Transcript v1 from Amara subtitle file revision 8

The Keshe Foundation, an independent, non-profit, non-religious, space-based organization founded by nuclear engineer Mehran Tavakoli Keshe is introducing to humanity the Science of the Universe, Plasma Science Keshe Foundation develops universal knowledge and space technologies that provide solutions to major global problems, revolutionizing Agriculture, Health, Energy, Transportation, Materials, and more. The application of Plasma Science in the form of specially developed Plasma reactors and other devices, will give humanity the real freedom to travel in deep space. Plasma Science exists throughout the whole Universe. It is here and it belongs to you. Our knowledge, research and development regarding the Plasma structure has progressed to the point of enabling everyone to participate in the process. Become a creator and understand the work of the Universe for the good of humankind on this planet, as well as in space! The use of MaGravs, Nanomaterials, GANS, Liquid Plasma, Field Plasma and other Plasma technologies have come as a new dawn for humanity to progress and work in harmony with the Universe. Conventional technology applications are wasteful, damaging and cause pollution to the planet and all living beings. Plasma Science provides solutions and improves existing methods and use of resources in all aspects that touch the lives of all beings. Plasma is defined by the foundation as an entire content of Fields which accumulate and create matter and it's NOT defined by its physical characteristics like ionization or

temperature. Also, with Plasma science, we understand how we can convert matter back to the Fields. Quoting from Mr Keshe, "MaGrav stands for Magnetic-Gravitational, which means Plasma absorbs or gives. And every Plasma has the both, it has give and it has take... And when they can't find the balance they distance themselves until they find the balance they can give to the others that they can receive what they want to receive and give further." Certain atoms and molecules release and absorb Magnetic or Gravitational Fields. Released Fields are available to be absorbed by other objects. The Keshe Foundation has developed a way to gather these free-flowing Fields from the environment within a resourceful and beneficial new state of transitional matter which M.T. Keshe named 'GANS'. The first step of the process of the formation of various basic types of GANS, is Nano-coating metals. This is carried out either chemically by etching (steam coating with Sodium Hydroxide) or thermally by heating (Fire Coating by gas burner). During either coating process, gaps between the outermost layers of atoms are created. The residual coating is often referred to as nano-coating, defined by the structured layers of Nanomaterial, which build up during the creation process of the coating. Nano-coated metal in interaction with other various metal plates, in a salt water solution, creates MaGrav Fields. These Fields then attract available elements to form a specific GANS, which collects and settles at the bottom of the container. This GANS is formed from independent energized molecules (like little suns) that can be used in various applications.

(RC) Welcome everyone, to the 192nd Knowledge Seekers workshop for Thursday, October, 5th 2017. And, once again we'll have Mr Keshe of the Keshe Foundation Spaceship Institute speaking to us, and I understand today's ... particular topic will be plants, also known as, 'The Vertical People'. And, I think we're ready to begin today's proceedings. Hello Mr Keshe, do you want to take it away ? (MK) Yes, good morning, thank you very much Rick. Good morning to you, as usual, wherever and whenever you listen to these Knowledge Seekers programs. As you are aware, we have started the teachings in the matter of matter. And through that, we have shown, that the Soul of the Man is made through the same process, and there is no difference in the process of Creation in

the Universe. Some of the things, which we'll talk about today, is again part of the teaching, which some of the Knowledge Seekers in the private teaching have already come across, or they need to know to be able to understand to further their education of understanding, this work of the Universe. In so many ways, this had to be done this way, and we carry on by the same path. But today we to bring an addition to the knowledge, to understand more in depth, how we look at the plants. What we look at ... food to us, or flowers we look at, or the trees, we use their ... what we call, 'the physical bodies' for different applications of Human use. How do they feel ? How do their Soul has come about to exist ? And, do they actually create themselves to be used in a way they sacrifice their life for us, or others, animals or whatever, to give us a chance to survive, and have a comfort life? Do they reproduce themselves knowing, that with that, they elevate the Soul of the others. For example: We know how plants can literally destroy themselves. Can die. They can create a condition that if in a position they don't want to be, not to be. But, how come they exist that they know, through their existence, they give life to another being? Be it a bee, as the ... sap, be it the, let's say cow, as a grass, be it the food man eats. Where is the Soul of the plant? Where does it start? How does it come about? How do we understand this, and how do we have to accumulate this knowledge into the knowledge of Space? You got to understand, the Life of the Man, the Life of the plant, and the Life of the animals, all started from the same point. Why have we taken different directions? What process has made the new creation? And if you understand this, how in one environment, something like six different generations of life exist simultaneously, at least 6. Then, we come to understand, the process of the Creation in the Universe. We have to understand, our own companions on this Planet, which are aware, created at the same time as us. As Human race, as the other animals. We understood the use of, or the presence of Copper, has led to the split of the body of the Man in two halves, left and right, because that's the behaviour of the Copper. It has a balance, huge balance energy in comparison, in presence of GANSES. But, what happened with the plants? As we know, we have a Life, we call a Life of a plant, which is very much ... the Life, that we, as Totality have accepted. But, what about the other lives? We know, we are in the middle of the stack, we are not top of the animals. We know, as Human race, or the animals, who are four

legged animals are what I call, 'Horizontal people'. There are those, who exist above us, 'The Floating people', the protein Life, which we are aware of. We've talked about, before about it, that in a way as a bottom eaters, we use their bodies, their existence, to elevate our own Souls, and our own bodies. This is something, which we never considered, because we always looked within, and we were proud of our own Creation, to be, what we call "The King of the animals", or what we call it, حيوانات سر which means "the head of the animals" in Farsi. We... we have to understand the process. The faster, we find the ... reality, we confirm, and conform, within the operation of the Universal systems, the faster, we as a race, become part and understand the Totality of the operation of Universal Community. Universal Community, is not to go into a Space and find others. Universal Community is the people, who we are the bottom eater of. What I call, the 'Floating people'. The Vertical people, the Floats, what we call, 'The fish, which lives in the sea' The ones, who are in the air, the existence of Life within the center of the Planet, within the layers of the Planet. We are not just, as we see. We see worms. We see animals, who live beneath the grounds. And as I said in many research docs. As now, the scientists explain to us, they have found Life 10,000 meters, within the earth, which is means, Life exists in every level. It's just that, we have to understand the condition, that this Life, has come to live. How it finds itself, how it finds the condition of its environment, to confirm its existence, and mutate to be able to exist within that environment? Once we understand these layers of Life, in Human mental condition of knowledge. Then we'll see, it'll be the same for every other race in the Space. Then, the Space opens its eyes to us. Because now, we have become unconditionally ... accepting, that life is not just because, what we thought, just us, and the fish, and few animals, we see like worms, and maybe trees, and that's it. If we can see the atmosphere of this Planet, can support composite lives. The way we see it, now we understand more of it, from the center to the outer. Then it's easy to understand there are other lives, beyond the atmospheric condition of this Planet. And then, we have to understand, how they are composed? How they come to live? And, the moment, we respect the Life of every being on this Planet, and beyond, it's the time when we mature. We become true Human beings, we become true members of the Universal Community. In so many ways, it's very hard, it's so... In so many ways,

we have been used to eating, consuming, abusing every living things on this Planet as our right. That, we have lies, we have lost the inside. We have lost the reality, that as a, what we call, 'Human being', being in charge, in control of our own existence. We can go a step further in that, we do not need to consume. We did not need to destroy. But, is this justified, that, what's gonna happen, when I only learn, to eat, or use energy from the Space. Not the energy from within the Planet, which is already prepared for me as package of energy. As long as we do not understand, or try to understand, the Totality of the work of the Universe, and understand that we have access, we have the pleasure, we have the knowledge, we have everything, which goes for Man, to use the Universal energy, without killing or destroying another life, then, we can go to the next step. Until, with that point, we don't understand this, we will not progress. And it's a habit of millions of years, we see I stop eating. What about the cat, what about the fish, what about the tree, which is eating? Then, can we adjust the process, that they receive energy as they like? They might mutate to a new condition, but they stopped, what we have stopped. Or, do we just elevate ourselves, that we understand, and we don't, we change the system, that we don't eat other beings, or entities, and we leave the fish and the lion, to do, what they like. Then this become unbalanced, then, when our, what I call, 'next generations' see the animals, they want to repeat it, because it's easy catch. It has a different pleasure, it has... it brings a lot of other things to them. So, we have to understand, the Totality of Life on this Planet. This is why today, I would like to teach, if we can, to myself, and maybe others with me learn, the process of the Soul of the plants. And then, we go one step further. In so many ways, the Mankind has to change course. The Mankind has to understand, it's not the user, but it becomes the protector. And in that phase, it's when we really change the course on this Planet. We have considered ourselves, to be "The kings of animals", and do everything, we tame them, we cage them, we fish them, we cut them. Once we understand, the process of the energy consumption, would we... not better to teach them, to accommodate for them, to receive, that they don't eat, they don't kill, they don't consume? But there's another point... Is the Planet Earth, is the only place, where people eat each other? When I call 'people' to me a plant, a tree, a dog, a fish, is all counts, as people. They are the population of this Planet. So, is this Planet the

only place? More or less, exception... a few, "Yes". But, they consume different ways. So, do we need to pass this point? Yes, we do. Do we need to understand, how to change the course? We have to learn. Teachings like is, and by the others, has been the prelude to coming to that point. And, as I've said many time in the teachings, go back to the writing of the prophet of the past. "Thy shall not kill", shall not kill a fish, shall not kill a lamb, shall not cut a tree, shall not eat other things, that by killing them, you end a cycle of a Soul, not the Physicality of the body. Can we kill a Soul? Yes, we can. Those, who gain the knowledge in the future, they understand, that's the last thing you ever do. Can a Soul die? Yes, as I explained before, "Yes". But, can we be the cause of his death? It can be done. And it's only done through the position of balance, when the Soul sacrifices itself. Not for Man or another Soul, to end a Life. These are the things, which we have to understand. These are the processes, we have to understand. But first for all, we have to mature as a Human race. How we can change the course? How we can stop hunger? But not by eating, but by allowing the body of the Man, to absorb the energies it needs, for the pleasures of existence, through the correct conduct. By absorbing energies from the Universe. It's so easy to do, and when you learn how to do it, you don't want to go back to it. to eating, back to destroying Life. For this process, we not only teach, the Physicality of the process to make system, but, we have created structures, that by teaching, we elevate the Soul. You understand the operation of your Soul, and then through it, you bring systems about, conditions about, that, not only teaches the others, but collectively, we set example for that process, for the others, to understand, that does not repeat the past problem. Part of this process, was as we said, "Now we understand our Soul is our Creator of our Physicality." Then we have set structures, like Universal Council and the Earth Council, and other organizations around the Foundation, to gradually convert every into that point. It's very hard, to change billions of years of habit, over a few days or a few months or for weeks. It takes time, but now we have started the process. In due course, no one on this Planet, will destroy another Life. No animal will consume another animal, because the correction in the process, which is lack of few bits of energies and materials, will come and bring that position about. We have set up the Universal Council and the Earth Council, and the Core Team, to see this support gradually. Initially they take over,

every day matters, or bringing, educating the others. But in time, in a very short time, then they become, in a way, the guidelines, or the guar ... the guardians, or the advisers, or whatever name you like, for Mankind into Space. For Mankind to understand, especially Universal Council, become the translators of the wishes of the Universal Community, to the level of the Soul of the Man. It's like speaking different language. So, they'll become the translators, they become the converters of the information. Gradually we seen Universal Council, and the Earth Council taking shape. We've seen, they come and they're trying, to bring positions about that we can move forward, in the transition of the Souls of the Planet of Totality of all its, what we call 'Lives', and then, we have to listen how they are. They're maturing in front of us, in front of our eyes. We see them gradually, in different presentation on Thursday mornings. They are coming forward, gradually towards the same goal. But it takes time, cause they have to teach their own Souls, and by presenting the conditions, they wish, they are learning themselves. How far they can go, what is right, and what it has to be. We haven't heard from any of the Universal Council or the Earth Council members. Protection of other lives, on this Planet, how do we protect them? How do we teach others, to protect them? And these are the parts, which we graduate and grow with. We've seen in the past, the messengers of the god, they come and they say, who they are, and they are the prophets, and then they start sending or giving their messages through what they've been given to the Man. But this time, as we all understand, we are all messiahs, we all understand the process of the work of our lives. We are collectively setting up a standard, for the Soul of our present lives, on this Planet, and the future generations. That we understand why, and because of it, we will not do this, or do that. I said many times, "You see these red berries, on the shops, or on plants. doesn't matter, where you are from, Africa, Asia, Europe, America, none of us touches it. Because, somewhere down in our Emotion level, there is a danger level written, this thing you touch, you die. This thing, you touch, you go sick. We have now, to elevate the Emotional level of our existence, that you don't eat, because is not right. You don't kill, because is not right. And this process will carry on, and now, this is the work of the Universal Council, and the Earth Council: To educate the Soul of the Man, that, by educating, the Soul, the Physicality follows, and then, everything stops. All the

killing stops, all the destruction stops to what extent the Universal Council, the Earth Council... evolve, we are watching it, all of us together. In the past, nobody could see the Soul of their Prophets, when they received messages, because then, they had to translate it. The member of the Councils now, are going through that evolution, as they receive the messages, which is shared with us. We share everything together and we see the evolution of the Creation, of what I call, 'The Messiah' as a Totality of Human race, for the whole planet. And through it. Once we learn, we become Messiahs of other races in Space, when we come across. Because we can show them, by those who have first hand experience, the damages, that these things does. That, they shall not do. This is the beauty of it. When you have, when you go apply for a job, they ask for your experience, if it fits into the job, what have you learned, that from it you do not do the mistakes of the past. As a Human race, what we seen destruction and the wars have done, when we go into Space, we know what it means to lose. We teach the others not to. We become the best messengers the Universe has ever created. Because we'll talk from experience, and experience counts. We know what it means by destruction. What it means by loss. And this is the beauty of this process. From Material-State, we come to understand the Soul, and through understanding of the Soul, being responsible for our conduct. We ourselves in the future, become the messengers of the past. Now we see the connection between science and what we call, 'Faith' which is the Faith, is us. A faith, belief, in us being the Creator, and in control of everything through our conduct. And, this is a lot of responsibilities, we do not want to accept. We have refused to accept. Now, it's on the plate. We have to accept. And, in this process, we watch the growth of these organizations around us. We work in a different way, we allow them to explain themselves and like a child, we see how they mature. And the maturity, at the point of completion, is the maturity of Human race. To understand, to enter the next step. What I would like to do, as usual, to ask if any members of the Universal Council or Earth Council are present who would like to present anything, or discuss or elevate our Souls? Before we go into the ... what I call, 'Knowledge seeking' of the more, of the understanding, of the ... what we call, 'the Space of this Planet'. Are there any member of the Council would like to speak today, to enlighten us? (CdR) Good morning I'm Caroline, from the Earth

