

190th KSW for Thursday, September 21st, 2017

Video link: <https://www.youtube.com/watch?v=ABdvSp13fNI>

Transcript v1 from Amara subtitle file revision 8

The Keshe Foundation, an independent, non-profit, non-religious, space-based organization founded by nuclear engineer Mehran Tavakoli Keshe is introducing to humanity the Science of the Universe, Plasma Science Keshe Foundation develops universal knowledge and space technologies that provide solutions to major global problems, revolutionizing Agriculture, Health, Energy, Transportation, Materials, and more. The application of Plasma Science in the form of specially developed Plasma reactors and other devices, will give humanity the real freedom to travel in deep space. Plasma Science exists throughout the whole Universe. It is here and it belongs to you. Our knowledge, research and development regarding the Plasma structure has progressed to the point of enabling everyone to participate in the process. Become a creator and understand the work of the Universe for the good of humankind on this planet, as well as in space! The use of MaGravs, Nanomaterials, GANS, Liquid Plasma, Field Plasma and other Plasma technologies have come as a new dawn for humanity to progress and work in harmony with the Universe. Conventional technology applications are wasteful, damaging and cause pollution to the planet and all living beings. Plasma Science provides solutions and improves existing methods and use of resources in all aspects that touch the lives of all beings. Plasma is defined by the foundation as an entire content of Fields which accumulate and create matter and it's NOT defined by its physical characteristics like ionization or temperature. Also, with Plasma science, we understand how we can convert

matter back to the Fields. Quoting from Mr. Keshe, “MaGrav stands for Magnetic-Gravitational, which means Plasma absorbs or gives. And every Plasma has the both, it has give and it has take... And when they can’t find the balance they distance themselves until they find the balance they can give to the others that they can receive what they want to receive and give further.” Certain atoms and molecules release and absorb Magnetic or Gravitational Fields. Released Fields are available to be absorbed by other objects. The Keshe Foundation has developed a way to gather these free flowing Fields from the environment within a resourceful and beneficial new state of transitional matter which M.T. Keshe named 'GANS'. The first step of the process of the formation of various basic types of GANS, is Nano-coating metals. This is carried out either chemically by etching (steam coating with Sodium Hydroxide) or thermally by heating (Fire Coating by gas burner). During either coating process, gaps between the outermost layers of atoms are created. The residual coating is often referred to as nano-coating, defined by the structured layers of Nanomaterial, which build up during the creation process of the coating. Nano-coated metal in interaction with other various metal plates, in a salt water solution, creates MaGrav Fields. These Fields then attract available elements to form a specific GANS, which collects and settles at the bottom of the container. This GANS is formed from independent energized molecules (like little suns) that can be used in various applications.

(RC) Okay welcome everyone, to the 190th Knowledge Seekers Workshop for Thursday, September 21st, 2017 and once again, as in the last 189 Knowledge Seekers Workshops, Mr. Keshe is available to us, today to speak on a variety of topics as usual. ... But something new every week, as usual, as well. Mr. Keshe, are you ready to begin there? (MK) Yes, good morning, good day to you, wherever and whenever you listen to these ... Knowledge Seekers teaching. Looking at the list of the people present on the front line. We see number of members of the... the Core Team, we welcome you. We see number of members of the Earth Council and Universal Council present I welcome you all to these teachings, and it's a pleasure to have Alekz back with us, after his incident in Nigeria, as a member of Earth Council, will... will be nice to hear from you Alekz. As we have said, before we carry on with the teaching and enlightening and inspiring the

knowledge, that more of us can expand the knowledge in different ways according to our intellect and what we understand or what is our interest. There are a few things, which is... has happened, we have to clarify, ... one of these things is that ... we received, with many thanks, from the Netherlands, from the Dutch ... group, who went to Peru. And, they have reported their finding about ... workshop in Peru, which ... literally shocked us to understand to see such a thing. ... Somebody using the name of the Keshe Foundation and the presence of the Keshe Foundation in Peru to organize a workshop and ... in a way, abusing the name of the Foundation even though he's close with the Keshe Foundation Peru. And, this made us to make ... investigation in what's going on, even they abused the name of Armen and me, we were going to be present and then they going to show Power Units to attract people. ... This has been a revelation to us, in so many ways, that we were told, they're planning it. This guy was doing something and then there are people in there, but he never explained what's going on, now we understand it was a setup. And this has brought into light for us that, from now on we're going to control the workshops very, very closely. This is the third time we seen people abusing the name of the Keshe Foundation and the facilities of Keshe Foundation and the Knowledge to benefit themselves. Apparently, ... this gentleman has risen some \$3.000 from this workshop for himself. And without the Knowledge or any input from the Keshe Foundation Peru. And ... Armen has spoken with them, to understand, exactly, what's going on and what has happened. The Keshe Foundation Peru has accepted to refund their funds to the people, who were, in a way, cheated by this gentleman to go into these teachings and using Armen's name, "he'll be present" or my name. ... We put on a stop to this in a way that, from 1st of October, any workshop, which carries our name or Plasma Technology, which is connected or discusses Keshe Foundation Technology or MaGrav Systems has to be approved by the Keshe Foundation itself. We... you go to workshops@spaceshipinstitute.org. All the ones will be authorized, we carry a new Logo, which is designed for the workshops, and you receive a number for that workshop, so if you do a repeat one, you need a new number, that we control the teachings, we control the knowledge and we make sure, that teachings is in correct way and is not the way it has been abused by others for their own pocket and the benefit. From now on, if you want to know

where is a workshop you can go on the Keshe Foundation's website workshops and find the details, who is doing it and everything else. We have put a team into this, that these kind of abuses does not take place anymore. We gave warning to the other two. We rejected one of them totally from the Keshe Foundation Organization. And now, we cannot touch Peru, even we are the shareholders in the company, we're not managing it, we're not there on the daily basis. So, this gentleman has abused the position, while he's in the Keshe Foundation. He's not a shareholder or a director, being associated to abuse, to setup, to do whatever he liked, and we don't allow this to happen anymore. So, from now on, if you're setting up a workshop, it has to be approved by the Keshe Foundation and you'll be given a number for that, what are you... your workshop is about and where it is, and how you're doing it. We have put a person, responsible for this, two people now are responsible for this, that nothing like this will happen again. We thank the Dutch team for bringing this to our attention. They should have checked with us, before they go, that is there such a thing, that we could have informed them. The members are close to us, which you should have called us, not just turned up there, but thanks to them, now, we have ... brought this to end, this cannot be done anymore. In so many ways, all the workshops, from now on, will be controlled, the text... the... the... the workshop ... manuals, everything is getting done, that everything follows, that there is no mis-knowledge or mis-information in teachings. ... In that way, I think ... Jim has something to say on the educational side of the workshops. If you want to participate? Jim please. (JM) Thank you, Mr. Keshe ... I can just share my screen please, Rick ? (RC) Sure, go ahead there. (JM) Thanks. My apologies if you hear the chickens behind, the background. Alright, on that note. In terms of ... workshops. What we... we have realized over the time, that, this Knowledge is so vast. And is, you know, for new people, that ... want to come into the Foundation and start learning, it's... it's a very difficult task, as to... to where to start learning. There is... just so many videos, all over the place ... and to... wa... to get through all this information is... is quite a mammoth task. So, with that in mind, what we have put together, is a series of workshops, ... starting on Monday, next week. Which is essentially, understanding the Plasma Science. ... It will run from Monday and every Monday thereafter. ... For a series of 12 workshops, and we'll be covering 6 topics. We'll

be covering the... the Plasma Science, Nano Technology, GANS, Health, Nature and Soul. So, these are all, will be sort of taught as separate topics, but what we'll be doing is ... interlinking them all, because this technology covers everything. And so, it's not just a case of focusing on Nano-coating. Thus ... we have to incorporate and connect the dots for a lot of people, because, yes we can Nano-coat our... our Copper wires, but there's also Nano-coated, Nano layers in our body, there's Nano layers in nature. So, we have to understand ... the links between everything, there's GANS, that we produce ourselves and we can produce, That there's GANS in our body and there's GANS in plants as well. So, the whole idea with these workshops is to give people a very broad understanding of... of where this Technology fits in, how it all cross links, across all aspects of ... our society today, and... and all the Technology. So as I said, "Will be 12 parts, starting on Monday at 10 am, it will be a public workshop, open to... to all people, and it will be an hour and a half long workshop. And the presentations afterwards will also be handed over to all the different language teachers, so that they can take this, and also teach in different languages around the World. Now, just to give an example, of how we're going to... to operate these workshops, is the first one, part one on Monday, we're just going to cover the first three topics, which is Plasma, Nano and GANS. Each one will be 30 min long, so we'll start with Plasma and run that for 30 minutes. The first, sort of, 20 minutes is... we'll be presenting the information on sort of, a very basic level. So that you can get the understanding of the fundamentals, of... of everything. And then will be followed with ... 10 minutes of questions, relating to the specific topic. We'll then go on to the next subject, so that we can finish the workshop in an hour and a half. I'm wanting to keep it, nice and short is because we understand people's ... time is... is quite important to them, and so we're wanting to getting this information across to people, in a very short concise ... manner, so that they can start watching these... these ... workshops, and get the information that is required, to understand it from, from watching. Without having to go through hours and hours of... of... workshops, to try and pull out some nuggets of information. And then, the following week ... part 2, we will touch on the Health and Nature and ... and Soul aspects, and it will be run on the same format as well. And then, what we'll be doing in, say part 3, that'll be the third week, is we'll going back to the

Plasma, Nano and GANS again, but now we'll be adding new information, to what you've been really taught, so that we can start building that knowledge for you. And then, obviously the fourth week we... we go. So, we'll be rotating and... over the 12 weeks, build a good foundation ... for people, so that they can understand the... the... sort of, the Technology as a whole, ... it'll be very brief, very ... sort of very... to try and simplified it ... as much as we can. And ... so that people can see, that this Technology is... is all encompassing, it's not just one aspect or another, it's how it fits, I'll ask. Because if we understand, how the actual Plasma Science works and how Plasma works, we can begin to understand, how our Soul operates. So, everything is interrelated. The whole idea is also help the newer student, and even some of the elder ... people that, ... once they've gone to these workshops, ... if they're interested, then they can actually study further, but at least they would have had a very broad understanding of what this technology's ... all about. So, we do welcome everybody ... to join us on... on Monday, for the first workshop. They will be recorded as usual and go up on YouTube and ... so that at the end of the 12 weeks, we'll be able to package these videos in different formats, and make them available as a basic workshops, that people can understand, and get... try and get to grips with this technology. It'll also help a lot of people ... in terms of going to live workshops around the World, in that they can watch these ... series of videos first, to give themselves a good ... broad understanding of the technology, before they even, have to go to ... any other workshops So ... at least they'll get the information from... directly from the Foundation itself. And that was it, thank you Mr. Keshe (RC) So, just to remind people that it'll be, on the same Zoom ID Channel that we're on now, correct ? (JM) That's correct, yes. (RC) ... same goes with the YouTube, it'll be ... live on YouTube at that time (JM) ... Livestream ... (RC) ... and Livestream (JM) yeah (RC) ... and ... (JM) ... yes ... (RC) ... Facebook as well, correct ? Okay, very good, thank you. (MK) Thank you very much, please make sure, when you make this teachings, these public teachings or workshops, there is no infringement on ... any, what you call, 'published papers' or whatever, that we do not create problems. There is no infringement to whatever ... or domestic rights, or intellectual rights, or whatever. ... We try to keep this 503 number, the Zoom ID, as a public point of teachings for the Keshe Foundation whenever it is, now is used ... more or less, on Tuesday,

