(02:57:50)

We have a huge problem and we cannot ignore the reality. A lot of students are in the open teaching on Tues and Thurs. we produce all the courses into one year as a ‘crash Course.’ We will go very fast. China may decide to run technical lab support.

There is a rapid development of sharing of knowledge. We promised a long time ago and in the near future we will open the teaching internationally and worldwide on a minimum donation and we take away the \$1K fee. Then people can learn. 100 Euro would be a fair donation and the teaching for Africa is free. We need rapid learning for what is about to happen.

Ali spoke about the question of the position with the US, with Calif? Our position is the same—we have one of our knowledge seekers from Spain who explained about the earthquakes in Southern Spain. They are getting continuous tremors in southern Spain. Southern Europe will feel the tremors. We know of the earthquake in Gibraltar.

Her name is Sirpa (in Spain). They are feeling the tremors and these are before the final suppression of 2 continents. My biggest fear was the start of the tremors in the European southern continent. There will be a massive shock across what they call the backend of N. America, China, the Himalayas across to Iran and Turkey. S. Italy and southern Europe completes the circuit and the whole continental plate finds its balance.

This will take 10 to 20 years to complete. The whole totality will last a few hundred years to complete. We are on the brink. It will happen in the next months or years. the Argentinian pin – we predicted the shakes in Western Europe and we are on the verge of the separation of the continent. We see this happening with the whole structure of the planet. It is not just one country. There is no choice.

This is not to create mayhem or planet but the scientific knowledge of what is happening. We see the whole evolution and the rest of the evolution depends on the movement of this section and it will carry on for the world’s solid structure.

https://en.wikipedia.org/wiki/World_map#/media/File:BlankMap-World-162E-flat.svg

We are on full alert now. Put the map with America facing Asia. We see the following: we see that the breakpoint of Panama and the motion from the bottom up that puts the pressure on southern Europe. This is part of the forces. What will happen in this movement where we lost the biggest point is that the south American continent will start moving to the northeast as you are looking at it on a flat map.

That is why you see the earthquakes on southern Spain. The solid base below the foundation of the top surface has moved. What is going to happen is that in this turning it releases the forces to the west of Chile and the forces go up towards Panama and then out across the Pacific towards Mexico, Baja and the western US. This is LA condition. This disaster into Mexico and affects the waters across the US southern coasts. These earthquakes will be felt as far as NY and Washington DC.

At the same time with the twist east of Chile and up the Pacific along the western US coast, the whole fire ring across to Asia starts. This will put pressure on the eastern part of the Asian continent. Most of pressure will go from a direct line west of Chile and in a southwest direction as you are looking at the map and goes across the Himalayas across to Iran and turkey and will join with the movement in southern Europe.

The whole movement will be felt; we will earthquakes in New Zealand, Hawaii and the heart of Australia. The biggest problem will face the west coast of Africa. The east coast of Africa and central Asia are among the safest areas. This is why we chose Dubai for the central place for government. All the European governments will become unstable and a lot of people will move in different directions.

The only stable position we will see is northeast of Canada. The west of Canada will be hit by the backlash. This is how Australia was created millions of years ago. this is a huge mass as the mass north of south America is the balancing mass from North American across to Asia and balancing out in the lower 2/3rds of Africa.

The position that we see due to the movement will cause the country we know as the UK to freeze overnight. Or it goes to unbelievable high temperatures because of the water flow condition which passes by now and keeps it in livable condition. The water flow is what keeps the condition of the country we know as UK in a livable temperature. All the water flows within the spheres of the oceans will change slightly. This is what I have seen; we shall not and we cannot reach everyone.

This is one of the reasons we are teaching the knowledge so rapidly. Those who can gather the knowledge rapidly can help produce food, medicine, energy and help for themselves. In a way we are bringing everything together that we can do to help some of us. Let me explain something very simply: we are 7 billion. If we lost 100,000,000 it does not affect as much. But now most of the structure of society and the illusion of science and commerce sits with the totality of this structure.

When we say 20M, 30M or 100M losses it is nothing in the billions structure. But some of these positions are key positions. We think African nations are no problem. It is not important to many if something happens in South America. It is not important if it is California or China or Tibet or Iran. Because now that we have become a global entity it will affect everyone as we have friends and family and relationships across the planet and have become ‘one nation.’

(3:14:30)

The position is very clear; if the earthquakes carry on and increase in southern Europe and in France the red alert is on and the evacuation is the responsibility of the government. if we see further tremors in Spain and in northwest of the African continent and the islands off the northwest of Africa, evacuation and support of the nation is the government and of the human beings.

We accept our responsibility at Keshe foundation and we have set up the universal council, the world government. in the coming time we teach you more and acknowledge our position and we try to support those who might go through a disaster and no government can support such a change financially or physically. The only nation who can support such a change and support its people without a problem is the nation of China due to the structure that is set up. The rest of the world will suffer. We call on the universal council that as a matter of urgency when governments abandon their people we support people respective of district or area and color. We have called for the first meeting in Dubai on the 21st of April—there is not much time.

We have arranged for the meeting on the 21st of April and now we establish the world council in the city of Dubai. We are not electing- it is for you to attend and nominate in respect of the nation, nationality and the language. We will introduce a new method of being a member and it will not be done like the bribes at the UN. It will not be disclosed until the conference.

