Notes from KNOWLEDGE SEEKER WORKSHOP 98

January 28, 2015. Time stamps from the Livestream...

The picture is of the new blueprint's website - an amazing resource for all Knowledge Seekers around the planet!

00:00: MK: 2 days ago (in the Health Blueprint Teachings) we saw a radical change in the direction of the Keshe foundation. Health is now merging with the Energy Teachings. In the next 2 weeks or so we will do a 3rd Blueprint workshop for agriculture and food. Then in March/April we will show the flight system – delivered by the Iranian government – along with full shielding system, decontamination technology and the rest.

MK brings up an example of someone who has been threatened and went online and broadcast the threat – tells everyone not to do this – just ignore them – but do not open any links or emails that you do not recognize – there is an active team working against the Kf – (previously told not to use Skype as they can use that as a doorway into your hard drive)

00:14: We are establishing the Universal community – first contacts have been made.

00:16: Introduction to Dubai – more details on those presented in Ricks Plasma Group. Dubai has all the connections to be the centre of world government.

00:20: Details on the formation of world government representing One Nation, One Planet, One Race, etc. The worlds will be represented in terms of Languages spoken, not national borders. National borders will not be recognized.

00:23: MK has spent 15 years working in the Christian world – now moving

to the Islamic world. There are no religions in space except the path of correct conduct. No mosques, synagogues or churches – the temple of God has to be in your Soul – this is the way the Universal community works.

00:25: Dubai as the space ship centre will show the first flights.

00:27: We have to start preparing for the massive disasters to come – especially in the USA.

00:31: You will start seeing a lot more spaceships around the planet (prearranged). Visualization and communication will increase in the coming weeks. You will see a number of direct contacts depending on how many systems you make. Every unit you make adds to the consciousness of Peace.

00:35: We are starting trials of eradication of cancer. We are sending treatment to several famous and prominent people (not that they are any more important than anyone else but they can help the process of spreading the knowledge). Some of these people have asked for help and we respond correctly

00:40: Be ready for contact – we have opened the door of contact.

0047: When you make the copper rings you are turning on beacons of peace across the universe – the free plasma that you don't see inside carries a specific message of peace – this invites the Universal community. The longer you let your coils run the stronger they will get...

00:53: Ali in Vancouver comes on – after the blueprint workshop he added 3 more coils on the bottom and tried the procedure with putting his head above his system (as shown to Kosol- Bara May). He felt very expanded and lost a lot of his fears. Got some information that he should build his system in the Star of David structure - or Merkaba (interlocking tetrahedral) Talked about travelling through 144 dimensions –talked about loving our enemies, loving everybody – helping everybody to evolve together. If there is a child hurting in Africa it will affect all of us- we need to realize we are ALL ONE!

01:00: Ali introduces his friend Wachten (sp) in the Land of Oz to show his video of a Star Tetrahedral formation – with a triple opposed coil in the middle attached to CO₂ CH₃ and CuO capacitors. Some technical details – about connection of mag to grav etc. When it starts spinning it creates a sphere around.

01:07: MK responds – Beautiful! You have chosen the right combination of GANSs – you should be able to create the shielding. Expands into discussion of fields – lights – stars in the galaxy – whenever you see 3 stars in a line with the brightest in the middle the 2 outer ones are reflections.

01:26: Armen sends a pic of sun with 2 sundogs and MK says yes, this is what he is talking about – more sharing of beautiful pictures of sun with circular halo and reflections.

01:29: Wachten is from Georgia but now living in Australia – is starting a regular KS workshop on Monday for Aussies- first one last Monday 13 people attended – 7pm every Monday – discussion of setting up Kf Australia – Sandor says there is one registered as a company but unable to identify who set it up – Wachten asking the person to come on line on the Monday workshop – discussion of how to set up Kf Australia website – can go through a central website – no need to set up separate websites

01:42: MK says they need to have 4 different stars of David in a star formation to progress the idea...

01:46: Ali comes back on and shows his horizontally opposed rings with a coil in the middle MK: Yes this is the way to extract the energy of the free plasma – if you double coil it you will extract mag and grav

01:51: Details and teachings on how to extract energy from the free plasma – vacuumed GANS – by moving the coil you control the direction and flow and motion...

01:52: In the history of earth sightings, the spherical craft has 90 degree opposed coils at the centre – hence spherical or egg-shaped craft. But with

use of star formation the flat-bottomed saucer shaped craft were developed. Double coil single core has been used extensively in past and you still see the spherical craft.

01:55: Draws a ping-pong ball with GANS inside (not rotating) with 2 opposed double coils – creates an egg-shaped/spherical craft (Rick is the master of this Technique)

02:00: Further discussion of use of ping-pong balls at the centre – no need to rotate it – but the GANS will rotate (use composite GANS) and vacuum – if you create a vacuum with GANS you will see a light.

02:03: Ali asks a question about chakra system... MK interrupts and draws a star formation with a human body inside in the centre, with the head/brain becoming the top reactor and through this controlling the chakras – as MK told Kosol to do in the Tuesday workshop. This is the position of the controller of your craft – instantaneous wireless control of your craft (remember Star Gate Atlantis?)

02:09: Your emotional reactor will be at the centre of your craft and will control the shape and motion of your craft – just like the centre of the human brain dictates the shape and motion of the brain and skull and body...

02:10: KS from Idaho asks if you can use 4 people in a star formation MK: Yes you can – most travellers in space travel in 4s for that very reason!

