

187th Knowledge Seekers Workshop for August 31st 2017

Video link: <https://www.youtube.com/watch?v=2HZV8lys9p0>

Transcript v1 from Amara subtitle file revision 8

The Keshe Foundation, an independent, non-profit, non-religious, space-based organization founded by nuclear engineer Mehran Tavakoli Keshe is introducing to humanity; the Science of the Universe, Plasma Science Keshe Foundation develops universal knowledge and space technologies that provide solutions to major global problems, revolutionizing Agriculture, Health, Energy, transportation, Materials, and more. The application of Plasma Science in the form of specially developed Plasma reactors and other devices, will give humanity the real freedom to travel in deep space. Plasma Science exists throughout the whole Universe. It is here and it belongs to you. Our knowledge, research and development regarding the Plasma structure have progressed to the point of enabling everyone to participate in the process. Become a creator and understand the work of the Universe for the good of humankind on this planet, as well as in space! The use of MaGravs, Nanomaterials, GANS, Liquid Plasma, Field Plasma and other Plasma technologies have come as a new dawn for humanity to progress and work in harmony with the Universe. Conventional technology applications are wasteful, damaging and cause pollution to the planet and all living beings. Aspects that touch the lives of all beings. Plasma is defined by the foundation as an entire content of Fields which accumulates and creates matter and it is NOT defined by its physical characteristics like ionization or temperature. Also, with Plasma science, we understand how we can convert matter back to the

Fields. Quoted from Mr. Keshe, "MaGrav stands for Magnetic-Gravitational, which means Plasma absorbs or gives. And every Plasma has the both, it has give and it has take...And when they can't find the balance they distance themselves until they find the balance they can give to the others that they can receive what they want to receive and give further." Certain atoms and molecules release and absorb Magnetic or Gravitational Fields. Released Fields are available to be absorbed by other objects. The Keshe Foundation has developed a way to gather these free flowing Fields from the environment within a resourceful and beneficial new state of transitional matter which M.T. Keshe named GANS. The first step of the process of the formation of various basic types of GANS, is Nano-coating metals. This is carried out either chemically by etching(steam coating with Sodium Hydroxide)or thermally by heating(Fire Coating by gas burner).During either coating process, gaps between the outermost layers of atoms are created. The residual coating is often referred to as nano-coating, defined by the structured layers of Nanomaterial, which build up during the creation process of the coating. Nano-coated metal in interaction with other various metal plates, in a salt water solution, creates MaGrav Fields. These Fields then attract available elements to form a specific GANS, which collects and settles at the bottom of the container. This GANS is formed from independent energized molecules (like little suns)that can be used in various applications.(RC) Welcome everyone to the187th Knowledge Seekers Workshop for Thursday, August 31st 2017 and once again we're fortunate to have Mr. Keshe of the Keshe Foundation Spaceship Institute available to speak with us at least on the first part of this Workshop and I think Mr. Keshe is ready to go here.

Hello Mr. Keshe?(MK) Yes good morning, good day to you as usual, whenever, wherever you listen to these Knowledge Seekers line of teaching .As we set out, from the beginning to teach about the Space technology we knew that, once we go into the phase of Spaceship Program, it is important that we learn more and more about ourselves, about the structure of human body in the Space, about how we will behave in the Space and what can we take with us, and what cannot be taken. In the past few months, as we keep on going deeper and deeper, we understand more and more about the reality of Creation. Part of this is, in a way

to understand our own structure and partly, it's to understand how this structure will react and show how it manifest itself in different dimensions in the Universe. On the other hand, the other part is trying to educate man in the new ethos of work of the Human soul. Which means now that we understand we are responsible for whatever we do there is no need to be scared, or be frightened of whatever imaginary of punishment, now we know the Soul is the Creator of Physicality and the Physicality's responsible for the elevation of his own Soul. In so many ways, if we can explain it, is that Man up to now, always do, how to convert Matters into different energies. We made electric energy, we made all sorts of powers we burned gases to create energy, we burned everything else possible. We use chemical effects to create energy. But the beauty with the new technology, as we said before. Is now, for the first time, understanding the operation of the Soul, understanding the operation of the reactors in the field transfer. For the first time in the history of Man, Man now is learning how to transfer energy into Matter. How? This has been the secret, the biggest secret in the Creation. How can we change? Do what the Universe has been, doing it naturally, to learn a ways, to be able to imitate and develop technologies, full understanding of conversion of energy into the Matter. Or as we say, "Energy within the soul of the man, converting itself to the Physicality of existence of the body of the Man." Now, we understand the whole process. Now, we have seen how materials have changed, how we have changed and brought in creating Matters into Nano and then into GANS, and then into the Fields. And then putting interaction of the Fields with each other producing different matters from what we call, the 'Space of the Universe'. This is the beauty of the new technology independence from any Matter-State. In a way be free, to understand to be able to transfer energies of the Universe, into any Matter, in any point anywhere, which Man needs. In a way, if you look at it in a simple way, if it could be explained it's very much like we have a dam, we thrown water over it, we have turbines which create energy. Now we're doing the reverse we're putting energy the turbine reverse and we create a water, which is in the dam. Now we understand that much. We have progressed in the knowledge in past 3 to 5 years, to be able to cover what man tried to cover for millions of years in one space of meantime. Now the process is, what happened when we create the Soul? what

happened when we create this free space of energy of different strength we call it the 'Soul', the 'Sun', the 'center' in the central line of the Galaxy any name you like to choose for the same thing. It's what happens to it in the end? Is it immortal? Or does it choose its own dimension, to become immortal at the point? Or how does it demise? Where does it end? Is there an end to the Soul of the Man? Or does the Soul decide to convert itself to another Field or another energy? What and where and how the end comes for a dimension, in what we created as a non tangible entity what we call the 'Soul', the 'central line' or the 'Principal Matter'. It's all the same, but we have chosen different names as we progress in the knowledge of Man in Science of the Creation. But how far can we go, to what extent are we prepared, to be free to understand unconditionally the Truth about the Creation? Does the Soul die? What happened to it, how does the Soul decide its demise? In so many ways, the Soul does die. In so many ways, Galaxies do end. In so many ways, the Suns do finish. But what? Consider what happens to the Soul of the Man? How does it, choose its ends? How does it, choose to merge? And in a way not to completely dismantle itself it links up in the strength where it feels it'll be guaranteed part of its survival to merge with another entity, to become part of another entity. This is how the Soul come to an end, as singularity. But, in collaboration in interaction they become part of another. In reality, Souls once created, which is a collection of magnetic fields, never stay the same, they just convert from one to another to guarantee the survival of the compactness of the energies which is they created, they called in themselves. The Plasma of life, the essence of the energy of the Creation. But how far can we accept this? What is this? Limited to the intelligence of Man or acceptance of the Truth about what happens to the Soul of the Man? It's easy to understand, but on the other hand, if we put collective obedience of the Souls together is what we have shown, the creation of Universal Councils the creation of the Earth Councils, these are all connected. In the time to come many of you will realize the collective Soul, the collective soul of the individuals in Universal Council, the collective soul of the individuals in the Earth Council becomes One Soul. In fact, if you look at it, it's like creation of a child in the womb of the mother. The womb is the Planet Earth. But the...at the inception, the Totality of the different souls of the members of the Councils give rise to soul of singularity, to

One entity, to One being This is the beauty of it in so many ways, we can come, we can understand to one point that now we, as collective, as members of the lives on this Planet We have, we decided, to bring a singularity to Totality of the Souls This is what the end will be. So, what we understand is very simple. To what extend Man is prepared to understand about the truth about himself. And how he decides to bring Unity amongst the Souls. Got to realize one thing, if you remember, it started with one egg, and one sperm, and the Totality became the Soul of the Man. The interaction between the Universal Council and the Earth Council, is like the Soul, the Creator of the Soul of this Planet. This is why we set it up this way. It has the Physicality of the Earth, which is the Earth Council, and it has the dimension of this Ether, or it's Earth Atmospheric condition, which is the language of the Soul. Which has nothing to do with the Physicality of the Entity. So, in a long term, but it'll come to be understood, is that the Totality of the interaction of the members of the Universal Council, and the Earth Council, will lead to Unify Soul of the Planet. Which means One Nation, One Planet. And, as of teachings from today, you will realize, we are extending the knowledge. It is for the members of the Universal Council and the Earth Council, to come forward, and explain their understanding, and how they see the Unification of this, Nations become one, and how we make this Planet as One Nation. As I explained to the members of the Councils in the public teaching of last week, or earlier this week, both Councils and the Men and the Humanity, has to be aware of very, very, very dangerous line, the dangerous line is, by Creating the Universal Council, by Creating the Earth Council, by giving birth to One Nation, One Planet, the Mankind has to be aware that we do not change the borders of the Nations, to the borders of languages, that we start a new division in the Humanity. We have to understand the language has been chosen for the understanding of the Soul of the Totality of the Entities on this Planet, and not just the Man. Do the chickens have their own member in the Council? Or do the birds have their member in the Council? Or do the lions have their member in the Council? The Soul of the members of the Council has to understand the Totality of the maze? of the Souls of this Planet. That's why we have chosen the Universal Council and the Earth Council. That the merger of the two leads to One Nation operation. Which means guaranteeing the Peace. So, when we understand more, we need to understand,

in fact, what these people think and what is behind the line of thinking, that they envisage, that the Universal Council and the Earth Council has to be, which in collectively is you, every individual one of us, is a member of the Council. We connect to it through our wishes, we connect to them through our needs. For this reason, as of this week, we start giving more platform, to board the Universal Council, and the Earth Council. It's their job on a regular basis to interact, and understand the need of the Humanity in writing the charter for Mankind. In today, I was talking to, communicating with one of the members of the Earth Council. And she said, "How do we define this charter?" I wrote in a very, very, simple language, and that is, "If you want to define the Humanity and the language and what has to be the charter of the Universal Council, Earth Council, as One Nation One Planet is very simple, it's to be true Human, and Lover of all lives, in every dimension, and strength, in every point of the Universe, as one will manifest itself." Which means we take the dimension out of this Planet into Universal condition, which means every Entity on this Planet is to be Loved, and to be cared for. Understanding the Loving is giving. Then it becomes irrespective of place dimension and time. And this is what we have to understand. The members of the Universal Council and the Earth Council will take most of this morning teachings, and in the coming weeks. Because we have to understand, what is the new generation of Peace, what it means to follow the pattern of Peace. It's not just because as I said we establish the One Nation, One Planet, it's finished, it's the beginning, the structure for financial, and the structure for commercial, the structure for the health, the structure for every need of Man, now is in the hand of the Councils. But with a difference, that from now on, we work through the Soul of the Man, the Soul of the Planet, to reach the Physicality outcome we need. And not the vice versa, as has been in the religious beliefs of the past, by punishment, fear, and always threatening what's going to be. From now on, is how much more I can elevate myself by serving more. And this is where it is, it means I don't want to fall behind, it means I want to be there before anybody else. I want to give as much as possible, philanthropist does not have a meaning in your new life. Being generous by s... by giving from the Soul, does not make one philanthropist, but it makes one understanding the art of life in the Universe. I give my life for the others to live, in so many ways if you look, that if

you understand, and if we ever understood, what we said, in the life of Christ bless His name, is the true meaning of life. Sacrificing, giving from one's life that the others may survive, and flourish. Then it puts the question," Was there ever a Christ?" Or we changed the name of generosity of Man to love, to the name of Christ? Then it changes a lot of things for a lot of us. It brings a new meaning," Do we all want to be, the same as the one who's been so generous?" Why do we choose these ways of elevating our Souls? Is it because we always have been frightened of confirming the existence of the Soul within us? And this is what is brought, a lot of changes .And in time will bring more changes, because as we understand more, we come to understand, we understand very little of the Totality. My wish is my command and my wish is Peace on this Planet. And my wish, is to Unify the Souls of beings on this Planet and beyond. And in so many ways, we have achieved it. Numbers does not count, the strength of those who believe the change has come ,and it will now flourish to become what we call, 'Unifying Peace Force', as established. I think it's time to listen to the members of the Universal Council, we have allocated this morning one hour to each Council. In trying to explain, and then in trying to bring discussions on the table, to see how we can move on, to establish One Nation government. One Nation group of understanding ,One Nation, One Planet ,that there shall be no more war. My mission as I've said many times, is to Create the condition favorable for Peace ,and favorable for the World leaders to accept that this is the path for Peace. We have to understand one thing, all these killings over past centuries, or thousands of years, has brought nothing but degradation of the Soul of the Man. Let us move back on the track, and let us go the way the whole Universe goes. Which means we become the givers unconditional, and not for looking what will be the benefit to me from it. But, how can I benefit the Soul of the others by sacrificing my own time and Soul, that by giving more, I receive more to be able to give more. I close the session with me this morning here, because I think it's time to in a way, see the fruits of some ten years of teaching, see the fruit of the first blossoms of Peace. Which is established through the establishment of Universal Council and the Earth Council. Maybe, maybe now we start the real process of Peace. Thank you very much for being here, we step down, and we'll leave the two Councils to explain their position, and bring you in to become part of it. Do

not forget, every member of this Planet, every citizen, is a member of the Council. It's just how much you want to serve to be heard through your action, and your Soul, and by shouting nobody moves. Thank you very much.(RC) Okay thank you Mr. Keshe.(MK) Are there any members of the...Ah, a member of the Universal Council is here. Would you like to enlighten us?(MR) Yes ... Ma name is Mosfeq Rashid and I am... I represent Universal Council... Bengali language of the Universal Council So, as Mr. Keshe was talking about ...Unity to achieve the Peace. So, this ... would be the basic theme of what I'm going to talk about .So, as we have done this ...One Nation, One Planet, One Race Peace Treaty As we signed this, this is the beginning of it. Beginning of it on the sense that we have marked the ground that...and now we have to proceed along these markings. So, unity has been with us, here and there and everywhere for a long time. In a way, we weren't able to make it flourish everywhere on the Planet, recently we saw hurricane Harvey in Texas and it was really devastating ,and it is, still is and...but here we see people who Unify. And Unifying to help each other, irrespective of where they live in their life and what position or wherever they may be, to help each other. So, in this... in this strange situation where we have a lot of suffering but we see that people are engaging in Unity. Now here there is an interesting thing, this Unity that we see manifesting in this situation. Can we have this Unity without the suffering and why not? So let's... let's go back a little bit in History. I'll talk a little bit about the history of the part of the world I come from. About 200 years or so back, the British invasion took place in India. Although it's story of my part of the World and it's the same story in many place, be it American Indians, be it Africans, is the same story. So my story is the story of all of us. So, as they came ... there was a lot of suffering and we didn't even, not know about it until very recently, that...what kind of atrocities that happened. Particularly, in damaging the educational and the health care system. And it's all in the archives of the British Library right now, and which has been discovered recently. But, yes this happened, but even in this bad situation we have the seeds of Unity. Now we're... I speak in English language and others as well and we communicate with the rest of the World. So, I learned to speak English language because of this British invasion. And in the same way you see all the yoga outfits in various cities in the West and people are exercising, getting healthy, many such things are happening.

