Draft v2

### **Transcriber's notes:**

No sooner had we decided to stop doing the formal transcripts of the KS workshops, that the next transcript turned up from Lynn of Montana, who felt compelled to transcribe it as it was important information about decontamination from radioactivity– a clear and present need on the planet at the moment from all the contaminated sites as described by MTK in this workshop and others... Then a comment from Dr. Rodrigo about how effective it is changing the consciousness prompts some more teachings from MK who brings out one of the principles of Bahauallah's teachings and describes a visit back to an ancient Zoroastrian Temple of Fire bringing more knowledge on elevation of the soul, as in the hyperlinked headings following from 02:55:50.

### **Transcript**

[Some teaching on decontamination of radioactivity](#)

02:55:50 Depleted uranium (war) heads were used by American forces against the bunkers. We are fully aware of this and it is for the American government in negotiation with the KF. These materials are used and left (causing) long-term damage in people. The process of (de) contamination of plutonium, uranium and the others should be very

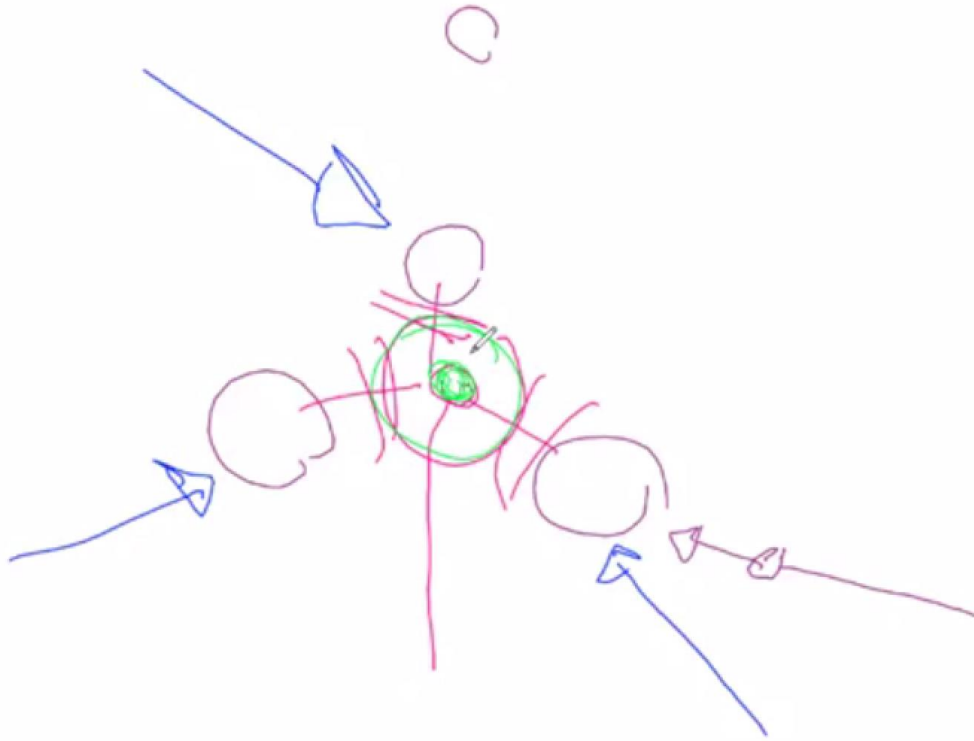

easy for the KF. I should be in the Middle East in the next 2 to 3 months. For Iraq, we are working with our organization in Baghdad directly. One of our directors was in Iraq last week. We understand the work in that nation.

02:56:50 We understand the contamination and not only in Iraq. 50% of the waters in Rome have nuclear contamination. That is the statistic of the Italian government through misconduct or mismanagement of certain materials. There is more; there are radioactive lakes in Kazakhstan from nuclear waste dumped in the lakes by Russians. Nobody figured what would happen when they dumped the waste in the lakes other than 'one day we will find a solution'. The solution will come through the collaboration with the KF and one of the major governments. It is our priority and we deliver. You need to understand how to deplete and link up energies. You cannot destroy but you can facilitate. We have shown there is a solution for nuclear weapons and warheads and chemical weapons that have been used in the past. It is just finding the way to organize and to be able to rationalize and not to destroy or bury.

