00:00:00

MrFixitRick: - Almost ready – just another few minutes

MK: We need the guy from Taiwan – try and get him on skype - Its OK – we can start without him

MrFixitRick: - OK this is the beginning of the third Knowledge Seeker Workshop from the SSI and we have on line Mr Keshe and several KSs of the SSI – so lets connect with them and see whats happening at the SSI

Marko speaking – good morning – we are a bit late today – we were observing our experiments – busy in last 2 weeks with experiment to capture CO₂ in GANS state , and we have done 2 or 3 experiments with this – some of them we made with KSs and this morning MK showed us his experiment – some interesting results w capturing of CO₂ and other materials – these materials also will be used for Fukushima cleanup testing – end of week our Japanese KS Yukako will take these materials to Japan for testing. Other research around the world is confirming that nano materials absorb radioactivity - we are trying to show how nano material can be produced easily and without sophisticated equipment – we try and upload videos – links to them posted by Marek on youtube – SSI site – we will see it in chat and if possible I would like to see if we can publish in the Live stream and GO TO meeting chat, and all available communication channels – so this week was busy – especially with publishing of all the data on the USB stick – actually the Taiwanese scientists they have decided to publish the content of the USB and this data is now available to all the people around the world – many different servers – some of these servers are unable to carry such a large amount of data- anyway we are trying to follow last years process with the World Peace Treaty – and we are trying to pass this ethos to world population, and we invite them to make a commitment and sign this document, and to act according to the Ethos of this document – now I pass microphone to other KS – can I introduce Ivan – he is a medical doctor

Transcript from 3rd Knowledge Seekers Workshop held March 20, 2014

(v1 2016-03-05) DRAFT (Transcription has not been verified. Double check info with video)

Hello I am Yvan – I just wanted to say I am a dentist – medical field anyway – since I have been absent in last couple of weeks I have not been involved much with the creation of nano materials – but this week we have also started to look at the plasma reactors – and well I was already thinking about this for the last couple of weeks while back in Belgium – so what I understood was that the activation of the plasma was achieved first by the vacuum that gives room to the elements in the gases the electrons and the protons – then the neutrons – with the new reactors the conditions are created to allow a plasma to form – so the right environment is created- comparing this with my medical knowledge our body is always trying to heal any wound – its not the doctor that heals - it's the body – for instance if we break a bone the body heals it – the doctor just have to create the right environment to allow the healing - the body will do the work – this is the same as the ignition of the new tech for the plasma or life to manifest – that's what I was thinking just now – passing the microphone

Yukako: – good morning Rick and all the KSs this is Yukako from Japan, I just got back this morning – I have been the beginning of this week with scientists from Kyoto who are showing a lot of interest – and giving an experiment opportunity – this is the Oyster bed - the water showing site contamination – but they have to have a solution for this radiation – even in Kyoto there is a level of radiation from Fukushima. Two associations are going to collaborate in use of nano materials to clean contamination – I am taking 2 types – one is CO₂ and the other is copper powder nano extracted from nano coated pipe – also 2 types of filters – one is a mesh with nano wires and the other we have mixed materials – different type of wires, zinc and 2 types of copper – and at the end I am taking 5 materials for exp on 28th March and I will spend 4 days at Fukushima – to share this experiment and record and upload asap – Japanese supporters are excited – I am thinking to make a little workshop to show nano material process – so I hope next workshop I have positive results – but even if not positive we have to develop the experiment process – some Japanese supporters gave big encouragement – but they maybe think magic wand – I think the Keshe tech is innovative for sure but we have to experiment and use our knowledge and wisdom to use thus material in the right way – not instantly the best results from the beginning – but this is a great starting point – I appreciate your support and encouragement – I uploaded a photo to facebook on what we are doing – please check and give ideas if you have them – thank you!

Jorge from Spain – Hello Rick and all – I would like to transmit I am very excited because the things we make this week are very interesting – we are touching the big mystery of the beginning of life on earth – when scientists – and me – going to be enlightened today by Mr Keshe who is showing us the beginning of the life – and experiment with simple conditions, not only CO₂ but things about the beginning of life – biochemics, how to produce the first molecules that can replicate and carry life – on other hand I am proud of my work – I have more than 7000 visits – I try and keep my contacts with Spanish world – we can talk later about all these topics –

Transcript from 3rd Knowledge Seekers Workshop held March 20, 2014

(v1 2016-03-05) DRAFT (Transcription has not been verified. Double check info with video)

Armen: – Hello – one thing about ...

MK interrupts – you have to introduce yourself! Armen: – Oh! They know me!

MK: go ahead

Armen: OK I am Armen, I am one of the Knowledge Seekers –

Ludmil: – ‘it’s too early for you!