Council. Rick ... (MK) ... Universal Council ... (RC) Yes. (CdR) Universal Council, sorry. Good morning Rick, good morning everybody, Rick have you managed to find, what I posted to you, yesterday? (RC) You mean what you posted ... this morning? [chuckles] ... I'd... I'd just started on it, I've got ... I worked about an hour or so to try to find out ten attributes of the Catholic faith and ... other parts of the Christian faith. And so on, it gets complicated because everybody has different ideas, about that. It's not a set... set in stone thing, in... in most religions they don't have a top ten attributes of God. So, you have to sort of compile the top 7, the top 14, the top 8, the top ... 10 (CdR) ... so you had to ... You had to look for the words, which are most appropriate, to be going into that topic. (RC) Yeah, the sort of the most used, but you can't tell, you have to find out (CdR) ... Do you need ... (RC) where people are coming from there's different aspects of the Christian faith for example: Evangelistic versus the, you know, the Protestant, Catholic and so on, they all have different ways of looking at the attributes. So, it almost has to be broken down, according to the sub sects of the ... of the ... main faiths, and so on, it could get complex, it' a big... but we can have some generalities as far as... (CdR) Yeah, that's fine, because, how many do you have already? If you can show a few, then maybe, later on, we can extend it to more, to add, to have a comparison list. But, it's just to share something different, which maybe people. It's, it's ... it's a part of an information to look at things totally different. If you can bring the list forward, for what you have, it would be nice to have a look at it. It doesn't matter, if you have 3 or 4. It's fine. It was just to have an, an overview. (RC) Okay, I'll put, I'll put them on the screen here. (CdR) And I do apologize, it was for you morning. [chuckles] (RC) Well I... I asked if it was for the Knowledge Seekers Workshop, but you didn't reply, so I didn't think, I thought it was for something else... (CdR) I ... sometimes at certain points I fall out of. Yeah, sometimes, I fall out of network, and I just get taken out, like last time, I just disappeared out of nowhere, I do apologize, but we're trying to find the reason why. Okay. (RC) Yeah. Let me make these bigger, so they're easier... (CdR) Yes please, then it's easier for me to read. (RC) Now, I got these from a couple of different websites actually. So these are, this list came from these... these sources. (CdR) Yeah. (RC) And ... (CdR) Can you bring a few from the... just a few words, if it is possible, from the Muslim, the Arabic, if you can add a few of those.

My point going into this, as you're working on, for bringing them forward, Thank you very much, Rick, for all your work. And I'm sorry I couldn't get back to you. ... The whole idea is, I heard, you know, or we all remember last time, the way Ursula was explaining, the beauty and the resonance, and the impact, when the... a few of the 100 attributes of God, were brought forward, to all of us. And... one says, you know, if you would of it came up into, talking, and ... conversations, that, you know, one language when there are certain words spoken, especially when they come to the topic of religion is that they bring for certain people, you know like, we would use the phrase, ... "You don't feel comfortable" and the reason why I'm bringing this forward, is that, as Mr Keshe brought forward, in his previous teachings, that, when you're in different places on this Planet, you are in a totally different Field-Strength. So, the energy feels different, sounds different, and resonates different. So, I want to erase the awkward feeling, from one religion to another, to erase the borders, of the feeling, and by not maybe looking or overlooking it, or maybe we never even came to the point, to stand still by this problem. Why it is there. Now, each Prophet has brought a numerous of beautiful names, what we call 'Attributes of God', which Mr Keshe explained, these are your possessions, because they're are your attributes, as a Soul, and they're all most beautiful. And if you go from one to another, you come across, in a different wording, but the same beauty because the Prophets essentially, brought them in the most beautiful way they could at that moment. But now, imagine you are coming from one part of the World, where you have the culture, the food, the understanding, and the energy level, then you go totally to the other side, where the food is completely different, the culture is totally different. And the language spoken, is in a different vibration. Now, if you look at these words, when they are all translated into English, to a more global understanding for whoever is following it, or is able to follow it in English. The difference is not that much, is just the knowledge, from where they're coming, which makes you to be alert. But if you erase, where they come from, who has printed them ... .. from which religion they are belonging to, they are just beautiful words. They are just attributes of God. So, if you understand as Knowledge Seeker's, that it's the Field-Strength, from the part where this Prophet brought it, in that part, with that strength, now we understand, that the strength is totally different, than when it,

let's say, it came from Europe, or it came from China. But, because the Prophets were placed in different parts of the World, in different time zones, with different energy strength, that's why, when you speak them in the original language, they sound and they vibrate towards, more close where you coming from. that point where they emerged. And that's why they feel so awkward because the difference of the Field-Strength, when you come from Europe, and you listen to the Arabic speaking, it doesn't resonate so much, because to you, you're not in the same Field. Now maybe, this will be bringing a door to open up. For people, when you look at the information on this, then you might be able to remove the awkwardness, the opposing, the maybe, the not feeling so comfortable, with certain parts from certain strengths, because they do not resonate with your Field-Strength. So, it has nothing to do with the religion. It has nothing to do with which Prophet or which... group is bringing them out, because if you remove all the titles, where they came from, like the one, which is in the screen, now. Names of God in Islam. If you remove that, and you remove everything before, and just leave the English, and then, you go through the whole list. These are all magnificent, really beautiful messages, beautiful gifts. Because, when you erase the origin, where they came from, and you put them all in one language, then they will resonate with everyone. Because, they are adjusted towards where you are in your Field-Strength, so you will absorb them. Because if I would've made them blind to you and you have no origin, you have no where its came from, not even a Prophet, not even the religion. But just the beautiful words, they would resonate with all of us. There would be no difference. It's because we start putting them in blocks, from each religion, from where they come from, from in each language, that the difference already starts appearing. So, what do we understand with all of this? That beauty has no difference. When beauty is expressed in Arabic, or in Chinese, or in English, or in German, it does not make, no difference. Because you create a Field of beauty. Because that's what the word is bringing. So, automatically, it resonates with all of us. That's why we are working in language of culture, understanding, resonating with the Fields and that's why it goes so much easier. But, if we use all one language, which is the language of the Soul, and we just look at the beauty. Then there is no barrier, there is no difference, there is no agitation, there is no despising, there's no

nothing, just pure beauty. And that was my message for today, to understand, to start erasing, why and how, and to understand our own, when we go little bit deeper, when beauty is beauty, it stays beauty. Thank you. (MK) Thank you very much, Caroline. There is something which might add to the knowledge. Is that, in the Universal Community, we have other attributes of the Creator, which we add to this. At this moment of time, is meaningless to us, because we don't understand, we will not understand. In so many ways, we understand it, we can relate to it. Once we go through the process of being blind prejudiced about who delivered the message about what the message has brought, what does it mean? As we said "The attributes of God, the Creator, is attributes of the Soul of the Man." But Man could never see himself or herself or to possess such a beauties, that he could elevate on it, could expand on it. When we have a beautiful eyes and we have a beautiful face, we decorate it, that it shows more its beauty. When we have a beautiful body, we dress to show the beauty that bit about beauty. When we have a beautiful flower, we take the thorns away, to show only the beauty of the rose, not the thorns on the stem. It's the same in Space. We have never believed that we are so beautiful. We are part of this structure. It's us, which the Prophet of the past, have spoken about. Did Moses or Jesus, or Muhammad or any other, what we call, 'Messengers' or 'Prophets', or whatever, elevated themselves, to understand their own Soul that to explain for Man, to understand, they put the name of the Creator to it? Because, no one in that stage, that step, was elevated to see, that it's me who creates, it's me who's generous, it's me who is everything else, I'd like somebody else to be but I'm too shy to accept the responsibility, "that is me." And, when we go into Space, we'll find out, so much more. We find out the Totality of all the attributes of the Creator, is the attribute of the Soul of the Man. And that's the beauty of it. This is what we need to understand. This is what the elevation of the Soul of the Man will come to be. And, what it'll be interesting is, if I tell you the other attributes of the Creator in Space, will have no meaning to most of you. Because, you have to look at it, at the Soul of the Creator. Because, then, you have to accept, that there is more to my Soul, than what I thought. Up to now, I have to accept a god, and now I see, I am part of the Creator, the God It's my Soul who's responsible for my Creation and my manifestation. Then, you come to a new dimension, new environment, new

education, new understanding, that... These are other things that I did not know about myself. I didn't know I can learn the language so easy. I didn't know that my Soul is beautiful, My Soul is gracious. My Soul is holy, because I have to respect my Soul, that it creates a perfect being like me, that I can respect the others, that they become perfect like me too. But how we do become perfect? What do we accept? One of our biggest problem, in the present society, is that we have never understood, the position of our Soul. We had to go through the process of the Matter to the GANS to energy, that you could understand the energies, see them mixing, and creating, understanding it has Soul, that now you understand that Soul, you can convert it back to Matter, and that Matter is me. This is what we call 'the understanding of the Creation'. This is what we call, 'the understanding of the mutation of the energy into Matter' We knew it, but we didn't know how. Now we know that energy has become us, what are we going to do with it? We are composition of energies, which has come from transformation of the energy of the Soul to be in the Matter-State of the body, we're Physicality, we would like to show ourselves It'll be very odd, if you stand out in a crowd, if you don't match. But, we have to understand we all came from the same origin, we all come from the same energy, we all come from the same manifestation. And this is us... Whatever you read on this board, "The Most Gracious" "The Most Merciful" "The King", "The Most Holy", "The Ultimate provider of Peace" Read it in Catholicism, "Holiness", "Mercy", "Grace" "Love" It all comes to the same point, this is 'us'. And now, we up to now understood the working with the Matter we melted it, we forged it, we shaped it into a cup into a plate, into machinery. We used the energy to do the conversion. Now we can stand the energy conversion from our Soul has been forged in my skin, my eyes, my lips, my liver and everything else. And, this time we have a say, the same as we forge the metal to a plate or a cup, Now we can forge our Souls, to be physical, practical, visible on this Planet or in the other Planet. This is the process of the progress that we have to understand. And a lot of people will have... will have a problem with this. Because, as I've said before, accepting responsibility for ones Soul is the biggest opposition to this cycle of the knowledge of the Man. Because, up to now I was provided, I was put to fear of... I was institutionalized in the name of faith. Now I am the faith. I am the path of belief. I believe to do this and I do it. I believe I'm correct, I'm to do

this way and I do it. A lot of people have problem, will have a problem in accepting responsibility for their own conduct and their own doing. And this is where the game comes to... We will come to it. We have to accept it and by accepting it, we create Peace. This is the key. In understanding, accepting the position of our Soul, is the key to Peace. Because, when we understand it, we accept it, we are at Peace with our Soul. What is created, that we have forged into what to be, we'll be at Peace with others. As I've said before World Peace Treaty is not just signing a paper by a head of a Nation, it's the signing of a Man's Souls to Peace himself. A lot of people came here to steal and I've walked them for them to understand how thief they are of their own Soul and the others. They s... came here to have a free energy, to have a free health, free everything else, but they did not see, the path led to the freedom of the Soul of the Man from the entanglement of his Physicality, And this that, a lot of people find problem with this technology and with these teachings. Because, everything became free, except the Soul of the Man, that by his freedom creates the Peace for Man. Not only on this Planet, but in Space. And that is the problem for a lot of people. Use the knowledge to bring Peace to your Soul, Use the knowledge with bringing Peace to your Soul you understand, you bring Peace to the Humanity and through it, you become Man of the Universe. and as I've said many times, "the Human race already has been in Space, but it's been locked out in a village of the Earth, because of his conduct." When you live in a Peaceful city, what do you do when you get somebody who disturbs the Peace? You send the police, you put them in gaol, or you lock them up. That they are... they don't disturb the Peace, they are kept away, they're locked away, till they understand they can't do what they've done. So, has been done to the Human race in the Universe. Man has not found the process of Peace and for that reason Man has been isolated, till he finds Peace with itself, that he becomes a Peaceful being. Many times new, what you call, 'Prophets' or 'Messengers' have come to direct Man, you know, when you go in a prison, there is a correctional officer who comes and teaches you, "this you can do", "you cannot do." And then they release you to see what you do. And you do the same crime, and they put you back in again. This is the same process, tried many times to educate Man through his physical conduct, but everything has gone wrong. So, this time we'll leave the Man to be the teacher and guider of his