02:58:37 The nuclear warheads used by the Americans against the bunkers will have the worst effects. We see the effects on the American soldiers and many of them are coming back with mental problems. Many of them who fired these things have received the first dosage themselves. I have a philosophy and I still believe in it: *If you see the lights of a nuclear bomb or you feel the wave of it, my advice is to walk towards it and not to run away from it. If the wave or the light has touched you, you have already received it and it's a long life of misery. Or you can walk into it and salvage in a different way, which brings an end to the physical pain faster. When the American used these depleted uranium and chemical weapons, those who used them received the first dosages.* The depletion and cleaning up comes by understanding the GANS technology. You have everything.

03:00:20 This morning before I left home I had the Fukushima documents in my hand. It is very clear - go back when Yukoko when she went to Tokyo. The measurements are there, and they were not done by us but by outsiders and governmental entities. There were chemical side effects with the chemicals used and there is a solution for all of them with the right mixture of GANS water. You will not destroy it; the scientists will measure that the chemicals are still there. But tell (ask) them are the side effects there? We saw that with the situation when they said it was just the water and nothing else. When you test the water for the alkalineness, you saw the opposition die. It is not ordinary water. You have to understand that with the new technology you reach the new dimension, which is the field and not the matter state. You have radiation and chemical contamination. Understand the process and then contain it with the fields of the GaNS. You don't destroy; you link up all the energies to a new source. This means that the matter is still there. You see it when you test it but the effects are not there. This is the beauty of the new technology. And the sooner the world of science understands this, the sooner we move on to the next step. They say *no the chemical material is still there. Yes, it is. In the new plasma technology, we do not destroy; we link up with new fields to contain the fields (of the chemicals, etc.).*

03:02:32 K: Is Jon in the background? In Arizona, they have done a new test that is very interesting. What has happened in the test in Arizona, which is the research facility for the space technology for the Keshe Foundation, is that they have run 3 reactors in a test with the star formation on the top. They have a buzzer that shows the fields (3.03.37 minutes), the magnetic fields. What they have done in this test is amazing. The beam makes buzzing noise everywhere. But the strange point is that when the buzzer comes in the center there is no noise.

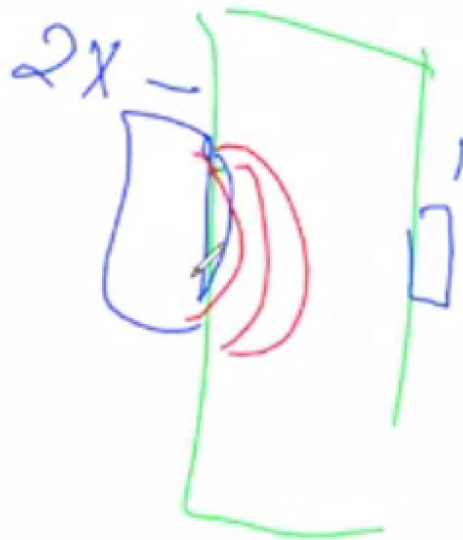

03:04:05 To you or me to explain this is that the fields are neutralized even though they are still radiated. So, if you have plutonium or uranium or whatever in the vicinity, you don't destroy it. It still exists. But the fields contain it. This is not understood in the new world of science, which is in front of the old man of science. And this is how you clean up these messes. We cannot destroy; this is the old habit. To convert it to something else we allow it to be but we contain its fields so that it has no effect.

