8:20

Mr. K. This week we have a number of little, but some significant announcements. If you remember today is 21st May, exactly 4 weeks ago we had a celebration of opening the Institute with the members of the Keshe Foundation as our core team on 21st April.

In 30 days a lot has happened, and we have opened teaching sessions, and we are on the 3rd week, which has become and was part of the whole structure of the teaching freely, unconditionally, and now we have managed to achieve our goal. But we are taking this a step further as in the last week's announcement I mentioned we try by the 64th teaching, which is 2 weeks from today, to make the teachings on daily basis available to everyone across the world.

What this means, if you are a Knowledge Seeker on a full-time basis you still receive it, but if you want to do, or come to one or two sessions and see if it is good for you, or you want to learn and meet with certain conditions that we are introducing or teaching, you can join us for one day one session or join us for the days or times you have. This has been done for two conditions, first of all, people who are interested in certain topics they can join on the days they like - and not necessarily every day, and secondly, we gradually start inviting, joining communications and teachings with other institutes and organizations.

So this gives us a chance, for example, if you are interested in space technology when we link up with Iran Spaceship Institute in Tehran we can have you live on, we announce it in advance so you join us on the teachings. Then when we do it with the others we expect collaboration and teachings with Italian military groups of navy and army, if it is allowed by the high-ranking officers that we join them, or they join us for them to see what the technology offers in the aerospace and in the space and defense technology. So we are opening the knowledge in totality to everyone at the point of interest.

Now that we are opening this condition we have to see what the changes are? And as we said, when you signed to be a Knowledge Seeker, when you signed the Peace Treaty, it took us time to put things in order, and now we start to act on what you signed. A lot of you signed on the fear of the moment to be part of signing something. You forgot one thing, the Keshe Foundation has a very bad habit - it holds people to their promises. We know hundreds of millions of people signed the Peace Treaty in response to hoping that somebody will bring peace for them. You sign it you act it.

We start a new cycle, and the cycle is very simple. The human race has been in the habit of eating, warring, and killing and being killed, for hundreds of thousands of years. We cannot ask for it to be changed overnight and suddenly peace will come. If peace imbedded in the structure of humanity, humanity will understand it sees the benefit of it, will carry it through. We cannot come and say we start peace from tomorrow. We have to learn the true meaning of the peace. So what we have decided is very simple, we start learning what peace means and teaching the others what peace can bring. To

this effect if you have signed the World Peace Treaty and Peace is your objective it is time to act. What we are going to do is, 21st of each month for the next few months we call it the day of Peace. What this means, in the coming weeks and days, it is your job to reach every army, every military, militia groups, radical groups, wherever they are fighting to bring to their attention that 21st June, 21st July, and 21st August is to be kept silent and no murders and no killing. 1 day peace. I have contact with different organizations to push it through. It is for you to make the banners make the advertising 21st of each month we have one day.