own Soul and that way, we cannot blame no one, You don't need to have a Chinese whisper to ear, to someone else, and the process become clear. You got to realise the process of freedom of Man. The process of freedom of Man is from his Soul in the level of his Physicality. Until we don't understand this, there is a problem with Man and you're isolated. As we say, "you are in quarantine till you understand." And, we have come this time to end this quarantine, we have this time, to change the course of every Man can become man of Space. Every Man has the freedom to become Man of Space. If you go back to some of the teaching I've done before, I said, "when we make the Spaceship, you'll find people who cannot walk in, they would not walk in because their Soul knows they say they are men of Peace, but they're planning other things, they'll never make the way. Their Souls will not allow the Physicality to lie to the other Physicality's and Souls. What we are doing is making Man responsible for his conducts and taking out of being Institutionalized to the forces of this Planet, with the wrongdoing. When... the sooner the Man understands, the sooner we open the things. So, we become messengers of knowledge, we become messengers of science, we become messengers of Peace, we become messengers of theology, that man understands these also. A lot of people walk away from the work of the Foundation, because this time they could steal everything, but they know they can't steal, and lie to their own Soul. So, "I go away" and I "blame", something is wrong with the Foundation and the work of the what I have been taught. But don't worry, because in time your Soul will bring you back in. Then you understand you needed time to graduate, you need time to go through the position, to understand more, to come back, they'll become part of the Universal Community. We become part of the Universal Community, not through our physical body, but through the existence of our Souls. And, this is something nobody understands. Very soon you will understand. Very soon people understand a number of Human race and others from this Planet, will join the Universal Community. many other creatures of this Planet have, already joined the Universal Community. Because they have graduated to understanding. So, now it's time for masses to understand that we can open the door. But, don't forget there is still a quarantine for those who do not follow the path. And it'll be done by their Souls, we don't make any Guantanamo Bay prisons. And, we don't make any Alcatraz where we can hide

and we can lock them up. Your Soul will do the job. So, it the decision made by the Soul of the Man, not by force of the other entities. Any other participation from the members of the Councils? (AB) Good morning Me Keshe (MK) Good morning, (AB) ... Just let me share a few.. (MK) Would you like to introduce yourself, who you are please? (AB) ... This is Azar Boujaraan, I am a member of Universal Council, Farsi. And ... I like to add a few things, I don't know if ... my thoughts will resonate ... with what we discuss, ... to me ... Universal Council which is the languages and ... you can go say Arabic, Farsi, any other languages you talk about, ... still these are all words, that matches our Physicality, that brings vibration, ... good vibration to the Human body. But Universal Council which is a language, is, is a bridge for us, to go from where we are to U... to the join the Universal ... community, In time we will have no languages, I mean we will gonna have only one language we gonna talk through our mind. ... I'm assuming by 2020 - 21 we should get there. So, now when you talk about languages, languages brought a lot of advancement to Humanity ... it got to a point, I mean it was, it is the best thing ever happened to Humanity, because language brought Humanity in so many levels, we have even languages of different category. We have language of art, we have language of literature ... people made great ... advancement in when they somebody read a book they changed their life, so it was a huge, huge thing for Humanity, at the same time ... language, languages ... for the past 30 years brought Humanity down in a way ... people start using languages for manipulation, so, it has it good things and bad things. So, what is happening now to me ... we can understand these words ... like we talk about Allah or Al Rahman, we can say all these words and we can see it in Physicality and bring good vibration to us we talk about Love and Mercy. But, when it get to a point that we pass this bridge of the Universal Community, I'm hoping one day we don't have Universal Council because we are doing this connection with our languages to communicate with, with whoever we represent. But they... they gonna get to a point that we don't need any of these, I mean all of us, no matter where we are, we gonna communicate through our mind. And that... at that time there is no more hiding, there is no more manipulation, ... because I can when I say advancement ... in terms of like category, I remember, when I came to United States I had English, I had English in ... 7 years of English in

Iran, ... through middle school and ... and high school and I had, I was full in grammar and vocabulary, spelling but when I came here, I couldn't speak or I couldn't understand and I could understand even more of the British accent than American, American was too fast for me and too ... too different pronunciation. So, when I went to University they put me ... they, I took a exam... examination they put me in ESL English and also they put me in a calculus in math. Math was my highest, I went to calculus right way. So, I went to the class the professor is talking and I didn't understand a word of what she's saying, but when she put a problem on the board I understood, because I knew how to solve problems, So I got A+ in a class that I never understood the teacher. So, with languages we, we have accomplished a lot but we can like, the moment we can rely on languages, we can convey our messages ... we can use it to ... teach other people what we carry within ourselves. But, we cannot keep these forever because we have to move, this is just the transition. And if you still wanna sit home and talk about ... okay say this word is gonna bring good feeling to your body you're gonna be stuck. We cannot pass anything else we have to understand this that this is just a temporary time that we using the languages for us to un... to teach other people, but not to be with it forever and it's stuck on words. ... Once we get to communication of the mind is much more I mean is more advanced than what we look at, it is a feeling ... is what you sitting next to somebody and feel their feeling ... understand then through the mind, that's the be a different, thing we gonna look forward to. ... Not necessarily ... with a lot of words. When I talk about the manipulation of the language that is happening for the past thirty decades, I mean three decades, in, I notice it in the US ... because in US in the old times ... like maybe thirty years ago I give you example, when somebody wanted to go ... sell something they wanna sell a washing machine, they wanna sell a vacuum cleaner, the salesman would go to somebody's house, would go to somebody's office, and the salesman, you know look into the person's eye and explain, "Look this washing machine, for example does this, does this", and give the facts and the salesman made the sale or if they wanna sell a ... something else, idea maybe. But then what happened, the society learned, I mean actually a lot of companies came with the idea now how we can how we can make a sale but manipulation. So, they... actually they teach this. And ... I remember when I was waiting for my

... going to dental school, I was looking for a job I was major in biology and minor in anthropology. And everywhere I looked I couldn't find a job. And then I found a ... ad somebody wants ... in Maces Chanel counter, make up counter wanna try be a makeup artist I say "Okay, I can do makeup on myself, I just ...I need a job for three months." I become a makeup artist. So I went to the makeup counter and said, "I am a makeup artist." And then they said you have any ... by... I mean experiences, I say, Yes I have experience I worked in Chanel counter in Harrods in London. Because that way I thought nobody is gonna call Harrods to find out about my experiences. So, I got the job, so the next thing you know we they took us to a hotel for a couple of days of training and what they taught us it was a scamming people to buy ... product. It was like, like ... manipulation. Like for example one thing they told us, "Never ask a dead-end question." Like for example saying, "Would you like to buy a lipstick?" If the customer says "no", you're done, you cannot have a conversation. So, I've seen this through my ... life with the business as well too. People come in they learn they come to sell you software or a program into my office, so constantly what they doing they don't bring the honestly, the software carries or what they have they come with other things. What they come in they come with ... point of ... they first of all they research you a little bit to see... on the Internet or wherever to see, who are you all about and what is your likes, what you dislike and I can give you example they come in usually they come in male or female and the first thing you know, say, "Hi Dr Boujaraan, how was your vacation or you have a nice earring or look at this one so beautiful." They get it to a personal level and if you are very naive and so move with the ego and you like to thrive on your look and this and that you got the bite and they can go on you. But, when... once you understand this you know, they doing this to lure you into position, they can close the deal So, is all manipulation is no honesty in it anymore. So, Humanity has become to a point even in a personal level a lot of people communication is all ... the same thing. You know, they don't honestly talk to each other, heart to heart, what am I feeling. Most of the time when you ask someone, "How are you today?" Always everybody says, "I'm well." But not necessary they are well. Nobody sell the Truth, "Look, today I had a bad day." So language is had... is good things and a bad things. So again we have to use the language at the moment ... ... to communicate with our own kind

... people who speak the same language to convey the message, who we are and what direction we go. but we cannot ... stuck to the language because we have to, this is just a bridge. ... we gonna move on to the point as a Universal Community we only gonna have one language and that's gonna be through our ... Soul. And that's the beauty of it and that's all I wanted to say. (MK) Thank you very much. Any other comments? How is the progress for the Council in respect to the what we call 'the Charter'? Has there been any progress, any of the member of the Councils can enlighten us? (RC) ... Mr Keshe ... Ursula did have her hand up earlier I'm not sure if ...it was for that or not maybe she has something she like to say. From the Universal Council, Spanish. (UC) Yes hi, ... good morning to everybody or good afternoon. ... I was hearing with many attention of all what is said and so interesting interpretation also for... from Azar. I appreciate very much. And I can ... share many things about also of the 99 attributes of God, they are not Gods but attributes. I will share them ... another, another time, I think we must go ... to other things now. ... I'm Ursula from the Universal Council, Spanish. And it's making me grow very much all what I'm ... studying, learning, integrating, and sharing also with, ... I was studying the 99 attributes and other things with my friend Dr Fend Assis Ten years, during ten years, beautiful years. ... and I'm studying and ... again all what he was teaching us, and I will share it with you, I must translate, because it was in French. And ... I'm... I hear also in the presentation on the first video we, we saw, ... receiving from others to take your... to... to fend your position. ... take from others, and share also, but we, we need to, to have also information. And to be with strong magnets. ... and I thank you very much Mr Keshe, because you are a big magnet, your voice is magnetic, and it's very pleasant to hear what you are saying, also with Caroline, she's a woman, like... like many of us, and it's a language, woman language we understand also very well. ... we are all sharing our experience, it's very grateful, and, and we are learning very much to position on us. It's a ... first thing we, we must do, giving, and having love also. We need it that there's love, because sometimes we give it not to ourselves, and we are learning that also. ... to be ourselves is very important, and makes us free. And all what we gives, comes back as a boomerang. I... I like very much this. This boomerang was in all what you gave, and sometimes the boomerang comes on your head and hurts very much. And in

this time, when you do, when you're on, in a... in, in a special position, when boomerang comes back, when you do something is wrong, it hurts very much. And I like also what Lisa and Jim ... are... are taking ... for us, giving for us every Monday on 10 in the morning here in Europe. And I invite everybody to assist to those teaching because there are the, the, the first one, the basics, the fundamentals, very important. And also ... Tuesdays, on ... 16, ... European time, with One Nation, One Planet and One Race. It's what we are learning about, and it's this World Peace meeting, is very important for everybody, we must learn, we must integrate, and we must share. This is the meaning I think. ... I feel it like this. And we... I want to say also I'm vegetarian, since I was 5 years, in Argentina. So, you are speaking about this, and it's very important, I was sad when my grandma bought this duck for Christmas, and I saw how they take this one because I, I was joking with him and she, she choose this one, this was very traumatising for me, and I never eat duck again, it was terrible at home. And also the cow, that cow was hanging on a tree, on my German school, he was bleeding from the neck, and this was the Ne, the last time I eat ... meat. In Argentina you know, it's where, the, the land of the, of the assado, it's a social meeting. So, I can share very much but I, I... I think it's all for today and, I can say it also in, in Spanish but I, I don't know if we have time. (MK) Yes please. (UC) Bueno. (Ursula C, speaking in Spanish till 1.17.38) I'm finished, thank you very much. (MK) Thank you very much in... This is how we ... elevate ourselves. This is how we understand more. We keep on talking about Earth language, ... Earth ... Council, or the Universal Council. And we speak about the different languages. But, what we have to graduate to, to understand ... the language of the Soul. This is the ultimate goal of these works. This is the point that, we don't need languages. Because, the language of the Soul is Universal. As I've said in many teachings. "The Sun is a Soul." "All the Suns in the Universe shine the same." Different brightness, slightly different colors, but they shine through the same principle. So, it is the same for everything, it's one language. "To be the light." And, in so many ways, as been explained before, it's for the recipient, to decide what he wants to convert the light to. Your Soul radiates, and it's Field, by intervention of your feeling, converts that to anger, the same Fields to joy, the same Fields to the beauty of the eyes, the same Fields into pleasure, the same thing into pain. It's what we convert according to our Emotion,

that light, that Sun, that Source, that Soul. So, this is what is important, this is what we got to understand. All this, we started as I said, from the Matter-State for you to see the Fields. You tested it, you know it exist, you put it in the Core, you've seen the Fields. Is to bring Man to One point, the language of the Soul. And when we understand this, we move and we progress very rapidly. The beauty with this process, this cycle is we are not creating no monks, we are not creating no priest we are not creating no more Mullahs and nobody else. We become our own guideline. We have to judge our own progress, how we want our Soul to progress to next level that we become part of the Totality. Otherwise, the game will carry on but not this time because many people has enlightened and it'll carry on very soon. As I see and we are noticing ... as I've seen yesterday in some communications. Some television channels and radio channels are giving air time to the Keshe Foundation technology and it means the breaking through has started. But, this time it'll go like a ball, ball of fire because, once one television station, one radio station National televisions go on teaching it will carry on. And what we see, the pictures I see he has it started. So, in so many ways, many of you who are listeners and you have learned and you are in the process of learning, you unknowingly will become the teachers because you are a step ahead. You can teach the others, that they can teach themselves. If this process carries on for like the ... what we see we hand and we make the teachings openly to these channels. This is the possibility that we might do. That the progress of teaching comes from us in a way the correct way and it can progress to the next level. Any other comments? (AB) Mr Keshe ... I like, can I ask you questions? (MK) Yes please. (AB) You know when we have ... imagining your God and you have parsley, you have basil, you have ... (MK) What you need to imagine? (AB) Okay I have a garden. (MK) You're a God you're creator of your own being. (AB) Okay. If, if we have a like a garden with basil and parsley and a apple tree. And every day I go take out the top of the parsley and basil and use it my food the roots are still there. So the Plant is still alive. So, I'm cutting the arm and... arms and legs I guess and then apples, the tree is still alive but I use the apples. Sometimes the apples falls on the ground then I eat the apple. So is this ... killing their Soul? Or if... (MK) In so many ways ... we have to understand what is the apple. What was the function of the apple? Why did the Plant created the apple and gave it different