Armen: Haha, you recognized me – anyway – what I want to start with I know all of you are making these reactors, the first thing you gotta do is – you gotta pray for it – because, you know, every creation need that energy to start – and I want you even when starting small reactors or any small experiment – please pray for it – you will understand why and give love to your creation – if you start something you are responsible for it – this is the very beginning of something we gonna create and its gonna be beautiful, thank you very much

John: – hello everyone I am John – one of the KSs – I suppose you are all waiting for lots and lots of new stuff so I will try and explain some details – we’ve been making cells, in which we have been using nano coated material and the material is dipped in salt cells – in fact we create kinds of batteries, on one side with nano coated copper and the other side plain copper – and that put in water with sea salt- different cells with different types of sea salt, connected in a series of cells, and these cells didn’t give much voltage – not a high voltage – we had nearly 45 – should be over 50 cells connected – we have a voltage about 1.2 Volts – maybe 1.6volts at one moment – and we left it all with a short circuit – a small current going in to a circuit – not enough to turn a fan, but enough to activate some kind of reaction. Next day when I arrive MK said I did a good job – we started to see a milky suspension in each cell, the start of the production of Gans CO₂ and appearing in each cell, very nearly the same, but it depended on different salt solutions ... (interruption in live stream but almost instant reconnection)

Rick: Oh its back - magically back!

John: Its back!

Vince: – we just prayed for it!

30:56 MK: You should have seen what happened yesterday when we prayed for it! The KSs made a CO₂ unit – the first unit they were expecting lights flashing and motors running – so

Transcript from 3rd Knowledge Seekers Workshop held March 20, 2014

(v1 2016-03-05) DRAFT (Transcription has not been verified. Double check info with video)

they were disappointed – the first exp they did when they connected the bottles of the first exp they were expecting the motor to run but it did not run but there was a small amount of energy – then we built a second one – and it was very nice I wish I had a video of it – very nice – John had his hands all over it with his own energy but it still wasn't working – the motor wouldn't turn – hahaha lol – but he did produce a lot of CO₂ - so we did a lot of praying and it was very nice – just the same as you lot were praying for live stream to come back on just now - everybody was doing the mediation and it still would not light up ...

John: You had a small echo of the first exp that showed us some aspects and what I have been describing is the 2nd part – and that is already more detailed – I knew that something was happening – and in fact when MK came in and said John did a good work we could see the cells had all become milky – this is the start of the CO₂ appearing in the cells – so that's my experiments and I tried to explain my feelings – I cannot put this in words or make the others understand but its something I live and that's the way I see it – so this morning we had to start the workshop and MK introduced his experiment – he showed us a small ventilator that was turning with his experiment – so it was different – apparently the nano coating of our exp was not perfect – his were better – the cells were different – we will have to study further to see the difference – we will have to study more to understand – so I have made a tour of aspects of our experiments – and we all have started work on the dynamic reactors – one of them almost ready to start but will wait until Monday – when I came back from Belgium I brought another reactor I've been working on – MK is very happy to see it – I wont say more for the moment – Marek is next I'll leave him the plate - Is anyone on the line??

Everybody: yes we're here John!

Marek: Someone asked a question on the chat – what is the amount of salt – well – any amount of salt will create different condition to capture different things – and we used for 15 L water, 1kg salt, but we have made other solutions with different kinds – natural salt from Persia, purified salt – to see the difference creating different condition – so you can see each cell is individual – it has its environment and influences other cells - different distance of electrodes and shape of electrodes, also the position in the whole set – it all makes a difference – like when you have a crowd of people everybody is different and influences other people – so we can see different production of captured material – in some cells even production of fat, amino acids – some cells attract blue material some white, so each cell decides according to its buildup what its internal magrav field will attract or radiate outward – and the environment reacts from its spectrum of fields, and similar fields are interacting with these cells, and some with similar properties are attracted, and in the salt solution turned into a another type of matter – we

Transcript from 3rd Knowledge Seekers Workshop held March 20, 2014

(v1 2016-03-05) DRAFT (Transcription has not been verified. Double check info with video)

call GANS – for me the Gans state is a special state which is in balance – Its magrav field is in balance in the way that the magnetic field caused by attraction in the Gans particles and the gravitational attraction – both fields are very well balanced in the GANS state of matter, and this balance makes it more environment independant – it can sustain more environment changes than other gas; liquid, solid – we were all awaiting great result – waiting for the lights to go and fans to run etc ehehehehe – but its not about this – the cells, the whole set of cells is still producing energy from the captured material but not enough to run our equipment but anyway the process is still ongoing – we have learnt that the nature shows its own pace in doing things and it needs time to let the magnetic fields interact and create result- when you put seed into ground you don't get the plant he 2nd day – you have to wait for the process – the seed will attract all it needs to become a plant, and the nature creates the right condition for this process – all controlled by intelligent beings I think – you can ask a question ...

