## Notes from KNOWLEDGE SEEKER WORKSHOP 88

00:40: Rick mentions Earthquake (with no tsunami) in his neighborhood of West Canada at the beginning of Workshop Number 84 (listening back to Workshop 84 it has some more details about the probable nature of the Earth shift/cataclysm that is imminent)

00:45: Jack Sala's demo of making a power supply unit

00:51: Michael Melchizedek Moor – Crystal beings communicating in the plasma

00:58: MK is going to show a new way of making plasma in a couple of weeks time

01:00: MK on how to commercialize the technology and soon wireless energy transfer will happen – There will be no need for wiring in the house to receive energy for cooking refrigeration, heating water etc etc\ The new unit is so powerful it melts things, but the heating has to be controlled – you have to disconnect something – the design of the capacitor is to release energy in a controllable way – when we produce heat we also heat the plasma of the emotional body – when you open the plasma it has to be in a way that you keep emotionally warm – you have to do something with it emotionally so it does what you want...

01:06 Roald Booms report on his 2nd power system with coils wound clockwise (instead of anticlockwise as in his 1st Unit) going online

01:16 MK comments – perfect the way RB has done it

01:17 Unsuccessful connections with the Kf Nigeria and Alekz – bad sound

01:24: MK comments on Kf International structures particularly related to food and medicine

0130: Alekz on with good sound finally

0132: MK does an official introduction of Alekz, who he is, where he sits with the Kf Nigeria and comments about Nigeria cooperation between Kf and Government – Nigerian ambassador to Rome was one of the African delegations to receive a power supply unit

01:38: Presentation from Kf Nigeria – very poor sound throughout

0217 MK's answer

02:41: Question – can aluminum wires be used? MK – you can even use the roots of plants or animal intestines/ Rick comments: Yes your own intestines are a kind of a coil if you're alive and well. Rick question: How quickly do the car units work? MK: A week or two or sometimes there is an instant improvement [demo of car power supply unit]

0244: Comments on the scale of the planned production of power supplies – 50 factories world wide producing 1000 units a week is 50000 units . it takes 1 ton of copper to make 1000 units therefore quickly 50 tons per week – vgoing to 500 tones and 5000tons per week - very quickly the Kf will become a presence on the world markets

0300: Vince with numbers of people getting in touch with the Kf. 33,000 registered on [Kf.org](http://Kf.org) 25,000 on the forums, Global reach is over .001% which equates to over 11 million and that is just the [Kf.org](http://Kf.org). So that means 30 -40 million people getting in touch with the Kf already world wide

0303 The biggest point of interest is the Peace Road Plan and introduction of the space technology in conjunction for application of Peace. Officials from the Vatican attended the 3rd ambassadors meeting in Rome and are actively involved in this process.

0305: The main goal of the Keshe foundation, which is sacrosanct, is to achieve World Peace

0306: Report from a knowledge seeker who created a blueprint system on a large scale and when he powered it up it created a field around it, which when he put his hand in the field he could not see his hand – it disappeared – then appeared again when he withdrew it – he could feel nothing just could not see his hand.. MK responded for him to get in touch on his private email – said he was expecting this and if we make powerful units this is the expectation. He has explained this before – if you create a powerful Magrav field around you become invisible- further explanations of this

0318: Contact and conversation with Sylvester who is involved with KfHungary and Kf South Korea..

0350: Happy Birthday KfNigeria

035334: End