color and taste? Otherwise there would have been one apple and that's it. Is it that the process is that I give, I provide this is what I serve, freely available. Because, is made available that it allows for expansion because he has a purpose. For the Animals to eat the apple and take the seed and drop it somewhere else that he expands. It's the cleverness of the Plant not the Man is there to consume or the Animals or the Birds. The Plant has valued his Soul to understand its function and he wants to expand, that he can create more of itself. Plants are highly intelligent. They have a beautiful Soul. So, if I want to expand that it can be another apple tree that I have my child ... Human beings make love, Animals mate. What does a Plant do? What does a tree do? It cannot throw his apple it'll fall within its own shadow and then it can lead to his own demise. It creates an apple at position that this will be taken by someone else. What is the seed? When you look at the seed of an apple, when you look at the grain of rice, what's in there? It's a womb with a food supply. If you look at a grain of rice, what do we see? What we call the corn among corner and the rest pack of a slice of... Can I share a screen? (RC) Go ahead. (MK) This is what, in so many ways, if you look, if you look at a grain of rice he has section which is the hard bit, which is the seed, and, in so many ways, this is the part which is there as a energy pack. When the seed wants to grow I provide this is food for it. Change the name. Call it an egg. The same story. This is the child, this is the baby. Already made ready and the same as the other place, the mother has provided a food for it, till it grows. This is the Soul of the apple ready to grow. This is the same. So, if you expand it, is the Soul of the Man but we call it the 'brain'. The cycle of Life is the same, is us that we could not understand. Now we understand. We create children the tree has created this child so has a grain of rice or the rice Plant. The whole thing is exactly the same. They all have Souls. This is alive. So is this, so is this. And, strange enough, if you not have understood by now. They speak the same language. They have the same Emotion. Is us which has been blind to it. You nourish the egg the right way, you get your chicken. You nourish this, you get another Life you call the 'rice plant'. You nourish this the right way you have yourself another Being. It's all Life. We've just not being aware of it. Now we are, we are responsible for it. We don't go and eat our children but we go and eat a child of a chicken or a child of the rice, because it's our right, we have done it so long, we have to do it. Now, is

time to ask a question: Is it my right, has it been my right? Just because others have done wrong, does not mean we carry on with the wrong. You go to Space, would you like somebody to come and eat your child? Because you're another energy pack. Or, is it correct that you understand he can't eat, consume other Lives then in a Space does not, non either to you, or you don't do it to the others. To make a pilot you have to train the pilot to be able to fly. To take Mankind into Space you have to train the Man to understand the rules of the flight in Space and this is part of these teachings. I teach you everything about the Soul, about energy, about everything else and the whole target is, narrowly we are literally walking, I'm walking you through a funnel. with a very, very, low hole at the bottom. Mankind has been here, doing every damage, whatever he could. Gradually he's getting trained. That it shines through like a torch as one ray in the end... Universe. Like everybody else in the Universe, Mankind is not gonna be unique. That I am in the Universe I am... when you shine you shine like the other like the Stars. And this is the whole purpose of this teaching. The only way I could get you lot going, was to give you a bit of sweetie. Have a bit of free energy, you can do something with your Soul you can do something with Nano-coating for your ... whatever, heating or whatever. But, you all have walked the path. This is a mastership of a teacher and I'm a master in what I do I've done it many times in the Universe. I understand the weakness of the student, but I don't punish it for the weakness, I glorify it's beauty, which is his Soul that he tries to get to that point, but in fact, it walked through the door. It's not a catch, is education of the Soul, is the freedom for the Soul. So, when you talk about the plants when you talk about, "I ate..." as we're talking with ... Rick and Vince before about the celery. What you do with the celery, say, "Can I chew you?" "Can I kiss you first and then chew you?" Or, is the celery created itself for you to chew it because it had to have those leaves that it could allow the plant to grow, that it could create a seed. If this is a celery and then it gives its seed... we don't allow all of them to become but these leaves and everything else is for you to come to have the seed. So, the plant has already calculated, "I am giving something to get something." "Thy shall not steal" But, you have to understand something very simple. Who makes that decision? Where is the Soul of the plant? Where is the Soul of a tree? As we said in the other teaching, or you, some of you mentioned. We cut the

branch, we take the fruit but the taste till there? We got arm of the Man, we got the leg of the Man, but Man is still there. Because the Soul of the Man still is within the structure of the Body of the Man. Even though every cell carries its own Soul. How come that the plants have become what they are? Where is a Soul of a tree? When come the point that a plant does not want to grow anymore? When we see a plant, when we see a tree, where are its roots? Why does it have a root? How did the Soul of the plant change... from the Soul of the Man? In a way of guaranteeing its survival. The position of the Soul of the Man and a plant and a tree ... it's the same. But, in the Mankind we decided to go this way. In the world of vegetation they decided to go that way. The Soul of the tree is not created somewhere here and goes down. The Soul of the plants, the position of creation of the Soul of the plant, it's ... slightly different than the Soul of the Man. Or the animal life. In the position of the Soul of the Man we kept the freedom of our Soul, but with some attachment condition, to the Earth. Which means we still would like to be free, but we accept certain connections. So, the Soul Fields like very much like a Sun, if you look at it your Soul is like a Sun, radiates downwards. And the interaction with the Earth Gravitational-Magnetic Field and in composition of changing your Energy, for this Soul to be independent, has created arms and legs. But, our Soul which is its own Amino Acid from the condition of the gaseous part, has decided to keep it's ratio mass to use a specific Field-Strength, of the Oxygen and the Carbon and the Hydrogen of this Environment. Where the Soul of the plant has decided to use the same but a slightly different strength of the same thing. Which, this allows it to be more dependent on the Matter-State of the Planet than the Soul of the Man. So, a Soul of a Plant sits just, just between the root and the stem, where the life starts. When you pick a tree, you pull a plant out the root of it is connection it's his legs, how he wants to be connected. But, the Soul of it sits just below the surface. And itself decides this is what I want to have to make sure that I can spread my eggs, that there is more of me. So, did the apple tree, so does the Man. Due to composition of the Amino Acid which is connected closer to the strength of the Earth level, the seeds and the trees, or vegetation, have taken this position. Where the Soul of the Man has decided different way. I stay independent, I still shine like a Sun on Earth, but I keep my distance because I chose it, slightly different strength. And choosing a slightly

different strength Amino Acid from the gaseous part, allows me to connect to Calcium, to Magnesium and to many other Elements of this Planet and what is above which Man does not know yet, and where here, I can only connect myself to Calcium If it's Calcium here or Zinc or whatever. So, in reality if you look at it... our Soul sits above in our head. In the plant life the Soul sits between the connection to Earth and the use of Environment, of the above. So, in fact has two ways, is grown in longitude where "with us we have decided to go in a different way in altitude and the longitude," where the Plants decide, "this is my longitude I stay at Soul level." My altitude, "I decide in what I can get, what I can go." And how much Fields is available forcing me from the Earth and above to become... part of what I want to be. The existence of the Soul of a being... is the same. Without it, shall not be radiating anything. Be it the Soul of the Man, being the Plant. And then, "I decide ... to have this condition." "I like to wear a Chinese hat with chop sticks, so anybody who likes the chopsticks and the Chinese hat is with me." "And then I can have a Chinese partner, that I create a Chinese child that it shows I'm Chinese, and with it I allow him to marry another one to spread more of me." So does the apple tree. Man has gone the wrong way in so many ways, not understanding these things. And he has seen the history of Man we see a lot of abuses like this, due to misunderstanding but those who understood it, abused it well. So, now we understand, there is no difference in... in what we think, because we can speak and we made the computers and the microphone, with the... more intelligent than the Soul of an apple tree, or a celery, or a wheat. Because we don't hear the, what you call 'the frequency of their communication', you think they're just a tree but, very soon, Man, when they open their eyes, as a race, they will hear the voices of the Soul of every entity, In hearing means: 'respecting', in hearing means: 'understanding to accommodate'. This is what we say, "You cannot steal", but, you are given. Do plants give, that through it, the energy they have created that gives your Life elevation of? So, that's become now your Soul, you give from you to elevate the others. If the apple chooses a red color and sweetener is eaten more that, by it, he can spread more of his seeds but it knows you have to have a pleasure of the sweetness of it, that it's seed can spread. Then, he has given the right, or has he given the sacrifice, to give to take? What about, if you come to the point to understand to the Soul of the plant, tree,

"that I give you freely what you want to spend, I take your seed where you want, that it gives you pleasure that you expand," you don't need to eat the apple. The apple in mythical language is Adam and Eve and the apple, is when Man betrayed his own Soul. That was the poison. That was the chalice that everybody's looking for. Betraying one's Souls and then you understand more. And then, it comes part of the theology because then you take the Fields of without taking the essence of the Life of. This is what the Man will face in Space. And this is the biggest dilemma for those of us who've been active round the Universe trying to get this race to be corrected. To you might funny if someone goes and says the apple, "Where would you like me to take your seed?" But, you don't need to speak the language, you can ask the apple, we can feel the Fields of it. Look how trees speak together. Look how, when you walk in the woods, plants accommodate each other, "This is the space I need to live, I have to go taller, I have to go to the left or to the right to get some light." They accommodate each other. Walk in the true jungles, made by nature, by the facilitating one's Souls of the plants and you get a different feeling. You walk through man-made jungles and you get a different feeling. You feel the pain of the trees, because, "We are forced to be here". It's like imprisoning a Soul. Man soon will learn these things, then you understand it. We seen it now in the world of food. Fishes are free with no diseases, Man gets the fish and confines them into boxes that they grow and they call them 'Free range fish' and we see diseases with them, because they don't want to exist. We see this in Ghana, in the fishing industry. We see this in Norwegian fish industry with salmon and the other fishes. We see it in the Scottish salmon industry. And none of the agriculturists, none of the fishery authorities have understood, contemplated for one second, that, fishes are getting diseased but, have we cared about their Soul? Do we need to confine them or, do we give them a freedom of a whole river and let them grow in a whole river, the way they were used to? But, we give them a helping hand. And if they will, they want, they give you the fruit of their Life, which is the children who, whatever, if the child wants to be there. Or, you find, after a while, they balance each other. The biggest problem in fishery and agriculture, that's why we see so much pesticides and fertilizers are used, is because Man has not understood, the Emotion and the feeling and the Soul of the plants, or the animals. Fishes are talking to us, trees are getting diseased because they don't

want to be in that position and then we says "These trees are all getting decimated because of this disease." Have we seen, have we allowed to understand the feeling of the tree? "I need more space, you say one meter is not good enough for me, you put me in a prison lock. I like to be 2 meters." When we understand, we plant it that way, and we will see no trees with no disease. We see agriculture without pesticides. We see agriculture without fertilizer because they will grow and you create the environment for them to grow. We have shown this in all the agricultural teaching. When we add GANS to it, it's not just the GANS we give. GANS creates a new environment for the plant. It creates a condition that the plant can take what it likes from its environment so it grows bigger. How foolish we've been we haven't seen. We force it with fertilizer, "You can give me as much as you like, I'll blow up but, I don't, I'm not so, we carry ... I don't put the right things in my seed, then your child eats my seed of grain of rice, does not get the right Emotion, you end up with new diseases because you received the wrong energy for what you've been brought up to. We have to understand the whole process. And, we have to understand the position, the work, of the Soul of the plants. Then, if you understand, we understand the Soul of this Planet. What does this Planet wants from us to be? So many times, I say, "The Earth is crying, blood through his Soul, for what Man is doing to his entity." It's like a father watching his child destroying whatever he's made. His life work being destroyed and destroyed. Till the child realizes. "I'm destroying my own root, what has father left for me, is for me to elevate myself but I've destroyed everything, how can I elevate?" If the Man could hear the cry of the Soul of this Planet for what Man and other animals are doing to it, Man will stop, will freeze in his point. And this is what the purpose of these teachings are, to open the eye of the Man to more knowledge, you use it, I was teaching with Dr Gatua in Kenya last Saturday, in the University where he teaches every Saturday. And to me, I have to explain how the GANS is ... good for the agriculture in Kenya because they get better profit they can harvest, but I cannot teach them, because they don't understand at the moment, that I create the facility for the wheat, and he's happy for what I give him, that it can give me whatever, I increase, I create a happy environment, through being correct, but then, would the vegetation or a tree would give me the energy it wants to put into a plant to grow to meet direct what I need, that I

don't even need to consume it, I Just enjoy its beauty. This is the new innovation of the new systems. When you make a food system, you're all happy to have a CH<sub>3</sub> on you and get energy. What about the Soul that, that entity creates, that it gives you unconditionally from it what I nourish from. We have the same power going in our Flight System they do not see, to fly needs understanding of the freedom of the giving by the entity you use, not by forcing it. In a way, "I give from my Soul, for you to give me, to show me the beauty of what will give me a pleasure and for me it'll been a pleasure to be able to fly." Then you'll find out, everybody will walk to the king. The king being the Soul of the Man, that with it, it becomes generous to give. Not to take. In so many ways we have to understand what this technology brings for us. Then, we understand the structure of the Soul. Then we don't need to go to the wall and bang our head through it, to become elevated in our understanding, because we're just banging it against the... what I call, 'a solid wall'. Solid wall which the Soul cannot accept. So, when you speak about agriculture, understand what is, where is the Soul of the plants? Why does it operate this way? And in so many ways, does not matter if the plant, which the energy you need for it is in Africa and you're in Europe or in Asia and you're in America. Man needs a lot to learn. When we saw the magnets by ... Rick last week, or in the other teachings. You just look what happens immediately around the magnet, but look beyond, where these Fields will end up. What... who takes? Who needs it? So, when we look at the structure of the agriculture and we understand what is being explained, then two points. We don't need to eat the plant. Second is, we give respect to the existence of that Soul. Because, at the end of the day, if the Amino Acid turned up to be the Soul of the Man's container, becomes the body of the Man. So is for the plant, but different strength. The Amino Acid of the body of the Man, creates, needs the Iron to create blood that it can flow, that it makes it versatile. The same Amino Acid of different strengths, with Magnesium and other things, creates the green leaves and the rest of it, that we call it a vertical position. But, all these plants they talk to each other, they communicate in the world of the language of their Soul. Because once we understand the Soul of the other and some will do with the others space, that they need to space themselves in. Agriculture the Soul of the plants, if you understand it should become a rhythm for living of the Man in Space. We have to

