v3 Draft

Transcriber's comments

Almost a month behind, this is the transcript of the 185th Knowledge Seeker workshop, 3 weeks after the signing of the World Peace Treaty. There are many thoughts and questions on the development of the new systems on a peaceful planet, delivering the technology of peace around the planet, international manufacturing, and the importance of understanding soul connections in space travel, etc., etc. There are also presentations of technological developments by Moreno in Mexico City showing people are researching and thinking about how the plasma technology can be mixed with the work of Tesla, Miles, etc. The picture is of his experiment demonstrating the production of hydrogen gas... There is also a timely explanation for Azar as a 5-year-old on how to understand the emotions of joy and anger, especially as a New Zealand group has arrived back from Peru with their leader full of anger at unfulfilled promises in regard to production of plasma generators etc. Subjects discussed are in the linked headings following...

Content summary

The Earth Council (EC), Universal Council (UC) and core team are busy in the background to set up what we call the charter of One Nation, One Race, and One Planet.

Mosfeq presents a Bengali perspective

Several governments have developed the zero-time travel technology

The remote line of thought control through the soul is an essential feature

Understanding the expansion of the craft is how the Iranians captured the American drone

If you go back to some of my teachings in the past time, I have always said and I have seen it recently in some of the papers that are coming out, that one atom of hydrogen can cover the expanse of the solar system.

If you want to go beyond the galaxy beyond the galaxial speed of travel then you have to add a 5th core and you have to understand what you put in these two cores.

The teaching as I said from now on goes to a level that not many people except the elite in the world of science will understand and operate on.

Azar has some questions on the soul

The emotions of anger and joy, etc., explained to a 5-year-old

How do I know the strength of the soul?

When we use reactor cores to create a space ship what happens to the reactor cores?

Now you understand that the soul and the operation of the ethics of the soul are the cornerstone in travel in space.

The power of emotion can prevent from freezing to death

[A Connection with South Sudan](#)

[A question on animal emotions](#)

[A presentation from Moreno of Mexico City, visualizing the fields, making hydrogen gas, and working with tesla coils, etc.](#)

[MK shows a video of a frozen mosquito inside an airline window](#)

[Development of International manufacturing](#)

[Calling a day with wishes for peace bearing fruit and motivating the military](#)

[Earth changes are in process, maybe not as we said they would, but happening...](#)

[Klaus from Austria will present important knowledge next week](#)

Transcript

[The Earth Council \(EC\), Universal Council \(UC\) and core team are busy in the background to set up what we call the charter of One Nation, One Race, and One Planet.](#)

11:00 Rick: welcome everyone to the 185th Knowledge Seekers Workshop on Thursday, August 17, 2017, a production of KF spaceship institute.

11:30 Mr. Keshe (K): good morning, good day to you as usual whenever and wherever you listen to this workshop. As usual we try to bring the knowledge a step further as part of the spaceship program and as part of One Nation, One Planet. As you are aware the Earth Council (EC), Universal Council (UC) and core team are busy in the background to set up what we call the charter of One Nation, One Race, and One Planet. This will take some time and they are working on it. We try to hear from them each week for what their wishes are as part of being part of Keshe Foundation (KF) Spaceship Institute. We gave birth to this and all of us as part of KF worldwide are responsible to see this newborn peace unified organization to take hold, to start developing, to start seeing what we can do through the

knowledge we have to support it and expand this planet and through it to allow us in space in a peaceful manner. We try to give space to the EC or the UC each week for what they see and what they wish to announce. If they are present and wish to have representation or discuss anything, they have the authority and then we will carry on with the teachings as usual for the rest of our program. Are there any members who want to bring us knowledge of your work?

[Mosfeq presents a Bengali perspective](#)

13:38 Mosfeq (sp) from the UC representing the Bengali language, which is spoken mostly on the Indian continent: We are working on the charter and the roadmap for the time to come. In this area, we are wishing how we would see the world to be in the coming days. I am speaking because I am giving you a hint where we are headed. Join us with your own wish and your own fields. The community of people is talking so people become aware of where we are going and how we can join together and help all of us support. It will take time, but it will happen quickly as the fields grow rapidly together. We signed the peace treaty. **Peace is a big word and we have to look at more details and add more details like how we disarm our military.**

Mosfeq: How are some abusing other human beings? This is prominent in the world where I am. We see it all around. What can we do to elevate the abusers and those being abused and suffering? Everybody's wish comes together and counts to make this happen. This is a prerequisite--we have to have peace. In addition to peace we have to meet the basic needs of the people and create a means of getting the technology to those in need and this will take everybody's cooperation by having the wish available. This will propagate the ideas. There are many good people who don't know about us but will be ready to accept this opportunity. The basic needs of having enough to eat, having a place to stay and adequate medical care will bring peace within the people. When we achieve that, people will have not only enough of their needs but they can enjoy their lives traveling and doing beneficial things for other human beings and beings on the planet and the planet itself.

Mosfeq: this brings us to the point of helping the planet, which has seen the time of abuse in its own way. We try to correct this with intentions. We have some ways to correct that with these basic things we have to go into

more detail for wishes and implementation at the local level. This is key and basic good conduct, which is the beginning of what we call universal conduct so we can conduct properly among ourselves but others we will come in contact with very soon. My wish is that everybody participates in this wish making this journey from peace. Thank you.

Mosfeq: may I say this in Bengali?

K: yes, please go ahead; it is your privilege as a UC member.

[Several governments have developed the zero-time travel technology](#)

26:20 K: Thank you very much, there is nothing from the EC this morning. Thank you for all your work. There is a lot of work going on in the background with the EC and the UC and members of the core team as they meet on Mondays and Fridays. We bring this up because in the coming time the UC will have offices around the world according to the language spoken. The EC will have places where they can listen and understand the needs of the languages. This structure will take a few months to put into position. This structure takes over the running of operations to meet the needs of their nations and the languages and their continents that they are responsible for. Gradually the members of the councils will have a full-time job for each member as the way. In that way, the members promote peace and bring their wishes to reality for humanity to stay a peaceful race not only on this planet but beyond. The process of the teaching, education and knowledge is going forward and as we see the knowledge is spreading quite rapidly. One of the achievements that has been reported in the last week through the organizations which operate and are in very advanced stages of development of the science and technology is that we have been informed by those who are in operational systems with GaNS plasma units in the KF plasma Magrav technology and they are developing energy. They are developing what they call the quantum energy using the GaNS technology and they have achieved in the past week what we call the separate condition of the flight system in zero-time condition. More details will be released in the coming time. There are people working with generators and power plasma units. This is a breakthrough and beautiful news and I congratulate both the teams that are working.

29:20 K: We have entered a new era in One Nation. We see our wishes to be peaceful taking hold in different directions. For those who understand the

technology at an advanced level this is a major breakthrough. We have seen in the past week the Chinese and American leadership joined to find a peaceful way for Korea solution. In recent meetings of officials and scientists we understand there are a number of scientific groups in the world working and have understood the control of thoughts through the spaceship systems. A number of nations who are and have started see the enlightenment in the knowledge that is dispersed. This is all part of the effort that many people have made their wishes. We will bring more developments.

