Rick: We have Mr. Keshe on the line and Armen from the SSI and several regulars and I think we're ready so I'll pass it over to MK who will introduce the topic of the day and we have several questions also when he is ready for them.

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

MK Good morning, good day wherever you are, today we are still on the holiday period, we try to cover questions that have arisen in the last few months and few years. I explain before we go on a lot of things we try to answer in respect of developing systems such as the cup of life.

### CUP OF LIFE FOR EBOLA

The first cup of life has left the foundation to try in Africa to test with the Ebola disease. The first materials for testing have been sent to be tested in Africa. The outcome we do not know until the live tests start, with the permission of the governments - we will see. I have a rough idea what to expect, we have split the trial into 3 sections, one of which is the cup of life

This is part of the work of the foundation – we were asked by an African nation to participate to see if the condition can be applied with Ebola – we received a direct request via an ambassador – the first cup of life has left the Kf for testing in Africa along with 2 other materials. The request has come direct from the highest level in government.

The reason we participate has been that Ebola is a virus, and in space there are more viruses than anything else – germs or whatever. So we will see if the trial has any positive results to see if we can reverse the conditions, this is unknown for us but the 2<sup>nd</sup> time we are involved internationally in crisis management. As you knew Fukushima has led to decision making in coming weeks in how we will develop a decontamination system in cooperation with Japanese organisations. So this is the second time we have been asked by Governments to solve a problem they have no answers for...

### THE EBOLA MATERIALS

The materials: One is the cup of life, another is material to disinfect directly any virus or anything touched, and one is via internal consumption to see if we can change the disease internally. One of the biggest problems is internal bleeding but we look at it in a different way – bleeding is because cells have become very very active so they can pass through the fibres of the blood vessels. Hopefully this will be tested by the govt that has requested help and we will see the outcome. This knowledge is important for us in deep space, the material should be in Africa in

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

next few days and will give is another dimension into the whole process – we will see what happens.

We should be able to bring this thing under control within weeks, then we pass info to Eliya and team on the medical side to look into further, The Malta centre is being set up in the next few weeks we thank the hard work of the Maltese Group, this is important for the health section

The situation with Fukushima – there is an enquiry made from a company in Japan, and once they have primer reports from their inquiry then there is a plan to travel to Tokyo to realign the process of decontamination for the land, and also develop the power supply.

These are the things happening during the holiday – in the lab we have no development as such – we are just maintaining the reactors without running any of them so they are ready when the KS come back. I have made a few mistakes in the loading, but we always say there is a reason for mistakes, and we will see what results – we have overloaded with gas on 2 occasions when one line has been left open – but it gives good news in a way – we create compression in the containers. Nothing drastic has happened but the results are there and very strange is that I think when Armen is back and we start feeding gas into these reactors, we should see very interesting effects, because of the Gans reactors, especially the ones closest to the central set. It shows immediate reaction in power every time we feed H – it drops from 1.2amps to about 0.9 amps - it drops about 30% every time I introduce H to the centre core or outer cores. This is very interesting as interaction of the plasmas between the reactors.

There is not much more I can explain – there is a point which is important for the Kf – that we will release all our knowledge on the website and through the papers that go on the forum of the website. I have asked the webmaster to create a new button on the Kf website where it directly links to the KS workshops – so then there are new papers and KS workshops next to them – so very soon we can connect to workshops through website – Is their any questions?

1230: Rick: Yes – can the Kf make available pdf plans for the cup of life through paypal?

MK: When we release the COL the process will be done step by step. There is only 9 cups left here, 1 is on its way to Africa I did a small modification before it left. Whatever we learn we let

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

you have it. It will be in a pdf file, as I explained to R and V, the Italian crew made a doco for Italian TV, we will ask them back in to make a high quality documentary in a very professional way so that anyone by looking at it can follow the steps. Then it can be subtitled in any language = then we can use a combination of cups we think at the moment till we make an alloy which we think can do most of the job.

### THE HOLY GRAIL

There is a question risen in the past week re the Cup of Life. In a historical way, a lot of people are looking for the Holy Grail as a cup that will give you anything – the youth and all the rest – this cup when it is finalized in the final version is the Holy Grail. This is the mystery that man under different names has been looking for – in a lot of names, in a lot of holy books they speak about the cup, the Holy Grail that everyone is looking for. This Cup in its final version will be the Holy Grail for you for illness and everything else, but it needs the wisdom to understand it – Its not just by holding it or drinking from it.

In the future I will explain how this Holy Grail, this cup, connects to the operation of the body. There is again separation between the physicality and the emotion or the soul of the man. The same cup can be drunk from by different men for their own needs – to each whatever they need. So in answer to the question – is this the cup that has been promised in the Holy Books? – Yes it is!

Let us deliver it to you in a correct way. You all can drink from it but you have to understand what your wish is – what you wish to receive from it – because it is active. We start learning about what we said when we said pray for your reactors, pray for your cups, because these cups have to be transparent and clear so that you can get what you need.

I had a religious person asking me – can you confirm this cup is the Holy Grail? – Yes it is! So if you've been looking for it for thousands of years, it's in your hand if you know how to do it, but you have to understand these layers have fields which interact with your 3D physicality through it's GMfields. In so many cases you don't even need to drink from the cup – you can hold it and receive what you need.

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

If you've seen a picture of the cup it's coated both sides, internally and externally. Internal is connected when you drink it is connected to your emotion and your soul. External when you hold it is connected to your physicality, so the hand and the thought has to be in sequence- has to be one to receive the knowledge and the wish for the cup of the HG. I told you there were two steps to explain – this is the second step or the first step of the two – have you seen the pictures?

Rick: Yes I'm showing them on Livestream

MK: This cup when you hold it from outside you are connected to the physicality – and I showed the KSs, on the top there is a lip which is the connection to the soul or emotional direction, So when you look at the COL this is the HG, But you have to understand its not the water you drink on its own – you have to be in balance. Internal coating will deliver to the water, exo coating will give to the body when they are in harmony you get what you need.

A lot of people will pick up the COL and feel nothing, because your thoughts your emotions are not in tune with the environment where the field was received from. When you make a prayer with a wish for peace tranquility equality – anybody will receive from it, but with your wish you put limitation. This is more important than building the cup itself.

### [A CORRECT WAY OF LIVING](#)

2000: Rick: Mr Keshe, will you be giving training about how to be in the proper state?

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

MK: It's not a proper state it's a way of living. As I explained you can hug a person and at the same time wish them death – the love has to be in the physical and in the brain. We see it a lot of times world leaders cuddle and kiss each other and they are the biggest enemy against each other.

R: Ok so the way I understand what you're saying you would not be able to have that wish for a particular thing, with the cup at the time, that wish would have to be incorporated into your life, not just for that moment.

MK: No, yes – it's the way of living. Even people who are talking about the Holy Grail – the ones who are in line with the life of Christ will receive it. All the kings of the world will find it and drink from it and they won't receive one thing, and you'll find one man on the street can drink from it and live the life of a king. Because he lives the way the Christ lived.

This is people looking again for physicality what the cup will do, but the physicality comes from the inner emotional part and the soul. This cup will put a lot of people to test. They keep on drinking till the day it works – they will say I drank from it for 10 years and it didn't do anything, then I drank from it last week and now I feel good blablabla – because for the first time you understood that the wish and the act, the emotional part and the physicality have to be in balance – then you receive it.

You will find a lot of people use this cup and they say it doesn't work – 'it's rubbish', but they don't understand that their physical part which is holding it and their emotional part and their soul – one is not in line with a peaceful and correct way and they shall not receive it.

