02:12:55

Mr. K. Thank you very much Guy! There is a lot truth in what you said, and I saw some comments written. People came here to take physicality that they can abuse it. Knowledge of soul was too hard to listen to. You got to understand, I look at this what just been presented by Guy in different ways than most of you do, and we all do it our own way. But you have to understand how a man can come to this point? You have to understand the state of physicality and the state of mind.

When I got to know Guy, and then he was here I listened to him, a month ago. And in the past few months understanding the way he lives, and where he lives, he is a true passenger of space. He lives on a boat on his own, and is floating in the river of, or in the canals, and the lakes of West Canada. He is detached from the Earth physical touch of every day than he has got to walk on, and is literally like a spaceship passenger. He has no contact that he has to get up and go drive to somewhere. He wakes up he is encapsulated in his own spaceship. He has got a captain, a cat. You have seen his pictures if you've been around.

So, when you have that kind of time on your hands, that the physical feeding and abusing is not a priority, you find to have a lot of time to learn, to search the soul, and to teach the soul. So, when you listen to what the way, and understanding what is done in the past in his life, and where he lives, and the way he lives, this will bring man in the space to more of less the same condition. What we call soul searching. What we understand is there a priority for physicality?

So, in so many ways, what we hear, what we have heard, will be on the table for every passenger of the universe. You don't have the cinemas to go to, and you don't have the football matches to go to divert your attention from the pains of everyday life, or we take a break. We live with it. We cannot take more from the space. We are going at speeds beyond your imagination, or we are in the ocean of the magnetic fields, instead of being on the river.

So, for those who don't understand this kind of understanding, this is good for you to look what the future is going to bring you. Plenty of time to soul search, plenty of time to understand totally that physicality is irrelevant. So, in so many ways, what we saw today maybe was more important than all the teachings we had of people who came and showed their reactors. This is the product of the reaction from the reactors: independent, being on your own, and finding a solution to the reality of life. Or, at least trying to understand the path of life for humanity.

In time, when we come, we leave this planet, we come across the others of the same passengers of the universe, they will have the same kind of stories to tell us as we listened today. So, for those who came here to see a reactor to confirm their physicality, today was the wrong place and wrong time, because this is the eventuality of life. Those who think they go to space will be a hunky-dory, in fact those who go to space find solace, wisdom, and they will see a lot more from their own weaknesses than they will see from the universe.

Maybe what I see in the background. What is written in the chat? I see Brett, hanging around. If he is still on the line? I have a message for you, Brett. Is he still on or has he left?

Brett. I'm here. I'm here.

Mr. K. You heard our call for Peace today?

Brett. Yeah.

Mr. K. Your associates and your contacts and the people you came here to the opening, they sit at the highest level of American military. As a lot of you know, Col. Hanke gave a speech at the opening of the security here. My call to you, in the contact with Mr. Mike Harris and Col. Hanke, is we request from you as part of the member of the Core, and part of the Keshe Foundation SSI and our call for Peace, for you to ask for Col. Hanke and the people around Mr. Mike Harris and his programmes of 5 million listeners a day, to call in... are we there or have we been disconnected?

Brett. I hear you.

Mr. K. Yeah. Because the camera is fine.....OK

Mr. K. My call to you is very simple. Ask Col. Hanke to ask the American military the position and the contacts he has with the military, and the programmes you run with Mr. Mike Harris as a producer, to ask that the American military stop firing on the 21st of every month for the next three months, exercises or enemy.

Then, maybe, we take the first steps towards Peace. More bullets fired out of American guns every day than any other nation on this planet. They see themselves as peacemakers, but they are the causes of the war.

So, my request to you, when you run, you manage, Mike Harris' programme today for web friends of American war ask them one question: Do we need veterans when we have peace? So, if you can ask Col. Hanke, through the American, and through the programmes you run, we ask the Americans for the first move on peace. No firing of a single bullet 21st June for the first time, exercise or in open. And let them be open to everybody else.

Do you think you can do that?

Brett. I will tell Hanke and Gordan, and Mike. No problem.

Mr. K. Thank you very much indeed!