We get to know each other more, but the price was high, the suffering was enormous and the people who instigated it, this...this process are the same people that are doing it right now. The British Empire, the Monarchy and others associated with them. You don't want... you don't want to go there, but the Unity was there, it happened very slowly by efforts of people, simple people all around us. Simple people recognizing, "Yes there are something to learn from Indians." Simple people that are in India ,learning yes, English learning, English language brings us closer to these people. People who were controlling this whole affair did not do it, but it's us that did it. And it is us that, we will do it now. In spite of the intention behind it, Unity was achieved, So... I'll take another part of history, this is few hundred years forth... back, from the time the British came in India. This was the... Central Asian attempt to come to India, which later on became the Mogul Empire and...There was something different here though, yes it was done through force, done through movement of army of military. But, the intention of those who are involved in instigating it were to bring the Islamic culture and the Hindu culture together. And, so they came and it, it was...in my opinion surprisingly successful, a lot of things came as a result of it and the two religions learned each other's strengths. And, much of the culture or science, medical practices that followed comes from this togetherness or Unity, that came as a result of this effort. And it was a very prosperous time for the Indian Sub-Continent and Indian food you eat is that most people in the World are familiar with these days, is a product of this united effort. And... and this effort not only brought Islam and Hindu, the two almost polar-opposite religions together, each had their strengths together. But, it became more. Yes, there were divisions, there we reattempts to create division and still is, but the undercurrent is flow of this Unity is still flowing there and as a result of it created the Vashti movement or the movement of devotion, in India and that resulted in many poets who contributed to this movement or...Vastis... devotion in a way respect as well. So, a lot of love poetry, with respect attached to it, came out as...came out as a result of... of it. So it's... old, new spiritual movement which, we call now 'Indian', is in a way product of this unity. So, that was ...successful operation in a way. Yes, there are things that came later on to create division and even now this Hindu-Muslim divide is being instigated by some. But the... the main current is still there and we

feel it. So, not too long ago when I was visiting Central Asia, and I was in a taxi and there was this taxi driver, who was speaking about the Mogul, how the Mogul Empire started in his broken English and he was...he was proud that, how it contribute to the Indian culture, and we both appreciated each other. Although we could hardly communicate, but the communication was done. And in the end when we parted company, we had mutual respect. He... he realized he and others in that culture know that they have contributed, to something very creative in an United way. And, although few words were exchanged the message went through. So, unlike what we see of the things that are still stored in the British Museum, this positive intention resides in the hearts of people in Central Asia and in India right now. And... this devotional movement that created all this poetry which has Love and responsibility attached to it. This is the same thing we see when we see our militaries, serving for their Nation. Because, it is the dignity of Human being and the Love for the Country that they are trying to defend. So, so that basic elements of there, but the way things are done has to be from a higher intention. So in a way, the militaries have the Love and the responsibility. Now, as On Nation and One Planet, One Race we see any border... we don't. So, the military still can exercise their Love and responsibility for the people that they serve. Much like all of us, wherever we are in this Planet. So... and in a way, every military man or women have this within them, as they join their forces. Now they join forces with all of us, wherever we are and we will Unite with this Love and responsibility in mind. To carry out the task of bringing us together, and there is no border to defend, because what we are really defending is our Love and responsibility, not the borders. So, in a way all of us, and herein would welcome everybody's suggestions on how we go about doing it. We can start doing it locally by those, by sending our wishes to those who would participate in this, out sending our wishes. Yes we can do but through a higher strength field, we can do it through talking. We can do it another way, through conduct and as Keshe Foundation members and those who are listening to this. We are... we use languages and we can use conduct as well... because conduct is what we will carry forwards as we move beyond the confine of this Planet. So, this conduct is how we...We will make various devices and things using the Keshe Foundation technology, it's not only... that yes we make these with our intention, but how we

give this to other people, with the Love and responsibility. And, then much of the things that we worry about disappear, because the higher intention is operating here and, our worries need not to be there because we are doing the same thing like, like everybody else. Loving others and giving in that process and being responsible in...in receiving what they have to offer. So, the Magnetical and the gravitational are in...in one package as...as Mr. Keshe has said. You know, you cannot really separate these two, they're together. So, locally what can we do. I mean we can give this and I'll be...I'll go into a little more specifics here in the sense that...yeah, we can give these devices to serve others, whether it's health or if we would need, or others.... Yes, we will give them these things, but it is equally important, the way we give, way we give them, in the conduct and in the manner we do this. And... and this not only is...elevates us as we have to in order to serve better, and better. But, others can see that there is more to the story than just these devices or this technology. And, and that there is a...there is a way to use these things, it's not just, "these things do this." But there is a purpose or an intention behind it. It can be as simple as, that I will get healed by it, it can be even more much more than that. So, this is one area where we can do it similarly, as we know, education is an important aspect of creating Unity.... Those who know a little bit about the brain washing know that, some of our education system uses some of those techniques. But once we have our intention there and make it fun, then we bypass those kind of mechanism. I remember when I was(chuckles) in high school. I... I dreaded memorizing things and that's kind of like a...that's a (chuckles)brain washing technique in a way. So, ... so what can we do? So we hear in teaching we not only teach through our words but through our conducts, that our conducts bring Unity. The children come together because they are attracted by it, they Unite with the teacher in a way. And, it's not just children, but anybody..... this, these ideas and this technology all has to be propagated throughout the societies. So, in order to do that it is important that... people are attracted to it but not just by the technology element but way we deliver it. And same goes for manufacturing the products and other activities that we engage in. So, right now I talked a little bit about history and... you know, and many of you can relate to it, although I talked about it in terms of local sense. And in the same way I talked about, a little bit about how one might go about doing it.

But I'm sure many of you have lots of good ideas on this and lots of local wishes and even higher strength wishes to make this a reality. So, my request would be for you to come forwards and ... give us some ideas. Because, in a way we are all the same, although some of the beings on this Planet speak a different language. For example, the Mosquito sometimes don't want to listen to me but, in due course I'm sure they will listen. But... but we start with our close neighbors, the fellow Human beings on the Planet and then we start communicating with others and get their input. And we will feel it, as we move into the higher strength fields. And... we take the request and we make it a reality. And this time unlike the previous time where it was written in the British Library archive, or in the hearts of people, in various Continents. It will be written in the Soul, archive of our Soul and, and it will be, it will propagate throughout...the Universe or the Unicos. So please ... come forward and suggest your thoughts and wishes For us to listen to ...as we write this charter Thank you very much.(RC) Okay. I thank you Mosfeq. So is there somebody willing to come forward with that? I see we have a attendee with their hand upland is...(GM) ... I'll come in,... this is Gatua, from Kenya. Yes, and thank you very much Mosfeq, for talking about Unity... The history of ... Unity and the way to the future, Unity and your experiences as a Bengali representative of the Universal Council. It is very important for all of us to understand ... that for the first time the Keshe Foundation is uniting people through languages. Why is this important? Languages have been used to divide. They have been used as divisive element since colonialism,... The so called tribes, I call them Nations, so I don't like tribe because it's divisive by itself. Because of his, its history how it was used by the colonialist, To divide indigenous peoples all over the World, or everybody we have colonized. Now a lot of people, especially in politics today,... see the languages as divisive. Those who seek political offices, Have been known to use the languages they speak to look down upon others, because of the bad history that came from colonialism, how they were used. And even before colonialism by the divisive entities, especially the Europeans who colonized and took other people's lands. Now, and we have learned from Mr. Keshe that we can use these languages to unite. And this is important in that, people who speak ... a Particular language, for example the Bengali of India are all over the world they are not restricted to one single space of India, they are here in Kenya they are

everywhere in the World. and so are the Gikuyu People of Kenya, that I represent in the Universal Council, so they are everywhere, and we wish to unite them where ever they are. So, for the very first time we're using languages without Borders to unite for Peace. Now, when we achieve this, which we can begin locally, Mr. Mosfeq talked about what we can do locally? So you begin where you are locally, you unite as a member of UC,... Universal Council of a particular language, you invite, I mean Unite those who speak your language wherever they are, And in so doing you are also is uniting others. We encourage many more languages to have representatives... in the Council And there is a process of applying to become a representative of your language. So, we are very inclusive, we respect all languages in the World, big or small. And this is what makes the Keshe Foundation approach unique in that it's using what the common bind, the deal that keeps people together, the languages. And we must also understand that...Everything in this Universe has Gravitational-Magnetic Fields, the Energy, the Soul, there is a Soul of a language. That Soul has a Gravitational-Magnetic Field. And in Unity, and we have also learned today this morning from Mr. Keshe, that ... all of us are members of the Councils. These Councils, whether you have registered or not, and when we unite, the Totality becomes one Soul. And of course that add strength in terms of, Gravitational-Magnetic Fields, so that when we wish for Peace, we attain that Peace faster. Now I'll try to say what I just said in Gikuyu,... the language that I representing the Universal Council.(Dr Gatua Speaking in Gikuyu Language.)Thank you very much, I have tried to just ... translate, not directly but ... the idea, the main ideas that I said in English earlier. And, again, uniting through languages as we do in the Universal Council, is a very important step, and we should definitely understand and take away that home, I'll, ... what we learn today, we have learned this in various places you see like where they say, "Unity is strength" and all that, but in most cases, they were united to disunite, but for the first time we are united for Peace. Thank you very much, I appreciate very much, giving me this opportunity to contribute. Thank you very much indeed.(RC) Okay.(GM) Over to you Rick(RC) ... I was thinking there might be some other Universal Council people that would like to say something, I see there is a number of them in panelists here.(YM) Hey, everyone, hi good day, this is Paul from Togo.(RC) Hi Paul I want to bring my part, and I want to start in

French for comeback in English.(Paul (Yatoute) speaking in French.)Hello everyone, was explaining in French, about our understanding of Unity. And I'm going to give the summary of our understanding. And our understanding is that Man comes from the egg, the Core, so Man is made by the Core, which is the family. And this family comes from the society. In this way, we understand in very simple way, that, without society, the life is not possible. And without also Man, Human beings, the society is not there. So, this means that each society, to serve the society. And society have already served Man to let Him be. We have two ways, the way of One, to become all, and the way of all to become One. We are part of this society, and we have to live in this society. And as individual parts of this Planets, have limits. We are only limited. But by integrating ourselves in our society, there is no limits for us. So, there is no needs and parts not serving Humanity, there is no need to say that I don't want to stay alone without integrate in my society. We needed to become one with our society, we have to serve our society because we are made from society, and society is made by Man. So Man made these society and His, and the society made Man. So, I invite everyone to just understand this simple principle, that without society, any life is possible, and we are there to serve society, and society already serve us. We are part of this society. We needed to be part of this society. We needed to bring our part to construct this society. And there is no time, no energy to lose by division each other. There is no benefits, because when you stay alone, you understand that you can't do nothing. Nothing. Any life is possible without society. we need society to make life possible. So, please join One Planet, as big society, from understanding of Human beings from now, to bring your part to construct where Man will not get no limit, where Man will live in Peace, because there is no limits. Where Man will get what he needs, to been light, because he didn't get no limits. One part of reality is that, one Man don't understand they create mayhem and created this in Himself and then the society, he cannot integrate our society. Now we understand that by being limited we start going out of the real and normal life. So, this is big opportunity to put out of our life our limits. So, and we have all the tools to Create a life for others. What is what we need more? We need everyone to be in Peace, we need everyone to be enlightened, we need everyone to be the life from society from the Universe. So, the opportunity of One Planet,

One Race, One Nation is there. Bring your efforts, your energy, to construct this society. For us, and for the next generation. The color of skin of Man is just the beauty of Creator. It's just like the different parts of Human body, which have different shape, and different form, different color in us. So this should not bring division inside of society because you see in yourself the black color from your head, our head is black color, so you have black Man from Africa. So, you understand that you have in your structure this color. Why do you have it? Yellow, you have it, another color from Humanity, you have it. So the color from understanding of us Human beings should not bring division in our society from now. And language is different type of vibration. And when you see the Planet Earth, we have different type of vibration around the World, when you just touch water, it is one kind of vibration, when you just touch the heat, it is one kind of vibration. So, you are already in also this part of vibration, different part of vibration. We have to understand that vibration from the language, which is the tool of expression of anyone of ??? beings, ??? also. And I want to end by the money system. Today, you are Man or you have more values if you have money. If you don't have money you are nothing. And we from this money made by Man to create a division. We have to stop this. We have to understand that we are, we have more value and we are more than that and we should not let it to be our value. Our value is precious and we don't need this to put Man at his place. I want to end by here by inviting everyone to joins... to join with us in this process of One Planet, One Race, One Nation By, Mr. Keshe said, "Understanding the Unity, "to let be the other one and to let putout these, to get to one perfect society. Thank you.(RC) Thank you Paul. Okay, is there someone else in the panelists who'd like to go ahead?(JG) I would like to say only one thing. What about his ...(RC) Could, could you say who you are ??? please.(JG) Yeah, sorry, it's Jalal from Iraq.(RC) Okay.(JG) What I'm, what I'm thinking Paul is already speak about it about the black cells and the white cells and all that. So we are connected. I...100%, without speaking also. Thank you. Thank you Paul.(RC) Anybody else in the panelists who would like to ... say something? Maybe, someone coming?(RP) Yes Rick.(RC) Go ahead. Can I come in? It's Rui from the Universal Council speaking. I represent in the Universal Council the Portuguese language. I have two ... points ... that I would like to speak hereto manifest the importance of Unity and ... how I