Wednesday and Thursdays and now Monday mornings for next 12 weeks is becoming a public point of interaction between the Foundation work and the public. As usual, we first go to the members of the Earth Council or the Core Team, or the ... Universal Council if they want to participate in this session this morning. Any members of the Earth Council or the Core Team or the Universal Council wants to add in the process of what we need to do, or what they're... have discussed, what to be for us to follow? (UC) Hallo, I am Ursula, I want to give a message to all of you, I am Universal Council in Spanish, I can give it also in Spanish then. I want... (MK) ... please do ... both (UC) Thank you Mr. Keshe, I want all who say, that we are all going through the big crisis now. It's a human crisis, a global and personal crisis, economical, financial wars, political, climate, everywhere are big changes, the world is... is change it selves, and it gives message to us, when we are weak, a some of us can be sometimes, it will go worst. To have the opportunity, to have these teachings, we can feel strong and stronger every day, to love each other and ourselves first, also. We often can be silent, and must be silent to feel it inside. We are all peaceful inside? Not really and it's sometime with fears. We must keep on this teachings to feel stronger every day, and give teachings, also. Without competition, not feeling better than others, helping each other it's so important. To give value each other, to be stronger and to go through all this crisis. We ... Free Energy is free. It's very, very free, must give freely to others. Teaching, sharing, being, we learn it, we know it and now we can do it, because we have not more fear. We are... we know all, that we are discovering, that, what we are really. And now we can become, that we are really inside. We know it from the beginning and now it's possible. We are just starting to learn, starting to be, we have... everybody has knowledge, technical, natural, an... an... an... any what ... computers or doctors or engineers, and they're all working together. This is the most important. We are beginners of this big changes and sometimes, you can also feel sad, because we see everything, what happens, around us and people hearing to us, don't believe, what we are saying, because they cannot believe sometimes. But we must be strong, and thank you for all these teachings, that can us keep together and work together. And, it's very important to be on this teaching to, to go through this, to learn and to teach others. And this is so happy to do. It's most important to teach and to

give, than to... than to keep it for us. It's very important and thank you for all those who are doing this with so much love. Thank you very much. It's all what I wanted to say today. (MK) Now in Spanish? (UC) [Addresses Spanish language community till 32m50sec] That's all what I... I want to say. (MK) Thank you very much indeed. Thank you for your sincerity. ... Any other messages from the Earth Council? I know Alekz is here ... would you like to participate in... Alekz, if you have a good line? Can you hear us Alekz? Alekz is in Nigeria, and we sometime get problem in connecting with him even though he's online, he cannot be reached ... (RC) I'll try to unmute him and see what happens here (MK) Please, if you can? Hello? (AE) Okay... Okay... (RC) Hello Alekz we can hear you. Hello? Hello? (AE) Okay but the thing is, I want to fill in some, right now. Be... because I don't have any... Okay, but, maybe is ... And if you tell me how much energy will cost and I'll put the money for the account. I don't feel my... (MK) Hello. He's somewhere else. He's on the phone... [laughter] (RC) Right, I'll mute him again... (MK) We'll meet him later on. (RC) ... this is appropriate or not? (MK)[laughter] Okay, is there anybody else? (RC) ... unmuting people on this... this line. (MK)[laughter] Is anybody from the Core team would like to say anything? Even though you're all there doing something in the background? (VV) I would like to say, that I give from my Soul to the people of the... again another Hurricane that's going on ... on this side of the World. And ... the devastation that ... this weather is causing to people. That it's ... they're in the path of these weathers, of these storms. And it doesn't look like it's letting up. So ... I give from my Soul to people in the path of these storms, that they can stay safe. (MK) Would you like to tell us who you are, we know who you are? (VV) I'm Vince and I'm from the Core Team. I'm also one of the Webmasters of the Keshe Foundation. (MK) Thank you very much. This disaster which's creating us... frequently around the World ... has risen a question in the Keshe Foundation in the background. As we've done before with the Italian disaster. We need to... to open up and be ready, in so many way, to show we can do... make change and be able to deliver the technology. In disaster points for Nations and governments to be able to use. As a lot of us are aware, when the disaster hit ... Italy. We announced we open a factory of the Keshe Foundation for the use of the government, to use any facilities we have, products or whatever as part of the National asset. This, will follow, we... we have helped before in... in

one of these ... disasters in the island and now we are waiting to see if any request comes from any of the Keshe Foundations in the path of the disasters, these hurricanes. We'll respond accordingly. The problem we have is that we have to make a disaster group ready to respond and knowing where we have our supporters, that we can be supplied, that they can help in these positions. ... We know a number of islands have been hit again, like last time and ... we... the... part of the Keshe Foundation, next few weeks and months is to set up these, what we call, disaster relief... available through the Keshe Foundation technology. We are talking with the government, that this will be done accordingly in one Nation. And, then we go back into understanding that, the faster we set up the factories and organizations around the World that can supp... can supply these needs and demands at the time of disaster. We have to build the Foundation into that course. That ... we are there to deliver, speedy, local, but at the same time effective ... systems. At these points in this kind of position ... local governments accept anything, that it can help to alleviate the problems or whatever could be. ... In the coming time we release emergency water cleaning systems, which is getting developed in Italy, Keshe Foundation and now we... most probably collaborate with a couple of other organizations to have these ready for disposal. fast delivery, clean water systems ... We... we have produced. These things are going under trial and then, will be easy to use, very simple packaging, small boxes you can put water through it. Any viruses, any bacteria's, any ... impurities will get cleaned up and at the same time, the water becomes a source of ... food. ... for the people who drink it. These tests are ... under... what do you call it? 'Trial'. In couple of positions for us ... and then we release the knowledge, accordingly to Keshe Foundation manufacturing's to be done and to be delivered. ... This is important for us, to be able for these kind of disasters, continuously around the World, that we do not need to open offices, We have enough Keshe Foundation supporters around the World, who can take this to the next step... to the next point. And deliver directly at the point of need, as it comes up. All it is to... As we increase the number of the factories around the World, part of the production of the factories, all the time has to be ready for these kind of ... needs. That we can respond immediately to, we don't need to wait. In the coming time, as we develop the Keshe Foundation structure of the manufacturing's now start running

to ... couple of... handful of companies around the World, in the coming time, that they start operating, they start manufacturing. The part of the stock of these companies will be held on rotation for emergency disasters. So, it means they are always hold stock in the background, that it can be delivered at any time. And the fresh stock becomes part of available continuous basis. I... I have foreseen how this can be done, now that we start reorganizing the factories around the World from scratch. This gives us the opportunity to do and we take it to the next step. ... Those of you who've been interested to open factories with the Keshe Foundation, please still apply in. We have started ... setting up a specific ... number of ... factories around the World ... that they start getting set up, structured and to go into production. And, then we announce more of these as it happens, as it comes in. Through the Keshe Foundation channels and not on the teachings. The problem with us is the rapid expansion and a lot of people start learning the new technology. Is allowing us to spread the knowledge in a faster way. We would like to thank those scientists who are working in the background to bring the technology on the level of the Universities and Institutes technical understanding. We would like to thank Professors in the Romanian Universities who have brought the knowledge in a very nice way into teaching of the University ... We will be hearing more from the Romanian groups in the coming time. Is there any input from any other members of the Earth Council or the Universal Council? (MR) This is ... Mosfeq, can you hear me? (MK) Yes. Please. (MR) Yes ... regarding these natural disasters ... there are also a few man-made disasters such as the Rohingya situation which ... is affecting ... this Myanmar and Bangladesh region... (MK) Which... which? Mosfeq, can you explain please? (MR) Yes ... there is a group of Muslims in the south of Myanmar, where their villages are being burned ... by the army in Myanmar. And, they are coming to Bangladesh... and ... there are about 400,000 of them right now. And, there has been a reactions from various people, especially people, not so much governments or leaders ... whatever the political reason for not ... helping this situation, the people are suffering and ... there... there is... It appears that there is an imminent need for... imminent food shortage for these people, because that area is not prepared to... at this point, to... to take these people. And, they have some mental trauma, because many of them have been killed, children,

whatever... others as well. And, there are videos of. You can see it on YouTube now... of ... villages are being burned... ... across the river from Bangladesh and these are videos taken from this side. And, ... it is ... putting pressure on the system here, but the people are suffering, that's the important part. So, ... right now ... there aren't very many people in Bangladesh who are aware of the Keshe Foundation technologies, but we can do something, here. And, it would be useful to the Foundation ... members and the Knowledge Seekers if they could ... come up with a some solutions and ... to ameliorate this situation ... which is getting worse, everyday actually. And, we have, uncharacteristically, we have rain, but it's... now it's not the rainy season, so it's raining heavily. So, there has been some flooding as well. So, ... both of these are also making... both of these making the, what do you call it? The disease situation worse as well. So, there are several issues that go with this, and, similarly there is an natural... this disaster happening on the north which actually includes Nepal, India and Bangladesh. And, about 1,200 people died and it's... it's not the ... death is sad, but as well as the aftermath of it, which is the disease, and the pollution, which... which stays for a while. And, that's actually, what we are seeing now. So ... as Mr. Keshe just mentioned, having these disasters ... is, seems to be ... a natural situation these days but a preparation, at least at a small scale we can start, even before the factory ... we don't have a factory in Bangladesh but we can prepare some things we can ... move some things around ... Of course it will need some ... contribution and effort. But... it can be done I think... at least we can start. Because, we don't get it right the first time. So, if we can do it in a manner so that we get some idea about how we can proceed ... carrying out such tasks ... that would be a good beginning... of course factories coming into operation, would definitely accelerate and help this process. ... So, ... extending ... Vince's wishes and Rui also brought it up ... last Tuesday. ... My Wish is that Rohingya's ... are released from their suffering and those who're contributing ... to it are also released from their misconduct. Thank you. ... Should I say it in Bengali? (MK) Please go ahead. (MR) [Mosfeq addresses the Bengali language community until 50:49.] That's all I had to say. Thank you. (MK) Thank you very much ... any other input from any other members of the Core Team or the Council? Okay, thank you very much indeed, for your participation. We go back to part of the teaching as we have been

teaching in depth in the... (BC) Excuse me. (MK) Pardon? (BC) Excuse me I have a question. Excuse me, this is Bonnie in the United States. I have a question, but I'm not a Council member. May I ask a question? (MK) Please, see if we can answer. (BC) Okay, ... I don't mean to be presumptuous, but I am concerned about all of the lack of preparation for many of the people in the... the hurricane victims, let's just take that for example, and of course everything that's happening Globally. So, my question or request is: What is it that we can do to be able to get the MaGrav... the free-standing MaGrav generators, so that we can provide them to these people? I know last time... I've got enough supplies to make it and give them away, but I... I'm such a beginner I... you know, I know we don't have the blueprint yet. So, what can we do to help you, to get the blueprint out to the rest of us, so we can, pass them on to the World so they can be prepared? Thank you. (MK) We... we will not release the blueprint of the MaGrav... the free-standing Units till we come to agreement with certain of governments. This is what we are doing in the background. We don't disclose anymore, because we saw the mayhem they created in Accra. These are a bunch of terrorists, sitting in Belgium and Germany ... and other places. So, we have... as we said, we work under the very close ... work. The MaGrav units, free-standing has to be done, released in negotiation with certain governments. You got to understand, the Units is not something to be developed, is fully developed ... fully operational and the instant we release it, will destroy the oil industry. We know it, we have disclosed it to a number of governments and it's a decision to be made, how this is going to be released Globally. ... It's a knowledge, which belongs to Humanity, not to us, but by releasing it we will create a mayhem. This is not something that, it will be done, it is something which is complete. The ... energy production of it can be massive, we we've been trying for two years to control the energy of this system, to come out. ... Blueprints will only go through governments. We have no choice with this. It has to go and we're negotiating with a number of governments in the background in developing a strategy that we can do so. ... Free-standing Units are... or what we call, the 'Energy Supply Units' will change everything financially in the world of the ... finance. ... We can produce millions of them around the World, in matter of months. Oil industry will collapse, totally, and you can see what, the mayhem that will create. There're number of situations which

... we are involved in. I personally ... head it in... in the direction of where we see it to go. And, it doesn't matter, people say, it's your "right to have" a blueprint, "you have to give it." No, finished. That... that stupid game we played we thought everybody's mature, is over. I consider everybody to understand what's going on and you are mature enough to understand the, what we call the 'wireless system' and the 'free-standing system' will only be released through one government and... when these governments are mature enough or will allow it to come through, then it'll be done. ... It's not that we going to do it... we did it with the blueprint of the MaGrav, we saw the mayhem they created. Everybody who made a MaGrav, they are using it and they, are benefiting by it, and then they say, "It doesn't work." Because, they don't want the neighbor to know, or the government to know. This way the blue... free-st... what I call the 'Free-standing' or ... 'Free system' of the Energy development, ... will only come out of one government. We'll not do it in any other way. Because, first of all we know, the instant we release it, the mayhem starts and then the instance we release it, other problems will start that you prefer, wished, wish I'd never released this technology. Oil industry, car industry, everything will be wiped out. Because it's so simple to develop, it's so simple to replicate. The situation is not, when are we going to release it, the position is Humanity's... is not mature enough. Governments are not mature enough to be able to handle such a change. ... I've listened twice to people saying, "It's our right to have it." This time is your right to have it, when you mature enough. A number of people are working around it, the Keshe Foundation has and will supply the systems to governments under very close observation. Very, very close observation. And it's the decision of the governments to come out with this technology. We are working at the highest level with governments and we protect the.. what we know will come as a mayhem. ... This will collapse the whole of the oil industry. The American governments ... reliance on the oil will collapse overnight, literally. In ... the Middle Eastern financial backing of the oil, will collapse immediately ... the point is... I was getting in... in a way encouraged and enticed by somebody very recently. We can hide it in another system that it doesn't show itself then we can go out. I said that doesn't take more than a few minutes, someone says, "where is the energy coming to do with it?" "So, there is and energy source in there." ...