K: There is a major breakthrough and a number of scientific groups are working and understand the control of the system. A number of nations see enlightenment. We have seen a major breakthrough that could not have been seen a few months ago. We try to teach... (breakup) ... (30.24)

K: We are trying to establish a backup unit. The process is that now we see massive development in advanced levels of science for scientists using this technology rapidly and understanding it fully. We need to enlighten them further so they can understand the process. In a meeting last week, those scientists who understand the technology asked and say they need more knowledge and explanation on the control of the flight systems through emotions, the thought and the soul of the man. Because they haven't reached this point they see the need for it. As you know, a number of nations have achieved different types of development in the space technology and are using the technology in different ways. We see (breakup).... (32.15)

Rick: He is in a mobile situation and is trying to see up two systems so he will come through. We are having some connection issues... (Long pause)

35.49 K: We might have some difficulties today. We see that NASA has moved into the plasma technology propulsion for the rocket technology. In a way, the next step is for them to join the other world leaders who have now broken into plasma technology through the Magrav science and technology. These things will consolidate with a number of nations in the coming months with this new technology and what we call zero-time flight plasma system will reinforce the renegotiation for world peace and the world peace treaty as this makes it essential for governments to step down from their present position. This means in so many ways that governments have to renegotiate for peace. The flight time now is in a very, very limited window

in what we see now and you can go from Moscow to Washington in less than 10 to 15 minutes. **We met with officials in the American government years ago. When they I asked me in an official meeting how we managed to capture this and that, we explained to them in a very simple way that we cross their nations without their knowing what we are doing. This is the advancement of the technology and now we see that 2 or 3 nations have achieved and are on the path to achieve this technology in the true essence of what is developed and what is available.**

37:50 K: You will hear our teaching from now on will be on advanced stages. We have to teach to support the nations that have reached this point. Many people might sound to you slightly too advanced but this is how your nations have developed. We are responding to the scientific demand because we have opened a channel that many world scientists understand. In the coming time, we will explain more as we come into arrangements of how to disperse this knowledge. As it was announced in the last 6 days since last Friday, the Magrav systems flight has been done and now we have to understand that this is going to take rapid steps in releasing for use by a number of nations for their advanced technology.

39:00 K: There is one agreement that we have made with the governments that we give 3 to 6 months' delay of lapse of any joint achievement disclosure. This means that from now on whatever is developed with the nations that we work with, no technology will be released for 3 to 6 months. This is the agreement that we have. The nations will take part in time and then the knowledge agreement will be dispersed and shared. This has to be this way as they are investing huge amounts of effort into this kind of development.

[The remote line of thought control through the soul is an essential feature](#)

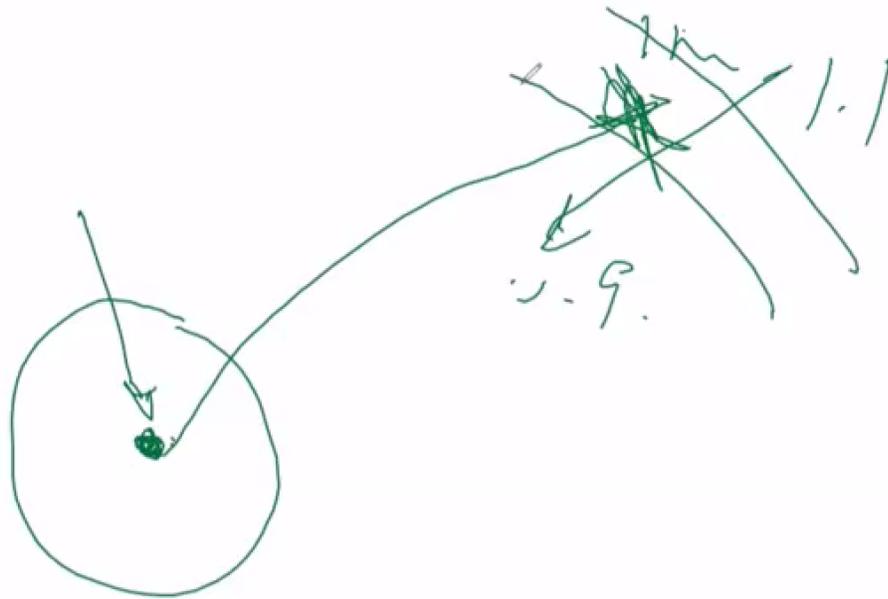

39:39 K: What is important for all of us to understand is that the process change, understanding the change and of the work of the plasma through what we call the soul of the man and the emotion has become part of the need for the present space technology because the present atomic systems cannot handle this as we explained before? One of the reasons for these kinds of operations and understanding is that we as totality can follow the procedure. This is one of the most important parts. Our scientists can follow

the procedure to be able successful in launch and control and at the same time in reverse operation to return back. It is very easy with this as we have taught before to enter the departure and the biggest problem is returning back. How do we return? How do we manage to be able to produce and submit such a process? This is for all of us to understand this process; it is important and it is absolutely vital that we understand this process.

K: As we all know the development of materials was easy for us. We achieved (breakup).... we achieved this in a drastically easy way. Many of us as knowledge seekers were not aware as how and part of our knowledge of how easy and important this was that we achieved rapid development. We had to achieve rapid development. Those in the scientific world who work around the foundation understood this and grasped the concept. They did the whole structure to achieve lift and motion. BUT when we want to return back it is a different ball game!

42:24 Launch and creation of the magnetic gravitational field to create separation has been seen when people lost balls from their system. Now we have to understand how it is and how it has to be a step before you take off. Before you become a space man, you have to understand how you have to plan your whole system in organization of the space travel.

42:55 K: This goes back to the agencies that are advanced and move into space travel. In your systems when you achieved zero gravity in the way of propulsion through the mass you have calculated and you have to calculate a slight deviation from a central system mass field gravitational, more than a field magnetical. What this means is that you have to add to your system a process of limitation at least to begin with. You decide the limitation of 100,000 or 200,000 or 1,000,000 kilometers. (43.45). Then what you do is you set your gravitational magnetic field to the calculation of that point in space from the distance from earth. This is because your Magrav system is set at 1,000,000 kilometers gravitational magnetic field calculation. It is somewhere between 1 million and 1.2 million and 9.9 million kilometers that you will find your satellite positioning. Then you have ... (lost contact)

4:36 K: What you have to do is to reverse the gap of the magnetic gravitational field plasma to the position where you launched it. This means you can get your system back within a few seconds. Then you have to adjust your system that at a given position of 1,000,000 kilometers, you can achieve a balance through your thoughts. You can recall back the positioning of the entity where you launched the system. This is important for the space scientists who are working on these fields to understand the process. Most of the scientists, most of the problems from now on will be the loss of your launch system. This is the loss of what you call your satellite, your space system and everything else. So, it is important for those of you who work in this field to understand at least initially to start with the positioning of the magnetic gravitational fields.

45:55 K: Your governments have this data of the position of the magnetic gravitation fields at certain distances from the earth. It has been calculated in previous research. You lock your field strength in the balance between the magnetic gravitational fields to the central gravitational system of the system to the ground zero base and to the distance point gravitational system. At that point as you are the controller and you are the person who has initiated the flight through thought and you can reverse the process from magnetic to gravitational to balance back at the point of departure. The process is

through your thoughts that you reverse and you have to train your line of thoughts in what field you have accessed the energy transfer and to what field you withdraw energy transfer in magnetic gravitational field strength energy and not energy as power that you understand.

47:07 K: The remote line of thought control is a major breakthrough for these scientists. A number of these scientists have already been working and a number understand what I am explaining. In this process before your flight try to understand to focus on the space time/space launch and the space gravitational magnetic field in respect to the gravitational field of the inertia of the land or the position you work on. This means that you add into gravitational through the field strength not using GaNS or liquid GaNS. The process is very simple. You have been able to reverse the line of thoughts and emotion to the line of transition and transportation and reverse back.