Lucien: Yes, I would like to ask a question about what you guys said – its clear that based on configuration, and concentration of sea water solution, magrav fields are changing – so if you want to attract a specific substance – say CO₂ or CH₄ – it seems you would have to know the magrav field of the substance, and in this way dimension your cell, or connect so many different cells together, the question would be: how do you do that??

John: In fact for the moment the cell will determine itself – it is the condition in the cell that allows this attraction, so we need to make some measurements – but we are trying to understand the condition — trying different ways of connecting the cells – we still have a lot to do – what we have seen after 24 hrs we had some milky solution /// (interruption in live stream)
–

Rick: – we lost it for a couple of minutes – I think it might be time to take a break for a couple of minutes

PART TWO.

MK: ... We knew one of the nations would be careless or would not have respect and they would let the USB stick go – and I knew it would be this week – because today is a very strange day – today in the morning we are in the winter, and at 8m27secs, Tehran time, we enter Spring – the time of rejuvenation and new patterns; the reason this USB stick was released this week

Transcript from 3rd Knowledge Seekers Workshop held March 20, 2014

(v1 2016-03-05) DRAFT (Transcription has not been verified. Double check info with video)

was this day – today we close the book of the past – from tomorrow we start the beginning. There is something very important you all know and all ignore.

You always talk about DNA and some of you, because knowledge is not mature yet, speak about RNA – when you speak of DNA you speak of such things as your eye colour due to your grandmother etc – if you are Jewish you have respect for your belief – most of the Jews speak with a th.. sound – and they say this is because Moses burnt the tip of his tongue when all the boys were ordered to be killed. In protest the boy put a fire on his tongue, and the Queen said ‘how can you kill a silly boy who puts a fire on his tongue?’ – and so that th.. sound is now the sign of being Jewish and they are proud of it – this is a 2000 year physical memory transmitted – so – one piece you are missing will be put on the table and you will understand – your structure height etc all is accumulation of many generations back to the time of the first life – as we branched off we carried different vibration so we changed our fingerprint – but we all come from the same mother –

DNA has carried the physical knowledge and the RNA carries the connection to the soul of the man – through the RNA you understand where you came from – you are a result of physical mutation and mutation of the knowledge and soul connection too – so when we talk about the resurrection – you as a person are resurrected and you carry the RNA of your ancestors and you are responsible for it – so what it means when we say the time will come for peace and plenty and honey – everything for this is in the patents I released last week – you can have as much as you wish if you create the condition for it – we already in the last 2 weeks have protein – you can have gold, you can have anything you want – but now is the time of balance – so you as a person, doesn’t matter what religion you carry – you carry the RNA and DNA of your ancestors, it matters not what religion you have, or in what you believe,

Vince: sorry Mr Keshe we are having some major sound issues -

MK: - OK where do you want me to start? - OK – so what happens that when you stand as a physical being with memories of ancestors because of the color of hair or eyes, the same way with your RNA information you have connection with the people who made you, who become you – so the judgment day stands in front of you – you cannot waken the dead through the past million years but you, through your RNA, become answerable and you stand for the lot! If you stand for peace, all the religions are one – if you stand for unity, all the human race is one, all the cousins connect back up the line – so the judgment day is today – if you are the pope you still stay the same – this will not change the religions, but connect all the religions and all the

Transcript from 3rd Knowledge Seekers Workshop held March 20, 2014

(v1 2016-03-05) DRAFT (Transcription has not been verified. Double check info with video)

comes through the World Peace Treaty – now it is in the hand of mankind – you now have the patents and information – you now have the KSs – we were talking yesterday that they need to be from all around the world – this table of 8 KSs have now understood their responsibility of fairness equality and plenty for all – if you are pope, if you are Islamic leader, rabbi, priest in any faith, or even if you worship a statue – at the end of the day you stand responsible to your soul, and in the space of universe we have opened up there are no mosques, and there are no churches and no synagogues – you carry the temple of God in your soul and in your self – and as God said; ‘There shall be no War and there shall be Peace’ – from tomorrow we start the New – we teach everything you need to know - You have marvelous panels around the Keshe Foundation, you will learn and you will teach us – the promised day is today – this is the end of the past and the beginning of the new – the only thing is all the faiths (must) accept the ultimate truth – you are responsible to all the ones through your RNA who made you to be here - people ask me who I am – I am nobody – but the connector between the past and the future and unity of the past. If the human race does not unite now you will not survive in space because space is a peaceful place and there is no room for animosity and greed – the KSs told you before we are now making protein – so would you like lamb? Or would you like beef? Or would you like veal ? or sardine? Would you like gold? Would you like copper? In space there is no greed – so the message is very clear;