We... we are aware of it. This is not going to solve the problem of the disasters if you have a blueprint, you can do it. This will create a more, much massive disaster, if we don't do it the way we see it. On the other hand ... you have to understand ... there is a number of things people can do, even they can help themselves. Even the materials in the disaster area can be used to generate the materials which is needed for ... rescuing or helping other people. The blame is not in teaching anymore, the blame goes back on, not in a way 'blame'.. the I ... the job goes back to the Keshe Foundation supporters around the World to start teaching. We have taught enough, is for you to teach how they make a pain pads, how to make a pain pen, how to make a ... the first system to create a balanced 20 - 22 degrees condition ... of warmth in a cold area. All has been taught, nobody's doing anything about it because you're just here to take what you like from the technology, that it might benefit you. Very few are there to do what you're asking, to help and will be able to contribute. But, majority here are free-riders, and this cannot be. This is what I said, we did the One Nation, One ... One Planet... ... We have done the agreement, but everything has a stopped, except the... what I call Universal Council, Earth Council in the background they are pushing to make the, the ethos. The rest of you have given up because you couldn't get anything out of it free. Where are the teaching going? Why don't you go out and teach more? Why don't you go out and reach more? It's not us anymore, it's you as us, which has to make the move. You have two hours a day free, put it out. Put leaflets out, teach people, "Release pain." Show people how to make the GANs. ... It's a very strange situation. A lot of people do, a lot of people know, but they don't even want to know. Because, then they have to do something about it. "It's not my problem, till it becomes my problem." How many of the Keshe Foundation followers, were in the line of the disasters or knew the State next to them is in line and is getting hit. How many patches did you make to take across? How many of you made GANs of CH₃ and CO₂ to be able there, to feed at least, some of the energy, which is needed? None. Bounty doesn't rain on people, bounty has to come from the people to rain on others. We are here to serve, not to be served. And, it's very easy to say, "I'm prepared to do." Teach, as I always say, it's an English old say, it says, "Give a Man a fish, you have to give him one every day, feed the man. Teach the man how to fish, he feeds himself." It's

the teaching, which has to expand. This is what we are doing with, couple of governments. That we go on the radio stations to teach, that nationally known, what to do, how can you help yourself. The problem is not the work of the Foundation and the knowledge, knowledge is complete. It's how you change it, how you... you evolve it. How much, how many people know, but they're not so ... what I call, "happy to teach it", because there is so much negativity going on by 1 or 2 people on the internet. We are millions of us, we don't see anything wrong, people are using technology in every shape or form. ... We... it's us who has to learn, to have confidence in the technology we carry. And, is for you, you know the line of disaster. How many of the Keshe Foundation people, who were on the line of the disaster in United States or in the Islands coming, prepared themselves with GANSes and others, and taught the others to do it, have it ready, if it hits you. Maybe handful? Maybe, "Somebody else does it and I follow?" Maybe, "Oh it's just there, they should have known themselves." So, ... the free Unit, the Energy Unit, is not the answer. The behavior of the Humanity is the answer. How many of you carried on writing to the governments, to sign the Peace... World Peace Treaty? I know couple of world leaders, 2 - 3 world leaders have been taken on, by the Keshe Foundation supporters at the highest level. To... be listened to, to be discussed, to take it further. ... We do not disclose any more of our activities, for one reason. Is too many going on at the moment. And we do not allow the disturbance, as we saw in Africa, to repeat itself. In time we respond, in time we'll respond only by sharing knowledge. You want to know how it is, give me a free blueprint of the free... this free blueprint of energy has shown me, how many greedy people are sitting around the Foundation just want to have that energy, to do something with it. What did you do with the MaGrav units, which you built and saved you 30 - 40 % on energy, where did that money go? Did you put it back into the helping others with the technology? No. It was another car, it was another blanket, or whatever. This is the reality. You cry for new technology, new knowledge, when it's given, it's just good enough for me to use it, what I save. This has to change ... It's the job of the Keshe Foundation supporters to go out. Our job is not finished till we get this One Nation, One Planet, One Race on the Board of International organizations. That's the only way it'll be done, and a number of Countries are becoming to understand it. Number of Countries'

leaders, world leaders, are coming to understand, is, more or less, one of the only solutions left for us to do. ... We just heard from Bangladesh, look at, how Bangladesh was established. Why a Nation in such a position? Why others again Muslims? When is the time, when the Christianity will going to get hit back on it? You got to realize, a balloon can take certain amount of pressure, till it explodes. And then when it explodes, it goes back on the face of the people who are putting the pressure. When you have a balloon in your hand, and you're squeezing it, who gets wet first when it explodes? You. Those people, who create these pressures, that Muslims are the worst thing and they start pressurizing everywhere. They have to watch, it's just about to blow up. And when it blows up, there will be nothing left of people who are doing it. I watch International politics very closely, and I'm fully aware of it, at the highest level, what is going on, but it's not our job. Our job is to be there, to change the course of Humanity. Our job is there, to be able to teach, the technology, that people can change it according to their own understanding. At the moment, I make GANSes and that's it, I made myself a MaGrav unit. My promise and my request was from you, from Day one, when we taught MaGrav system, when you make one, make one for your neighbors and you teach him, that he makes one for his neighbor. How many of you have done so? None. You just put a MaGrav system at home and that was it, "I'm safe, I'm okay Jack." You have broken your Ethos with us, not us with you. How many of you made patches for yourself, and you made 1 or 2 or 3 to the neighbors and taught them, just don't give them free. You have to always give them a fish. Teach them the technology, when they see the pain is gone. This is, where the failure comes in, but not keeping the promise, you gave when you asked for the technology, we gave it to you. The technology was transferred through the Soul of the Man, not the Physicality of understanding of it. And you have broken every promise to your Soul. How many of you made MaGrav systems and got benefit by it? In Germany, in France, in Austria, in Belgium, in Holland, in other part of the World? How many of you saved 30 - 40 % and you made 3, 4 or 5 MaGrav units and you went to your neighbor and says, "This is my unit. This is what I built I'm using it at home. I saved so much, I will like you to have one, but I teach you, that you can make one for your children and your brothers and sisters." None of you did. "I've saved 30 %, 50 %, Thank you Jack." You broke the promise, and that's

why the stagnation has come. How many of you followed the teaching, to follow, to go to the world leaders and continue with the Ambassadors and the rest, till we get the One Nation done? Nothing, is in the hand of few members of the Earth Council, Universal Council, trying to find the resolution or a way, at least to make a Charter, that they can go into the next step. They... while they are making the charters, you have to make the push. Why is there, go on the internet, you speak a Spanish, you speak any of the languages, which the islands is hit, just write to them, anywhere. To the governments, the emails are open. "We want to send this, these are the helps we want to teach." What's the connection between the Keshe Foundations around these islands, who are getting hit or have been hit? Unless a Keshe Foundation supporter comes and ask for help? The Ethos is, you've broken your promise to start with. You made the GANSes, you made the patches, just for yourselves. I have a spare time, I used to be in pain, I can't move, now I can move, I use the technology, I save the energy, I spend one hour a week, one hour a month making units and I give it free, and I teach it free. And then what's the use, I give you another Power Unit, the next thing is, "Where is the flight system, you promised us the flight. If we have the flight system, we can escape from this planet, then we have no problem." So, what's the next after that? So, all the Keshe Foundation supporters, wherever you listen, whatever you do. Go back into, what you came to learn. You did not come to learn, how to make the Pen and Pads, you came to learn, how to be a correct conduct person in the Universe. And, you got it free. The more you receive, the more you give, you made one Patch, it helped you. Make two Patches and teach. And ask the person, this is the promise to your Soul, do that. Would have gone much further, would you go much further? Or is the Humanity ready? [coughs] This is the question. This is what... we have a problem, we've seen now, in ... Peru. A guy, who could and think he could understand the technology, instead of benefiting the technology, has misused the name of the Foundation and the place of the Foundation, for his personal benefit. We've seen this in other places. It's become a point of using a knowledge to abuse the others. And you pay for it heavily, not us. It's you, who have to balance the Soul, not us. Don't ask us "can you give us?" I give you the blueprint for energy, how many of you cried for years, "he's given the blue... the patents to." I opened the patents, how many of you have understood?

The only people who have understood the patents and opened it up, it's Multinationals. The only people who sit in these teachings and listen to every word of these teachings are Multinationals. We see number of people, number of organizations, car manufacturers. Space organizations, food industry, ... energy industry, they're all sitting here with the top guys listening to every teaching. To see what they can take new. It's got to the point that, it has become a free patent for industry to sell it to you ten thousand times more. In number of cars you drive today, is the Keshe Foundation Plasma technology in it. You didn't use it, they have hidden it. Ask any of them to open their patent on their energy, on the new batteries, they'll tell you, "we cannot do so." Because they cannot get a patent, because the patent is open according to what I promised. We force one of the major corporations, co... company manufacturers, car manufacturers to open the patents, because it was ours, they said they have a "patent applied, pending." But they could not, they knew they would not get it because it was a Keshe Foundation Nano technology which they've used in their batteries. People don't understand how Multinationals are working around the Foundation Plasma technology in different way and different names. And they are breaking through. Public is paying for a free knowledge, it was given to you hidden behind. When you see something similar to Keshe Foundation work, ask them to show us a patent. None of them can show you a patent, because they cannot patent it. The way you and I and all the Keshe Foundation supporters past few years have operated. Has made sure a new science, which is based on Keshe Foundation technologies in any shape or form, is not patentable. In a 10 to 15-20 years time, you'll find very, very few patents. Because, you have made it impossible the way we have opened it. But the energy has to go, there's no other way but to go through governments. Has to go through governments. And it'll go through one government for us to open up. I have reached an understanding with a major government. And I stick to my position till they move in the next step. Any other points? (RC) ... Mr. Keshe we have ... Miguel, who says he has some questions about a system that he is working on apparently with the flower of life tetrahedron. This system can ... cure, cure the Emotion of a city from a long distance. I want to finish this system to help everybody. So it's a incomplete system that he have some questions about. Would you like to address that? I can

bring him in as a panelist... (MK) Let's have a look. (RC) Okay Miguel I'll promote you to a panelist and ... see what you have to say there and, I see Mark Erb has his hand up, I'll promote you to a panelist as well Mark. Okay, so, let's see Miguel, can you... can you speak there? Hello, I see your microphone is open Miguel, go ahead. Maybe you need to turn your microphone on in Zoom or adjust the ... settings. (MA) It's working now? (RC) ... We here you in the Background, just make sure you're close to the microphone ... go ahead, try again. (MA) It's okay? Can you hear me? (RC) It's a little weak, it sounds ... it ... it may if you keep talking, the ... automatic adjustment might kick in. (MA) Okay. I think ... this close? I ... can you hear me now? (RC) We can hear you if we, if we pay attention it's just a little weak that's all. keep... keep talking and it might adjust itself. Do you have something that you want to present ... as a picture or you just have a... a question on your system? (MA) Yeah, I have some pictures about ... (MK) Can you tell us who you are, where you are from please? (MA) I am Miguel from Mexico. (MK) Yes. Miguel, Miguel Angel from Mexico. I have ... two years ... working with ... Plasma sciences. ... well I, I have some projects ... if, like from one year and a half ago. Of a MaGrav of a flower of life, and now I have ... like ... ten different combinations of systems where I've made in this year and a half. And, I think right now I know how to use it. ... I'm, I have right now connect ... two equilateral triangles of ... MaGravs of the flower of life. And I have ... one equilateral triangle of CO₂ and Zinc Ox ... Zinc coat. And with some CO₂ and Zinc ... Plasma batteries. And I have another one with ... another one equilateral triangle of the MaGravs of the flower of life with ... CH₃ cores. ... that's was ... that ... sorry, that is the, my... my final ... work, Cause at the first time I start with another project of flowers. I discovered this connections ... in the trials. So, I have some questions cause I know ... with this kind of a system, ... with a Zinc coat and CO₂ ... I can ... heal, health. Sorry, I don't know how to spell it well but I think I can health ... some persons in a distance. Right now I have ... some, some sort of ... applications, medical applications. ... like helmets or something like that but, it's not really a helmet, it's a helmet??? I call it like that. Cause ... it's just a ??? but it can work like a helmet ... but it's in a long distance. And I'm practicing, practice with some sort of batteries of CO₂ and Zinc for using in the... in the system of the flowers, cause I think ... because, well I don't think that. (MK) Can you show us anything, do you