[Understanding the expansion of the craft is how the Iranians captured the American drone](#)

48:08 K: This process was understood by the Iranians who captured the American drone. Now you understand how the advanced technology is already applicable. Now we understand that a number of nations are developing and have developed the next step and we give them the full support and training and the full knowledge of the control of the space. Then it comes with the expansion of the spacecraft. The expansion of the size is entirely dependent on the operator. You can expand in two ways. You add a second operator in the same line of thought, which means you can increase the size of the space ship to double the size. You can add a 3rd or 4th operator, which means you can expand beyond dimension. For those who understand this is (done) by increasing the limitation of the boundary through the operation of the increase of the magnetic gravitational fields of the top reactor.

49:22 The top reactor now dictates the size where the bottom 3-star formation holds on to the position of the whole totality that keeps the structure integrity intact. This means that the number of rotary reactors on the boundary of the spaceship has to be changed in strength through the line of the thought by the second operator reactors. They do not interfere with the central line but they expand in the matter of the dimension increasing the

height at the same time the 3rd and the 4th operators decide to control the volume of the expansion of the ring.

50:09 K: For those scientists who work in these fields now this means the coordination and training of the officers who through the operation of what we call the soul have one aim, which is expansion of the knowledge with a peaceful manner of operation. In a way, we train a number of people who think, live and work under the same ethos. In this way, you can expand as the numbers increase. Those of you who work in space technology at a governmental level understand every 10 meters in expansion in the new structures allows after a certain limitation in the order of magnitude to the increase of a certain number of payload amount by what volume. To control the system from the internal gravitational field, the main operator stays in position and receives the energy and information and you have to train these kinds of operators to never lapse to what we call the state of sleep because they receive the totality of the energy they need from the operation of the system itself.

51:40 K: In fact no cellular body cells consume any energy that they need regeneration or need to rest. They receive the energy as they consume it and as the whole operation is running. In the operation of these controllers that you develop stay on position more or less all the time. This is because you understand that in space there is no 24-hour cycle - that is the habit of this man on the planet. We don't have a Sunday, we don't have a Saturday. We don't go on prayer Friday at lunchtime to a mosque. The total operation stands in a way on a continuous basis when a man, person, or entity accepts to be in charge as a controller and is a controller for life. This is how it operates unless there is a hand-over.

52:44 K: **The 3rd or 4th or as you increase the number of operators to increase the volume if the spaceship, you can increase to multi-thousands and millions of people in transportation.** It is important for those that are not operating to understand the other system of restriction and limitation of the return of the craft. It is to convert at a certain point in space-time from the earth into gravitational magnetic fields of the medium of the space, which means that the physicality becomes irrelevant and the soul of the entity becomes part of the craft. In this position, the number of passengers' transportation is limitless because now the physicality is beyond the condition of the fields of the solar system. **You have to understand for those who take the next step, now you create the condition of the**

universal plasma gravitational magnetic fields that do not obey by the rules of the planet earth. You create a condition which as a soul strength has the strength of the source of origin which is earth but in the physical dimension has no tangibility in deep space unless the soul decides to manifest itself in that dimension.

54:15 K: [If you go back to some of my teachings in the past time I have always said and I have seen it recently in some of the papers that are coming out that one atom of hydrogen can cover the expanse of the solar system.](#)

Now you understand the meaning of it. According to the number of the souls the system is set to carry, the number of passengers will dictate the volume and the numbers. The more you work in understanding the system for travel in deep space, the more you can decide or the space of the number of the souls dictates what can carry according to the satisfaction and happiness and what we call the acceptance of all the souls within. So, one spaceship can carry one soul or as many as you can imagine in the galaxy.

55:20 K: This is the beauty of non-dimensional physical entity dimension travel into space. We are entering a new era in totality of understanding of the space travel. This means that our physical body beyond the dimension of the space of the earth is dictated by the environment of the gravitational magnetic fields of the universal strength condition. We don't need to carry physicality even though we have the feeling and even though we have the understanding of our presence to the point of manifestation. Those who choose to carry a physical body during the travel in any dimensions will have a very slow way to travel compared to what you can travel beyond the speed of the imagination of the man. So, the physicality in the space of the craft is the limitation of the speed and the limitation of the numbers you can carry. When you travel through the strength of the soul of the man through the intention of delivery there is no speed because then you decide the speed of travel.

56:43 K: For those organizations who have been testing in the past few weeks on this manner understand what I have been teaching for the last 10 minutes and where you have to start and where you have to understand to develop. **You need to add a 4th core and this is essential for your connection and your development to go a step further to add the 4th core**

into your system. The 3-core system was and is good, but when you go into the space dimension the 4th reactor core has to come into operation.

[If you want to go beyond the galaxy beyond the galaxial speed of travel then you have to add a 5th core and you have to understand what you put in these two cores.](#)

57:40 K: Those of you who have managed to achieve 3-core operation, now you have to develop the 4th core operation that allows you the dimension of emotion. You have to understand the reason why you do this. In your flight system if you do not add the 4th core dimension, the emotion will not be accounted for. Then you have to decide what you load into the 4th core. In the dimension of the space and the strength of the reactor depends entirely upon the sincerity of the soul, which dictates the 4th core.

This is why if you go back to some of my teachings in the past, I said we trust to give our souls to a captain whom we know to be correct and in a way nurtured, looked after and trusted to be given to. The space technology on the level of the soul is totally different than getting into a craft. In a way, you as part of it because the energy you put into it is the energy of the soul of the man and becomes part of the operation of the balance of the system of the man in deep space.

59.05 K: The space agencies that have moved into what we call Magrav plasma technology in space travel, who have been taught by us in past months, and are testing it have gone one way. Try to get your satellite back; as I explained, you should have planned it before you depart. You always have to create the point of reference from the point that you can always manifest yourself and dictate back to the position of travel or dictate the position of the arrival prior to the departure. At that point, you set a new zero-point departure.

Those of you who achieved quantum flight in the past few days; you understand exactly what you have to do to bring the operation of control under observation. I know you are listening and this is the part you should have decided before departure and before you tested. We hope we have managed to recapture but zero time travel you have achieved is a great achievement and we congratulate you. You have to understand the next step

in the process as I explained word for word. I know in your technology that you do not listen the way the others do and you understand the essence of the teaching. This is a gift to you to go to the next step. I will teach you publicly so the others will understand what they have to do so they can achieve your position.

01:01:10 K: In your process that you structure always consider a 5th reactor core. I will teach you in the future why you need it. In that 5th reactor core it allows you to take the shape of the environment you have so you do not lose much. But you can gain position of it and in a way, you can return back to the original of what you created. It is important that you understand the reversal process through the 5th reactor. The speed positioning of the 5th core, not the 5th reactor, essentially allows you to dictate the direction of the motion, landing, conversion, creation of understanding of the emotion and the repositioning at the point of the space of the arrival where you always allow departure in a rapid way through the strength of the soul of what you call your controller. You have 2 flaws in your system in the last week. In the coming time, I will teach you more. You should have listened when I was teaching you and you misunderstood one step. You should be able to manifest it to be shown.

01:02:56 K: Going back to the normal teaching... for those of you who understand the process of the operation of the reactors it is important from this stage to realize that the control of the speed of the gravitational and magnetical - conversion from one to another - will become the cornerstone of man's flight in space, of the creation of energy, of production of materials, of reversal of materials, of being able to cover a vast environment through your wish and through the operation of the reactors which are in so many ways been given and have to be allowed to create the transportation in dimension of the strength of the fields.

