

Notes from 99th Knowledge Seekers Workshop held February 4, 2016

(v1 2016-02-04) DRAFT (Notes have not been verified. Double check info with video)

Notes courtesy of Keshe Foundation New Zealand (KfNZ)

Video link: <https://www.youtube.com/watch?v=MPPydIMsAo8>

00:00 Begins with Intro Video One Nation One Race One Planet

00:07 Those who have been using the Magrav units for 3-4 months are getting big savings – but as explained before this will not show on a meter that you put in the circuit – will show up on your power bill

00:11 Repeat of the warning that Red Circle will try to threaten people who have published good results – as shown in the previous workshop 2 days ago the man named Paul Guest – Interpol will be knocking on his door very soon – and on the door of the BOSS he mentioned who gave him his orders

00:21 In the blueprints release last week we focused on health – especially cancer. We recognize that much of this is environmental due to what we put in our body – especially connected to the pH/acidity of what we put in our mouth = as we saw on the presentation from Renan (about the influence of nano-coated tubes on the pH of water) – now we add to the knowledge with a new presentation from Renan

00:24: Renan shows a new design with double-walled tubing and inside those two tubes a spiraled thin copper tube. MK says you don't need the inner and outer tube, you just need the coiled tube, nano-coated on the outside. This produces water with a neutral pH

(KfNZ note: This brought up memories of Marcel Vogel's technology - he was a Crystal Master in California who had a system for running water in a coil around a specially cut crystal, cut with cabalistic geometry, and which he said would remove the impurities, chlorine, fluoride, etc., from water, and could even turn water into wine – or at least improve the quality of wine to win premium awards – just from spiraling the fluid around the crystal. Marcel Vogel died in 1991 and for many years I have been meaning to build a replica of this device, and others, which I mentioned in my account of meeting him among many other adventures through these years – see the chapter entitled 'The Crystal Master' in the book 'Crystal Mission' –

(v1 2016-02-04) DRAFT (Notes have not been verified. Double check info with video)

available on Amazon.com)

00:31 Renan presents a system developed by Dr. Jerry Tenant that he uses to show the health of a person with a device that equates the voltage of the person or the fluid or food with the pH: Healing is -50 mV, Tired -15 mV, Sick -10 mV, Organ Failure -5mv, Prone to Cancer 0.00mv This equates to a pH value of 7 at 0.00Mv to 14 at +400 mV

00:40 Lots of discussion ensues among Knowledge Seekers on how to measure the voltage and pH – some chiropractors use a system of measuring the pH of a man with the positive probe in the R hand and the negative in the L.

00:50 MK asks everyone to try it – take the alkaline water and see what happens to his or her body acidity.

00:55 “This Pipe is the Pipe of life”! Easier than the Cup of Life!

00:56 Robert in Utah has experience with this method and reminds that you have to have a moist hand for the voltmeter to register.

01:00 Renan explains that the homeopathic doctors he works with have a fancy device that measures the voltage/pH with a meter that has sound effects but all you need is a regular voltmeter.

01:05 MK tells about a spring in Belgium where people collect the water for its healing properties – works very quickly especially on eye diseases. This is due to the GM field created by the minerals in the mountain in Belgium – this coil does the same thing

01:08: You can try a plastic version of the coiled pipe – nano-coat it and wrap it with GANS of CO₂ and Zinc. Requests people to try it and report back on the workshops. Should work on infertility which is a big problem. In major cities because of the estrogens recycled back in the water supplies (as well as the xeno-estrogens in the chemical soup out there in the western world – pesticides , herbicides , you name it!) Both males and females are infertile – maybe this is an answer to that!

Notes from 99th Knowledge Seekers Workshop held February 4, 2016

(v1 2016-02-04) DRAFT (Notes have not been verified. Double check info with video)

01:12 Rick tests himself >50MV – a very healthy man. MK jokes that this is probably due to all the maple syrup he eats!

01:18 Rick tests the voltage of distilled water and well water – not much difference

01:32 Robert from Utah talks about his experience of using voltmeter for diagnosis on specific points on the hand Liver 4 and Lung 11.