understand ...And first of all, the first of that ... is ... we ...I ... speak here as a speaker of Portuguese language because ...the language ...organize it in our brains, in our understanding of the... the Reality in the structure of the language, so the sensibility of the language. That's what I represent here, it's the sensibility the structure of the understanding reality in Portuguese. So everyone speak Portuguese, can ...understand ... the same structure of theory... reality in the matter of the language to end the civilities. So they can be represented and if it's me now, can be anyone else ...But I speak in Portuguese, sorry I speaking English with all the other members to put my, my sensibility, Portuguese sensibility in English because they don't know Portuguese. So in this way like Mosfeq said when the English ... been in India they give the language to Unify. So English is the language that to used here to speak with each, to Unify the communication ...but everyone of us has the different structures ...the different ...I would say feelings and understanding Reality. But when we speak in English and you could hear, we see we are all the same. So the language here works as a ...diverse ...I wouldn't say diverse but bigger, bigger understanding of the Reality in differ aspects that Reality manifest with a little color each language these little colors and it shine different way. So, that is the beauty, it's the... to... to... make bigger the... the understanding for all of us. So this say so I continue speak in English because it's important it's the...what to use in the, in our ...in our committees ...The other ha... idea that was here talking about Unity of the Planet and Nation and Mr. Keshe said so. My understanding, it's that we should ... defend and manifest ...ourselves in the Universal Community and as a Planet as One all, all Beings because the Life ...we are... we should be representatives of the Life in this Planet and ...not only ... Humans but ... all kind of Plan... Plants, all kind of insects but ... even stones and the mammals, everything because we depend on it to live. We com ... dissolve of the Sun let's say manifest Life on, the Planet ...different ways ... and for we can be support and be supported beach other as Unity. So, I want to say here that we should realize importance to be our kind of Life in this Planet as Human integrated with the other ones as One and start to harmonize ...all this because, we did a lot of bad stuff here and unbalanced the Planet. So, we should correct then ... at least, to understand the need to do it. And we have technology for that. We can... and we have the knowledge to because we know that we, we should

and we have to integrate ourselves in the way of Life. And it's not the way to exclude ones we don't, we feel that, we don't he... here with all they are we proceeding wrong. They are this, we are the same. We did the same before because we didn't understand. So, we have to give the knowledge to, for everyone integrate and understand integrate as One and ...understand Life and manifest, manifestation of the Life on the Planet. That ... we are not only the Humans in the Planet. We are part of a Life and a manifestation of Life on the Planet. So it's all what want to say about it. Thank you everyone. Where is a, is that always pleasure to be with all of you. Thank you.(RC) Okay, who's ...Who is next on the panelist would like to go forward?(MR) This is Mosfeq again. I would like to men...mention one thing that ...our enlightened members of the ...Council Members from Africa ... Paul and Gatua did is that they used another language. So, one of the most important thing about ... saying it in another language which I did not do, is that it conveys ...a different Emotion as well as perhaps as we learn to understand perhaps it conveys more than the emotion. A certain feelings at a higher strength that we give to each other and help us enlightened what is there in our cultural background over the many years ... it has operated. So, I think that there was a very interesting point they brought up without saying it and I would like to say that that's an important element in uniting us in a higher strength and...become closer in a more intimate way sort to, sort of going closer to the Reality. Thank you.(RC) Okay. Is there someone else in the panelist would like to come forward? Well, I could mention that ...this is Rick Crammond here ... some of these stories reminds me of when I was a child and I,I would have what was called a 'pen pal'. And a pen pal is someone that you would write to in a foreign country and ... you just exchange letters and, you know, develop a friendship with this, basically a stranger in some ... foreign country is a pen pal. And now with our modern communication such a Face book and all the other different medias available to us as ... cultures in the World... there's much more ... communication occurring on a Worldwide basis and so we have, naturally, much more overlapping of the different cultures the different colors, the different languages, all of the variations in the World, now are more easily accessed, they're more easily ...in...in our attention. So, I propose that now instead of having pen pals we now have what we could call, 'Plasma pals'. So, what's happening now is, there's

people Uniting all over the World in the most incredible way over well, what we call, 'Plasma'. This teaching about Plasma, the knowledge about Plasma and how that applies to our own ... Physicality and to what we call our Soul, maybe our essential self. So, I propose that we can use the term 'Plasma pal' and replace what used to be call the pen pal and when we make these connections with others with a... a common purpose, with a common ... understanding then we have these 'Plasma pals' all over the World ...for example ... I'm in communication with the people on the Livestream chat and I haven't met these people and don't know them outside of the Livestream chat. But yet, we find there's, one person that is from San Diego in the United States next one is from Romania and another from India and another from ... Nepal. So ... that's just in the Livestream. I know that's true of the Universal Council and of... generally with the interactions of the Keshe Foundation. It's amazing how much of a cross section of cultures that are involved and...and ... they get totally excited about this technology. So ... I was thinking of that today, I've got this overwhelming number of, of ... what are called 'friends 'in Facebook and most of these people I've never met personally and don't really know who they are but yet, almost everyone of the literately thousands of friends that have ...befriended me in the last few years ...have been very much ... Peaceful people, people that are concerned about the World and how we should be progressing towards Peace and they are, almost all, what we called perhaps 'spiritual people', not necessarily religious but more sensitive or spiritual or what we call, 'feeling' the Fields. There's a terminology that's coming up lately. So, we have this interconnecting network of 'Plasma pals' around the World with... that have a... an understanding, that when you meet another 'Plasma pal 'you know that, they know something special, something more than just the ordinary ...education and knowledge that we receive in school. And the chances are that, when you connect with them you'll be talking about things that, aren't of just the ordinary...you know sports and ... and ... movies that are happening and, and so on TV and whatnot. It's usually something more substantial, let's say, that's going on as a communication, as a interaction. And often it has to do with GANSeS and the reactors and some the other different aspects of the technology of the Keshe Foundation which again, brings out that tendency, that people that are connecting in these networks, sort of, already have

and they're already manifesting and it brings it out in them in a, in a glorious way when they encounter the GANSeS and they have healing ... events that take place. So they ... know their dog gets healed by a Plasma Patch or they save energy on their MaGrav that they put together themselves. And they happen to be a grandmother, living in way out in the sticks of some ... rural area somewhere, and so on. The stories just keep coming in all the time and it's an amazing process for me personally to be involved with this. To see ... especially the interactions among ... the Human Beings of this Planet and how they're getting together, in so many ways. And getting excited about ...not only the technologies it's not about getting excited about the ... the technical stuff, which was part of it initially that's kind of why I got into it, it was a bit exciting in terms of learning about this knowledge and ... how do apply it and whatnot. And it's still with us, it's still absolutely is but now there's much more ... layering involved many, many layers of knowledge many layers of means, of manifesting and so on. So now it's ... become a much wider ...area of exploration for myself and others.... Many opportunities come up, within the Keshe Foundation, or within the environment that we end up creating for ourselves, with this intention of going forward in a Peaceful manner, number one. And with the idea of helping and giving toward others as a, a prime feature as well. So, some of these ethics and ethos are embedded into the way people operated around the Keshe Foundation. And ... it's ... I just wanted to say that it's quiet a fascinating journey to... to watch that and be part of that and I'm very fortunate and full of gratitude for that opportunity. So, thanks to everybody for helping with that to happen, and for participating in all the ...the "crazy shenanigans "you might say, that have occurred, all the wonderful things that have been invented and innovated and developed And the ideas and concepts that have come out. And ... all the wonderful people that have connected and wanted to share and wanted to get knowledge and... and receive and so on. So, it's a... it's a amazing process and thank you everybody for that ...for that opportunity. Okay, so opening it up to someone else who'd like to say something. How about you Lisa?(LM) I'm here Rick I actually would like to share a screen because I've...I've put together a little bit of stuff that the EC have been discussing and I thought that it can help enlighten some other people. So, if I could share the screen please?(RC) Go ahead.(LM) I'm just organizing here. Can you see that?

Hello?(VV) Hi Lisa. Yeah Rick I think he just dropped out for a second...so he'll be right back in.(LM) I thought it was me. Okay can you actually see that?(RC) Sorry about that, yeah...Okay we're back again hey.... All is good.(LM) Okay so, ... we've just been having ...a bit of a discussion in the 'EC' about how we can take everything forward now, because Mr. Keshe has...has... has systematically gone through different parts of the Plasma for us, from the Nano to the GANS and the Fields and he's taught us about the Soul, but ... somehow a lot of people are not managing to make the connection and so, we need to discover how we can help them and, how we can learn and grow and mature and to understand all of the stuff that he's taught. And, so we posed different questions to ourselves and...and had, you know, went around this question. And we said, "What is the difference, between a Man that has an experience...has experience and that one has wisdom?"And, the one that has wisdom has learned from his experiences opposed to just reacting from it. And, what is the difference between us having fleeting glimpses of Truth versus fundamental enlightenment? Because, through the eons, religion has always just given us fund..... fleeting glimpses of Truth. It hasn't really taught us much fundamental enlightenment. And we constantly need to ask ourselves when we feel these glimpses of truth...we need to ask ourselves why and delve deeper. And, we need to be open also, to all new information as being a stepping stone to further understanding. Because we need to acknowledge that, knowledge for everyone... the knowledge of everyone is useful to you too. Because, everyone on this Planet has experienced and has learned things, and when we listen to them with open hearts and open minds, we learn something new. And, this is what Mr. Keshe does all the time. I notice every time he asks somebody for information, he's very open and he listens and he gains from that knowledge. And this is how we are going to help ourselves to enlighten ourselves, because only we can do it. And, so this means that we actually have to do the work now, because he's given us all the tools, he's given us the way and he's taught us all the bits. But, now we have to figure out how we have to put it together. And, so we have to start doing the work, and doing the work is actually using our critical thinking and delving deeper and being open to build your understanding, and taking responsibility for your own enlightenment, because I'm afraid there's no short cuts. I think that what we've learned about the

Plasma and operation of the Plasma, is the shortcut. And so, we're not going to be able to learn about our Soul by finding a new meditation technique or breathing in a special way. We're only going to learn by understanding the operation of ourselves and by gaining the knowledge we need to understand and by giving that knowledge and that understanding and that enlightenment back to others. And serving them, to help them to understand, Loving them and allowing them to...to grow in their understanding, however they need to, is the only way we're going to find that enlightenment. And, so it means that we're really going to have to now connect the dots between the science of the Plasma and the Soul aspects of what Mr. Keshe has taught. And so, now we really need to dig deeper into the science of the Soul and we now have the knowledge that our Soul is the source within us. And how does this creator which is us, actually work. And, so now we need to use the knowledge we've gained with Plasma science to figure out how we operate. Because, in essence we now understand we're the reactor, our Soul is the essence of us, that can create anything. And how does this actually work?... So, the science is the basic user manual, to explain the Field interaction and move which is at the essence of all existence. And so now we need to learn how to fly. Because Mr. Keshe has given us our Spaceships, 'cause we are the Spaceship and our Soul is the pilot. And, the Plasma science and the Field interaction is our user manual, on how we're going to learn, to now navigate our way without harming others. How we can navigate our way to help others? How to not crash into each other anymore? Which we seem to do on a regular basis. And ... I think that this is what we need to try and work on in the next while to connect the dots, to get our user manual organized, so that we can get our learners license and...start operating our Souls on a slightly different level, because now we start understanding, that every interaction we have is a Field and how the Fields move, how the Fields interact. And, this is all going to come to help us to understand how our Souls work, because this...this is a fundament...been a fundamental problem with religion all the time. We've told we need to believe, we need to believe this and believe that and the core truth in many of the religions, just little fleeting glimpses, but we've always had to believe. Now, we don't believe anymore, because now we know, the science can explain it for us. And we need to understand the science so that we can use it to understand the Soul. And, yes we

will use ourselves as our Spaceships to fly, if we delve deeply enough into this. And, when we look at... a bit above the page we were talking about how...how... how we learned to mature and grow.... If we look at everybody on the Planet and everywhere else in the Unicosas an aspect of the creator, they all have experience, and if we listen and learn from them, they all, will basically help us to be a sense, the flight simulator, because at the moment we're just learning. But if we have other experiences from other people and we understand fundamentally at a Soul level and touch their Souls with our Souls, by giving them Love and understanding. We can understand their experiences and we can allow them to...to give us the knowledge and the Field-Strengths to understand certain conditions. And to gain from that, and to be able to teach and serve more. And so I hope that this inspires everybody, to have a new deeper understanding, and to start delving deeper into the science of the Souls. As we know now what it is. Because we always feared, connecting the science and the Soul. Scientists don't want to know about Souls. And a lot the Soul seeking people got necessarily want to do the science. Because I think it's difficult, it isn't sitting nicely in their brain, But, we are going to have to connect the dots to be really empowered and enlightened people in the time to come. And so, I please encourage all of you to do that.(RC) ... Excuse me Lisa, could you make your... the screen bigger? There is an request ...to make the writing larger.(LM) Hum OK,(RC) F5 is suggested by Flint.. to ... to ...(LM) That better?(RC) No, that didn't change.(LM) No...(RC) Ah, there we go! That's way better. Thank you so much.(LM) Okay. Okay, so I... I wondered if anybody had any... any ideas and thoughts on that?... Any feedback or discussion they'd like to have? Because by discussing, is how we...we learn from each other and how we gain from other's experiences.(UC) Hi, Lisa and everybody. I'm Ursula.(LM) Hi, Ursula.(UC) Universal Council in Spanish,... I agree with all what you say. Very beautiful message. And we know it's already inside of us and sometimes we forget. Because there are fears, they had competitively, they are all the things that makes us feel sad sometimes. With family problems or community problems, or catastrophes like that... that in United States in this moment. And we know from where they're come and we feel also the fear of everybody, they are around us. And sometimes it's hard to... to have this strongness to... to show them the way. And sometimes they don't believe us

when we are talking. We must be Unified for this reason to be stronger all together. And, thank you for your...for your message. Thank you very much.(LM) ... We, we also had a few idea when we are discussing the Charter. And I don't know if any of the other EC members are... are available Because unfortunately a lot of them have other commitments or they fast asleep in the middle of the night at this times, I don't know if anybody else is there?(K2) Hello Lisa, Hello together. This is Klaus from Austria.(LM) Hello Klaus.(K2) I love your development. It's wonderful, wonderful. And I want to say some words from great Nelson Mandela. He said, "I am the master of my life. I am the captain of my Soul."And I say, "So it is."Thank you for all. Thank you.(LM) Thanks, Klaus. So, when we were discussing the Charter, we are trying to come up with...formulating idea on how the Charter needs to work. And because of this the EC we had good debate and discussion, and tried to... to formulate ideas coming from Souls. Because, every time before in any form of religion, or any form of, of legalese Everything has always come from physical operation. None of it has come from a Soul level understanding. And as soon as you come from physical operation, things fall apart. Because you stick, stick boundary that are not supposed to be there. And so, it doesn't work. And so, we thought that we'd share a few of our discussion points with everybody Because, it opens up a lot of thought. And opens up a lot of avenues to try to understand. And, hopefully it will help all the members of the Councils and everybody else out there, who listens to this, to, maybe, gain some insight as to how we end up creating the Charter and... and what it actually means. So, this is not a Charter to tell us how to behave, because that's done with it. We don't know, we don't need to know, we don't need to be told how to behave. We're not children, But rather it needs to be an understanding of how we need to be. And "Be" is a very different word to behave. And I hope that that word means something to people. So, man understands its origin and he respects his Totality. And we understand that our Souls within us and we are the Creator. And also that we're part of the whole, and therefore our Soul is part of the Totality of Souls, which is The Creator. And therefore we understand, whatever we do in physical form, impacts on all other Souls in Creation. So, this was the first point that we come up with as a discussion point. To kind of help us to decide, how we need to operate in the future, as a Human race. And what points we need to discuss in the