This cup is very much (like) the reactors I put the KSs in front of – and I told them to give and take. This is very much a static version of it. Don't rush to construct the COL. Rush to correct your internal being and then you'll find out the COL lives within you! Next Question...

[THE DAY AND NIGHT PANEL](#)

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

Rick: Thankyou, that was a really good answer I think. There's a similar question regarding – can the Kf make up plans for the Day-Night panel, and we can pay that through paypal?

MK: It's not paying – we will make a video and people can make it themselves, or the companies that want to do it can do it. As I said the Italians were here last week, we are entering one of the batteries, it takes more than 24 hrs to empty the small batteries – so they are leaving the lights on since Tuesday noon, and till yesterday noon it was still shining at 50 percent – so if they empty over the next 1 or 2 days they put it back on – and that's the second time – then when its recharged we hopefully show the Italians here next week if they want to do it. I've asked them if they want to come – we open it and they will commercialize it next week, but we have to do this test where we empty the battery totally and then reload it again for the second torch.

So now we have 3 torches running – they have the circuits on a small board all fixed, as before we give everything freely – its there if you want to make a donation to the foundation then people can copy it. I have to deliver the same thing to our group in Tokyo – so most likely the commercial side will come out when we are in Japan from a Japanese company.

### PRODUCTION OF A STATIC REACTOR

R: There's a similar question from Harmen on livestream. Can one of the KSs make a video showing how to produce a static reactor that produces at least 100volts?

MK: Aaahhh! The volts don't count – this is one of the problems you'll find out with the systems when you go on the plasma reactors, the static the way we do it with the nano coating – you take from it what you need. This is what I keep on saying. With the nano layers you can increase it with parallel or series the current and voltage you need – this will be done most probably by the Italian company who make the batteries as a power supply and the Japanese. Any other questions?

### THE PRAYER OF A PRIEST

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

KS: Mr Keshe, is there any similarity between the Cup of Life and priests around the world who pray over the holy water and then give it to the church people?

2753: MK: I don't know- you've got to ask the priest what his wish is when he gives the water...

You got to understand the gesture which was made when the water and the bread was given. The bread was broken – this is my body, and the wine – now you understand the process of the cup. The physicality of the cup is the bread. To understand the essence you have to understand the gesture what is meant.

What does it mean when you are in church and you get the bread then something happens and you don't receive the wine? – You don't receive anything? You look at the physicality – the structure you have to understand why – with what intention the Christ gave this – bless his name. You are too physical – try to understand the purpose and what connection was made. There is no sign of the bread after 2000 years – the original bread.

It's something very interesting – as you know I respect every belief because that is part of the way I am and the way I understand. So many times I've sat with my wife in different services in different churches and I've seen the plate pass for people to put money in it to be collected at the other end. What about if we put in and the one in between needs the money to live and can take from it? How do you think the two on either side who put the money in the box feel? Did they give it that the one who needs it can take it or did they give it to be shown to be givers? This is the whole myth for the understanding of man and the physicality.

I was present in a meeting of some religious group and a person asked for financial help from the group because he was in financial problems, and I asked the head of the group this man needs to be helped otherwise he won't come to you. The response shook me and changed my life in so many ways – He said 'we are here to receive and not to give – it's his problem!'

So what is the essence of the physicality of the Christ? The body is in trouble and you help the body but you don't understand it affects the soul too. Don't look to see if the bread and wine is the same thing. We change the bread, it gives the essence of life, it gives acknowledgement to physicality, and the wine touches the brain – the emotion. That's what it means – when the bread and the wine are in harmony you receive what Christ tried to give you. So the COL is the

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

same. What is outside the cup has to be what's in the cup and then you'll be enlightened and you receive what you need – next question!

3302: Vince: Morning Mr Keshe, its Vince – so I wanted to ask you about the water in the cup because of the plasma around it – It will structure the water according to the plasma? – so that will also happen in any other devices that have these nano coated wires in them – and is there a way to structure the water in that type of environment to be able to do what we want to do with the COL without having to coat them in different forms?

MK: In further steps in the future the COLs will be the dynamic reactors – we already started that process with the KSs when they sat in front of the reactor without touching it and receiving what they wanted to receive and giving what they wanted to give. In space we don't have water and bread or the physicality of the copper all the time – so how you create that environment in liquid or in a vacuum, that energy is what you give and what you take. So if you use nano layers, if you use dynamic reactors, if you use copper coated cups or - whadayacallit – brass, nickel, or aluminium cups, there is no difference because the coating is more or less black in one part or the other.

### THE BLACKNESS OF THE CUP

The blackness – it means it absorbs all the bad, because your thoughts are two dimensional GMfield – so the black part absorbs everything – the full spectrum – you cannot harm these cups and you cannot cause anyone to be harmed by them. So if you use a wire, I told you, you look for physicality. You can make an environment around your dynamic reactors, which literally

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

behave like COL. You can be touched by its atmosphere, with its fields, and receive exactly as you do with the COL.

One of the things I'm looking at with a lot of interest is the COL going to Africa is to see who benefits - they are looking to see if it heals people but its not a healing process. I want to see the record they make who has survived using it - or if anyone survived using it – and then later on send them a questionnaire and ask them what they wished for when they drank from the cup.

V: I think that's a very good example of having to 'create the need' I think is what I'm trying to get at – to be able to receive the effects, lets say. Because if you're drinking it and you have a doubt in your mind the doubt will be a GMfield and should ...

### ABSOLUTELY NAKED

MK: I've seen it with the KSs sitting in front of the reactors with their doubts and hesitations and their way of thinking. 'Am I giving? Am I getting? I would like to give but I would like to receive!' And I see it on the monitor. I know the KSs who sat in front of the reactor; they sit in their soul – because I've seen their true soul in the monitors.

They stand in front of me absolutely naked in who they are and what they are. I always said my technology will not be accepted because of its effect but because of the fear of what it can do, and we've seen it in Fukushima because of the fear of the damage which is caused by man and now hopefully in Africa with Ebola.

### HOW TO HANDLE A VIRUS

If this technology is correct and it delivers what it is supposed to then you find out a lot of viruses can be handled through these simple methods, because we have to understand the operation of the virus within the structure of the physicality and the interaction of fields with matter.

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

With the microbes it's a structure or matter interaction, with viruses its mainly field interaction which a lot of medical science or pharmaceuticals never understood. That's why they have a problem with viruses. So for the first time we use the fields and we see. It is a lot of knowledge within the same structure. It is a lot of energy and information within the same structure. It all depends on what your physicality tunes into.

### PRAY FOR YOUR LIGHT

Something which a lot of KSs who try to make these day and night lights have to remember is in so many ways when you make these lights, pray for your light that it enlightens you, then you'll find out that our physical light is not even necessary to see the truth – because don't forget these layers absorb even emotion because it is a plasma.

This is what the man has to begin understanding – with the new technology nothing is hidden and nothing is wasted. When you build your torch, when you build your cup of life, these are in layers, 3D GMfields, which they receive what they need to receive so they receive at the same times as your emotions passed onto the next person to the next time you need to to bring it to a level – next questions ...

4100 MK: Let me say something. The man will put this to a full test of the new technology – to test himself – not to test the materials. It will be very interesting to see how the outcome will be!

### EMOTIONS AND FEELINGS

Rick: Mr Keshe, do you make a distinction at all between the human emotions, you might say, and what you might call feelings from the essential self – from the soul or being? Is there a difference there? – or is it all sort of the same?

MK: Emotion and the feelings are the same, but the feeling is the connection to physicality. The emotion you feel you want whatever and the feeling allows you to show it through crying or

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

reacting. I don't make much because it is very much separation between the physical and the soul.