01:04:02 [The teaching as I said from now on goes to a level that not many people except the elite in the world of science will understand and operate on.](#)

K: And we have to allow them to move faster so that in time they create a much wider horizon for the others to understand. The process of the production of fields through non-material condition and dimension becomes the cornerstone of the flight system and feeding systems. In space, we go

back to understanding of the operation of the human body where it receives 80% of its energy through the environment and converts it. We know the process because we live through it. In that process, we have to understand the operation and strength of the fields that we need to create out of matter state out of the fields in the universe in our bodies and at the same time be able to release the energies which in the matter state in our bodies are not used. Then the systems like the large intestine and kidneys are not needed, and this existed when it operated in the womb of the mother. What we never understood and now it is time to understand the totality of the operation.

01:05:48 This means that ‘you need what you absorb’ is dictated by us and not what the environment provides. This means that if we get to this point the other 20% of what we eat as food and what we consume as air becomes irrelevant. Now we have created and have understood 80% of our body that we are not aware of, and it allows us to absorb energy through the environment of the atmosphere of the planet, if not available through the strength of understanding what we taught much earlier on going to the more central point of the fields of the plasma of the soul of the man to reach beyond the solar system and absorb energies that are needed for our survival from the boundaries of the galaxy.

01:06:50 K: Because the spectrum of the energies we need to live exist in all corners of the universe and this is how you don’t need to eat. If you understood this is how systems can be developed and when running these systems, we can make man not to feel hungry but to receive all the totality of the energy it needs to function as a being in a normal condition on this planet. The new system as we have discussed with governments will be released so that in a point of disasters the whole area can be fed through the systems with what they need. There can be delivery of medicine and the delivery of the technology of the shelter now that we have moved into the advanced stages of the field plasma. These things become much easier to become able to be developed and to be able to deliver. It has made it easier for us to be able to teach the elite scientists of the nations. It is for them to filter the knowledge as they learn it with 3 to 6 months back to the public domain.

K: You have to extend your knowledge to the point that now what you have tested with the Magrav systems we have seen the energy and we have felt the fields of the energy of the systems. Now every man should be able to

call upon the strength of the fields that he or she needs to be able to keep the soul at the point of satisfaction. Now you understand the clue: the point of satisfaction and the need of soul of the man becomes the absorber of the energy of the universe for it to feed the physicality of the man. This is one of the ways to survive and one of the ways to be able to absorb. In a way, you make your soul in the way of creating demand by the depletion of giving so that it receives what it needs to be able to nourish the physicality of the man at the point of the inception of the point of the physicality and at a point where it needs or wants to manifest itself or receive energy so that it can keep itself in the manifestation of God.

01:09:55 K: This is the presence of the physical existence of the man at the point of its observation. This means that at anytime you exist it is the wish of your soul to be visible to the others. The soul of the man dictates the presence of existence of the man and the confirmation of the presence at the time and the point of the position. When the soul decides to end what we call the manifestation of physicality in the dimension where it is not needed, this is what man calls the death of the body of the man.

01:10:36 K: When the soul reaches the point of maturity in its presence or by accident reaches the point that it can back on the energies to separate from physicality which reaches the point of self-sustaining maturity that is time when the body becomes separated from the point of its soul. **Then the soul has the freedom to manifest itself in any dimension across the universe and is not restricted to the physicality boundary of this planet.** To understand this then you understand that no man needs to have worries about food, sustenance, shelter, existence and energy in the way of transformation and transportation from one to the other.

01:11:40 K: It is important for us to understand and if you understand this we will find out as was said by a member of the UC no one can abuse another as you can receive what you need the way you need it so that it brings satisfaction to the soul of the man. The extension of the knowledge from now on may sound like riddles to many of you. Those who are advancing rapidly understand and understood most of what is said and what they were missing to develop in their technology. The spaceship systems development of non-tangible systems that they become tangible at the point of manifestation and the desire of the captain or the man who is in charge of

it will be a common feature in the operation of the transportation, sheltering and any other thing that man desires. This is the breakthrough.

Governments ask if they can go to the next step and the answer is yes. This will be taught rapidly. Transportation through emotion, the essence of understanding and thoughts will soon become like bread and butter on any table. Any questions?

[Azar has some questions on the soul](#)

01:13:27 Azar: good morning, Mr. Keshe.

Good morning Azar-jan.

A: I don't have a question about travel, but I missed two workshops and I have a question about soul. Can I ask a question about soul?

K: Have you found yours yet?

Azar: Mine is still here; it hasn't gone anywhere. When we are born, we decide on everything. I was thinking the other day... when we decided we have a limitation of our parents, grandparents and all our generation and we couldn't move beyond what was available such as being the African man or woman. That was not in my ancestry. Now in accessing my soul I don't have that limitation. Am I right?

01:14:25 K: Yes; because now you decide the limitation. In a way, as when you go in space and you manifest yourself at the time and place when you want to manifest yourself, that freedom of the time of the soul will give you the same freedom on this planet and now you know how to operate. We will see many beautiful people on this planet because they all want to be beautiful. Beauty contests will have many winners.

Azar: OK so now when the whole planet becomes peaceful like we are doing with the universal community what is going to happen to planet earth? Will it no longer be the nursery for humanity?

K: It will still be a nursery and maybe a worse nursery than before.

Azar: Why?

01:15:21 K: Go back to the word of the creator. *I made man that he may bear children, that they may love me.* This means the more we find we can love the more we want to create that they may love more people to be loved. The problem is not that we will not be many. The whole process is a learning process as we grow. First off, all time limitations of 100 to 150 to 300 years for physical living in the dimension of the strength of the soul will become normal reality. You have to understand that even 500 to 1000 years in space in zero time is too short.

Azar: Also ... So, on the planet earth as a nursery it will go from kindergarten to a universal nursery. Am I correct?

01:16:35 K: In so many ways we waste time and we become more advanced because we realize that many things we considered to be the essentials and the basics will not be there because we have already satisfied that.

[The emotions of anger and joy, etc., explained to a 5-year-old](#)

01:17:10 Azar: When you talk about the emotion of the physicality and the soul, when I think about the emotion I can talk about joy, love, anger, sadness, which are the emotions. How do we differentiate between the emotion of the soul and the emotion of the physicality? And then many times you talk about filtering of the emotions and I still don't understand this filtering. Can you explain it as though I am 5 years old?

K: Let me think when I was 5 years old and I felt the emotion then I will tell you so you can understand. You carry the emotion through your soul; go back to the understanding of the original definition of 2 plasmas. In the positioning of the earth where it is now in comparison to the sun even though in the ratio there is a huge difference in field strength and mass, that gives earth the position where we are now in this solar system. Now when you have the emotion of the soul, the strength of the fields of the matter state, the GaNS state of the brain creates a balanced position like a second star to your emotion in the soul at the same strength. But this is of the weaker volume. In that point where the balance finds the position and let's say it becomes the strength of **joy**.

With the **anger**, it is more gravitational than magnetical but the magnetical is the same as the one you had first. Now the position changes but the feeling stays the same but this time you need more to receive so that you have the feeling that you had before. Otherwise you still show the same strength.