have anything you can share with us that we understand more what you're trying to explain? (MA) Of course, I have some, some pictures. ... I don't know, ... (RC) If you ... get your... get the picture you want to show ready first, and then share the picture instead of your desktop you're probably better off. (MA) Okay I have ... the picture open. (RC) Okay, go to share screen and select it. (MA) Sorry I didn't find the share screen. (RC) ... Usually it's at the bottom of the Zoom meeting ... window, along with the... (MA) Thank you. Okay? (RC) Yes, we see that thank you. (MA) Perfect, thank you. ... I don't know if there is some ... questions or, of I talk about the projects? (MK) Just explain to us no problem. (MA) Okay ... the first time I didn't know how to use it. Cause I was making ... like a half set. And this, these three ... two flowers are completed, are a ... complete set. Have ... 27 ears in his ... his, sorry, down, and 27 ears up. And ... like I think ... well it's not really I think, I know this really is a complete set of MaGrav. ... these three work ... in different positions and different connections and different ways. I start to ... do it, these kind of connections ... since like I show, like one year and a half ago and when, when I started of the first time was ... the ... how these system was with crystals. But ... then I was ... changing things ... some sort of... of ... connections and like three month ago, four month ago I connected in a tower and I put five Flowers of these, these ones and in a tower, and in another tower I put three and in the five ... Flowers I put ... like six capacitors like... four of Zinc and two of CO₂ and all the Flowers have a Zinc coat. And, in the other tower of the three I put ... three of CO₂ and three of ... Zinc. And when I start ... the connection, when I feels the connection sorry ... I can feel it the Plasma ... like to blocks ago. I was walking and view, well in that time I was walking to the house and towards ... around the, the house you can feel it you, you can sense ... sense the Plasma. And, well the first time I start to sleep well ... my wife too ... We... we change our... our ... I don't know how to spell it but, with Life ... ours Life change it. And ... I start to... to reach more fast ... talking with my Soul. Right now, I have three month talking with my Soul ... not physically I ... sorry like talking, like words, I talk with ... habits. My wife can talk with... with ... with words but ... well let it start at that time. Right now I... I can create more, sorry I'm creating more, more systems like these and I'm ... going more fast because I'm asking my Soul. Huh, if I'm correct to not in some things and if it these ... some kind of system who, sorry what it's going to

help us. ... I know these system can't have ... sorry. (MK) More or less. Carry on.
(MA) ... I, I know these system can't ... you can't use it with ... some kind of
GANSES, you need ... to have ... careful because I make some experiments and it's
very, very powerful and it can reach every cell. So in, at one time, at one time in
one tower I think the three, three, three sets I put ... a ring of CH₃ and in like, two
or three minutes later I start to feel the CH₃ in my lung and in my head. So it was
a big, big problem. So I ... take that GANS away and I'm u... I was using just for
Zinc and CO₂. So ... I, I make a lot of experiments in that case and when I heard
the thing of to create ... the reactors of Flower of Life ... with ... the cores of CH₃
and Deuterium ... in the classes ... I start to create a... a rotational Plasma high
speed Making three levels, different levels I put ... in like in the forum. I put
one, one set more up and another set in the middle and another set ... more
down. So they are in, the three sets are in different levels and I put a difference of
batteries in a different ... set, in different ... in each set, like ... four in one, four
capacitors in one, in the next one ... one and in the next one three. ... I start to...
to feel the rotation in around the... the Flower but just when the Flower see you.
If you are... watching the Flower, the Flower ... you, you can sense the power, you
can feel it ... Well I... I start to, to understand how it works and change the
connections. At the first time ... the towers what I have on the other systems was
in serious. But, right now, I know it's more powerful. You... you use, use ... the
Magneticals. ... some connections, depending on what you're doing, but in this
case ... that's why in this picture I have like that. I've use connecting the
Magnetical's. I have ... the Mag... Magneticals together and I have all the, all the
batteries capacitors, well the most of the batteries capacitors just in one reactor.
And, and the reactor of the left I have ... two in two, two batteries capacitors. I... I
don't really not sure if what is CO₂ and Zinc but it... it's mixed. But ... in the Flower
of Life I have two batteries in front, in the Magnetical and in the same Flower I
have four in the... in the Gravitational. And, in the Flower of the middle I have ...
just one in the Magnetical and the other, in the other Flower not have any. And
right now I have ... another kit of Flowers and there's some... I don't know if ...
I... I can show the connections or you, you guys want to see the... another
Flowers. Sorry? Hello? (RC) I'm not sure may we can proceed to the ... the other
Flowers. That will be fine. If there's no questions from Mr. Keshe there perhaps?

(MM) Okay thank you. These is the other Flowers I have right now these Flowers with the cores of CH₃ right now ... I have connected in the same way all together in Magnetical I was trying in the first time to Nano-coat the... the house or something. Just for trials and to know to understand how these works. But ... I think I make a ... short circuit of the house. So, I didn't trying again. I put just five 'cause that was what I have and I wanted to use it all ... in these, in these project I know these... these Flowers are beautiful in all the ways and very, very powerful. So I have, I'm... I'm careful with these. I need to put ... to close the.. the box 'cause he find out close the box. Because I have ... battery capacitor for, of a CH, CH₃. And if you wait like four hours you can start to feel very, very wrong or bad. So, I need to close ... the box for that ... In the case of the CH₃, in the case of the single or the CO₂ you can have it free and there is no problem in that case. And right now, I know I can create ... tetrahedron of, of ... Zinc and CO₂. I can put ... three base and put six Flowers in a tower ... creating ... tetrahedron of nine ... Flowers between ... Zinc in the front and Zinc in the back just in one, one in the front, one in the back ... one up, one back, one down sorry and ... the other ones CO₂ and maybe a core of Zinc and CO₂. And if the system is watching you... you can reach, reach ... cure your Emotion. I think if... if I change connections and I put these in a higher ... in somewhere high ... and, and the Flower, the Flower is watching you you can start cure yourself to cure your Emotion. I'm not really sure ... what connection I'm missing because, actually I'm just learning and ... Well I was with the need to show these. Cause I have ... using it for a long time but ... I didn't have the time and ... the... I don't know how to call it but, I didn't have ... the opportunity to show it. But ... I want to finish this connections. I ask to my Soul and my Soul told me like, "Don't, don't do anything. Don't do more, ask first to Mr. Keshe" Because, I was going to change the connections again but... I think it... it was too much to... to the connections of the flowers. Because, I think when I changed it, ... I broke something. I don't know how to call it or how it's really working but... (MK) Thank you very much, I'm still trying to understand what you're trying to do. You explained a lot of things but ... I don't understand what you're trying to explain. (MA) Sorry ... (MK) If you can be more precise. (MA) Okay ... at this moment I know how to use it, the flower ... this moment I know ... if you watch the flower it's like when you put a candle inside a crystal and you put

CO₂ water if the candle is watching you, you have... you are... there ... sorry the Fields are reaching you. So, I think it's the same way. ... if you are watching the flower, the flower can cure you, can, can heal you and can balance you ... (MK) What we are trying to do now ... trying, we're taking ... guess-work out of these things and ... we are working with different organizations and Universities to ... evaluate these things. ...background, a number of projects are going on to evaluate the effect of these systems and their... their process and their reach. So, what next few months and years, we'll see more explanation of how these Fields interact and affect us. So ... depends on how you do and depends on how you set things up... ... if you allow me I'm going to go back on a piece of teaching which I ... which came up yesterday and can explain what you are doing here in this, partially as well. Can I share a screen please? (MA) Thank you. (MK) Thank you very much. Maybe... we all can learn a little bit in sharing knowledge. ... One of the most important thing is, I've seen many people... using MaGrav-Systems, using ... GANSeS, Can you switch off your microphone please. ... we, we see ... over years ... that people start producing GANSeS and Nano-Materials and Nano-coating and ... I was in the Medical Teaching yesterday and ... a discussion came up and I think it has to be explained in a way, that a lot of us understand people use or produce these MaGrav-Units, they produce these GANSeS, but, really don't understand the, the way they produced it. And then, they say, "The system it doesn't work." Or, "The system doesn't have the same effect as the other system." Or, they don't understand why things happening. Many of you, you start making these ... boxes of CO₂... and, you produce all sorts of GANSeS which then you use to... do whatever you like with. And then, somewhere in the Lab or next on the same table, you have another MaGrav-System or a GANS-System making another kind of GANSeS and you think, "Okay I have a CO₂ here, I have a Zinc Oxide here." Next to it another table you're producing another plates and you're producing, let's say, CH₃. And so, I'm producing CH₃, I'm producing CO₂, I'm producing CuO, ZnO or whatever. This has been one of the biggest problems in the... in the way that people have been producing these materials. If you are doing one off jobs, doing something it doesn't matter what it is, okay you're learning but if you go into the details and you understand exactly what you are doing it's very important that we all understand one principle, what picture

you see is... in the Matter-State. But, in fact, what you all have and I keep on emphasizing on this, is this: this plate is affecting this plate, this plate is affecting this plate, this plate here is working with this and with this. And, this plate is working with this and with this. So, in reality, none of you are producing one kind of MaGrav and... some... something happens, tomorrow you move this box over here and this box moves over here. Your GANSes produced here are not the same as the day before. And, you're not necessarily producing CO₂ or Zinc Oxide. Or, you're producing a variety of version of it. This is what has to change, if those of you working on ... specific ways to do a specific products or manufacturing certain things, for yourself for whatever you do. One of the important parts is... I was explaining yesterday. When I made the first and the batches and the following it took me three, four years to develop this. I use a box like this. You can go to any hardware shop... and... you can buy a box like this. 24 or 48... divisions. If you are planning to use ... a GANS for a specific condition especially for food or whatever, you got to realize that... this configuration, this now be the boxes you have in the, on your... in your lab or in the kitchen or whatever. This is not the same as having a box here, and a box there, as I showed before. I used boxes like this as part of developing GANSes for a specific job. And you don't need to produce tons of it. Very small amount, but precise decision making on what you want. It's like I remember an Indian ... cook saying, "Those who learn Indian cooking, at the beginning they use half a s... two, three spoon of anything, to give it flavor and taste. But, you need very little to get the best taste in the Indian Curry, when you use very little of each. It's the same as here. When you produce, when you want to produce GANS for a specific part of the body or a GANS for a specific ... purpose, you have to plan it out. Nowadays it's just "bang-bang, do this" and he can do it. When I used to do it, I explain my way and then those of you who understand follow and understand it, if you want to use it. I explained this in the medical teaching yesterday. When, I make a GANS for Energy, for food, I put condition, that I can produce CH₃ in this boundary. So, I set my system that I only produce CH₃ here. If, I am using... condition of diabetic... I produce CH₃ only here. If I'm producing... I'm dealing with a condition of psychological position, pain or whatever, I produce... Zinc Oxide here, anywhere up here. If, I'm dealing with a muscle damage, you want to sort out the muscle damage. Muscle has to have

something between CH₃, needs Energy, it has... a factor of Neuro-system, which is the Emotion. So, this should be the place for it. You can see here, the GANSeS are produced, The GANS here produced has a Element of the sugar, which is the energy it needs to repair, has a ... energy... Emotion to it, on the other side. When you're producing GANSeS, for a specific jobs, even for a flight system, those of you who are involved with flight system, have to understand this. A lot of you just get the plates and randomly do whatever you like and you think "I did it, it doesn't...". because you haven't understood, "Monkey see, monkey does" but monkey never understands how it was done! When, I produce a GANS of CO₂, I specifically choose a place for CO₂, I, connect it as much as possible, with CH₃, but a connection with Zinc. If I have a muscle damage, I bring my CO₂ here. Because now, in this area, this is what you have to understand, this is what has not been understood fully, and I tried many times to explain, Is, here, in one, you create a CH₃ but, there is a CO₂ effect behind it, Because it's a Zinc and Copper and everything else could be in that combination of material in the mesh. Here, I create CO₂, purely. Here I produce, what I need as CH₃ or Zinc Oxide. So, how do I produce it? Here, I put my Copper plate on this side, Nano-coated. Here, I keep the same Copper plate, facing it. Here, I want a CO₂, next step for me is, I place Zinc plate here. Here, I put my mesh in a different way, to make sure I produce CH₃. Here, I have a Zinc, so I keep a Zinc next to the Zinc, both not Nano-coated, but, on this side, I put a Nano-coated Zinc. Now, all the Amino Acids, all the Magnetic Field pressures, become in what I want to produce. When I connect the plates, the connection is very simple. I decide if it's going to be on series, or on parallel, box-to-box. Now, the current flow in this is fully controlled, in every box. I put the first box here, the first plate here, I connect here. I go through the box the way I want to make the connection, and then, I put the last one here. Here, I connect an LED light, which means the energy is totally balanced in all the boxes, continuously. It's the behavior of body of the Man. I have a bone damage, I want to repair. Bone usually sits central. I put somewhere here, Calcium production system. When you take the GANSeS out of these boxes, these are the mature GANSeS for exactly what you want to use for. You have the Amino Acid on each one, which is a combination of an Amino Acid for what you need. Many of you take the GANSeS alone and you say, "Okay, this is a CO₂ GANS I've taken from