Today is the end of the past and tomorrow the beginning of the new – those who plan to do whatever, let them do – in past 2-3 weeks I opened the door to what injustice is – if I wanted to punish them I would have – but a father never punishes his children – he prays for them – and we pray for our enemies – as their own soul will punish them and their own soul will demand justice of them – so I call on his Excellency President Obama just as I call on his Excellency President Rohani , as much as to the Chinese Japanese leaders and the rest of the world – if you do not stop making war machines we will make so many peace machines that the war machine will be a toy in the hand of a child –

As you know we are going into development of space technology and now we have the ground and facility to do this independent of whether governments want to do it or not – this time the peaceful condition will be dictated by the people involved – not by the banks and the ones who want war – we are very very simple – there is no time for revolution, we are into evolution – we have to evolve from the animosity and fighting to unity and peace – so much free knowledge and tech that people will have no need for it – go and buy a piece of copper and get some caustic, put it with hot water and you have as much energy as you like – and while you are making free energy to run lights, from the gases in the environment you create your own protein food and materials – land of plenty – from the materials in the back of your mobile phones you have the energy to make anything – no hunger – heat and energy – take it and dip it in sodium mix, leave it and dip it back in there, you convert CO₂ to matter – so there is no hunger and the

Transcript from 3rd Knowledge Seekers Workshop held March 20, 2014

(v1 2016-03-05) DRAFT (Transcription has not been verified. Double check info with video)

solution to the hunger is salt – those who want megawatts and kilowatts we have to put the reactors in an arrangement – the coca cola bottle was not to show energy – it was to show that the man in Africa is as rich as anyone else in the world

17m MK: - John said something about the reactor core that he made in a hurry - he went back to Belgium and in a hurry he tried to make a new core - one half was beautiful, the other half had no glazing – exploded like a bald man – half hair and half no hair and its very funny – hahaha – but the worst part of it is the column that is supposed to rotate it has sheared off and broken – so he has glued it back on again – so now very simply and cheaply we have a reactor that others have spent nearly 4- 5- thousand Euro on developing to produce the energy – this will be for the man in Africa or jungles of Amazon – you can make a clay pot with a copper wire and you got your food and energy – now the ones who want to develop systems of megawatts like Fukushima – your time is over! Its done with! – its finished! – the ones who went and took our server down and put my face for 3 seconds with a cross and words ‘free energy no thanks’ – guys! – ‘YES PLEASE!’ –

Its on the table – its finished! Energy game is finished! – total power to run a laptop is almost zero – you thought you got me but I got you so cleverly – food is free, pure water from Fukushima is free, you can create any vitamin mineral you need for your body – In the coming days and weeks we show how to put your copper wires to create the minerals you need – I think Marek told you – each coca cola bottle is cut differently – you have different salts, here you are short of magnesium – you create a condition to create magnesium –

So the financial control over man’s affairs in past 24 hrs and past 7 days due to the Taiwan govt is now in the hand of mankind – So the promise of all the Prophets of God is fulfilled – time of plenty and no war – the war as the condition of man as of today it finishes – From today every man has the potential and in the past 4 days this document – these patents have been downloaded 30 - 40 million times! Only from the KF server we locked everything up so people can download – from our own server 25000 copies – and in conjunction with other servers – millions –

2148 MK: – Read Patent Number 5! My call goes to the world leaders who make boycotts for children to suffer, your factories form now on are closed, people do not need megawatts – a lamp in the corner of a house is the beauty – and thanks to the coca cola bottle and the mobile phone – we thank you for this

Transcript from 3rd Knowledge Seekers Workshop held March 20, 2014

(v1 2016-03-05) DRAFT (Transcription has not been verified. Double check info with video)

Now the process from today – from next week the 8 reactors will come on line – as they finish their reactors they will be run simultaneously – you will see the magnetic fields interacting on live stream, even if no-one is there – If you see water dropping from between 2 reactors – you can tell us –

Let me tell the Canadian PM – you arrested me and threatened to kill me – I don't need to forgive you – In time – very soon – you will stand in front of your creator to explain – you punch yourself – these world leaders who planned my execution and imprisonment – we watch them – they are beating up their own security people – asking them how did they find about us! Your biggest spy is your soul to us – nothing is hidden from us – you were looking for a spy who was leaking information and bringing info from Belgium to Italy – the spy is within you – we have a pure heart and soul and the soul connection is clear – we are giving you so much that your soul will not be able to tolerate your actions and will leave you – that is your punishment – you punish yourselves – we know about you and I don't need to put a microphone in your bed – your soul is serving you both well – whether you be the King of Belgium or his wife who is Italian –