I had a very strange thing happen yesterday. I had to go to a meeting on the highway and on the highway in front of me was a hearse with a coffin in it – and as is my usual habit I said 'take what you need' and I felt the soul did not want anything and it was very strange for me. I had to drive next to it and I felt 'take what you need if you are short of anything' – and I drove off and then I thought maybe the coffin was empty they were taking it somewhere to put a body in it. So it depends – it may have been a body that had received everything it needed at its own level to be comfortable, or maybe there was nothing in there so you give and you don't know if it will be received.

Feeling is to do with physicality, emotion and soul is different. I was explaining this to someone who asked me – I think it was Caroline – she said, "what is the purpose of this life – why are we living?" I explained to her that the mother gives life to a child even though the child is inside the mother the child carries the soul. When mother gives birth with a lot of pain and sacrifice from carrying this body for 9 months, once the body is released the mother has served its purpose of giving new life. Now this life survives for a few seconds or lives for a hundred years – the purpose of this life is to give life to the creation of a soul. It doesn't matter if the life has lived here for a hundred years or lived here for a few seconds there is no difference.

### CREATION OF A NEW SOUL

Actually the one who leaves physicality early does not carry any harm or nothing has been taken from it – it is a pure soul. The man who lives a hundred years has harmed a lot of people and has been harmed a lot too, so the soul on his level has been changed. So the purpose of the physicality is not why we are born. We are born to be incubator for the creation of the soul to separate physicality from non-physicality and that's all it is – the purpose of the mother to give life to the creation of a new soul

4541... To make it without dimension – what happened to the mother with the pain she went through to deliver? The same thing happens when the soul leaves with all the pain to separate it, to allow the soul to have it own life independent of the physicality. The same as the child became independent from the mother by giving birth to, we are born to deliver – to be the creator of a soul which is non dimensional – a being without dimension and that's the purpose of

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

the creation of the man. You call it a soul. You call it the emotional part, which is connected to the soul. The minute the main brain in the womb of the mother is created, the soul of the man is complete.

### THE TEST OF TIME

The test of time is what you add to it or take away from it. As we've seen a lot of priests took and gave the bread and the wine to children and at the same time after the service they abused the children – so where does that soul go and where does the young soul go? The intention of the man who broke the bread originally with his soul, and the man who abused it with the soul of the man who has abused the child by the priest and in front he has given the gesture of the body of the Christ with his same hand, this is the man who will not be on the boat of Noah when it comes.

Its not that we stop you getting on – you will judge yourself and will avoid getting on to be a passenger on it, because you know at the gates you will be tested. You will be your own judge because as we said with the story of Noah – the best of the animals, two of each were taken – then we don't judge – you judge yourself. It's the same as the man who downloaded the book from the foundation and said "I got it free!" – he'll be asked on the step then you decide if you are a thief or not because that will be your habit in space. I always say to the people do not judge the house of God by the man who breaks the bread.

### ILLEGAL DOWNLOADING

Rick: Mr Keshe, there was a question regarding the illegal downloading of your books which you mentioned might be as many as a hundred thousand times. Sandor asks – "how about offering an amnesty to those who downloaded the book and to invite them to contribute with a payment to the Kfs paypal account?"

MK: No we are not asking for physical payment (chuckle) it's the intentions. This came to me early on with Professor Mile – as you know I was with Prof Mile in Germany in his house and he showed me one of his books and he said, "Mehran, they have downloaded this book and it's 600 pages, and it's free on the web site." He said "I have no income from it because they have

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

done this to me.” I said, “don’t worry because the ones who have done this will not receive the knowledge – they have downloaded the book like a monkey – the true knowledge is not transferred the way the writer writes.”

This morning before I started the skype it said your skype is out of date and wanted a visa for the payment – when I upgraded it it could not go on.

There is no payment there is no amnesty – it’s you who have done it. One of the KS s said “I downloaded your book and that’s why I’m here.” I said “your soul is already lost!” – and he is not here with us – so – thinking is your right to do. If I put my books free on the internet there is no condition. If you think its your right to break the condition you already broken your ties.

### THERE IS NO MORE PUNISHMENT

There is no more punishment – the time of punishment is finished. I said to my wife a few days ago – “if I release the punishment on the tribe of Moses, with what they are doing, there will be no name left of Moses on this planet!” If I do the same with Muhammad’s followers it will be the same, there will be no name of Islam left. Not even papers. But the time of punishment is finished, man has to find his own peace, then there is no punishment and everything is correct.

By God! So many times in the past few weeks I sit and I say something has to be done with this situation. Punishment has not worked with the man because the man never understood. In the universe there is no punishment there is always a balance.

At the beginning of the day I said if I feed a small amount of H in one side the Gans reactor changes its power, because it needs it – to be in balance with the rest so the full 12 reactors can be in harmony. This is what has become the habit of the man and actually one of the best things that has happened to the man is the internet, because now man can instantaneously test himself.

I don’t know if we get a permission or not – one of the Iranian followers I think he is in Austria, sent me an email and a link to one of the Iranian singers, who sang a song that it literally

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

captures the whole meaning of what the Kf stands for but it is Farsi – and I could literally put it on the link on the Kf. I wrote an email and asked him to ask permission from the singer so we could put a subtitle so we could use this as an anthem for the foundation. And I went and I found the website of the singer and I sent an email to him that he could allow us to use it. It's all about what man feels with no guns and no prisons, because man has the habit of killing and spends his time in prison, the prison has to be in the soul – fear of what I'm not going to receive for myself – what I think, what I give, what I receive and what I don't receive because I do wrong.

### THE BENEFIT OF VEGETARIANISM

**You find a lot of these habits do not exist with those people who are a generation of vegetarians.** They are still animals – but animals in the level they don't exist. Do we receive too much energy that we use it for aggression? Or we have to release it as aggression? – Or we get a high from it and we repeat it to get the high? This is the problem...

When you drink from the COL it might take you 3 months, 10 years for your soul and physicality to come to balance to see the result. These COL have been given out by the foundation in different form and cover for the last 10 years to the health side for the processing of the body but nobody understood. There are thousands and thousands of COLs with the people who have been with the foundation. If you have used our systems – the blue cups or the green cups or the black cups – the color of the cup has a meaning – then you have in combination probably already received the COL. That's why you feel better and you walk away from your own physical problems. Now we make it in a general way for people to see.

There is no punishment; the time of punishment has finished. Punishment has never answered any of the questions in the levels of the past that the prophets have set. You punish your child a hundred times and then you give him a kiss and a cuddle, and he feels better. The time of punishment as set by Moses, Christ and the other prophets of God is finished. We leave it to you to deprive yourself of what you are about to receive.

### THE GAZA QUESTION

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

Rick: Mr Keshe there is a question – ‘what is MK’s view about what is going on in Gaza?’

MK: You don’t want to know! You do not want to know!

Rick: OK well I have another question along those lines ...

MK: No – let me tell you something. As you know where we live, we live on one of the most beautiful parts of the planet. I don’t think God could have been any kinder. In this place when I go for a walk, it happens quite often even now because of the holiday time and people come from all over the world to spend their holiday time for the peace of their body or their physicality. I hear a lot of Hebrew, because of my background I understand a little bit of Hebrew and always speak to these people. They come from Israel for holiday and my wife was talking to one of them last week, and the woman was trying to say that what you hear on the news is not what is happening in Israel. This is all wrong. And they tried to justify how and why they are killing each other. Always when I talk to them I say my biggest problem is I come from both sides of the fence and I don’t see any reason for fighting for a piece of land.