02:15: Jacky from Switzerland reports his developments. His mind is blown every day by the MK University – you ask and you receive – then when you give to other people your life becomes a magic dream – this is the life he imagined since he was born and now it's a reality – incredible thanks to MK.

02:20: MK asks what difference he has in his car. Jacky says the Mass is totally different – you feel the energy of the car – and this is only 2 weeks! He has had a 50% reduction in fuel consumption. MK asks him to drive to Paris and meet with the Peugeot directors – Peugeot will take his old Toyota and give him a brand new Peugeot to drive home in.

02:23: Question: What type of system does Jacky have in his car? J: The same as the house magrav system – a 3 stacker in the back – negative connected to the body of the car and positive going to the positive of the car battery. A mix of 3 GANSes on the coils, CO2 GANS in the tank (15mls of wash water). Also 1 trick he has developed – a small pump bottle with copper coils and GANS plugged into the cigarette lighter – a lot of different GANS in this – has a very profound effect on the energy of the car.

02:28: MK repeats his request for Jacky to deliver the car to Peugeot and asks Renan to put the blueprints on line (blue print link)

02:31: Vince asks Jacky to go over the details again and Jacky does so – your car is plasmatic so you get a transfer of whatever energy you want – it's a beautiful experience!

02:35: MK: These are typical properties – the rust also disappears on the car – MK asks Vernie to come online from Philippines –as he had a good experience of car systems as well – (not available at present) – Alekz can tell you the same!

02:37: MK: Do you feel the steering easier? J: Yes it's a totally different experience. MK: OK – what happens is you can eventually run without an engine Renan: Yes – my old car is like it has a brand new engine and we have water dripping from the combustion exhaust. Renan has a 25% improvement in fuel efficiency – thinks connecting the negative to the back of the car brings a good distribution of plasma.

02:40: MK deepens into an explanation of what happens to your car.

02:46: We have reports of paint work and damage to surface sealing up and improving – scratches disappear (negentropic effect)

02:49: Question: Still connect to the starter motor? MK: No – only the battery.

02:50: MK: you are reaching the stage of the first hovering car – at the moment you need a minimum weight of 200 kg to avoid getting blown off the road by cross winds. – this is what we had in Ghent when it was closed

down by the K of B (shame on him) – now 5 years later here it is!

02:57: Robert in Utah reports his car does not get stuck in snow anymore- just drives through it! He has a 15% improvement in fuel efficiency at least - maybe up to 25%.

03:01: Vivek from Singapore: What about electric cars? MK: You have to connect beyond the inverter to the DC side of the inverter.

03:03: Mario from Germany – burnt himself on the thumb and forefinger yesterday and with a pain pen took 10 -15 seconds to disappear the pain!
MK: Yes you can heal 2nd or 3rd degree burns very quickly with a CO2 patch on the skin and a pen on top – or a double coil on either side of the injury close to the skin – connect the loop to a plasma battery on one side (the far side away from the injury) and then feed back from the coil next to the burn to the CO2 pad on the skin – (draws a picture) the field flow will grow the skin back very rapidly – you need the 3 layers – same as construction of your space craft

03:11: Same principle can be applied to regrowing fingers and limbs, broken bones. MK tells the story of his 10 fractured ribs he sustained in the mountains of Northern Belgium – he had internal bleeding and severe fractures – they had him in coma condition in ICU – 1 week later after the application of his technology X-rays showed the fractures completely healed and he was discharged 2 days later

03:17: Marcel from LA: Has a system of 6 coils stacked on top of each other with a 3 reactor base set. MK: Magnetic of the top coil must be connected to the gravitational component of the 3 base coils – then you feed back into the gravitation component of the 6 core stacker so the field flow is correct – also have to nano coat everything, frames, etc., M: Question about the thickness of the copper wires – does it matter? MK: Yes and no – it doesn't really affect the energy – the copper is matter and we need to look at the plasma

03:25: Vivek: 2 Questions about the 2 coils system for regrowing amputated limbs – shows a small double coil about 1.5cm across MK: Nano coat and GANS coat with CO2 or CH3. Indicates to coil the “4 legs” (connecting

wires) of the double coil around the digit you are regrowing – the GANS should not touch the skin – put cling film or similar on it and face the flat of the coils against the tip of the digit with a 2-3 mm gap.

03:31: Miguel from Mexico City: Compliments MK on his work – MK reveals the previous Mexican connection has been convinced by Red Circle that Kf is into dark magic – a loss to the Spanish world – Miguel shows his tubular circular device with Nano coated coils inside and mix of composite GANS water – excellent results with medical applications.

03:55: Miguel shows a hexagonal design with 6 coils inside as a design for lift, zero time communication and transportation. MK welcomes Miguel into the International Kf family – asks him to make contact with Jorge – one of the original KSs who translated MKs books into Spanish...

04:08: Discussion with Indian KS who is working with neurologically damaged children

04:24: Kosol comes back on with more revelations from his intelligent plasma magrav unit and his plasma cube. 04:29: Presents a new seashell device liberally coated with hot glue 04:30: Runs through construction of his Magda unit again.

04:48: MK concluding remarks – things are developing beautifully – we see energy systems, car systems, health systems, agricultural systems. We must all speak the language of love and care. Please set up Kfs around the world and choose your representatives to the world government. Thank you very much for sharing knowledge.

04:50:48: End.