understand: Why? Because, we been ignorant to it. We have to understand: How? That we can elevate the Soul of the plants that with it, it grows the plant. And then it comes other aspects, becomes other understanding, it comes for us as a Human race to go a step further. Then, as I've said many times, "Every energy pack in the Universe, does not become food." Any other question? (AB) Can I ask another question Mr Keshe? (MK) Yes. (AB) How does a lion, stops eating the lamb. How do we accomplish that? (MK) How do you think your Physicality is destroying your Soul? The Lion is the Physicality of the Man and the Lamb is the Soul of the Man. So, you translate it, you understand it. It's your job, or not your job, is for Man to understand ... to be able to teach, to be able to convey the message in a way that the Soul of being has a different packaging in the brain of the Man in receiving energy from the Universe and has a different package in giving energy to the Universe. Then, it receives what it needs and it gives what it needs. No one in the Universe consumes energy the way Man does. As I've said, its... "it's the malfunctioning of the system which we're trying to correct." But, it has to be corrected from... (sighs) There are two ways to do it. Literally, to destroy everything which this Planet has created. Literally, destroy the Solar System bring it into point as it happens many time, to come in the point that nothing goes out of this place. Write up, wipe out the whole Planet, but within it there is a Soul and there are Souls. But these Souls have not changed. They manifest themselves in another dimension, then we have the same problem. This goes back, very much like the story of Moses. A lot of people look at Moses and his life and you call them Judaism, which off it has come Christianity. When you look at the behaviour of Jews today. When you look at the behaviour of one of the Jews which we know more than others like, Hitler. Compare it to the training of Moses. Didn't he kill all the species of one race? Those who grown up. Didn't Hitler killed most of those who were his lovers. Don't we see the same pattern of kicking with the... killing with the same process with the, Jewish what we call, 'State'. But, stop it didn't start with Moses itself? How did Moses become Moses? Didn't the king order the killing of all the male species ? Because he knew there could be someone who could take his position. He looked at the king to come as a king of Physicality, but never understood that the king was supposed to come in the Soul of the Man. Haven't we seen the repetition of the same in Hitler's time. Killing all the men of

one village because its ingrained in the conduct. Haven't seen the same thing with Islam? The same thing in time of Muhammad now is repeating itself in different names and shapes and forms of Islam. Why every race sees killing as a solution? This is what we've got to change. This comes from the knowledge, the education, the beauty, of being able to have everything that you will not need to commit, to kill or to commit a crime, that means, devaluating your own Soul. This is part of this understanding which now, when you understand, you create a GANS. You create a GANS machine, of whatever... a lot of people followed and then stopped, Which means they are not matured yet. If you can understand the Soul of a plant, that what it needs to elevate it and comfort it. And you've been taught now, how to make GANSes or create a free energy. How many of you have gone into the process of converting the energy to what you need, that you don't need to have to kill for it? Many of you have started, but, it's the process of learning. Go back, a lot of things which has been taught. The 129 was the best example. And nobody has picked it up. Nobody has understood the full meaning of, when I set up the test years ago. We had a system, we have another system, and we have another system. The size is the domination of strength. We had a weak system, a medium system, and a strong system. Understanding the work of Magnetic Field, Plasmatic-Magnetic Field, this is what we did. We embraced the weak, we fed from the weak, and we took what the weak didn't want. And we created such a commotion of feeding more and more because this was a hungry one, reaching 129 Tesla. This is the Soul of the Man, this is the system you can create. Intermediary is the Physicality of the Man. Soon, the Soul of the Man will grow. It depends what you put in this machine. Then, it does not need the Physicality, and then it does not need to feed the Physicality, to kill for it. So simple. This is what I said to one of the government officials recently. I can create a system, that I can feed the whole Nation. The same, we know what it needs to be in the machine, and we know the Soul of the Man, the Physicality of the Man is weaker than the machine. They can take as much as they like, the more they take, the more I receive what they don't need, I can convert back to more to give them. But the problem is, when we feed the Man, Man has got nothing to do now the hunger is over, would the Man go violent to get more, now he has no worries about how he receives the energy because it's always there? We use the Physicality of the Man

to elevate the Soul of the Man. So, when the Soul of the Man is elevated, so the Physicality will change. When you go into Space you always have to consider the strength of your Soul, and if the strength of your Soul, in the environment you arrive is at the level that, does not take everything you have, and you can manifest yourself, that's why in most of the places in Space when Man goes, it's not suitable for the Man, because he cannot manifest itself. Because by manifesting itself, it can create his own demise, which means it gives his Field, Totality out, if he doesn't want to, but it happens due to course of the strength. All the teachings are connected to each other. It depends on the understanding of the Knowledge Seeker. How you can connect, and how you can understand the Totality. The faster you do, the faster you grow. It's the same thing, I went yesterday in a medical teaching. And I teach about the combination box, and they want to know how you connect it, what do you do? And I explained very simple. If our elite of the knowledgeable people which are the doctors and scientists, are still entangled in how to make a box, they haven't seen the reason of the teaching is, a doctor has to be the creator that he understands every need, that it becomes literally, the machine. That can change ... give to the Soul, that the Physicality which is a disease, walks away. And so, this carries on, in a way, it's the Soul of the doctor, not the machine which he makes. As I said yesterday, "There are no motors, and no reactors and no Magnesium and no potassium in Space." The Sun shines, and the interaction with the Field of the Physicality of the Earth, the Fields produce, Oxygen, Hydrogen, Nitrogen, Carbon and Gold, and everything else. So, the Soul of a doctor has to become the Sun. In interaction with the Physicality of being does not matter what, in what part of the Universe, in feeding the Soul, elevates the Physicality from its position of pain or whatever. This is the true knowledge, this is the real essence of creation. And somehow Man get's entangled with Physicality too many times. And in so many way as a patient teacher, I take my time. You have to make a test, it's a test tube. You change something to achieve something else. We have the same problem with the people who are trying to fly. The, the flight system, I have given them everything, but they cannot, they're running into frustration, "There is something wrong." Yes there is something wrong. You have not understood. The machine is this guy, here is the Soul of the Man. You want the flight, to see a flying machine, you have to

understand this process. It's me who feeds, it's my wish to see the flight, and then everything is done. They're still after rotating and seeing, noises. It's time to unite all the knowledge, with all different aspects of teaching. Those who are in science, those who are with agriculture, those who are into fishing, those who are in art, or whatever, to understand. And it's time to understand the teaching is for all of you the same. According to your understanding, you translate it to yours, look at the agriculturists, they are translating the use of the GANS how to grow plants. Look at the doctors, they making cores how to change, but have any of you asked what? It's the same CO2 I use. It's the same GANS of Amino Acid of whatever Zinc or Copper or whatever. Have we given different instructions for different production of the GANS for the agriculture or medicine or whatever? No it's the same. The love of God shines on all, equal. It depends, if you're a Man you get wet you run away, not to get wet, if you are a plant, you say "Thanks, I received water." But, it's the same. It's the same water, it's the same knowledge, it's the same, depends how you want to use it. You put a cup up, and collect the energy of water which comes the rain, and you drink it, to give, rejoice your own Soul. Or you hide away from it, you don't want to get wet. It's your decision. When I teach, I teach the Totality, and each one of you look into a point where you are interested. None of you stood still to say, "The knowledge is common between all of us." The knowledge of Creator is like a Sun, you have to understand, which ray you want, where you want to be. And then, if you change what you understood, as a doctor to use for your patient, you are behaving like a Emotion, your Soul become the converter of the Soul, of the Emotion in respect to what it comes from the Creator. You become the Physicality of it, that it feeds the Soul, that is weaker, for it to elevate through you. Then in so many ways, if you look, in one part you play this, and in the other part you play this. Does not matter if you are in agriculture, in health, in energy or whatever. This is what we got to understand, and the sooner the Keshe Foundation Knowledge Seekers understand, it's the same song. Does it rejoice you, does it bring you sadness because of the memories of the past? Or does it make you think to become wiser, it's the same song, played by the same recorder, and it's the same music. It's upon the beholder to what he receives, and to what he understands from it. Try to understand that I have taught Mankind the Totality of the knowledge. Do you

want to be one name of Creator to filter or do you want to be the Totality of names of attributes of the Creator. It's all the same Sun. It's what filter you put that it gives you that emotion. As I've said, "when a man travels into Space, man will understand more names for attributes of the Creator which he has no knowledge of at the moment. Any question? (GM) Yes, good morning Mr Keshe, I have two questions. This is Gatua. (MK) Yes, Dr Gatua. (GM) Eh, ... the picture you had before this one would help. But, I don't know whether you can bring it back? (MK) No, I wipe it out, I don't store pictures. (MG) Okay, I... perhaps Rick can give us a, you know, cut and paste? ... if he saved it. But let me continue with the questions. And probably Rick will begin that in background. The first question is ... First of all thank you very much for your excellent teaching about our Souls and Souls of other beings. This is very important. Now as far as plants are concerned, and the position you drew, their Soul's location, how is it that trees can grow from cuttings? Like you cut a small branch. It grows, yet it does not have a Soul at that location? The Soul is either in the seed, as you drew it, or just between the stem and the roots. So, what happens in order for trees to grow from ... (MK) No, nothing, nothing happens. Do you know you go on? Let me translate in different language. You're a, you're a doctor. You're a well taught person. Now, we can take an egg and grow it into a Man without the mother and father. We mix it with a sperm, egg and a sperm and we get what we like. And then if you go back to the teaching, I've explained that every cell of the Man has a Soul. And you get water swab from the mouth of the Man and you can tell his DNA and RNA and the rest of it. So, when you cut a plant, every cell of the plant carries all the information of this creation. And, when you put it in touch with the soil with the Fields of the Planet, then it manifests itself, the same as a life, as another being. This is why in every teaching, in medical teaching, I always explain that every, every cell has a Soul. But, it depends how the Soul has been adapted to convert itself. If you take a cell, an arm of a Man and you plant it, it will not grow too. But, if you take a cell of a Man the right way and you can conduct it the right way, you can create another Man. It's the same with the plants. But the plants have made that accommodation that they can do. That they accept certain Fields because they're connected to the Earth. They take, they create the Gravitational-Magnetic Field of what they need In a way when you put a plant down, you just look at it as a leaf

or a stem you just put in the ground. But, you got to understand there is more to it. Every cell here carries a Soul. And this Soul creates a certain Fields that in interaction with this Planet creates roots. It brings what it needs to it. It doesn't go out to reach it. And then that allows it, in genetic way or whatever you call it in the growth, to grow in. So, it's not that you plant it and it grows. How come? Because all the information, what it needs is here. When you put a... your cutting in a ground and it doesn't grow it means it's Field does not match the environment or the materials which needs in that environment. Because, it has a preset Soul level in interaction with the Physicality of the Planet. So simple. (GM) ... Just to make this very clear, if I look at the egg and sperm and the way you have taught, what happens is that the egg has a separate Soul, and the sperm have a separate Soul, but when they start interactions they create a condition within the mother's womb that makes it possible for their Soul to come from the Unicos. And there... and then we have a fetus. So in the case of plants, the way you have drawn it just look like an arm and an onion egg and sperm situation? Does the Soul also come -(MK) [inaudible] (GM) from outside? (MK) Soul what? (GM) Does the Soul now, what makes this cutting into a full grown tree, does it also come from the outside, like the Universe? Like a plant ... (MK) No. The thing is, doesn't come, no, no. The Soul comes from the interaction of the Fields of the eggs. And with it, it creates a stronger Field which takes from its environment. In the case of the plant, you create one condition. And the other condition is the Soul of the Planet. And the interaction of the Fields and what is available that allows the root to grow. This is how I like to connect myself to you. And in that process the two fields create the condition, that allows other Souls to be created. If you look, even the roots the cell in the root has the same Soul as the cell in the body of the Man. (GM) Okay. Thank you very much for that explanation. The second question is about application of manures. The way you have explained how plants take CO2 Liquid-Plasma for example when we apply, and how that helps the plants is that the CO2, in the carbon in the CO2 Liquid-Plasma attracts COHN or Amino Acid from the atmosphere and brings it close to where the plant can take them? Is it the same with a manure? Does manure actually become a magnet for Amino Acids in the soil? (MK) Now, go back to what has been taught. What is manure? It's something which has gone through a process, of GANS. And in it, is the same

process. Is not the... .... in so many ways, the energy which is embedded in it which gets absorbed of the matching of, by the plant. Fertilizers in fact, if you look at it, are different way of a GANS but they're in a Solid-State. Because, all entities are made of Magnetic Fields. But, when they are in a solid they have a smaller Field. When you're in a GANS you have a bigger Field. That's why there's more affect. Is more giving. That's all, no difference, not a things. (GM) Thank you very much, indeed. (MK) Thank you. By the way, thank you very much for your teaching on Saturday. (GM) Oh, you are very welcome. It's my pleasure. (CS) Hello there Mr Keshe. This is Charles from Universal Council ... as a language member for Mandarin, and I have a question ... for ... for the 129 Tesla and ... Can I show the screen? (MK) Yes Please. You want me to stop sharing that you can share? Go ahead now! (CS) Yes Okay. So, ... you draw three box. ... One is... one is for the weaker, middle with the medium and ... very strong and the ... so the energy flow ... in this system, looks like this. And the... So, the mechanism looks like here is a strong one feeds the weaker one and get fed by the weaker one at the same time. And this mechanism can be applied also in ... in feeding, in health and in ... lift units. So, so it's like... a looks like ... a Universal principle and (MK) Yes (CS) ...and this... this reminds me something and I'm going to talk about. Of course in China we have some kind of... we have some knowledge about Yin and Yang, So, we developed everything into ... yin yang's theory. And for example, this is Yin and another is Yang. So, one is weaker and one is stronger, and ... another knowledge is called a Bagua or we call it a '8 trigram' that means, we replace weak... weaker replace Yin with this... this symbol and Yang with this straight line. And we combine them together. If we have three of them we may have like a different ... different ... trigrams for example like this. I want to draw all of them. And they have different meanings. So I... I will draw four of them, actually is equal to three. We have one, two trace in one position and we have three of them. So we have eight different ... trigrams and ... there was one knowledge developed in china called the Bagua for... for this... for this and ... this can be used to analyze the... to understand the knowledge of the Universe or how to ... say? Asian people in China use this to predict what would happen and ... predict... and to gather their behaviour. And I found out as you... as you've said in... in this topic of the... of the story ... of the system combined of story. And, it looks like... it feels represented