The reality is I don’t agree with what Palestinians do to the Israelis and I don’t agree with what the Israelis do to the Palestinians. But you have to understand the reasons of each side. One is doing it to free the group, and one is doing to protect the group, and both is out of fear – unjustified fear which is built to sell arms. The strangest thing is if you’re in one part of Palestine you can work in Israel, and the same Palestinian from another part is locked down, so cousins in 2 different parts can’t see each other.

When I was in Israel last time I went to a Holy place and I could hear Arabs doing the gardening. And I said “what happened to the Jews? – We are in Israel!” – and they said – “Oh we don’t have that problem here we live and we work together.” They come from across the border into Israel to work, and from another section of the same place they are terrorists, and they have to be killed.

### [THE SMELL OF DEATH](#)

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

So who is getting benefit from it? The ones who are selling arms and they justify it. The problem is I have prayed in mosques and I have prayed in synagogues, and I have prayed in churches, and the feeling in all of them is emptiness and no God. If you walk into a Church you smell the smell of death, you walk into the synagogue you get the same smell, same with the mosques – it's the smell of death of the body of man – and nobody notices it. It is not the physical smell – It is the emotional. They come there for one purpose – to rob, to beg and not to give and not to receive.

The Holy Places, the religious places, and the nations that are built under the name of religions all smell exactly the same – **of rotten meat** – in different ways. You walk into Vatican – you smell it. You walk into biggest mosques you still smell it – because the essence of the teaching of the prophet is not there any more. It is just physicality to frighten people. The bigger the building you build the more frightened people get and they think you are more powerful. I say to my son sometimes the temples and the buildings and the mosques and synagogues have to be built underground so that the man realizes what is his destination at the end. Because at the end you end up under the ground... Next question!

### A STEP BEFORE SMELL

1:04:30:Rick: You just mentioned smell – you can walk into a room and essentially smell the atmosphere of the room, but in a different way than most people do. Is that associated with the Gans materials? You mentioned that nano particles are part of smell.

MK: It's the emotions that are left.

R: OK how is it that it's... like for example science knows it's smell that has the most emotion, it's the one that has the least distance to the brain – to the mind lets say – so it's the thing that's the most immediate when we walk into a room – we go by smell first then by sight and hearing and so forth.

MK: No-no, there is a step before smell. You have to understand physical structure. Smell is a gas in a Gans structure. It's a crystal structure. A gas takes over a shape, if you release

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

hydrogen in a square it takes the shape of the square, in a sphere it takes the shape of the sphere. Smell is a gas in its diamond crystal structure. And then when it goes to the nostril through the bone in front of your head it changes to a structure that the brain can recognize. But before the smell, before you smell smell, in your forehead right in front of your head, you see it in whales and dolphins – right in front of your head you have a receiver, which smells and tastes and understands the emotion. Before you smell the smell. It's like a sonic receiver that does not need eye, or physicality because it's instantaneous.

This is how you build trust and feel safe with someone. You don't smell them to see if they're safe – you don't eat them to see if they're safe to eat. The forehead in front of your head, which is directly connected to your brain, is the recognition – you don't need to smell. You feel, you understand, you taste the environment and what's been left behind. You don't smell the clothing you don't smell the chairs, you know what has been left in the chairs and the environment of the room, and that's what I feel when I go into these places.

### FEEL GOOD AND LEAVE GOOD

This is what our ancestors used to do. You feel the emotion and feel the soul, and this is part of what I do. I always say to my wife and to people around me - the only people who can fail is themselves, because I know them, I see them. The essence is when you feel good, you leave good behind you. And that's how it is.

A lot of people tell me – why don't you release the medical side and make millions? I said no because then it loses its essence. I can do 200 300 medicals and make the foundation very rich and nice looking on the outside but I don't carry the essence to them what I need to do. But you have to understand – people don't understand what it is and how it is that they themselves allow people to abuse them physically but they suffer through the loss of their souls.

We show physically what we want to show but emotionally and through our soul we never show because the man has not managed to read the soul – once you become pure enough to read the soul of the man you will find out that you don't need the physicality. I explain this in every shape and form in marriages and relationships and you see more and more of it. We had a case where the woman was paralyzed due to a disease and she came to us and she could not walk in the room, and her husband says you have made her worse, this is a gimmick and everything else. I asked her to sit with me privately and talk – she said “the minute I show I can walk he

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

rapes me, and that's what he's done for 30 years, so I pretend I'm paralysed then I'm safe. So there is nothing wrong with your process. I can walk, but the minute he's home and he sees me walking I'm back on the table!"

So what is wrong – the behavior of the man, the physicality of the man, or the process. We are used to abusing people, but I see, I feel and I don't need to see to know, and a lot of you have the same power – it's just that you are blinded to it... Next question.

R: Are there any questions from the Go-To meeting people?

MK: I think a lot of people have started asking themselves questions!

R: chuckle – yeah I think they're afraid to ask a question at this point!

### [A QUESTION FROM BRETT](#)

Brett: I have some questions Mr Keshe – this is Brett.

MK: Yes Brett.

B: At the centre of the heart where the fibres are that create the electrical activity – that specific structure allows for the implosion of energy to come in – now in the centre of the brain when we create the structure through thoughts and you create the emotional connection with structure and that allows you to see the plasma – correct?

MK: I don't understand. Can you explain?

**Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014**

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

B: Ahhh... its hard to explain without getting into a lot of details that the people don't understand – I sent you an email if you could read the email it will help me understand what I am trying to get through.

R: Can you formulate your question in a simple way that makes it simple to answer?

B: No I had to write a page.

R: Then how do you expect MK to answer it in one sentence?

B Because if he had an idea... I don't know!

R: Nobody else will understand your question ...

Formulate it now if you can or else go on to another one. ... I think I understand somewhat of what you're trying to say there – I think you're trying to connect the heart and the brain with feelings – can you formulate it a little better perhaps?

B: Its not just the heart and the brain – you create a specific structure that allows for the energy to come in and be absorbed and if you can create that structure it will absorb the energy – and your thoughts and your electrical activity in your brain creates a structure that allows a constructive wave that implodes energy and absorbs it – and if you don't have that correct thought and structure it wont allow it. So it's the same thing with your heart rate and your breathing – It allows the structure to be absorbed – the plasma to be absorbed.

MK: In so many ways – maybe I understand your question, maybe I can answer it the same. Your brain or your emotional part does not create a heartbeat – it's always constant in reaction, which are the end products where your heart beat is continuous change. You create conditions and different GMfields with your heart – your heart becomes very much a dynamic reactor – that's why in one day you fall in love with one woman and in 3 years time it changes to another woman. Or vice versa. The state of brain, the emotions, the field of the emotional part of the man never changes. It is always constant to what it is and what it needs to receive.

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

B: I'm talking about the physical structure that allows the pathway to open up to the emotional mind or those other parts of the body – to the energy. Like you use a diamond structure and then you have a five-sided penta...

MK: Yeah... the thing is – maybe I understand you ... maybe I can answer it in a way ... if I don't understand it you correct me. (Sigh).

### BIGGER THAN A PEANUT

### SMALLER THAN A WALNUT

This is the essence of creation of the body of man. This is what I always say in talks. The emotional part of your being is the size – bigger than a peanut and smaller than a walnut. It has no physical interaction, but the GM field which it sends out interacts with the physical body to manifest its operation. What this means is that your emotional part does not send a message to your physical part to kiss or to cuddle but it sends information in a field way by it being received by the physical part of your brain you show that reaction by kissing or cuddling – or by hitting.