Charter. So, we first have a look at division borders and physical difference. And, once we know our Soul is within us, and our Soul is Creator itself, and also part of the grand Creator of whole Unicos. We are therefore all inter-connected through our Souls and part of Totality. And so, there is no border between Souls. No physical border can divide us. No language and culture should come between us. And every other Soul, no matter its manifestation, is connected to us on this Planet and all of Creation. So every Soul in every Galaxy, universal dimension is part of and connected to our Soul and is beautiful. And all division is ultimately just the physical deception. When you understand that, it starts...it starts allowing you to understand how we need to operate, on this Planet and beyond. Because, now we understand we can't set limits on who we're going to eat or who we're going to kill. We can't set limits on who we're going to interact with or love or not love at all. It means we have to consider that every single things. In Totality, it's just another part of the Creator, which is us. And, so, that brings with it a fundamental understanding of how we need to operate. Because, if we hurt any other being, no matter what, we are hurting ourselves. And that starts a whole idea of we need to go with our Charter. And, I don't know if anybody would like to, come into the discussion on that one. And ... give us your insights that you might have. Okay, I'm going to carry on with our governance and hierarchy. Because this was something that I suppose, many people are thinking, How on Earth are we going to govern a society? Do you even call it 'governing' because we're not here to tell people what to do.... We're just here to help and so ...We have to look at ways that the society can operate. That is totally different now from what we are used to. And we've always had and it's quite a difficult thing come to, to understand how we need to operate as a society, because now we we've got to look closely at what Soul says. So, if we see the beauty of every Soul, and we celebrate its uniqueness, as contribution to the beauty of Creation,... It elevates all of us. And so, if we have a combination of dynamic individual uniqueness, if it, it enhances the Totality, and gives Creation its dynamic beauty. And Mary explained this in a very beautiful way. She was trying to describe set of colored lights, in a, in a beautiful ball, and all the colored lights are flashing, and together they make this beautiful... light display that we see, but as soon as you take one or two of the lights out of the equation, it changes the whole, the whole

light show, it doesn't look the same anymore. And this is why every little light of every little color, is important. And that is why Creation is so beautiful, because we are all so unique. And, we all can bring something to the table, it doesn't matter who we are, we all have unique qualities that are a Field-Strength that can help something else, or help someone else, or explain the beauty of something to somebody else, and in your unique way, you are important. And so, we have to make sure that everybody feels that they're taken care of, in their unique way they are happy. And, we also understand that we all can serve in our unique way. So we need to celebrate diversity and know that we're all unique expressions of Creator itself. And if our Souls carry Totality, we are all in essence the same, We're all however, each an expression of the Creator, carrying within us a combination of energies that make us unique. And this allows us to serve in a myriad of ways, to bring us closer to the Creator. So, with this understanding there's no place for hierarchy, or voting or terms of office, or any kind of previous methods we used to govern the Planet. And because we need to choose to serve in a way, that matches our needs and others, for as long as we choose to do so. And, in this way it'll allow us to all serve and give more, and to benefit Humanity and Totality. So, if I feel I have a unique talent, and I wish to be of service, that is the way we should happily want to serve. We can't squeeze people into a box and say, "You must do this and you must do that and so you must serve." That would never be the purpose. The purpose would be, "Allow everyone and their unique expression, to serve in whichever way they felt comfortable." And their Field-Strength will contribute to the whole Field-Strength of everything. And when they feel maybe that their Field-Strength doesn't match the spot that they're in at the moment anymore, they can move on, and do something else to serve. And that means yes, if you want to move on and do something else, you have the freedom to do that as well. And I, we see this as a way for Humanity to operate in the Councils from now on. And ... I don't know if any of you might want to work... think on that one and how, it means that your positioning, you position yourself where you're comfortable. As a reactor, as we've learned before and the Fields, you position yourself where...where you feel comfortable, and you accommodate all the others and the others accommodate you. And this is the best spot for you at the moment, and so that is where you can serve. I hope that makes sense to

people? And then we had a good discussion about mutual consent. And this was something we tossed about for quite a while, because, to create a positive outcome, for both Entities, there must be an agreement, on the interaction. So, mutual consent allows for Totality to benefit from all interaction. And there seems to need to be a matching of Fields, when we see that ... you need an attraction of matching Fields and then something seems to mesh and you can give and take very happily. So, where the Fields are not matching we can change our position and find a place where balance can be achieved. So, mutual consent needs to be the essence of how Humanity organizes and restores our beautiful Planet. And those who wish to serve will find ways to bring about harmony and balance, where all consent to the most beneficial cause of action. In this way Human society can operate from, from... one level through, sorry, through to Planet wide, and though it's necessary to have a level of maturity for this way of operating. Because it's quite difficult when you understand that we don't work like this yet, at the moment. We think we know better, we think we know how we need to restore the Planet. We think we know what is good for the animals and what is good for the Earth, and what are good for the plants and the trees.... I don't think so, I think we have to learn to ask them how they would like, to come back into balance. And not be arrogant enough to think that we know best, And it will be of great learning process for us to communicate with the plants and the animals. And the stones and the river sand whatever, the ecosystems, because this is also very important part I learned. I've learned a lot from the original people of Australia.... They lived in balance and harmony with nature, on this Continent for 40 thousand years before a white Man came. And, when the settlers arrived here, they took one look and they said," Oh, these wild Men they do nothing, they don't understand how anything works, they're not civilized," and promptly decimated everything around them.... But what they hadn't realized was that, the original people of this Continent, had connected on a Soul level, with all the creatures on this Continent. From the smallest... smallest animal, to the plants, to even the microbes. And they understand... understood how to manage the environment, in harmony with everything. So they every 5 years, would burn a certain patch of...of ... of land, because they understood that burning creates a regeneration for certain of the plants. But, only after a certain

amount of years, because then they wouldn't decimate any of the other vegetation around and only certain parts of the land. That would allow for regeneration. They understood how, the land was fragile, and so could not be cultivated on a heavy scale. Like we do in ...in Europe or anywhere else. So, they would create almost 'forest gardens', you could call them. And they would plant and nurture little seeds and dot them around the environment. And create their food forest, so that they knew, that all the vegetation was helping each other to survive in times of drought. These are all things that we can gain knowledge from people that have been in this position. And they could literally, as well, speak to the animals through their Souls. They would hunt by asking in dream-time the night before, for all the old and infirm creatures to come, so that those would be the ones that could be hunted.... So that they left the, the babies alone, and they'd call in the night. To the Souls. So, yes we understand now we shouldn't be eating any, any other creatures. But, this was a very balanced way to live. because they touched the Souls of all the creatures around them, and could live in harmony and balance with them. As they knew then how to do. And so, we need to learn how to do this. Yes, not eating any other creatures, be them animal, mineral or vegetable. but we can learn so much... about how we need to operate in this mutual consent and discussing ,and Soul to Soul with all of these other beings, how we need to operate on this Planet and beyond. And so those were just a few topics that we had brought up in our discussions about how to set up the Charter. And ... I'd Love for anybody else to maybe have a comment or a discussion on any of these points. I hope I brought up some, some discuss...discussion points for people Thanks, Rick.(RC) Oh, definitely. Thank you Lisa. For example Alex says, "Lisa, your depth of understanding is astounding, I love it."um, so thank you for that. And others in the Livestream have... similar ...comments there ...they're agreeing with your understanding is being a good way to explain things. Course it's not just you. It's the, the group work done, these ...(LM) Yes, unfortunately they weren't hereto share today, but ... they all, we all worked on this together.(RC) Uh-hm(LM) as a kind of a preamble to the Charter. So that people have a deeper understanding once we start working on the Charter, which are going to be quite short,... sharp, to the point,ways of operating.(RC) Okay. Is there somebody else who'd like to say something about

that? Let me see. I see Pia has come into the panelists, for example.(PL) Yes, hello. It's ...it's Pia from Denmark.... I would like to say thank you to you, Lisa for those really good words there. And I just want to add a little ...I'm so inspired to ...when you pick up the word 'balance 'Because, this is ...what I was thinking about... during all the speaks I've heard today that ...what we are looking for, and what we all are working with is ...trying to get closer to the balance. And ... it's not always easy, but it's like ...like Mr. Keshe he also ...talked a lot about. ...When the Planets are working naturally our Universe, and ...our Solar System. They need to find balance and, otherwise they cannot work. They cannot be there in the, in the right position. And they cannot hold, hold it, everything together. So ... it's like the nature, over and over again and ...it's just like we need to ...though nobody can tell us what we need to do, but it's just an awareness just to look, maybe more into the word 'balance', and...and listen to the nature around us to see, how do they found balance. How do they... the Fields work? You know, they have to position themselves to find balance. And if they cannot find balance there, they ...reposition themselves. And ...it's like they're probably putting much attention if we look in the worldwide scale in all the discussions about Peace and about everything ...we need to do to, to get a more safe World and more beautiful World to live in. It's like we have not heard much about the word 'balance'. But em ...if we cannot find the balance somewhere in our own system, it can be difficult to find the balance on the others So, it's like I, I have a feeling we need to go to look to more or start with ourselves always. to do more to ...How can we find this balance so we can... touch other people, and help other people? And this is ...always the question. And I just want to stick some words into it, you know, you know, we all know the importance of listening for example.... to find balance in our communication.... if we, we ever have to, will find balance we need to do specific things with ourself to find it. And ... to be aware where we can look at, where it's not working. And, very often we see in conflicts the problem can very often be, maybe not listening to each other, not listening enough. and knows, know when you have to step forward and maybe sometimes know when to step back, and just listening. And this is something, maybe to be aware of, if it could be an inspiration. And ...This is a way to create balance, actually. It's like when you are, your singing in a very big choir. We all have each voice. And it's really good

we have each separate voice. It's really strong, and we come from very different places in the World. When we are going together and we are, if we are having, if we will make a good voice, good sound, we need to blend, with our voices so it will be a blend. But it doesn't mean that we don't have our (individuality) what you call it, yourself. We are still strong in our own language. We're still strong in our culture and, but what we do, we are just blending. That's all. And we're listening more to each other And then we'll be stronger. So, that was just a little input to what you saying. And that's all for now. Thank you very much.(LM) Thank you.(RC) Thank you, Pia. Okay, ...Got Erick coming in here. If you'd like to say something, apparently? Lisa do you have a ... more ...(LM) No, Rick. That.. that was...that was it for today.(RC) Okay, well we can keep that up as a...something to share on the screen till we have some(LM) If you'd like to...otherwise just tell me and I can you share.(RC) Okay. Thank you. Erick, did you have something you wanted to say?(EK) Yes, Erick from Denmark.... Now we are talking about balance. And we talk also about government and control. And what I find is not okay, and not in balance this that here in the Western World, the banking system is crumbling. The banking system has harvested so much money out of our societies that it almost cannot function anymore. That is why we have the interest rates very, very close to zero.... When we look at the... the African Continent, it is totally different. If... if I want to transfer money to Norway, to Germany, to England, to France,... and a lot of other countries. I can do this without any effort. It's so easy. You just go into your PC, and use your net banking program and you transfer money. Very easy. But, when we look at the African Continent is something else, because the African countries are not included in the countries I can transfer money to and this is very bad. It has a lot of implications. One of them is that if's, if investors want to put money into Africa, invest in Africa, it is very difficult for them or has been, because they are, they are a little loophole in a bank in African that enables you to transfer money in two days and that is very, very, good But, what is not so good is that very few know about this and ...it is like a closed society, Africa, banking wise. If it was not, then it would be impossible to have interest rates of 17% 10% in Africa and here in Denmark we have ...below 1% in interest rate. This is very bad, because this is a very big load on society that the banks they harvest this so much money and they create the money out of

nothing. There's only three countries in this World that has control over their money. The rest is unfortunately still done by the Rothschilds and they take our money and this is very bad. There's a lot of initiatives to stop it, but it has not been stopped yet. But, hopefully we will see in the coming month that this system will end. And there's also this... Mr. Keshe has a very large capacity of analyzing everything and he has announced his own banking system and I think this will open up Africa. If the, the other don't do it and ...this is needed, because as I say have said more than once "Africa is a continent that has been robbed for centuries "and it's still going on. A friend told me about ...I don't know which country it was but they had a lot of Gold and nothing else is mostly sand. And the American soldier they come and work there and ... harvest Gold. And I saw a picture of a container half filled with Gold and two soldiers sitting laughing upon the Gold. They steal what belongs to Africa. This is bad and this must end. So I think in the future, because Mr. Keshe put his development center in Ghana. We are at the beginning of another way the World is organized. Because, as long as the network of the existing power structures in place in Denmark and other countries. As long as we haven't ripped up all the pedophile rings in the power structure. You have to understand if we hypothetical ...hypothetically assume that you wanted to go into the top level of Hell's Angels in order to get up to the top level of that organization you need to kill somebody or do something else very bad, so they have something on you. Because, if you don't stick to the order and the rules of that organization they can easily hand you out to the police and you are no problem anymore. When you con... consider our political system the politicians and now maybe I'm a little bit rough here, but in my view it's not the brightest people that get politicians. It's so often so, that the people who deserve to have power are not the one desiring to, to get the power. It's another type of people. And ... they ... they work inside the control structure called 'political parties'. And political parties is actually a very anti-democratic institution because it's top level controlled. So, if you join a political party in the Western World if you are not willing to do everything to get to the top you have no chance of getting any influence in that party, nothing. And if you are willing to do anything then you will be promoted, then you will get to the upper level. You will be accepted in Bilderberg group and in Tri-lateral Commission and you are told to do ... what you