If we open what we know there will be no kings and queens on this planet – the past is finished and from next week we open the door of knowledge in such a rapid way you will be astonished – if a broken pot from Belgium can produce energy and water – the man in Africa only needs 5minutes because the sun is very warm and he is richer than the man in NY who doesn't even have a pot –

So those who want to shut me up – please do so – I think within a few months half of the worlds population will be making energy – but I warn you don't loose your copper films and your copper wires – make sure none of the GANS can sit on your wires – so hang your wires so the Gans can shower like rain to the bottom and then you clean the bottom – create the condition you put K you collect K – and even if you create something you don't need –

There is a secret in the universe – you wish – you receive – its done via the PTH gland and now we show you how to do it – your PTH if you have too much Phosphate and not enough Calcium changes one element to another according to what it needs – through your thoughts and desire you can change matter – this is the advanced part of the knowledge we will teach you in times to come

Transcript from 3rd Knowledge Seekers Workshop held March 20, 2014

(v1 2016-03-05) DRAFT (Transcription has not been verified. Double check info with video)

2910 If you are in space in your craft, you can use the power of the mind to control your craft – you don't need a steering wheel – look at the structure of the craft we released last week – there is no direction – no headlights – one end you can produce gold and water the other end Mg – so what we gather from this WS today – the last day of the winter and beginning of the Spring – shall be for mankind – our wish is pure and for the benefit of mankind and will be achieved – is there any questions?

Vince: Thank you Mr Keshe -

James: The amino acids- are they also in Gans state –

MK: –Yes of course they are – let me explain – the way in a chemical bond you get a single connection or double connection and all that information, in the Gans state gravitational magnetic field balance does the same thing. If you look at the combination of the amino acid – you have the magrav field of the C12, which is very near in so many ways to the C14 into magrav field of N and in so many ways from the simple radiation release from the N and interaction with O, (something) is created, or the magrav field of the O is in a way as part of the isotopes of the N. So the knowledge transfer is so rapid it has never been matched in the human race – now from how you see the little cups producing energy to run a motor, then today the African boy has a light, and the man in the centre of France looking at how he is going to resign his position because there is no need for him anymore.

We work with organizations who understand our language – Yukako is taking our knowledge to Fukushima. In the past 24 hours I have had communication with one of the major nuclear governments – we are helping with a problem of Caesium contamination – our condition is we don't keep anything from you, and you don't keep anything from us- we are now working with 4 nations in this way –

46m– when the generator is out it will be given to the Keshe foundations around the world – be quick and create your own Keshe Foundation!

My dear friend Stirling Allen - now show the last video which was just loaded ½ hr ago showing the man in Africa creating a free light and warmth for himself in the winter from a coca cola

Transcript from 3rd Knowledge Seekers Workshop held March 20, 2014

(v1 2016-03-05) DRAFT (Transcription has not been verified. Double check info with video)

bottle, and in near future we will show you how these coca cola bottles can produce kilowatts – from the top of one bottle you will have enough energy to last you a day or more – so you don't need to kill the animal to eat it – and as you have energy you don't feel hunger – your body is Gans – you produce Gans, the absorption is instant – those boys who make seeds and patent them –

Oh you boys who were controlling the food chain – its Over!

You just need to touch the surface of these amino acid layers and the energy transfer is instant – yesterday I touched my lips by mistake and they were burning – you have to understand what you are doing – this is for the next generation – in one way we are teaching people to have everything they need so no hunger and greed, and we also have to open the space for those who are more mature – its like the people of earth are children at different stages - till the young one grows up and can run the marathon – knowledge and info are delivered to all for their needs, we are not leaving the poor behind- now everyone is unofficial doctor, FDA has a huge problem – nobody can charge for this because the patent belongs to everybody – a new day for mankind from tomorrow

I invite all the religious leaders, we invite you to encourage you followers to sign the peace treaty – this goes back to the essence of the prophets of God, bless their soul, these institutions and robes are not there to hide criminals – the robe has to be a house where the man finds true peace – all this had been abused but not from now on – we don't fight you we give love, and the man will dictate the condition – we are not here to fight – we share equally and give equally – when the KSs learn something they disappear into upstairs room – they are so eager to share the knowledge – in the university the knowledge would be hidden for patents and consideration of spin-offs, profit – the KSs have understood the ethos – If we don't have any food, we make it – we have enough energy to heat us with the coca cola bottles – you have seen the running of the motor - you have enough light , you have enough food to eat – next question...

