### Summary

[National Security, Personal Security](#)

[So, I have been attacked to be killed eight weeks ago, and now that it didn't work, the attack came in the second wave](#)

[I told you, I'll die when I'm ready](#)

[Go back to my direct talks and interviews that I gave to the Israeli government two years ago](#)

[In space your wishes, your thoughts, are your deed, and can be read](#)

[You can protect yourself and your family from any kind of \(attack\), even if you speak about chemtrails](#)

[So, in the aircrafts of the future, we teach you how to place strategically certain systems around the craft](#)

[We give you the technology freely to protect your leaders](#)

[Punishment has never worked, but when the soul takes the life away from the physicality, that's the punishment](#)

[There is a lot of soul searching in the White House today](#)

[You stupid people, you want to destroy the physicality to get rid of the soul. We know the more powerful way from the soul to get rid of the physicality](#)

[OK, I think it's time for Luciano to bombard us with this breaking news again, they didn't report your last CNN break news, Luciano;](#)

[Delays with Shipment of Books](#)

[This is the behavior of the work of Mr. Hans Bracquené. There are a number of scientists who've been killed by Mr. Hans Bracquené. We'll release their names in time.](#)

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

00:00:00

Rick: OK, one more time. This is the 35<sup>th</sup> Keshe Knowledge Seekers' workshop and once again, we are here with Mr. Keshe from the Keshe Foundation at the Spaceship Institute, along with Marko and I think probably Armen will be there soon as well; is he there now?

He's arrived, as usual, he's here. Good morning.

There you go; so, I guess we can more right in to Mr. Keshe and he can tell us, I understand that we will have some important announcements today, so, that's all I know about it and it's been a big secret up to now, so Mr. Keshe, I would like you to tell about that too.

Good morning, good day to you, it's nice to be here another time. Today we will explain a lot of things we move away from the reactors, the health. What I'm gonna open up to you, because I think, as a public, you need to know what we have kept away from public arena for a long time but some people had a hunch and have been supporting us and helping us with different aspects of what we are going to discuss today. The main part of what we are about to disclose today goes back to what we call Security,

### National security, Personal security.

It has become parameter of the Foundation and for the members of the Foundation and, within the structure of teaching, now that we've done the agriculture, we'll start doing with the Chinese, it's going to be loaded, hopefully they'll deliver the things, the past two teachings to Rick to load up as live stream, and we have started doing the other parts with the Spanish group, with children, the health section, and we've done, we do a lot with energy and with nano and gans material; security, we told, we put in touch and in line with the defense, with national government and the rest, and it has come to a point that now security has become vital for the Keshe Foundation. I think, if we have Bert on the line, Bert, is he around?

Yeah.

You sent me an e-mail, and I sent you an e-mail, you sent me a link with the e-mail, with music, and I sent you a response back. I would like you to go in and bring that response on the screen; put in on the live stream or Skype call.

Yeah, wait one second.

Can you find it?

Yeah, what I'll do, I'll send it, I'll e-mail it to Rick so that he can put it on.

Yeah. Rick, you sent me an e-mail and I sent you an e-mail back, and you said we pray. Could you set up my response up to as well, both of you, because you two never knew that I sent an e-mail to you too, but this has to go public; yeah, but you sent me "you pray for her"; you know which one I'm talking about, yeah? I want that to be put, both of e-mails, put them on the screen without my e-mail address. Yeah? How do we see the live stream?

Do you want to send it to me Rick, and I'll share my screen?

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

I can do that. Yeah, OK, good.

So, Vince, I have also something, I should send it to Rick as well, he is going to share the screen;

Oh, good morning Lucian.

Good morning Mr. Keshe. I have some really good news. So I'm trying to..

You have ...what?

Some breaking news. So, ...even better.

What's better than that? For you, Lucian, at least;

We don't see the Skype, we don't see the live stream. We should see the pen; yeah. So, where is the pen? Pen is out of the screen.

It's there Mr. Keshe; you just had it zoomed in. I can see it on my screen here.

OK; no problem; 'cause I can't see what I'm showing.

Yeah;

OK, so; yeah, that's perfect. Sorry about this delay but I think it's important for a lot of people to understand, and we've spent... If you understand the reality of how life is here at the Foundation, we bring it to you today as part of the Security, and it's important and this will be eye-opening even for the people who've been the instigators of this process.

Rick, I sent you that e-mail, check your e-mail, just make sure that you don't broadcast my e-mail either;

If you've got it, hold it 'till I start speaking and I'll tell you to put Bert's first and then yours afterward, please. OK, what I'm gonna do; I'm gonna start, by the time, you should be ready.

As I said today, we are gonna open a lot of things which a lot of people don't understand and they, it's very hard, even for people at the top level, in, what do you call it, in the police and defense, to understand these things are actually operated on living, and this is the operation. As you know, last week, last Friday, I explained about the being sick upstairs in the teaching room. On Thursday night my wife was in the teaching room and she handled some papers which were placed right in front of where John sits, John of the Knowledge Seekers, in moving the papers and the, because the housekeeper wasn't here, she was setting everything up for the meeting we had, important meeting on Friday morning, she got poisoned with what is known as belladonna, very strong poison.

These papers were set on the table literally for the second attempt, because they tried arsenic the first time, it did not work, we found the solution around it with the help of doctor Eliya, this time they changed the poison to belladonna, but, unfortunately, Caroline was in the room and she touched it, and the situation became so critical that we, she had no blood pressure and she had no heartbeat over 120 to 200. Again, doctor Eliya was live online, constantly telling us what to do, I did what she said, and on the same time understanding the reason was getting done, and she was transferred to the hospital on Monday afternoon, literally, I said "goodbye" to Marko and Armen, that most probably 90%, we were told, she would die.

We arrived in the hospital and on arriving, the doctors would not see and how this situation was going on, the heartbeat is perfect, the heart, what do you call it, the diagram of the heart

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

operation was perfect, but the heart, it was so high, no temperature, and, ever one been in the condition of literally, unconsciousness? We asked questions, we looked around, we asked National Security, other securities, I asked my security people to look into what is happening and when I got home, by accident, I received an e-mail from Bert, and it was just a link to a music about Carolina; and I wrote an e-mail back to him, John, Rick, if you can put that e-mail up, please, from Bert; and then, OK, you can put two, and meanwhile, at the same time, I received an e-mail on Monday night from Rick that the Spanish session will go on Tuesday afternoon. And I wrote an e-mail back to Rick as well, that with the situation Caroline is, I'd have to stop the, what do you call it, to reconsider the situation.

So, I have been attacked to be killed eight weeks ago, and now that it didn't work, the attack came in the second wave, that it could make sure through my weakness that it can finish me off. But unfortunately, Caroline, as you see... Armen... On live stream; you are on live stream? No? OK, you cut off. OK, now you can shrink this to be seen. Can you put the original part in? Can you read one to Rick, please?  
You want me to read mine?  
You can read yours, please?

OK, it says: Dear Bert, she is in the hospital and been fighting for her life today, she was poisoned by the same person as poisoned me with belladonna last week. I hope she stay alive until tomorrow that I still have a wife and my child a mother.

M. T. Keshe;

Can you put, can you read yours, Rick, please?

I didn't have my microphone on live stream, I'm sorry, let me just re-read that again, sorry about that. The communication was

Dear Rick,

Yes, it looks OK at the moment. We might have to cancel the presentation, but I'll let you know later on today. Caroline is in the hospital with poisoning, they cannot find what it is but she is there now and I have to be in the hospital whole day. Let you know before the time for the workshop.

Yours faithfully,

M. T. Keshe,

And at which point I had sent back the dozen, unfortunately, I sent healing energies to Caroline and by coincidence, I'd say, well, if it is of any help, I received the following comment in the Keshe Foundation Facebook yesterday: Dear Mr. Keshe, traditionally based on a very long experiences, Iranians used pure pomegranate juice to cure poisoning; someone had put that in the Facebook when they turned in on last Facebook, last workshop about that, the problem; so, yeah, and then;

So we come to, thanks very much to both of you, so, now you see how we live in the condition we are. The only person who is on the attack now is me and my family, and at the same time, on Tuesday, when I got home from going to get something for the Knowledge seekers, 'till I go

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

back to the hospital, we received first of what is known as “intelligent powder”, sprayed only in the specific location on a living quarters and not on the side of the Keshe Foundation compound.

The cars of Armen and Marko are totally clean, but, 200 meters away, our cars were literally green in dust, all the compound parking space was green in dust, it was a well delivered package; what is known it’s been explained to us and I asked our securities and advisors, this is not intelligent dust, so, this sits on your head and it penetrates your brain and its operation and in 6-12 months causes other diseases and problems. I have to tell you, the section of the, what do you call it, teaching, has been insulated as related as a criminal, what do you call it, crime scene, and it’s in the hand of the appropriate securities and police.

As of today, we will not allow anyone with Belgian nationality to enter the premises, even John, everyone is a suspect as attempted murder suspect, and there is no allegation to John, it’s just that we have to be safe, these papers were in the position where John was sitting, so, even, we have to understand what the judge decides, they are going to do a clean-up, wipe out the whole section, and then we’ll take the steps in doing things.

So, the reality is, these people will try anything to stop the progress of the teaching and transfer of the technology and knowledge to public. Somebody has to ask a reason. As you know, last Thursday, we disclosed a very important disclosure in the respect to the Keshe Foundation, and why we are on the attack, and then, these people knew this is happening, and coincidentally, John was out of nowhere and decided to go Belgium for a week, which we couldn’t ask him any questions, and apparently, he’s back in Italy but, unfortunately, we have to let him do his learning from home or do his experiment because he’s opened his own lab in his house, to do his work, to do it there, and then he can rejoin us.

We monitor, we still carry on with the teaching, our teaching goes the same equal to our friends or enemies and people who try to kill us, we send the energy back to them the way it is. So, this comes to a very important point: do we carry on teaching or do we stop everything?

I decided that we carry on, as long as I have breath in my lungs and I can teach, and yesterday I taught Marko, even if I die, how he can reach me. This will be taught to three people in this institute: Armen, doctor Eliya, and Marko. The teaching will not stop, and in turn, in the future, the people they trust, they will produce the same link. But what is important, you might say OK, if you are poisoned with one of the two most poisonous agents in known world, how are you still here? Two points: luckily, we have a doctor who is very, very wise and understands the possibilities, even the doctors in the hospital were taking out advice while I was in the hospital; doctor Eliya immediately, are you back online, Marko? Somebody’s opened a channel.

Rick, are you getting an echo?

We are getting feedback; OK, so, what it is, is that some people have forgotten about a paper which I wrote and is on the website, you can buy; about homeopathy. If you understand the work of homeopathy, you understand how homeopathy can help you, due to the structure of the oxygen in resetting your body away from any poison if you can literally, what do you call,

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

antidote, in parallel level. So, we have not only brought that into operation, it was amazing, when we took Caroline...

Hello? Am I back? It happened with me, I uploaded a blog yesterday, so it's good, we are all good, yeah.

Yeah, so how are we now? Are we back OK?

It's all good, just a small interruption.

I just want to remind everybody that because we came back into a new call, to mute your mike, please; I can hear background noise.

Yeah; Rick, close the windows, you might get a bit drafty, or catch a cold; don't leave too many windows open.

So, what happens is that when you use personal security, it becomes important with new technologies that are on the table; so, if you feel or you know people are poisoned with these kind of things, just try to reach counter balance in homeopathy. Doctor Eliya is open on the line, if you feel it, the Foundation is free to disperse the information. But, my message goes to the people who plan and execute these things.

**I told you, I'll die when I'm ready**. So, as of yesterday morning, we have brought in, actually, the night before yesterday, we have brought in space defense technology in full operation in Keshe Foundation premises and within our cars. So, what it means, what I explained to you, you stupid people, you have knowledge of matter. I brought in the technology of the plasma in; we have built a very secure defense to your game.

Let me explain something to you very easy: very interesting point was, I was in such a pain, when I was poisoned with arsenic, that Marko and Armen and John, when they were in the lab, I used to still teach when I was bending with pain; because it's my job to teach. I was in literally aggravating pain but I did not stop teaching. I was walking bent on the table, but I carried on teaching 'cause the knowledge has to be transferred as rapid as possible.

But, go back, in a lot of things I've been teaching you in past months and years; now that we've brought the space technology defense into operation, the ethos of the space technology is implemented from the Foundation from today on this planet. What does this mean?

**Go back to my direct talks and interviews that I gave to the Israeli government two years ago**, before. If you send us a missile, to destroy nuclear power station of Iran, to stop Iran becoming a self-sufficient energy nuclear base, we have technology within the Keshe Foundation that it can capture the missile on move, doesn't matter what the speed, and as we are friends, and we have no bad intentions, we don't need it because a nuclear war is no use to us. We'll send it back to you; where would you like it, in Tel Aviv or Washington?

And the message was received directly by the politician leaders. They knew those huge threats which were on the news that Israelis are going to attack Iranian nuclear center was obsolete because of the technology which was in the hands of Iranian nation. And secondly, if we go back

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

to yesterday's election, exactly two years ago, and the re-election of president Obama, I received an e-mail, after explaining that it cannot do anything, the office of the president of the United States asking for the use of that which is now public knowledge.