of... the story ... story symbol of Yin Yang is represented by the story system and ... it looks like there are some connection. And the... the Asian channels that, "or is one, or the same." That one give birth to two and two give birth to three and three give birth to everything. So, this seems the three produce lots of things. That means the interaction between the three items can produce lots of things. And the... .. and the... let's talk about the meaning of this trigrams. For example, let me take that... take an example. This ... means 'mountain'. So it looks like a... looks like a mountain. And ... it... another meaning is 'stop'. So, there... it looks like the highest energy ... if the stronger is very high and there is a... the other is like a very weak (MK) Can... can you repeat it again, this section again please. (CS) Okay. So, this trigram is called... is called a 'mountain', in Chinese. And there is held another meaning of 'stop' . White stop, so I try to understand it, based on the... the knowledge you... you Te... you taught. ... My understanding is that the... the highest level this one is very strong and ... when other three is very weak. For example if we put into the... pla... into the ... star... Star-Formation so we have three base of them... and the... and it carries one for... on the top. So, I guess if in... in the Spaceship we ... we use this at a very high... high level ... .. high energy level and the other three in ... like a low level. So, it will... this combination of setting of Star-Formation will ... help to stop other Spaceship. And another one is. This ... is a... another top is like this. This is a ... lightening or thundering so, lightning or thundering. It means ... it can abverse, it gives birth to lots of things. They... they have lots of meanings, but I just pick up the most important meaning, for these ... symbols. It can like... my understanding is that there... on the top, if we think about the Sun and the Earth, and if there... the sound energy like ... is connected to this one and the Earth energy is connected to the strongest one. And sometimes like ... the storm... lately ... it always happens when two clouds . One is point of shadow or negative shadow, that ... potential difference... difference exist between two clouds or the sky and there's a Earth. So, the lightning happens and the... the lightning will just like, ... when we make a GANS we, when we Nano-coat we use some electrical current to ... to guide, to ... when we, when we, when we do ... Nano-coating and ... it kind of give birth to... to... to something. So, ... in conclusion, there are five ... five ... eight ... trigrams of these symbols and if we have six of them we have ... we can have another series. It's

called ... 'Zhou yi' or 'I Ching' ... If Rick can... can share I can send you... send him the link in Wikipedia ... explaining of this theory. So, this is developed a theory for... for Bagua. Because it has six ... two choice for one position and there are six, so it has ... sixty-four different symbols and ... our ancient people used this symbols to predict what would happen and ... in my understanding it's ... these symbols can help people to understand the whole energy, with a flow. And, what are the results that have been caused by the ... by a certain ... flow pattern. And ... so, I wonder ... so I hope then Mr Keshe, would ... enlighten us about these trigrams and other... some theory behind Yin Yang and ... this like Ancient knowledge. (MK) When you speak about the ... infinity loop, this is what we see here. This is what we see ... I don't have the control, let me see if I can? (CS) Do you want? (MK) Just wait, no, no I can take. If you talk about this infinity loop. This is a strong, this is the weak, the intermediary's this point of interaction. If you speak about this here, what is missing is here. Because, we know this reactions create a third one. The... I... in so many ways, have so much respect and understanding, for the Chinese culture of Yin Yang and understanding of, not the way you describe it, but the way of understanding the balance. This is how the Universe works, and if you are looking for solution or comparison, all the people who gathered this knowledge over centuries, understood this balance. And, others have just followed it, or some understand it to study it more. In so many ways, when you explain it, when you write it, it's very much, what is interesting in what you just explained. You put 2 to the power of 3 is 8. And this 8 is the most, what you call it, 'precious number' in Chinese? (CS) 八卦 Bāguà (MK) Yeah, but what is interesting, this is  $2 \times 2 \times 2$ , correct? But in Chinese language, or in Chinese culture, you don't have any 4, even on your buildings, you have no 4th floor, you have no room with number 4 in it. (CS) Yes, right, we don't have ... It's ... like ... not good number in the Chinese... (MK) Because is, because, yeah, the reason is because it sounds like "death". That's the reason you don't ... you don't use it. When you go into hotels in China, there is no room 104. You go to 106 or 102. Nobody wants to be in the death room. In so many ways... if you look at it... a lot of understanding of Yin and Yang, comes from a lot of un... deep understanding, of the belief of the working of the Soul. And, you like to be generous, because you're a giver. So, you feel good, you are precious, because then, you can give.

Why then that giving makes you wise, that wisdom makes you rich. This is part of the culture of Chinese conduct, understanding. So, is it the number 4 which came in the middle? Or is it that you jump that, and you just look at one? Just not by name. When two is not good enough, you have to be three. The, the... the two way you look, is the balance of energies, not playing with symbolism, or with figures or numbers. You got, you got to look at the essence of the knowledge. And Chinese culture in the richness of the time, has understood this. When you look at the sign of Yin and Yang, look at the shape. The border line is the line of Physicality. You draw it like this. This is the weak, this is the strong. And this is the Physicality which they create, that you see the difference. This is the doctor, this is the patient. This is the Soul of the doctor, and Soul of the patient. And the Physicality is what will reach it. A lot of teaching which is been done, and in so many ways, even in your writing, ... what you've just shown, even the thunder, that nobody, even till recent past, when we saw a thunder, we always thought the thunder comes from the top. But actually the thunder origins from the Earth up. Why? It's the same with all our teaching. When you receive so much energy, the surface of the Planet absorbs as much as it can. But it absorbs a lot, and in one level, releases much more stronger out. And then we see it as a lightning. It's the way energy transfer, has been changed into symbolism, and numbers or whatever for people to understand, but in fact, even if you look at this, the way it goes, there is always a point where one getting, one giving, one receiving, one making available, needs to meet a balance. This is it, I have so much you can take here, or I need so much, okay, you can have in exchange. But, I have to give more, to be able to receive more. Because otherwise I cannot give, because I haven't received. So, if you put all the Chinese symbolism, but go to the Wisdom of the Nation, go to the Wisdom of the culture, you understand it's nothing but the explanation of the Soul of the Man. Even the Chinese Wisdom, the wise men of China, could not explain so easily to the people, because they could not understand. The, the depth of the culture, the depth of the culture, comes by the strength in the knowledge, in Chinese is very deep. But still has become a lot of symbolism, that even now we don't understand most of it, because those people who became so wise, they could understand the work of the Soul. So, when you look at your symbolism, you look at the numbers or whatever, all talks about the same, but

the people of the time did not understand the maturity of their own, what you call, 'Wise Men". They had to hide it in symbols and things, that people could understand, or some people could understand. And now it's become fashionable. This is what it is, but go to the essence of it. If you take the whole lot of Yin and Yang sign, I try to use a different color, then you can see. It's the same thing. It's the line of transformation. If you look at it, in so many ways, in a very symbol way, ... .. in a very simple way. It's not to look at the symbolism, but look at the essence of the knowledge, which was passed by the men of Wisdom. As many of you know, I have a lot of, I enjoy Chinese culture understanding, because it's a different way, and the Chinese supporters of Keshe Foundation in China, totally approach the whole knowledge, in a different way than the rest of the World. Because they understand it through the work of the Soul. In a essence through Soul, but is so natural to them, that they forgotten that is connected to their Soul, it's talking and working, is their way. Nowadays there is more materialistic world, but if you go back and look even in the other parts, you still believe in people, who understand more, what they call the master of... what you call it, ... 'Energies". So, if you look at it, you just draw it. We are talking about the same thing. Depends how you want to turn it, how you want to change it. Is all the same. We have to move, this, this is what I enjoy, working with the Chinese community. Because they're a step ahead, they have understood the work of the Soul, in a different way, but they are more... they used to be less materialistic, but understand more of the work of the Soul, but the masters have hidden it, in a way, that the common people, still could respect them to understand more, but if they would have shared the knowledge, the way they understood, the true way, the Chinese community would have been in Space a long time ago. Even though you're already, you're far ahead from the others, from what I know. If Western World knew about technology, Space technology and the advancement in China, they would have hung themselves. But that's the beauty, because you look at it different way, your scientists look at the whole technology different. And it's a pleasure to work with them. Because you understand the connection between the Soul, and you transfer that knowledge in different way, with Space technology, with agriculture, and everything else. But, the same in the Chinese culture, you need that additional knowledge, to go further, and that additional

knowledge is given has been given. Is now how you use it, to expand and go to the next step. (CS) Thank you Mr Keshe, as you said, it's need to be expand, because in China, we have lost like ... like ... Ancient knowledge, but it's kept in their traditional characters, and there, nowadays in China we use a simple, a simple, simple ... characters, some knowledge or like ... like a stop, So, so there are lots of work to be done, to renew the knowledge, or explore the China we have already in our hands, and they so, is still a long journey for, I mean the for, for the... the present generation of Chinese people, to, to, to get, get all... all the benefit they can get from the culture history and everything. And the whole step, step into the Space, thank you for, for you recognition. (MK) It's not a recognition, is a understanding. When you understand the knowledge, the Man of knowledge ... .. how they look at it in the West, everything has to be patent, in the East in China, everything has to be Emotionally understood. And, this is the way the Chinese culture works. Once you understand it through your Emotion, through your senses, you live by it. But when it's a patent, is just what I read and I can do it. That's why the Chinese scientists are much more advanced in, and we see much more development in China. ... Because the, the evolution of the knowledge of the Soul of the Man, is far ahead of the Western World. Far, far ahead. I've had the pleasure to be in contact and see and work with some. And ... even in the common daily life, you have a totally understand... different understanding, which in the West we don't understand, because you have gone one step further, by teaching of what I call the, what you, in the what you call it ... the English language, we call 'Messengers'. Because, they went towards the Soul, which is the real Creation, where in the West, in Abraham-ism, they went to the Physicality, which is all punishment of the body. Where in the East, in the Chinese culture, you go for elevation of the everything. And it has created a lot of what I call... false understanding, but with the new knowledge which now is in the hand of... .. humanity, especially Chinese through the Keshe Foundation, and knowledge comes with it, the progress in the technology with Chinese, is beyond ... understanding of the West, far beyond. Even though sometimes your leadership, falls for the physical conformation, but understanding the true knowledge, in Chinese culture, you're far ahead, you're a distance ahead from, what you call it, from the Western world. Because the Ethos of the teaching in

the, the West is totally on punishment and Physicality. Look at the all the teachings of the, or all the names which come appeared early on Arabic or in English. Is all connected to Physicality, they missed the way you look at it, but they don't look at it's all connected to that, which are the Soul, where the Chinese culture understood this long time ago. And that's why you can do more. In between the West and the East in India, they have understood it, but they abused it in different ways. But it's abused everywhere the same. Different one of them is to use as different way, but the Chinese culture you, the... you're understand... ... you have got the full explanation of working of the Soul, but nobody has opened it up. And now with this technology a lot of ... Chinese are working in that way. You come up with totally different new designs, for different products, because you understand the work of it, totally through the Soul, but it's so natural to you, that you see it as a product, but you don't see how you came to it. Where in the West it's an, it's incomprehensible how is this possible, how you can do this? We don't need to explain a lot of things to Chinese, where in the West you have to, because they are not matured in the Soul, yet. (CS) Yes, I knew, I knew many members in the Chinese group, and we get attached with Keshe Foundation and the Plasma Technology. And ... many people are attracted by this technology, because we can, we found ... it explains lots of like confusions, that we already know, but we, we still wonder about, in our own culture and we find out through the Plasma Technology, has lots of connection to like our, like ... traditional, like ... knowledge. And that it works, it works really nice and... so that's why, so when you talk about the, the ... history the 192 Tesla like system, and the, so I came up with the idea, of the 8 Star Trigram and the I Chi, or, or mean the another name, is the Theory of Change in the ancient knowledge, and yeah. (MK) You have everything, it's just that people have now to understand the next step. (CS) Okay. Thank you Mr Keshe. (MK) Thank you very much. Any other question? We are nearly reaching three hours. The understanding of our work, goes much deeper than a lot of people, do at this moment, but ... we're maturing all together. This time is not one race or one religion, or one group. Is the Totality, but it brings all the knowledge of the past together. And ... it is very interesting that we can go to the next step, and do other things with it. And we can spread the knowledge. Speaking about the spreading the knowledge, I have a, again thanks to the