01:20:00 K: The position of anger in your physicality becomes the smaller of the two systems of plasma that they need to feed each other. At that point, in your brain, the filter of the fields from the center to there has become the field strength you need, of filtering that you need, to gain such an emotion in that point of the brain. This can be explained in a way that for example certain field strength in the brain leads to the creation of migraine. If the two in balance cannot find their position then you will find every time the same feeling has been created and in a given time, it leads to the migraine. We understand the same emotional feeling creates all the time the same migraine, and some say the food causes it. But in fact, the field strength of the food you consume, if it is of the strength of the emotion then you get the migraine.

K: If you do something which creates the third position in comparison to the two positions that gives you the normal condition that depletes what we call the satellite in the physical part of the body in the brain of the man. Then you get a migraine also. For someone to explain and for someone to understand is a different ball game. They don't want to understand the reason for it and they prefer the tablets and everything else. They don't want to understand the reason for it (the migraine) because once they understand the reason there will be no migraine. The cause of the migraine is the man himself who doesn't understand the positioning in sharing the fields. Would man have the migraine in space? Most probably yes, if he follows the same structure of comprehension on this planet. The origin of the soul from earth carries the essence of the creation of the amino acid, which then does this creation. That is how we know this planet is earth or this planet and that planet are from the same area, or the same person. It becomes very easy to read.

[How do I know the strength of the soul?](#)

01:23:07 Azar: Also... You talked about the strength of the soul. How do I know the strength of the soul? ...what limit it is and how do I understand it? Do I understand it? What are the signs? How can I measure it?

01:23:32 K: By testing and trial you will see. Stand in front of the mirror if you understand the process and carry it out, you can change the color of your eyes by the desire of the beauty and what you want to interact with. I know a number of people who do this. You can change the color of the spot on your skin. Many people don't realize they do this.

01:24:24 Azar: So that is how you measure the strength of your soul?

K: It is a good exercise to start to understand; you have to start somewhere. It is a riddle to many people. As more and more develop the space technology, the more crafts that are built and the more tests that are done then people start to see what is done. Maybe the neighbor has 2 or 3 of them. Then they start to understand. Not many of us need the method of transportation as we choose today or even walking. If you could understand, it is the soul of us which creates the positioning... no man will walk from one place to another.

01:25:21 Azar: Actually, I am trying to see if I can travel with my soul. So, then I could see my parents on Sunday by going to Iran and coming back.

K: Why not? Don't work in the physical dimension but initially work on the strength of the emotion and then see if they can feel it and then you know you can reach them. Then the next time you go in a deeper way in the strength of the fields. When you speak to them don't let them know because if you tell them you will have achieved nothing. But if you come to understand that through their talk they had the emotion you thought of, you tick the box, then next time move them from there to there. You call your parents and they are in Tehran and you say that you wish they were in Esfahan or whatever in the way they could take pleasure in what they wanted.

K: If the soul agrees and the strength is done then when you call them next they have had the satisfaction of 'being in Esfahan.' Then you feel it and you start building it up. Then you can be anywhere; you can be in Tehran or you can be with them anywhere and your soul presence gives them the pleasure of the physical existence and manifestation. Try to become

detached from the physicality and then you will understand. This is not to kill yourself, but to understand the soul is free and now that you know it in the space of the brain of the man it has taken...leave a line of connection. That is the test. I hope we can teach more and more people in the advanced way of the knowledge of the soul.

01:27:34 Azar: Then I can have lunch with my parents in Tehran I will let you know.

K: No problem, we will 'see' you in Tehran. Any other questions?

[When we use reactor cores to create a space ship what happens to the reactor cores?](#)

01:27:58 Rick: A couple of people have their hands up. I have Ralph and I know him.

Ralph: Good morning, I sent something to Rick. Can we use what I sent?

Rick: We can't use it because a lot of it is copyrighted materials. I sent this by email. We can't use the pictures or the references. You will have to change this to your own words or get authorization from the authors.

1.29.00 Ralph: I am not clear about when we use the reactor cores to create a space ship. When the spaceship is created and comes into existence what happens to the physical path, the reactors? Say it is in Arizona and if that comes to existence and the 16 reactors are on. When the space ship is created what happens to the physical structure of the physical reactors?

K: I am here, I am listening. I heard you. Try to answer your own question?

Ralph: when we use the reactors to create a space ship like the one in Arizona what becomes of the physical reactors? Are they still there? The spaceship takes on a living form and responds like a living thing and responds to your thoughts and emotions. Does the space ship encompass those still? I don't know how to put this.

Rick: Perhaps you can rephrase the question and maybe that will help.

K: If you rephrase it, try to understand it; we are trying not to spoon feed but to enlighten. Where do you see the problem?

Ralph: It's not a problem; I was wondering what becomes of the reactors. Are they still in the space ship?

01:33:09 K: This is a good question but I will respond to you in a different way.... The container core matter state is irrelevant and it is for man to think and to see that if I put a core in it the fields are in the core. Go back to the full understanding of the teachings. The plasma carries its own strength and its own dimension. Physical matter state cannot contain any plasma. This is what we have said before; the whole structure of the plasma is only for the satisfaction for man's understanding that he has something somewhere. The containment of the fields of the plasma is dictated by the environment. That is why you go to the 4th dimension. The plastic or metal cores we put are just a gimmick so man can understand and confirm that he has done something.

Ralph: OK, I didn't remember that you used that kind of analogy. So, it's a temporary thing to create the plasmatic fields.

01:34:56 K: We have to learn and the wiser we become in the teaching you will find there is not way to contain the GaNSes, the plasma, the fields of the GaNSes or the fields of the plasma by physical matter containment by plastic core or a glass core. The field plasma matter at the matter strength is low on strength the glass cannot contain it. If you understand this so is the level of the brain of the man has no physical containment. We have a skull so we can feed the production of the cells that the filtering as we call it can maintain and feel the emotion that we felt at that point. The reason we have the skull is to see how fast we can produce cells and create such a filtering field strength of manifestation. There is no other reason.

Ralph: That is what I thought. Thank you.

[Now you understand that the soul and the operation of the ethics of the soul are the cornerstone in travel in space.](#)

01:36:16 K: Thank you very much. Now you understand in the teaching when they say "he goes into the souls and the ethics" and now you

understand that the soul and the operation of the ethics of the soul are the cornerstone in travel in space. The scientists in NASA said they would support me if I didn't talk about theology or God. Now you understand you cannot go into space without the operation of your own soul. It is the operation of control. They can stay in that level and we see these scientists falling far behind in the space race. They are far behind and beyond the imagination of the other nations who are highly evolved in the space travel in the plasma technology that we teach. They are still looking for the dimension of the physicality and the speed of light becomes the dream that they will never be enlightened. NASA is falling into that trap very rapidly.

K: They paid 10 billion to the Russians to find out how to land on the land and not the sea. This time they have to give the whole of their national assets to be able to understand how to travel without a system of control of the computer. This is how the space gap in the knowledge is building up and we sit with those who understand the dimension of our teaching. Understand that a glass, plastic, or ceramic ball has no match for the strength of the field of the plasma. If the plasma of the sun can pass through millions of kilometers and then pass through a dynamic containment field plasma of the earth and still reach us then we understand how we have to show you the containment of the plasma with the plastic. This is the way to understand. Now you understand the field of the plasma in the reactors you create is controlled by the dimension of strength of the soul of the man and by the fields which he enforces to land it.