03:05:20 K: In Iraq or other parts of the world, you can contain all the chemical and nuclear damages. They are still there. You have to explain this to the scientists who test it. But the effect is not there because for something to have effect on you, it doesn't come and hang onto you. With the new understanding of technology, it creates a field connection to you. With it there is a connection and this is how you poison yourself or radiate yourself. Now if you can provide other source that is stronger than the radiation or the field of the poison, it links to that and it doesn't have enough strength to link to you. So, you still see it but it has no effect.

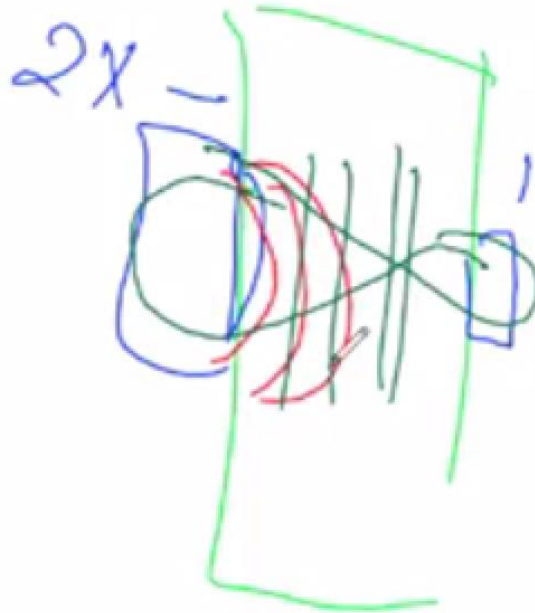

It is the fields that decontaminate in the same way that the fields increase growth of plants and relieve pain with application of patches

This is the way it works. This is the way it is in the agriculture. When you water the plant, it is not the CO<sub>2</sub> water that goes to the plant root and the plant takes it. No way!  
03:06:37 K: It is the field that the GaNS water creates around the plant that changes the condition of the growth of the plant. If you use CH<sub>3</sub> and CO<sub>2</sub> mixture to grow plants, you think it is a 'magic thing' and it works. It means that you have not understood. You have the carbon, the hydrogen, the oxygen chain of amino acid and now you have created a dome that because of the 3 elements being available, they attract the nitrogen that creates the protein to sit on the leaves in the new environment, the new condition and the new food. This is why you see the huge growth. This is why you see the new environment. I have committed the KF to change the condition in one of the deserts in the world and you will see this in a very short time because I explain to the scientists and then they understand the totality.

