:54 K: The whole process from now on is how to feed the soul of the man, now that we know it is in the structure of the brain of the man, so that it feeds at the level which is the satisfaction of the existence in the physical dimension. So, we feed the soul so that through the soul we feed the physicality. And those who come to understand this doesn't need to eat anything. Those who go that path understands that the physicality has the connection with the operation of the circulation of the energy within the dimension of the existence, which is the blood of the man, with the operation of the system that circulates it, plus the condition of the environment which is the air. In bringing the two to balance you will find peace with the soul of the man and then becomes the detachment from the physicality.

03:42:47 K: What is said in the past 10 seconds is the key to existence in the universe, and not many people understand. It is the maturity of the soul. And this is the key to be able to exist in any dimension in the universe because as you feed the soul according to the environment which you breathe it, in conjunction with what the physicality of the environment has given you, it gives you the extension of what the soul needs to absorb so that it can release to confirm its existence. As I always said, blessed are those who understand, because that is the secret of the creation in how you manifest yourself in physical dimension, but from now on instead of using the physicality, as I said, *thou shall not steal*, which means to kill a plant or kill an animal to feed yourself, man taps into the universal energy through

his soul so that the true soul and the way he gives the emotion decides the future of the man. Now the same soul releases its energy at the level that feeds the physicality of the man.

03:43:54 K: This is how you survive in space for millions of years. Now you try to free the soul. Find it, feed it, nourish it and you feed the man and the rest. Then you can expand what I call the strength of the soul beyond yourself to the others. In that way, your emotion becomes theirs and that is what I said about the captains of the space ships of the future who have that understanding. It is a gift if you receive it or you understand it first so you can receive it.

03:44:33 K: As I said we have to start with the school's teaching about the soul and the physicality follows, before you are too physical and learn the, b, c's and using the left hand or the right hand. Thank you very much and I hope I answered you. It is nice to hear from you Keyvan after a long time.

Keyvan: Thank you so much for your wisdom Mr. Keshe. I will let it sink in and I will come back.

K: You could have been with us in Austria today but we will see you next time. Thank you very much.

03:45:09 K: Please do not forget that the foundation needs a huge amount of support as we are growing. The donation of knowledge, time and expertise is what we are looking for. And, in so many ways you receive so much knowledge freely it is time to put back into the foundation freely so that others can elevate to your level. Thank you very much for today. Are there any announcements?

Rick: I'm not sure if anyone has any.

03:45:45 K: Before I forget there is one announcement: the EC has released their first understanding of what needs to be done with the planet and with mankind. Maybe next week we give them the teaching time if they decide as the EC to be present, so that they can explain why and release what I call their first communication. Thank you very much. We will see you next week.

Rick: Thank you, Mr. Keshe. That is the end of the 174<sup>th</sup> KSW of the KfSSI for Thursday, June 1, 2017. Thank you everybody for attending.