this, or it's a Zinc GANS I've taken from this." But, your body's made of Amino Acid, with a common strength to it so the Amino Acid, which most of you have not comprehended, is that this Amino Acid is... Carbon related Amino Acid, connected with CO₂ and Oxygen. This Amino Acid is Zinc connection. This Amino Acid is sugar connection. If you take this [coughs] and mix it with the water, this is what you need for production of protein, for the given disease, for this in certain effects. If you're running systems of... for health, I teach, nobody listens, I spoke about the Amino Acid. You put the Amino Acid from this box, which is specifically for this job, on your, in your system, or in your Core, you link up directly with the disease in the body of the Man. All of you go for this, I go for this. You can only use the Amino Acid in this way, when you set up a box like this. You replicate the body of the Man. If you haven't seen it, I turn it upside down, you'll see another dimension to it. This is my box... the head, right side, left side. Position of the Head of the Man. Position of the Soul of the Man. Now you see, how the knowledge has to be used. Now, you fill your boxes and what you need. Pancreas... Intestine... The lungs... The heart... Sexual organs... Kidneys... Prostate... Then, when you use the GANSes, in the bottom of each pot, You go through... digestion system. When you use the Amino Acid of it, you go, a knock, that's a GANS of Amino Acid, not the Amino Acid itself. Because now, as I explained in teaching yesterday, you have this position. This is your mouth, your stomach, your intestine, and this is what I call the 'sausage tube'. You need to connect the sausage tube with the body of the Man. Which here is outside it. Pancreas positioned here. Sexual organs ???, in this level, all you need to do to reach it. The process is totally been taught, if you go back to original teachings. When you want to feed someone, let's say anorexic, what you need to do? You need... to use these boxes. And this is not for CH₃... to digest, this is for CH₃ to create a Field which sits... around the body of the Man. CH₃ is a giver, so now it gives out. And in what it gives out is according to what is here not needed. And in return it receives the food from the environment. In a way you create a circulation, but what happen if you put... Zinc Oxide here? Now you see the effect. Now is Gravitational. It means pulling in, what it needs. Elevation in... elevation of the Soul of the Man in every cell, because every cell of the body of the Man needs. So, you become more mature in setting up systems. You make a

dynamic system, now you decide what I need to feed. I do with the Amino-Acid
What I need to put in to change I go through GANS of the Material which is
directed. CH₃, Z, H and the rest, but with this, you dictate with the Amino-Acid
the water of the Amino Acid. The new dynamic system which come out of Austria
in next few weeks, you will see it'll be very much controlled. A system will go out
of the ... Austrian Keshe Foundation for dynamic system, it'll be so targeted that
the doctors cannot deny anything. Because it works on this basis. It works on
understanding the work and the condition. I want to elevate the Soul of the Man I
know exactly what I have to do, in which part I need to operate. I've done many
Systems, many Systems in the past. Where people do not understand if I can do it
3-dimensional, this was one of the boxes, I stack boxes this way, if I can draw it
different color that we can see it. So, where you have your boxes that way, and it
goes down, I make another underneath, put three boxes, and you can go in more
specific condition. The box to do with the Soul of the Man, the lung and the heart.
The intestine. Then the box which sits here... carries the exact characteristics,
which you want, but, you sit up, and make a box in one day, as I said, "making one
box, takes me 2, 3 weeks" ... This is why, as I've said, when I used to run, and do
the test, I knew exactly, where I go. And then I could replicated it, in a cup. The
knowledge has to be understood, not copied. If you look at it, when you eat
something, It goes through your digestion system, it becomes part of your lymph.
It's this, which calls upon it. It doesn't go float, find me. This tissue, to do with,
let's say, your lung and the right-hand side, has a problem. The lymph, which is
received the strength, transfers it's energy. Now the lymph finds its way to it.
Because, the call upon the energy is called, and no one has ever understood this.
And I've tried to explain this in so many details before, but it has passed. You have
a problem in your kidney at this point. You have put the GANS, and you've made
the structure, and the lymph has digested the food through the energy. It just
doesn't go anywhere, the lymph at the strength of this, links up. And the lymph's
found its way in the physical Matter to it. Brain organizes as a diversion, whatever
it does not needed. It's surplus, there is no link to it. It goes and stays in your liver.
And, if you understood the work of liver, everybody thinks that the blood feeds
the liver, but in fact, the energies from the lymph passes across the wall of the
lymph... the liver to be stored. Because, liver again has matching Gravitational-

Magnetic field of this, when there is no food of it, it goes up on the liver, and is control by the brain, how much needs to go where. This is how the body of the Man works. But this is how, every being in the Universe works, not just the body of the Man. If you are a physician, in deep Space, and you come across another being, and you see a problem. How do you help? How do you solve, how do you assist? If you understand the concept, if you understand the principal, then it's easy. But, if you have to go to University, to be graduated on how to treat the Man for Human being, or another being from such a place, such a way, then you have a lifetime of University to go through to learn anything about the... every creature in the Universe. But, if you understand the ... principal, every being has the same process. What would you like to change ? Where would you like to reach ? For me is easier to go for the Soul, because at the end of it, they all connect to it. it's the creator of it. But, to be able to handle this, needs a lot of expertise. A lot of understanding of Totality of the knowledge of the Plasma in respect to everything else. When you make a helmet. When you make a helmet, get the box. Now you want to make a helmet, this box here, this is the position where I want to help the ear, the inner ear, the Emotion, the Soul. Which box I need to produce what ? In this process, you have very, very, direct effect. This is all has to be, Calcium nothing else. Here you have totally Zinc Oxide. You want addition of Magnesium, and Calcium. You dictate the position of the Soul. The knowledge has to be understood fully for those who want to explore it. In a way if you look at it, those of you who are mechanically minded or handyman. It's very much like the twin glues. You buy a glue, twin glue you have to mix the two, to get the right combination. Here are number of glues, CO₂, Zinc Oxide, Calcium, Potassium and Zinc. As I have said many times before none of you, I haven't seen many people, I've discussed this with Armen before as well, have gone into producing combination of Zinc and CO₂. Because then you approach the more accurate position how do you produce a Zinc and CO₂ at the same time? You had a Nano Copper here... you put the Zinc plate here, what about if you put a Nano Zinc plate here? What about if you put Magnesium here? Now here you reach exactly what you need. No one listens, so we carry on till we mature to a point that you can understand. When you do this you have to watch where you're Copper sits. The only muscle, red tissue, whatever we have, is on the boundary.

You can even go to the box next door. But knowing you placed this, that you have no Copper interfering. Now convert these, you achieved the condition of perfect Soul condition. Place the water of its Amino Acid, in the dynamic core. And put a fountain of its GANS water in the city. See how many people you change. This technology near enough to it, but not complete, was used by the Russian, in the American ship. You can change the social structure. This is where this Technology now, from now on, becomes effective. Those who've been in my lab, they've seen these boxes around me, I've shown them. And each box, has different color on it. They are still as part of the museum pieces will be shown in the future. This is why the way I worked is so effective, because everything has to be taken into consideration. Not just, I made the zinc box, and I made a copper box, and they do. Those of you who are trying to achieve flight, have to follow this, in production of any material. This is how you become correct, gradually understand the Totality. But, in every system you have to make sure, the two ends meet that the energy is balanced, the conditions created is correct. Now, you can see the operation between the Physicality system, and the Soul system. It's the maturity in the knowledge. If you go back in the teachings of medical teachings, the health teachings, some 32 of them. In so many ways again and again this has been explained, in every lesson. Change this box from the Soul of the Man, to the lung when you have a problem. What's the function of the lung in the boundary? What's the, where is the problem, in the center or wherever? you choose, you can target. This is why from the beginning, I always said, there is an Emotional side to every cell in the body of the Man, every organ. Because, now you connect the two together When the to connect together, they create the Soul of the entity. And you work through that way. It needs two dimension to interact, to produce, to create the Soul. Then you work hundred percent correct You can then go back into space, and change this, to the combination of anything could be in another Planet. Let's say whatever you'd like, a sea. The only difference you're going to get, is this which makes you green. But the process is exactly the same. Understanding of the Technology, in its true essence, has to be done this way. Those who've been in my lab, when I used to do this tests, or in my office in Belgium, they have seen these boxes on my table. But, they could never understand what I was up to. You create everything which is already connected to

each other. So, when you're using the other, trying to balance connect it to each other, they bring balance to the body of the Man or the entity. Understanding of the Technology, is understanding its application according to what you need. When you are in the Space Technology and you're trying to create a lift and motion. Using dynamic system, look in what I've told you, and understand the grid. Then you can understand how you are loading the grid. You always have a mis-comprehension of this Totality. Do I receive more or do I actually need to give to receive more? Or do I pretend that I need to receive, then in by receiving, I increase the pull, that by it, I create the giving? But, I have to find the right ratio to be able to do it. But, because you have used the Amino Acids of the GANS, in either position, now your emotion controls the flight. Now, your Soul controls the flight. This is where we bring the control of the Physicality to non-dimensional systems. When, in the future the Captains of their crafts, those who would like to fly with them, travel. Their key carries part of their Soul, which connected to the system. Tailor made control system without any wiring. In the direction where we are working now, for wireless energy transmission. Which is, very soon people would ask us, "Now you have to give us the blueprints of the wireless system". You don't need to have a switch, that switches it on. By your intention the system come on. Because, the energy's from the center. You enter a room, you need a light, the light will be there. The biggest problem is to understand, how, slowly, I bring the what I've been teaching you in past few months about the Soul, which is your control of it. Then it comes through your Emotion, then becomes your Physicality manifestation. You start learning. Now the two parts come together. For those who still want to see more physical dimensions in everything else. You've got to realize, that the total balance of the energies In the Soul and the Physicality, dictates and is dictated by your Soul. And then you call it intention. Do I need the light to see, when I go into the room, what I see through the Soul of my Soul? Not really, but if you want to see to appreciate the beauty, you still can do. Many of people who understand this process in the time to come, they travel the depth of the Space, by simply understanding the work, of the Amino Acid, as I called, showed you, and their own Soul. Then, you can manifest yourself in any dimension, any Physicality you need. There is a one understanding, and that is, the Soul of the Man, the way we have created it, in through this systems, is

connected to the Amino Acid of this Planet. Wherever you go, you will manifest yourself, in relation to the space and dimension, but in relation to, the Field-Strength of this Planet. You have no choice. You come from the Motherland, the Earth. This is how, we know who, is from where, and what, and what is the reason. Any questions? (RP) Yes, Mr. Keshe. It's Rui from Portugal speaking. (MK) Good morning. (RP) Good morning. (MK) You're a member of the Universal Council. (RP) Yes for the Portuguese language. (MK) Yes. (RP) And my question is, can you picture, or it's too soon? How our interior MaGrav works the lungs with the heart, and with the breathing, breathing in, breathing out. ... taking and giving, to make the... make true our intention? ... let's say, from here where I am in Portugal, I can help the other Souls, to devoid the things applies to, by my wish, they ... and I send them Creator Love that I understand so for they elevate their Souls, and take better the experience they are passing through? (MK) Let me explain to you, let me, before you go any further, let me explain to you something because you are a member of the Spanish speaking, or the Portuguese speaking member of the Council. You are responsible for the Souls of all the Sp... ..Portuguese speaking people around the World. (RP) Yes (MK) We have this hurricane which is going through Caribbean and part of ... wherever it's landing and going through. And you have people who are Portuguese speaking and they are in this position. (RP) Yes. (MK) The gift is given to you as a member of the Earth Council, Universal Council. In conjunction with the Earth Council responsible for that part. If you two match up, and the wish is of the same, you'll find out these people walk away from a lot of things. You have to learn how to work. One of you is the Soul and the other one is the Physicality. And the intention of both to be the same will reach those. This is the beauty of the gift, you will, you'll find out what it is and what it'll be. As you become more maturely understanding the powers you possess. So, if you're Portuguese speaking, and let's say it goes towards Brazil and the islands in that direction which speak Portuguese. Your intention as a member of the Universal Council's, member of those who understand through their Emotion, the language of the Soul in the Spanish, in the Portuguese, you'll find out your wishes will come true. Your wishes is there to be done. We cannot stop natural processes. As I said in the very recent talks, we have earthquakes here and we have hurricanes. You have never been through