55m Yes Mr Keshe, this is Lucien – thank you, your lecture today was very comprehensive and you will explain next workshop about positioning – I have a very short question – in the CO2 patent it is stated that both electrodes are copper, in the Fukushima video you were showing your little box with compartments, and one electrode was iron – so based on what you said ...

MK: – we use anything! There is no limitation!

Transcript from 3rd Knowledge Seekers Workshop held March 20, 2014

(v1 2016-03-05) DRAFT (Transcription has not been verified. Double check info with video)

Lucien: – Yes but my question would be; its my understanding that you try there to create an imbalance between the magnetic ...

MK: - No No! – I have explained this before but maybe for those who are new to us, my first book I could not write about what I am talking about now because people would not understand – It would have been too much to swallow – so the first book is explaining the basics but using the old terminology, the 2nd Book the Structure of the Light we speak about the opening of the plasma, the Third Book – (breaking up)

Vince: sorry Mr Keshe – can you pause for a second? – you are breaking up!

MK: The second book is about the transportation of the plasma – for me to talk about the principal matter and transitional matter in the 1st book would have caused havoc – but I explain the structure of the plasma in the 1st book using the old language – yeah? You have to speak to everyone in their own language – you understand? Everybody knew about antimatter and – whadyacallit? – ahhh – black matter and dark matter and the rest so people could understand it. In the second book we explain about transportation of the plasma – you call it the speed of light – or light – when it goes too fast what it does it interacts with the magrav field of its environment and creates a friction – so second book is about transportation of the same plasma – the Third Book – the Explanation of the Universe is the explanation of the interior of the plasma, how it behaves – you call it a Universe where the galaxies are – you call it up-quarks down-quarks - bosons, - If you read the 3rd book you understand the behaviour of the central structure –

The 4th book will explain – if I can get hold of Dirk to get the book done, we will show how the solar system and the galaxy are like the structure of the body of man – then you understand why different elements in the body move a certain way, how they create diseases, and how you can influence these diseases, and now with the medical patent which has become public you can help yourself with all the diseases in the world – in a way its like when you don't have time to cook you go to a restaurant – now doctors are like restaurants – you can go to expensive French restaurant and pay a lot of money – now if you want the Foundation to do your health – then you pay your rates – but now you all have the knowledge! Now I have a license from the Belgium govt to teach my medical technology – I had to teach thousands at the same time – we need the time to bring the tech to all the people of the word and now we have it

If you look at the forum and we put rubbish it gets 200 300 hits and it disappears – when you put the patents you see millions of people – they were sitting in the wings – now its real and the cat

Transcript from 3rd Knowledge Seekers Workshop held March 20, 2014

(v1 2016-03-05) DRAFT (Transcription has not been verified. Double check info with video)

is out of the bag – now we have to teach it step by step – this will take thousands of years to unravel – but if you go from a matter environment to a transition env – you wont die – your magravs will be using that level – if you go to a principal matter level – that level will appear – the physical body will never disappear – we were looking at a video about wormholes – these are magnetic channels, balanced field channels- we try and do a good opening video so you can see it in the containers – even if we unbalance it they come back to balance –

These boys are still too interested in physical world – when they start seeing in terms of magravs and plasma it will all change – but at the end of the day it is all connected to the soul of the man –this has to do with the teaching of fairness in space – there has been enough conflict in past, now is the time for peace – then when your mother comes to ruin the peace you kick her out – this is the situation with the space of man – you are being kept out because you are animals – you behave like animals you eat and kill each other- now we give you everything – whats your excuse? When you behave you are allowed in – now we open the door – we reach your souls and your bodies will change

0115 I reached the soul of President Obama, a man who on the second day after the peace conference 6 months after asked for the USB key on the day of his election – the morning of the day of his election the KF should be nowhere near his brain but his soul put it there – I read the letter to Kerry Cassidy last week – at 0340 on the 6th of November the American ambassador made contact – can we have the USB stick? Now you are all American ambassadors – you all received the USB stick – please download these keys into remote USB sticks – our security people are watching them trying to destroy it – they are trying to use Marshall law to wipe out the KF, so if you have these things put it on 2-3 remotes so you can preserve it for humanity – now we have 10s of thousands of servers spreading this USB key – the more you attack us the stronger we are –

Mission Accomplished! – American military understand this perfectly from the situation when the Eastern block came down in the 90s – we had Frankfurt airport one side military, one side civilian, and when there was no more enemy to fight the American military wrote in huge letters on top of the aircraft hangars – ‘Mission Accomplished’ – (we got rid of Communism) Now we write in letters even bigger – MISSION ACCOMPLISHED – (we got rid of world war and hunger)

0118 The message is very simple – WE WON! While you were planning our destruction we shared it with everyone – we are now calling world leaders for a meeting – we have created the space in Italy – if you do not attend you loose! Last meeting in November the Americans said;

this time we wont come, maybe next time – next time is now on the agenda - next question – (silence)... are we off line?