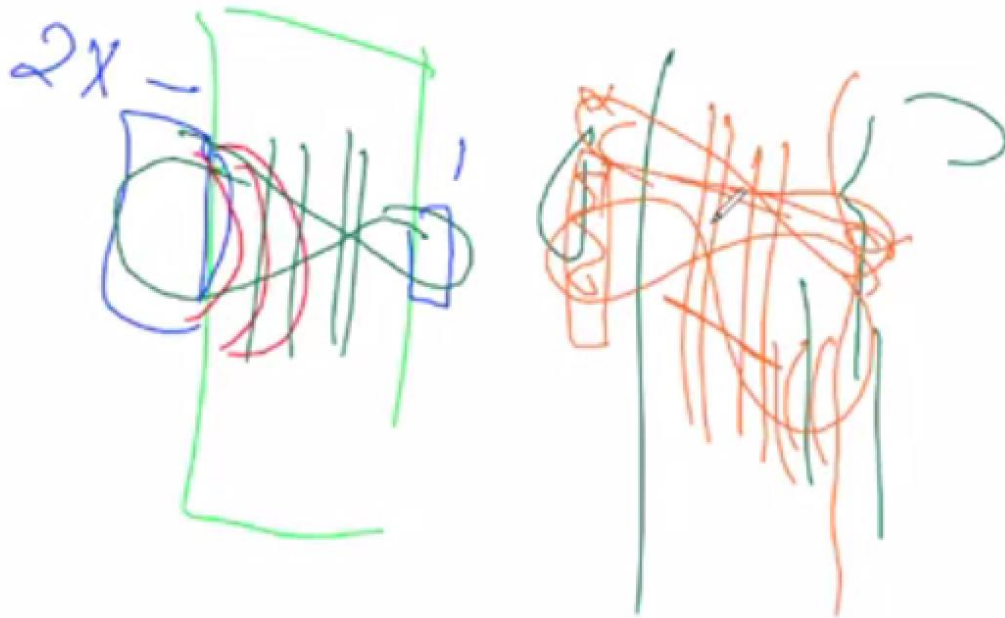

03:08:29 K: This is what we need to understand: we need to be able to see the totality. This is part of the teaching and the enlightenment. When you work with the GaNSes do not look in there that you gave it CO<sub>2</sub>. Look at the fields. In the recent past, I was with the lab with people in KF who are making goods. They were making patches and they said *we are making patches very well*. **I explained to them that they could not sell one single patch. When you sell a patch, you have to sell two patches. When you make two patches, you have to understand one has to have two times more GaNS liquid than the other one. If you have a single patch that you put on, ok it has some fields. No problems—the fields reach this depth (3.10.14 minutes).**

We know this because we tested for the certification of the patches and belt for KF. But now when you use the double patch, one in front and one in the back, the fields from one are trying to reach the fields of the other and it creates the infinity loop the pain is energy and that pain energy is depleted.

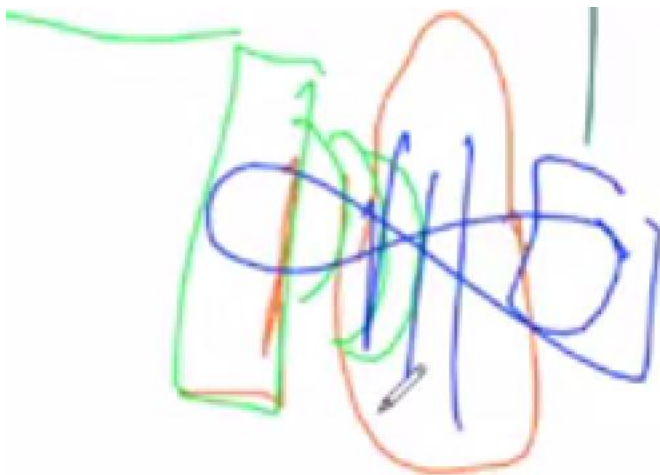

03:10:41 K: Now you see the effectiveness. **When you take or you drink liquid GaNS and you have a problem somewhere, the liquid GaNS goes through you like this. The penetration is here. But if you manage to put a patch where the pain or problem is, you will find out the effectiveness of the ratio difference.** One is the weaker and the other is the stronger and they create a link because they are the same. Whatever is in between which is the pain is a gravitational magnetic field entity. Then you find as the field depletes, the pain is gone because you transferred the energy. The energy transfer of the smaller to the bigger is confined. You use CO2 because the link of the magnetic field connection allows the depletion of the energy of what you call pain. This is the knowledge and the science.

Try to understand the principle and try because when you understand it then it is not *I have leukemia; why do I have leukemia? What is the reason for the leukemia? How have I accomplished this damage?*

3.12.28 K: If this is your body and you have the whole thing here and you put a patch on the other side hoping to reach, yes it will reach but to what extent. But if you put another patch on the other side, you have already dictated the path. Whatever is between the two is confined and will change.

Try to go through the process; it is not a tablet anymore that goes in the stomach and has a chemical reaction. This is the field transfer across. And then change it to agriculture,

medicine, food, anything you want to name it. You will find the strength of it that is there and you will see the effect.

[Klaus2 explains how radioactivity can be reduced by working at remote points](#)

03:14:00 Klaus2 from Austria: For the radioactivity you know we have built two points in Italy and we went to a third place and we think this is a good solution for decontamination of the water and soil, and we give this to Jim McDonald for a workshop in October. We can do points all over the world and it works very well.

K: Please explain in depth.