Chinese community of the Keshe Foundation, and the, the what I call 'Keshe Foundation', the people who work around the Keshe Foundation, is that ... hopefully, within next few weeks, all the books of the Keshe Foundation will be released through Chinese printers. What we have and we hopefully should be able to deliver, is that we are looking for those of you; who have translated the books, in the language, your mother languages. We know we have all the three books in Chinese, I've seen them, they are beautiful done, they will be printed in China very soon. So you can get access and buy the Chinese, the three Chinese books in China, through the Keshe Foundation system. We have set up an organization, and it's owned by the Keshe Foundation headquarters, that you buy everything in China, in the Chinese account. So those of you, you're been looking for Chinese books, which ... they'll be hopefully printed in next few weeks, please get in touch back with the Keshe Foundation. We are trying to get it correctly checked which has been done. The modern Chinese and the old traditional Chinese and these books will be available in a coming, in a short time in China. All the books with the Keshe Foundation and the, all the materials will be translated and printed, through one publisher. We're looking, if you translated, we know, we have the 3 books in German, We know, we have the 3 books in Czech. We know the Spanish has been done, but we don't know who is holding the part of it. Kokai, one of the first Knowledge Seekers translated the first book. We have lost it, because of the server damage, If anybody's in touch with him we would like to have his translation, he gifted it to the Foundation that we can print it for Spanish, or if the Spanish group have translated the books, we need them, to be able to print them back. All the books are copyright, which is ISBN numbers, so it cannot be published by anybody else, because is owned, intellectual right owned, and is owned by the Foundation. So, we have the Chinese, we have the English, we have the 3 books in German. We know the Czech has been done, we know some people have translated the book number 1 and 2 in French, the ... book in Flemish or in Dutch has been done by a couple of people ... we know Portuguese has been done, the Romanian has been done by someone, somewhere. So, if you know, or you have translated the books into any languages, the Foundation would like have... to access to them that we can publish it. That, it'll be printed, that it can be distributed from China. The ... the whole ... what we had the problem with the

release of the books, for past couple of years, where we paid the printers in Belgium and they stole the money and they will not deliver it, because of the same process we've seen with the others, is finished. We have nothing to do with Europe anymore, we paid 24 ... 25,000 stolen from the Foundation, is the habit of the ... that part of the World. So, we have transferred all our printing into Far East, and, from now on, we release every book. The books, you ... if you have translated it you want to send it... send it to webmaster, put a topic, Book Translation, we get it checked, and then will be published in their language. If you need a donation for your work, the Foundation is prepared, we have an agreement, we pay back to you for the work you've done, because now at least allows other people to read the knowledge, as they don't all speak English. If you translate anything into any of the ... documents of the Keshe Foundation, into your native language, please let us have it that we can expand the knowledge, that nobody falls behind. So, if you are a translator, you have done the book translation, or you know somebody has done it somewhere, please, this week or whatever, send them back to the webmaster, even as a package, as a file, we download it, we give you get it to be, a what we call, 'organized' to come as a book. So, in next, let's say few weeks, ... the ... all the books which you bought, is delayed, couldn't get out of Belgium, because of stealing by them, will be brought back in, through the Keshe Foundation and ... now with the... with this process, all the ... languages will be available that you can take. If you are in a Third World Nation, you call yourself, which you are all the same, if you are in a African nation French speaking, once we receive the books, as a gift to the Foundation, it will be given to the French the way, we've seen in South Sudan and last week, the book were translated, or this week, the books, the pdf file of the books have been transferred to Kenya, for the Kenyan University students to have it free, that they can educate themselves. This is how we work, we... when you start teaching in different Countries, that people want to read the book in the Universities, now we have, ... all the files, anything you provide to us, when we receive the file, that somebody needs the book, or University, or whatever, they can't afford it, we'll deliver, we send you the full pdf file that it can be printed, in the printers in their offices of the University, that the students can have in their hand. So, whatever you have translated, as documents, please send them to Keshe Foundation, we'll

put them in a hard copy. Doctor van Dorp has done the transcribing of all the teachings, medical teachings. Those ... will be ... they're on Amazon, they'll be transferred with his permission to the Keshe Foundation, they are printing in China, that if anybody wants a hardcopy, you can order those to be done. Then we can go through the same process. Most of the works of the Keshe Foundation, my papers and everything, will go on a hardcopy to one printing office in China. The process now is set up that way, that the knowledge is received by everyone and it can be done by everyone. We know a lot of Chinese people, been looking waiting for the books, the books are complete. I had the pleasure to hold them a few weeks ago and it was very nice to see, the essence, but in the writing, in Chinese writing. ... I thank the people who have done the job, it's been fantastic, what I've seen is beautiful presentation and ... we go to the next step. So, if you have translated any part or any of the books, please send, get in touch with the webmaster at Keshe Foundation, and ... we are now in the process of, we are now, we can go in process of publishing papers directly, and it goes directly to the printers, they print per order. Any other information? Any other question? (RC) ... We had ... Pete from Poland, but I'm... I don't think he's here now. So, I guess we lost... we'll have to have him, next week perhaps. (MK) Yeah... he says "Next week", Caroline is telling me that, he is at work, he'll do it next week. (RC) Okay good. (MK) Next Tuesday, then, we can bring it forward. He already has received the file. ... Anything else? (RC) Well there is a question in the Q&A I suppose we should address, I couldn't quite figure out what he was talking about, but I'll relay the question anyway. (MK) We better read it. (RC) ... It says, "I understand that the Earth is created by the Fields of the Sun in interaction with the environment and Man is created by the Fields of the Earth in interaction with the environment." "I would like to know where my Fields end up when I decide to change my skin to black I can feel the change of my skin, but it does not happen here in this dimension." "So, where does this change happen?" (MK) It can happen if you wish it, if you understand how to do it. It's that we have not understood fully the operation of ... In a... in a... in a coming time, those of you who are in the Research and Development, you will report to us that you see changes in your color, because some of you, at some one point and another, will touch knowingly and unknowingly, or it become designed to, that we produce the

Field-Strength that in our body, changes the color of the skin, the color of the eye. It comes through the Essence of the Emotion in respect to the Fields of the Sun, ... the Soul of the Man. A lot of people wish to be white, but in essence they do not want to be white, because they have seen no good being in white color, or they don't want to be black, because they don't see any... in a way to be black. The color will become irrelevant in Deep Space. In the Space Technology these things are so ... immature that no one contemplates, because you are beautiful the way you are and the way your Soul wants you to be, manifest itself. But, if you, the easiest way if I can explain to you, is how you can change your color, is that you have to understand, the Emotion of the cells of your body in respect to the Emotion the Soul of your Totality, which is the solving of your Creation. The way you suddenly ... see your, out of whatever, the hair on your skin rises, the fear or whatever, the way you see through Emotion, your skin crunches. The way you feel and you let your skin go, because you had enough, if you can do these things, change of the color is the same. You have to find your strength which creates that change. In some points we see, a lot of people, in their hair, suddenly, white patches, or Grey patches. Nobody has ever explained this, but if you understand the Essence of the Emotion, and where the Soul of the Man converts the Emotion, and go to the person, and ask that specific question, it relates to that part of the brain of the Man, you will see the answer. Why? Because the change of color in our hair, in the position of suddenly going white in one patch, has got to do with the Emotion which is in that point. And the world of science has never understood this. When you see somebody with that, and ask them, he says: "It just suddenly came when I was twenty five years old, twenty years old, and it became white." Then ask them to go through the Emotion, "Why, what happened that time?" And then you understand, okay, is related to this. Now if you mark it, in the right way, you find the position of the feeling in that position. If it was sorrow and you understand, this is connected to the sorrow. This is where the Field-Strength of the body sits, because the Emotions come through the brain out, output. Because when it goes in, the Emotion absorbs by the feeling of the Soul, and then the Soul gives this Emotion back at the strength at that point. We all can change our colors, very soon we will become very, very nice, a lot of people will do it, the way you go to hairdresser, once you understand ... you can change your color from

pink to yellow and blond, then, when Man understand the strength of the Soul of the Emotion, that creates the condition of the color, in respect to the environment, we change color as we like. Nobody can say, "Oh, you're black!" Because, I can change to black any time, and it's beautiful. And nobody can say, "You're yellow!" Because I can change to yellow any time I like. And change to yellow, with it bring the condition of narrow eyes, different height, different understanding, because that carries a lot of Emotions with it, is not just color of the skin. This is the knowledge which is gifted to Man, and very soon all of you will open it. (RP) Hi Mr Keshe, it's Rui from Portugal, UC member. I'd like to have one question, if it's possible. (MK) Yes. (RP) ... Can you explain the understanding of the theoretic physicals, what is the Neutrino, which kind of packet energy it is, and how it works in the Soul, in everything, not Neutron, but Neutrino. It's supposed to be, it's too close to be, a package of energy with no mass, and its speed is faster than light, and it exists in the environment, and when it's all around, by the theories of physics, and when pass we just that detect him, when they pass through some Fields, or some Matter, it change the structure of the Matter. It's the ones they call, they usually on land, they move West to East, it's cosmic rays or something like that, I don't know if you are, familiar with that, but I believe so. It's theoretic, physics theory, this thing how it exist. And when they come in a structure... sorry? (MK) I don't understand what you're trying to explain. (RP) Okay ... neutrine for the theoretic physics... (RC) I think... I think you talking about a Neutrino, is that the word? (RP) Yes. yes. (RC) It's not Neutrine, it's Neutrino. (RP) Okay neutrino, okay. (RC) And there's also Cosmic rays. Right? That's ... something ... (RP) ... something like this. They detect it in the mathematic, in the physic theory, that... the same package of energy, it's there that change the structure of the Matter. and I suppose, they know it's something's there, I don't know if it exists actually. But the thing is... (RC) They... they've measured the Cosmic rays recently, some very extremely, the highest energy Cosmic rays they've ever measured, and they come from outside of the Milky Way Galaxy. And, none of the rays in the Milky Way Galaxy are as strong, as these ones we're measuring from outside of the Galaxy. And they hit the Earth but only at a rate of about one in a square kilometer per year, of these rays. Probably fortunately, because they are so strong. But, that was in the news

recently, if that's part of what you mean? (RP) Yeah. (RC) What about, what about that is ... (RP) But my understanding, they are more than one per square meter. But probably. (RC) There, there's other rays, like I think the Neutrinos you're talking about. are supposed to be billions per square centimeter, hitting our... (RP) My question is just because they change the environment and the Matter, when form a super structure. That bring me to the knowledge of the pyramids, because they are build with the face to the cardinal points, because they run in that direction, and when they got inside the structure, like a pyramidal structure, they slow down, and then, they are trapped to the inside, they can, they slow down because they come under the speed of light. So, they don't manage to go out of there, and that it, what the theoretic say, that it change the structure in the chamber of King, in the pyramid, when they go around and around, and they always passing that area, and change the structure of the Matter. So, I don't know if you can say something about it? (MK) Neutrinos or whatever you call, they are one of many Fields, or packages of the Fields which live ... which exist in Universe, as the energies transfer. ... There is a system that they put tanks, with certain heavy waters or light waters, to see how much photon, one of them might hit, that they can detect to confirm their existence. There is no difference between that or anything else, it's just a level of the energy which is delivered as a package. And, when it reduces enough ... in strength, that the scientific belief is that some of these neutrino, still goes through these tanks which are set up, and creates no photon. But, in reality is, if it's at a higher strength, or there is not enough Mass to slow it down, and the space gap is long, big enough, that the Field, as a Ray, can go through it, we don't measure it, we cannot see it. So ... Fields are not exclusivity of what name Man has created it. There is ... packages of them. Soon in Space we'll see them. When we open up the door of the space in Space, these are part of the things which will become across. It's very much as I said in many of the teachings, none of us, or maybe some of us, suddenly see a flash of light in, in our eyes. Maybe, somebody did somewhere, or somebody we never could understand, "What was sunny I saw a flash in my eyes?" But when we send Man up, a few kilometers further up, where the shielding of the Physical Field interaction of the Earth, is not strong enough to stop, astronauts reported a lot of flashes in their eyes, like somebody flashing a light. And now we understand that

I've explained in one of the teachings, in NASA forums, years ago, I explained this why, and then ... we went through developing a helmet that can slow down, which was at that time, was a surprise thing, but in fact was the Nano layers, which now we produce freely all of us, that we could slow down or stop these, absorb the energies in the Nano layers. So ... when we go to Deep Space we'll see more of high level energies, because the shielding of the Earth is non... exist, but many of these different names of Fields, which we haven't even got the system to detect them, crosses the Earth, all the time. And for everything which goes through, there has to be a reverse back, there is something traveling back, because is changing the position. And when you change your position, there should be interaction of what you have changed. It's very simple. So these energies, whatever it, now we understand it, the reality in the science of the Plasma Physics, we just got to find out, or understand that, this is where it releases, or its energies level reduces enough that it can manifest itself as light. Neutrinos are another name for another energy package. I can see ... Rick putting something on the table. He wants to show us something? Hello Rick? (RC) Yes, hi Mr Keshe. I was just ... we were talking about energy packets and the inter-relationship of things in the Universe and that kind of thing, and we were just playing with this setup here we have, with some... a piece of plastic on, on a ... bulletin board sort of background here, but we have some objects, three different sizes, you're talking about the interactions of the, larger and smaller bodies, and how they interact with their energies and so on. So, we can kind of see, how that works in this environment. And it's interesting, because there's no magnets involved, and yet these entities will interact... if we just... (VV) Can I interrupt you for a sec Rick? (RC) ... Yes. (VV) It's just... It's just kind of blurry. Do you think you can try to get that a little a bit ... focused. (RC) Yeah. Okay, that's a good idea. I think it's just the auto-focus here, let me try to auto-focus ... Take the auto-focus off actually. Okay that's a bit better there, I think? We need crop, put on the light up there Guy. Need a little more light I think might help. And I'll try to zero in a bit more... because that's as far as it'll go Okay ... let me try it again here. It's a very interesting ... interaction, that happens when we can get it just right, at least. I don't even really need the ... (MK) Yeah but, this is the static energy transfer, which you create, (RC) Yes, essentially, and once we get it going, it actually can...