are told, what you have to do you are told everything and then you will be rewarded in some way that unfortunately not see the day of light now, but ... hopefully will see the day of light in the coming time. And this political structure, is controlled the same way as Hell's Angels, in principle. When the political system has ... the illusion of a democracy they have ... elections and we elect the very few that is willing to do anything they get to the top of the structure. They win the election because they have all the mass media behind them that's why they got to the top and then they celebrate the election. At these celebrations there will be a lot of girls and depending upon the country, more or less worse, there will be a lot of girls, lot of liquor, lot of drugs and lot of video cameras. And I cannot say this is a case every time but many, many cases when you hear about a political... sex scandal of a politician. In my view that is a politician with a bit of conscience left. He has, he has refused to obey an order and they did than they just expose some of the material from the election they...the videos or whatever material they have and he is done as politician. Then he gets replaced with one that is willing to do everything. This is the way our society is controlled. And the controllers Bilderberg group and Tri-lateral Commission that is organizations, made by the big banks. So where the big bank want to rob a country they change the laws so that the, the inside in the decisions, in the political system gets removed we are not allowed to know what, what ... they discuss, the politicians, even though they call it a democracy. That has happened in Denmark. And then the biggest entity say, in ... the...company in Denmark has been sold to Goldman Sachs, one of the biggest banks in the World, one of the most greedy banks in the World. They even say on their homepage that they don't deal in win-win situation."We always win", they say. And they did it in Denmark. They got 19% of the CS in this company. They got ... they got the right with 19% of the CS to decide who is the chairman of the board and they even got some rules that is was impossible for them to lose money on this investment. If they lose money the Danish tax payers has, has to compensate. This is just an example for my country and I'm sure if we began digging in other countries we find similar stories and especially in Africa where they are keep, kept in such a tight grip, everyone. I say this, this is less nice information than much of the more Humans stuff, but ... I think is, this is apart we need to focus on also. How to stop this in a nice way because ... fast and violent

changes is not what I desire, we have to do it in a way, so nobody gets hurt. But we need to change this. I think that was what are my view on balance, it's, there's a lot of other things to say, and a lot of other things has been covered, but the control system and the money system is bad, and we need to do something about it. Thank you for listening.(RC) Okay, thank you Erick. Okay, is there someone else?(MR) ... This is Mosfeq, and I want to talk a little bit in a slightly different way, about what Erik just talked about. Long ago the same people instigated the British invasion in India. Yeah, it caused a lot of damage and we are still affected by it. But in spite of all that, there was a Unifying element, as I talked earlier. So, given the situation, things we can do as Council, as individuals, anywhere in the World, is to use a stronger position, a higher strength of the Field, the Soul level, to elevate these people, so that they serve the, our condition, which is Peace. In, in that we Unify them for our cause. In case of the British invasion in India, it took two hundred and fifty years or so, by people, very few people, who were responsible for this action of Unifying. But in this case, we have the Councils, we have the people. We can accelerate with this strong field, this process, so that we achieve Peace. These people they pander to the lower level strength, of physical fear and other things, we all know about those. But, if we engage together, it shouldn't take very long at all. And signing of the Peace Treaty of One Nation, One Planet and One Race, is a mark on the ground, for this coming down of this facade. Thank you very much.(RC) Okay, thank you. Any more of our panelists have something to say? Michelle said, "Brilliant presentation Erik, thank you." Okay, I've got one attendee with their hand up, that perhaps we can bring in. Lucas, I'll promote you to a panelist, then you'll have an opportunity to speak. You could say who you are, and what your question is or comment? Hello Lucas?(LV) Yes, hello, can you hear me?(RC) Yes, hello!(LV) Yes, hello. Hello everybody.... My name is Lucas from Vienna, and I'd like to make some comments maybe, which are coming out of following the last Soul teachings, the Universal Council, the Earth Council, and my feeling and my questions in this regard, How or can we, when we make a wish, that we can bring everybody, with the Field-Strength of the Universal Council, or everybody who is involved to a higher level or to a stronger level? There is a very easy technique actually, how you bring yourself in the now. And ... this is basically where you, when you take your index

fingers, and put them maybe on the table before, you feel your left finger how it feels on the table, and the right finger, how it feels on the table, and then both together. Then the brain, which is actually always bringing us out of the now,... can ... is a little bit busy with the two fingers feeling on the table, or the knees or whatever, and then you can,... then you are in the state of now. then you will, you're stronger to your Soul and closer to your Soul. And if, this is maybe what you can try, or I can add, if all the Universal members, the Earth members, are doing this when there is a special wish, together they can create out of the now, a much bigger or let's say a bigger Field, or a higher Field, that it's, they can be attached to the others. This was my idea, that I wanted to share.(RC) Okay, thank you. That's an interesting technique, and people can try that one I guess.(ME) We could share harmony.(LV) If everybody does this now? Let's see what it does!(RC) Okay. If everybody is brought into the now, with this technique as you say,... then what Lucas?(LV) Sorry?(RC) Now that you've brought everybody into the moment, at this moment, then what?(LV) Then what?...Then if you're in this feeling,... you can let this, the whole thing go, and then in the Gravitational Magnetic Field, the Field itself can manifest itself, in the absolutely appropriate way. And the interesting thing what I experience, for many years now, and I also get out of the now very often, because of the Fields outside, but the more you practice this, and the more you are in the now, the things are manifest, manifesting themselves,... in the right way, the, let's say in the more total way, or more the Totality how I understand it, or let's say I have an understanding of that.(RC) Okay. Is there any other comments about that? In particular? Did, did anyone try the exercise with any success?(ME) Oh sure, I felt like everyone was sharing harmony, peace, bliss etc.(LV) Then the interesting thing is that, if you're in the now, you, there is no space for fear, or threats, or wrong doing, because you, you are basically in this very close to your Soul.(RC) Okay, good point.(LV) So, I know it sounds funny, but it's very interesting. If you experience that, experiencing it.(RC) Yes and that's a good exercise in the sense that we...bypass the brain, the busy brain that's gets in the way of being in the moment.(LV) Yeah.(RC) Okay, but we need to move forward, besides the moment, in order to have less dead air-time, otherwise we'll sit here in silence, in the moment. Not too much will necessarily happen. This is one of the problems with being totally in the moment. Then you go to flow with

the environment, but if everyone's in the moment, there is not much flow going on.(LV) You, you leave it to the Field then afterwards. Then you...(RC) Pardon me, leave it to...(LV) Leave it to the Fields, to, to make it perfectly, because the, the thought we have, they are still thoughts from wherever they come from. and not... a lot of them, are not hundred percent close to the Soul. So how do you know if it's right or wrong? You leave it and then you, the more you operate close to the Soul, in this state of mind, it comes, comes out of yourself, much easier. The more appropriate things we have, or more balanced Fields.(RC) ... Okay. That's a good point. Okay, any other, any other comments? God, God, give me some feedback. Okay, is it working now? Yes.(ME) Rick's always in the now. Being the moderator.(RC) I wouldn't say that.(ME) Being the moderator of a live show.(RC) Well, it puts you on the spot, that's for sure and there's not lot of... personal time, let's put in that way. Okay, is there any more from the Earth Council or Universal Council, members or others who'd like to make a comment, at this time? And... do we have Carolina here yet, is she? Well, I don't see her on the list, actually. Okay, there's ... maybe some comments I can read from the Livestream? Get my ... glasses on there you go.... BJ mentions it's important now, not to dwell on negative thoughts, there'll be new forms of governments and banking very soon. And Swetha mentions, "Here in India pedophilia is so much easy to get, in the name of religion. These pendants and Gurus are worshiped here, even many know about them. Flowers and fruits and golden chair, for the pedophiles in India. And BJ mentions Mr. T. Mr. T? maybe she means Mr. Keshe,... is eliminating the pedophiles, and it is happening in most countries now, they are being found and arrested. Not sure BJ, if you meant Mr. T or Mr. K? Okay

Swetha mentions, "where I live I am surrounded by families, each following a Guru, or they are their family Guru, and the family members, don't... don't hesitate to give time to that, oh they, they don't give time to that Guru to be alone with their children."So ...Anyway, there seems to be abuse through religions is the concept there. And BJ, the last comment is ... about Being in the now and mentions, "taking a breath before speaking, and allowing source to give guidance on the next words or action."And Jay McDougal says in the chat, "I took my kids to McDonalds yesterday. All the staff's been taken away and replace with TV screens, now you place your own order and take a ticket, then wait for it to

arrive. So, in the long runs, McDonalds make a lot more money. But still the prices go up. Probably wrong eating a thousand chicken, etc, in the first place, but as things progress, they don't seem to get better, just more greed." Well that's a good point in terms of the automation, is actually making a huge difference, in the next few years, the artificial intelligence, and the ability for machines to do the work of Humans, we have automated cars and we see new self-driving electric trucks, semi trucks that have come out in the last week or two, introduced by one of the major manufactures, and also the Tesla car company is having a semi truck, electric truck, self-driving, coming out in the next few weeks, it'll be announced. Depends, what happens there is the reason I mention that is, those jobs like in developed countries, and most undeveloped countries, one of the main jobs that pay people, the most popular job in Canada for example, is truck driver, and if those truck driving jobs are taken away, and if the other jobs, such as the McDonalds, where I read recently, they're raising the minimum wage, in the area, where I'm at in Canada. And what's going to happen,...they automatically... is places like McDonalds, will be letting people go, and installing these automated machines, that take over, because there's a break-even point where your Human slave labor. is cheaper than the machines, and if the machines become cheaper. It's a no-brainer for these companies to switch over. If they can get away with it, it's part of what they do. So, we're have a lot of people without the jobs, that have been the main stay for people, you know, these McDonalds type jobs they've been entry level jobs for young people, specially to get... you know, get going in the job market as such, and ...get extra money for summer or whatever... whatever it is. And, if those are taken away, then we have more unemployment in that way. So, that's actually a big opportunity in a way, for other ... Plasma Technologies, to ... become more important and ... sort of get a foot in the door, so that these people that... may now have a necessity for that information, for that knowledge, for these devices, and for the health benefits, and the feeding benefits and so on and so forth. When they lose their jobs and they're looking for something else, it may be that that's one of the backup plans that will be helpful for them. As, as well as the replacement of the money system, with the different way of...of supporting people, and having them support themselves and whatnot. So, these kind of things seem to be in the pipeline and

ready, ready to ... pipeline so to speak, speaking of pipelines they're in...not in good shape right now, the... the...Houston is pipeline central of the world, in terms of refining of oil, especially for United States, but also for international companies, and one third of, or more, of the production of the US has been taken out, because of the storm, and it looks like more might be taken out as well. And, ... there's also possibilities of other issues popping up that we have to be, watching out for in that area. There's the chemical plant I just read about, in the last couple of hours, that they expect, and know and totally are waiting for this entire chemical plant, large chemical plant to blow up, in Southern US. And they've evacuated within two and a half kilometers of this... kilometer radius. of this, oh it's a five miles, or five kilometers, sorry ... circle, around this, this factory that produces Peroxide, and they totally expect it to, to explode in a big way, like a very, very large gasoline fire they said. So, this is the kind of thing that's happening on the Planet, but at the same time, all these urgent situations, also have a Silver lining within them, because as we were discussing in the last workshop, the ... the disaster in the Houston area, in the Southern US and along the coast from the Hurricane Harvey, actually is bringing people together, and forming ... you know, at least minor bonds if not major ones, with total strangers, that had never met before the storm, and suddenly they are helping each other, lending boats and lending their vehicles, and trying to get help in and food supplies, and shelter and so on. And, neighbors have to help people that they haven't met before, or didn't... wouldn't normally have anything to do with perhaps. But, yet they're getting along and we even see animals that are getting along with Humans that wouldn't normally be and, even ... perhaps even a few alligators, climbing into peoples homes, and whatnot, but the authorities say, "Just leave them alone, and they'll go away when the water goes back down." So ... it's surprising actually, how...what a small loss of life there is so far, during this major storm, compared to what it could be, if people were not more helpful for each other, and more understanding. So, it's, it's a good sign that we do see this cooperation, rather than... you know, rather than adding to the, to the catastrophe, and the... adding to the stress of the situation. There's, there's many people helping out in order to alleviate that. So... it's good to see there, Human beings helping each other, I think that's an indication of... a...you know, that's

what, that's what...higher life forms do, they either leave things alone or help when it's urgent, and it's you know, part of your environment, to... to help where you can, It's ... sharing and ... a sense of giving of one's own energies, one's own Plasma to the other...Plasma's out there. Normally, we talked about bubbles the other day, and normally we are all in our own little bubble and we go about our business, and we interact with other bubbles and bump into them at work, and bump into them when we're shopping, and bump into them ... as friends and...Sometimes, we open up our bubbles, to include other bubbles, in a more intimate basis and so on, but basically, we're in our own bubbles. But, extreme circumstances of stress and ... especially loss, when people have lost everything they own, and all they have is the wet clothe son their back essentially and...and they.... you know, a temporary shelter to hopefully hang out in, if not their roof on their demolished house. They have a different attitude at that point, about who is a friend and who is their foe? And, ... whether someone's skin color, really makes the difference, or whether their religion has anything to do, whether their... you know, part of a boat that's coming to rescue them or whatever. That's probably one of the last things that they have in their minds at that time, and I've seen such expressions of gratitude and ...You know, ... people that were...had just lost everything they own, but they're just so happy to be rescued, and there, you know there is one example, for example in, in ... the Houston area, I believe it was in... just yesterday. It was an old folks home that was flooded, up to about chest level water, or waist level, and these people and the odd one where in their wheelchairs, up to their waists in wheelchairs ...old folks, up to their waist in wheelchair, in this sludgy looking, pretty awful looking water, with things floating around and whatnot, and there was about a dozen of them, and they were waiting for rescue, and had a picture of them. It was a pretty desperate situation, and they did get rescued, and the after picture was..the all except one, and it might, maybe she wasn't capable of swimming, but all of these dozen people had a big smiles on their face, they were so happy, they were in this you know, temporary shelter, but they had dry clothes, they... they had been saved, they, they were you know...Here they are, in an old folks home, near the end of their lives anyway, and yet, they got through this circumstance, and they were smiling like they're, their Soul was coming through, their essence was coming through,