magnetic field hurricanes in the Space, and see what mayhem that causes. These are nothing, these are child's play. But, what happen if you have a Portuguese speaking going through one of these in Space? And it call for help? You reach it, because you're, it's connected to you. The point is that you have to make, or you have to have the trust in your Soul, that, "what I wish will be reached." Not to wait to hear on the news something happened, "oh, that was my wish." because you have to have that much confidence as a member of the Universal Council, as any person on this Planet. But, you have been gifted through your Soul to be in that position. And the Earth Council member of the South American continent, come together, make your wish, you will see what will come up. Things will break, earthquakes are there, people will find different problems. But, what is your wish will be done. This is how much you have to have trust in you, in your, in your understanding of what you are there for. I understand what you're trying to say. Can I wish and increase to help the one I want? In a way if you can help yourself, through the same process you can help the others through the same process too. The breathing, the control, Emotion, has to come from the Emotion of the Soul of the Man, not the Physicality of the Man. And this was, I was in the teaching of Caroline yesterday, and she emphasized back on we taught before, you have to have trust in what you have Wished. You can reach all the people in the disaster zone. If, now is the time for South American member of the Earth Council, he's here, Dr Rodrigos. Understand, come together because this is what it is. And if you two Souls match and fit, into exactly what your desires are, both the same, you will see the change South America in the people who are in the line of disaster in the Spanish, the same with the other speaking... Spanish speaking people. Member of the Council who was just now on. You have to start learning how to collaborate and cooperate, in times like this. We cannot stop what we call disasters, these are not disasters, these are the natural processes for this Planet, to live, it needs these processes on a regular basis. It's us who has to find a way. To do, to be able to help to serve. And then you will see the, "Oh, we thought of this it happened." In confidence in your doing, in what your wishes are, will bring that about. Does not need a breathing system, it doesn't need the, a changing of the heart or the lung. Go back to, teachings of the past, go back to teaching of Christ, bless his name. You'll find the answer. Very quickly. That is if he could raise

a dead body, through the Soul, you have the gift much more. You have access to all the Souls. Through the language you have chosen. (RP) Thank you Mr. Keshe, I was trying to see if I was right about the, my thinking in the use to ??? a MaGrav. But ... when I intend some Wish, I feel in my heart if it's reaching or not, I feel it right away. And sometimes I don't feel it so I change my understanding of the feeling who, to reach, I cannot explain how I do it but it's so. (MK) The point is the MaGrav is the Soul of you. (RP) Yes thank you, thank... Thank you very much. (MK) Thank you very much indeed. Any other question? As I've said the teachings gradually, become very, very in depth. For a physician does not need to touch or be with a patient, if he understands this process. You reach through the Soul of the Man, and through it understanding the position of Physicality, you can do anything. The beauty of it is, if Christ through understanding of the elevation of the Soul of the Man, could raise a dead Man, now the Man is in possess of the same knowledge. So those who are gifted, in being giver of the Soul, will achieve the same. The beauty with this technology is that we cannot harm no one. But, you can elevate them to, to pass the harming themselves, or the harm which has been done to them, to overcome. (RC) ... Mr. Keshe we have a couple of people in the panelists who have their hands up. ... Mark Erb and ... Bonafice. We also have Jalal coming in as well. I'll promote him to a panelist. (MK) Can we hear what we have from ... the other two first please? The ones who came in first. (RC) ... Mark Erb maybe you'd like to go first, you had your hand up first there? (ME) Hey, yes this is Mark Erb from Virginia. And I'm wondering if we right now have the capability to harmonize our Souls for the positivity to help join in the ascension of Earth, ... and become positive, Peaceful, loving force in the Galaxy or, and beyond? (MK) I explained this recently in a very different way to some of the most powerful people around the World. The confidence of Peace, and tranquility, has to come from the World leaders at the moment. And, it's the job of the Keshe Foundation supporters, and as I just explained to our delegation from the Portuguese language. It's for them to reach, to understand it needs the work of the two. This is one of the reasons in the background, I promoted, and in a very simple way, allowed or asked or requested, whatever shape or form you want to put it. That the members of the Earth Council, Universal Council, and the supporting and the Core Team to meet to have common sessions. This is the sole

reason for it. That they start working, and gradually as they realize, they are connected, and their connection to each other effects every being on this Planet, will start changing the pattern. When you are in the meetings with the Earth Council and Universal Council, discuss, bring the problem on the table with the Earth Council, "I have a problem, I would like to help people in disaster area there, can I have your support?" Then you see the result. Death, injuries, destruction, is not an end, it's the process we have to go through and depends what we learn from it, or people learn from it. Those are a interaction of the conditions without the Soul. These are the Physical Entities interaction, or, interaction of the Souls of a bigger dimension, that we have no understanding of, we need to understand. But we can help ourselves through the strength which we have been given, or we have ourselves. Gradually all the pieces which you put together are coming together. The operation of the Councils, the operation of us understanding the power of our Souls. And then, once we come wise to this, then the rest, outside the boundary of this Planet becomes very easy. One of the jobs of the Universal Council, and especially the Earth Council, is understanding the efforts, the strength of the Soul of the Planet. This has not been established yet. Members of the Earth Council do not understand this power which they carry, they need to carry. This Planet is like us, has a Soul, have, because it's a dynamic, it's a living thing. Just because we're sitting on a donkey, does not mean the donkey has no energy, and no Soul and no life. This Planet has a life, has a Soul. It's for the members of the Universal Council, especially the Earth council, to tune into this, then they feel what is to come. Why the Planet behaves this way. What is his position in the strength in what to come. You'll find out, you'll feel the changes, you'll feel what it needs to be done to protect, not just the Man, the trees, the animals, and the rest of it. In a very near teaching, I will teach about the Soul of the plants. The interaction of the Soul of the, what we call, 'the vertical people'. And then, how we as Humans have to understand it. Then we will feel them, we understand them through their Soul, we know what we have to do. And how we have to position ourselves in respect to them. Everything in the Universe is a living Entity. It's for us to understand what is connected to what strength that we would like to be connected to it. There is no wasted life, no wasted energy anywhere in the Universe, because, in somewhere, they are part of a bigger

structure, or a smaller structure of life, that we cannot see or we are not aware of, or we are become aware of, but we don't know what to do. If you are a cell in the muscle tissue of the heart, you're just a cell, you're doing your job, but you don't have the comprehension, that "Okay I'm in the heart, I have to move in this position, be there to create a wall that the blood goes through it, that this heart beats, that this Man, this part, can give life to another being, which is the Man, that this Man needs to be in the environment of the planet and the rest." So, in reality, we are that cell in the wall of the heart. How do we become aware of it, of a bigger scale? Unless we go through the Soul of the thing? We cannot go from the cell of the wall of the heart, into the cell of the brain. But as the Gravitational-Magnetic, we, as a Soul of every cell which has one, we can connect and see a bigger dimension. And through the bigger dimension, we become enlightened and this is the whole purpose of these teachings. To understand, to be able to see the bigger structure, and how we are part of it, and we can be part of it, and how we affect the Totality of it. So... let us find our own... power of our own Soul, not find our own Soul. And then let's find the power of the Soul of this planet, then we find out the Soul of the Solar system, and the Galaxy. Then we can communicate with anything, because then we found the secret, we found the key. Yesterday in the, in the teachings, they went through the name of the list of ... attributes of God. And, one of the knowledge seekers, went through it in Arabic, which is on Wikipedia, and the other one in English. And, they went through the ninety-nine names. And then at the end of it, what I explained, that's the Soul of the Man. The hundredth one is the Man itself, the Soul of the Man, the Creator, which you are one. And this is important for us to understand. When you read the reading of the messenger of God, which are a physical messages, and how you have to behave... behave in physical life, and then convert it into understanding of the words, which are the Emotion of the Soul of the Creator. Then you understand the Soul of the man. One of the biggest word, in the world of any religion, in all the worlds of it, in Arabic, in Hebrew, or whatever, in Christianity, is One, it's in the Arabic prayer Islam, it says, "Allah Al-ahad." Ahad means One, Unity. That's the Soul of the Man. In Christianity, we call it the "Holy Ghost." In Hebrew, we call it something else. In Buddhism, but it's all the same. It's about the Soul of the Man, which is One. Now in the box, I showed you how

you can elevate directly the Soul of the Man. There are pictures of these boxes, which I've made, somewhere on the internet. The beauty of it is, when you put your LED on this, which actually, the light... that LED, is the light of the Soul of the system, runs for ever. If you do not play with it, leave it as it is, it runs for ever. It's the Soul of the system. It's the light of the system. For a long time I used to make a telephone call. Just to see how long it goes, because it was going for... on and on, we had to dismantle it. I used to make a call to Dirk Laureyssens, says, "I'm enlighten!" Because, we wanted to know how long this thing will go. This is the way the system works. This is the way, if you understand it, we had to teach you one box at a time. Now it's time to bring the boxes together. And when you bring it together, you bring all the cell, all the Souls together. Because each one of these system has one Soul. Each one of these boxes. Now you create a combination of Souls which is near enough to Man. If you can bring most of the elements, according to where they are in the body of the Man, you'll make it. Any other question? (BB) Hello Mr. Keshe? (MK) Yes? (BB) This is Boniface ... from California. How are you doing? (MK) Not too bad, thank you very much. (BB) I have a... I need clarity on something ... We were grateful for the opportunity to ... contribute, while we're trying to get the ... World Peace Treaty signed. ... Now, it appears that since that time, from what you were saying earlier this evening, ... there is some activity going on from... from the Council, as for as reaching out to world leaders in some fashion. I guess I'd like, you know, some clarifications, or some clarity in terms of ... what exactly they are doing, and how can we Knowledge Seekers help with that effort? I think I have some idea, but I'd appreciate if you could sort of articulate. (MK) You give us your ideas or... and then I articulate. (BB) [chuckles] Fair enough, obviously there is no Haifa in the ... in the equation. (MK) There is no what? (BB) Haifa. We're not inviting them to Mount Carmel, to do anything there? (MK) ... Let me explain that one. The... the reason I choose Mount Carmel, Haifa, was for the end of the belief in the Baha'i faith. (BB) Okay. (MK) Because they're... I explained to you reason, I explained this before. ... The cornerstones of the Baha'i faith is, it's established to bring World Peace and Unity. And the Mount Carmel was chosen, and the building of Universal House of Justice was... was dedicated and built and was promised, that it'll be used for bringing the world leaders to sign the World Peace. And when it

was offered to them, they refused it. So, they went against the wishes of Bahá'u'lláh, bless his name. That's the end of the Baha'i faith. They finished their own term, when they went against the wishes of their own... Creator. This I knew before, that they will do this. You will see the start of the demise of the Baha'i faith around the World. (BB) Okay. (MK) This was in special... let me explain this, this is very important. This... this was risen in a conversation with governments, very recently, "Why did we choose Haifa?" Because it was every... You cannot kill. "Thy shall not kill", but you can kill yourself, you can demise yourself. The cornerstone of the Baha'i faith, the whole belief of it, is on bringing World Peace, Unity to Mankind. And when the opportunity was given to them, they had to refuse it, which I knew from the beginning, they will do. Because, of the way the structure is set. Abuse of the name of God. But, this is a more recent one. This was to bring an end by themselves, into going against the promise of the Prophet, which was built to be done. When is it going to be done? Who's going to bring the World Peace? Who's going to bring the world leaders to Haifa, to Mount Carmel? If they are waiting for there, one day they do it? And they are all busy with one thing: Gathering more wealth. Second Vatican is getting established in a faster way. The reason I chose Mount Carmel, I knew they would not say... They will say "no", because they had to bring themselves to an end. The cycle of Man by the profit of Physicality, with this action has finished. They... they had to do it themselves, not us. That's why we went, as from the beginning, as I explained, in a dimension, as we stand worldwide, without the temple. We established the Peace in the Soul of the man, not in the building, on a mountain, which was promised. And, the leaders of the Baha'i faith went directly against the wishes of their own Prophet. So, they brought their termination to their own end. (BB) Okay, so that would mean then, that ... we can reach out to any world leader, besides China of course ... (MK) You can reach anyone. (BB) I'm sorry? (MK) You can reach, there is nobody besides. (BB) Well I recall you mentioning that ... (MK) But the Chinese have to do it with their governments. You can do. What we said, what we said about China, is we have to understand the political structure in China. And, and on the other hand we have to understand there are forces, and the works which are done, beyond ... understanding in public domain, with different Nations, with different governments, and we have to respect one by one

of them. There are number of countries which now, Keshe Foundation followers, are talking to governments and the leaders of the Nations. Very recently, Very, very recently, I was on a flight with one of the World presidents. And ... it was very easy to open a conversation, in respect to the World Peace Treaty, in respect to her country. But I sat and I said, "My Soul goes to her, that she gets elevated to the understanding. And... understanding of the Peace." The Keshe Foundation followers are not very weak people, we have some of the most powerful people, business wise or politically, understand, and have been touched by the knowledge of the technology, and the Soul of the technology, and the Soul of the Foundation. And they are working in the background, a number of people. But, we don't go open anymore, because we have seen, in so many ways, instead of supporting they are those who believe in destruction, because then they have to confirm their existence. So, as you've seen, in our teachings, in past six, eight weeks, we gone totally in a different direction, we just teach. We excel the level of understanding of Humanity, and with it, it'll bring the other World Leaders. You have to carry on teaching, you have to carry on putting request, again and again, to the World Leaders. We... we learned this one, especially from the prime minister of ... Australia. One of our supporters, in talking to the ... Australian prime minister, found out that the prime minister never received the invitation. And, what we received, the response back, that, "He's occupied somewhere else." Now, they are approaching a totally different way with the prime minister. We have to carry on till to the point comes that they receive it, they understand it. Because, there is so much filters goes on, reach them through the Soul. We have a huge, huge problem, in our failures, blaming the others why they're not doing it. The Keshe Foundation supporters don't stop. Don't stop teaching, Don't stop writing, to the same ambassadors and everything, every few weeks, till you gets through. We have to mix the Emotion, the Soul and the Physicality together. We, we have the next step with a number of governments, presidents who are lined up for us to talk to, in respect to these things. (BB) Excellent. (MK) Don't stop teaching. Don't we... We... we negotiate. I, as I said, ... no one knows where we are anymore. Because we use to do and they used to target... it's a bunch of, what I call, 'hooligans'. But in time, they're all going to be looked after, there are... the government has started taking action for these things. But now, the process is