Vince: – no you're online

Lucien: you was very comprehensive in today's lecture – so people are speechless – hahaha!

0120 MK: Let me tell you something! For a number of years I have met with a lot of govt and religious leaders, and the questions has been asked me; are you Messiah? –

We are ALL Messiahs if you are just and understand the process – and this is what has been missing – the greed of matter has blinded us – we received something from Kabala yesterday and another one from Dirk from some Hindu source saying I am the one you've been waiting for – we are ALL the ones we have been waiting for in equal measure – its just we have never accepted each other as equal – so those who ask and write to us and say we are Messiah – NO – We are all Messiah – I just know the way.

There are two ways – the correct way and he who knows the right way can block the wrong way and guide people to the right way – time of Messiah there is no more prophets – the only difference (between religions) is which way to pray? – Now we take you into space- there is nowhere to pray except to your own soul and creator which is you within you – so those who want to go to church to pray – let them go to church because they still pray to themselves and to us – it's a very simple message – Messiah? Yes I am but at the same time equal measure with all of us – abundance and the promise is fulfilled – now its time to open to our own soul to follow it – I wonder how many Americans, Japanese, Chinese, once they understand what is on the table will stop making the bullets and the guns?

You know if you are Americans and you want a peace process go and buy a house next to a gun manufacturing company – there is a lot of carbon in the air and that's a lot of food – and if you don't know it the boys will show you – gunpowder has a lot of carbon for free food – my wife says you can survive on the bullet – and actually if you are very clever you can make a lot of diamond rings from the carbon - we show you how

0134 Eliya was the founder of the Keshe foundation in Bulgaria – she was the initiator – she should have been a founder – I am willing to give a seat as a founder to you – you don't need to have a seat confirming why you believe – Eliya will be around this institute the next time with the 25, and I'm negotiating for the finances for her – because I know her ... (sudden loss of transmission)

PART 3

This is what you got to do in space – you can't go hiding in a box like a sardine the way they do it (laughing) – now you have the capability to extend your gravitational magnetic field with the strength within your reactor – you want 10M? you want 20M? your craft is over 100M in diameter - you want to explore the ground – you don't put a snowman suit and jump like a rabbit on the moon the way they do now (laugh) you just expand your field and walk within it – I call it a tickle factor when these magnetic fields pass through your body, when you pass them, you feel it in your body – I call it the tickle factor – so you extend the boundaries of your **Oasis System** enough that you can have a shelter till you build a physical shelter like you are used to – the only trouble is everyone sees what you are doing – so you cover yourself with a bit of string – when I did it the first time it was laughable but it's gorgeous when you receive it – the people don't understand – and I thank the Iranian government for the freedom of research they gave me and they never monitored me – they watched me but I reported what I was doing – and I saw a lot of beauties of God - and we will all see it – the next few weeks when the broken reactor of John goes on the table, and the half cooked reactor of Marko from Slovenia is on the table – we are trying to adjust it – actually I try to do things the funny way – yesterday I went and bought a flat board in plastic you use for rubbing plaster on wall for Ivan to put his reactor as a base – you can use anything – you don't need a multi-million org – I think you will all laugh when the reactors jump and do nothing – yesterday you saw the pink colored battery – they were all so excited – but it would not work because of the mistake with nano coating – John did all his praying – but the whole team one-by-one like a broken army left the lab like it was a big failure – by the next day they started slowly believing in something happening -

So the **Oasis System** can have a lot of applications – I reckon it can be made for about 25 dollars to be given to the Red Cross in time of disaster – immediate shelter, immediate protection from the environment, immediate heat and enough fuel for cooking is available and even if there is a shortage of food we can write a program in a small microchip that magrav field of proteins or vitamins can be created from the water of the environment so the water becomes your food – this is how we do things in space – energy conversion, directly or through the food –

all in the environment. The game is changed – I feel sorry for those who planned for years to become masters of this planet – they now become servants to their people – next question..

0510 Lucien: - yes we have another question as we have a dentist gentleman in the team – could this tech be used for dental cavities without drills and stuff like that?