And in that meeting with American officials at the highest level, I put the hand of peace out. And I said: this is the hand of peace from Iran and as we know, within the next two or three weeks, we see the fruit of that hand out. So, what I am going to tell you and explain to you something very, very interesting; now that we have implemented at the Keshe Foundation plasma technology for defense, the people who plan, who design, who delivered the intention, the thought, the design, the poison, they delivered the poison, they used the specific system through television to deliver frequencies to do the mixing,

You know exactly what I'm talking, the head of the IMEC in Belgium, and these attacks could not be done without the intelligence of one nation, it was a combined coordination between Vatican, Belgium, Italians and the rest; we don't need the poison and I don't need to die because I have a job to do. So, your intentions are returned back to you. And to your families, because you touch my family, now, your children, your wives, the people who designed it, the people who planned it, the people who delivered it, the people who even came to do it, now you receive the death which you sent to me back to yourself because I don't need it; it's a gift, you sent me, we don't need the gift from the friends.

So, keep a track of the people at the level that planned this and look at their children and their wives in the coming days and weeks and see how they fall like a leaf from the tree. This is not the punishment, this is what I told you from the beginning: **In space your wishes, your thoughts, are your deed, and can be read.** And action will be taken by it. Now, we maybe teach the man the first lessons; those who deliver the poison on the table, you have children yourself, your loved ones, people who paid you to do it, people who deliver frequency at the level of arsenic through television at 9 millihertz, you know what I'm talking about, even the operators, you all have to receive the gift you sent us, we don't need it, back to you, and the intention as it was a family.

This goes back all the way to the leaders who planned it; so, as I said, we teach when you are ready, when the situation arises, we have brought and implemented the cups of life as of yesterday in all of the universal cup of life, and it's been taught to one person, out of my house, and he will teach it to two more today. So, we have brought, dangerous thing is, Caroline is still suffering with the pains of poison; but, the minute she drinks from the cup, the poison, the pains, all disappears. The way the poison has been set is to put so much pressure on the stomach to raise the diaphragm up, that it puts the pressure on the heart, and the heart works on a very high beat, because it's tight, it's trying to push the blood out, it feels like somebody is sitting on your chest, and then it comes to a point where, that the heart is tired and gives up and you die. This is the plan.

So we put the cup of life order of existence into operations of his staying in the center. And Marko has been one of them who was tranquil for the first time yesterday. We protect ourselves. Your knowledge is like, I said, a mouse trying to play with an elephant. We don't crush you, we

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

just let you get by, but on another hand, you become self-servant, a slave to your own soul. So, the people who planned this murder attack on me and my family, I don't need it, I bless your souls; I don't punish your souls, but in a way you played a, you made a shot with a very powerful bullet.

Unfortunately, the glass was bulletproof, the ricochet has hit you. Now this ricochet will hit everybody in that room who made the decision to do it with their own family. As of yesterday, the Keshe Foundation offices in the teaching center and upstairs has become a crime scene, and now we have to see what the officials of the Italian government and we ask for the Posisha Al'Qalaniye, which is the Iranian legal investigation in murders to investigate, too.

That one cannot cover. Here we call it right to nations. We bring the Iranian scientist forensics to do their own testing, that nobody can cover nothing up. The reality is how this process has been done. The process has been done on a direct attack, on a slow poisoning, which counters where it was brought in. Then, the attack is done on a composite. What it means, the composite poisoning and killing now is very, very common, it's all fronted by IMEC. We have people inside IMEC and we are aware of what they are doing, so different points of securities.

This is, that they leave like a dust upstairs, and then they give you another dust outside. This is like a milk and flour. And then through the frequency in a radio-wave in television, they deliver the mixture. So, you don't carry anything, but inside, as a composite, you die, and there is no trace.

This can be stopped, we have put systems around, we do not receive the frequencies on any level, and any material delivered to us counter what we made automatic by the systems we put in, but the people who continuously do this, even the people who are operating, the thing they are doing, the nations, the kamikaze, like Japanese, aiding themselves with the plane into the, what do you call it, the warships of the Americans, they are doing some good, thank them for the nations, they don't know they've been played by a man, only by one man.

So, now we do not attack, we do not do anything to harm anybody, but this is the first teaching, first lessons of man to understand how you will not even think or talk wrong that you get it back yourself. Now the people who delivered the poison in different shape or form, they can see what it is. We have no problem with this. Can you put the camera on, please? I don't see it. What it is, what is important for you to understand is that we knew that we were, we knew that the poison in some cases was delivered in a very small dosages through handshake. And, if you can see, I wear gloves from now on, I've been wearing gloves that the handshakes do not get me the poison.

I think, you even noticed yesterday, in the teaching with the children, there were gloves on. We teach you how to create and defend yourself. This is very simple. For this reason, what we were not going to put out with the Keshe Foundation, out for time to come, in the next couple of weeks we sell through the Keshe Foundation. We don't accept donation, you want it, you buy it, because now this is like a book. We might put it on donation, but we've seen people when it becomes as a donation, they go for the minimum they can get away with and they do whatever they like.

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

I will release units that you can buy, you can carry it in your pocket, that any kind of poisoning attack can be released, and you can test it. We will release systems that you can put in the house, that through the materials you already know through the Foundation, [You can protect yourself and your family from any kind of \(attack\), even if you speak about chemtrails](#). We put it to test, we have no problem.

As you know, we delivered the material to the University of Coeur-a-Lion for ebola. It's strange enough, the government says they do not see the performance they were expecting, and if you go back, as I said to you, in the meeting that was done at the Presidential Palace, professors from Harvard University were present, and it's strange enough, if you go on the facebook or the connections of people who sent me their email, professors, scientists at Harvard University have shown exact Gans and its operation through pictures that they've found the solution for Ebola.

So, very immediately, we are blocked in Sierra Leone, and then it becomes invention and discovery by Harvard University. I've put the link on the website, you can see it on the forum. And, they explain exactly how ebola will attach itself exactly like a gans, as we explained and our scientists explained to the presentation at the Presidential Palace, with a matter of a week, 10 days after they were shown.

Now, we show the level of cheating going on at the highest level. This is another Mr., what do you call him, Stephen Hawking business. Now, more people are dying because the technology is blocked by people, now they want to sell it as a designed medicine in the benefit of another nation. We tell you how. If you are affected by ebola or e coli or anything, CO2 gans on a top level where there is fat that has amino acid link, because it's a natural pure ways amino acid, in transferring to the body, it, because it's attached itself to amino acid exactly as a copy of a virus, will take ebola energy virus away from it and you walk away with nothing.

This is how we will handle this place technology viruses. You have the virus energy. At the same time you need the link to him and body, which is the amino acid protein, which is these layers of fat you've been seeing on top of your box. When you are creating CO2s, that fat, it means its level is equal to the CO2, which is the amino acid level equal to the human body. So, when you have a problem next time, not in the big dosages, you have to do it in the small dosages, you have the protein, you have to understand the work of the amino, the virus attaches itself to like a protein, so now you have the antidote, for any virus in this place.

This is part of the defense technology. The people who put their finger on the, in the, in the liquids in the lab, or other people have been trying and they say it does nothing, because you were not poisoned. To use the gans as a food is totally different process. So, now, what has been stopped by the World Health Organization in saving your life is at the reach of every man. Virus needs to attach itself to a protein link.

CO2 is a gans. Harvard University confirms. Now they want to attach this thing to a protein to see how it performs. You already created on the top layer the matching protein for it. This is how man's life was created on this planet. So, now you understand how in space you protect yourself

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

from viruses, which you do not understand what is magnetically field and it gets attached to your body. All you need to do, because your body is made of gans structure, use the top layer. Never touch copperoxide.

Copperoxide works as a metal and increases the cancer level. CO2 is at the level of the NCHO3, it's just within the compound of the amino acid, because the amino acid is made of NCO and H. So, you attach the same to the same and you take the small dosages every five minutes at the beginning for about 3 times, and then you increase it to every 1 hour, till the virus is absorbed, attaches itself to, the energy of it gets absorbed by the plasma of the CO2 in a gans state, which is connected to your protein.

Now you know how I am taking my family out of poisoning. Now you know how we are using the simplest, most advanced knowledge to man game play, to protect ourselves. Defense technology is not just making a shield. Defense technology in the level of human being is to be able to absorb the fields in gravitational magnetic fields in the environment you live, that these fields cannot reach your body.

So, in the aircrafts of the future, we teach you how to place strategically certain systems around the craft, that doesn't matter in which direction does the flight takes place, any extra fields that can be the sign of a virus or change of emotional level, can be absorbed by the gans within the course. And that's how you create protection from oceans of the magnetic gravitational fields.

So, my recommendation to our dear friends who planted systems in Belgium to kill us with the radio frequencies, the radiated turnover was a theory, and now they broke into our house about 8 weeks ago and from that day when they broke in it's all registered in the police. They were here, we saw them on the camera, they planted these systems around my house on the living quarters, and jamming us to start making what we call the frequency in herz for the poisons they were planning to divert through the people on the table, and the people outside with other materials. Now we have put the systems back in, on the space level.

My friends, darlings, you did it, you delivered it, I wish all the best, I hope you have enough money to pay for enough funerals. You delivered, I do not need. Now you have to organize your own children's funerals, your wives and your mothers and your parents, the ones you are emotionally connected to will receive a gift which you sent and it wasn't, it was the right address but there was no need to for it. We gave it back. I have enough knowledge to wipe out any creatures, any creation anywhere in the universe, and now we will see it. We do not wipe out. We give you love and care. I bless for the soul which has to be separated from the body.

But, do not blame nobody except yourself. I told you, I've built you, I'll dismantle you brick by brick, till you understand the only option is peace and the correct way. Being an operator, were you happy, I can jam, I can do this, and I can send frequencies through the television because you planted the system electronics, my boy, even if you designed the chip and you all listen to my program, because you all want to know, because you think 'the guy tells us everything', on

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

the line, I tell you something, I'd start looking at your family with the cancers, with other things, which you are going to pay for within the coming days. Because you sent the death wish.

I don't have. I sent you the gift of life. Now what we learned? How to protect yourself in the space from viruses. I think today's lesson is more important than anything else, how you build reactors and how you make CNN news. My teachings will stay for thousands of years. Your meager life finishes very soon, because you decided, not me, you, you jumped off the cliff, from a 300 meter cliff with no parachute and you hope to survive with a, with a shallow water of less than 10 centimeter. You die, you jumped in the deep end, to earn one million for killing me. Now those millions have to be made for the coffins and the hospitals.

I'll be here and I'll teach you everything, as long as the man can progress in the advancement of the peace. Within coming days we will release these, these, what we call, the balls of life. You just carry it, just put around the house, just like, like you do as decoration. No frequency, no attack, no, any noise will harm you, because these plasmas are dynamic and they receive the information, they are active and they absorb everything in the full spectrum. The only mistake you have made is, oh, not a mistake, you did not understand, how come the black material on the copper becomes the white material of CO<sub>2</sub> in the tank?

The CO<sub>2</sub> in the container is because of the environment you created. It still can stop any field strength within the amino acid, because it carries oxygen which is the highest level, but the black material, the nano layer covers the full spectrum, absorbs the full energy. Ah, join the meeting. So, pray for their souls, they need it. The whole structure is that we do not, we don't spend our time in planning to destroy or to attack. We plan, we spend our time in developing and going further and teaching and trying to help and do work.

With this illness, with this attack on Caroline and me, all it is, you stayed behind, you, the teaching has slowed down. But, on the other hand, we learned a lot about the weaknesses of the man. I see through you, but it is not my job to tell you what you are doing. I know who lies and who cheats and who's, who's doing things, but I still play the game of the man. In the defense technology which we will deliver very soon, as I said, all the marbles which were used and taken from the buildings of Colosseum, will go back to Colosseum. As I told you, very simply, these marbles of Colosseum were taken from the outside and building of Colosseum to build the Vatican. And, they will be returned to their original owners.

Every presentation, every talk we give is listened by his Holiness, the Pope. And, within a week, 10 days we see the response in different public announcements he makes in response to what we've done and what we do and what we explain. On the 27<sup>th</sup> of October presentation in Vatican, his Excellency, his Holiness, Pope, has said that we believe in aliens and soon will come in touch with them, and they are part of the God's creation. You can read it. And, look at the last three, four weeks, what has come out of the Vatican. In response to every things we put out, we get the response. In different ways they are trying to protect and cover the line.

We are not your enemies. We are the friends who you choose to call us the enemies to protect nothing. We still carry on the research, now we have developed this different, small lab, that we

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

can handle the beautiful reactors that Armen has made. We moved them yesterday, they've been offline, they've been set up, new, you see he's made it beautiful, with Marko's structure for it, it's miniature, because the second set has arrived this week, and most probably next week or two until we put it up next to each other.

And, you will see, even the reactors have been switched off, they've been moved around, they've been handled for the past two or three days, they were at 11.38 kilograms last night, when we left, yeah?, and this morning when we came in it was at the 11.22. So, it means the reactors are reactive, still balancing, and then when we go in with Armen a few minutes later and we walk around, it's back to 11.38 again. We go back live stream again with all the tests, it's just we had to move the, the reactors, that they don't interfere with the other reactors of the plasma with the gans.

So, the teaching will go on, and now we have a separate, independent building for the teaching within the compound of the foundation. And, this has come partly due to the security, that nobody can reach us on the living quarters, because they had a section there, and plus the lab on this side. Now, the whole teaching section has become into one side, in a separate building. The whole process is, if you are worried and if you are part of the defense technology of a country or a nation, and you are worried that your leaders, your presidents are under attack by different frequencies, different organizations, contact Keshe Foundation.

**We give you the technology freely to protect your leaders.** I heard a comment on a chat show by somebody who now we did not release his name, but he has released our name in his talk, gentleman called Gordon, in talking with Mike Harris, that they sent one of the top Italian physicists. I think Bert can put that snap on the line if you want to listen to it, because now it's public chat show, millions of people listen to it, you can listen to it too. The knowledge seekers were, saw the gentleman when he came in, the professor. Bert, do you have that snap?