they were full of gratitude, they weren't full of resentment, or you know, anger with the situation, or, or despair. They were happy, that they were together, they were, they made it through as a group, and it was a big thing. So, my point is that even under this really severe circumstances, and in fact, especially under this kind of ...you know, disturbing circumstances for there's total loss. There is... it's a... a catalyst, as Doug puts in the chat, it's a catalyst for change, it's a catalyst. this... these events are a catalyst for change. And, if you think about it on the grand scale with that event in the Southern US. This huge storm, that they say, is one in eight hundred or one in one thousand year storm. That it's made a huge change and will continue to make a huge change, for years to come, especially now that people, they have this thing in mind, of climate change, and, Man-made climate change especially, and if Man if it's... if it's true, I'm not saying it is, but if it's true that fuel, the burning of fuels is a big part of our Man-made climate change, which has produced this storm, which has hit most severely in the oil producing or oil shipping. As the greatest energy center of the World essentially, so it's this... this freak storm has hit at a very core center of the energy industry and of the Space industry. The Johnson Space Center has been taken offline in the last few days. So, some of the weather reports of the area, have been taken offline, because they can't access the feed, from the Johnson Space Center, from the satellites and ta ta ta tamed all of a sudden the weather channel is missing some of its...information for the storm movement and whatnot. So... not to mention there's nuclear reactors... reactor....nuclear reactor facilities, that are also involved and so on. So, a lot of things going on, but at the same time, we have this opening up of people's Souls, they're become more unveiled under these circumstances. Because, normally we're so busy, going around, doing our thing, all the little details of life, and all the distractions that we don't open up to each other, as much as we would under a stressful situation like that. Okay, that's what I wanted to say about that, I didn't mean to go on quite so long but, so be it. Who else, where we have...we have a couple of attendees. Alex, I'll promote you to a panelist, so we see what you would like to say.(YM) Hello Rick.(RC) Oh hello Paul. Do you want to say something?(PY) Yeah. I have something to add. Yes, I have something to add more. And when we see the structure of the World going on now, their power is essentially in two points, technology and manipulation of

intelligence of people. In somebody, there is these two points, on which they play with us. There is no power without technology. And when you see, when they go to negotiate they put in front of them, their technology. And this technology show that, they are the most advantage, or the most intelligent people than us. And from there on, they manipulate us, also know that, we don't have this capacity and this ability, to develop this kind of technology. So, manipulate technology is the essential point of the power of this material world, going on. Now, by Plasma Technology, we have also technology to play with them. We have now technology to get back our freedom. And, we are now open in intelligent way and we have now our intelligence back, that they cannot manipulate about what is going on. So, I want to invite us, to now go on development of this technology. No one will come and do it for us. They manipulate us because of their technology. We have to get alternative technology to be able to let the technology out, and then use our technology to be free. Otherwise, then will not freedom come back to us, if we didn't develop the practical tool, as technology, to serve us. So, we have now our intelligence back, we are now open about what they are doing, when they want to play with our intelligence, we have to say to them directly, that we know what they are doing, and we have to let them also know that, we have also technology, so they have to stop play with us. And, it is essential, when you see for example...Rick have mentioned about for example, banking system for Africa. You can send from Africa to the rest of the World, any amount of money you want, but impossible to receive any single money. If you are not going to make a different formality...that they know, that...this money will not serve you. They control everything. I am so irritate. For example, when I see PayPal, from Africa any cannot receive money. Except from Kenya and some two country. You cannot use PayPal to receive any money. No one can pay you by PayPal. But you can send by PayPal from Africa, any amount of money you want. And when you go back from the, what you call, the, the transferring money system from bank. There is so limitation, so limitation, that it is impossible that Africa develop. It is impossible that the Third World develop himself. That's because of technology. That's they have build it some technology, and they use this technology to control us. Now we need alternative, we need now for that technology, to replace their technology, and then we get back our freedom. There is the, there is a, there is

the only way that to get this freedom backbit will not going to be easy. Because it will not being to go that, we just say and it's done. We have to work so hard to build this World We have to sacrifice ourselves from now, to free the next generation. And, it is not the problem of one year, two years, five years, ten years. It's going to take time, because we need to develop this technology. So, we have to sacrifice ourselves, to free the next generation. Don't think about us, we already lose. And this is not also lose, it is just experience, to understand one kind of evolution of man, the rubbish of man. Now we have to freedom Humanity. They use essentially technology and manipulation of our intelligence. We have to stop this. If everyone use Plasma Technology to get his health back, we already paralyze the pharmaceutical system. They cannot do nothing. If we use this Plasma Technology, to feed, to go our... what you call, our foods, we take back our freedom, from all the rubbish they put in the food system for us. And now the ... energy part is there. They cannot do nothing. So, we have now the practical tool, but we need hard work. Hard work, to bring this freedom backbit is not easy, it is not pop-corn. We need really, really sacrifice. We need really hard work.(RC) Hello Paul, you are still there, Hello?(PY) Thank you.(RC) Think we lost maybe the...(PY) Hello?(RC) Did we lose the last sentence perhaps.(PY) Please?(RC) Did you... I think we might have lost the last sentence or two that you said.(PY) Yeah, I, I said that I invite all of us, to start now to develop this technology, according to the need from his environment, to freedom, or to give freedom to heal environment, to heal society. This is the way we can put them out of our control. We need... to develop practical tool for every type of needs, in our society. So, we have everything we now on, and One Planet, One Race, One Nation, give us cooperation and collaboration, to get any type of knowledge, to be able to make this in operation. If you are limited, this was what I was saying. If you are limited because you don't have knowledge, at the table of One Planet, there is no limited. You just ask someone, I have this problem, how to solve this, you will get the answer, and then you freedom yourself, you freedom your society, you freedom the rest of your society. There is no borders, there is no limits. You are not limited. And you are not limited in intelligence, you are not limited in the technology. You just need to put yourself in work. This is what we have to do from now, to get this freedom back. Thank you.(EK) I would like to add something to

Paul's comments. It's okay?(RC) Sure, go ahead Erick.(EK) Yes. We had the teaching Tuesday, and even though it was said very shortly, and Mr. Keshe mentioned about the heating system. And he was also a bit tired in his voice, and I understand him. because when I presented some of this, I was expecting to see a lot of discussions about it, in... in the class chat, and I will not say I've seen everything, but I think in the English class chat that I was almost nothing, if nothing. In the German, there was some talk about it. Not much but ... some discussed it. And now we are back to the social engineering. Because, we have been programmed to think this way. If you desire something, a product of some kind, then you borrow money and you get it immediately, and after that you are slave to the bank. This is how we are programmed. I want to stress that with the Keshe Technology it's the opposite. You have to work first and then you get it. And afterwards you are not a slave. Two opposites, think about it. We are so used to just buying, and then paying interest of the money we borrowed to get something immediately. But consider, the warming in your house where you live. A lot of people live in a place, where it's very cold in the winter. And if they don't do anything about it, they will freeze to death. The worst places. Then think about how much hours do you have to go to work, in order to pay for heating your house. And I will say, depending on who you are, you will have to work between one hour, and two to three months of income to heat your house. Depending on who you are, if you are the top level of society, with these hilarious wages with millions a year, then you don't have to work much for it and you don't care because you have enough money. But, at the lower end of society, where not lower mentally, but lower income wise, you have to work a lot, to get heat in your house. So, if you are one of the guys, that have to work maybe one or two months, to pay the heat in your house, after all the taxes has been drawn. Then think about it, if you join a workshop, and you learn how to make a MaGrav, and you learn to make the few, the basic four GANSes, then you have what you need, to heat your house. You can just listen to the latest testimonials, there you get all the information you need to do it. And even if you join some friends, one take care of the GANSes, and one take care of learning how to make the MaGrav, or even maybe join a workshop where you get a MaGrav home from the workshop. Be a bit smart, then you create an investment for the rest of your life. And not

having to work maybe one or two months, in order to heat your house. Isn't that freedom in a way? You release a lot of time, that you can use for your own purpose. Maybe use it for learning how to reduce your food bills to a minimum, because you learn to how to live partly from the fields, and just a little bit food, to keep your stomach working. And when you do the other things I mentioned, you have light, electricity and you have heat in the house. Two big steps, you also get the GANSes. You could use some of this time. You don't have to work in order to, to heat the house, you could use this, to learn a little bit about the medicine. You can in a very, very basic way, improve your life if you are in pain, or suffer from something. Because there is a lot of recipes on how to mix GANS, the liquids to drink or to put in patches, or whatever, in order to improve your health. Then you don't have to pay a lot of money for the medicine. But again, you have to be aware of the social engineering. You have to free your mind of the programming. You have to understand, that in order to get your freedom, you have to work like Paul said. Maybe not so hard in order to help just yourself, but maybe a bit harder if you want to help others also. And you should do. The worst thing about the health system is, that we have seen so many bad things, they add poisons to the vaccines, for example. I have read that vaccines are designed to lower the IQ of a child with twelve. We have a... a... an autistic son herewith some limited abilities mentally, and we have seen, he was not born an autistic, but he became an autistic right after vaccination. And now we have used some of the things we have been taught here in Keshe Foundation, and he is improving. I expect him to be almost regenerated within a year. That will be fantastic. Because that is another control mechanism. Many years ago, one child in one hundred thousand, was an autistic. But then they made the vaccination program, and the latest number I have seen, is that one child in forty-eight, in USA, is an autistic. What about if we come to one to ten? Then, the whole society could do nothing, but take care of the autisms. It is another control mechanism. You have to understand this. And ... I can only very strongly advise anyone of you, to avoid vaccines whenever possible, because it's bad for you. Go to the net, study, educate yourself, because freedom is not for free. Freedom has a price. You have to fight for it. And one of the most important things you can do for yourself, and friends, and family and the whole society, is to educate yourself. This is what Mr. Keshe has-been doing for

many years now, but it's, it's a hard work, because we are so programmed, we want the joy first and then we have to pay the bills afterwards. We have to change this way of thinking. That was my comments, thank you.(RC) Okay, thank you Erick. Okay, ... any other comments from our panelists?(A) Rick may I step forward?(RC) Sure Alex, yes. I meant to bring you in there.(A) Yes, thank you very much. My name is Alex and I'm from Canada. My God, this is tough act to follow, the comments today, have been absolutely outstanding.... I think the point that you brought up, with the people in Houston, how they're coming together is ... classic...classic point that shows the ... spirit of the Humanity. And it shows the true spirit of Humanity, so that clap, brings us to the question, of, you know, why, why are things the way they are? And you know, if the true spirit of Humanity was so...the, what we are having right now, in our ... in our whole Planet actually, is not in the sync with that. So, what I'm... what I'm saying is that this it's taken a disaster, like in Houston, to, to bring people together, and yet, and so... so that is the basic spirit. That is the basic spirit that is the foundation ... of our Humanity. Why... why is that absent in, in the rest of our times? And you know, is, is, is that ... unique to Houston? And the... the previous week we had the disaster in China, with over two hundred people dying I... I believe. There are disasters all around the World, and some we give more attention to and others less, but the point of the matter is, that they all, all of these disasters bring out the best qualities in... in the humanity. So the question I am putting forward is, you know, "Why are we having what we have?"And... and the second point that I'd like to ask about is, is, " We deserve what we get?"And so, when we take those two things into consideration,... adding to what Erik and absolutely what, what Paul said, this is, is magnificent, you know, we, we do have to work hard, but we also have to work smart, and one of the things we have understand, is, "How smart we really are?"And, I think what has happened in our history, we've talked about history today, is ... when I was younger, I actually asked the history teacher, you know, so like why, why are we learning this type of history? And, I was hoping for a really good answer to that and it actually was, "Well that's just the way we do it."... That was not an adequate answer, but I remember that answer vividly, because it was inadequate. And now I find out that, you know, the real reason that we want to learn about history, is because we want to learn about the truth. And when we

learn about the truth, then we learn about the deception, and when we learn about the deception, then we get angry. And I think that's where we're at. And the point of the matter is, is that all the participants here today, have an inspiration enough to show up. Now this is a twenty-four hour meeting, you know, for, for...for us it's in the dead of the night, and for others is in the Sun of the afternoon. So, everyone has made a strong commitment to be here. Because it's important. And, and why, why is it that important? Because we have a lacking. And, and where is that lacking come from? And so if, if we deserve what we get, and then we are lacking in understanding, of what we're getting. And where does this lack of understanding come from? So, we see that the people who are controlling this Planet, are quite happy to be controlling this Planet. And they are failing to understand the one important thing, which the people in Houston are learning right now. And that is that, the basic, fundamentals of the Human spirit, is to help others. And the reason for that, it's not money, it's not money. Those people who had come in from Louisiana, and I've seen them broadcast on... on the TV, so that's what I'm going by, and I said, "You know we were in Louisiana, and we've seen the results and we were not satisfied with the results, so we want to be proactive and we went to Houston, and we became proactive, and so we were, we brought our boats, and we're floating around looking for people who were waving white towels and need... need help and we'd bring them off the roof, and bring them to safety, and you see how happy they are even despite the fact that they've lost their possessions. Which bring me to the next two points. They did this without a financial reward. Yeah, they did it for free. It's not for free. The reason is, is because they are reward that they got for doing what they're doing is Soul edifying, it's Soul edifying. They feel good doing it. And when they leave, you know, money comes and money goes, but when they leave, they will know that what they did was Soul edifying. When we look at the force of action of the Keshe Foundation, one of the most important things, is the health aspect of it. There are other fields of interest, but the health aspects of it is always coming to the foreground. And the reason for it, is because when you lose your health you lose everything. So, those people who in Houston, who'd lost all their possessions, managed to save their lives and, their health goes with their life, obviously. So, the... the point is that when we lose our health we lose everything. So, conversely

when we get our health back we gain everything. If we lose our health we lose everything, if we gain our health then the opposite must be True, then we gain everything. And if we have everything that we need when we have our health, then we really don't need money. But as Paul said so eloquently, you stole my thunder."Freedom, we need our freedom."This whole exercise is about the freedom and emancipation of Humanity. And the reason for that freedom, is because we have a lack of understanding of who we really are. And so the people that control us play by the same rules and they don't understand who they are, that's the problem. They don't understand who they are. You can not hurt someone without hurting yourselves. So, the rescuers in, in, in Houston have realized that by helping someone, they help themselves. And the people who control this Planet realize that by hurting someone they hurt themselves. And in order to satisfy themselves, they have to continue hurting. So, if it now falls on our shoulders, that we have to elevate their Souls, then why are they in charge? And the reason that they are in charge is because we've abdicated our responsibility. And this is exactly what Lisa has been talking about. You know, we have a...we have a responsibility. And when you look the numbers of people who are participating in this, at this point in time we are not taking our responsibilities serious enough. People over here are very serious, but this is far more serious than what it's representative. I... I know that there's millions of people who are listening to this and they're all taking it very, very seriously because what we know is that we don't know a lot and the more we know the more we find out whether we don't know. In history, it's taught us that, but what we do know with certainty is that what we know now and what doing now is not working and it needs to be fixed. So, why is it not fixed? Because, it's our responsibility to do that. So, how is it our responsibility when we are not in control? Well, the reason for it is because we have been brainwashed into believing that we are inadequate. We've been brainwashed into believing we cannot do it, but I think, clearly now that we've seen the that we can do it. And so, so what has happened through this whole exercise is that we realize that there are other technologies and, you know, we have an educational system that is well entrenched, well entrenched, thousands of years going back. And this educational system has let us down into believing and understanding that we only have a Matter-State