B: Yeah – that's kinda what I'm talking about but there's other structures within the body that absorb the energy the same way.

MK: It works in different field strength – let me explain. Each one reacts in different field strength even though it's the same plasma – this is what I explain in other workshops – it's the same plasma. If you go across the world it changes its color according to its reaction with its environment. The heartbeat creates a plasma condition because of what it is – but it's of a different GMfield strength of level. Part of it can be absorbed by emotional, or received by emotional part. When a soul is in need – when the emotional part is in need – it will reach the furthest points of the universe to receive what it needs to be in balance. This is what the man will one day understand.

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

Very much the same as the 3 sets of reactors we set up in the lab. One reactor 2 metres away with a small gas will effect the operation of another reactor, which is not even matter directly – because it needs to be where it is to become balanced.

Your emotional part – this walnut size – everything you do in your life – all your walking all your kissing all your thieving, all your killing all your loving – is to keep this peanut operational. If you can take this peanut part of the physical structure of the man it will attach itself to any structure anywhere in the universe and it will use the same physicality to carry on with its existence. You in the future when the time comes, when mans understanding that there is no need for physicality and the tie in with this how it's created – you will carry the emotional part of the brain where you can supply energy to it correctly, you can take it anywhere in the universe – talk to it you can understand it's emotion – and then it goes – how I always say – what languages do the babies talk in the womb of the mother to another baby in another womb? There is no need for physicality. But at the moment this is too far to understand. You will not need to carry the whole body to feed it – to carry its emotional intelligence and its work.

As I always say when I speak to the medical people – if you take the emotional part of the brain out – the rest of the body, the rest of the brain – all this huge cavity in the skull filled up with this material – the rest of your material body, all your heart, lungs, everything else – all is functioning to keep this peanut operational that it can receive energy. That it can connect and interact with the rest of the dimensions – man will soon understand.

The more you become mature the more you will see the truth. So in the future you don't need to carry the arms and the legs – as I always say – you see some of the most intelligent people in a wheelchair with no arms and legs – physicality has nothing to do with the operation of the soul.

What happens now that they are putting mechanical hearts in the body of the man – would that effect the operation of the soul? Or the emotion? It's mechanical! – chrome or whatever they use in it. This is again you look into the physicality – the operation of the emotional part which is connected with the soul of the man it releases its information on the same level as what you understand as a reactor – but what is perceived by other part of the brain it allows the physicality to show itself in that position and the movement we see it.

[UNDERSTAND SOME THINGS!](#)

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

Understand some things! A lot of what is connected to the operation of the soul, operation of emotion, operation of physicality, and operation of the running of the whole physical part if you starve the body of air, which is the conversion of the energy to the blood directly through the emotional part, the emotional part does not receive energy and you cause death. You can go without water and food for days and days and as I said a couple of workshops ago you can adjust your lung to receive the energy that it receives as it receives the energy of the water and the food.

So you understand in a very simple way that the reason if you put your hand or suffocate someone, their physical body dies very quickly because the emotional control part which is the essence of the whole creation does not receive the energy it needs in a rapid way – because it is a very fast working and continuously needs to be fed. Now maybe you understand. If you look, breathing, eating, drinking is each one way of supplying energy – but each one is for different part and different purposes.

The air we breathe is for rapid delivery for operation of the emotional part of the body – and it's so active and dynamic that it needs continuous supply to disperse energy to the rest of it – to deliver it's GMfield. And that's why if you can create that dynamic energy that crosses the wall of the lung to the blood – that enters the inner part of the brain very rapidly – that's why our heart is so close to your brain – then you understand the operation of the body of the man in its true essence. If you separate the emo part of the brain – the size of a peanut – then you can keep it with the continuous energy – it's a Gans – it's a dynamic Gans, but it looks to us to be as solid as a brain.

If the scientific world looks into the structure of the emotional part they will see exactly the same operation as Armen has made in the Gans reactors. You will see the texture – the whole thing is exactly the same – so the heartbeat, the change in the heart – does the character of the man change when you have a heart transplant? Yes it does! But it doesn't change the emotional part because each heart creates a different GM field. This is something I made in notes, which I wanted to speak about in a slightly different direction to do with the health side and with the physicality

### [PROBLEMS WITH STOMACH REDUCTION](#)

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

1:27:57: In the recent past 15-20 yrs, we have seen, due to the pattern of living of consumption of material in a disbalanced way, and the body gets used to it, that the physical size of the body increases. We see people 2 or 3 hundred kgs and 180 kgs and the rest of it – This what they call obesity has created a very good market for poeple who work within health section and different solutions how to loose weight or – wadayacallit – **fat**. One of the ways which has been done, and in a way people who are heavy try to do, trying to reduce 180 or thereabouts to a 100 kilo or become lighter – you got to realize you weren't born that size. You have created a condition for the body physicality to become this size, and this process has taken years – you don't have this over 10 or 20 years – so the rest of the organs have changed to support this weight – this operation to do with the liver the heart everything else is synchronized to support 200 kg – now it has become fashionable that people reduce weight by reduction of the stomach by all sorts of processes.

That process can be like a switch – now you can eat only a peanut – all sorts of medical operations done by the medical people – this rapid reduction in weight due to stomach reduction does not mean that the other organs will adjust the same way – we see drop in weight 30 or 40 kg and one of the side effects is that once you loose weight you reduce the fat but the skin cannot respond so rapidly as the fat layers, so what you get is huge overlayers of the skin – something like hanging pieces of meat – and then they do the skin reduction – you go to hospital and they take the surplus skin off. What the medical world does not say is that the large majority of those who go through this process are showing the sign of cancer diabetes and death.

1:32:56: In a large number of cases we see a large increase in diabetes – and a large number of people because the lung has grown so big to support such a heavy weight – now the body is confused by the loss of so much material which is not there you find out there is lack of oxygen in the body. The reason I raise this today –is please – if you go for these methods ask the doctor what happened to other people that had this operation in 10 years – you find out that a large number of people who go through the stomach reduction and then skin removal show diabetic condition and other problems which associates with this disbalance in the organs after the reduction.

My suggestion is please watch what you are doing because we have had several cases brought to us – their stomach layers have been reduced and in a large number diabetes is the outcome – I think governments have to start looking at the stomach reduction processes in terms of the consequence causing death and cancers. If you do this in a slower way by reducing food – this is difficult for some people but I think there is a very urgent need in the western world for the

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

consequences of the stomach reduction and surplus skin, especially the removal of skin created a psychological problem for people and diabetes is stress related.

We have a problem with this in last 10 yrs or so – maybe the body was happy with the larger size – they cannot handle all the changes and this leads to diabetic condition and because of glands overproducing for a large body no longer needed – this is creating a large number of deaths at the moment – doesn't show because it is labelled diabetic and not due to skin reduction and not related to the surgeons so they keep going. Ask for a full history of 10 patients of these surgeons – how many had diabetes or skin cancer? The skin cancer comes because in cutting the skin you create a different condition and the thymus does not send the right info to the glands for solidification – so it creates a new environment of solidity, which you call cancer.

The same process is exactly with the pharmaceuticals in terms of chemotherapy – I support the chemo now that we can resolve the side effects – at the moment 50% survival down the line – most chemotherapy has this effect. Same as the heart valves – once you replace heart valve the life span is according to the life span of the heart valve because you cannot replace it a second time.

So these stomach reductions, people should understand the consequence – I refuse to accept these cases because too much happening in the body. A large majority of people who go through stomach reduction and then skin reduction end up with cancers, diabetes so be careful. Part of this is with what your emotional part accepts and what you physically go through, and you get diabetes. Diabetes has to do with imbalance between emotional and physical – emotional part is under stress – you look at the structure of insulin and you know what energy it produces.