Yeah...

On the chat show.

Yeah, I'll send, I'll sent an email to Rick with the link to it.

OK, Rick, when you get it, can you put it on, so that we can listen to it, it's only about 3 minutes, please? So, now you understand, people at the Intelligence, United States government and, what do you call it, National Securities have been here. They are watching what we are doing, they are listening to it. They think we are crazy or something out, but it's a new science, they have to listen to and be part of.

Because they've gone public, now we can go with it, because it's not known internationally, but it's, Mike Harris has listened to, I've given him a few interviews, and the gentleman called Gordon explains in a very short way. They, they come here, they are coming here soon again, as part of the National Intelligence of the United States government to see the operation. As I said, we don't talk till they talk. And now you understand how they are monitoring and watching us.

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

We know for a fact, four presidents on regularly, weekly basis, listen, top world leaders, to every workshop we put out.

As they say, one of them said ‘this is a night time story I have to listen to, to be aware of what I have to protect my nation in what’s coming up’. If you go and look, everything has been done, in the next couple of weeks, hopefully, Mr. Cho, James can tell you, that the first book will be, is done, all done, will be published by the payment, at the cost of the Chinese government at Shenzhen University, which is the top university in China, by their expenses. University at that level does not do these kind of things. The translation was done by the Keshe Foundation China with a very hard work of all of them.

They will be coming up online next week, the Chinese teachings will be live again from, hopefully, Monday. They were too shy to go live stream, and I had to convince them, it’s your right, as much as you listen to English to translate, we have to listen when you speak Chinese, the same as we’ve started with Spanish on Tuesday. That we don’t need to repeat, because the Chinese now have done a lot of work in agriculture, and we had two, three, two sessions with them, the third one is this coming Monday.

So, now you are going to get the Chinese Keshe Foundation workshops, which is mainly based on agriculture and the very high level what the research they do. In the coming week, two weeks, the Keshe Foundation as an organization of manufacturing side in China will produce all our systems in parallel. It’s a scientific organization which has access to commercialization, and, more or less, everything is agreed today, or by tomorrow they will finish the CO2 kit and then they will start commercializing it in China, and it will be all that proceeds from it will go back to Keshe Foundation China, to teach and evaluate and everything else in China, for the new technology.

My arm, my hand and my thought goes to his Eminence, Pope. Accidentally, you have arranged out of nowhere to come graciously, and accidentally we know the reason. It’s in the press. Heads of the Keshe Foundation as the people around informed us is open as per your request for a meeting. We are not enemies, we are friends, working on the same way to help humanity.

Seldom, oh... Do you want to play it? Oh, just, yeah, it’s the national knowledge, we can...

Yeah, it’s only a couple of minutes. Yeah, it’s only a couple of minutes, the one, the link I sent you to the Google drive is only a couple of minutes, I just...

Yeah, I have the cue.

You can play it.

Jack, can you tell me if you hear it?

Not now, we don’t. No.

Didn’t hear anything?

No, we didn’t get anything. OK, go ahead.

... way to jumpstart this economy...

Yeah, we would take, if we stabilize Iran...

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

*You want to jump start the economy, that's a great way to jump start this economy.*

*Yeah, we would take, if we stabilize Iran, Iran...*

*Yeah, I changed the outward...*

*And then, of course, eventually, and what we live in the area Mike and I are living all the time, about alternative energy... and we work extensively...*

OK, we are going to restart that clip.

*If we stabilize Iran, Iraq, and then, of course, eventually, and then, what we live in the area Mike and I are living all the time, of alternative energy areas, and we work extensively, and then Michael talks about it all the time, so I will not steal his thunder there, but we have, we have this elicited schedule, that it was about a month ago, we took one of the top physicists from Italy and sent him to meet the Iranian, we call him, scientist and mystic Keshe, ask him, after the call, poor guy, the guy I sent was Ricardo, professor Ricardo Magio, from the University of Toledo, long-time friend, a bald guy, a professor at MIT, and Ricardo, and Ricardo had been with me in Ghana months before, but Ricardo had difficulty keeping Keshe onto...*

*Keshe does not read, does not like to use any of the languages of conventional physics, and this is one of the things that we have so much trouble with right now. We have, we have dealt with materials where we have found a basis for attacking gravity, many of the basic laws of physics, and we are getting this side of Los Alamos, and we are trying to bring new physics people and old physics people together, where the investment capital is needed, to offer alternative energy, so that we can change this world, start feeding people, gain some organization, give people some kind of hope and build a security environment here, in the prior, instead of having to worry about hiring 5,000 mercenaries to blow up these ISIS Islamic state people that Turkey is, where is Saudi Arabia, Qatar, and the Central Intelligence Agency are flooding into the Middle East. The insanity of this. We are here...*

I think we lost sound...

Pardon? We are still listening.

*I am part of the Vietnam generation. I have a proposition. I am making some difference, working with others, and what, the VTE exists for that purpose. All of us are here for that purpose, no other purpose than that, so that we can head into the happy hunting ground, as it were, where we live in a world where ignorance isn't worshiped as it is today, where anger and hatred isn't worshiped, where children have a chance to grow up with some kind of hope, a survivable planet, and then...*

*These are things, I think we need to do this more often, because we have any number of issues, some of them we've begun to deal with, we deal with today and I'll be going on at the end of this hour, but we have many other issues, that were to come in were we to bring Alex Powers or Ricardo Baratsky or Duncan Rowers or Jim Hankey, others among us, or Kevin Derrick or Lee Wanton, and we begin to see the layers and layers of considerations that those of you who still have any ties to conventional science, which is largely dysfunctional, or if we could bring Jeff Smith back, those of you who believe that the FIAT currencies exist, those of you who try to make*

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

*sense of an economic world or geopolitics that doesn't exist, and I'll go further, I am always willing to attack the world religions as well, as constructs, and I, I go much further than Marx every day in the process.*

*We have things to solve here. We have a very short time to do it. And, if you haven't been watching for the past six months, if you haven't watched over the last week this farcical election they are having in the US, this insane...*

*I think we can stop it...*

*Social experiment being run in Ukraine, it's the same social experiment being run across Africa, all the horror... end of clip.*

MK: ...And, we did not reach these people, they reached us. And, we collaborate. These people are from Central Intelligence that is from Los Alamos. The Knowledge seekers here have been all the time fully aware as it has happened, I informed then in a direct way where we are and what we are doing.

Now, you hear the man of one of the top level security of American structure explaining. There are people on the website and the forums and the chat rooms, to you are normal people, but behind we know who they are and we are collaborating and working with them to achieve the world peace and, ...Rick, you got your microphone open.

So, you, you understand the game of Keshe Foundation from limits of what you thought is far beyond. Are you still in pain? Your heart? Go and drink the water outside. Come back. My wife is still suffering. She is sitting here with a pain from the poisoning. So, you'll have to realize, to attack the Keshe Foundation the way they have done, to attack my family, to attack myself, I do not do anything wrong to organize something to take revenge. I bless your souls because by doing this you show the weakness even at the highest level, and that soul needs a lot of support.

**Punishment has never worked, but when the soul takes the life away from the physicality, that's the punishment.** We are extensively involved in defense in the space, in other aspect with different nationalities in a secure way, and this will not stop. I inform national governments directly, I inform the Russians as much as the Japanese, the Chinese and the rest. I was working till late last night, and I stayed literally, more or less, awake all morning for this important meeting which is happening in Tokyo in respect to TEPCO and commercialization of the technology in respect to energy, which Japanese government that they don't have to import so much oil.

This meeting was planned 2 weeks ago. We sent the materials here, Armen fixed it, about 2 weeks ago, and Marko did the other parts, and we sent this package to Tokyo, and it was, this meeting was going on this morning in respect to this. We work with different nations. I work with my beloved nation of Iran as much as I do with the Americans. To me it's all the same. There are no nationalities.

But those who are scared of losing their financial interest or their position as the religious leaders, we thank you for what you have done, as I said before, in protecting people and bringing man to

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

the point it is, but the time is over. Every man can make a decision about himself how to protect, and make a decision how to be correct. And the world's full of all of the, what I call, the track, very soon they learn and they have to pay the physicality, where they've gone wrong, or they ignore it, like that was nothing, because that's the easiest way, for them not to learn, and they get punished again by themselves. The technology has to be open to all the nations, not to a few to make money out of it.

Keshe Foundation, under no circumstances, will collaborate, operate, or do any work with European Space Agency, or people who work or are connected to European Space Agency. We'll collaborate at the highest level with the NASA, Russian space agencies, and Chinese and the rest. The reason being that the realm of the European Space Agency is held by Mr. Hans Bracquene, the man who planned all the murders and everything about me and my family. And, he has created so much documents that everybody has believed the lies he has put out through the Belgian nation, because they use governmental roads so they have managed to defraud the whole nation for a lot to suffer.

I received a lot of emails and communications about what I disclosed about the king of Belgium last Friday. Let me explain to you what the problem is there, that we close this book. Now that the king of Belgium, the ex-king of Belgium has to give blood to confirm that the girl is or is not his daughter, but the same process, Mr. Wimm de Grava will become the next prince of Belgium, because he will give a blood too.

And, by the same order, if what is correct to be, the present king of Belgium is not a Belgian, so he cannot be a king. But, the biggest question arises, that as you know the criminal cases sitting around Europe with abuse of children by the ex-king of Belgium, and now you understand how he's been keeping everybody silent, is how come that the European nations being aware of it have kept so many parents losing their children to such abuse? Where is the collaboration of crime? This is the biggest problem.

This is where the scale of criminality comes through the whole of European royal families, how nations have covered a king who's abusive that he can carry on with abusing others, and other children, just to protect the monarchy. Is a brother of man different if he is in the gutters or a king? To me, no. It's the same amino acid. Now, you understand why it's a collaboration between governments trying to finish the Keshe Foundation or to kill me.

Because the question comes, how come French who's got 50 cases in the court of children being raped and killed by the ex-king of Belgium has kept silent? Political immunity does not exist for a man who's a murderer, doesn't matter king or not. It did not exist for Saddam Hussein, it should not for a king in Europe or in America, as a president or the rest. Now you understand when we talk about the collaboration.

Understand something very clearly, go on the Internet. When I was arrested on a transit to Mexico to help with the... (gulf oil spill) to travel there three, for five years ago, and I kept, captured at the airport for eleven days, where there was the World Leaders' Summit in Toronto that, that week, a scientist admirable as the Iranian nuclear physicist cannot be captured and kept

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

in the airport unless they had a full clearance from the White House, would not be done without the full authorization of the Belgian government, would not be with the full authorization of Mexican government.

I received my visa at 12 o'clock in Mexico embassy in Brussels, I took a flight 10 o'clock the following morning and when I arrived in Toronto airport the gentleman who arrested, no, asked me, not arrest, but asked me to walk with him, he said 'I've studied your website and everything for 3 days, that I can ask you a question in nuclear physics'.

So, the whole thing was a set-up. The guy already knew when to issue the visa, how and what they are going to do. They captured me, they got the patents, and then for that we released the patent to the world. Why should a few have to be able to dominate? Now, every man has what they thought, they wanted to steal from me, and they stole from my computers and my samples. You've seen my samples, every time I show, it's the Canadian handwriting, I would like to find a scientist who wrote all those numbers on every tube of samples I was carrying of the gans materials. At that time, this stupid guy did not even understand what I was carrying.

The attack on us is done by the full permission of the Vatican, by the full permission of the Italian government that have ties with the Americans, with the Belgians. The question is, how come the guy has three days to study everything, while my visa was issued before hand, so it was a set-up. And that, at that level, at the level of nuclear physicist that I am, and I just arrived from Teheran a year before, while developing a new spaceship program.

They knew what they were doing. They wanted to access information and knowledge freely by stealing. Have you been any further? No. Because you stole black and white imprints on a piece of paper or something written on a disc. You didn't get the essence of it. Now, the essence has been taught to the world. That's why I gave the keys to world nations, that everybody will be equal, not just what they steal from my house every day, whatever I write. Now everybody gets everything at the same time.

**There is a lot of soul searching in the White House today.** Your Excellency, president Obama, come clean in what you've done in damaging me. We both know what you've done. And, I've got your private letter. Now, you have two years left, you have to live with your own conscience. I will not be imprisoned in an airport and be told I'd be executed every day, if it was not signed by you, by your National Intelligence, or Mrs. Clinton. You knew how important my position was in respect to the Iranian space technology, that the day of your election, 2 years ago, you asked for the key officially.

Even though the Canadians downloaded it, the whole key was exactly what you received in Canada. Now, we release more information. The more you push, the more information we open up that people will be protecting themselves and using the knowledge themselves. In the coming weeks, the Knowledge seekers will show you what is a total radical position from what we taught up to now. I started the next session of the teaching in a different direction with plasma as of this week.

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

**Please, understand one thing. My love and my care does not go, extend to my wife and my family, it extends to every being on this planet and this universe, in equal measure.** I cannot cuddle you and kiss you individually, but you receive my soul the same. If, if there will be one more attempt on my life, because it's a death plan, equal measure, the same death plan will be extended to the world leaders who planned my death with their authorization, and their family.

I hope I am very clear. If there is one more death threat, people who think to kill me and plan to kill me, or plan to kill me, all I have to do, I send it to you with amplitude. You be it the world leaders, be it the religious leaders, be it the Rabbi, the Pope, Ayatollah, or anybody else at any level.