Because, if we can stop the Americans firing, half of the world peace will be met. It will be very hard for one day, but sooner or later, it depends on the Americans to build the pressure on their government that 21st June is no firing day, and the beginning of physical peace. I will request

the same from my government and the Syrian government through our contact. And we see the ones who are there to make move that day, they shall not be firing too either.

02:21:32

So it comes to one point. Today's teaching, today's workshop, comes back to what Guy put on the table, the first picture. We don't have any pictures from you, Vince? You just ... err... surface.

Vince. Your camera is on, but yes, Rick can put up that picture and there should go.

Mr. K. No problem.

Mr. K. So, what it is, we start building towards one planet, one nation, one peace, and we will enforce it more and more as we go along within the next few days, few weeks, and then on. The reality is, maybe, we have to spearhead this ourselves, by opening what I call peace @ the spaceship institute dot com - for people who want to come in and concentrate and work. And on the Livestream, we open a line for people who would like to participate and come up with different ideas to bring the benefit of the peace to mankind through the new technology.

What I am going to do in the next weeks to come, I will show every application physically possible to show that the change is so horrendous it is not worth playing with.

It is very easy to get carried away, but as Guy said, I have the faith, I have the knowledge, and I can enforce peace. And, I challenge any leader, any government, or any group to challenge the peace the way we set it up. Your names will not be on the papers of history, but the peace will last.

We ask you one question: Ask your governments to stop firing, even for practice, 21st June. 1st May we stop work for respect for our workforce. From now on 21st June, 21st July, and 21st August we stop firing even today for one day, and then we'll see the peace.

Next week, if the condition is right, I will unravel the first signs of peace. Interesting is, I give you a choice. You are all scientists, you are well-versed in the world of science, and we show the power.

02.24:44

What I want you to do, go out and talk to your military, and amongst the different nations choose one satellite, which at the moment is operating in the sky. I choose the date, I choose the time, and I will silence the satellite. We don't want civilians, we want military, and if they don't give us a choice, and you cannot choose, we choose ourselves. But, when I choose I don't choose the weakest, I choose the most powerful chain of satellites needed to enforce peace.

(v1 2016-03-04) DRAFT (Transcription has not been verified. Double check info with video)

So, look into the skies, or into the knowledge on the internet, you choose the satellite, and I choose the time of annihilation. Military satellites, they are nothing but war, so there is no need for them. If they do not get silenced, or be used for other applications to support human life, they are better not to be there. We do not threaten. Openly choose Chinese, choose American, choose Russian, and even if you like choose one of each that will be equally served at the same time. We have shown how we can and we brought in a specific position, a specific time, a small reactor with a high power in energy down. I don't think it will be much problem for a satellite.

And, interesting enough, if you want you can join us in this process. Complete as many star formations reactors in a running condition, and as we did with the German, Canadian, and Italian, which was in the Keshe Foundation centre, we chose a time and a point. We collectively in one of the workshops choose the satellite gifted to us by the nation to test and bring down. We'll do it. The beauty with this technology will be is that we put the satellite out of the reach of re-entry. So, there shall be no harm. So, your governments have several choices: choose a satellite, secondly, you lot build the systems, and thirdly, when we are collectively ready we target which satellite. And maybe we do three or four at the same time? To have the pleasure that we have collectively participated in the beginning of the world peace.

I explain to you why satellites? In the early nineties I was sitting in my office, and one of my associates walked in and says, Mehran, I am going to invest a lot of money. I said to him, you are crazy what is the investment? Where am I going to put more money in now? He said, there is this Jewish guy coming in, and because the American satellites have no more use because of the Berlin Wall coming down, and there is not much tracking needed, there is a lot of surplus capacity in military satellites around the world.

And he has come up with the technique that if we can lock, use, maybe three, six of these satellites and pay the Americans, we can locate anything anywhere. I said OK. ... This technology has become the GPS of today. This Jewish boy, the guy who came and invested originally, in northern England, set up a company most of you should know which one it is. And I watched, I never invested in shares in my life, so it was no use in investing, but I became an observer.

So, the peace dividend of the Berlin Wall, part of it is what you call GPS of today, because the amount of military space satellite opened up for no use became a commercial dividend for the American Army.

So, when we create Peace, there is no need for these satellites, so we can use them more affectively for purposes of peace and other applications which we need for the deep space travel. This time we use them to show the power of peace. This time we use them to show the expansion of the science.