### UNDERSTANDING TYPE 2 DIABETES

Always when you start working with the Kf on the medical side, go and look always – rule of thumb – hydrogen balance in the structure of the material – connection with the Hydrogen balance and what radioactive material is available in the material – or what condition that material creates with radioactivity in other material to be created. Look at the structure of the insulin – the amount of insulin you use will give a good indication of the state of the emotional part of the brain.

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

We've done tests, when you allow the emotional part to process what is not acceptable to it the use of insulin drops like a brick – we don't touch the physicality for interaction with emotional part – you bring the emotional part into balance and less and less use for physical manipulation. You find a lot of people get diabetes due to stress from the time of within the womb of the mother – Diabetic (Type) 2 is always created under a condition of stress the person doesn't want to accept to do with emotional part that manifests in the physical part.

### A QUESTION ON TEETH

B: I have another question about the health – about the teeth I was studying the crystal structure of the teeth and how it absorbs energy can you explain that?

MK: No... (chuckle) As dentists will tell you the teeth are part of the skin of the body but the inside is to do with the physicality and the way the nerves connected – a lot of information by chewing is passed onto the brain.

B: So if you pull your teeth out you'll have to find a different way?

MK: Not really you can loose all your teeth and you still receive info – very much like when you walk in the water and feel it with your feet but hands out of water, you can still receive the information. I looked at the structure of the teeth for a long time how to regrow it because you know we have the doctor Yvan who is a dentist KS, and one of my relatives is a dentist we discussed this for years and years – so we understand it – but we have to go into more detail.

Brett: OK thank you for answering the questions – please read my email whenever you get time this week.

MK: OK thank you very much.

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

### HOW ARE THE FROGS DOING?

V: Yes Mr. Keshe we wanted to know how the frogs were doing?

MK: One of the frogs died yesterday – the one which had the shortage or we could not see the arms and legs – so we put it in alcohol for when the KSs come back. So one is still active running around, the other two are still there – so now we got 3 frogs. We put a stone in the container with the frog so it can come out on the stone, but we got to see if it goes through the evolution – there is an abnormality with the frog but we have it in alcohol.

V: Right it might be an abnormality in the genes.

MK: Maybe – I could see there was an abnormality. We understand the condition here there is thousands of tadpoles, tens of thousands of tadpoles are created and we see about 40 50 frogs coming out – some are eaten or picked up by the birds but we have some – but it seems a lot of abnormality with this little chap.

V: So that means that there is one left fed Gans?

MK: No we have 3 left that have been fed Gans and 2 with the normal condition – altogether we have 5 left out of the ten at the moment... next question...

### A QUESTION ABOUT GANS

R: There was a question about Gans – when copper Gans is produced is all the Gans coming from the copper in the solution or is some principal matter being converted to copper?

MK: Could be both – because the environment in that area creates and enforced a Gans condition but would some of the principal matter manifest itself at a copper level I think yes its

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

possible. This happens in the universe – If you create a condition the plasma manifests itself in that condition – thus with the Ks in the next few months we are going to create the condition the environment that other plasma can be seen in – wadayoucallit – **a visibility box** - where things that are not visible or tangible to us we can see it if we create the condition.

There is a lot of things we need to learn step by step – we need international collaboration now. The position is that our lab is not sufficient enough to go to the next steps – so in the coming weeks I have already requested international collaboration and we have already received contact with a couple of universities and other scientists – so these things are needed, more scientists needed

R: If there are scientists listening it would be a good idea for them to get in contact!

[PLEASE SET UP YOUR OWN Kf.](#)

MK: There is one thing that is one of my concerns and that is that I said we have a lot of problems with the situation with the Kf as an institute to be located in one country like Italy. From what I've seen in past 6 months I don't think we have the rights to create the knowledge in one institute in one place. What happens if Italy gets hit or Malta or your Foundations in America, Japan, or elsewhere? Maybe we have to start thinking –

Please set up your own Kfs and try to support a couple of scientists that these KFs run on a correct balance. The political and economical structure does not allow a lot of people or scientists to move and we have seen it in past few weeks with Ukraine – suddenly how one of the biggest nations of the world has become isolated even from Russia...

1:54 Do not send emails 'We would like to open a Keshe Foundation – can we have permission?' You all have your own Kfs and your permits. Set it up according to the ethos of the Kf in Holland – it's your national interest, it's your more or less humanitarian interest. So set up Kfs and at the same time put financial resources that you can set up full research scientists to work – don't wait for us to do it.

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

Maybe the centre here in Italy will become like a point of catching up or adding into. I was talking to our webmaster – and as usual it goes in one ear and out the other one – to set up a position that all the knowledge, all the things you find, you send it to the Knowledge Centre and maybe it will be found by someone else. The way you set up your Kfs and research should not be connected to the foundation totally in Italy – please set up your own Kfs and set up the structure of your own teaching and translating – do not wait for a structure or for us here or Holland to get a way to help your nation or your people.

### WE ARE THE KNOWLEDGE BANK

We are the knowledge bank, we have to disperse to the people and we have to open a knowledge centre that all the knowledge from all the centres goes onto one centre that is freely accessible to every man on this planet. But do not look for us to provide everything – now you are getting equal knowledge from us as we get from you – set up your own Kfs – find a way to finance scientists who can work full time or part time in your nation. What happens if for example we loose one of the French or other KSs here by accident or death or by moving? That culture that nation should not be deprived – we've seen that with Jorge and the Spanish group – this shows a weakness in the structure.

You got to set up your own Keshe foundation, finance scientists, finance programs that you can support your own foundations but connected to us. Keshe foundation has no borders no boundaries – knowledge is freely given to all of you and the time has come that we have to change the game that you have to set up your own Kfs. Try to set up a bank because what happens in a few years time when I'm not here. The foundation has to set up its own base.

Everybody looks to the Kf in Holland – set up your own foundations and finance them and employ a couple of doctors and scientist and make facilities for research for your own nations – that is my arrangement in Italy and with the Japanese – you got to become independent because if I die tomorrow all the knowledge will be lost except for some nooks. While I'm alive I can add to your knowledge. Set them up everywhere and raise funds amongst yourselves by translating books and papers and creating power cells, I think one of the resources will be through the **Day and Night Torches** or through the COL – take from them what you need and put the balance into the Foundation.

### IT HAS TO BE CORRECT

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

It has to be correct. When your soul and life is at peace you serve better the humanity. Don't send emails to set up Kfs – just set them up – we don't create borders or conditons – you've seen our work we help you as we can start your own Research and Development. In one Spanish group there is 8000 of you – if you each give 1 dollar a month you support a centre and one or two scientists in the field you like them to research. Kf China is tens of thousands – 1 dollar even per year will support a lot of research.

When I spoke with ambassadors with the African problem of Ebola we sent the material free and if the result is correct they will be taught to use the knowledge and they need nothing from the west. It needs to be free knowledge for everyone – donate 1 or 5 dollars a month – we support you we have people who understand the tech. I was talking to an ambassador yesterday – he said we have set up a foundation in our country. Don't come and look for us to give you this or that – set up a Kf with the ethos of the Holland Kf and serve your people.

There is something I have to say before I forget – I don't know if you know the Camelot project - Kerry Cassidy is passing through Italy in the next few weeks – she has asked to open eyes if anyone wants to organize a presentation for her in North Italy. If anyone is available to set up such a thing for the Italian group – they are looking for 50 to a hundred people – most probably I'll be there for the presentation – any other questions?