You have seen how little reactors, four little reactors create even one Tesla. We are not talking the discussion that we produce 129 Tesla, you produce one Tesla. From nothing, from ten grams of material. I can extend the same thing, but millions times, times over, with your death wish, extend it and plan for your soul, which you sent it and you thwart it. So, you destroy yourself much faster, and the man will be free to go to the next level. If it's one more attempt on my life, on my family life, I take the biggest thing which is in my hand, which is the love of me for you and I give it to your soul so big that the soul would separate from the physicality, and that would be your physical death. But, that soul will not elevate.

President Obama, your Excellency, president Obama, stop these attacks and the organization of these attacks, the same from Vatican, to me and my family. They hand pieces out, from now on you receive your intentions very directly. I teach you about the defense technology which I set up this morning. I showed the Knowledge seekers in a different way how to do it, that I can work in the lab the way I enjoy for years, not by wearing gloves like this, by shaking hands with my students, with my Knowledge seekers, they receive the energy and the knowledge directly, without the talk.

If the forensic shows the poisoning, as I am an Iranian, I will ask for the world for the arrest of the ones who are in charge, to be subjected to the execution in Iran, by the Iranian law. The warrant will be issued in Teheran for the murder, and of course, will be in Teheran and the punishment of pre-attempted, premeditated murder, or attempted murder, by the law in Iran, is execution. That's why we closed the doors of the foundation, nobody can tamper with nothing.

I don't believe in execution, I don't believe in this, but as the law, it stands by the law. Eye for an eye, tooth for a tooth. Be it Mr. Hans Bracquene, be it other people who are close, who also organized it and delivered it.

Now, defense technology in the space is not the craft. It's defending and protecting yourself, not from others, but from the environment and the conditions which you walk in and travel through in the environment. And, if you translate in the mild language, it becomes defense or becomes security. What is very interesting, which I explained yesterday to the National Security people in a different way, as they have these intelligent powders, as they have these systems of delivering microwaves in various lower levels to damage and kill people, as a scientist, biggest question mark is: why don't they use this simple technology as they think, on the terrorist and terrorist

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

organizations, and these people who are killing all these people in the Middle East, so called, they are killing?

Does that mean that these terrorists acts are sponsored by themselves to create fear to sell more arms? Strange enough, the same green powder has been over my house and on the cars of two Keshe Foundation supporters thirty kilometers away at the same time, and there is nothing between the Sent Sano and Brescia, there is no green trace. The ones who we cover as Keshe Foundation supporters, their souls are protected by us and they will not be harmed.

So, this is a planned attack. If you plan to attack us and do what you are doing, why don't you use it on the terrorists? What you so call terrorists. Unless it's organized by you for making factories and running your companies. Mr. Gordon, you sit at the highest level with the Intelligence and the American government. Pass the message on. The people who know who he is, pass the message on. Hand off these constructs of the Keshe Foundation. And, if there is any more attack on me or my family or any member of the Keshe Foundation worldwide, we'll give you so much love, to your soul we send so much strength, your soul, that it will detach from its physicality.

Listen to my health workshops. If you haven't got the message, we know how to saturate. Saturate it, so much giving that the soul find out that there is no reason to be attached to physicality, and then this is what you call death. In time, I will teach you how to build systems, because, in the space you have to be able to communicate to the others that you are loving, peaceful in their language, and you have to show the extent of your love and care for other creatures in the universe. So, you need the tool. That tool, if you use it here, will end up with physical death, if you use it the right way, because the soul will not want to be attached to the body anymore.

**You stupid people, you want to destroy the physicality to get rid of the soul. We know the more powerful way from the soul to get rid of the physicality.** My dearest Holy Pope, stop the attacks on my foundation. Bring your flock to be correct, and we teach that everybody goes the same way. We are not enemies, we work on the same level, and at the same time, they call me whatever, but we know who we are and what we are delivering. The time of religions is over. Are there any questions? They can't find the button again.

Rick: It's always a race to the button, but thank you, Mr. Keshe. Any questions from your end there, Vince, or on the Skype call? I hear someone in the background there.

Hi, I have a question.

I will open it.

Oh, there's another question, Lucian.

Oh, I mean, mine will be longer, so let's, I think, let the...

Is there any question or...?

Bert will start, because you will be short.

No, go ahead, Ivan.

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

Ivan: I wanted to ask, I thought about the copper pin, the nano-material in the reactor, when we build the container to create the plasma, you say when the plasma push the nano-material it makes a reaction, how this reaction is not separate in the reactor, where you have the nano copper pin in the middle and the plasma around it?

Can you explain that? I don't understand.

I mean, when we put the two plates in the container creating the gans of whatever, you said that if the gans touches the nano-plate on the bottom, it creates a chemical reaction, which is destroying the layer.

It creates a shortcut.

Yes, but when we build in your lab the copper reactor with the copper nano-pin in the middle, we put the gans around it. That will make a reaction possible, also?

No, because it falls to the bottom of the container.

Aha, OK.

In the reactor?

That was it, thank you.

You mean in the reactor? Marko was trying to explain to me.

I mean, when we make the reactor for the gans, if the gans on the bottom of the container, pushes the nano-plate, you said that it destroys the layer from the plate, the nano-layer...

MK: Yes, yes, because what happens in that state, you create energy level equal to energy level of the plasma of the electron between the two plates. You don't create an electron or electric current flow, you create a plasmatic flow in the level of electron between the plates, so you convert the, you become in part of chemical reaction, more or less. And, then you find out that production of the gans stops. Whenever you see the production of the gans slows down or stops, clean the container and clean your plate, which means, even though you don't see it through the water, but there are too many processes of going on to produce ganses that creates a connection between two plates. It's a plasma magnetic field strength equal to electron.

And that's where your problem starts, because you have already started the connection through the wires between the two plates and, then, now when the connection is made through plasmatic electron, it becomes balanced, so nothing happens, and you don't produce any more, what do you call it, gans in the container, because, even though it's invisible, but the field connection becomes the same and, or you have already connected your wires from outside, you create a balance environment in your liquid, so it stops. So, if every time you come to a balance production, you don't produce any more material, look at your, the, the connection, or change of the salt water in your container, or there is a connection at the bottom.

But, in the copper reactor, we have a different environment with a pin in the middle.

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

We have. Yes, yes, with that, we, we push the gans material to the walls, so you don't have... There is a picture I have, I'll show it on live stream there now, and you can see the material... You can't see the live stream. Well, I... Just wait, wait, wait, you just press... OK, I only see my pen on the live stream.

OK, I had that up beforehand, and I just took that down. So, this is the rotating ping-pong ball that is lit up by a laser light, so you can see the actual material inside that goes through the walls, like you were saying when it, when it spins, so the central pin is insulated from the material on the wall, so, it's separated.

Yes, so what it is, we discussed it with Armen and Marko yesterday, that, what we are going to do, now we have moved the smallest of formation of gans into a new room. We are going to add the number of, increase the number of the gans to a finish, third filling, and then we increase, we increase the loading by one copperoxide, and then we increase, again, by one more load of CO2 gans, and we watch how the two, three gans slide away each other for creating plasma. So, the, there is a picture I saw in one, I think in the children's teaching or somewhere, from Eureck, I don't know who's made it, it's a, it shows the pin in the center of the reactor with a plasma with a red and blue and green band on it, as a free plasma. That is, that is very nice, it's fantastic. That makes, that makes a good representation, if you can get hold of that picture. You know which one I am talking about? Rick?

I don't have that offhand, I'll try to find that here, if somebody can supply it to me in the Skype chat, just drop it in the chat, that would be fine, it will come through fine.

That's, that's a fantastic representation of the free plasma in between the pores and the star formation, and this is how we, that's how more or less is... There is something I have to mention, and that is we, we have sent the detector back to the manufacturers with the, the unit, for the evaluation, and if there is a need for the correction to come back, that they, they re-estate the values correctness, or whatever. There was a slight problem with that detector which we knew from the beginning. You had an X and Y and Z and the B was only reading the value of the X and Y, and it was ignoring the high values of Z. And, when you look at the, what do you call it, the plots, the plots were showing the actual value of the reading, which was all the same at different Teslas. So, if you ignored the B reading or translation back to graphic conditions of plot, you see the same.

There is something which I was explaining to Marko this week, or last week, is that if you look at the plots we see that whenever, yeah, that's the picture, we see that every time the X increases, Z increases, which is the push of the fields from the free plasma out, you will see immediately drop in X and Y. So, what happens, the minute the search comes, the strength of the fields of the Z direction is so strong, that it disconnects the reading or the measurements of the X and Y to reach the detector. So, this shows the strength of the field is so much that there is a drop, and then you see a negativity, which is the field has a strengthening, and it comes back on the X and Y.

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

So, the pulses when you analyze the plots are 100% correct. And we see it. We see it with the field interaction and repulsion that comes out of the central core. So, we wait till the unit comes back next week, and they want to do the test themselves, because they've never seen this operation, but we knew, even in our other detector, which is for the weaker fields, plasma field, B always reads X and Y, if the Z is high, or if the X is high it illuminates it, it only reads the two lower levels to make the B. So, B, in fact, is totally irrelevant, you see the structure of the flow of the plasma inside. So, the readings, when next time we put the graphs on of the plots and we put the data, when the system comes back, just don't look at, when we freeze it, or you can freeze your pictures, study the behavior of the X and Y in respect to Z, or Z in respect to the others. You see immediately when you have high pulses of, what do you call it, in a Z direction, you get an increase, negative increase in X or Y or positive. Then, it shows you where the field which came out of the core has gone to or where it is going, and then you find out that, if it goes to the Y, in the right direction, the next pulse becomes higher because now the system feeds itself with its own plasma.

It becomes like, what do you call it, vicious circle. Increase, and increase, and as it goes through the central core, it absorbs more energy, and then, the continuation and the structure of the plot will teach you a lot about the behavior of plasma inside the core and inside the free plasma. The data, they say, the, the detector can read up to 3 and then 14 and 20 scale. Even if you can make one tesla, which, I'd say, this is somehow parameter, since there is no known limit, you try to make one tesla magnetic field, even if it's detector correct up to 14, at 16 with megawatts of energy, in Holland they've just managed to float a small flock in the drop of water a few years ago, and it was a huge break news.

So, we don't look at the B. B is irrelevant. We look at the flow of the, the flow of flocks. Before, when we were working with the plasma, the glass was nearly irrelevant, because it was important at low levels where it was done. So, look at what the plasma gives out, and the effect what it gives out on this environment. The plasma of the copper level, coated plate, in respect to the plasma of the... It says 'is this chat working?. I don't see anyone.'

And we.. it's working, yeah. So, the plasma which is created between the two plates dictates what the strength it has it gives out in the Z direction, that... Some of these microphones are open... That it gives a strength in the position around the surface of the container equal to the gravitational magnetic field of the CO<sub>2</sub>. In the copperoxide plate, you produce the environment for the CO<sub>2</sub>, but is not that much of it; but you create condition following its exactly, when you put copper nano-coated material and the copper plate in the salt water, all you do now, you are carrying with the same process as a caustic was doing in the container, with the difference that now, you create the top atoms as a plasma on the copper plate to be loosened off and to become, to become a gans and immediately because the copper is in the nano state, in the gans state, it links up with oxygen in the water. And you end up with copperoxide. This is the blue one what you see on the, on your screen. So, it's a different process, it's different environment, different conditions created.

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

In the children's program yesterday, we were talking about creating the condition. In the CO<sub>2</sub>, copper and zinc, you create an environment around the box because of the structure of the copper plasma. And that magnetic field is equal to CO<sub>2</sub> which attracts the fields of the material exactly like a leaf, as we showed in the presentation; with copper, the environment is, you are separating the matter from the plate, you are not absorbing copper from the environment, because the environment, the condition you create in the salt water with the container with the plate is equal to the strength of the copper because one side is copper itself, and one side is atomic copper.

So, the field is balanced for it, and that's why you see copperoxide at the bottom of your container. Do aluminum with aluminum, and do aluminum with copper; then, what you get with aluminum with aluminum, most probably, if the fields are correct and you chose the right salt condition, you will get nano gans of aluminum.

This is what you've got to understand; you just look at what comes out; understand, even though you are using the same process, you are creating different environmental conditions for the plates. And then, you play with the ganses; then you play which gans, look at the atomic structure, how many electrons, how many protons, then use the indication of the field strength, and then, you see how you play, how they interact and influence each other in totality when the system is run. Does it matter if it's used in dynamic core or does it matter if it's used in the static core? Next question. Yeah.

Yes, Mr. Keshe, this is Luciano...

Just one second, Luciano, wait, Marko is telling me, asked me a question.

OK.

...chemotherapy, to extract the energy...

Chemotherapy?

...chemicals that are used...

No, in a way, in a way you can't use the CO<sub>2</sub> with chemotherapy, the question that Marko is telling me is on the live stream, with chemotherapy, you have two choices: to intervene at the time when you take the chemo, then you don't allow chemo to kill or to destroy cancer cells, or, allow the chemo to do its job and then enter the body through the bone marrow structure and bone structure, to reduce the size of the lymph. This is a problem with chemo; chemo itself is the most beautiful material for destroying or opening up, not destroying, opening up the plasma of the cancer. But it's so powerful, that it saturates, that it releases so much, what do you call it, residue of energy, that those energies can cross the intestine boundary into the lymph and expand the size of the lymph that they get blocked on the bone.