01:38:56 K: There is no need for cores or motors but this way is physical so we teach this way so the man understands. A number of scientists in the scientific world have moved to the dimension of understanding. Now we teach at the new level and they graduate and reach the further level faster and we teach the system. Containment of the plasma is only by another plasma and nothing else. The condition of the strength is from the gradient at the point of contact to the further point of the strength of the plasma containment. Otherwise you cannot go. The brain of the man is made of GaNSes and that is the only reason we can hold the field of plasma to a certain limit. When it passes that limit, it becomes weaker and then it becomes controller of the physicality.

01:40:05 K: Look at the structure of the brain of the man. In the center, you have emotion of the highest order that man has not even understood this operational center of this part of the brain because he has not understood the

strength of the plasma. As he loses strength and he goes farther out, according to the shape and the distance then it becomes partly emotion and then when it goes really further to the fringes of the brain which is near the physicality part then we say this part of the brain is the control of the arm and the legs and the rest which is the physical strength of the condition of the plasma.

01:40:39 K: If you understand this you tell me where the containers are for emotions of happiness. The embodiment of the fields of the GaNSes of the brain cells create the layers of filtering of the strength of the core level that allows to go from higher order emotion to lower order physicality which is the control of the arm, the leg and the rest of it. That is why when the strength of the emotion is higher, it cannot be understood or accepted by the soul and the release of it leads to the stroke and all the physical disabilities. Once man understands this, then man understands that any disability can be reversed. Now you create the fields from the outside to the strength of the physicality to be able to change it. That is why our helmets and our processes especially like we saw with Naomi work. We substitute from the outside, which is the lesser point of resistance to the dimension of the acceptance of the field plasma that allows the physical correction. Now you understand how the technology even works. Maybe those in the world of medicine will understand why we put the system outside the filtering from inside to the liquid and the water. We change the environment of the plasma of the body of the man.

[The power of emotion can prevent from freezing to death](#)

01:42:20 Ralph: I wanted to share a story about the power of the emotions and I read a true story about a man who was in a container and it was refrigerated like one used for shipment. He accidentally locked himself into the container and they found him dead sometime later. The story is that when they found him, he died from the fear of freezing but the unit was never turned on. But he was frozen. I thought that was interesting to show how the emotion works on the human body.

01:43:25 K: I am trying to find something to explain something. I was on a flight recently and I observed something like a mosquito and when the plane took off at the high altitude the mosquito froze between the layers of the window. I was too busy to observe the rest of it and I wondered how many

times this little animal has been frozen and defrosted and still carried on with his life. I have the picture of it; it was between the outer layer and the first layer of the window of the aircraft. The animal learned and had no fear; he knew he could be defrosted and come back. Let me see if I can find this. Let me see how we can get this out. It is amazing how this animal survives in the two layers and the outside goes to minus 50 or 60 degrees and the animal freezes. The mosquito has no fear of death so that it can operate in that level. Let me transfer this to somebody into another part. This is a marvel of creation and this is amazing that this animal has no fear. I made a video of it.

01:47:26 Rick: I can relay a story my mother tells that when I was a child I would put flies in the freezer and see if they would come to life again after freezing. I noticed how flies would show up in the early spring and they were fully developed and I thought they would thaw out in the sunshine and come back to life. It would take the frozen flies awhile to get their bearings and then fly away. My mother was perplexed on how there were flies in the freezer and I had to disclose my experiment. She wasn't happy but she understood my quest for science.

(Pause.)

[A Connection with South Sudan](#)

Q: This is Heber (?) Can I come in shortly from South Sudan for a greeting?

Rick: It might be a good time.

K: This is being sent to you on Zoom. First of all, you said you are coming from the conference in South Sudan?

Q: Yes, Mr. Keshe, greetings.

K: I have seen the report and it is amazing what you have done and I didn't know that people in South Sudan knew about the KF work.

Q: I had contact for many years through the French in South Sudan. One professor would like to give a greeting from the University. We find this interesting in the plasma and peace technology and the University of South Sudan would like to help boost the community because education is one of

the tools for peace building and bringing the peace in this country. We hope to bring a Keshe facility this area and establish a foundation in this country and to relieve the suffering of the people. We are giving a special appeal to help the people of South Sudan to send ideas across the country.

01:52:00 K: Thank you very much ... We will respond accordingly from KF and thank you. Universities around the world are responding for scientists to understand this technology. We will take this back to the councils and we will respond accordingly. I am sure we will respond very fast in the request for development. The KF worldwide is committing several billion dollars in Africa in the coming time and especially to change the situation in South Sudan and war. We will come back and teach and establish factories in South Sudan and we are very aware of this position. We will work through scientific organizations and universities and this is one of the best ways to disperse the knowledge. Thank you very much for understanding the technology.

Q: We have representatives from 5 different ministries in the conference.

K: I read your link and I was surprised. I said to Carolina this morning that we have even reached South Sudan. I consider Sudan as one of the major operations and I have seen how Sudan especially Khartoum has changed through the work of the Chinese government. I watched Sudan closely and I understand the separation of the north and the south over religious grounds, which was a big mistake. The story was decided by those who plan the future wars. But now that we become One Nation we come back into South Sudan to bring you back. Thank you for your work and hopefully when you are back home we will meet and I will tell you about the guidelines for South Sudan.

Q: Thank you very much.

K: Thank you indeed. Can you establish a core team that we can correspond and work with through the universities? Through them we will support and we deliver. We have earmarked fixed financial development for each country in Africa. We are carrying on the first one in Ghana and then we will do more countries in Africa. Thank you for all your work.

K: Let me try to forward this video to you of the mosquito in the plane window. I might be able to do something different with it. If we cannot do this, we will try it next week. Let me send this to Stanley.

[A question on animal emotions](#)

01:57:30 Q: Mr. Keshe is it not strange that the animals have better control of their emotions than the humans?

K: In a way yes, the emotion is different in the smaller animals and is not the way we understand it. The strength of the soul is and the pain of the fear exists but the laughter does not exist so it is more concentrated on 2 or 3 emotions.

Q: The guy in the freezer thought he was going to freeze to death and he did.

01:58:20 K: Yes, but go back to the history of flights from British Airways from India into London Heathrow. This still happens every now and then but as frequently as a few years ago. A few years ago, when the jumbo jets were flying from India people would sell tickets for the carriage where the wheel goes up. They used to put them up. Every now and then when a wheel opened up a frozen body would fall out. A few years ago, a guy traveled and actually landed alive. He wanted to land alive and live in England. His wish was to come to England. The court said if you went through such a thing to get here you deserve the right to be here. They gave him a British passport. This was common in the past. Many things are carried through air transport and there are those who have survived it, their wish was to be or to reach a destination. The fear is one of the first points of life that they let go and they raise their strength to joy, which has a higher energy force. It feeds more and is a giver. Fear is part of the strength that takes. Joy is a giver and gives for itself through the cycle of the human life. That is why some people survive when they convert fear to joy. If your mission, destiny and emotion are stronger for what you want to do than your physical condition you can achieve and do this.