R: That certainly sounds like an excellent opportunity for someone in Italy.

V: it sound like an excellent opportunity for every one of us to be able to open up a Foundation!

R: That's right – its almost a personal thing – you can open up your own personal foundation within yourself and invite others into it.

[BRING SCIENTISTS TOGETHER](#)

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

MK: you have to bring scientists together and set up your own research centres – start with little and the rest will come. If you do it with your heart and with the purpose of serving humanity you'll find the foundation will grow quite rapidly. People will come and join you, but at the same time you have to be able to support yourself and people will need support unless they come from a rich daddy.

R: And there are more and more scientists getting involved in nano tech now, and institutes being formed and built in many countries – one recently in SA for example.

MK: The one in South Africa is for environment –we are in touch with them – Prof something – cant pronounce his name – but we are directly in touch with university nano science for environment. We followed the link from Rick – we see how it Can be used and processed further for SA – this is especially for Ebola.

R: you have a connection with SA do you not?

### [CONNECTION WITH SIERRA LEONE](#)

MK: My connection is with the government of Sierra Leone. We are well placed in Sierra Leone with the universities and within the structure of the government and that's why as I said came the request for help with Ebola. Even if this trial is successful though, these countries do not have the resources to make the machines needed, so we have 2 choices. We have to look to Nigeria or South Africa for making the materials to be sent to different zones in Africa. The people who live in Africa do not understand. A simple machine doesn't exist in Africa but in every university in the west there is ten of them – so when we have a success with trials in Africa, we need to go to the neighboring nations to produce material to reach the affected areas.

So we have to set up our own Foundations – we support you in every way we can – so when we do workshops you need to set up and teach also. This is getting to the point we will launch the torches – day and night cells – here in Italy – rapidly tested and done. We will make the material for cleaning the environment here in Italy and whatever we do stays in Italy. If you need the patent for day and and night torch to support your foundations that is plausible. That you have to organise, but we feed the knowledge. You set up the foundation and we feed it from here!

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

R: Certainly if the people had something of the physical realm to demonstrate, like the torch or static or dynamic reactor, something that will show or illustrate the tech and show how it can be used, or even demonstrating MAGRAV fields...

MK: I don't know if you've seen the torch. Next week we open the torches so you can see them.

R: Yeah we're humans we like to see physical things or it's hard to believe!

MK: Next week we open the torch to the cameras. I made this torch 6 or 7 years ago – then we can show it if people need to believe...

R: You get to pass the torch haha!

MK: chuckle – yes maybe for the Olympics!

R: That would give you some promotion.

### THEY WANT TO SEE FIRE

MK: they want to see fire!

R: Well it's time! This is one of the main reasons I stuck with you all this time. You said at the start on one of your lectures or movies that it's time for mankind to stop the burning – and it struck me – such a simple sentence – in front of the fire place and showing the habit for eons – but now we have an opportunity to go beyond burning things and engage other energies of a higher nature ...

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

MK: next week we test the device and open the camera on skype and I'll bring the torch and we can demonstrate live. There's a problem – I've seen people making different Gans and they can power their LED lights or whatever. These liquids will produce Gans and after a while the system blocks – you cannot seal a container – a lot of Gans is produced and the process stops. So there is a way to do it with the wires to stop the contamination – and I'll show a video on the internet.

V: Mr Keshe you won't get any Gans with distilled water – right?

MK: You still do – because the way you Nano coated it you still carry material in your coating. I have done a lot of different tests and containers – distilled or not distilled, but the thing is – once the process starts you cannot stop it. In the spherical test unit we haven't seen any Gans – and we used normal water from the tap ... any other questions ... .. hello ...

### ARMEN'S CO2 GANS PRODUCTION

2:18:54 Armen: Yes Mr Keshe I set up one cell again with the copper and zinc and it's producing! – On the second day! – It's so much its unbelievable! Maybe the way I set it up, but it's really a lot. I posted a video if you can see it – it's the second day – 24 hours

MK: What are you producing? CO2?

A: CO2

R: By CO2 Armen you mean the white material?

A: Yes

**Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014**

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

R: Someone had a Question earlier that they were producing a blue material and they were wondering if that was ...aaaahm...

A: Tonight I set it up with copper and copper and one more with copper and lead – I just wanna see what different materials – how they gonna react – with the zinc and copper. Mr Keshe I just set up the process and at 24 hours I am surprised – like when we set it up it took 3-4 days and it started to produce but this one is producing unbelievable and still going. I shake it up a little to free it up the clogging and the process starts again.

R: So what did you do that was different with this process?

A: I used the video.

V: So Armen, you're talking about using the wavy sine wave pattern on one side and the other side cut into strips ...

A: Yes and it produces in 24 hours – today its more – a lot more –

V: And what salinity are you using – what's the salt content?

A: Sea salt maybe 30% - like I have a ppm to pick it up so I can tell you – because I am using zero content water and I add the salt.

V: so that's the ppm but not the salinity of the water...

A: It's still gonna show you – I tried it...

V: so you think this is 30% that you're making?

**Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014**

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

A: I think so.

MK: Don't forget Armen is becoming the specialist in these things. He's gathering a lot of knowledge but at the same time he has a talent for testing without borders or limitations to see what the outcome is. He comes up with ideas but in the coming time we have to put data so people can repeat the process. The problem is that all the salts are not the same and the different content of the sea salt gives different results. Even if we use the same percentage of different salt – if we use the white table salt that is labeled sea salt there is a little phrase in front of it – it says 'refined sea salt'. You'll find that most of your results are the same because you use the same material but if you use real sea salt then your result and outcomes will be different because different seas and different salts have different mineral content.

A: I use kosher salt.

MK: hahaha lol – how do you kosher the salt?

A: I don't know – I just use kosher...

V: Could use epsom salts too!

A: Anyway it's interesting how little change can change the production.

V: Right but that should be a change in the electrodes more likely to change the outcome.

A: We done this with plates with no cuts – and it was different – very slow.

V: We done it with twisted wires, we've done it with a bunch of other things as well.

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

A: I don't know – you do it yourself and you see it.

V: I see it – it looks really good.

### DIFFERENT TYPES OF SALTS

MK: we have a problem with the sound somewhere we keep on losing Armen. We have to see what salt we use.

A: I use Pacific sea salt but today I change it to the kosher – but I use Pacific Ocean sea salt – I don't know if it is different.

MK: Let us know next week.

A: Sure I will – and I will try with Himalayan salt – have you tried that?

MK: No I've never tried it – the trouble is most of the salt you buy is refined salt.

R: Just sodium chloride right? Whereas some of the other salts will have potassium chloride which will change things.

V: Just be careful there because I can go down to my local health store and get 'sea salt' but it looks exactly like table salt so I know that it's probably not correct. So what I did find there was a Celtic sea salt, which is a grayish matter which more looks like what you would get out of the sea.

A: There are so many salts.

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

MK: The only way to know if it's real sea salt is to melt the salt in a container and leave it for a few minutes. If you get a dirty cloud on the top and the layer at the bottom, greyish layer, then that's the sea salt. If you buy a sea salt and you dilute it and you get nothing then it's not sea salt – its refined. The sea salt carries all the minerals from the sea – they open trenches and fill it with sea water and leave it to dry. Even if you use the sea salt at home you have to wash it – then you see a black layer on top and dark layer on bottom – then soak that up with the tissue – then you put the rest through a filter.

V: That's what happened with the Celtic salt.