If you can deliver technology that reduces the strength of the lymph, then you'll have no problem with chemotherapy. So, CO<sub>2</sub>, you can't take to change the position of the, with the chemotherapy with CO<sub>2</sub>. Because, if it's taken as a tablet, it's in there to create a high value energy. When you speak about medicines, when you speak about taking any kind of tablets, from now on, ask what's in the tablet. Look at the chemical component of it, then right with it, the atomic structure of it, how many protons, how many electrons, and then understand the structure which is created, which of the material is there as a supplier and which one as an absorber, and

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

then, on the other hand, add the total number of protons and electrons together, in each respect, and then if it's very high, then count for one electron, additional proton, because if it's a large number of electrons involved in the chemical, that gives you the strength which is delivered to your body for what purpose.

This is what they tell you, it breaks down to this chemical, with that enzymes in the body and the rest, is the same as what they called the Earth was the center of the universe. You have to understand what that chemical; once that matter enters the body, they job off the material in your stomach, is to change its characteristics from a matter to a gans, to energy.

Now you have to understand, as I said to the Knowledge seekers, change your heart. Because you take physical material tablet, you think it does the same thing in your body; this is the job, let me explain to you, we'll come to this one day in medical side, as I explained, with the work of the lung, when you breathe air, the liquid in the lung is the transition point to change the matter into the gans that energy can be absorbed by the lung; or transferred through the lung. The same thing is with the acids and liquids in your stomach. There is no difference.

So, when you eat food, when you take medicine, when you take tablets, whatever, the job of the liquid in your stomach, you call it acids, enzymes and the rest, is to convert the matter into a gans, that by passing through intestines, can transfer its energy across the wall. In the lung, the contact point is very, very narrow, at the level of the, next to each blood vein, blood vessels which bypasses the lung. In the intestine, it's so long, in the liquid of the plasma of the gans. And every twist and turn in your stomach, in your body, dictates what you absorb, what you have, what you receive from the food you digest.

And as you've seen, when you turn the plate to another plate, you get the different gans, different energy, even though you see as your stomach is twisting and turning next to each other, all that creates specific gans side what can be transcribed from the wall. This maybe the surgeons understand why when you open a stomach, and you move things around, then you end up with new problems. Because you change the field strength which the body absorbs, used to absorb, to that date. So, it's not just that your stomach is somewhere, or whatever, it's that liquid in your stomach, how it changes the matter into a gans, that it can, its energy can be transferred across the wall. So, the liquid is not just the acid in the stomach, that what you call acid is breaking, changing matter into a gans, into a plasma, that its energy can be transferred.

When you eat a cucumber, a cucumber doesn't pass your intestine into your lymph, otherwise we'd see millions of cucumbers everywhere, even in some mush, what it is. The same thing is with chemotherapy, the same thing is with the, what do you call it, chemicals we use for changing conditions. Add up the figures and look at the total energy of a proton and electrons and neutrons in that chemical; in a way, if it's very hard, what I say, if you look at it, for example, I don't know if you can see the picture here, if this is electron and proton, I don't see it on the live stream but it doesn't matter, they are most probably picking it up, yes, it's showing that we are, where are we, yeah, so, when you see an electron and a proton, you look at, it's total plasma.

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

When you have oxygen, or you drink water, H<sub>2</sub>O, look at, that's OK, that's two hydrogen, and now, add in protons of the material, and then neutrons. Now, this is your plasma. And this is the energy which is delivered. The indication of what you understand in matter state, then, as a gas, this doesn't exist; this exists, this plasma. Because you don't see electrons and protons in the plasma, as a gas; you see the strength, this is where the confusion has come with a lot of scientists in respect to the gas and the matter. Because, in the atom of hydrogen, they look OK, this is the hydrogen, we know, one electron, one proton, and they look at it as a matter, but, in fact, you have to look at these collisions barrier, but, this is in the matter state because it has to create a friction, a slightly stronger than a plasma.

So, that's why, when you change the matter to gas, that slight friction energy which has to be released by the proton to show its manifestation, that it exists, is slightly at a higher level than when it's the same thing in the gas. So, when you convert matters into gas, you see energy.

That's why you can write your lights, because, there is no loss of the field between the two entities, it's all one, and so, there is no need for that friction and there is no need for that friction. The gas shows itself as a hydrogen, behaves as a hydrogen, but you don't see hydrogen. This is when the Nuclear Center in Italy did some tests on the materials they had from us; chemically, they don't see they have a problem; but, spectroscopy says it what it is, the CO<sub>2</sub>.

Even our Chinese colleagues in China have done the same; they are looking for the spectrum, they don't see the spectrum to CO<sub>2</sub> in some of their tests. Because, in the material they used, they had something else which shifted the size of the plasma to something else. As the strength, this is not the size, this is the strength, when we speak about plasma. As the size of neutron in this universe is the same, all over, the size of the gas is always the same.

It depends on what strength reaches the boundary; and that strength is detected by the amount of the principal matter in the center of the gas. So, before you rush and do things with, just because you know half of the story, please, be careful; that's why, I said, I start teaching you step by step. And that's why I said if you have people in Africa with ebola, and everything else, even people with AIDS can start testing with the CO<sub>2</sub>, which is with the fat, and see how they feel as they use it, as they consume it. It will show different reactions, it will not be the same with everyone, but because it's virus based, it will attach itself to it.

But, chemotherapy is not a virus, it's a matter state; and you see they produce a tablet or an injection to deliver the certain package. You look at the structure of the package, if you disturb it with the gas or CO<sub>2</sub>, then you create the problem. As I said, CO<sub>2</sub> links itself with amino acid, that's why you have it on the top layer. But, at the same time, when you have CUO, you have the same. So, what do you do with CUO, they can't see, it's somehow upside down, Marko; or I see upside down, it doesn't matter; so, what it is, in fact, let me write it that you can see, CO<sub>2</sub>, you attach yourself with HONC, so the energy is within the parameter. But, when you add CUO, the energy is beyond the parameter of the gas of the amino acid.

Look at the copper, 63, 60, I usually work on; its power is much more than the amino acid, so it dictates, and this dictation can lead to death, if it is digested, because, amino acid becomes part

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

of the subordinate of the plasma of the copperoxide, as a gans. It takes and releases much more powerful energy.

This is part of the weapon technology, because, in the space, you need this kind of understanding of defense of the matter in gans state, to be able to lead to the creation of the materials you need. But you can use the same structure in defending your craft in a certain materials, very much like if you are in the air and you go into the water; you need these understandings in detail before you do anything.

So, just don't go and say: Oh, first of all, we don't accept any of your resources, you have to test yourself and the scientists have to evaluate the way they can make your work to do it. And, unfortunately, in the space we don't have any FDA and we don't have world hold cell organization to authorize you how you can save your life. If you understand the principle, as you enter a condition, FDA cannot send you authorization, put your finger in the cup.

Are you OK, Caroline? She's got pain in her chest, from the poisoning.

So, please understand, just don't go say: Keshe told us he can take it, understand your body structure, understand the other chemicals you are taking, in conjunction, for your diseases like AIDS or ebola, or e coli. Because those chemicals have their own interaction fields, it becomes composite.

Is it possible to visualize or make this visible for people to understand, because I have now a need to imagine it?

We can, chemistry is all imagination, nobody's seen an atom.

But, can we make it visually?

Yeah, you can see it with the gans, you can see it.

**MK: OK, I think it's time for Luciano to bombard us with this breaking news again, they didn't report your last CNN break news, Luciano;** I'll tell Lucian too;

Luciano: Haha, OK Rick, so please, try to load the first image;

OK, just a second;

OK, so please Rick, load the first image, that's nano on the score two...

OK, just a second, just to get this lined up here;

Sorry about this.

OK, while Rick is loading it, I will proceed with the story.

OK, he wants that CNN breaking news.

L: So, if you remember, about three or four workshops ago, ha, ha, you though they were saying it, so, if you remember, about three or four workshops ago, we were discussing about iolar cells,

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

so to speak; so, basically, the regular copper-zinc cell, with water, is theoretically producing 700 millivolts, and..

MK: Can you repeat that again, please?

Yes; a cell with just one copper electrode and one zinc electrode is producing 700 millivolts with water, nothing else; and this is just done with the theoretical part. So, as you remember, you suggested that we shall put copperoxide gans with copper, so we should see some improvement. And now it's coming the nice part of the story: in the moment in which we have gans copperoxide on copper, the voltage is raising from 700 millivolts to about 1.2 volts, so we have about 30% increase, and also when we are going to put copper nano...excuse me, copper wire, nano-coated, will raise the same, about 1.2 volts.

So, basically, it's nothing new, it's consistent with your findings and the people in Italy, what you guys did, but now, it's coming the nice part: I think that the picture is not loaded yet, but I will explain you until then; so, basically, I was putting in a cup the regular copper wire, and the zinc plate was nano-coated with an oxide of a metal; but manganese oxide, molybdenum, whatever one has in his lab; so, basically, the best of doing there is depending on what you have, you can have molybdenum chloride or oxides, or whatever, and after that, to, how to say, to modify your technique of getting nano-materials that was lit by a blue laser, in all these Sony units, that they have, I think, how they call it "blue scribe", so instead of printing paper label on you DVD, you just burn like a sensitive layer. So, that black thing that you are going to see on the zinc electrode is the nano-material of a metal. And now it's coming the surprise;

MK: So, what you did, excuse me, let's go step back. So, what you put in, no, I don't see it, in your zinc nano-material, you put it through a caustic.

No, no, no, on a regular zinc plate, right; I covered it with metallic oxide; it could be molybdenum or manganese or whatever you have in the lab.

OK, yeah;

So, that is, as you said in the past, there is a chemical covering, so it's not going to help us, so to create nano-material, we will do that with blue laser, from a regular commercial DVD unit; you have the Blue Ray unit;

Yes, yes, it cost Americans 6 billions.

...and more powerful lasers, because it is, and these lasers, excuse me, these units, instead of putting the paper label on your DVD, the laser is burning the photo sensitive material to write your, whatever label you have or want to print. So, that is creating the nano-material on the zinc electrode then; in this case it can be molybdenum, atomic, atoms, or atomic nano, or manganese atomic nano, whatever metal you have in your lab, you can get. It would probably work with chrome, Cr, Chromium, and other things. I did have, this is what I did have, so, probably the

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

metal does not count too much if it is like heavy element; so, now it's coming the surprise, let me see if Rick managed to load it, OK;

Let me run the drum for you; yeah?

Yes, Rick is still not showing; yes, yes, sir;

So, should I roll the drum until you find the picture?

Rick, can you try sharing that screen too, so that Mr. Keshe can see it beside the live stream?

So Vince, you can do it on live stream because I have it on my computer. So, you can forward it to Vince;

What? Take the... What? Which one? No, no, that's one, that's the one I want...

If Lucian wants to try to share his screen, try showing that;

I don't know; can I do that?

You can try.

I mean, doesn't that crush Skype?

No, it should be OK.

Doesn't matter for him, he can share it on go-to and I can share it on your guys' screen.

Let me see; but Rick, can you just create a folder and copy that there? Do you follow what I'm trying to say? Create the folder;

This is becoming a long, long drum.

Lucian: OK, so let me explain to you until then; I think this is how you did it last time, preview it and make a window; covering Skype; OK, so I'll go on to explain to you until then. So, the surprise was that on the regular copper wire which was not coated at all, we have copperoxide gans on the bare copper; so, when the measurement...

Can you, excuse me, can you repeat that again, please?

Yes;

We see a cup and the yellow light in the background.

Yes, so, I will explain that, the picture No. 2, in the cup, the left electrode is the zinc, regular zinc plate, which is nano-coated with metal, manganese, molybdenum, whatever you have; on the right side is just a regular copper wire without any coating, and in the middle is like copper nano-coated wire. So, this is the setup I was explaining to you.

There are three electrodes inside, one zinc, one copper and one not copper?

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

Correct; so, now Rick, please, share the other picture on the score three, which is a detail under magnification of two and of magnification, I think, five, from the camera; we can see copperoxide gans on the bare copper, and the water into the cup is not at all salt water, it is plain water. So, in other words, with this technique, we can get copperoxide gans without having the nano-material copper; in other words, the middle electrode, I was putting it later, just for measurements, but the creation of copperoxide gans was without the third electrode; so, basically, what I'm trying to say is that we can obtain copperoxide gans in a regular water cup with just zinc electrode that is nano-coated with the metal, and is giving, it's very easy to get the voltage...

MK: So, you have, you are very correct, you have found another way of producing the field environment which is, can release copper atoms;

L: Right, I was trying to link this with what it was said before, the chemotherapy; he was explaining that you are going to match the field near the electron, no, field strength, so, then you are going to pull upper level atoms from the copper wire, and with oxygen from the water, you are going to create copperoxide gans, without salt, and what is not seen or it is seen very barely, there is fat on the top of the water, so, I was getting that with streams out, and it could be some sort of hydro-carbons, I, probably we are going to save it for senital lab, probably is going to be like short chain hydro-carbon, like C<sub>2</sub>H whatever, 4, 6, some sort of fat, some, you are calling oil, some oily thing;

MK: Yes, this is, you, in a way, as I said, you can reach this point in different ways, you don't need to do it. In the coming time, we'll show it how it's done with plasma, but you have created a condition, and that condition allows the separation of the copper from the top layer of the copper electrode, and, as it's separated, and is not in the chemical interaction, it immediately mixes or adds up with the oxygen; I think we lost it; are we still alive? So, you have created... What's the energy, you said?

Yeah; Rick, can you share...

I think somebody has added something extra and it's taken the band width; hello?

As you explained a few moments ago, in this process; yes, do you hear me?

I can hear you but I can't see the energy you have brought;

So, as you explained few moments ago, in the process...