(03:18:21)

We have reserved 1500 places in Dubai in a prestigious hotel. You can attend this conference/council meeting only what you are cleared. The international police, the city police and the government of the emirate will be vetting people. It is 500 euro per person and you may share a room with a roommate or a loved one. Please attend according to the spoken language. There will be no elections or voting. You will see the council that will bring balance between the mayhem and what has happened in the past with bribing of world leaders. Go to the shop on Keshe Foundation and you can book the rooms. WE will close this rapidly and we have to do the security check. The flight is up to you. We provide the names to the security. Everyone who comes will be monitored before being allowed to come in.

We are here to unite humanity and not allow the terrorists to take over. It will be a peaceful, wonderful time. We bring the Keshe Foundation family that sits behind the event to the event. the process is simple: you are to make the change and establish the universal council responsible for the conduct of the man to the community and the community to the man. every condition has been met.

The city of Dubai is the city of Peace and the establishment of the universal council. If we see further applications we have to negotiate. We open the keys and you can book now and do a donation. 1500 places are guaranteed and we have made arrangements for the accommodations. This includes the breakfast. We have security people in the background checking all IDs of entry. We invite a number of world leaders to attend this; we invite influential business people to be present. It is your responsibility to invite who you want to see as part of the council. No nominations are put forward and elections are done as they are done in the universe and then you

understand.

Nobody will come to bribe and do what they like. When you become one of the members of the council and the structure is set then you decide for humanity to share the rest of Keshe Foundation and what is produced. No one through government or finances can bribe and every nationality will have a say in the structure. You wanted it and we have delivered. Humanity has been waiting for this and now it is in your hands. Now you understand how and where we are developing the next step. You will decide the future of humanity. I won't recommend anyone to be a member of this council. The twelve members of the core of Keshe foundation will sit in support of the council if they choose to do so. We have done what we said we would do. We achieved the universal government of man bringing equality irrespective of religion or race. And we become one nation, one planet, one race.

We do not do anything to be outside or breaking any international law; in the coming time we will set the international law and become the example for governments to follow. In this way from inside the society we change the behavior of the world government.

There is one further announcement: we call and request the Iranian government officials to sanction the peace talks with Saudi Arabia through the Keshe foundation. We ask the King of Saudi Arabia for the same authorization. The meeting will be in Dubai and will probably be headed with the ruler of Dubai. We don't put time on the meeting but we will bring our influences within the Iranian government and the Saudi government to stop the mayhem that is planned from Europe in the middle east.

In the Islamic language we say "salaam." This means peace and it must be among the followers of Mohammed. The upset of world peace through the sale of arms will come to an end. As we were instrumental in the peace process in Northern Ireland and in the peace process between the US and Iran after 30 years it does not take much to bring peace between two neighbors who are partially part of each other where forgiveness and kindness in the name of Mohammed is shared.

We call for a peace conference with Iran and Saudi Arabia as a matter of urgency with Keshe Foundation as the center point in negotiating peace. We do not need what is for a lot of people to make money especially sitting in Los Angeles and LA and in California. All the arms are built in northern Italy and supported by those who finance these things through Europe. Now, we as humanity stand up and have our voices counted as Keshe Foundation. We have had enough killing for centuries and most of it in the name of the Creator. We don't need this anymore. The Creator is present so why do you fight in his name?

We can an end to all this mayhem which is caused by people for a bit of money and they have to fight for cancer not to kill them. So we call it both ways: the establishment of the world council, the universal council and the peace conference between Iran and Saudi Arabia to be in the city of Dubai. Dubai is a home of peace. Send your request to every embassy that we negotiate peace through the Keshe Foundation as we have no trust for the governments to do this. The Keshe Foundations starts the peace talk and we will show our power as citizens of the world. We have had enough of wars and conflict built to sell and keep some people in leadership.

(03:33:25)

Let me explain something simple: in the time what I have shown you on the map, people of Europe will go to the churches to get paid back for the money they invested over time to rebuild their homes and their buildings. I wonder if the Vatican will pay the money back for what they invested for generations in the church? People will open the vaults of the Vatican to help support the people for lives lost in their countries and the livelihood lost in their countries. We respect every religion and every nationality. We have become one and we love each other and we work the same way.

Peace talks and direct meeting with the Iranian and Saudi leadership under flag of Keshe foundation as one nation, one planet, one race will be part of all our talks. We are one nation, one planet, one race. You can go to oneponenoner at Keshe foundation and register your vote. Flood the embassies and foreign offices of Iran and Saudi Arabia across the world for the peace meeting. People of the world want peace. Let me explain why we want peace.

If the Saudis and Iranians go into the conflict the Iranians see every airport across the Persian Gulf as a point of attack. Major emirate cities will be vanished as they bomb every airport. Iran Air Force is in such a superior condition that there will be no oil fields left within the Saudi Arabia that are untouched. Then you can see the oil crisis and it will be worse than the earthquake situation. The same goes with the Saudis. Why should so many people lose money for a few to show who is more powerful? As a human race we are more powerful than those which we elected or those who thought they elected themselves to be leaders.

Please support and attend the conference in mass. if we receive more invitations we will correspond accordingly. Every person will be vetted by Keshe Foundation. We will have a list of people who might apply to enter Dubai under false pretenses. We have two levels of security. Please attend from all nationalities and all races as we become one race and one nation. We hope to see you in Dubai in April. Disaster or no disaster—we should not come together from the fear of what might happen but because we love the change for the total of humanity. Thank you for being here.

(03:38:30)