MK: When you have a sea salt you have everything that is in the sea – bits of the bone of the fish, excrement dirt, whatever is floating in there so when you wash it its better. You still have a lot of metals etc invisible but that's no problem. But the dark part can block the system so better to do the cleaning first. I had someone looking at the containers and with one look as a scientist he looked at the copper container that Armen made before he left that went blue and he said – “this is oil structure on top of these and the other one on the other tables this is fat” – and he explained the difference between the oil and the fat. He said this is a protein oil like a cooking oil, and this is like a fat also with protein structure in it – so scientists who understand this can explain with one look. Armen are you still getting fat on the top of this cell?

### THE TRUE ORIGIN OF FOSSIL FUEL

It's proven that (*so called*) fossil fuel has nothing to do with fossils. The oil we use in our cars etc is from the gases in the atmosphere. Oil will never run out – the more CO<sub>2</sub> we produce the faster we produce oil – so more CO<sub>2</sub> from global warming is helping to produce more oil. So what might have taken a million years now takes maybe 10 years because of the CO<sub>2</sub> in the atmosphere.

Something which is strange enough re the heating of the planet – this is a natural process as we get closer to our sun. Naturally the poles will melt over the next few million years – as gravitational field pulls the earth closer to the sun. This is nothing to do with global warming – this is a good business but in fact as we used to be near Jupiter billions of years ago now we have come closer to the sun the heat of the sun will melt the poles – the beginning of the end of

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

life – water will evaporate etc etc. So the idea of global warming melting the poles is not correct this is a process of getting closer to the sun – nothing to do with CO2 in the atmosphere ...etc etc ... any other questions?

R: Pretty much questioned out here!

### GIVING THROUGH OUR SOULS

MK: Maybe we can do an explanation in a different direction. Let us learn how to pray through your soul that you can reach – let us learn how that we can give through our souls and elevate other souls – to allow them to elevate above our soul without the fear of being short of anything. Maybe this is what has never been taught by prophets of the past is that giving does not necessarily have to be by thoughts and words but it has to be by emotion – where it touches the soul and gives to the receiver what he needs to take from it. Maybe it's the way to understand by giving we don't lose anything, and we don't become poorer.

Maybe it is a new way of teaching the way we live in the universe, attached to the emotions that affect the physicality because the physical side of any being in the universe is a slave to the emotion. Maybe its time to start a new way of looking at how to share, not only the knowledge but the emotions in a true sense or allowing access to the soul. This is where you can open up any soul to another soul to receive what you need and at the same time you receive what the soul needs to give. So at the same time you're a teacher you're a student and at the same time you're a nourisher you get nourished. From the higher levels or equal and plus.

### MORE ON THE GAZA QUESTION

Maybe I go back to the question from Rick about Gaza – let us all give freely from our soul to the Prime Minister of Israel that he shall receive as much as he needs and through it effect the work and the direction. Maybe by giving freely to his soul we reach the people who finance these things because the man is a spokesman and the people who decide sit behind the curtains, maybe through his soul we can reach the people who finance or encourage these things – we don't pray for the man but we give to the soul of the man.

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

There are hundreds and millions of supporters of Kf around the world and a lot of people listen to these workshops. Spend time opening your soul to the PM of Israel and the other side that through them you'll reach to the paymasters and through them we see man elevate to the next position and maybe as I say the situation in Gaza and Israel is a test for mankind to learn how to give freely to one soul. These souls who create conditions like this, they are in need. So let's fulfill their souls that they have no needs - don't punish them just give them so they have enough and don't need to look in another pocket.

### [PRAY FOR THE ROTHSCHILDS](#)

This goes the same to the Rothschild family. Lets pray for them lets give our souls to them to elevate them to finance peace not arms. We are very clear of who supports what, which physicality is supporting what. Let them use their talents and finances for the better of man through their souls. When you go to sleep and have peace time, just open up your emotional side and your soul to the whole Rothschild family. They need – but when their soul is satisfied their physicality will change direction. Maybe then their money, which is spent on developing weapons, is spent on developing solutions for mankind.

I don't know but maybe we need to pray for our own soul to evolve so that we can reach them and help them. Every soul on this planet has the power to reach the status of the prophet of the past. You can attain the levels of his holiness the Christ or bless his name Muhammad. Its you who puts the limitation not your soul, and through that though the sharing of the bread could reach 2.2 billion people after 2000 years maybe a handful of us can reach the souls of the Rothschilds and the PM of Israel and the people who run that country that they open the gates of their soul to their body and through that find peace.

The maturity of the man has come when there has been equality – For years they spoke about the slaves how many have been used to create the pyramids of Egypt, and now the documents have been read we find that there was very little between the commander of the army and the one who pushed the stones, because without one the other couldn't complete. Maybe it is time to share the soul not the prayers, and then we can reach a point of 3-400 years of gathered wealth of Rothschilds, but we give the wealth and at the same time the wealth of the soul and the physicality.

## Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

If man makes history from the people who finance wars and create the conditions for war to be created in the time coming you'll find none of them will reach the solar cell of this solar cell, because the life in the universe will not allow them to pass. So those who call themselves the financiers of the wars, the ones who speak about war – they are still learning about the war. Till we stop the wars within man himself, and between people and nations and fellow man we have not developed the structure to join the universal condition.

It's very very strange, 10 years ago all the western nations were in a hurry to get to Iraq because there was a lot to rob, and today the same nation is under threat and nobody wants to go in because they already robbed the central bank. So we might send a few drones and attack a few people but the country is in absolute chaos because there is nothing else to rob. Maybe if we rob all the nations of all the gold Rothschilds will not be interested in any more wars – I pray for your souls all of you whatever company you work under.

Its not building a reactor to match the soul of these people to affect them – their soul has to receive so much that by saturating has no choice but to find a position to become part of – and because all of us we have a mother gene connection we can reach these people very easily through our souls. If we punish the Rothschilds or the people who finance these wars because the war makes money by selling the arms and then by development afterwards there will be no guns left – and there will be no names left to be proud of what they do.

There is a reason we are here in Italy. We sit not very far from the house of Christ and we are close to the biggest arm-manufacturing factory in the world. Every time I go to (the town) I feel death I pray for the souls of the people who go to work to make guns. Sometimes I think what would happen if they used the material they are using here all the carbons and other things to make the guns, and all the ammunition they are making and building within kms from here can be used to make Ganses to feed the world and make systems so we can fly out of this place.

There is 40% unemployment in Italy – 40% between age of 14 and 35. How can we put so many people back to useful contribution to humanity – not by guns, not by killing. You have to give enough to the soul of man that that habit of man disappears - it doesn't exist extra within the soul of the man does not accept the work of his own physicality and responds parallel to his emotions and his soul – let us learn to pray by giving freely from our soul that we elevate them.

**Transcript from 23<sup>rd</sup> Knowledge Seekers Workshop held August 14, 2014**

(v1 2016-04-09) DRAFT (Transcription has not been verified. Double check info with video)

The Rothschilds and the people who financed these wars for centuries need a lot of it! Because it has become their habit they don't see how low they are. They become so low in their soul level that to them that's the only position they know. Let us share our souls with the pope and all the religious leaders, that through their souls, through the soul of their, what we call commander in chief, which is the Christ – bless his name, and Muhammad, bless his soul, and Moses, God's name be on him – that their followers through their name will find peace and balance. Thank you very much for today – enjoy life!

Rick: Thank you so much that was amazing!

MK: Thank you very much – see you next Thursday.

R: Great thank you – OK that will be the end of the 23<sup>rd</sup> KS workshop – thank you very much for attending and the live stream for bringing up some good questions.

A: Thank you Rick, thank you so much.

R: And back to you Armen!

V: Okay good night everybody!