So, if you are busy building reactors, star formations, build them as fast as you can, that we are ready, collectively, to explain one thing to our governments and world leaders. If, humanity

(v1 2016-03-04) DRAFT (Transcription has not been verified. Double check info with video)

decides in totality. And not the few for benefit of their power and their pocket. As I told you, and I said that so many times, the suit of the scientist is 15 years old. I know where to go, how to look, and where it is to be used, and to look for. So, if we collectively use different means of creating, then I will ... decide the future of humanity, and not the few which sit in the palaces of crime.

So, produce as many GANS as you like. Find yourselves as many coconut shells as you like. Fill them in with the GANS. And I will tell you how we will enforce peace in the coming time. As I said, we will enforce peace, but through the knowledge, and the peace dividend will be beautiful. Not for us, for our children, for humanity.

So, Brett, you are the flag bearer of your nation. You have been with us with Col. Hanke and other high-ranking American military. So now, that is why you have been chosen, you are the path to the peace through the American military. So it is very easy. Go tonight, when you go on the Mike Harris show, and tell them this is what we are asking: silencing the guns, American guns for one day across the world, not in wars, not even in exercise, because when you exercise it you have to use it. So, at least there is a point of beginning.

I will send the same request to my government, and I hope the Iranian leader Ayatollah Khomeini will respond because his decision is sacrosanct and above everything else in Iran. And then, we will most probably receive a response from the Head of the Safar of Iran in respect to the situation in Syria, and the peace will go ahead.

Do we have anything else to see?

Rick. Umm, I don't have anything immediately set up here. Umm... Is there anybody who would like to present something that's in the chat?

Mr. K. Can I ask what happened at the end with our Director of Sears ... presentation of last week?

Rick. Searle. Searle is the word I think you need there.

Vince. Yeah, we have been in communication.

Mr. K. Pardon?

Vince. We have been in communication. Did you check your email Mr. Keshe?

Mr. K. Yes, I have seen it but it doesn't make sense to me.

Vince: OK. Maybe we can get a talk after.

Mr. K. Today, is he online that he can come on?

Vince. I don't see him in the chat. No, I don't see him in the attendees list.

(v1 2016-03-04) DRAFT (Transcription has not been verified. Double check info with video)

Mr. K. As you know, people from Searle, they came online, last week as a Director of Searle, and it has turned up that Mr. Searle is ill in a rehab centre and they cannot make any decision until he is out, and out of respect for him. So we have to wait that he gives his blessing to his company and they can enter work. But by the look of it they are too busy doing too many things.

Vince. There is also one more point in that email that I did see, which was, that the owner of the company is in the hospital.

Mr. K. Yeah. That's what I just said. Yeah.

Vince. Sorry, I didn't hear that.

Mr. K. He has a problem with his breathing channel, or whatever. Err, this is a problem with a lot of scientists, if you don't know. A lot of scientists have a double passage breathing sac. How it is we do not know, but a number of world scientists have this. And it is very abnormal to see it in ordinary people, but it shows itself in different ways. It is like a small lung appears in the passage of the breathing. Err, what it is, I hope it is not that, or maybe it is but maybe it is as he is such an eminent scientist. What it does, is that when you have your breathing channel from your nose, somewhere in the side there is a sac, somehow, and then this is your lung. Somehow, a lot of scientists, or highly intelligent people, have been found to carry this. What it does to them they have got a different kind of energy at a higher strength, we do not know? But you know, a large number of highly intelligent emotional people carry this sac, and I think this is his problem. Scientifically, I can explain it, but this is what I understand from ... quickly.

02:36:10

Questions on Livestream:

1. OK. The position Mr. Keshe, as we had a beautiful written speech for world peace?

I never write anything. Because here can tell you that I had nothing written.

By the way my desk is usually clean, I usually come in with the papers and I just write. I don't bring notes or teachings with me because the teachings of the universe is in my head, in my soul, ... in the piece of paper. And if you want to see it this is the note of today, I wanted to tell you, while I was listening to Guy.

Mr. Keshe :As we had a beautiful written speech.

That is your problem.

F

I think Kevin, you are still in the doldrums. Do not write it with a pen; write it with your own soul.
