Notes from KNOWLEDGE SEEKER WORKSHOP 92

December 17 2015.

0000: Review of the last 2 years teaching – has gone from matter to nano to gas fed cores, to gans fed cores to coils to plasma. The plasma is the structure of the universe. Now we are closing the loop and producing matter from plasma. Now with the introduction of crystals it bridges the matter and plasma realms – In a way a crystal is a converter – its structure is somewhere between matter and plasma.

0011: Making the coils and making the star formation will come together to teach you lift.

0018: Reports about stacker system with crystal amplifying human thought allowing influence over clouds and weather.

0021: Some of you have already started building your craft – my job is to influence this so it is done correctly including lift and oasis system.

0032: place your stacker system in the middle of your star formation you will receive your beam.

0036: You will place your 2nd stacker above the 1st stacker on the place of the free plasma – this will create a field that will allow you to create your space ship

0040: Do not put your cores into rotation – this will cause separation of the plasma. Fill in your cores with a combination of CH₃ CuO and CO₂ that you create a GM gradient that allows the rotation of the plasma within the cores – you do not need motors to create rotation. You will create a

hexagonal field around all your reactors eg measure 1x CO₂ 2x CuO 1xCH₃ and different combinations in each reactor to allow rotation of the fields

0045: Remember Douglas's stack of Gans (in the 1st International Workshop 8th December) He had a heavy mix on the bottom, CuO or CO₂ in the middle, and CH₃ on top – (which caused the volcanic lava lamp effect) – this principle can be used for flight. When you put your free plasma in the correct position your wish is your command. If Peace is your condition make the 3 levels CO₂ to channel to emotion. If flight is your condition design the gradient of energy levels (draws 3 more levels to the stacker and indicates free plasma between the top and 2nd to top)

0049: By placing a container beside the stacker system in the field Alekz has made a stacker system that creates oil and maybe water. Also connected essence of orange into water and then manifested oil of orange.

0054: This is the promise of Baha'u'llah fulfilled of the new science of transmutation of elements.

0102: The power units you received are the delivery of my promise to you for peace. Take some of them to the UN building in New York – you will see the structure of the UN change – humanity can change through the plasma of the Universe and not through guns and bullets.

0106: MK talks about the teaching he made on Rick's plasma group workshop the day before – (December 16) in which he explained the rotation of the plasma in 2 directions – longitudinal and equatorial – the interaction of these 2 field forces leads to the rotation of the plasma. The 3 levels create a flat bottom and spherical top.

0112: Don't work by yourselves in your garage anymore – work in groups to create your spaceship. Work in teams, one nation, one planet, one universal community – you must work collectively – your fields will all line up and bring peace on Earth – any entity that comes in contact will lead a peaceful life.

0121: Instead of having a Christmas tree to celebrate the birth of Christ this

year build a peace reactor system. It does not need to be copper – can be made out of chicken wire! If you want to create meat or blood use Iron at the core!

0127: Layer the plasmas.

0128: Try to use the human body as an example. C12 N14 O16 and add the weaker H on top – with the intention of peace you will create your spaceship.

0136: Important: as part of the control to produce materials and conditions – go back to the teachings of last week. Your meter will not show all of the savings – if your grid is 3 phase the energy company will have big savings of 66% and you will have 33% savings.

0145: Details of creating control systems for your system by changing the gravitational and magnetic components according to your emotion.

0156: Ali from Vancouver's video

0209: Putting in split capacitors to conserve the fields.

0224: Alekz made a split capacitor in his system when he first showed how he made the beads (Workshop 68)

0225: If you drill your crystals put the dust from the drilling into your Gans material – you will improve your performance.

0227: Don't use the Crystal stacker unit for health applications – its too powerful – kilowatts or Megawatts are too powerful for the human body – you have to use nano nano nano in a plasma condition.

0233: How to connect the human body to a plasma battery for balancing of all cellular systems of the body and eradicating disease including cancer.

0240: Rick: How do we measure the plasma? MK: Innovations center is working on developing tools for this – have to measure both speed of rotation, rise of fields, level or position of fields. Describes how we might

measure sadness or anger (different emotion) by movement of different types of Gans inside your crystal – does the CO₂ or CuO or CH₃ rotate faster or slower? --- This may be a way to develop the tools...

0248: 2016 is the Year of opening to the Universe as promised in the Holy Books.

0252: You don't need to use 1.4 gauge copper as everybody is doing – you can use smaller wire for example extracted from a computer – will bring the same effect!

0254: Transmutation of Elements has been the promise of Baha'u'llah – Bless His Name.

0256: Alekz comes on and explains how he created oil of orange from plasma.

0305: Some of you have started making a cup with CH₃ on one side and CO₂ on the other (energy and emotion) Some of you have found this bringing more energy into sexual behavior. Then some of you have gone further and added a zinc plate on top of the cup – this is like eating oysters for increased sexual potency. This is the Kf love potion or the Kf Viagra – please be careful with this (lol)

0313: Never drink the GANS – transfer the fields of Gans to water and drink the water.

0319: Mike Nashif is one who is dedicating his life to making Peace on Earth – do as he is doing!

0323: Question from Caitlin: is there a danger from lightning strike near a unit? MK: No. Lightning is more a matter condition related to the Earth condition than an atmospheric plasma condition. Rick comments that's interesting as we always thought lightning was a plasma phenomenon.

0327: Max: Understands the wires in a house getting nano coated but what about fuses etc. MK: it is a plasma coating and may not be visible.

0337: Doug McDonald: Is the soul a tiny plasma sun 1/10,000th the size of the tip of a hair as described in the ancient Vedic scriptures? MK: Yes. The emotional part of the physical being is not a crystal but it is the center of the brain. The 2 cerebral hemispheres the hindbrain and the base of the brain form a star formation – there are always three layers or levels bringing tangibility of plasma/matter.

0346: End