02:01:26 K: It is what I can tell you first hand as an understanding and not a fear. I had broken bones. To me I still had to do things so I got up off the floor (ground?) and started walking; I couldn't feel the pain and I knew I had to do things so I was walking in the bushes. This is the problem when we go

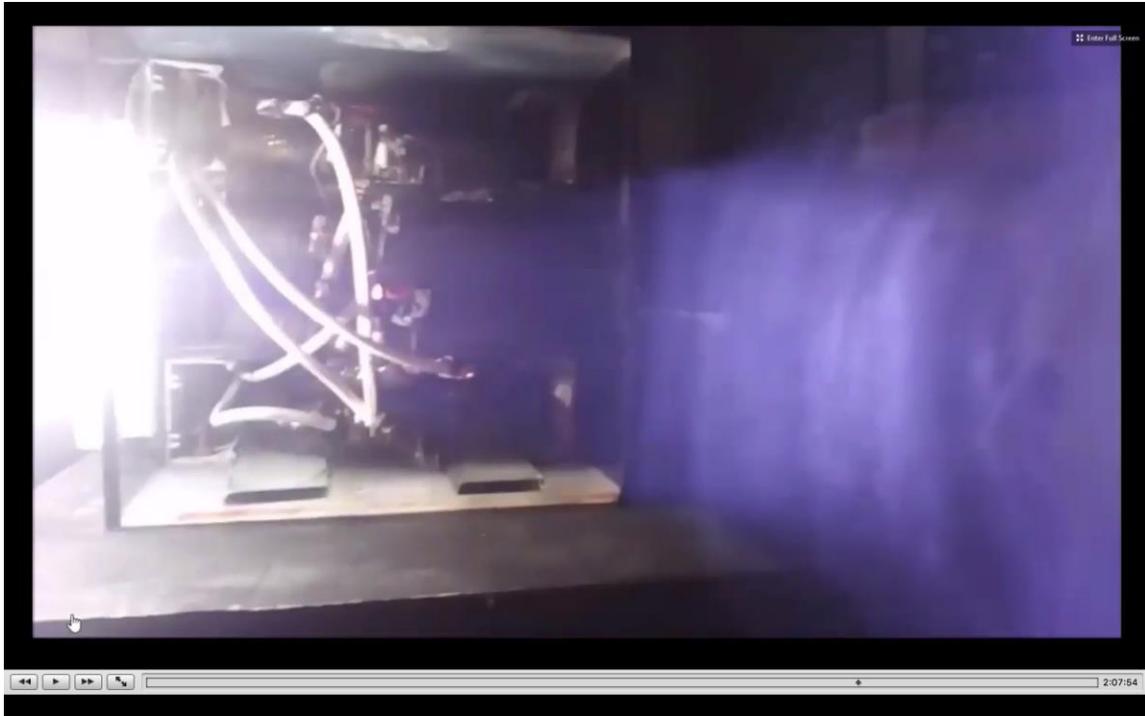

to space. In space, I have said a few teachings ago, if man realizes that in space he doesn't need the suit to stay alive, he won't strap himself to a system. The fear of being lost in space causes the death of Man. Man will survive in space without the suit; our bodies are made of the GaNS. The GaNS cannot be frozen. We can slow the emotion for it. Man in space will never die; it is impossible unless there is the fear. In a way, we cannot hold the energy of the fear and the neutrons explode. The absorption of the physical part of fear is the cause of our demise and not the condition outside. If you have escaped from a country or had to find a solution to survive, you become stronger because of the energy you absorb and you can in fact come out. This creates a new dimension and that is why we become stronger through the conditions of the life that we live.

[A presentation from Moreno of Mexico City, visualizing the fields, making hydrogen gas, and working with tesla coils, etc.](#)

02:04:37 Moreno from Mexico City: thank you for your big effort for peace in the planet and for the support from Miss Carolina. I want to share some information because I made a Magrav and the fields that give the Magrav have motion and I would like to show these if you give me the chance to share. Here is a photograph and I have several Magravs.

02:06:42 Moreno: Right here in the picture we have a spectrum and we have several fields. In this case, the motion of the fields is static. In another one I made the fields are rotating; let me show you.

02:09:09 K: do you see these fields with your eyes?

Moreno: no, just with the camera.

K: One of the ways to do this is more or less if you can create the moisture on a glass and then you see the shape of the freezing. We see people are testing their fields more and more this way. This creates the crystals in the open space and you see the field force. I have seen some ingenious ways of showing the fields in the environment. Arizona is testing the fields of their emotion and the fields of their space systems.

02:10:35 Moreno: I made a prototype to have hydrogen with GaNS and tubes with copper nano-coated copper tubes.

Right here you can see in the center the nano-coated copper tubes in 3 sizes and outside I put aluminum paper and I added the liquid that I have for the nano-coating of the caustic soda and potassium. I put 30% of the blue liquid I have for nano-coating liquid and 70% for the different GaNS. I have the results to receive hydrogen without electricity for about 3 hours.

There is an aspect of fire. Did you see the yellow color of the fire? You can see the gases of the hydrogen. Did you see the color of the fire? It was yellow. I am pretty sure that this combination is giving the energy in the smallest scale for the color of the fire. I had 3 hours of getting the hydrogen. I think the color of the flame is in this color.

02:14:50 K: Can you get a hydrogen tester and test this? There are different ways of producing the hydrogen GaNS. Hydrogen production is very easy. Trying to create the hydrogen GaNS to use in the space level is the key. You can try to hold on to it so you can expand it to deuterium and tritium, which become the cores and the dynamic rotation of any field even like the sun. In the sun, we don't have helium or creation of fusion. We don't have this combination of the field plasma in different strengths of hydrogen in respect to tritium and deuterium. The highest order of the flow created becomes gravitational and becomes the highest giver and then you find the transition to the dynamism of the plasma of the solar system.

02:15:25 Moreno: I have another short video because I made a Tesla coil and I think this all goes together with the plasma technology and at some point, we will mix these different energies to have more expansive plasma production. This Tesla coil is working with this Magrav and this is the first testing and I want to increase the energy 10 times more but I need a bigger place to cover more energy than I have in my home. I need a bigger place to have several kilowatts.

02:16:56 K: There are 2 options to miniaturize the system. First is to nano-coat the energy to go to kilowatts. You have to realize that with nano-coated wires give you a superconductor and you don't need a bigger structure to handle it. Secondly, you can use the plasmatic gravitational fields of the Tesla system to increase the power without actually changing anything in your system. If you understood it, you can create a kilowatt power system. You can miniature the production. You produce more than you can handle this way.

02:18:00 Moreno: Yes, ha ha, I have the information to have several more energies, but I need a bigger place. I will ask a friend with a bigger place. But for security I made a Faraday cage to concentrate the energy. But I am thinking we can mix and do different processes and mix the Tesla coil information that Tesla left. I want to mix it with the Magrav system.

02:19:00 K: Many people have done this and it leads to the generation of power. But you have to understand which end of the Tesla system you are working with. Understand the work of Constantan Miles too. You will find out that you produce much more energy than you expect. He is a beautiful scientist because he works on the reverse of it. The gravitational is much stronger than the magnetical. If you understand the work of Miles and put it in line with the Magrav system and then change the Tesla coils to nano-

coated materials. Then you will understand and the work will become very much nicer.

02:19:55 Moreno: There is someone in Spain who gave his triple momentum magnetic (or something like that) patents to the government because with a small production of energy he can make any kind of kilowatt voltage. He is saying that he made 3 different coils one inside the other and he said they have the nano-coating process also. The difference is this guy is already working with the government because he showed how he could make a big amount of electricity. But maybe he was a student of the plasma technology.

02:21:50 K: A lot of people are mixing technology and getting huge results. I support this because the knowledge is a gift from God and should not be patented or owned by anybody. When people who make a breakthrough on the plasma technology, it is a very narrow field. If you understand everything we have taught, everything that touches the live of the man in the universe is in the teaching. Some of us are good in medicine, energy, agriculture, decontamination or space. If you understand the essence of what we have taught over the years, this technology touches everything in the life of the man in any universe. The knowledge dispersed is so comprehensive it will take man thousands of years to understand the totality of it fully. It is nice to see people are mixing, developing and understanding concepts from one group to another. People are taking the shackles off and that is encouraging. When I see people developing this, it shows the knowledge is well dispersed and well understood. Thank you for your efforts.