We are losing him, we can't hear it. Lucian, try again.

L: I was saying, as you explained a few moments ago, in the process of creating copperoxide gans, we are releasing energy, and the cell is delivering 1.2 volts, that means much more than 700 millivolts without anything in it;

Well, how much current do you get through this process?

I can move the analogue meter, and I will look into the box to see what resistor does have there, probably next week or in two weeks I will tell you. Probably more than 5 micro grams, for sure.

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

Because the 5 micro grams, as the regular cell is providing, the analogue meter doesn't move, and it is moving now. Probably is doubling, tripling, I will let you know.

Interesting enough, what is that yellow color in the background?

Nothing, it's some bad habit of Canon cameras which makes the image yellowish; I don't know why.

Lucian, ask your bosses to buy you a better camera.

We accept donations for Laika;

I think White House can donate a lot.

Lucian: So, now it's coming the question; and because you just explained, maybe 15 minutes ago, that thing with the plasma radius, so, we have the CO<sub>2</sub> gans, and based on number three electrons, neutrons and protons, which is CO<sub>2</sub>, that means 32 plus, maybe, I think it's 70, 72, if we take a look into Mendeleev table, we can get magnesium, sodium potassium which we are not interested in, Cr, Chromium, which we don't want for now because it's toxic for the human body, and Nickel; so, now, supposingly, you, we want to get Nickel from he CO<sub>2</sub> gans, so, the question is: how, if we can say that creating the gans is a fusion process, obtaining Nickel from CO<sub>2</sub> gans will be a diffusion process. So, now, the question will be, because we have to diffuse the CO<sub>2</sub> gans, how we do that? In other words, how do we create the condition, to speak in your terms, to break the CO<sub>2</sub> gans, but;

You want to change the gans to a matter?

Yes, to a Nickel, atom, atomic, or oxide.

Yeah; go back what I said just a few minutes ago, when you go from the atomic structure to a gans, you release certain amount of energy which you see as a light in your system. When you have the lights, you are happy. Now, add the same amount of gravitational magnetic field from another material into the CO<sub>2</sub>, you will get your Nickel; you have to give enough energy that allows you to feed, I'll explain it to you, just one second, Luciano; you have to put enough gravitational magnetic field energy into the CO<sub>2</sub>, that it allows the Nickel structure to be formed and to become one. This happens on a upper layer of the atmosphere of the Earth; let me explain to you how you do it;

You have two ways of putting energy, by electrodes or by magnets; electromagnets or other...

No, no, no, that's the field, that's the field.

Oh, OK.

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

You have to add both gravitational and magnetical; when we talk about energy now in Keshe Foundation, we talk about the plasma, of gravity and magnetic together, not as a field. So, in upper atmosphere, when nitrogen is formed, from the rays of the sun, it's the interaction and friction between the two, Earth's gravitational magnetic field and the Sun's gravitational magnetic field. And then, you have the process by which helium is created, instantaneously, and that helium again releases on the extreme ultraviolet strength a plasmatic condition, which converts immediately the nitrogen back into a matter. And it rains down to us as an atomic nitrogen. You have to find another way that you can deliver into the container energy of the plasma; I think it's just about 3 or 5 electrons, and then you get your nitrogen, you get your Nickel. And then add the number...

OK, I ask a practical advice...

Let me finish... You have dynamic reactors, you have star formation and you have free plasma. In space, I have already explained this to the knowledge seekers, months ago, when we had the reactor as a star formation, if you go on the pictures from about four or five months ago, we put some reactors vertically, and some horizontally on the floor, and I explained to the knowledge seekers, in space, depending on the reactor which is on the boundary to the center, what environment you create that you create the matter you want; so, when you create your CO<sub>2</sub>, you see, I'll explain to you, if you, some of you, there is a way to say which of the pictures are shown in public,

**There are UFOs and some of them are just, what do you call it, imaginary things;** if you look, especially like the system which we saw over Jerusalem, and look at some of the reactors at crafts, you see, which they have shining, rotating light around the edges of the bottom, this is a combination, a three reactor combination. Internally, each reactor looks into the imaginary plasma, free plasma, and then, for example, if you have, let's say, you have a CO<sub>2</sub>, increase it to respect that the field, this reactor in distance creates, you collect, produce, let's say, banana. And the next reactor is the field which releases from it, creates tomatoes. That's where you get your energy to from, to add to the gans to convert gans to the matter.

This I taught to the knowledge seekers months ago, and I explained to them this is how you produce in respect to what boundary reactor; the boundary reactors, usually in the specific formation, are made for two purposes: one is for production of material and one is for defense technology, concentration of the shield in the certain direction of the flow. It gives you layering; so, the simple thing is, you took away from conversion the interaction between the fields of the electron and the proton, and you become gans. It's not the fusion, as I call it, it's inter-atomic fusion in one of my papers, it's in the back of the book.

So, to reverse the inter-atomic fusion to bring the plasma of proton and electron in the plasma proton, you never make the original neutron; now you make a gans. To make it to neutron, you have to put that energy which you took out back in; and you do it with free plasma condition. This is where we are going, step by step; so, if you put, let's say, microwave into the CO<sub>2</sub>, if you are lucky, and something happens, you might find you get Nickel. But if you deliver the exact right amount to the CO<sub>2</sub>, you get Nickel every time.

**Transcript from 35th Knowledge Seekers Workshop held November 6, 2014**

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

So, you are trying to suggest that we shall design like a 3D position mechanisms, and in the star formation tetrahedral or tetrahedron, we should move this cup with CO<sub>2</sub> gans, at the specific coordinates in spherical coordinates because...

Voila, now you become what...?

...and we'll give this energy to the cup with the CO<sub>2</sub> gans, and we'll transform that into Nickel and release some energies to free plasma, if I'm getting it right;

Yes, you extract some energy from the free plasma to deliver to the CO<sub>2</sub>, to produce the Nickel.

Got you. I'm asking you because we are speaking with our friend J.F. to create some special systems for the people who like to test, and I wanted to make sure that...

Is your friend from Sienna?

No, it's in our group, so,

He's on the call, yeah, he's on the call; and you'll probably hear from us quickly.

No problem; there's something I've seen, there is some, I just saw something running and I've heard this before: how can we show the things we are developing and the sky doesn't become exclusive club for few people? If you are doing something, send it to Rick, and then, if it is something we want, something we can add to the knowledge, it'll be brought in. If you are doing a research like Luciano, or you are doing something which is interesting, like, what do you call it, Mr. Klausen, which now has managed, we think, to produce gold out of fresh air, then, what do you call it, send the link to...pardon?

I was leaving you the privilege to do gold to you, Eric and John; OK, we are back;

Yeah, I can hear you but I don't know what you're saying;

I was saying we will leave you the privilege to make the gold to you, Eric and John, because you were the first...

No, I have no interest in gold, it's just the people who are fascinated by the color; it's the illusion of the color that people sell their soul to; now, because, what do you call it, Sir Klausen is working on that and he's found a very simple way to do it, and now he is looking for a spectroscopy testing, or somebody can evaluate what he's developed is gold, is reddish, yellow gold, like Russian gold, so, if, we are going to ask, most probably our Chinese friend, if they can do their own spectroscopy, we'll send the material to them, or anybody who has spectroscopy facilities in Europe, get in touch with me or Rick or Mr. Klausen, to confirm if it is what he's been working on to do.

But what I was trying to say is that if you develop it, 'cause a lot of people are producing a lot of other things, a lot of different aspects of the technology, and they should be heard to. So, if you

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

can send your connections to Rick and then Rick will decide to see what we are going to show and when it's relative to the discussion to be brought in. This is not an exclusive club, it's just that the way we...

We have our meeting every week, so we are showing to each other what we are doing, so...

Yeah, yeah, but there are other people who are doing their own private or governmental tests with the things from the Foundation, and they want to share it, so, we have to put a note somewhere, if you want to share a video or a test, like that gentleman from America, we had a few days showing us his laboratory, we are here to share and understand the knowledge. So we see what happens, this is what I said to our Chinese guys in past few days, we are merging a collaboration between the Keshe Foundation lab with the Chinese lab in China, where they have the same kind of facilities on scientific background, so we start sharing knowledge lab to lab, directly on the live stream, more or less, or on regular basis from this week on.

So, we extend the research out of the laboratory of the Keshe Foundation with other labs and then, hopefully, when we get confidence of our Chinese colleagues in China, in respect to their agriculture, we'll have live agriculture live stream that everybody can see how things are grown. As I said to our Chinese colleagues on Monday, it's a privilege to hear them speaking in Chinese together, and translating and discussing it, and we sit and we listen to it, and then they translate to us, or we try to explain to them in Chinese, so we start opening connections between laboratories and scientists around the world, on the live stream basis, that we can see each other's work. Please send you things to, is that, what is that, is that the Klausen's picture? Rick, what are we looking at? The goldish color?

He's busy moving...

Yeah, I was just trying to get one picture out of the way to make the other picture show up, hopefully, and for some reason it decided not to; here, just a second here, OK, there it is, right now, yeah, I got it back; yes, this is one of the pictures from Eric Klauson's kind of a, a teaser picture we were going to, one of the pictures we were going to include in the last Spanish speaking workshop, and we can possibly include it in the next one or discuss it at any point, but these were specific for that workshop, so we don't want to spoil it for when Eric wants to talk about it;

Can we organize with Rick for next week, next session, that he can make a presentation of what it does, how he does it?

Sure, that would be fine, absolutely.

And if anyone has spectroscopy, that he can get in touch with Rick that they can confirm what it is what is developed.

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

That'd be great if somebody had constant access to some machinery like that, that we can send samples to, to be tested, I think, that would be a great service for someone to provide to the Keshe Foundation, would it not?

Chinese Keshe Foundation have a facility, I think James knows who to get in touch with and organize it between the two, it can be done, but we got to fly it all the way from, what do you call it, Germany, to China. We can organize it through Keshe Foundation, there is no problem for shipping, it's very strange, you've got to realize, shipping these kinds of materials at the moment, they are watching the movement. We sent the package to do with gans system to Tokyo a few weeks ago, and know the Japanese government officials, know the company, know us, we never understood why the package, which is destined for Tokyo, was kept by FDA for three days.

So they went through it, they copied it, and they sent the package to Tokyo, so that America wanted to know what the Japanese are receiving into the woods of Fukushima, which metal plate, and battery, has nothing to do with FDA. So you can understand how they are controlling everything which goes out of the Keshe Foundation, I can put the e-mail on the line, we received an e-mail from the shipping company, which is UPS, 'that your material is kept at by FDA and is on hold to be delivered.'

So they went through the pack, they analyzed everything, what was in it, what they could pinch, they couldn't come straight away to us and ask us "Can you tell us what it is?"; so, when you move things for the Keshe Foundation, understand that they are all going through the hands of the American security, and others, to be on the top, that they are on the top of the game, but it's the same with everybody else. I'll post the e-mail from UPS and you will be understanding how much control goes around, in what we ship, even if it goes to another nation's government.

OK, so don't complain, send it to Rick, we'll show it and we'll organize it, but just don't send us the picture, this is something it took me a bit on the live with, Rick and Klausen because you have to make a presentation, a case, and we'll listen to it, make it 10 minutes, 15 minutes, 20 minutes, how you'd done it, what you achieved, what we can learn from it, and what is the next step; maybe somebody else will pick up. This is important.

That's an excellent offer, I think, that's beautiful, that people can show what they've done, basically, and explain about it, and then it's open for more questions and answers beyond that, that's a great way to present things, I think.

I think the BUSI just put, 'if someone has produced a CO2 gans, can ship to me, I'm in China and I can do the test.' This is the guy from the Chinese Keshe Foundation. I think these are the people who would've done spectroscopy as well, pick up his link if you can see it, and put them in touch with Rick Klauson, or Eric Klauson, if you see it, just pick up. It's BUSI, so, this is how collaboration, international collaboration, will come, where the governments realize scientists and normal people work hand in hand, without patents and national borders. This is where the breakthrough is coming. Next question.

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

Mr. Keshe, there was a question from Ki Lang Hong, who asked me “May I ask a question related to nano-materials?”;

**OK, so, Ki Lang Hong asked me, ‘may I ask a question related to nano-materials?’;** It is said in Keshe’s paper that the nano coatings spread their field strengths to the salt solution, and those fields become gans later; so, when the coating, when the coatings are releasing these fields of themselves, will they decay?’ So now you see, he’s asking does the nano coatings decay?

MK: They don’t decay, it’s just that the field interaction, if it’s a copper, which produces CO<sub>2</sub>, it creates an environment, becomes a magnet; if it’s a copper which is released from the plate, they don’t decay, they interact. As I said, understand what you are receiving and what you produce; you give energy, you give part of the plasma, but you don’t fall so much that you become from copper to CO<sub>2</sub>;

So, with the coating, and then, will the copperoxide itself be a loss of copperoxide, in the process, it would have to either be recoated later or something;

There is a possibility you don’t get the strength continuously the same, you take it out and put it back in the caustic. In the leaflet which is going out with the units, I have mentioned that; that this is what; you don’t recoat; what you do, you rebalance the nano layers, if you get to the point that you don’t have or you see a weakness in the production of CO<sub>2</sub>, all you do, you take the plate out, you drop it in the caustic; in a very slow process, caustic, maybe even steam type, steam it and put back it back in and you carry on the same; there is something which you will understand, is that if you do the recoating too fast, then the top layers of your nano-material is loose, so you lose it into the caustic, and then when you, if you look at, if you’ve ever looked at your caustic when you finish making the nano-layers, you see a mist like copperoxide, or you see a mist like CO<sub>2</sub>, and you think this is a residue from the caustic, but most of what you see as a mist is the CO<sub>2</sub> which you have created, and become a gans or copperoxide layers which have been loose in the way, you don’t see it with the naked eye, they have converted into copperoxide into your caustic.