03:15:00 Klaus2: at first, we put one in Austria one and half years ago in the northern part with ZnO and CO<sub>2</sub> liquid plasma on special magnetic points on the earth. We had access to some government data and we saw the transferred radioactivity would be integrated in the water and the soil. Last year we established another point in Venice in northern Italy and we see how the two points in Italy and Austria work together. In the next two weeks, we will install a point in Greece on the island of Crete. And then we have to measure the sensors in Austria that will be able to show the radioactivity. We have 360 sensors in Austria and we can measure this.

K: so, you are going to measure all the energies at the different points to see the reduction?

03:16:25 Klaus2: yes. Then we have to look for how deep the radioactivity goes. When the data is correct, then we can make some points all over the world. They will be integration points for radioactivity.

K: so, we can measure the changes through the same?

03:16:58 Klaus2: we hope so. I have the papers and we have to look at the data and there is much information. I need some young guys who can integrate the papers and bring them in a good form.

K: thank you very much; that is very interesting.

[Chad asks if it is possible for a doctor to do tests on radioactivity of urine to prove effectiveness of the GANS materials](#)

03:17:36 Chad from Victoria, BC, Canada: Yesterday in the reactor group with Rick I asked a question about Iraq and I would like to refine it now. Is there any possibility in the near future that the KF or we the people that are the KF in terms of the doctors might be conducting some type of tests where these people who have been contaminated have radioactive urine? I was wondering if there is any possibility that doctors or a doctor

might conduct a test with a health unit and a test with just CO2 GaNS plasma water over a month or 2 or 3 months. Is this a possibility in the near future?

K: What is the purpose? I don't understand.

03:19:37 Chad: I was reading in the transcripts in the books that you can get at Amazon. I was reading in the Year One Book One transcript that Cesium 137 was completely eliminated (the word eliminated was used). Is it proven that someone that is contaminated with depleted uranium and their urine is radioactive, that if they take the CO2 plasma water or if they go into a health unit, that the radioactivity disappears and it can this be measured?

K: These tests are done by governments and we have a lot of data. A lot of it is kept confidential because of the process. But there is data that confirms a lot of what you call absorption behavior. It isn't absorption—the material is still present but it has no field effect.

Chad: so, can it be said then that they are no longer radioactive?

03:20:57 K: No, the radioactive material still exists in the body. Sometimes depending on different structures, we see different behavior in the proton or the behavior of the radiation. This is what you call the linkage of the energy. It is not the destruction of the radioactive material.

Chad: That is interesting. It's like a balancing but the radioactivity is still there?

03:21:46 K: Yes, that is what it is. You link to the fields—you have to find the strength of the fields. In the English language, we call this neutralizing but you are linking it up.

03:22:26 Chad: Thank you Mr. Keshe. This has been on my heart because there are so many birth defects in Falugia. If there was some way to put a stop to that...I know the government itself is a problem. But there are so many horrific birth defects.

03:23:00 K: yes, but part of this is that it has already become part of the genetics of the body. People move within that. In the process, you cannot decontaminate but you can reduce or totally eliminate the effects, but you don't destroy the material. At the same time with these kinds of processes we see the materials from such a long time ago changing it is impossibility because it has become part of the RNA and the DNA.

Chad: thank you.

03:23:57 K: we are doing a lot of work in the background in this respect especially in decontamination and cleaning up of different chemicals. This is very important for our research. As you know, we don't disclose any more information from anywhere so we can carry on with our work without any interruption. This is important for us and we go to the people and places where the work is needed. The transfer of the information and

technology is very, very direct. This is unfortunate because in the past we used to bring a lot of new knowledge forward for the public. We stopped doing that but our research and development has increased by many fold. Unfortunately, as we develop these technologies they will stay within the governments and organizations that we work with because we have seen before what the behavior of people has been. Why should we go through this bother ourselves when we are working where it is needed? We deliver it where it is needed. Instead of becoming national and international knowledge it is staying at the local level. When we can bring this knowledge across to somewhere else, we are doing that.