capability and is completely ignoring that we have a Plasma-State capability which is totally different, orders of magnitude far stronger than what we have. And so we've wasted our time really, exploring the outer reaches of Matter-State and as soon as we come to the point where we're able to go into the next level, we are either ridiculed, suppressed or ignored, in some way, some form. And... and denied access to it. And one of the ways they deny access to it is history, money. So, you know we have technology, technological advancements out there that are always chasing money. And there's always money out there looking for advanced technology. I can never understand ... well in the environment that I was brought up, you know, we'd...we'd try and excel. You know I was involved in sports and then when you're involved in sports you want to win. So, I could not understand that money was seeking technology to suppress that technology. To suppress it through patents and whatnot that would lock it up for twenty two years and deny access to the population for it. I mean, we were all having flat-screen TV's. Right now when I remember when I was sixteen, which is fifty years ago the announcement of flat-screen TV's. Fifty years ago, holy cowhand then I looked at the advance of the cell phone, back in the 1890's,1890's Tesla invented the cellphone and we're so enamored with our little touch screen cell phones right now. Which really, really they are using to control us. So... so what we have to realize, that we have greater capability and in order for us to fulfill our Soul objective, I'm talking SOUL, Soul objective and to satisfy ourselves and we have to step forward. We have to realize that there is more and we have to realize that it is not satisfying to be satisfied with what we have. It is more satisfying to seek. And that's why this is called the 'Knowledge Seekers Workshop 'It's not the Knowledge Hiders Workshop, it's not the Knowledge Suppressors Workshop, is the Knowledge Seekers Workshop, because what you realize is that, in order for us to graduate to the next level, you have to have a basis of knowledge, our educational system really is based on that and that part is... is kind of True. You have to Graduate, as you build you, you start with the foundation, you build on it and when you get to the roof, there's no point worrying about the roof if you don't have the foundations. So, the basic knowledge has to be there in order to have that knowledge you have to know that there is knowledge to seek. And so the Plasma Technology is not recognized by science but on April the 18th,the

University of Tokyo findings showed that not only is the GANS not toxic, but that Cancer can be eradicated in 3 weeks, "Oh my God! Really?" And what do I hear? What do I hear?" Oh the poor doctors, they will not be earning their 340,000 dollars "which is the average cost of health care in Canada. Forget about the poor guy who's paying for it. The poor doctors. These doctors have the same () as we do, they're humans and they want to help people. And helping people cut away limbs, is not helping them. You know, you meet someone with a knife in an alley and he wants to cut you open, you call him a 'thief', a 'mugger'. You meet a doctor in the hospital with a scalpel and not only do we thank him, but you pay, you pay heavily. We have an opportunity now, that's been presented to us, so we know, we know what's out there. So we have an opportunity for a direction to pursue. The fact that if we know that it's out there is a really big deal, because now, forever now, no one can deny the fact that the Plasma exists. What we need to understand, and where we've achieved right now, according to Mr. Keshe's summary. That you go from Matter-State to Plasma, we can also go from Plasma-State to... back to Matter. And these skills are the skills that we have to learn, and it takes time to learn, it takes time and effort. And if you don't put the effort, well then, we're not going to learn. Right now, many of us are sitting back waiting for the others to do it, because there has always been a penalty a suppression. Those who step forwards get hurt. That's been the history and the reason for it is because left hand doesn't know what the right hand is doing. But now we have an awareness this is the beginning, through our Souls, that we have a Soul communication. and you have to understand, that when the soldiers go through the flower bed, can crush all the flowers. those flowers will be broken, but you know what, tomorrow they'll start growing again. Because, that's the True meaning of Life and Life wants to Live. And so the point that I want to make is that, we have the capability that we need and our capability and our understanding is actually better than the people who control us. Because, they have that capability but what they've realized is that when they go to that next step, they will no longer operate the way they are operating, because their Souls would have to be elevated. And they really don't want to do that, because they don't want to... re... release their control, They're too enamored with their control. And they're afraid to release the control, then it's too bad for them. What

we have to realize is that we're better than them and we have the capability, not only of elevating our spirits and our Souls, but we also have the capability of elevating their Souls. They may not like it and that's too bad, you know. But our freedom is...is what it's all about. And, I would just like to add one more point. We... we are having assistance from other sources. We have to have assistance from other sources, because we'll blow ourselves up to smithereens if we didn't. The question that has to be asked is, why are we getting so much help from other sources? And the reason is... is because, we're very very important and we're failing to see, how important we really are. So, this is just a plume to the next step. We are all very important, not only on our Planet, because we are the ones who're going to save this Planet because the Planet belongs to us. But, it's important for us to participate in the rest of the Universe, and the rest of the Universe is waiting for us to catch upland I think, when we start to realize how important that is, then we'll start to get the surge that we need. But we're on the right path and so I just want to finish off on the positive note, and say, "All of us as Souls, we need to understand that we need to progress for our freedom, and our freedom is... is the progression."Thank you very much.(RC) Very good. Thank you Alex. Okay ... think we're going to have to wrap up fairly soon here. Are there any... is there anybody else who'd like to come forward with a comment, to pull things together here?(DM) Devotional service.(RC) Devotional service,... is that it Doug?(DM) Yep.(RC) There's not many words did we already get through them today?(DM) Devotional service. It's the key and it's the answer.(RC) And what was the question?(chuckles)Just to remind people. Well, thank you, that's a good suggestion actually. I was going to suggest that the ... the mood of gratitude is... it seems like a practical way to proceed there as well.(RC) You can tie it up in a simple...a simple thing... a simple statement. Or a simple intention, and I reckon devotional service is good. It has deep meaning and we've had people talk about it all night and, it's the way I've been taught and the way I've ... understood things and now it's coming to fruition and it's absolutely beautiful.(RC) Okay, I've got a question for you then, because I know a bit about a country family you've been associated with ...Eastern philosophies and Indian, kind of thing...(AM) Yes Yeah.(RC) What about devotional service as was mentioned with the Rashid there earlier.(AM) Yep(RC) with these Gurus in India and so on, that they're families

or...the ... various people under those Gurus ...have they would say, they have devotional service to them. And because of that devotional service...and the same could be said for... maybe, you know, Catholics in a church in North America somewhere.(AM) Yep(RC) They have devotional service toward their ...bishop or for their priest or whatever religion is involved. But especially with a personal relationship with a Guru type or minister or priest of some sort. What about devotional service in that sense...many people would take those words that way... for that...more of a personal relationship, where they're devoted to the Guru you could say. But at the same time the Guru may be a pedophile or...or... you know abusing some of the children in the community. How do you reconcile that?(AM) Well(RC) those words. I'm...(AM) Yep(RC) I'm afraid that some people can take it that way and I know you don't mean it anywhere near that way.(AM) No, no.... There comes a point in anybodies ...devotional service where they may realize that ... they need to change their service and their intentions and their attitudes at a Soul level. So, if they see certain things manifesting in their ...life their Guru ...they can make a decision and it doesn't mean that they throw everything that they've received away, they simply change course. They set a new course or a new intention, not ... giving up all the old experiences or the experiences, but, they just set a new course adding onto what they've already learned and it creates a pathway that we must learn to control or have our intentions set, so that we are going in a certain direction. And Gurus, or teachers help us set our course and they come in all places and in all times and they're there to give us directions. And they're not just one fixed Physicality, they are actually, the creator coming to us to help us. And we take their advise and we move forward, and whether we go into the spans of the Universe and the Universes and beyond, they are always with us, They're always guiding us and we are taking their advice, in humility. And their advice is, "If you serve, if you give, you will receive."You'll receive everything you need, everything you want and even if you're a bird in a tree, or a worm in the ground or an atom, you're happy being in that situation, because you've got everything you need, and if you Wish to change position you can, at any time. Without stress, without fear and that is a state of bliss, blissful existence. And, in my understanding, that is the spiritual world, not the material world. And Mr. Keshe and his knowledge is showing us how to transmute Matter,

material World into Spiritual world. And I'm just so happy, that the knowledge has come to this... this place. I've been waiting so long and I have a picture of my Guru on the wall behind me and he was a philosopher not a scientist and he was always saying he wanted a scientist, an honest scientist, to come forward and prove scientifically all of the mystic powers that a person can have and all of the wonderful stories coming from ancient times, that people thought were myths and legends. He said they were actual historical events and...and his picture is up behind me on the wall and he printed or printed books in his time, trying to spread this devotional service One Planet, One Nation, One Race. Let's all join together and now it's happening. It happened then, it's happening now, Mosfeq, I think from Bengal told the story of how, by joining together and learning from each other, we grow in knowledge, we break down all the differences and we benefit every...everyone. And that's all I've got to say really, I think it's just wonderful, I like. I really appreciate everyone, I love you all so much and I'm happy to be a part of this, because it's perfection in action.(RC) Very good thank you Doug.... Armin did you want to say something, your mike's open there.(AG) Hello(RC) Hi Armin.(AG) Hello guys, how are you?(RC) Good(AG) Well, I listened lot of, you know, beautiful talks, you know, but still we're forgetting how to simplify things and how to not to complicate so much that we can understand deeper... points of the knowledge. If our understanding in our Souls, in our brain cells, you know in reality how, understand how to make and how to create the Fields that we see, That it's all around us, so if we understand that the light becomes a Matter and the Matter we can turn it back to the light, meaning energy. So, then things can be very simple and we can move one, from the fallacies that we are learning now, that it's so much wrong in it, but we have to still, you know, learn and read all these bookstand all learn in school and slowly when we're understanding that it's simple, so, we can simplify ourselves. The point is, I will answer any questions if you have, you know, according... to your understanding that we can clarify a lot of things. Anybody wants to ask a question? No questions? Or everybody's tired?(RC) Tough crowd here Armin. ...(AG) Why it's tough?(RC) Well, they're quiet. In a... for a...If you were a comedian, then it would be dead airtime there. It'd be... called the 'tough crowd'.(AG) Without good laugh, you know nothing moves. Huh?(GM) I have a

question for you Armen .(AG) I'm listening(GM) Okay, first of all thank you very much.... For all your input. Now... a lot of us, or a lot of people do not know..... how to use their Soul, in a ways that they understand(AG) Uh-hm(GM) Or how to find their Soul easily(AG) Uh-hm(GM) Your very advanced in Plasma science(AG) Uh-hm(GM) it would be ... very much appreciated if you could explain that, So that a lot of people understand how-to find their Soul and how to use it.(AG) You know, I can add ...there's how to find your Soul Mr. Gatuabut you ask me that questions many times. You know, you have to find it yourself. And all the best training that Mr. Keshe show sometimes, I do. Even when you put a, you know, a headphones and try to put a certain music that you can listen not inside your ears but inside your headland slowly you can understand that, you know, that pressure goes to your Soul and ... you can find your Soul easily. Without your Soul you're not operational. So, you're asking me a question, how to find your Soul, I don't know. I found mine, long time ago(GM) Okay. Don't explain how to...I will find mine, tell us how you found yours.(AG) I really cannot answer that question, everybody have to find their Soul their own way. But if you're asking me how to find your Soul, just, you know simply, just put the headphones and, put certain hertz that there's lots in ... YouTube you can find it, and... and you can slowly understand where your Soul located. Because you're not going to hear from your ears, you're going to hear the music in your head. The point, there is a point. And ...One minute, let me show you a picture if I can. Position of the Soul. Give me a second Mr. Gatua, I'll show you where your Soul sits.(GM) No problem, no problem, thank you very much.(RC) I see Herbert has his microphone open as well and I know you ...I promoted you to panelist earlier but, and then...(HB) Yeah.(RC) we started hearing from Armen.(AG) One minute.(HB) Yeah. Can I come in now? Herbert speaking, can you hear me?(RC) Yeah, were still trying to, we're still waiting for something from Armen here..(HB) Okay.(AG) One minute.(HB) Okay I'm waiting.(AG) Can I share the screen?(RC) Yes go ahead.(AG) Mr. Gatua, this is the scan of the brain and if you..(RC) ... Armen could you show the picture and not your whole desktop please?(AG) Sure no problem. Yeah.(RC) Okay great.(AG) If you pay attention there is a point in...in here... Where is it? Here! If you look at it, this is where your Soul sits Mr. Gatua.(GM) Thank you very much. Thank you very much.(GM) Okay. So, it's the empty space that you see, that's where the Fields

are holding inland I can show you a different picture. One Minute.(GM) Sure go ahead, I want to see them all.(AG) If I stop share for ...Here can you see?(GM) Yes please?(AG) This is where your Soul sits, in between half of your brain.(GM) I appreciate that very much.(AG) And that's why... that's why when you put your headphones around your ears, which are located here, you can hear the music vibration in your head. So, now you're not hearing with your ears, or you're hearing, where is it, in your head. I've done it many times actually. And it's there.(GM) I appreciate ... very much.(AG) Your welcome.(GM) Thank you.(AG) Anybody else?(RC) Well we have ... a question from Steve in the Livestream," Will the method on making Deuterium, Tritium and Hydrogen GANS, be on the Keshe Wiki soon, or is the method still being refined?"(AG) Just ... you know, here. You have to understand what we are creating, I am very sorry I'm drawing it with my finger, so it's very hard to draw. If you have your plates. Let's do different colors. If you have your plates for CO2 box, and just consider, what kind of elements you have around it, what kind of elements you have in this environment? You have ... Copper, you have Zinc, you have Carbon and CH bond actually, your box. So, anything that you creating in here, because your creating magnet of... material meaning Carbon, CO2.Just consider how you are creating, because a plate, here is Zinc and a Copper, which the... one is Nano-coated, You create a magnet of Carbon. That's why you bringing it from environment. From outside, and from your box too. Don't forget, you have a Carbon, now you created magnet. That's why you have so many GANS created under it, which is near Carbon Field. So, if you create CH3and you put in a box, which have no Carbon connection, and you close the top,... still you create a Field, of eight, Carbon, 'C', that we...and you put, anything you put herewith the CH3 that you put over here, so you will absorb the Carbon, and H3 is left. Because, now you are dealing with the Fields and the Fields are different huh? If you create a magnet of the Field so, whatever is that environment, because now it's a closed environment, you're not bringing anything from outside. So, you absorb the Field of the Carbon still in the saltwater. So, pure H3 is left. A Field of it. Now if you add in a tank, Hydrogen, or even Oxygen, you create different with it, you create H2.Now it's Atomic H huh? Not this in this box, actually CH3 box. Where you're put your mesh, Iron, and your Nano-coated material. Sorry for the drawings guys, it's very hard. I don't have a