I produce caustics of all colors and shapes, also some materials; I have extended the knowledge over years and years of doing it, in how to produce materials which I want. Somebody says: can you put a pinge in for the magnesium I have created for the Keshe Foundation,

Rick? What is this? What is the pinge? It’s from Robert Lelomme, am I correct, Lelomme? Ah, that’s right, can you put that on the; can we get that link and put it on the forum or on the website that people can go on? Yeah, I received an e-mail from Venezuela, New Zealand people, ☺ that the formal books of the Keshe Foundation transcripts of the workshops are complete, or will be completed soon, and they’ll go back again on the, what do you call it, on the Amazon.com; so, like the Chinese have already downloaded and they are taking the transcript and doing the Chinese transcript of the workshops, for the people to read, now, I think it’s up to 20 is done, and they are working heavy at it, as they said, the whole workshops sets and all talks we, gradually become transcripts, or, if you want the translation, I asked the web master to put the link on the

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

Foundation forum that people can read the transcripts or if you want to translate it into different languages.

I think... Can I say something? I think it goes back to Vince; if he can put these the way you put other works, other banners, on the front of the forum, like the link to this or the link to the transcripts, then we don't need to go to the web master, because you have access to it there directly...

Yeah, I can do that;

Yeah, thanks very much. Any other questions?

There were a couple of questions, just one second, please Rick, I've got a couple of e-mails about the shipping of the CO2 kits. Can we just get an update on that, please?

What happened, are we lost? Are we still...?

Did you hear the comment from Vince, he asked a question about...

No, it's just rusty voice;

OK.

Can you hear me?

I can hear you now, yeah.

OK, so, I've just got a couple of e-mails about the shipping of the CO2 kits, can you just please update people on that?

Every single unit will be completely, all our orders, we received hundreds or God knows how, all the materials are together today by 2 o'clock because of the manufacturing problem, and every unit, if it's a plate, or people, we have people who ordered 20 units together, some people ordered 10, and also some numbers. All will be completed and met by next Friday. We have nothing that we'll leave outstanding. So, everything will be done according, by Monday, first dispatch will leave and the rest by the end of the week. It'll be all delivered. We were waiting for the plates to come, and copper plates arrived two days ago, and Nickel plates arrive at 2 o'clock today, because, to make a hole extra, hole, is taken two weeks extra.

Yeah, Armen laughs because he knows the Italians. So, every unit will meet, and most of the plates will leave this place, we have already spoken with the shippers, everything is done, we'll meet full commitment by next Friday, within the 30 days we promised. ... on the weekly basis... Pardon?

### [Delays with Shipment of Books](#)

And while we are on that topic of shipping, people are wondering about the books and I was wondering if book shipments are on time or any backlogs are happening there?

There is a problem, most of the people who have problem with shipping of their books, we have put them directly into the dispatch, because the dispatch is done by the Belgian company and what I see and what I understand from what they told me early this week, is that they have hit the

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

same problem as we did with the post office in Belgium. If I receive, I've asked and Caroline is going to finish it hopefully this week, there is something like, 200, 300 books have gone missing with DHL, since January of this year, which people have gone for refund or we sent the second book to.

If DHL has collaborated with Belgian government to stock, hold or withhold delivery of books, DHL has no credibility, we'll go public with it. Because, it's the trace that people have paid money to us, the shippers can come up with the tracking number which I have given the books to DHL, and people who have asked for a refund from DHL, from PayPal, when we have started this process this week because at the end I pressurized the dispatch so much that he had to squeak, as we say, and he said that 'large number of books has gone missing, Mr. Keshe.'

And now Caroline is going through everything in the past 6-12 months which has been refunded by PayPal; these will go through the dispatch, dispatch has to give, what do you call it, tracking number, and then we'll come to two things: people have received the book and they claimed the money back, or as we know, up to now, DHL has been holding a lot of books not delivered. We had the same problem with Belgian post office 4 years ago, 3 years ago. We had 400 books, I think, in the central post office of Belgium, not going anywhere; we tried to, pardon? Blue park, we even know where it's sitting, which post office is sitting in; Mr. Hans Bracquené, with the word of the King's order, tried not to send any books out from the Belgian post, to create discredibility for the Foundation, that they are thieves; and then we found a different way,

We send the books out now, they have gone to dispatch, and if DHL is collaborating to block the delivery of books which they have been paid for, then I think DHL has a lot to answer and there is no credibility, so they work according to what they are told. This week, we reckon, we'll, PayPal has refunded nearly four and a half thousands euros on books. That is something like a thousand books, roughly, a hundred books, in past 3 months. So, if DHL is losing hundred books, why are they there to do such a service? Or, they are dumping the books somewhere and want to put a stop to me...

Mr. Keshe, I wanted to intervene a little bit. UPS and DHL, when you do a shipment, you have a tracking number. There is a website in the US should give me the tracking number, I can type if these books, if it's missing, I can find out in minutes where is it...

Yes, yes, we know that. Yes, we know that. We know. It's just that we left it in, with, because we saw the refunds coming in, refunds coming in. Then, we asked, we sent, if anybody has asked us 'why I haven't received the book?', they see, we give a link to a company in Belgium, which is a dispatch, it's nothing to do with, these are printers and publishers of books, which have taken over the dispatch of our books, so we pay for the storage, we pay for the packaging, we pay for shipping to them. They hold, at any time, up to 6.000 books in the storage. So, this means it's not that the books are not there, what they tell us, and then they send us bill on a regular basis, 'we have shipped so many books, this is the charges for the shipping by DHL'.

Now, the books are not delivered, now we've, we've found out the scale of the blockage. They have told us, every person who has claimed for a book not delivered, they have to give us a

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

tracking number. When we have the tracking number, then Caroline will go through every single one on the screen you talk about, because we know about it, we see if they delivered it or not. If they have delivered and they've received the refund, then we report this to PayPal for a fraud and they have to, to, their accounts have to be closed. So, these people are going around, buying things and claiming not received, and then, what do you call it, then defrauding. If, what it looks up to now, because there are other pieces of information which I cannot give you now, according to our dispatch, DHL is holding the packages. They are, their blockage, the books are sitting in depots of DHL, because they cannot show proof of the delivery. So, then, because of the selling, it becomes the cover of DHL.

But, we don't talk, let us do our work, we realized the extend of this problem, we've been so busy with so many things, this Monday I spoke with our dispatch people in Belgium, they said 'Meghran, there is a huge problem but we didn't want to tell you', I said 'But, I see refunds going back, what's the problem?', and you get so many books not delivered, you don't even respond to the books not delivered. So, now, when you leave things to Caroline, it gets done, so Caroline has taken over this week, we are going to find out, because it's altogether since last January, it's nearly 10-15 thousand euro books. We come to different arrangement with UPS regarding the dispatch of the, what do you call it, the kits and the plates from here. We become aware of a lot of things what's happening, we had this problem, we have four boxes of books not delivered by Belgium post, and then when they start inquiring, they told us the books are in the post office in Belgium, and they've been ordered by the government not to ship anything for Keshe Foundation. So, so, it's everything in DHL.

So, for now, what should people do? Do they just get in touch with the Keshe Foundation and...?

People should, yes, yes, just get in touch with us. What we are going to do, what I am going to do, especially, is we are going to print a list of the people who have not received their books on the forum, we are going to give you a link of the number of people who have received refund, and they claim their money, and their tracking number, because this has to go open. If, we, the foundation has paid for the shipment of the books, the foundation has paid for the books. The DHL has received payments for shipping, the printers, what do you call it, the dispatch has received for the storage and packaging, people have paid for the books and they've reclaimed them back, and they say they haven't received it. It takes us 2 or 3 weeks, Caroline within next 2 weeks will sort it out, and then we put these on the Internet, the list of the names of people, how many people have claimed money back, the tracking number and then it becomes, it's a clear fraud from one end or down there or the pressure of the government, but our dispatch clearly, from what they told me, is that DHL is sitting on the books. And, it's done by the word, the instruction of the government.

Because then, you have to understand something, if you go back a few workshops, before, I said to you, that they've started a procedure in Belgium for fraud purchasing books, not, getting paid for the books, not delivering, this is part of the same process. They set it up, forced the DHL not to deliver, then they say 'we are on the fraudulent basis, you are taking money' and then when I announced it, the whole thing went down, Mr. Delenoir, he went back in the shitpot, he, even he

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

had to go, they even interrogated our webmasters, whether they are involved in the circle of taking money from books.

So, we knew what's happening, I immediately announced it, go on the workshops, I announced it before. Now, we've dug into it, DHL is working with the collaboration of instruction of the Belgium government to hold books back, so to start discrediting the foundation. When we have the tracking number because we paid for it, last, three weeks ago, I received a bill for 12.000 euros from the dispatch, we published the bills, you can see the bills. If we have paid this kind of amount of money for transfer, for shipping of the books and people don't receive it, means somebody is lying, somebody has been bad, but if the shippers can show us the tracking number, then it's DHL who is stealing. Or the people who are claiming that they haven't received the books, but they get the books, and I told you, this is the ethos of the Keshe Foundation.

I could go and ask for every single one in past few months. I said 'You know something? If the people see the books by stealing, it's to them. They will read the books, but they won't get the knowledge.' This is the way I always worked. I don't go to lawyers and get a lawyer, and go to this and that's a waste of time and money. The man receives the book, it's come by being stolen, he won't get the essence of the knowledge, he reads a romance.

This is what I said even today at the beginning. You send me a death wish, I don't feel you any harm, I don't even do anything to harm you, but as I don't need it, it goes back to you and your family. It's the same with the books. Now, you see Alibamah ethos, it's not just the talk, we don't go back to the, the, what do you call it... The reason I did this this week is very simple, I think it's the guy called, hm, he's a guy from, I think it's, not from the Mexico, he sent me an e-mail 'I'm going to go and sue you for fraud', yeah?, and I thought 'why, why are we getting sued for fraud, for not delivering books?', I called the dispatch'.

And, then, I start understanding, he knows if he's on the line or he comes on the workshops, I've put, put your e-mail that you sent to us, that you are going to sue us for fraud, for not receiving the books. And then I, you see the whole history, we send all the e-mails, it goes back automatically to the dispatch, and the dispatch doesn't even answer. So, the guy in the dispatch is in a way, to say it in English, shitting in his pants, he is sending books, but he is getting no claims, so he won't respond to it as well. We are not taking any legal action, because it's the way we work. So, we become as to be the frauds there.

So, now we are going to bring this to an end, this, this is going to be, from now on, every book comes with a tracking number, within 30 days has to show the delivery. And, Caroline says, we've published all the books that are sitting in Belgium, because we have a full list of it, names of people. And, we send the books for the second time and we pay for it for not to lose the way.

We have a huge problem with the Belgians and Belgian government. You do not even understand. Mr. Hans Bracquené has made a case of a fraud. He has convinced everybody else that even we cannot travel. At the same time, you have to understand, Mr. Delenoir has the PETA files, all the murders of the children when the king finished playing with the children, is done by Mr. Delenoir, in the police force. They pay criminals to carry it out. It's happened to us.

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

We know what happens. We got turned over by the road, and the guns was thrown out of the car by two criminals, and when the police captured them in the center of Antwerp, they said they have a criminal record, and then they disappeared. It's well organized crime within the Hans Bracquené, the present king of Belgium, because I can prove clearly how king Philippe is connected to Hans Bracquené.

Look at the trips the king has made to China, look at the king clip has made around, Mr. Hans Bracquené is always on board. I told you I'd dismantle you step by step. Now, this is one of them. You see how that work will end, and I tell you another tip, if somebody has a diarrhea of, what do you call it, diary of Mr., the present king Philippe, when he was a prince, in 2004 and 2005, when you are handed the technology, and we've discussed the technology, we are disconnected, to, we are disconnected... Can you hear me?

No, I can hear you.

So, when we did all the negotiations and transfer of energy to Verhart, out of nowhere, prince Philippe turned up in Verhart to see what we've transferred. Look at his diary, when he came in, and immediately the technology company was sold to the British ministry of defense. We know too much how their structure works. So, please don't sue us, we don't deliver the books. Now, we are going to release everything. The data is, you have paid correctly, the foundation correctly has transferred your e-mail of the purchase to the dispatch. Dispatch says that the books are not getting delivered by DHL. So, why DHL, an international organization, needs to sit on the books? Is it incompetent, or does the instruction come from the Americans because it's an American company?

When you discredit the company, and then you started, the most beautiful thing is this, they start the case suing us for fraud, for what they stopped themselves, for the books not to be delivered. And the most interesting thing is how everybody has fallen in the trap one man has set to clay everything. I've become a criminal, a terrorist, everything else, for because Mr. Hans Bracquene could not get the technology freed, that you all could have it. It's all made of phantom and everybody has believed in it, because it's come through the government of Belgium, by Mr. Hans Bracquené, by the present king, because he's part of it. I can give you a name of a company, 10 billion fraud, which was done, directly in a trip, in the presence of king Philippe, Mr. Hans Bracquené and the Chinese government.