02:23:30 Moreno: When I was working with the Magrav and the Tesla coil in some places when I recorded the noise was entirely gone. Sometimes the telephones were freezing and the commands did not respond.

Rick: We have done tests on this 3 or 4 years ago.

02:24:24 K: You brought some memories back... When I was testing in Tehran in the University in research, there were a few times when officials said they could not make their land line telephones work. They would ask me to stop the process I was doing because this was affecting a spherical building of 50 to 60 meters. I know it does this and there is a technology to use this. We had a system in Italy when someone walked across the garden and you create a field that is balanced and man does not hear it. It is the

same when the point is where you cannot see the object and it's a spectrum. The object is there but you cannot see it. Thank you for sharing knowledge with us and we enjoy it. It is the spectrum that you cannot see. It is nice to have you share knowledge with us; we can learn from it.

[MK shows a video of a frozen mosquito inside an airline window](#)

02:26:00 K: The picture is on the screen of the mosquito that freezes at minus 50 degrees. The cold goes through its body and when you land it goes somewhere else. It is totally frozen and minutes before it was moving in the window. You see the legs and the antennas.

Rick: Jay posted and says that mosquitoes can take repeated below freezing temperatures.

[Development of International manufacturing](#)

02:28:28 K: As we said before KF is expanding in the manufacturing worldwide and we started the cycle 2 years ago. We had to stop but now that we are receiving enough work it allows us to start the manufacturing process, we have a meeting for the 21st of August by KF for the application of manufacturing. Submit your forms. We have 182 applications from 42 different countries. If you want to expand to manufacturing submit your forms. The plan of KF is the minimum of one factory per nation. We will invest in some countries for more than one factory. Everything will be prefabricated in one center and sent. The standards are the same over the world. Go to KF manufacturing and we have the forms for 42 nations.

02:30:30 K: We will look at all aspects and we will invest the finances. This means that you are a shareholder and we have decided what we will invest in each nation or what will be used for the development of teaching. It can also be used to develop and teach. Check your emails if you applied. This is organized by KF and Ghana is the first and we will get everything right there. We are ready to go and everything will be prefabricated and you open the container and from the wall to the GaNS production system and the energy, the water and plasma systems or car unit will be in the kit. We will use this for speeding this up by air cargo so you don't have to wait for months. We will inform you we are in the process of doing this. It is all prefabricated and you open the container, to the wall to the power supply.

The certification we have received from the international organization will be transferred to the nation and you don't need to spend time to certify. We are the major share holder and we can transfer the certification over the world. The standards boards around the world have agreed to this certification. This is the way we are going to go.

02:32:50 K: Our production is going in a way and we are planning KF worldwide to increase the factory production to 600 units in the next 2 years. So even if you have a shed that can accommodate the system, once it arrives it is fully pre-packaged and all you have to do is start producing. This will be monitored by the KF from beginning to end. It has to be ready to have orders and financing at the same time. There will be training and everything else that goes with it. In the beginning, it will be slow but it will open up after 2 or 3 months.

[Calling a day with wishes for peace bearing fruit and motivating the military](#)

02:34:00 K: Shall we call it a day? We have been going for some time. We thank all the KF supporters. I think many of you will be presently surprised with what is coming and how the KF and your wishes of peace are bearing fruit. Rick sent me a message this morning; do you want to tell me about the American forces?

02:34:40 Rick: There is a news item in the major CNN news about the top military leaders, 5 of the US joint chiefs, are issuing public condemnations of the white supremacist groups in the wake of last weekend's unrest. The US military leaders condemn racism after the Charlottesville violence. Trump didn't speak out fast enough to condemn the white supremacist groups that are behind the violence so the US military leaders came out to condemn the racism to be sure they squelched it. They don't want this in their own ranks and the racism splits them up too much. They are into peace the way Mr. Keshe talked about in the last workshop. The military leaders realize what it is like to live in violent situations.

02:36:26 K: The military men are there to support peace. They are not there to create war. It is the politicians that create the war. As I said once you send the letters to the ambassadors send the peace treaty to the Chief of Staff of the military forces, the joint command forces and introduce them to world peace. The armies will grab it with heart because they are there to keep the

peace of the nation. We need to offer the head of the military in the nations and offer the same contract for peace. Don't forget that many heads of military become heads of their nations. Maybe the military will force the agenda of peace through the technology; we have spoken with a few of them and it's amazing that they are in support of this technology.

K: They understand the technology brings peace. They say this brings peace to my nation and that is what I am here for. I am not here to go to war; it is the politicians who ask me to go to war. If I make a peaceful nation, nobody wants to go to war. Please write and send the peace message and peace treaty to the highest-ranking officers. They will greet it with open arms. We have to be able to show this. This has been my job in the past few weeks to engage with the heads of the military in different countries to show them the advantages of the technology. This works very nicely as they see this brings peace and prosperity to their nation and they are willing to carry on.

[Earth changes are in progress, maybe not as we said they would, but happening...](#)

02:38:44 K: I have a message that the far northwest region of Schezwan earthquake on August 19, 2017. Some people have died. We are aware of this. These things are normal and it will happen with the process of the movement of South America. The process of the movement is of the dynamic part; the earth is the solid part. This kind of movement will be continuously created. There is no way anybody can stop this. You have to realize the continents are floating ships on the ocean of magma. Underneath is not connected to anything. If you have been on a boat in water and you are not rowing, you have no control where you go. Sometimes you bump into the boat next to you and sometimes you bump into the harbor on the other side. We have to understand the totality of what we call the facts of what we call this planet earth and what we call the continents as what we call the land mass are floating boats on the magma of the planet. The magma itself is floating on the plasma of the planet. This is the beauty of it. Nothing is fixed and attached. Earthquakes, climate changes and earth changes are part of the process of this dynamic situation. But the separation of the North American and South American continents is underway...it has been for millions of years. It is the first time we expect the movement because there was movement of the earth's crust. **We saw it and we passed it on, and it has not occurred as soon as we said, but the separation of**

the continents is taking place, and in the coming time South America will be floating on its own.

02:41:20 K: Thank you for today. We should have a huge advantage in the scientific development. You will realize that KF has separated its own private research. We have a totally different position through legal advice we have received. As you know, the people with the court case still go through. We are putting the appeal through regarding the one euro decision. It will never be spoken of. The only thing we will only speak of is the science of what we have developed. We have opened up other channels and the KF and its work will be protected through legal systems and we have brought in legal authorities to protect us and do the appeals.

02:42:15 K: We will never discuss these things in our teachings any more. These are the matters that will be decided in a different way. The reason for it was very simple. We got what we wanted and from now on we don't disclose what we are going to do until we achieve what we have and we get those people who are responsible for misconduct into prison. We have been given the green light to proceed with all the appeals. In the next months and couple of years we will proceed one by one from the king to the man with the one euro. Thank you very much.

[Klaus from Austria will present important knowledge next week](#)

02:43:00 Klaus from Austria: Mr. Keshe this is Klaus from Austria. Is it too late to present or would it better next week?

K: please come in early next week. I would like that and we need your knowledge. Thank you and thank you Rick for today. Would you like to take us out with the music as has become fashionable with the Universal Council meetings?

Rick: thank you for attending. This is the end of the 185th KSW for August 17, 2017. We will have Flint play the music.