much more stronger, it's going in the background, in a very, very dynamic way. We communicate with our people, who are there doing things, we negotiate, we setting up different factories, we don't go anymore one factory somewhere they can target. we have splashed it around, we.. we have the strength to do it, and those who are in the background, they know what we are doing. We're taking more... charge of creating condition for Peace, through the work of the Keshe Foundation. As I was talking to ... some of the directors of the Keshe Foundation this morning, none of us has sleep, we just get enough asleep, just the physicality, to be aware, we wake up, we just work for one target, to bring Peace, we know because, we are correct in what we are doing. Many of the directors of the Keshe Foundation, many supporters of the Keshe Foundation, work around the clock, in trying to bring Peace, in trying to make sure the technology, is in front, is done with the correct way. ... Some people see it as a bad thing, but I see it as a positive thing. We were not aware of what's happening in Peru, till people who are the Keshe Foundation supporters, went all the way from Holland to Peru, to find out... to attend the teaching, which we had no awareness of, I was supposed to be there, without me knowing, because they made false promises, and then, we... with their writing, we realized there is a pitfall, there is a mist... there is a mishandling, by people who's pretend to be the supporters of the Foundation. So, our own people, in a way of bringing to open, we don't go and silence it and shut it up, ... we go to understand it, what the problem is, to solve it. Now we understand, thanks to our Dutch people ... going all the way there to learn how to make energy unit, opening a work of one man who tries to do things for himself to benefit himself, his pocket personally. But, till they don't bring... It's the same what happened in Germany. In Germany, there was a lot of problem with one guy who was trying to do workshops, we found out there's a lot of problem in there, so we had to sort it out, we had to eliminate or isolate him that he's got nothing to do with the Foundation, when he's trying to use the name of Foundation. These things happens continuously. At the same time, we have group of people who work with governments. There are many Keshe Foundation supporters who are working directly with Keshe... with the governments in trying to structure different ways, that we are there to do things, and it allows us to go into the governmental structures. Yesterday... the day before, we received a request from

one of the major corporations that they want to look into the technology for their... for their benefit. And it's all coming together because there are people who continuously work. I... walked this morning in... just somewhere to have a coffee, in isolated place, and a guy came... came and sat next to me. And he asked, "Are you Mr. Keshe?" I said, "Yes." And then ... in the conversation he asked Caroline, couple of times, "Is he Mr. Keshe, here?" Said, "Yes", she said "Yes this is Mr. Keshe". And, conversation leads to another, with some other things, which can happen, but you see they are working and they do things in the background, the guy knew everything about the technology and met here and there and then it can lead to something else. The Ethos is to work unconditionally and it'll come to. We are giving from our Soul. ... You are supporters of Keshe Foundation, don't stop developing technology, to you it could be a mistake, it could be something wrong, but when you bring it out, somebody else can learn from it. Don't stop approaching the Ambassadors. Don't stop approaching the World Governments, continuously. Because, somewhere down the line, somebody opens up, "Why we haven't been told?" It is the time to change, but we have to do it. Keshe Foundation supporters are very silent, but they are working very effectively underneath. Do not expect to see results tomorrow, the... the... the position with, different governments is coming up so rapidly. We negotiate. Keshe Foundation team, in past three, four months, have been traveling right across the World, everywhere. The way they are moving things around, don't discuss anymore, we don't need to. ... you will see new developments everywhere, we don't operate that way anymore. The only thing is we saw a problem in the workshops, we saw an miss-justice, and thanks to our Dutch followers, who brought it to our attention, we stopped it, but it brought us progress. Their complaint showed a weakness in the structure of the Keshe Foundation, and then we thank them, thanks Richard, and other Richard in Holland, who brought this up to us. Now, we've stop the abuse, because at the end of it, I get blamed for it. But, is not a blame. Organizations like this finds people everywhere around the World, who try to abuse it. But, at the same time they are huge supporters who do the other jobs. (BB) Well, thank you Sir, and thank you for the ... opportunity to help out. (MK) Thank you very much. Don't stop enlightening your president, he needs it more than anybody else. He needs a

lot of elevation in Soul. Any other question? (RC) ... I'm just looking at the list here, and ... let me see, was it Mark Erb, did we hear from Mark yet? complete ?? (ME) ... Yes, you heard from me. (RC) Okay, thank you Mark. ... is there anyone else in the panelists who... with ... Oh! Jalal I believe that you had your hand up? Can you speak now? I can try to unmute him, but it's always a bit risky. (MK) Yeah, no problem. But, please for those Keshe followers, for you who are Knowledge Seekers, understand the teaching of this morning, because this brings a new insight, new dimension, in both how you can run systems, understanding your own Physicality, without actual physical interaction or input. If you understand this new process, a lot of new medical systems can be developed. If you understand this process what I explained, new materials can be developed. Mutation of elements comes from these kind of processes, because now you create new conditions. If you go a step further in this knowledge, and you understand it, so if you all looked and did a lot of... we've seen a lot of works, I saw, I said to myself, "How come they don't follow their source?" It's in a way we have to do the simple systems to become more understanding to use a bigger system. Now, instead of each box, place a dynamic reactor. With different combination of load. I promise you two things, because I've done this before. Some of these will fly off. Some of you what you got to look for, is production of new materials, in the gaps, in the spaces. The operation of this reactor, can lead to production of gold at here. Where operation of this reactor can lead to production of plutonium here. This opens a totally new dimension. This brings us to nearest, closest to real work of any system, in the Universe, at least, with the knowledge you have now. Don't wait to see, understand what Fields it creates. Understand the process. If you are waiting to see a literal physical condition, then you already failed, you haven't understood. But, if you put the system here, and you wish happiness, and you find in that place what happiness, in what, which one, which system was the cause of, transmitted, directed. Try the dynamic system in the right combination. Set the dynamic systems like a Soul of the Man. Now the scientific world we know some scientific organization have started doing, testing these dynamic systems for construction of like Helium and Plutonium, and the rest. without actually the material. For me with my knowledge, it's so easy to deplete, every nuclear warhead anywhere in the World. The physical structure is

there, when they open it up, there is no material inside. The whole knowledge now needs expansion, not teaching. Needs to be understood. Need to go to the next step. Needs to be comprehended in its, literally, real operation, then the rest is easy. Then what you will see, it's very simple, you will start seeing balls of Plasma, in different positions, in different colors. Because, they create a condition of dynamic. I know one guy who's got a hundred dynamic cores, but they're spread everywhere, you cannot see anything. If you brings the hundred and sets them up this way, in a coordinated manner, then you'll start feeling their Fields. Those of you who are in the space technology, trying to achieve flight, understand this then you see it. In so many ways if you look at what is here, and you look at the Star formation, this Star-Formation is for Flight System. So, somewhere here you produce a field, you should see a Plasma. But the more you push, the more interactions you bring, the more it comes, because the ratio is more or less 1:3. You need to absorb from three directions, to be able to give from one, because the giving is much more, you have to receive more to be able to give more. That's why the Star-Formation is made. Now, you have the same thing here. Start understanding, then you'll fly. You can solve every problem, even in the Medical Systems. (JG) Mr. Keshe? (MK) Yes? (JG) Good day Mr. Keshe, Jalal here. (MK) Yes Jalal. (JG) ... can you please after you finish this subject, ... speak about fear? (MK) No, why should I? I speak about the joy, you carry the fear. (JG) No, how to... You know why Mr. Keshe, because our life is, all our life is created of... of fear. (MK) This was... was one of the names you read in the teaching yesterday in Arabic con... (JG) Yeah. (MK) Contain fear? (JG) Yeah. (MK) Which one? (JG) Adh-Dhaarr. (MK) Yes, but what does it mean? Is that fear of you from yourself, or a fear of you from something you don't know? (JG) No, it's ... the fear that we cannot give, because we lose. That's why I'm bringing this subject. (MK) No, the thing is you have to go in a different dimension. When you give, you've given what you don't, what you can help, not what you don't need. If you look at it that way, you succeed. Look at the, the fear is, "If I give I lose!" But, if you look at it that, "If I give I succeed, for somebody else to succeed, for somebody else to be..." Are you... and this is something, which we have to, to solve inside ourselves. Do you have any fear, to teach your son mathematics and knowledge ? (JG) Absolutely not. (MK) So, why'd you have fear for something else, that you give?

(JG) Because, we're structured like this. (MK) No, we have decided to be, we are not structured. (JG) Yeah, I mean, I mean the, the ... (MK) It's a big difference, it's a very, very big difference, this is what I said, "Fear has been part of the Physicality, not the Soul of the Man." And, when you understand this, then you don't need to worry about it. There is no... the fear has been used and elevated for matter of control, of the Physicality. The Soul has no fear. You go back, you're a Muslim, look at the life of Muhammad, bless his name. Did he have any fear, when he went and start demolishing the... what you call it, the 'statues' ? No, because he knew by it, he brings people to be detached from the Physicality of this Planet. Statues connects us to the Physicality of this Planet. Why do, why should we fear part of it ? The fear should be in me not being able to elevate another Soul. Does not matter to happen to me. The fear should be ... "me not being able to serve the others. Not, them serving me." Then, there is no fear. Then, there is a joy because then, when you see your son, from your teaching, becomes a highly educated Man, because you helped to do it. Do you have a fear of highly educated... unless you are a father who doesn't want to see the success of your son? So, what is the fear ? The word fear should be, fear of failing to elevate somebody else. Not, "what's going to happen to me?" And, in the physical world, is "What's going to happen to me?" Do wrong, you'll be chopped your hands and the rest of it. Do this, we do this, don't do that, there is a punish. Punishment has put cause of the fear, for stopping you to elevate your Soul. So, you always physically worried, "What's going to happen?" But, if you understand, the fear of the Man should be, "Where I'm going to fail not to elevate another." then you have no fear, because you give unconditionally. Redefine, then you succeed. Any other question? Shall we call it a day, it's over 3 hours ? (RC) Well, we do have a number of questions in the Q&A, and ... (MK) Yeah? (RC) we have Alberto who had his hand up, that perhaps we can allow him to ... (MK) Yes, I get complaints, regarding you Mister Richard Crammond, Rick Crammond, that... (RC) Oh, why? (MK) He is choosing who he wants to elevate, we never get promoted to ask our questions. So ... [laughter] (RC) I try to get everybody... There's like ... 6 different questions in the Q&A. I try to get the people with their hands up first, right? that are actually saying things and participating verbally rather than ... (MK) No, I just, I just pulling your leg. (RC) Tough job, tough job. (MK) Tough job. I don't

want your job, is mine is easier than yours. (RC) I don't think so, I wouldn't want your jobs. It's a really tough one. Anyway, perhaps Alberto could ... go in here, or perhaps you can ask ... you can answer quickly a couple of questions you... there are two questions, actually about the salts, about mixing either different salts, or what salts would be in the, in the initial 24 tray... 24 the segment tray, that you showed there. (MK) ... Salts, re-organize themselves, does not matter where you start. You got to understand, when you make these boxes with the GANSes, start producing in it. None of the material is in the Matter-State. The old behave according, changes according. Where you put a Potassium, or where you put a Calcium, now that creates a salt of Potassium, because now it's part of the Fields of it, it's not in the Matter-State anymore. These systems are self-regulatory, according to the Field-Plasma condition (RC) Okay, that makes sense, that's a good ... concise... (MK) No, this is how it doesn't make "ss... ss" ... this is how it works. Our body according to material, which entered it, created the salts for it, to confirm to be able to attach themselves, to attach them to itself. Our body continuously dilutes different combination of salts according to the material, which arrives in the body. If you look at the intestine, intestine is a very salt channel and according to each section, according to a structure of the intestine... wall of the intestine. The field, which creates in the center of it dictates, what soul condition, what material energy will be released. Is it CO2 I'm going to release, CO2 of different strength and everything else? If you look at the intestine, intestine is the biggest salt machine in the World. But highly controlled according to the material arrives to it. So, if this is the intestine, here, when you have materials in different sections, do not forget, that intestine itself is made of 3 layers of walls. So, what you have, is the Physicality of... go back to the medical teaching, done 3 years ago 2 - 3 years ago, where we speak about intestine, when physically was shown, that they're 3 layers, that's how we get it. So, these are all in a GANS-State. So, the environment in this center of the GANS ... center of the, what we call, the food going through, of intestine. Sits in a very, very ... Plasmatic GANS condition, which as the material are come in, in the stomach has converted to GANS. Now here, according to the strength of the wall, they become which salts combination is needed in here, for them to be able to release their energy. Then it's the body, which adjust itself, but it's the same material all the time. That,