MK: – I don't know how much you know about the background of Dr Ivan because his office and surgery was where the KF office was, so we always chit chat –

You can grow bones – why do you need a cavity if you can grow the tooth – there is a lot of development but we leave it to the others to open up the way – if it is too far fetched go back to the documents – nobody has understood this – the Frontier magazine article in their 100th edition there is a 14 or 16 page article about the KF - and one of the pages they have is about the amputated toe – the pictures are too small – if you could allow the brain to develop and grow – we have enough knowledge to do this but this info has to be put in data form – only Marek is data literate, to me a computer is a foreign object – the new scientists will put data that can be replicated – yes it is possible to do anything, grow bones, fix bones, take bones out – at the moment we are running a trial with a dentist – whose son is a student doctor – he has had a brain cancer due to mobile phone – the tumor was taken out 12 months ago and he was on 12 months chemo – and his son met me in a conference 1-3 years ago and asked me if I could help his Dad, so we could see how things were going with the chemo and he was given 18months maximum – I started in November and showed the data to Dr Ivan, and all the figure in 3 months have come back to normal – you now cannot say this guy had cancer or chemo – all monitored by 4 doctors to see how things work – so everything is possible – we have a new case today in Switzerland so the system was handed over on Monday – this is an eye cancer, the eye has been taken out and the guy has been a Keshe Foundation supporter – he said I m going to lose the eye but he wanted some help to stop the cancer – the system is getting used this week – and the knowledge is not secret any more – the health patent is in the package – read it! – but in the right way otherwise your sweetie becomes your poison – next question ...

1040 MK: we wind it up? we meet next Thursday? Rick, a very important issue next week if we can do the WS with Yukako in Japan? I prefer to fail this test – if we pass we might get too cocky – too proud – any results we get will be replicated by governments – the contamination is all over the planet – we want KFs around the world to be the solution (coming in and out) – Please use the USB stick –

1300 Lucien: – so Mr Keshe we have some information – Vincent and I have been monitoring the torrent downloads around the world – many countries around the world – we had about 300 servers propagating the files – 300 seeders over time – people requesting it all around the world –

MK: - thank you very much everybody for all your work – the position with the foundation is this – we are set up to propagate and enforce the process of peace around the world – it is to teach that we cannot think about damaging or harming anyone – so when we go into space in the coming weeks or months – we don't do anything to harm ourselves – this teaching is not the same as our medical system – like people have been saying he has a cure for cancer or a cure for ALS – No – we are trying to open the door to the universal community and we are trying to teach the manners of it – it has a very simple manner and that is Peace! – when you're at peace you don't make the mistake of thinking about damaging someone or stealing something –

Universal communities are open like you are running your reactors with your thoughts – they have access to your thoughts before you even think about it –your emotion – so we have to learn this very quickly before we go to space – and as long as I am here I will make sure there will be no craft going unless the people understand this principle – it is no use taking you out when I know there is 100% chance you're going to kill yourself – learn the language of peace and think correct then you open the space of the universe very easily – because if you don't learn it you can put the others in danger

We have a very stupid class system here (joke) – we have no blackboards and this week we had a very ugly classroom by Lake Laguarda - its one of the most beautiful parts of the world – so we are sitting in a Café and learning and I explained to them – the way the craft is built, for hygiene...

For example the way you can kill germs through a microwave tunnel, we can take apart the brain of the man to remove the part of the brain that causes aggression and war – its very very easy – because it's a special part of the brain that causes these things, and we can easily solve the problem if you don't solve it yourself – there is a lot to teach – let us not waste any more time with arguments between world leaders who think they are the gods and can control things – they have lost control – the human race has won the game and I don't feel sorry for what I released – I feel sorry for mankind who suffered so long for nothing – thank you very much!

Ludmil: - Mr Keshe I would like to say a big thank you from Eliya – she is not able to speak but is saying a big thank you

MK: – whats wrong with her? Has the cat eaten her tongue?

Ludmil: – no she's having a repair in her house and going to be a disaster with the microphones – life goes on!

MK: Hehehe – its good to have women silent for some time! hehehehehehe lol

Ludmil: – I don't know – don't t do that – some time she is going to come and figure it out – thank you very much for everything

MK: – today is the last day of the old year, tonight at 827 Tehran is the New Year – and we have a huge number of listeners in Tehran – I know it because of the servers - I greet you and I hope it will be a good new year!

Ludmil: – good luck in the new year!

MK: Thank you – we will not open the forum while the downloading is happening – we keep the servers running – so our webmasters in Tehran have locked the forum till we are happy to make a move – I have to make another announcement – we will make a presentation on 21st - 22nd June in Tuscany in Italy – it will be the only time we do a presentation this year – it will be announced on the forum – thank you for listening...

MrFixitRick: – that concludes our 3rd knowledge Seeker workshop – thank you every body for attending