If I get going properly here, but sometimes it'll ... last for quite a long period of time, you think it's kinda stopped but, all of a sudden things happen. (MK) You see, one jumps and the other one has to position itself. (RC) Yes, and they always they don't stick to each other, they always have a positive positioning from each other, and we can kind of... (MK) Yeah, but It depends... you see them still standing, but they're still transferring energy. If you leave it, maybe another... you see them a few seconds. (RC) Uh-Hm, yeah. (MK) It's ... collection of energies, which sits in there, and depends how much they transfer to each other, they... they move. This is the static energy, but it's a good representation of how things position themselves. (RC) Yeah, give it more room there like... Woops, I can.. (MK) Yeah, and your big one is stuck to the glass, that's why it doesn't move. You got to take the big one out. (RC) In a way, the big one ... big one sometimes gives to the ... interactions. but what's happening is, they're all jammed up at one end, if we were to give it more space, so to speak, it probably would have a little more action in there. Maybe, we take the big one out, sometimes they jump around better there, as well. It's kind of a temperamental thing, it's ... (GT) And then it just may keep... (RC) May or may not keep going after that, it's... there's no... no rules that we can see ... sometimes it... (GT) It just keeps going, sometimes for thirty seconds. and here it keep... it keep coming and moving. Right now it didn't do it, but... (RC) Their camera shy, every time, we try to show something ... (MK) I think you better take the big one out. (RC) Yeah, we can try that, uh-hm. (RC) This was the ... saucer shaped, it's got a piece of Styrofoam inside. Sometimes it undoes the charge more than doing it, so. And sometimes just using a bare hand, will, yeah, this might be all it takes. (RP) Hi Rick, can I make a suggestion? It's Rui. I saw you made some movements in clockwise, the other ... movements, anti... opposite. So, maybe they behave different way? Either use one movement or the other movement? (RC) Yes, that, that does seem to be an influence as well ... But also you can use just ... length-wise strokes, for example, if I was just to use my hand, like this. (RP) Yeah, this gonna interrupt already the fields are there. But clockwise and opposite movements, it gives different ... kind of Fields, ... in my understanding. (RC) I think the hands work pretty good. [chuckles] They work better than the ... (RP) Yeah, the hands mix the Fields. (RC) Hand still, still working, where as the... the bunny, bunny fur didn't ... have a lasting effect as

well. I bet that's still going to kick in a little bit now. That's interesting anyway, to see the relationship and we showed it before, with magnets, how magnets can repel and attract and so on. (VV) But this you can use yourself as the magnets, so this is a complete interaction with yourself. (RC) Yes, right. And n... we can end up, there's times when you can actually use your hands to move some of the balls back and forth, quite, quite readily, and not only that, but ... let's do a little thing here ... take these and put them on top. Woops they're not charged right now, are they? (VV) You can rub your feet on the carpet too and that might help. (RC) So they start to maintain their own ... positive positioning... (MK) It's a very nice Nano-layers, huh? (RC) Yes, it does look like Nano-layers and sometimes ... you can actually ... get them to... form combinations and so on, and what I noticed today which is really interesting, normally these, since they're all charged the same, they'll keep a gap between themselves. no matter what you do, they'll tend to ... to keep a gap, but if I rub this differently, like on my shirt... It'll stick and all of a sudden we have a molecule... (VV) That's a good example of ... Gravitational and Magnetical (RC) These are now sticking together, yeah, all of a sudden. So now we have this... for example yeah, I can create a water molecule by having this positive one here sticking that one to it, rubbing another one on my shirt instead of the ... uups ! it's supposed to stick on there. Come on now... yeah, I got the end of that one (GT) It doesn't want it. (RC) I think you got it together there, I've give it a different charge from the ... the other... see, the thing about it is this... this... bunny fur has one charge and my vest material, which is full of bunny fur from our experiments. It has a different charge. So, one of these is bunny fur charge and the other two is vest charge or vice versa. But it's like a water molecule a H<sub>2</sub>O, two Hydrogen's, one Oxygen and they and... it's even formed in the right sort of angle there and so on. And it's funny because normally if you just give, if you give all the bunny fur charge them they stick very exactly and maintain their position and don't like to be together basically... but they maintain a very ordered position too, if you get them all set up and a bunch of balls together, and you can actually influence them well at times, I can influence them... not right now ... there's times when you can get them ... actually going ... it's not cooperating, I'll try a bit more with this one here, We'll Just trying Now, it's got the opposite charge, if I put it on my vest, probably it'll stick to the surface. (MK) These are static energies, or it's a

Field flow? (RC) Well, I think static is... I think they misnamed static to start with. Just to ... perhaps they even mislead people a way, because to me it's very much a... a dynamic ... situation. These guys, ... like you're saying Mr Keshe, they are always changing and adapting to their local (MK) Are these are these poly... poly... .. poly ethylene balls? (RC) ... These are ...styrene I think they are ... (MK) Polystyrene. Yeah? (RC) Yeah just poly... (SK) polystyrene foam (RC) ... solid polystyrene or whatever inside. It's ... solid inside it's not a hollow ball. The ping pong balls will also be influenced this way in fact, we have one here that strangely enough I had some GANS inside if this... I think it was ... I think it was the ... CO2 GANS on that one. (GT) I mean now they are on camera. (RC) Right, on this ping pong ball here, and ... we have this other deal rigged up here with this ... this ... PVC rod and you can hear the... when I charge it up with this bunny fur. You can hear the static and strangely enough... I don't know if it'll... yeah it actually ... well it attracts that little ball too but... you can see that it attracts that... it attracts that GANS ball pretty... pretty strongly (GT) Almost stronger than anything else. (VV) So, if you rub it on your shirt does it repel it? (RC) Well, see how it doesn't really effect those other ones, right. But yet... yet this ... it's attracted. Everything else gets repelled by this rod for some reason but this ball that had GANSes inside of it, now it's pretty much empty. ... Somehow, it gets very much attracted to the ... to the sub... Yeah, if I rub the ball with my shirt, let's see what happens. Put it back down. (RC) I have to rub the rod again probably. Yeah, it's very much attracted still. So, anyways that's interesting, how that works. You can see actually the inkwell guy down in there is quite attracted to this as well. So... Yeah, anyways, so there's interesting ... I'd recommend people can set up a piece of plastic and ... some of these cheap Styrofoam balls that you can get. And all of a sudden, you can actually have hours of fun and you don't have to be a kid, You can be like Guy and I instead and we've been playing around with this trying to ... find out what (RC) Pardon me? (VV) Sorry, somebody's mike was open. So I muted him. (RC) Okay thank you. So I... in... in short it's ... a fun way to experience ... some of the Field interactions basically of ... and you get some surprising... some surprisingly fast action happening like that is quite a bit for a ... aluminum foil covered Styrofoam balls... it's just make some fast changes... and like I said did I before... you can actually... I... I had it set up before where I could use my hands

to push a ball. In fact, Guy and I were playing sort of a... a ping pong game, right Guy with... (GT) Uh-hm. That were hands, (RC) on each side with our hands pushing the ball back and forth at a pretty good rate. But, you have to be tuned in to it, you have to get your charge together and ... you know, it's an interesting game because then you find out who can push the hardest with their charge and... on their hand, basically. And sort of a way to ... to judge... Now, there's another consideration if this... if they unit, for example, is full of balls, especially the smaller ones like you know the medium, yeah, little guys, the white ones like those. And... you have... a lot of them in there, or alternately a smaller container, maybe half the size or a quarter of the size even. And once that get's all... once it gets all charged up. Hope, this will be enough to begin... ... Here's the bunny fur ... and we'll be able to take the bunny fur this time. Sometimes the bunny fur works and sometimes the... the hands work best. Starting to get a bit of action there now. ... But under ideal circumstances I think the aluminum balls actually work better though don't they. They're deep in the... (GT) Yeah, yeah, they seems to be more... active and jumpy and... reactive. (RC) I think my hands are as dry as they should be right now they're starting to get moving there a little bit. All right call me a giver. Okay, there's a little bit of action there, but what happens is essentially is you can use this as a censor for the Fields. You can see how my hands interact with these balls once it's filled with balls. I was able to... earlier to put my hand down and the balls all moved away from my hands. So it left sort of almost a hand impression in here amongst the balls. So, it made me realise that... it... this whole system is sensitive to ... the Human ... the Human Field, the charge, whatever it is The charge, whatever that is in terms of, you know, what is the charge. That's a good question maybe Mr Keshe. What is the charge that you know comes out... that our body is able to ... to ... interact with other, other entities with this ... charged... (MK) It seems that your neutrinos are not strong enough. (RC) Yeah [chuckles] we needed boson neutrinos You'll have to take your (MK) ... If you... you see, if you go extend this further to movement of the energies and Fields, you can move glass balls. You can move glass tubes, it's just that you have to create the right Field. And you create the right conditions for the Fields to move and position themselves. Thank you very much Rick. (RC) Thank you Mr Keshe (MK) I saw the presentation before, it was nice. ... Thank you

indeed. ... Is there any other question? Because we've passed into three and a half hours. (RC) We could probably ... wrap things up here. ... (MK) Are there any other questions or any other points? (BB) ... Mr Keshe ... this is Boniface ... greetings. (MK) Yes. Good morning or good evening to you. (BB) I have a... a quick comment and ... a Wish. You were talking about the books ... a few minutes ago. And ... I recall the... to some students at... I think it is Sudan. That basically they could download ... the books. Cause they wanted ... actually, this year's book. (MK) It's already been done. It's already been done. (BB) Okay. ... The point I wanted to make was ... I did the same thing and I... I got the first two books. And... you know, I read the first and ... one was down with the second one and I was very impressed with the... what I saw, But, my Wish is that... perhaps the... the Foundation could look into spending a little investment and as far as editing at least the English version. Because, I found that... (MK) Did you get the book number I or II ? (BB) I got both of them. (MK) Yeah. (BB) And... (MK) The book number I is historical because it was written a way, I wrote it. Book number II has been edited by a English language editor, which we had to change it once. Because, she's said, "I read it..." "I wrote what I thought whatever you are writing." I said, "the editing is that you just find the mistakes and the book number I, II and III been edited by the same lady and if you go in the book it says in front, "thank you very much for editing." She's an English speaking ... what do you call it, "editing" ... that's her job. And we had to stop some of it because she wrote what she thought, she has... she understood. We stand in discussion with her was, "you don't write", and she had to do it a second time. So, it's been edited... I prefer myself the first edition because it's got a lot of spelling mistakes or whatever in it, but it is very nice, because it's the essence the way I wrote it. (BB) Uhm (MK) And... We... we that's why we did the second edition and all the publications, we go according to the second edition. But some people are asking for the first edition only, because they want to read it the way it was written originally. (BB) Newcome. (MK) Thank you very much. ... Is Ella there in the background please? Is she awake, because she was working late hours last night. Do you see Ella anywhere? Stanley is she around? So, she's not there. ... She has done the Universal what we call, 'ID Cards' for ... and for the banking system and it's been... it... it looks more or less, what we need to be... and hopefully she'll

issue this week. ... Completely it's the process is ongoing... we... we going we're done in the next steps with our ... issuing and developing these cards. And... once it's completed and negotiations with the company which... will be printing these starts in... we can completely finish the whole process. ... Then, it'll be issued in conjunction with a banking account, for everyone around the World to be able to use it. ... I was hoping that she would be present today, that she could show it. We all will see it next week... once she's submits it to the management team of the Keshe Foundation. If there is no other points, we would like to stop it's nearly four, three and a half hours, four hours into these teachings. Any other points? Or any other questions? (RC) Well, I see there was a longer question in the Q&A. I... I've... probably, gotten missed earlier, ... I'm not sure it's getting kinda late here for another question? But do you want to take it on, as a quick answer to it, perhaps? (MK) What, I don't know? Till you read it I don't see. (RC) Well, let me give it a try. Mark asks, "Regarding the topic of vertical people." "The Souls of the cells of our Human bodies are living in the Spaceship of the Human body, being fed by the higher dimension level Soul, the consciousness that we perceive as "I". "At present we Humans are horizontal people because we feed by stealing energies from the same dimension as we live in, by eating, drinking, burning etc." "The point I wanted to make regarding becoming vertical people as Humans is creation of the so-called, 'Christ body' Spaceship." "The being that is formed by Human Souls as cells in a higher level body." "Trees are already vertical people as they are fed by the energy of the Sun, a being in a higher dimension compared to their Soul." "That is how I understand the terms vertical people versus horizontal people, from another perspective." "Matter is fed by Nano-layers, Nano-layers are fed by GANS, GANS is fed by Free-Plasma layers or dimensions of a ... or Plasmatic filtering." "Layers or dimensions of Plasmatic filtering." And that's ... so he goes on to say, "the whole point is the evolution of consciousness, Oneness." I see he went on here , "the being..." "the being called the 'Christ-body' is the One Planet, One Nation, One Race. Some inspiration for the not 5% going into Space." End of that ... transmission. Any comments Mr Keshe? (MK) No, in a way, it's... everybody takes from the knowledge according to their understanding and what they feel it should be. ... Our problem is not ... It's not a problem, in so many ways, we have arisen, we have enlightened so many with this new understanding

of the structure of the science of Matter and Physics and Plasma. That it's very, very strange. And should not be strange, that we see right across the Keshe Foundation, from Doctors to Scientists, to layman, to housewives, to children we all gathering the same knowledge for the first time and we are elevating our own Souls equal, according to our prejudices and understanding. And, when ... when I listen to some of the teachings, when I listen to some of the workshops and people come on and they say what they do, what their job is. And then, before that we look at their knowledge they bring in, the... the Soul they bring, the knowledge of the Soul, more than anything else. We see that... I told myself., "I have achieved what I came here for, in so many ways." Because, every Soul is getting enlightened, irrespective of physical position and condition. Thank you very much for today, we've run into nearly four hours time. We are trying to keep that we... we don't go over the time of it. ... There'll be new progress, new advancements in the knowledge of the understanding. ... If you like to ask questions or you listen afterwards and you would like to ask questions write your questions to the [webmaster@spaceshipinstitute.org](mailto:webmaster@spaceshipinstitute.org) and we try to bring your questions on, to be answered from the ... from this section or we build a section for these people who, you listen during afterhours and different channels later on, or you listen to the translation of, or transcription of the teachings. Write, send your questions directly to the Foundation and we'll try to, every week bring some within, if we can. And answer it that you don't have to be here, if you have a question to ask or you don't need to speak English. And I thank the transcribers group in the background with all the hard work which you do and it's a pleasure to see you with all your funny faces you make. Thank you very much. See you next week. (RC) Very good... thank you Mr Keshe thank you so much once again for another outstanding workshop. And this was the 192nd Knowledge Seekers Workshop for Thursday October 5th 2017 And, as always thank you everybody for attending and ... we'll .... I think we're going to end with some music here, with ... Flint, I believe has that ready to go. So, please take it away Flint.