what is needed in this place, according to the strength, which are created, we need a salt of Potassium for to absorb all the Potassium, whatever it is. It's literally starts with the heaviest, because when it gets a heaviest easier one comes to the end and in part is totally opposite. The lightest gets absorbed first and then the heaviest. It's a double function. What you gravitationally, what you magnetically produce. Because the stomach is the same, intestine is the same, there's Gravitational-Magnetic Field. I take, what I need from here the lightest, what I'll give here, the heaviest. At the bottom, I take back the heaviest, and I give in the lightest. That's why in the last section of the body, Cesium is absorbed, back in. Where Cesium is actually absorbed back out into the body this way. This is the process, which you understand. The salts of the body are created, according to what man has used over time and it's become part of his life. So, body needs to absorb it, because it's the energy it needs to create the salt for it. We don't go and eat salt of Magnesium, or we don't go and see though salt of Calcium. We eat the national NaOH... NaCl, and then in our body according to what it needs, a combination produces its salt, which is there. Because, what is the salt? Salt is a gravitational system. If you look at all the salts, in essence, they're all... somehow connect themselves with the Oxygen. In most of the cases, they need a Hydrogen to become an acid condition, that it means ... giving energy, and in the other side, they need to become oxidized, which heavier than the Hydrogen, then it pulls in, the energy. That's all the salts is for. It's to level, balance, and then, it can with this balance, by Hydrogen or Oxygen, that it releases, at the same time absorbs. If you look at NaCl, look at it, you don't get a combination of Na with H on its own. You get a Na oxidize with a O, C connects to H... becomes a Acidic, which is a giver against a Gravitational, which is NaO₂. ClH is weaker, but it releases so much more. NaO absorbs more, is Gravitational, it absorbs more energy. And then, the body according to what it comes, according to the Fields, which is going through, it's the same as how you manifest yourself in the Space according to environment you're in. Then, it changes to acidic condition or the alkaline condition, or the salt condition, what you call it, of Potassium. Another, another it's the stomach... structure of the intestine, which dictates the salt, nothing else. We don't eat it, we absorb it, and the beauty of it is, we absorb most of the Sodium we need, or most of the salts, even the Calcium we need, through the breathing system. . in

our breathing. But, this is part of it, which in the future I'll explain. (RC) ... Mr. Keshe, maybe you ... before we go, you could answer a question from Dani Mo, who has ... two different questions in the Q&A, and her hand up now. So let's... maybe we could, just address that. I can ask the question from the Q&A, bring her into the... as panelist It's ... question is regarding, "Question from the German community, forwarded, regarding the Tritium GANS experiment." "A lot of GANS is produced, once the CH₃ has been added to the CO₂ box. Can the GANS be used for health applications?" "And is it CO₂ GANS with CH₃ fields?" "Thanking you." ... Maybe she can clarify, if there is any problems with... (MK) Any... any... anytime, this is, what we had in the teachings, even yesterday, in ... in the... ... what you call it? in the afternoon ... Private Teachings ... Anytime you use CH₃, anytime you use CH₃, it has to be used in conjunction with CO₂ and Zinc Oxide. Because, we absorb energy according to the Emotion of the need. And it's important for us, to understand that. And then you have ... you need a ... what I call, 'connection' ... in, ... in a layman language, you need electrical connection or wiring to it, which created by C, with a Carbon, So, anytime, even you concentrate, I was... I was explaining this in ... the Private Teaching, yesterday. Those of you, who try to go and just become GANS drinker, it's the most wrongest thing, you can do! If you go through the process, if you listen to our teachings in the past. You cannot become a vegetarian, "From tomorrow morning, I'm not going to eat meat tomorrow." As I explained, in many of teaching, it's you who's going down the motorway 100 m/h and then, it's only you, who puts the brake on, the rest our going 100 m/h what do they do? They crash in you and they create all sorts of mayhem. Just because, you feel I'm now going to be vegetarian, I'm going to be vegetarian no meat eater from tomorrow, you done it. The body is not going to accept it, because it's still going down the way, I've been tuned to have meat energy of a certain ... strength for my operation. Now I have to adjust everything not to go back... and this adjusting causes all mayhem inside you. It's the same, with those of you, who going for a GANS as a food replacement. Many people do, I know Chinese have gone very far with this. But, you have to understand, you have to satisfy the Emotion, the feeling. And you have to make a connection, between the energy, you ..., new energy, you bring in, and, the new way, that Emotionally, you don't get disturbed. A lot of people, who start drinking or becoming a vegetarian

or drinking Zinc Oxide, or what you call it, CH3 most of the time, energy goes, "Oh, I've become a vegetarian, I have to watch. Do you know how much energy you use, just to control this thing? Because Emotionally, "Oh, I feel, I like meat," "Oh, I feel guilty because I was eating meat." And it's a Emotional play. Where is natural, you see a sweet, just go for a sweet, because it's something you enjoy. It has to become that way, It has to, but you have to organize it. It should take months and weeks, that you change to... .. even using energy directly as a GANS, in a ... in ... in a right way. You have to satisfy the right connections, you have to satisfy the Emotion. And then, gradually you build into it, you don't go from tomorrow morning, "That's it, I'm not eating any food, I'm going to eat GANS" One meal, every 2 -3 days. That is satisfied. "I miss a dinner, I don't mind because I took a GANS." I met a Chinese guy, who actually being social on the table, he eats maybe a fruit. But he lives on GANS, and a lot of Chinese has start doing this, a lot of other people, because we don't want to depend on food, you cannot do it, you ... you have to adopt body to accept, and then secondly, one type of CH3 does not satisfy all the needs as spectrum of the body of the Man. Unless you have trained it. There are people who eat only, bag of crisps and a coca cola, twice, 3 times a day and they don't touch anything else. No food at all. And they haven't eaten food for years. They won't, they sit on the table, they're happy with bag of chips, One of my brother-in-law's that way. He's in his 40's, 50's. The only thing he has eaten even, when he was going to Oxford University, we met him ... only eats bag of crisps, every day. The same crisps, day in day out, the same drink, no other food he touched. There are people, who are mono-eaters. One of the richest man in the world, he only eats a piece of burned steak, every night in the same restaurant, in the same seat for past 30, 40 years. You have to... Then from that, the body has learned, that it needs to convert everything to the right things that the body needs. He is one of the top 2 - 3 richest man in the world. Read his life story. It doesn't mean that, you cannot do, but you have to understand, how to do it, and progress into it. (DM) Hi Mr. Keshe ... this is Dani. (MK) Yes, Dani. (DM) ... I have questions here from the German community, forwarded, and, they were wondering, when doing the Tritium GANS experiment, they... once they have added the CH3 to their CO2 box (MK) Yes (DM) A lot of GANS is being produced, and they're wondering. Is that CO2 GANS, or is that CO2 GANS with

CH₃ Fields, and can it be used for health applications ? (MK) First of all, I can't answer you the last part, but if you ask me, if it's a CO₂, depends what you use, did you use a plastic to contain it inside, or they use ... glass? Did you seal the top of the box ? That there is no transfer, it's a glass, it's a ceramic, at least, less transfer of energy. Then, the position is, do you produce CH₃, depending on the field you produced in the box underneath? And, if you have seen the changes in the top box, have you produced, or just you producing CO₂, you're not extracting anything? (DM) Yeah, the answers to that is, they have tried experiment with glass and with plastic and the box is sealed. So, ... (MK) So, when you do it with the plastic, you create a condition of absorbing the Carbon from the plastic and from the CH₃. The Hydrogen stays in the bottle. The Plasma of the Tritium stays in the bottle. What is done, it's the CO₂ GANS, you collect. And depends how orange, more orange that, orange goes and it changes. Do you see any black ... spots at the bottom of the top glass or in your bottle? Those are the Carbons, which have converted into the Nano-Atomic Carbon, when the ... Hydrogen is released as a Plasma. You have to observe, what you go... what you created. It depends a lot on the salinity. it depends a lot on how you connected the wires of your two plates, and if you connected it to LED light, to create a balance. You don't connect it to a power, and you don't connect the two plates together direct. ... there is a process where I was teaching very recently, you can put a ... Plasma battery, one in the liquid of the CH₃, one inside the CH₃, and then you create a very slow flow, then you create a very, very dynamic ... Plasma of the Tritium. (DM) Yeah, is it the same with glass, with the glass container? (MK) We more or less, Yes, because the CH₃ can cross. The Carbon can cross if you create a Field enough. There's no borders for a Plasma Fields, the Fields have no boundaries, no barriers. (DM) Okay, I'll try to.. (MK) But you have.. Let me, let me explain. But you have to make sure you have enough water Oxygen inside the system that you can absorb to convert. (DM) I'll try to forward that answer to... (MK) Thank you very much. (DM) To the people with the question. They... they had another one there, just a quick one, ... they have one CO₂ container which is sealed, and it is completely filled with salt solution, and the plates are basically under the water. But it's still producing, so the question was, "where, where is it coming from, where is the CO₂ coming from, the GANS? If not from the air if the container is

sealed?" (MK) I don't understand, can you explain? (DM) Yes. They have a CO₂ box, which is sealed, and the plates are completely immersed in the water, (MK) Yeah. (DM) And it is still producing a lot of GANS. (MK) That's correct. This is exactly how you're in the other box with CH₃. (DM) Although it is closed, yes? (MK) Yes, you transfer Fields. That's how you're producing CH₃, there is no difference between that one and if you're just seal a.. The reason we seal we... I... I recommend to seal it, is for anything else for trying to stop the production for Amino Acid on top of the glass. Because, it creates a different condition, that's H₃ is not favorable to be created. The reason for sealing the Bo... the container, is avoiding the production of Amino Acid, even though you'll some, it'll be produced. Is a filtering. (DM) Fantastic thank you. (MK) Thank you very much, thank you, I thank the German ... what the Keshe Foundation supporters, for your ... work, and ... watching your work very closely. ... then hopefully we soon go back to opening the Keshe Foundation manufacturing Germ.. manufacturing now that we understood what went wrong there in a short time we'll support the German ... Keshe Foundation heavily in that way. Thank you very much. Shall we call it a day? (RC) I think that's about it ... Pia, ... Pia had her hand up ... here, maybe she could have something to say to end things here? And ... yeah, we should wrap it up. (PL) Oh yes hello. (RC) Hi Pia. (PL) Hello it's... hello everybody, and ... my name is Pia and I'm from Denmark. And ... I just want to ask, wanted to ask you ... when I heard you say about ... talking about the breathing ... is absorbing salts in the body. ... I just got the idea ... to ask you, is, how is that connected ... with the Nano, now they... you have the Nano-coating process in the body. Is there any way to ... (MK) We don't Nano-coat, we have no Nano-coating in the body. (PL) Okay, okay. (MK) It's a Plasma Fields, it's a GANS State, everything... everything in the body of the Man, when you become Nano, you become in a Matter-State. (MK) And in the body of the Man, (PL) Yeah. the only Nano-Materials which we have as part of our body, is ... our nails, and our hair. (PL) Okay, yeah. (MK) ... so the skin is not in a Nano layer, it's a combination of Field interaction. (PL) Aha, okay I see that. (MK) Okay? Thank you very much. (PL) Okay. Thank you. (MK) Shall we call it a day Rick? It's nearly three and a half hours. (RC) Very good Mr. Keshe, thank you so much. (MK) Thank you very much indeed. Please support and do not stop ... going to the press, to the different

organizations, to the governments, to the embassies, for One Nation, One Planet. ... the more it comes out the more it'll be heard. The... the process does not matter how it comes, from where it comes. is our Soul in it, it will happen. And secondly, I would like again thank the Dutch ... group, ... Richards team going to Peru to bring us to enlighten us about the, the abuse of the Foundations name and the opportunist people, who do not belong to the companies and organization of the Foundation. To benefit themselves and enlightening us that we put a stop, this loop hole. Thank you very much indeed. (RC) Okay, thank you Mr. Keshe, I think I forgot about Alberto there but ... maybe he can put his hand up next time around and we'll take care of that? (MK) Thank you very much and, can we go out with the music? (RC) Yes, I think Flint has that lined up. So let's do that ending and thank you everyone for attending today the 190th Knowledge Seekers Workshop, for September 21st, 2017. Okay, thank you Flint.