03:25:23 K: the sharing of decontamination with the organizations and governments is part of our work and we do this heavily and we have a section that does the water decontamination and cleanup and the changing of characteristics of certain things is part of it. We have a certain section for this. But we don't need to disclose any more but the chemical and nuclear decontamination does not exist for us. It is still there, but through the new processes the effects of the nuclear and chemical decontamination will not be there. This is part of the beauty of the work where we don't destroy; we accommodate. Any other questions? 03:26:29 minutes.

\*\*\*\*\*

#### [A comment from Dr. Rodrigo about changing the consciousness](#)

03:34:01 Dr. Rodrigo: in order to change the consciousness and change the world first we have to understand how we have created chaos in our body through emotions. We have created the imbalance in our bodies due to pollutions such as the GMO food. We have begun to understand this through Mr. Keshe's teachings and we have begun to solve it. We are making the GaNS, building the Magravs and the health units. We have learned how to create an environment that brings balance to our body. I have seen it in my practice. We are using the plasma technology in those people who have developed diseases. In one way, we clean the path of all the stones that block us from our higher self or soul. Once we have that access, you can change any condition in the body: *my wish is my command*. I am aware that we have a lot to learn but we are moving forward. We have to work together for the common good and for awakening of humanity and to raise the awareness of all to create heaven on earth where all entities live in peace, love and harmony.

03:35:32 Dr. Rodrigo: I have seen people coming here and using this technology. They start developing different psychic and clairvoyant skills. Incredible, beautiful things are happening. We are encouraging more people to do and to learn this technology and to encourage more people to do so. And to just allow the plasma to do this job. It's a beautiful job, doing this plasma.

#### [Independent Investigation of Truth is important so we are not controlled](#)

03:36:06 K: thank you, Dr. Rodrigo. There is an important part for all of us to consider. I understand Hassan's way of explaining the Islamic religion. I was brought up in Iran, an Islamic nation. I understand that word kafar that means "one who doesn't believe in God". But it is what we allowed to become and what the reason behind it was and not to compare to what was said before and the reason it was said before. The words that Hassan used of those who are not clean are 'kafar' (?) and in the Jewish language they are the goyim. The Christians in England had a different word.

03:37:11 K: If you look at this if you are allowed to look at new things then you cannot be controlled. These words are words of control and that is all they are. The freedom of mind and intellect makes us decide where this fits and suits us. So, you have the freedom to decide which side of the fence you want to sit on. The new knowledge of understanding the totality is in the hand of the man for the first time; no one needs to interpret because you are the user of the knowledge. You analyze it and benefit by it. For us as the human race there was a soul; we found something we couldn't understand. We knew something controlled us and was there which fed us and we call it the soul or something else in different languages. Those who knew this was not there used it to become self-made intermediaries and from it they create fear, scarcity and punishment. Now that you are educated and you understand that what you are afraid of is your own soul, your own creator, it is you who benefits by this directly. You don't need someone to tell you and to become the boogeyman in between.

03:38:56 K: This is the beauty of it. In space which boogeyman are you going to accept? There are so many strange things you will become converted to a new path and beliefs. Every second in space you see new things and man who teaches you more. This is the beauty of it.

03:39:24 This is in the writing of Bahá'u'lláh, bless his name, who calls this "the independent investigation of truth". It is the cornerstone of the knowledge of the man. We have to investigate independently what we know is the beginning of us, and not having fear of this. We see the same thing in the writing of Mohammed, bless his name. Those who made other things out of the writings did so to benefit themselves; it was not in the original writings of Mohammed, or Moses. This is the way of control. When we call someone 'whatever' (kafar, goyim, heathen) it means I have no control over you. You are forbidden to go there because the controller is not the boss anymore.

