Notes from KNOWLEDGE SEEKER WORKSHOP 89

Rick opens the meeting by saying he is sure we'll all be in for some surprises today in the 89th Workshop

0150: MK Good morning – we are part of the 18 month cycle of the Road Plan for Peace. Now we have started meeting World Leaders in a very smooth way and we have received blessing from the highest order of the Catholic Church. Now in different ways we share technology for peace. Mentions to Vince that it is no coincidence that a post surfaced on the forum about the 1st Ambassador Meeting in Belgium, exactly 3 years ago in November 2012, when he gave the Key to the Governments including Russia and America, and this has achieved Peace for them they are now working together – “as we gave the key to the government we announced it – strangely enough now – it was a good way of achieving peace...

0015 The Hand of Peace from Iran Islamic Nation is now held out to the Nation of Israel – so that we do not see a repeat of the Paris Black Friday massacre. MK is asking Kf supporters to write to the Israeli and Iranian ambassadors. MK then gets very pointed and aggressive (puts his war paint on) as he responds to the harassment of 25 cyber-terrorists he says he is going to put their names up and they are employed by certain world governments.

0016 – A Video showing the technology working correct in somebodies (unnamed house) showing the meter turning and the technology working correctly

0027: MK says that what everybody forgot – (and he forgot in the blueprint week) – was the voltmeter step – when you make a coil you have to attach

the two ends to a voltmeter to align the plasma layers and get them flowing in the right direction (opposite to the electron direction according to Mike Nashif)

0029 Heating with a blow (gas) torch you get a much better nano-coating than if you use the old tried and true method of caustic... (seems a bit cleaner too – less caustic to dispose of)

0030: The Rule of 9s if used will increase the power of the unit – MK writes up 180 on the board, related to the larger coil, and then 144, 81 as the different coil ratios on the inner coil – later there is discussion between Rick and Vince etc of using the Fibonacci sequence in the wires, or the Phi ratio etc

0041: Rick shows video of a voltmeter confirming correct function of the system...

0046: The tech ids 100% correct – if you have a problem you just need to retune it. We also see how 2 or more reactors interact. Now we are exploring the proximity of the fields. A coating of GANS on the nano-coating makes the Space reactors more efficient. Mentions Benjamin of Kf Ghana who has a book online on nano coating 'A Manual of how to Nano coat' – Caustic, Current, Heat etc .

0056: In a different direction – we explained how the USB stick giveaway 3 years ago to Government laid the first stones for the Peace Talk. So Next Step: If we manage to bring 2 Nuclear Powers to sleep in the same bed (Russia and USA) now in fact we find the origin of the problem in Antwerp. I put the Hand of Peace to America 3 years ago. Now I put the Hand of Peace to the Nation of Belgium. All the different areas and languages, French speaking Flemish speaking and even a large area of Italian from miners who came 100 years ago – production of the power supply will start this week to unify these different parts of Belgium

0059: Carolina's French and Flemish translation

0100: Introduces the Kf Belgium people including Dr Yvan who was previously a Knowledge Seeker in Italy, and Wim who covers the

naturopathic side.

0105: Outlines the system in Belgium – 51% owned by Central Kf – the other 49% in shares with one share for each of the population of Belgium – approx. 10 Million shares – each share having a value of 5-10 Euro. To buy a share you just have to sign the World Peace Treaty. Only One Exclusion is if you work in the Military Arms industry (which is 40% of the budget of Belgium) – even if you are a doorman you will not be allowed to buy shares. In the next month or so we double the value of the shares and people can sell shares, However French can only sell to Flemish and Christian to Muslim, and vice versa – this is to unify the country.. Furthermore Kf will sponsor people to go and teach in the Belgium Congo so that Belgium repays some of the energy it has raped and stolen from the Congo over hundreds of years .

0129: Questions

0135: The structure of the KfUSA is written by Armen

0136 Rick begins to presents a list of contributors with photos and videos from all over the world – a short list includes Budapest Hungary, Italy, Vancouver, Guadalupe, Austria etc etc

0140: There are a bunch of paid hackers who are paid to harass the Kf – they can enter through skype and get your contacts numbers – we know their names and we are going to publish them...

0147: This last Tuesday we showed how to make your system produce huge amounts of plasma. The Magrav power system is not a Free Energy System – this is a hybrid – you can live off the grid and the plasma.

0153: Go back to the Chinese and Health workshop of this Tuesday 2 days ago (24 November) for more details...

0159: Use a 2nd Unit remotely at the other end of your house to produce heat.

0212 People are reporting that they feel different in their cars when they

use the car unit and they feel more peace less agitation in traffic (with the plasmatic environment)

0216: With the 2nd unit you not only create heat but also light

0221: Brett demonstrates how to make Gold from the GANS of Quartz Crystal – they are near each other in periodic table – similar molecular weight creates plasma and precipitates out as gold in the matter state. You can create any matter you like by adjusting molecular weight and this is applied in the Medical side by how we understand the GANS of red blood, reflecting emotion with iron molecule, and lymph with zinc and white CO2 Gans .

0237: An interesting colour spectrum produced by the coils...

0240: More presentations from around the world by Rick

0315: Making water out of thin air

0326: When we use 1600 calories a day this is actually only 20% of the energy we expend, the other 80% comes directly for the plasmatic energy related to the Gases in the atmosphere, (Mr. Cohen) COHN, Carbon, Oxygen, Hydrogen, Nitrogen.

0346: Summing Up

1. We are putting the Hand of Peace to the Israeli Government
2. We put the Hand of Collaboration to both sides of the Belgium Nation irrespective of language and culture
3. We are bringing changes into our blueprints as we learn from people around the world about innovations and new learning to make the systems more efficient.

034935: End