pen. So, in this environment if you put a release of Hydrogen, now you are creating a Field of magnet of Hydrogen so, Atomic Hydrogen it converts to Hydrogen. Field of it. So you have to understand what you are creating, what kind of magnets you are creating, but because now you have, just remember, out of the Fields you have the Matter. Now, if you have two Matters, they interact. Out of the Fields of this two Matters, you create a Field of the Material. This is, we've done it with CO₂ box, we've done it with CH₃ box, we've done it with ... Zinc box, and the rest what we create. If we put two Zinc plates, one Nano-Coated, one Nano Coated, You create here a Zinc. Field of it. Because this each GANS, they're, now they carry individual Zinc Field. So now you have the millions, but if you only had a plate, but now you have millions of it, which the same strength of Zinc. Lot of people they don't understand you knowhow, what do you need to use for your body. To have a match. What kind of GANS you are using, at what kind of combination of the GANS you are using, what for? Only thing you have to remember, Hydrogen which is Acidic, giver,(AG) Any more questions, or it's getting late?(GM) Yes Armen, I have a...I have a question.(AG) Really? No problem.(GM) Oh yes, yes, yes always. Always I have question for you.(AG) [laughing](GM) You explained very, very well how to create Tritium. But, you could you expand this and show, as clearly as you showed how to create Tritium, and the process of creating...I believe Deuterium is very easy, because in CH₃you have Deuterium. So, it's the Hydrogen that your drawing did not explain.(AG) What you mean, I not explain?(GM) My understanding is that ...you showed very well how to create Tritium.(AG) Aha.(GM) Okay? I also understand that once you create CH₃,you already have Deuterium, because CH₃ can also be written as CHD. Which is which is Deuterium. Then how do you create Hydrogen, just Hydrogen in this .. box?(AG) Okay, you remember Coca-Cola box?(GM) Yes, but I believe that Mr. Keshe has said you could create Hydrogen in the, in the, in this CO₂...Just the way you created CH₃?(AG) Just put an environment, gas of Hydrogen.(GM) But explain, even with the Coca-Cola box, ... I mean bottle, but, which one is easier, from your experience?(AG) No, there is... No, I will, I will explain now the difficult part of it.(GM) Okay, that's... I'm okay with that.(AG) [laughing]Difficult part of it, if you understand the same thing, if you have this box. And this box in not Carbon, huh? It could be a fish tank,... you don't have a Carbon environment. Guys, you

have to understand, when you open a Magnetic Field, whatever is in your environment, just consider it, don't look at it, though it's there, it's okay. So consider it, that you know what kind of Fields you are creating, opening it up. Otherwise, it will not be there, the knowledge will not be there. If you don't pay attention small things like this. Because just understand again, from the Fields you create the Matter. Out of interaction of the Sun and Earth, we absorb certain matters when it enters the atmosphere. Then they convert this Field, it's going to be Gold, or it's going to be Silver. Now, the same thing is in your box. This is your box of creation of the Fields. That's why you put two plates. So, if you put this and you put the Coca-Cola bottle in it, and just understand, now you are dislocating the Carbon. And this is CH bond. So if you dislocate Carbon, Hydrogen releases. So you collect it in your bottle. The residuals you going to see it, it's going to be 'H'.(GM) This is very interesting Armen and, is this box one for creating CH₃ or for creating Carbon?(AG) Doesn't matter you choose the box to create a Carbon Field. Like as you're creating CH... CO₂. It's the same thing. You create the magnet of it, that's why you absorb.(GM) Okay. Thank you very much ... Armen.(AG) You're welcome. Any more questions, or it's late? Hello? Rick? Are you there?(RC) Hi Armen. ...(RC) We have one question in the Livestream chat, it's an easy one for you. LightBullet says, "I was creating CO₂ GANS, but it turned out not white, but greenish bluish. And the Nano Copper is turning back into Copper color. Is that the CO₂ GANS I created?"(AG) It's still you carry CO₂ Field, but it's more of a Copper residual that you released into it, it's because of your Nano-coating, it's not firmly done, or ... I don't know how you create your box? Most... sometimes, you know, it happens, but still you create a Carbon Field. But most of it the Copper releases, so you have a Copper there too, don't forget.(RC) Okay.(AG) This is what we have to understand. In this material, what we hang in the salt water, out of their interaction you create, you absorb the Field, because now it's in a Plasmatic condition. You create the flow, huh? One is in a higher, because it's Nano, one is in a lower, because is in a Matter. So, out of their interaction, you create a CO₂ here. A magnet, you create a magnet. A Field. This is hard, I know some people it's hard to understand, but if you, if you think correctly, that's what it is. If our Earth composition was little bit different, from the beginning of the journey, when it started its Life, it will... we will absorb totally different...

materials now.(RC) ... Armen, maybe the question from Trevor would be helpful ...He says, "Armen, I'd like to know what we can do, to create these results in our body, instead of outside of it."(AG) It's an understanding. If you have an understanding, then it's with your Wish actually, that's how you create the rest. If you hold your palms together, one it's one plate, second one it's second plate. So, if you understand your part of you, it's your birth. It's your Soul. This, you know it's a, it's little bit early to go to that stage, but this is slowly we have to understand what are our interaction we can get, what kind of Field we can create. Then, maybe we can learn how to do that with our Souls. Or, from the beginning you can do that, depends.(RC) ... Crasmir asks, "Does that mean that your body is the salt condition?"(AG) ??? Definitely you carry twelve salts as we are talking about that, huh?(RC) Huh-hm.(AG) Not twelve salts but, our salinity is near of Earth's salinity, that we can sustain.(RC) And we all know about the saline solution, that they give in the hospital, I think it's for shock and for other conditions, they add a saline solution, salt solution to your blood.(AG) You cannot convert a Matter without salt. Anymore questions? There is...(RC) ... We have a question from Valerie, just a second here. Hello Valerie?(VZ) Yeah Hi, can you hear me?(RC) Yes.(VZ) Hi ... Hi Armen I have the question about... the coke bottle that you just drew. Is this coke bottle empty or is it filled with the salt solution or just with distilled water?(AG) No caustic solution.(VZ) Caustic solution?(AG) Yeah.(VZ) So it's in a salt solution and inside you have caustic?(AG) Correct(VZ) Thank you so much.(AG) Your welcome. That's why in time your thread is gone. So, because you converting now atomic Hydrogen to the Plasmatic. Huh? Because you're dislocating the Carbon. Same thing you can do with the pins of ...this is the coke bottle. Same thing if you create the pins over here, power chutes. You're still creating the same dislocation.(RC) So, what would you say to Trevor who says, "Now that you've spoken that these results can be created in our bodies, "he says "So this needs to be elaborated and illustrated for better understanding, instead of creating these conditions in plastic boxes "How would you reply to that Armen?(AG) You know what, there are seven billion of us. So, if every seven billion will understand, then we are correct. But, you know, we try to, you know, teach different ways that a lot of people they understand whatever their understanding will allow them to understand. If you tell someone you can just

hold and create apple in your hand, they will laugh at you and say, "You are out of your mind." And if I create two reactors and create, you know, any material in front of them, then they will start to pay attention, what we are talking about. Because, we were not educated in this field and it's hard for us to grasp it sometimes, but when you grasp it, then it will be easier for you to do. So, we are not going only one way, and teaching only one way to the people. We are trying to teach ... differently that they understand. Maybe one day they can use it, or they will grasp it, "Okay, that's something I can do with my Soul, my Soul is in control." That's all. This is materialistic you know we're trying to bring in a commercial side that, you know, a lot of people they put the patch, or direct the Pen and they reduce the pain. If you understand the combination what you can do and then you can do it. But if you tell them that okay, forget about everything, you know, just think that, "Okay I can an apple." Maybe in other time, or two hundred years they need to grasp this knowledge. Otherwise they will say that you are one of the lunatics. (RC) There's a bunch of scratching in your microphone ... Armen. Can you fix that please? (AG) No problem. I did that... (RC) ... (JG) I have a question Armen, ... sorry Rick. (RC) Okay, go ahead. (JG) Thank you Rick ... Hello Armen, it's Jalal here (AG) Uh-huh (JG) ... If you ... extract the Carbon from the CH₃, which color you will ... you will get? (AG) What do you mean? (JG) Because, we are doing that but we don't know which color we will have. (AG) But, still if you have a understanding, you already understand what you've done, So why you worry about the color, is too blackish or reddish or greenish or whatever? If you created ... CH₃ in a proper way, so now you understand that this GANS you collected from the bottom are near Carbon and ... because you have a Zinc on top of your Iron you created Carbon and Hydrogen, actually Field. Because, this GANS they carry it, because you ... you created the magnet of it, to create that Field. (JG) Yes, ... we are doing that and ... we understand that we are making the Fields of the ... extracting the Carbon from the CH₃. (AG) It depends on what's in your environment, how ... Okay if you are closing on top of your box, or are not closing it properly, your box. Or you are producing in a glass box or you are producing in a carbon box. There are many things that you have to consider again. What kind of box you are using? Because this box becomes the environment of whatever you want to create. So if you ... if you put here a different materials, so you're not

going to get CO₂, you're going to get something else. (JG) You know that... that's why I'm asking. Because before... the... the black stuff. The Deuterium what we are sowing before, then we know this then Deuterium. So... we should not throw it away. That's why I'm asking. (AG) It's up... sometimes it comes yellowish color, sometimes it comes little bit reddish color, so it depends. Depends again, how you create it. I cannot tell you exactly this color it will be but, look at the yellowish colorant reddish color. (JG) Okay, it's depending the time also? How much time you ...leave it to the processing. (AG) No, no, no, no, no actually. No, the time is instant. Huh? You know if you touch your body, you're instantly feeling that. Not feeling after you touch your finger on another finger and the information after a year your receiving. (JG) Yeah, yeah. (AG) It's instant transfer. So, it's a Plasma. So a bit... it's not something that you have to wait and, you know, pray for it, no. If you... if you know that you create the magnet of it, so you consider, "Okay, I create the magnet of Carbon, now I'm going to extract the Carbon from whatever material I put it in, it will be extracted." Because, you are the one who creates. Huh? (JG) Okay Okay, because ... the ...the experiment what Jon ...he done for the Hydrogen, it took about two weeks, you know ... and more of that. That's why I'm asking about the time. (AG) You can split it up, you can create it slowly, but if you understand that you are creating magnet of it. So you can see there, "Okay, I created this material inside, because I know from my teachings, that if I put Zinc and Copper I create CO₂." "If I put Zinc and Zinc, I create Zinc Field. If I put a Copper and Copper I created CU Field." So these things already, like we teach it a lot, and years but people still not grasping it, because, you know, they've not been educated that way and it's probably dreams. But still, that's why we're slowly going and opening slowly, that people can understand. You have to educate surrounding you, that then they can use the rest. (JG) Yeah (AG) Otherwise, why you doing it? (JG) You are right. We need to understanding. (AG) And when you are confident and you know, "Yeah Okay, I created this, "then you put in your balls or you put in a structure, that you create a Field out of it. (JG) Right, thank you Armen. (AG) You're welcome. Anymore questions? (RC) ... It's a question from Steve, "Should the box be Nano-coated first, so to create an isolation from outside Fields?" (AG) Okay yeah, making GANS or making Nano-Material? (RC) Well, I think since we were talking about the GANS, I think that's

what he's referring to?(AG) In GANS, if you use the box that you already Nano-coated, so ... that box you can use it to create a CO₂ or any, because its' already Nano-coated.Huh? Sometimes....(RC) Surely it's best to have a Nano-coated box for the ... for the...(AG) Yeah, yeah. Just understand you have to...you're creating a Plasmatic condition. So, if you Nano-coat this box that's mean from Carbon, you released it and now you have this gap and hole. Now the environment is not the same as a Matter, it is an environment, it's like our total Plasma environment. Because, now you put... even the metal you put inside it's because the water now, you have one Nano-coated material, this environment is total Plasmatic condition. It's not anymore Matter condition, because if you put the food, the minute your food goes into your mouth, it's already in a Plasmatic condition. It has to.(RC) Will that be enough to create ...the Nano-coating on the box if it was not Nano-coated beforehand.(AG) You can, yes. Nano-coat it before, and ... I always do. I always use the boxes that I Nano-coat several times, then I use it as a GANS production.(RC) Okay(AG) It's already there. I can say what I ca...what I'm doing. So...(RC) There is a question from... 2Guy who asks ..."How do you wash the materials that are Nano-Coated with caustic?"(AG) Okay, use sonic.(RC) Use? Pardon me?(AG) Sonic, there is a ...there is a sonic (inaudible)(RC) Sonic... sonic cleaner you're talking about?(AG) Yeah! Yeah, hang...hang you plates there(RC) Okay(AG) a few minutes and ...(RC) In distilled water I guess?(AG) Distilled water are good, yeah definitely.(RC) Yeah.(AG) Which is best way to do it.(RC) Some people have talked about multiple washings.(AG) Yes, you do multiple washing but when you do Sonics, or you consider that everything works in a caustic. If you're going to take it out.(RC) Uh-hm(AG) Still, a logo just remember that your plate is still going to carry, you know, caustic Field NaOH. If you put KOH in there, still that plate going to carry as a Field, you don't have a material now but because you create it in the Plasmatic... you open up a Plasma now that...because in this environment, when you Nano-coat it, you put your plates and for Nano-coating. Consider again what kind of materials do you have in here? Because this Nano-coating material, they're going to carry that Field now. From... from the beginning you can determine exactly what you want to create. There are certain techniques. Okay?(VZ) ... Hi Amen, I have another question, if I may?(AG) I know I'm not going to sleep tonight, but it's okay. (chuckles)(VZ) No but you can go,

things up here. We're gone almost 5 hours, so it's quite a long time for our production crew.... So, maybe we can get Flint to ...wrap things up now with our...our, what is now our usual musical interlude.(FM) Sure, no problem.(RC) Okay, thank you everybody for today(AG) Good night guys.(RC) work... are you okay there Armen?(AG) No, I said good night.(RC) Oh, okay. And ...this has been the 187th Knowledge Seekers Workshop for August 31st 2017.Thank you everybody for attending.