03:40:25 K: In English we call this 'repenting'. Why do we need to repent if we conduct ourselves correctly from the beginning? Guilt has been one of the main ways of controlling man and the human race. By punishment we emphasize the guilt. The man who creates the punishment is the guiltiest of all, because he wants to enforce his way so everything else is 'guilt'. I explained this before. When you bring the words kafar or goyim which both mean non-believer, I sit and analyze both sides of my family—the Islamic side, the Jewish side, and others. It is very strange. I had a Jewish aunt in Manchester who could not find kosher meat so she could eat halal (?) meat. When she goes to London and goes to eat meat now he is a kafar, or a goyim, a non-believer. But when he is with her there and there was no kosher he was okay. This is a puzzle that was

created to control. This way he could taste something different that she couldn't make. Then he knew there was better food outside the house because she couldn't cook.

03:42:09 K: this is how we control. I gave a talk recently about virginity. A woman has to be a virgin. Have you ever stood still once to think of the reason behind and why all these restrictions have been created for each other? In a way, it is the incompetence of the man who has created this condition so his incompetence does not show. We create these conditions and put punishment to them because of our lack of understanding and misunderstanding. Then we have to change. When you have a problem, you explain to the other side or it gets explained to you how they see it; then you try to find a solution. When you cannot find a solution and you try to dictate, you make punishment for it—government, religion or whatever. It is us who have to come to understand that from now on we are the police of our own soul and not someone else's order. The policing has created religions and punishment. When you understand from A to B, you don't need anybody in between.

#### [Elevating your soul means understanding the operation of the soul](#)

03:44:07 K: Elevating your soul means understanding the operation of the soul-- understanding with and how it gives and you fine tune it to be better and no more. This is the challenge for the human race in space. You find the strongest fields that elevate the others faster for those to be working much better and not trying to hide it so others can do because everyone reaches at a time when it is needed and it will be in the strength that it needs. The biggest problem for mankind from now on is to become the police of their own souls. Instead of bending and praying, the policing (of the soul) is in the hand of the physicality of the man. I always say to go back to the cover. The Iranian says we put the cover on our eyes so the women can be free. We police our conduct. I come from a Persian background and I believe entirely what is said: *think good, do good and talk good*. To understand it is to touch; to act on it is maturity.

03:46:00 K: In my last visit to Tehran I went to the Zoroastrian Temple because that is where I was educated. I asked the priest to allow me to sit in the house of Fire, in the Temple of Fire. With the greatest of pleasure, I was taken to the Temple and the Room of Fire. It occurred to me at that point that the Fire has gone on in Iran for thousands of years and has never stopped. It wasn't the essence of the Fire; it was understanding the essence of the soul that you could touch and see it connected by those who have kept the fire of truth for thousands of years. We have to understand the truth of our soul and then our physicality will follow. Then there are no intermediaries. We have to understand the operation of the space work and then there is no need for GaNSes or for what you need to feed or clothe yourself with, because in space there are no GaNSes. The source is your soul and the limitation is the environmental fields, which give the dimension of the manifestation. The sooner the man finds this the sooner the man will find peace.

03:48:10 K: *I made man in the image of myself. If the creator is perfect how can man not be?* Shall we call it a day?

03:48:32 Rick: Yes, we are at our time limit. We can move questions forward to the next session.

03:48:52 K: thank you very much Rick; thank you everybody for everything. The process of writing the charter will carry on on Tuesday afternoons; please participate to write this charter. This is for man and the blueprint for peace for humanity. The longer this takes the more we understand, the more mature we are, the more understanding we will add to it. This charter will not be finished for hundreds of years. It will be added to as we mature in the deep space knowledge. But it is the beginning and we can write the man's version until the man of space shows us another version and we add to it the way we understand it to elevate our souls. Thank you for today. Thank you for everyone in the background.

Rick: it will be Tuesday 4pm Central European Time for the One Nation, One Planet, One Race for World Peace...

K: We will go out with the music. Thank you Flint, I hope you have a good time with the hurricane and you will have no problem.

Flint: thank you.

Rick: We sent a protective umbrella around you.