01:41 Renan presents a commercial production of the bubbling GANS effect discovered by Douglas in the USA and presented in 1st International workshop. This one has zinc aluminum GANS in the middle with composite GANS underneath inside another container, 2 isolated glass bottles one inside the other. He sourced the bottles, which were already made for pouring vinegar and oil – this is a toy to amuse people. He used 12v DC at 0.6 amps to create the composite GANS (brass, Zn, Cu, Fe) and CO₂ and Aluminum with no voltage for the middle

01:45 Update from Ali in Vancouver – He took a star formation and sent a prayer for Peace and avoidance of a major disaster on planet Earth. He woke with a vision and a way to avoid the disaster which he will now present. Also as a 2nd point he will present some further teachings and 3rd he will show he how he lit up LEDs with his Magrav unit not connected to any power source.

1. The answer to his prayer was a vision of 3 (or 4) satellites around the living Mother Earth in a star formation to stabilize the planet with intention of people everywhere to pacify and stabilize. This will fulfill a Mayan prophecy that the Earth is a spaceship and we can all take it where we want it in a place where there is a heaven on Earth. The plasma shield can protect it against earthquakes solar flares comets pole shifts and thus save millions of lives. The satellites can also create nano-food to feed the entire planet so no-one goes hungry

01:59 2. Ali's 2nd presentation is of Drunvalo Melchizedek's teachings on the star formation and the merkaba. We all have 3 star tetrahedra around

Notes from 99th Knowledge Seekers Workshop held February 4, 2016

(v1 2016-02-04) DRAFT (Notes have not been verified. Double check info with video)

us; one stable and physical the other two rotating 1 male/mental rotating to the R and the other emotional/female rotating to the L – thus a counter-rotating field. Locking these together with a specific ratio and speed forms a 55 ft disc around us that allows protection in space etc. (shows a drawing MK made of such a merkaba in WS 86) Drunvalo Melchizedek's school is <http://theschoolofremembering.net/> Ali's goal is to bring MK's school together with Drunvalo's school

02:06 To bring these ideas into experimental mode he explains some thoughts on rotation of GANS produced by positioning heavy to light molecular weight in triangular sequence – musings about the structure of the earth's core mantle and crust in connection with this and the predominant elements at the different levels. Core is mainly iron and nickel, etc. – draws a triangle with Fe_2O_3 with molar weight 160, moving to another sphere with $\text{Al}_2\text{O}_3 = 102$, moving in rotational movement to the 3rd sphere with $\text{CO}_2 = 44$ or $\text{CuO} = 79.5$.

3. Demonstration of star formation with no connection to mains switching on an LED display – connection is via a nano-coated copper wire which then continues to ground in earth outside the window – the light intensifies when he touches the wire

02:25 Ali completes his presentation and MK says he will feedback to him in private later

02:26 Mario from Germany queries the molecular weights – did not MK say in an earlier workshop that the magrav mass is less than the molecular mass listed in the periodic table? MK confirms yes this is the case – the heavier elements have to be reduced by about 20% and the lighter ones by 30 – 35% For Hydrogen about 50%

02:30 Wachten from Oz: Is the Caroline core empty? MK: NO it has a gravitational magnetic field strength. W: I was thinking of having 3 types of GANS outside a hollow ball... MK: Why not? Try it!

02:32 Stephane from Quebec: He has 30+ capacitors built in donut shape – they give 1.2V each. These are little magrav coils with paper and

Notes from 99th Knowledge Seekers Workshop held February 4, 2016

(v1 2016-02-04) DRAFT (Notes have not been verified. Double check info with video)

aluminum – he uses 1 wire and loops it on itself. Shows two of them together in what looks like a figure 8

02:36 Armen says if you make 1 coil bigger than the other you get increased voltage. Stephane has been working in this for 3 months now and getting shimmers in his room and pulsing – feeling the plasma energy in his body and feels very calm and balanced...

02:43 MK suggests he gets in touch with Vernie in the Philippines who is making similar developments...

02:45 Ali comes on again and demonstrates his LEDs coming on when he touches the wire – the LEDs are not connected to any batteries it is the plasma field in his body that is supplying the power.

02:49 Modris from Malta: shows a double coil on his finger with mango leaves separating the nano-GANS from the skin. MK indicates that both these applications from Ali and Modris are developments towards wireless control of the MAGRAV systems

02:58 We are contracting the 3-year teachings into a 1-year course

03:00 More information on the earthquake situation – there have been reports from south of Spain of continuous tremors – this is the final push of the movement of the fault line from the Himalayas to Europe – describes how movement on the American side of the Pacific will transfer the energy around the ring of fire, and this will also allow the movement from the Himalayas into Europe which will devastate Iran/Tehran and effect Europe... Earthquakes as far north as France will indicate an imminent big shift...

03:47 Continue building the plasma systems – this is important for reasons which we will disclose fully later

03:48 End