I've been in the company. Look at the company in Flanders to do with solar cells and 10 billion contract. We are doing our works right. I tell you, there is a problem with the plate, we had to do it. Caroline, can you bring the plates?, it's in the, wear a glove and bring the plates which are there. You say it's got two holes, it's going for processing. Italians made a mistake in manufacturing, in two days other part comes in, and it goes out next week. Yeah, can you, Caroline, how do we go on the video? Caroline doesn't want to touch the unit with the poisoning she has in her blood. Yeah, I turn it on. Um, just one second. I'll go and get it myself, because I am wearing a glove. You speak between each other, because it has to be correct. One second. Marko, you take over.

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

So, is there any other question?

Not getting any video at this side. Anybody else not able to see video? Anybody else?

Yes, it sure...

It's starting to span, it's probably going to come in here...

Rick, can you just restart to Marko, please?

Hey, Lucius, can you just wait a second, please?

Marko, can you restart that, the web cam?

I can.

Please.

Is it coming through?

Thank you. Yeah, it's coming through. There is, before you say anything, we should, **there is another question in the go-to meeting, from Ivan**, and I am not sure if we should just wait for Mr. Keshe, or you want to try to answer it, Marko? You have experience with gans, and this is a question about gans.

Sorry, can you repeat that? I didn't get the question.

OK, can I ask?

Yeah. No, I think you can go ahead, Ivan.

Ivan: Do you hear me? OK. So, we set up a system producing gans, and when the system start to produce the gans, we use a magnifying glass to point the sunlight in, and the gans inside turned black. Do you know why is that?

The gans turned black where?

In the container, where the gans was produced. So, the container was producing the gans, and when we point in the light from a magnifying glass, the gans inside turned black.

Was it all the gans or just the gans where the light was attached?

I see on the picture that the guy sent me from England that it is all the gans inside is black. The same thing...

I don't know about such a case.

The same thing happened in Germany when we did the experiment with the torch. I asked Frank to point the light from a magnifying glass to one of the sides, and then we had gans in the copper layer, so the gans inside turned black also.

And, that's due to interference with sunlight? Due to magnifying glass?

Yeah, the sunlight was going from the magnifying glass.

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

OK, can I ask you? Can I come into this? Can you explain?

So, we make a system and the system start to produce gans. So, when we put a magnifying glass...

What system? Slowly, slowly, go through your system. What is it? Oh, we've run out of battery.

OK, so it was not my system, but I think it's, the way it was done, it's copper system, with the copper nano-layering, and ordinary copper, in a single container, and after the system start to produce gans, we took a magnifying glass, and we just point the sunlight inside, from the glass, and from the picture I have here I see that the gans turned black.

MK: Yes, yes, you're correct. Now, let's understand, don't get excited. Understand what blackness means. The blackness means you have managed to create a complete gans. But, check one thing. If it's the black spherical or is it like a matter? If it is like a matter, it means your salt in your container is not strong enough or has the right salinity for the gans which is released or the nano-material which is released from the, from the copper plate to become converted into gans. So, what you see, the black, is still in the nano-state. It's the matter state of the atomic structure.

I was talking about this, I think, to the knowledge seekers, or to somebody past couple of days, that, you see, if the copper, I think it was in the Chinese studies, I think I was explaining this, you can see in one of the talks. This means, what has happened, you still have a gans which is absorbing all the fields. You don't have a gans that is interacting. And, most, most probably, this happens, not if, you most probably had a very rapid interaction, production of the copperoxide when you started the process, so some of this gans material is flaked off and it stays, maybe 3 or 4, or 10 of them are still stuck together, they show themselves as one, but it's atomic, you don't see it, and so they still have the property of the nano-material, so you have a mixture of the gans and nano-material of the same thing in your liquid. This is normal. Do you understand?

So, in fact, what we do to that process, increase the gravitational field of the plasma?

One of the things is, no, it's just you have to understand, because even though you buy copper, it's not all copper of the same consistency, and this comes through that kind of construction. So, when you see black material in your gans, unless you want to create a black material, because sometimes when you have iron you get the black, what do you call it, gans. So, it means, most probably, in your copper sheet was not totally copper, there is a mixture of iron, like the way you see copperoxide in blue or different kind of shade of blue and green with CH<sub>4</sub>. The CH<sub>4</sub> and copperoxide are very near in colour to each other. One is bluish green and the other one is greenish blue.

And, so, you've most probably done two things. The, the, the, let's say this, let me explain to you, maybe you'll understand it. If you put ten atoms of nano-material next to each other, you have released one, the number 1 and number 10, and you have, through some process, you have released all the numbers 2,3,4,5, and 6, on the layer below. So, now you have a floating, what do

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

you call it, nano-material in your mixture. This happens a lot. So, it is, it can be explained, you have a black material, that's, you have iron in it, which is near black, but the, black iron is not black, it's greyish black, or most probably, you have started a very fast process and these are parts of the nano-material which haven't converted yet. Take them out, if you can separate them. CO2 floats very, very slow. The gans of CO2. It's like a balloon. The black should be heavier, as still in the matter, should go to the bottom faster. If you can separate them, change the salinity, and you see if you get the release. Or put it near the electrode and see if you can get the field. This is, this, you have created an impure nano-material. We can explain this, because this is something I've seen for some time. I am on my camera, but it doesn't show. Can you put, can you see our camera here, Rick?

No, can we restart the video again, please?

OK, I've restarted. Now, this is what I told you. This is the packing, which has come from the factory for the copper plates, as we said, it has just arrived, two days ago, while the nickel will come today. I open it that you can see it. It says 50 pieces on it. These were originally manufactured with one hole and now they had to be manufactured... We don't see it, we lost it. Hello? Are we with you, can...?

Yes, it's stag and pause...

OK, we'll restart it again. There it is. You can see it? Can you see it now?

Yeah.

Hang on a second, here, and yes, yes, we do see something there, a copper plate.

Yes, so, this is the packing that came. These, these plates had one hole, and when they put in in production, they tested it, it was dripping, it was falling like on its edge. So, now they had to take it, and it took another extra week to make two holes, which is one, if you see, on one end, and other one on the other end. So, now it's here, the nickel, what do you call it, the nickel plates are supposed to be here by this afternoon, 2 o'clock. Then it will be done and it will be out by Monday. We start delivering everything out. So, when we tell you things, we can show it. And, you can see, it says 50 in a pack, and now the pack's been delivered.

There has been a huge response to this, and the Chinese manufacturers are going into production as of, hopefully, this week, for mass production in the far East, till the nations, different nationalities start doing it themselves. So, this is what I said, we work very ethical, we keep everything very correct. This is like something happened, we never mentioned it, is that people who worked within the foundation a few years ago, they thought they are very clever, they went for a coup d'état to take over the Keshe Foundation, and one of the things they thought they'll do to make it very attractive was that we give every money back we've done on the health, so they were in charge of the web mastering, and they were in charge of the web, so they put on a, on the page, that the foundation will refund all the health cases, if you are not happy. And, the people came, and they got processed, and they were writing emails to us every week, 'I can run, I can do, I can do that', and then they said 'Oh', these people went and said 'Oh, we put this page so that you can go and get a refund from the foundation, and these people started writing to us 'Oh,

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

nothing has happened, we are still sick, blah, blah...' and they don't know we have the full dossier of the emails and all the reports kept.

We didn't go and fight them 'you're lying'. We just refunded the money to those, and they all come from one nation, two nations, and don't guess too far, one of them is Belgium. And the, so, we did the refunding, it put a lot of pressure on the foundation. We have one case outstanding now, the guy who has done it different way and, so, now the case is not that, that's why we send you now the declaration that you don't pay, you donate the money, and a donation is not refundable. So, people find different way to cheat and those people are still back sick again, huh?, in a different way. And, they come back to us, 'you know, we were with you, something happened'.

I said 'you asked for a refund, it doesn't work, why do you come back if it doesn't already work, huh?'.

So, you have to understand, we don't take cases, we are not going to go to court and say, and then these people used the guys in Germany through the Third Reich to start launching and finding, they hacked our emails, they went to people, and then at the end of it, somehow, Mr. Hans Bracquené came up with a better idea, Mr. Delenoir disappeared, after the Chinese bombarded the central police, and the, what do you call it, Interpol. That's what is happening in Belgium, these kinds of frauds, which they, they create the fraud and then they sue you for a fraud they created themselves. [This is the behavior of the work of Mr. Hans Bracquené. There are a number of scientists who've been killed by Mr. Hans Bracquené. We'll release their names in time.](#)

He's not defrauding scientists, but he actually is involved heavily in murdering scientists. Heavily. Whoever doesn't give it to them, to the, because Mr. Hans Bracquené sits on the level of IWT. IWT is the center for the research for Belgium. If you discover something new you want to develop, they send you to IWT and then Mr. Hans Bracquené has to sign for you, and do the legal papers. You want your invention to be funded, I take 30%, 25% percent of the shares of the company. Otherwise, doubt it. And, if you say no, he gives you a piece of paper that you are going to be murdered.

Just go, please, at KVK of Belgium, the registration of the companies. You'll find that Mr. Hans Bracquené sits on hundreds of new inventions. How can one man be sitting on the directorship of hundreds of new invention companies? Fraud, deception, murder, and, what do you call it, forced transfer, because this happened to us. We didn't lean, so he gave me a piece of paper that he was going to kill us, and we said to him to get lost, and then he said he was going to show us what he can do. And, the funny thing is just Caroline, because Caroline was present in a meeting we had with Mr. Hans Bracquené, when he threatened to kill me, he says as a lawyer he represents himself as a scientific lawyer.

So, he knows everything about the law. And, funny enough, I give you one tip, if you are in Belgium, go in the criminal records. Mr. Hans Bracquené, as a student, has a criminal record defrauding. And, even his students probably do not understand how it's come to this position,

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

because Mr. Hans Bracquené is a pedophile, very simple, so he is protected by his bosses. Hans Bracquené, go to KVK, company registration, put his name. You will see hundreds and hundreds of companies he's the director of. All new invention. IWT is the center where every scientist, every inventor goes for, looking for funding for developing their technology. You don't give it to them, and then Mr. Hans Bracquené sits with the king of Belgium in the house of the king.

This is how the new monarchies are financed, by, not by robbing and putting soldiers to empty their houses, they take by new technologies. I was in Sicily. Sicily Keshe Foundation wanted to open a company, and I came across the Sicilians about two years ago. And, hear, one of the Sicilians said to me 'mafia has become very well organized, we don't go and kill anymore, now we do new technology and computer programs, all our children have become doctors and scientists, so we do it the professional way'. So does Mr. Hans Bracquené.

Now, we showed you, we tell you what it is. These are the coppers. They had one hole, now they have two holes, because then you would have come back to us, the plates don't work, because the tip without that, stitch to the CO2 and it creates a short circuit. Now you understand, so how it works and how it is. And, these will all be done...

Do they still have to be coated, Mr. Keshe?

Yeah, it takes two days to coat it. That doesn't take that long. They go into the, the caustic path, we have kilos of caustics here, it goes to the Italians. If they don't do it, we can, we have facilities here in the center to do it and dispatch up. It's just the chrome plates with the second hole haven't arrived yet. I was told 2 o'clock today they would be here. Then we dispatch. We meet our commitment. Any other question?

Please, if you have bought a book from the foundation and you have not received it and you refunded from the PayPal, send an email to [info@keshefoundation.com](mailto:info@keshefoundation.com), and if you paid for a book and you received a refund and then you received your book, send me an email as well, too. Then, we leave it to your own honesty to pay the foundation as a donation. But, if we, now we got involved in this, we give your name to PayPal that you received the book, we can give the tracking number, and the PayPal can show they have refunded, I think you will find the launch of the fraud by the PayPal against you, because PayPal is receiving money and defrauding money by deception. And, they are not going to stand for this. So, those who bought the book and asked for a refund and we have the tracking and we can go to the PayPal and deliver the tracking number, then you will find out all your accounts will be closed and they'll sue you for fraud. Any other question?

Was there any other question in the go-to meeting?

We are up to 2 hours and 20 minutes here, so we should probably bring things to a close.

Yes, thank you very much for today. Please, listen to the first half of this presentation today, about the security. Protect yourself, because every one of you, they think they can reach through the new televisions this month. If you have, I told my wife, if you could get hold of the old televisions with tubes, that will be the best, because they cannot come in and give you the

## Transcript from 35th Knowledge Seekers Workshop held November 6, 2014

(v1 2016-04-10) DRAFT (Transcription has not been verified. Double check info with video)

frequency that it can make you sick. Even your laptops are tuned for these frequencies. Now we have the technology, let me complete it within the next week or two. The Keshe Foundation will put this technology freely in the hand of the world, while you can produce these systems yourself. It's part of the technology, already done this, it's not far from it, but it has to be done the right way. You can put these units near the television, near the, even in your pocket, in your car, that if they produce anything, even the chemtrails, does not affect you. OK, we call it a day, thank you very much, and we'll see what we do.

OK.

Thank you. We'll see you tomorrow at 2 o'clock for the health section.

Thank you, Mr. Keshe.

Yes, I understand the health will be on the, focusing on the thymus and lymph, as the topics for the health workshop, which is on the same live stream...

Yes.

Spaceship Institute channel. Thank you.

Yeah, yup, it will be there, because, as you know, Dr. Eliya, as of today, later on today, will join us as a full time, in the institute. So, she'll be with us tomorrow here, live. Thank you very much. Thank you very much indeed. Bye, bye, bye.

Excellent. Thank you, Mr. Keshe.

See you tomorrow.

Rick: And, thanks, everybody, on live stream, and on the Skype call, and on the go-to meeting, and anywhere else in the universe, if you happen to be there. You might have participated. And, that's the end of the 35<sup>th</sup> Knowledge Seekers' Workshop.
